A RELIGIOUS AND LITERARY JOURNAL.

VOL. XLV.

SEVENTH-DAY, EIGHTH MONTH 26, 1871.

NO. 1.

PUBLISHED WEEKLY.

Price Two Dollars per annum, if paid in advance. Two dollars and fifty cents, if not paid in advance.

Subscriptions and Payments received by

JOHN S. STOKES,

AT NO. 116 NORTH FOURTH STREET, UP STAIRS,

PHILADELPHIA.

Postage, when paid quarterly in advance, five cents.

For "The Friend."

A few years since, a series of Scientific Lectures, for the benefit of the working classes, was commenced at Manchester, England. The entrance fee was fixed at one penny, and the deficiency in the necessary expenses was debarred by some liberal and public-spirited men. The experiment was highly successful, and a second series was delivered during last winter. Both series have been printed in a volume called "Scientific Lectures for the People." In its pages we find the following clear and interesting description of the manner in which many of the boulders that are spread over various parts of the earth's surface, have probably assumed their present form, and been transported from the rocky strata of which they once formed a part. It is condensed from a lecture by Prof. Williamson, entitled

THE NATURAL HISTORY OF PAVING STONES.

"If I take a walk with you to a Manchester brickfield, we shall discover that we are most interested in precisely that part of the field that will be the greatest abomination to the brickmaker. The brickmaker likes the nice, smooth, soft clay, without any stones in it, which to the geologist is about as stupid a part of the field as he could have. The geologist, on the other hand, likes to find a place that is full of gravel and sand, and huge boulder stones of every shape, and sort, and size—the very abomination of the brickmaker. I have here certain boulder stones that were taken from a Manchester brickfield. What have I in my hand? It is a mass of granite, rounded just like the rocks on the Cumberland coast. That granite has been transported from a considerable distance, because we have no granites nearer than Cumberland. The nearest granite we have to this locality is that of Shap Fell, in Cumberland. The granite from Shap Fell is a very remarkable granite, from the large crystals of flesh color which distinguish it. I have here, from this same brickyard, a piece of Shap Fell granite. The features of it are so remarkable that you could not mistake it, if you knew what Shap Fell granite was. Now this Shap Fell granite, rounded and water-worn, has been brought to a Manchester brick-yard. How has it got here? I have here another boulder. There

is nothing particular about the appearance of this boulder, except that it is a piece of limestone. It, like these other stones, has been brought to Manchester from a distance. But it tells me another story. It has another tale to record. I see that this surface is grooved, as if covered with the marks of a file. I turn it round to the other side, and I see that it is filed and grooved in like manner; but these grooves are not parallel with the former grooves. Here is a second flat face. It is very evident that in some way both these faces have had a good scrubbing, that has involved something more than a mere washing of the face. There has been an action which has flattened that surface and grooved it at the same time. Now we want a theory that will explain all these things. We want a theory that will mix together rocks of all kinds, that will mix them up with clays and with sands, and with an endlessly varied set of materials. We want a theory that will make some of these rocks round and grooved and streaked. We want a theory that will explain why some rocks that are transported are as angular and as sharp as this specimen. In order to give you such a theory, I shall have to carry you half way across Europe. I will begin by taking you to Switzerland. Here is a photograph I took in one of the loveliest scenes in all Switzerland. Here you have the Mer de Glace, that great stream of ice which has been celebrated in almost all ages as one of the loveliest spots in Switzerland. The Mer de Glace belongs to that range of mountains of which the peak of Mont Blanc is the centre, and it is only a few miles away from that great mountain. This is a glacier. Those mountains which you see on all sides of the glacier are within the limits of perpetual snow; summer and winter, wherever there is a ledge upon which the snow can rest, it remains unmelted. This accumulation of the snow would in time entirely hide and bury the mountains, unless nature had provided some way for getting rid of the surplus. She has provided such a way. The pressure of the snow mass on the upper parts, forces the lower snow down into the valleys. Then that snow, partly under the influence of the intense cold, and partly under the influence of the pressure to which the particles are subjected, becomes re-frozen, becomes consolidated, not into snow, but into a mass of solid ice; and by a wonderful series of changes, which my time will not allow me to explain, this icy mass flows down the valleys of these alpine mountains, fitting itself to the various curves, to the windings and narrowings of these valleys, almost as if it were a fluid. These glaciers move from the higher valleys into the lower ones at a very slow pace, but one which is capable of being measured. But what takes place as they do so? These magnificent mountain peaks, composed in this instance chiefly of granite, are being continually disintegrated by the cold of winter, by the

rain, storms, and various atmospheric agencies that affect the surface of the globe. Huge fragments come tumbling down from above, and of course these fragments fall on the ice; so that, as the ice moves, it carries all these rocks along with it. You will understand that when these masses of ice come down from the cold valleys above into the warm valleys below, the ice necessarily melts. Were it otherwise, those splendid scenes would become simply one sheet of polar ice. It melts, but the stones that it carries wont melt; consequently they have to stay there. As the ice melts, these stones drop down. In this way we see that the glaciers not only receive from the mountains on each side immense masses of rock, but that they carry these masses of rock along with them down to the lower valleys. There is no doubt whatever that a very large quantity of material that we now find spread over the surface of the globe has been conveyed in this way.

"But this alone would not account for the phenomena of our Manchester brickfields. We want something more. We have evidence clear as the sun at noonday, that the material of which our Manchester brick fields, and the brick-clays over a great part of the world are similarly composed, have been brought thither by water. They have been deposited under water. We frequently find sea shells in them. We have the clearest evidence, I repeat, that these remains have been accumulated under the sea."

"We will now transfer ourselves from Switzerland to Smith Sound, in the Polar regions. In the extreme winter masses of ice extend right across the Sound, from side to side. As the summer approaches, the central ice breaks up speedily, and floats away; but long belts of ice hold their ground around the coast for a considerable part of the year, and sometimes they fail to break away from one season to another. Now these blocks, or masses of ice, technically called 'ice belts'—because they belt round the coast—receive masses of rock in precisely the same way as the glaciers did in Switzerland. Thus we see that these blocks of ice would carry away with them blocks of stone, if any circumstances occurred to detach the ice from the land. The detachments take place perpetually, and they carry away with them these blocks floating upon their surface. They are high ice-rafts, which sail southwards, impelled by Arctic currents. But this is not all. We have some glaciers in these polar regions, of precisely the same nature as those of Switzerland; but, instead of the polar glaciers being comparatively diminutive—a quarter, or half a mile across—the great Humboldt glacier is 50 miles across, from one side to the other, and yet that Humboldt glacier, which comes right down into the sea, is bringing stones along with it in precisely the same way as the other glaciers. Now, with such prodigious masses of stone-covered ice as this existing in the northern

seas, you will not wonder that from time to time icebergs of the most gigantic size are met with, floating out of those northern bays and straits. Remember that what are called icebergs are merely either fragments of this belt of ice of these Arctic glaciers broken away, or portions of that huge mass of ice which in winter covers the whole of those regions—when you see that these ice formations exist on so gigantic a scale, you will not wonder that icebergs are met with in these seas, sometimes a mile in extent. If you realize that, when you have an iceberg of this size, it floats with its summits two hundred or three hundred feet above the sea, and that it sinks below the water, some six or eight times its elevation, I think you will readily understand how that floating raft would be able to carry a very considerable slice of Penmaenmaur upon its surface!

“Now let us see how all this applies to English scenery. I have told you that the glacier moves steadily down the valley. You saw from the diagram that the glacier is cut up by deep fissures, called crevasses, that go down frequently to its very bottom. The stones that appear upon the surface of the glacier fall into these crevasses, and at the bottom they become entangled in considerable numbers in the solid ice. Many of them are angular. But you will also understand that if that vast mass of ice, filled with stones, is moving steadily downward over the rocks of which that valley consists, those stones will act like the teeth of a huge rasp; that they will plough, just in proportion to their size and sharpness and hardness, deep grooves in the rocks along which the ice is travelling. The stones themselves, being imbedded firmly in the ice, will scratch and scour over the rocks over which they move; and this is precisely what we find that they do. Sometimes the ice retreats, leaving behind the smooth and polished rocks, over which it formerly travelled; the changes of seasons frequently lead to its doing so; the glaciers not infrequently recede up the valleys in hot seasons and come down again in cold ones. When the ice recedes we see that the rocks are scored and grooved and polished in the way we should expect them to be. But if they receive this rough sort of treatment, what might we expect to be the result upon the teeth of the rasp? Workmen know perfectly well that when they use their files upon hard metal the angles get worn off. It has been so here. We could readily understand that if this stone was embedded in the ice, and formed one of the teeth of our great Arctic rasp, that its surface might well be flattened and grooved with longitudinal grooves. Here, then, we have an agent capable of producing grooves. Then, if these icebergs float upon the ocean, carrying rocks with them, they will travel southwards, carried by currents, and, as they come into warmer regions, they will share the fate of the Alpine glacier. Floating upon the sea does not save them; they melt little by little, and as they melt the rubbish that they are supporting falls to the ground. The result is that large portions of the sea bed are being strewn over with blocks of stones—angular blocks, rounded blocks, sand, rubbish; every conceivable kind of produce that those northern mountains furnish is being gradually brought southward, and scattered over the bed of the Atlantic at the present day. And precisely similar pheno-

mena were taking place during one of the latest of the geological periods when nearly the whole of our island was under the sea. There was a time, comparatively recent, geologically speaking, when our island was under the sea, but when the mountains of Wales and Scotland stood out like islets from the Arctic ocean. The great valleys of Snowdon were filled with these glaciers. If you go up the Pass of Llanberis, you will see on every hand the indications of the fact in the rounded rocks, and in their scored surfaces, that abound on each side of the road. A little above the village you see them beautifully exhibited; and in the same way, throughout the district of which Snowdon is the centre, you have these indications of glacial action so numerous and so clear, that not a shadow of a doubt remains that the Snowdonian valleys, as well as the valleys of Cumberland and Scotland were, at the time of which I am speaking, filled with ice glaciers. Now all these glaciers—along with others coming from hundreds not to say thousands of miles away, as well as from mountains in the immediate neighbourhood—brought their produce to the same bed of the ocean, and as it was all tumbled down into one common mass, you find materials in the shape of mud and sand as well as coarser materials, including both rounded and angular blocks, accumulated in the same sea bed. Now I think you will see that I have brought before you an explanation that fully accounts for the miscellaneous kind of admixtures that you find amongst the sand, and clay, and gravel beds whether of a Manchester brickfield or of the coasts of Cumberland and Yorkshire.”

Selected for "The Friend."

“I am a stranger in the earth; hide not thy commandments from me.”—Psalms cxix. 19.

The feeling of being but strangers and sojourners here is by no means natural to us; on the contrary, so strong are our earthly attachments, and such is the force of habit and the influence of sensible objects, that it is difficult to feel otherwise than at home in this world, and not to wish that we could find a rest in it. Even the daily evidence we have of our uncertain possession of it, in the warnings which diseases and death are continually holding up to view, is insufficient to produce more than a momentary recollection. Hence the necessity of prayer; of such appropriate petitions as those with which David never failed to follow up his own reflections; knowing that otherwise they would be wholly unprofitable to him. And when he prayed that God would not “hide his commandments from him,” he surely meant something more than that he might become accurately acquainted with the laws of God contained in (Holy Scripture.) There can be no doubt that he was already well furnished with this head knowledge; but he knew there was something more than this necessary, and that much more was promised—“the secret of the Lord is with them that fear him”—even that spiritual understanding of his word and will which is often “hidden from the wise and prudent, and revealed unto babes.”

There are many things concerning the commandments of God which he will hide from us till we beseech him to discover them to us. But there is one mistake which, especially, we are sure to fall into; indeed, it is the grand delusion which we bring into the world with

us, and which is the cause of all our misery; namely, that we think “his commandments grievous.” And, although he assures us to the contrary, and though every day’s experience tends to convince us that we are happy or miserable exactly in proportion to the diligence or carelessness with which we observe these commands; yet do we continue to feel and think them a bondage, and to wish to rid ourselves of the yoke and the burden, till Jesus himself, by instilling his grace, and writing his laws in our hearts, convinces us that the “yoke is easy and the burden light.”

The views which our depraved nature gives us of the laws of God is, that they are the arbitrary mandates of a hard master. “I know thee that thou art an austere man,” is exactly the feeling of the heart towards Him naturally; but when we are divinely taught to know God, and to learn his will, then we admire his goodness in this especial respect, that all his commands tend to save us from misery; and that the restrictions which his law imposes, are as essential to our happiness and welfare in this life, as they are to our safety and felicity in the life to come.

We prove ourselves to be but strangers in the world, and unacquainted with its true character by our constant inclination to partake of its “mortal poison,” and to drink of its dangerous waters, instead of contenting ourselves with the wholesome fruits and pure springs which are provided for our refreshment. Our first parents set us an example in this respect, which all their children are prone to follow. But those who are taught of God, learn to discriminate between good and evil; and see it to be as much their interest as their duty to refuse what is prohibited, even though it should appear fair as the fruits of Paradise.

Let it ever be remembered, that when we feel most at ease and at home in this world, when its delights seem to satisfy us, and its ties most closely unite us to it; when we show ourselves to be strangers to its snares, bewildered and endangered by its thorny mazes—we then have most need to say,

“Since I am a stranger here below,

Let not thy path be hid;

But mark the road my feet should go,

And be my constant guide.”

—Jane Taylor.

The Camel.

I have, while in England, heard and read more than one of the “docile camel.” If “docile” means stupid, well and good; in such a case the camel is the very model of docility. But if the epithet is intended to designate an animal that takes an interest in its rider so far as a beast can, that in some way understands his intentions or shares them in a subordinate fashion, that obeys from a sort of submissive or half fellow-feeling with his master, like the horse and elephant, then I say that the camel is by no means docile, very much the contrary; he takes no heed of his rider, pays no attention whether he be on his back or not, walks straight on when once set a going, merely because he is too stupid to turn aside; and then, should some tempting thorn or green branch allure him out of the path, continues to walk on in this new direction simply because he is too dull to turn back into the right road. His only care is to cross as much pasture as he conveniently can while pacing mechanically onwards; and for effecting this his long flexible neck sets him at

great advantage, and a hard blow or a downright kick alone has any influence on him whether to direct or impel. He will never attempt to throw you off his back, such a trick being far beyond his limited comprehension; but if you fall off, he will never dream of stopping for you, and walks on just the same, grazing while he goes, without knowing or caring an atom what has become of you. If turned loose, it is a thousand to one that he will ever find his way back to his accustomed home or pasture, and the first comer who picks him up will have no particular shyness to get over; Jack or Tom are all the same to him, and the loss of his old master and of his own kith and kin gives him no regret and occasions no endeavor to find them again. One only symptom will he give that he is aware of his rider, and that is when the latter is about to mount him, for on such occasion, instead of addressing him in the style of Balaam's more intelligent beast, "Am not I thy camel upon which thou has ridden ever since I was thine, unto this day?" he will bend back his long snaky neck toward his master, open his enormous jaws to bite if he lared, and roar out a tremendous sort of groan, as if to complain of some entirely new and unparalleled injustice about to be done him. In a word, he is from first to last an undomesticated and savage animal, rendered servicable by stupidity alone, without much skill on his master's part or any co-operation on his own, save that of an extreme passiveness. Neither attachment nor even habit impress him; never tame, though not wide awake enough to be exactly wild.

One passion alone he possesses, namely revenge, of which he furnishes many a hideous example, while in carrying it out he shows an unexpected degree of far-thoughted malice, united meanwhile with all the cold stupidity of his usual character. One instance of this I well remember; it occurred hard by a small town in the plain of Ba'albec, where I was at the time residing. A lad of about fourteen had conducted a large camel, laden with wood, from that very village to another at half an hour's distance or so. As the animal loitered or turned out of the way, its conductor struck repeatedly, and harsher than it seems to have thought he had a right to do. But not finding the occasion favorable for taking immediate quits, it "bode its time;" nor was that time long in coming. A few days later he saw the same lad had to reconduct the beast, but laden, to his own village. When they were about half-way on the road, and at some distance from any habitation, the camel suddenly stopped, looked deliberately round in every direction to assure itself that no one was within sight, and, finding the road far and near clear of passers-by, made a step forward, seized the unlucky boy's head in its monstrous mouth, and lifting him up in the air flung him down again on the earth with the upper part of his skull completely torn off, and his brains scattered on the ground. Having thus satisfied its revenge, the brute quietly resumed its pace towards the village as though nothing were the matter, till some men who had observed the whole, though unfortunately at too great a distance to be able to afford timely help, came up and killed it.—*Falgrave.*

If that would not be thought a fool in *other's* conceit, be not wise in *thine* own.

For "The Friend."

Music.

The following extracts on music are abridged, the first from "The Portraiture of Quakerism," by Thomas Clarkson, the second from a letter written by a member of this religious Society to a friend then temporarily absent from home, who had made some allusion to being tired of hearing music:—

"There are few customs, against which some arguments or other may not be advanced; few, in short, which man has not perverted; and where the use has not become in an undue measure connected with the abuse. Thus the food which has been given him for his nourishment, he has frequently converted by his intemperance into the means of injuring his health. The very raiment, which has been afforded man for his body, he has abused also, so that it has frequently become a source for the excitement of his pride. Just so it has been, and so it is with music at the present day.

"Music does not appear to the members of the Society of Friends to be the foundation of any solid comfort in life. It may give spirits for the moment, as strong liquor does; but, when the effect of the liquor is over, the spirits flag, and the mind is again torpid. It can give no solid encouragement, nor hope, nor prospects. It can afford no anchorage ground which shall hold the mind in a storm. The early Christians, imprisoned, beaten, and persecuted even to death, would have had but poor consolation if they had not had a better friend than music to rely upon in the hour of their distress. And here I think the members of this Society would particularly condemn music, if they thought it could be resorted to in the hour of affliction, inasmuch as it would then have a tendency to divert the mind from its true and only support.

"Music, again, does not appear to them to be productive of elevated thoughts; that is, of such thoughts as raise the mind to sublime and spiritual things, abstracted from the inclinations, the temper, and the prejudices of the world. The most melodious sounds that human instruments can make, are from the earth, earthy. But nothing can rise higher than its own origin. All true elevation, therefore, can only come, in the opinion of the Quakers, from the divine source.

"The Quakers, therefore, seeing no moral utility in music, cannot make it a part of their education. But there are other considerations, of a different nature, which influence them the same way.

"Music, in the first place, is esteemed a sensual gratification. Even those who run after sacred music never consider themselves as going to a place of devotion, but where, in full concert, they may hear the performances of the master-pieces of the art. This attention to religious compositions for the sake of the music, has been noticed by one of our best poets:

—'and ten thousand sit,
Patiently present at a sacred song,
Concomitantly mad, content to hear,
O wonderful effect of music's power,
Messiah's eulogy for Handel's sake!'"

Couper.

"But the Quakers believe that all sensual desires should be held in due subordination to the pure principle; or that sensual pleasures should be discouraged as much as possible, as being opposed to those spiritual feelings which

constitute the only perfect enjoyment of a Christian.

"Music, again, if it were encouraged in the Society, would be considered as depriving those of maturer years of hours of comfort which they now frequently enjoy, in the service of religion. Retirement is considered by the Quakers as a Christian duty. The members, therefore, of this Society are expected to wait in silence, not only in their places of worship, but occasionally in their families, or in their private chambers, in the intervals of their daily occupations, that, in stillness of heart and in freedom from the active contrivance of their own wills, they may acquire both directions and strength for the performance of the duties of life. The Quakers, therefore, are of opinion, that, if instrumental music were admitted as a gratification in leisure hours, it would take the place of many of these serious retirements, and become very injurious to their interests and their character as Christians."—*Portraiture, &c.*

The letter alluded to follows:—

"I am right glad to hear of the overdose of music, and hope the sober-minded public may in due time be in like manner affected; and do expect they will be, in a degree at least, after awhile. At the hospital for inebriates, they cure by mixing the intoxicating liquor with every article of diet, and so produce such disgust that the very smell of spirits is loathed. Just now, multitudes of educators hold music to be a potent educational force, which they imagine is to work out great moral, if not even religious, results.

"Well, we can easily understand that the pleasing concord of sweet sounds may quiet the insane who have neither reason nor conscience to which to appeal; or that a cross baby may be soothed to sleep by a tender lullaby; and even that a set of unreasoning, irritated school children may be put into a good humor for awhile by melodious tones,

'Untwisting all the cords that tie
The hidden soul of harmony.'

"But what is the educational value of these processes? The insane are soon raving again. The troubled spirit of Saul was often quieted by David's harp, but he was not reformed thereby, and came to bitter grief at last. So the irritated children, when the next cross occurrence takes place, will be turbulent as ever. Education ought to implant in the mind of these, principles of obedience to authority, deference to seniors, good will to all. Music has no power to do this. If music made men virtuous, we ought to see the proof in those communities where music, and especially what is called sacred music, is most cultivated. The two cities of the world in which this art is carried to the highest perfection, are said to be Munich and Rome, and the moral corruption of those cities is deplorable. It is not in the power of music to implant a principle. It operates upon the senses, and through them upon the emotions, so long as the sounds lasts, and mayhap a little longer. But the effect is transient. It imparts no strength to resist temptation. It does nothing to eradicate selfishness. It does not truly soften the heart. I have just been reading a notice of one of the most cruel of the Russian Czars, Ivan Yasilwitch, who was so fond of church music as to perform sometimes himself on the instrument, and in the pauses between these 'sacred' performances, had been

known to issue his cruel decrees against individuals whom he hated.

"It is the power of the Gospel, and that only which can regenerate the heart. Music is a kind of intoxication, and all intoxication is followed by weakness."

The Yang-tse-Kiang.—A tourist in China thus records his impressions of the Yang-tse-Kiang.

Unsurpassed in size by any in the eastern hemisphere, unless it be the Nile, and ranking fourth among the rivers of the world, it is a subject of amazement to many who have never been upon our western waters. Like the Mississippi it drains, in its winding course of 3000 miles, a vast extent of country, in some parts fertile, well cultivated, and thickly strewn with towns and villages. Chin-Kiang, "Departmental River City," is the first of note, the grand canal entering here, and there being a concession and consulate. Rich and prosperous twenty years ago, it is now almost in ruins from the devastations of civil war. Forty miles above this is Nankin, once the metropolis of the empire. The tombs of the Ming dynasty, and the ruins of its ancient walls, thirty-five miles in circuit, attest its former grandeur. There is nothing in the Campagna of Rome, except the aqueducts, which so much impresses the mind with the magnitude of the works of other days as do the surroundings of this Chinese city.

Recently it was the headquarters of the Taiping rebels, and suffered more than any other place upon the river along the course of which was the principal theatre of the war. Above Nankin the scenery improves. Sometimes the lowlands extend back as far as the eye can reach, and again ranges of hills present themselves, bringing to mind the heathery highlands of Scotland. Aun an escarped bluff rises directly from the water's edge, and in one place the river flows between two abrupt rocky promontories, called the Pillars, in one of which the treasure of the Taipings is said to be concealed. Near Poyang lake the scenery is bold and grand. The "Little Orphan," a conical rock surmounted by a Chinese temple, rises 250 feet high from the surface of the stream. Higher up the river the shores are still more grand, the hills and rocky headlands rising precipitously on both sides. The country becomes more tame as Hankow is approached, appearing thickly populated and productive.

The Divinity of Christ.—Two of Dr. Priestley's followers, eminent men, once called on an aged member of the Society of Friends, to ask what was his opinion of the person of Christ. After a little consideration, he replied: "The apostle says, We preach Christ crucified, unto the Jews a stumbling block (because they expected a temporal Messiah) to the Greeks foolishness (because he was crucified as a malefactor) but unto them which are called, both Jews and Greeks, Christ the power of God, and the wisdom of God. Now, if you can separate the power of God from God, and the wisdom of God from God, I will come over to your opinions." They were struck dumb, and did not attempt to utter a single word in reply.

Truthfulness is a corner-stone in character and if it be not firmly laid in youth, there will always be a weak spot in the foundation.

JOHN MASTER.

BY OUR G. WHITTIER.

Immortal love, forever full,
Forever flowing free,
Forever shared, forever whole,
A never-ebbing sea!

Our outward lips confess the name
All other names above;
Love only knoweth whence it came,
And comprehendeth love.

Blow, winds of God, awake and blow
The mists of earth away!
Shine out, O Light Divine, and show
How wide and far we stray!

Hush every lip, close every book,
The strife of tongues forbear;
Why forward reach, or backward look,
For love that clasps like air?

We may not climb the heavenly steeps
To bring the Lord Christ down:
In vain we search the lowest depths,
For Him no depths can drown.

No holy bread, nor blood of grape,
The lineaments restore
Of him we know in outward shape
And in the flesh no more.

He cometh not a king to reign;
The world's long hope is dim;
The weary centuries watch in vain
The clouds of heaven for him.

Death ceases, life goes; the asking eye
And ear are answerless:
The grave is dumb, the hollow sky
Is sad with silence.

The letter fails, and systems fall,
And every symbol wanes;
The Spirit over-brooding all
Eternal Love remains.

And not for signs in heaven above
Or earth below they look,
Who know with John his smile of love,
With Peter his rebuke.

In joy of inward peace, or sense
Of sorrow over sin,
He is his own best evidence,
His witness is within.

No fable old, or mythic lore,
Nor dream of bard and seer,
No dead fact stranded on the shore
Of the oblivious years;

But warm, sweet, tender, even yet
A present help is he:
And faith has still its Olivet,
And love its Galilee.

The healing of his seamless dress
Is by our beds of pain;
We touch him in life's throng and press,
And we are whole again.

Through him the first fond prayers are said
Our lips of childhood frame,
The last low whispers of our dead
Are hushed with his name.

O Lord and Master of us all;
Whatever our name or sign,
We own thy way, we hear thy call,
And we trust our lives by thine.

"LOVEST THOU ME?"

"Lovest thou me?" I hear my Saviour say,
Would that my heart had power to answer, "Yes,
Thou knowest all things, Lord, in heaven above
And earth beneath; thou knowest that I love."
But 'tis not so; in word, in deed, in thought,
I do not. cannot love thee as I ought.
Thy love must give the power, thy love alone;
There's nothing worthy of thee but thine own.
Lord, with the love wherewith thou lovest me,
Reflected on thyself, I would love thee.

Selected.

The History of The Peach.—The following facts relative to this delicious fruit are taken from Fulton's work on Peach Culture. "The peach is supposed to be a native of Persia, and its botanical name refers to that origin. It is known to have flourished in both Persia and China at a very early period, and was highly valued in both countries. It has often been found growing spontaneously in Asiatic Turkey. It is mentioned by Pliny and several other classical writers, and many anecdotes are related of the veneration and even superstition with which it was regarded by the Asiatics. It is not mentioned in the Bible, but its congener, the almond, is mentioned several times, and as early as the days of Jacob. And we find, when he was preparing his present for the governor of Egypt, he commanded his sons to take "myrrh, nuts, and almonds" as a gift, showing the esteem in which it was then held. Again, in the directions for making the golden candlestick, among the ornaments, the myrtle and almond are mentioned as of the chief.

The peach, like civilization itself, traveled from this centre westward into Europe, and we find it mentioned in Roman history in the reign of the Emperor Claudius. It was highly valued by the patricians of Rome, and was cultivated by them as one of their choicest luxuries. It is still a standard tree in Italy.

It was introduced into England from Italy, about the middle of the sixteenth century, and has been cultivated there as an exotic ever since. Her cool, moist climate, however, prevents its general cultivation, and it is only grown on walls or under glass, and the fruit is seldom seen except on the tables of the aristocracy.

Even in France, where the climate is much milder, it is not always reared without protection, and the fruit has never gone in to general use, but is a delicacy confined to the wealthy alone, the cultivation being confined principally to gardens.

In China it is extensively cultivated in the gardens of the rich, and has attained an extraordinary size. But of their manner of propagation and culture but little is known, owing to the exclusive policy heretofore pursued by that ancient empire. Now, since its amelioration, among the many other benefits hoped for, a more accurate and complete knowledge of the peach is one. The Chinese are great gardeners, and much affect the curious in horticultural as in other arts, and we may expect to learn much that is interesting, if not useful. We know already that they produce peaches of very large size, and two, at least, of rare shape,—the Chinese Flat, and Crooked Peach. With this beginning, we will not be surprised at still more curious developments. The curiosity, ingenuity, and enterprise of our countrymen will soon discover whatever may be known.

It is to our credit that the United States is the only country in the world that, either in ancient or modern times, has produced peaches in sufficient quantities to allow them to become a common marketable commodity; so cheap that the poor as well as the rich may regale themselves and their families with one of the most wholesome and delicious of fruits at a very small expense, and with every prospect that they will still be more abundant and cheap."

Unity of purpose brings certainty of success.

Montgomery.

Selected for "The Friend."

tracts from the Journal of Mary Capper.

As rest to the weary traveller, so is true rest to the deeply exercised mind."

I believe some of us are tempted to think, unless we appear to take some active part in Truth's service, we may be looked on by others, and perhaps by ourselves, as idle, lifeless members; but far otherwise is my judgment at this time. The humble, silent traveller, who bears the burden of the world, until the right time comes for delivery, (when the message will be accompanied by a measure of power and authority,) assures us that he works essentially for the general good."

I note down, as a watchword for myself, "I am this day made sensible that there is need to watch; and most especially in times of favor, for here is danger of sliding to a state of ease. I have this day felt the need of instruction in my own mind, for I am being sufficiently guarded in my conduct and strangers. There is a propensity in the human nature to be open and unreserved; but I wish to be thankful for the gentle, internal restraints, and to remember that it is needful to be prudent, especially when thus engaged in the service of the great cause of Truth; and an innocent cheerfulness, if not strictly needed, may lead to inconvenience."

Some tender cautions were given, with respect to those benevolent associations, in which members of our Society are now so conspicuous. There was a fear in some minds, lest while they rejoiced in the spreading of the gospel, the distribution of the scriptures, and the instruction of the poor, lest a danger might secretly lurk in the pleasure received in eloquent speeches, and flowing language, and in public meetings of these associations; especially lest our dear friends should therefore lose their relish for simplicity, and be gradually drawn from the love of silent waiting, and cease to rely on Jesus to be in the spirit, teaching as man never taught; and by which we have access to the Father."

While many are running to and fro in the world, in order that knowledge may be increased, the retired humble Christian believer finds no power to go forth, and can only rejoice with trembling, may by secret and sincere prayer, be instrumental in the notice of truth and righteousness."

Humility and contrition of spirit seem the safe dwelling place while we are clothed in these poor corruptible bodies; and we find that there is great need of patience to the end of our Christian pilgrimage."—*Winds' Library.*

Indian Gratitude.—Dr. Dwight in his travels New England, states, that soon after the city of Litchfield began to be settled by English, a strange Indian arrived at an inn, and asked the hostess, as the evening advanced, to provide him with some refreshment; at the same time observing, that a failure in hunting he had nothing to pay, promising payment whenever he succeeded. The plea was, however, in vain; and the hostess loaded him with opprobrious epithets, and declared that it was not to throw away his earnings on such creatures as himself, that she worked so hard. But as the Indian was about to retire, a man who sat by directed the hostess to supply his wants and promised full remuneration.

As soon as the Indian had finished his sup-

per, he thanked his benefactor and assured him that he should remember his kindness. The friend of the Indian had occasion, some years after, to go into the wilderness between Litchfield and Albany, where he was taken prisoner by an Indian scouting party and carried to Canada. On his arrival at the principal settlement of the tribe, it was proposed by some of the captors that he should be put to death; but, during the consultation, an old woman demanded that he should be given up to her, that she might adopt him for a son who had been lost in the war. Accordingly he was given up to her, and he passed the succeeding winter in her family.

While in the course of the following summer, he was at work alone in the forest, an unknown Indian came and asked him to go to a place he pointed out on a given day; and to this he agreed, though not without some apprehension that mischief was intended. From some cause the first engagement of the Indian was not kept, but he repeated his visit, and on repairing the second time to the appointed spot, he found the Indian provided with ammunition, two muskets and two knapsacks; he was ordered to take one of each, and he followed his conductor under the persuasion that, had he intended him injury he might have despatched him at once. In the day time they shot the game that came in their way, and at night they slept by the fire they had kindled; but the silence of the Indian, as to the object of their expedition, was mysterious and profound. After many days had thus passed, they came one morning to the top of an eminence, from whence they observed a number of houses rising in the midst of a cultivated country. The Indian asked his companion if he knew the ground, and he eagerly said, "It is Litchfield." His guide then recalled the scene at the inn some years before, and bidding him farewell, exclaimed, "I am that Indian! now you may go home."

Saying "Good Things."

It is a great temptation for a person who has said "a good thing" which was appreciated in society, to try it over and over again. In fact, after a few lucky hits of this sort, he is apt to regard himself as a wit, and value himself highly on this account. He will make it henceforth a study to raise a laugh by his sharp remarks.

But the character of a wit is not one of the "good gifts," which we should "earnestly covet." Pleasantry may serve very well for the spice of conversation, but when it is made the substance of it, it is neither wholesome for the speaker nor the hearer. Nothing short of absolute vice destroys the vigor and elasticity of the mind like constant jesting. It degrades all the moral sentiments also, and to make every occurrence the subject of mirth. It soon alienates a man from his best friends, for the habitual jester cannot be made to see the indelicacy, as to say nothing of the unkindness of aiming a jest at the weak point of his friend. He seems to assume that it will not sting because he does it, or that for the same reason it will be overlooked.

No one likes to be ridiculed even in the slightest degree, and the finer the sensibilities and the culture, the keener will the dart penetrate. The practice of using such weapons often, soon blunts the delicacy of perception,

and a person will not spare the feelings of even those he prizes most.

It is not the way of happiness to be always abounding in mirthfulness. "The end of that mirth is heaviness."

All are familiar with the story of the melancholy, despairing man who came to a great physician for a remedy for his mental suffering.

"Go to hear Carlini," said the physician, "He will make you laugh, and do you more good than any medicine of mine."

"Alas," said the miserable patient, "I am Carlini!"

The poor harlequin could convulse all Paris with his jests, while he was dying of mental despondency himself. What a commentary on the satisfying character of such food for the soul.

Do not set up for a wit unless you are willing to sacrifice what makes life dearest, unless you can afford to lose your own finer feelings, your intellectual advancement, your happiness, no doubt, for this world or the next.

It was a remark of Pascal's, that "to have the reputation of saying good things was a bad character."—*Country Gentleman.*

"Humility is an attribute of such antipathy to the original constitution of our nature, that no principle can possibly produce it in its full extent, and bring it to its complete maturity, but that of the gospel of Jesus Christ. No spirit short of this can enable us to submit our understanding, to subdue our will, to resign our independence, to renounce ourselves.

This principle not only teaches us to bow to the authority and yield to the providence of God, but inculcates the still harder lesson of submitting to be saved in the only way He has appointed; a way which lays pride in the dust. If ever, in the true servants of God, this submission is sometimes interrupted, if we too naturally recede from it, if we too reluctantly return to it, it is still owing to the remains of pride, the master sin; a sin too slowly discarded even from the renewed nature. This partial conquest of the stubborn will, this imperfect resignation, this impeded obedience, even in the real Christian, is an abiding proof that we want further humbling, a mortifying evidence that our hearts are not yet completely brought under the dominion of our principles."—*Hannah More.*

Honesty of the Turks.—Keppel relates, in his "Journey across the Balkan," that, in the winter of 1828, a Turkish postman was sent to some distant part with a considerable sum of money in specie. The money, in such cases, is carried in bags which the merchants call "grouper." They are given to the postman, and without receiving any written document as proof of the receipt. This man, on returning from his journey, was applied to by a French house for fifteen thousand piastres; a sum that at that time equal to fifteen thousand dollars. He made no attempt to evade the demand, but immediately said, "I have doubtless lost the bag, and must therefore pay you as soon as I can raise the money." After maturely thinking of the loss, he returned by the same road, quite confident that if any Mohammedan should find the money it would be returned to him. He had travelled nearly the whole distance, when he arrived, in a very melancholy mood, at a small, miserable coffee

house, where he remembered to have stopped a few moments on his way. He was accosted at the door by the keeper of the house, who called out to him, "Hallo, sherif!" when you were here last, you left a bag, which I suppose to contain gold. You will find it just where you placed it." The postman entered, and discovered the identical bag, evidently untouched, although it must have been left exposed to the grasp of the numerous chance customers of a Turkish café.

Kidnapping in the South Seas.

Schooler.

Amongst the many wrongs of humanity calling for more attention than they receive, are the flagrant proceedings of English and European traders towards the natives of the coral islands of the Polynesian seas. Since the assassination of President Lincoln the world at large has practically regarded slavery as a thing doomed to die if not already dead, about which no further trouble need be taken. It is true the vote for the African squadron is still annually passed by Parliament, and paragraphs occasionally appear in the newspapers telling of the capture of slave-shoos off the coasts of Arabia. It is also true that fearful accounts are at times published of some tragedy in the Coolie traffic, like that of the burning of the *Dolores Ugarte* with its 600 victims. But these are looked upon too much as "the workings of the sea after a storm," to which little attention need be paid. We are afraid this is by no means the case. Some of the readers of *The Friend* know that the Anti-Slavery and Aborigines Protection Societies have for years been asserting, and showing reasons for asserting, that what is euphoniously called the free labour immigration of natives from the islands of the South Sea to Queensland and other colonies, is becoming, in fact has already become, an organised traffic in which many of the horrors of the slave-trade are revived. This view has from time to time been supported by statements from the missionaries, who complain, not only that direct violence is done to the islanders, but that untold mischief results from these acts, in the suspicion with which the natives are again learning to regard Europeans. Having in many cases relinquished the treachery of barbarism, they are now falling back upon it for protection against the treachery of civilization.

To those who hesitate from any cause to acknowledge the existence of the cruelties practised, and the great danger which is involved in them to the morality and true progress of our colonies, the testimony of Captain Palmer must have great weight.

It was in consequence of the complaints which had at last penetrated, through surrounding officialism, to headquarters, that Captain Palmer, in command of her majesty's ship *Rosario*, was ordered in the spring of 1869 to sail for the South Sea Islands and institute inquiries into the alleged malpractices. His account of the cruise, and its results, shows the writer to be a Christian gentleman as well as a thorough sailor. There is no make-up about the book; it is scarcely less valuable for its evident straightforwardness and simplicity, than for the interesting statements it contains. The *Rosario* first touched at the French island of New Caledonia, where the Governor took the opportunity of returning to the offi-

cers the expostulations formerly addressed to his countrymen by the English on the evils of the Coolie traffic. The French employ native labor, but guard carefully against the abuse of it.

Captain Palmer next sailed to Aneitum, the headquarters of the Scotch Presbyterian mission. Here the natives knew too much for the traders, who no longer find it worth while to call; but from several of the adjacent islands men had been stolen, and the way of the missionaries was almost blocked up in consequence.

At all the islands visited, the missionaries, chiefs, and natives were found very ready with their complaints, and evidence of the violent capture of natives was abundant. In some cases it was acknowledged islanders had gone on board the traders' vessels of their own accord, but on the false understanding that their absence was to be for one yam season only. How far this was carried out may be judged from the fact that at Erromanga, whence several batches had been so taken, some by force, and some by fraud, not a single native has ever returned. The forcible seizures had generally been accomplished by enticing the islanders to the ship under the pretence of making purchases, and then sinking the canoes and flinging their unhappy owners down the hatchways. Numbers of instances of this kind are recorded.

Captain Palmer afterwards sailed to Fiji, which shares with Queensland the results of this piratical trade. Fiji is a place under no settled government, where every man seems to do what is right in his own eyes. The head planters, however, thought it desirable to clear themselves from the "malicious" reports spread abroad, and drew up a memorial repudiating the charges brought against them; this was followed by a public meeting to the same effect. Unfortunately the roughs did not understand the importance of observing an outward decorum, and one individual moved that "This 'ere meeting do adjourn for a drink." At that very time the consul complained that two vessels were away after natives without a license.

A third vessel arrived during Captain Palmer's stay at Fiji, and its history forms the most instructive part of this informing volume.

The *Daphne* was a small schooner, first inspected and then licensed by the Queensland Government, to procure fifty natives for three of the settlers in that colony. She was "forty eight tons register, fitted up precisely like an African slaver, minus the irons, with 100 natives on board," who had been brought a twenty-one days' voyage from the New Hebrides. (It was afterwards found there had been 120 persons on board.) "They were stark naked, and had not even a mat to lie upon; the shelves were just the same as might be knocked up for a lot of pigs—no bunks or partitions of any sort." No interpreter was on board, and the ship's papers were incorrect and contradictory. Captain Palmer therefore determined to seize the ship on a charge of promoting the slave-trade. The price of "niggers" had just gone up to £6 per head, and the owners were filled with emotion at a charge of slave trading being brought against them. One man who had offered to take the whole lot was moved to tears at the idea of the natives being sent back, and the feeling of the beach was one of general indignation. Nevertheless a prize crew was put

on board the *Daphne*, and both vessels sail to Sydney to try the fortunes of law.

We do not think the account of the legal proceedings which followed, can be read without a strong sense of indignation. The Colonial Government showed great reluctance presenting, and the influence of the persons interested in the plantations was evidently very powerful. While waiting in expectation of "overwhelming evidence that should convince the most sceptical," Captain Palmer received a letter from the crown solicitor, minding him that even if an interpreter is found, "there was no reason to suppose that any of the men themselves (the natives) would prove competent to take an oath." A friendly consul observed, "they were qualified to perjure themselves, like Christians." The chief justice laid down that would not be enough to show that artifice falsehood had been used to induce the natives to enter into the contract; nor could the reality of the proceeding be taken into consideration. The *Daphne* was therefore discharged, and Captain Palmer was left liable for the costs, amounting to £170. The ray of light in the whole transaction is, that the home government refunded these expenses, and gave Captain Palmer his promotion.

This apparently fruitless voyage will be in vain if it calls attention to the imperative necessity of adapting the laws to suit present moral evasions of them. The presence of a contract with natives whose statement is not admissible as evidence is transient, and an immediate alteration of the law is necessary.—*London Friend*.

Schooler.

"Bear one another's burdens." There is abating the claim, and no limit to the application of this law, while we linger in the flesh. We need ever to carry these words before us as we meet in ten thousand forms the sorrow, weakness, and errors of our brethren. long as there is an imperfection in any member of the body of Christ, there will be a burden for every member to bear, from the bearing which there is no legitimate escape. I try vain to find something with which filly to lustrate a church in which every soul is obedient to this injunction. I think of the oil with every particle, every fibre fitting it to every other fibre, and all together fling back the fiercest blast. I think of the vessel, but every different, colors, cheerfully supplying each other's deficiencies, and their mutual help producing the beautiful rainbow. But all illustration fails. There, nothing in nature equal to the task. The beauty of such exhibition of divine love man is too far superior to all other beauties he fairly set forth by any of them.

A Great Calamity.—One of the greatest calamities the coal mining industry has ever sustained,—through fortunately attended with no loss of life,—was the destruction of the pit of Marles, in France. One day in April 1866, some defects were noticed in the tubing with which the shaft was lined. Three hundred workmen were ordered to leave the mine at once. Resolute men went down to repair the displaced joints, but the result was only to create fresh breaks. Within two days, while attempts at repair were still being made, the planks gave way, one, one, and the water was heard to rush in

ly into the mine, which was 750 feet deep. The experienced engineer resolved to investigate the state of things. Believing he was going to certain death, he bade his friends well, saying, "I go where duty calls me." He descended with one companion. The lamps soon went out, and only by the unobscured glimmer of the oscillating lantern which hung from the bottom of the tub in which they descended, did they perceive an enormous opening in the lining of the shaft, through which the water rushed in torrents. "Let us go up, again," exclaimed the brave miner, whose hair turned white in this perilous descent, "the enemy is master of the situation, all hope of saving these workings is lost."

Only a few hours, and the falling torrents extended from top to bottom of the shaft; the crater, one hundred feet in diameter, opened at the mouth of the pit; engines, buildings, and the timbering of the shaft, all shook, and the timbering of the shaft, all out sparks under the friction developed. The important mine had been in existence ten years. Day and night, those to whom the mine was intrusted had caused the work to go on, and they had successfully overcome the difficulties caused by the water. Yet the whole was lost in two days; and it was by the merciful providence of God that catastrophe did not suddenly overtake three hundred miners at their work, and that they should not escape from a watery grave.—*Michigan Weekly.*

Exemplary Sister.—A short time since, a Pastor arose in his pulpit, and made substantially the following statement: "Brethren and Sisters:—I have often wondered, as you also probably have, why a single sister should choose to remain in a world, when there are several Churches of every color in our immediate vicinity; but now able to settle the matter satisfactorily in my own mind. She was obliged, a few days since, to go into the country to seek employment. Last week I received a letter from her, containing her quarterly contribution [naming a local missionary work in the Church bore a part]. "Her income is two dollars per week, yet she sent me ten dollars,—more than one-tenth of it,—this is one object, which I believe is more important to her ability, than the contribution of any other member. The Lord vouches for that she remain with us, as an example of true Christian benevolence."

L. was confined for some time in the Bench Prison; while his fortune, on account of a law suit, was unjustly withheld from him. During this distress he was obliged to support his negro servant, that however painful his feelings, they must part; his difficulties being so great that he was unable to do for him the necessaries of life. The negro, well known in the King's Bench Prison by the name of Bob, replied, "No, master, we never part. Many a year have you kept me, and now I will keep you." Accordingly he went out to work as a day laborer; and at the end of every week, faithfully brought his earnings to his master. These proved to be of great support to them both, until the law suit being ended, Dr. L. became possessed of a large fortune. He settled a handsome sum on his faithful servant.

For "The Friend."

The readers of "The Friend" may recollect, that some time since two chiefs of the Kiowa tribe of Indians were charged with the murder of white men, and having been taken into Texas, where the crime was said to have been committed, to be tried by the criminal court. Having been convicted, they were sentenced to be hanged, and the time appointed for their execution.

In a communication addressed to the President of the United States by a committee of the joint Committee of Friends on Indian Affairs, this subject, with others, is thus alluded to.

"We were also requested to intercede with thee for such intervention on thy part as may be right and lawful, to prevent the execution of the sentence of death recently passed upon the Kiowa chiefs, Satanta and Big Tree, by a court of the State of Texas. We are prompted to this by the antecedent history of the race; by our opposition to the sacrifice of human life, and by a conviction that the retention of said chiefs as prisoners will be far more effectual in securing the real objects of punishment than will their execution.

"We apprehend that if they are executed, the Kiowas will be very likely to retaliate, and that citizens of the United States will be the sufferers. We regard the delivery of said chiefs to the authorities of Texas, instead of their retention as prisoners of the United States, as of very questionable propriety, and therefore feel the more willing to press the subject upon thy most serious attention.

"We were furthermore requested to call thy attention to the fact, that a large number of settlers, perhaps not less than a thousand, have entered upon the lands within the Indian Territory, west of the present location of the Osages, and north of the Arkansas River. It seems to us very important that the treaty stipulations of our government in relation to the exclusion of white settlers from the Indian Territory, should be faithfully observed. Indeed we feel that the success of the humane Indian policy so happily inaugurated by thyself, depends to a very large extent upon the promptness with which our government interferes to prevent the intrusion of unauthorized white settlers upon lands that are sacredly pledged to the occupancy of the Indians."

THE FRIEND.

EIGHTH MONTH 26, 1871.

Notwithstanding the age to which our Journal has attained, we enter another year of editorial duty with undiminished feeling of the responsibility attached to our position, and with the same sense as heretofore, of the difficulties with which the path before us continues to be environed.

We have never aimed at pleasing everybody, nor expected to satisfy at all times, or in all things, the various tastes and the contrariety of opinions entertained by the numerous readers of our pages. But we can say in entire honesty, that the endeavor has been conscientiously maintained to present the truth to our readers with strict impartiality; and while discharging the obligation to ex-

pose and controvert what we believe to be wrong and hurtful, we have aimed to do it in the spirit of good will to all.

We desire to maintain the character of "The Friend" in accordance with its original design; to keep it subservient to the support and promulgation of the doctrines and testimonies of the gospel as set forth by Robert Barclay and other of the original members of the Society of Friends; as the Society has held them since its rise, and as its faithful members still hold them. Though many are adopting some of the views of other professors instead of these doctrines, and many disregarding and letting fall some of the testimonies Friends have ever held dear, yet we are confident that being in accordance with the immutable truth, and sanctioned by Divine Wisdom, they will finally prevail over all opposition.

In this day of shaking, though of seeming religious activity among the members in our religious Society, when the foundation of every one who is taking part in things belonging to religion, is made more or less apparent, there must necessarily be trials hard to bear, and difficulties that will perplex; but if faith and heavenly charity are cherished as they should be, those who continue through all to adhere to and act in accordance with the principles and practices which Friends were raised up to exemplify before the world, will be preserved and upheld by the invisible arm of almighty power, and the day will again come when the *Lord will give the word*, and great will be the company of those who will publish it.

This is our belief and the ground of our hope, and with christian love for all, and unkind feelings towards none, it is the desire, and will be the effort of "The Contributors to the Friend," to do nothing that may retard the coming of that day, but to throw in their mite towards hastening its arrival.

SUMMARY OF EVENTS.

FOREIGN.—The most recent dispatches from Persia conclusively contradict the recent palliative statements of the Persian Minister in London. The Persian government is interested in underrating the consequences of the famine, since they have been in great measure the result of its own oppressive maladministration.

Throughout the rice growing provinces there had been a complete failure of the crop owing to the drought. Large and formerly populous districts are now without inhabitants. Disease, as is usually the case, followed famine, and the inhabitants were suffering fearfully from cholera, fever and small pox. The cattle plague is raging also in the districts where any cattle are still left to be preyed upon. In Ipsahan 27,000 persons had already died, and the mortality was undiminished. In Mazanderan and other places where the famine first assumed alarming proportions, the destruction of human life has been far greater than at Ipsahan. In the French Assembly on the 19th, the committee on the army bill made a report, recommending its passage. The bill, as returned to the House, makes military service compulsory; allows no one the right to procure a substitute; prohibits soldiers from voting in political elections, and dissolves the National Guard throughout the country.

It is reported that the Assembly will remain at Versailles. A certain number of government officers, however, will be removed to Paris.

The German forces, on the 19th, were withdrawing from the neighborhood of the fortifications north and west of Paris.

The number of deaths in Paris last week was 828, including one from cholera.

The French Minister of Finance has gone to Germany for an interview with Prince Bismarck relative to the evacuation of French territory by the German troops. The French journals continue to report out-

rages committed by the Germans in France. Difficulties have arisen at Berlin in respect to the evacuation of four departments of France still held by the Germans. The French government has in consequence refused to admit French troops into French territory, until after the German troops leave the soil of France.

A Berlin dispatch says: "If the French offers to make early payment of the indemnity are fulfilled, and there be no untoward disturbance of peaceful relations, the withdrawal of the German forces from French territory will soon commence."

The cholera continues its ravages at Königsberg, and is gradually extending to other places. At Suwalki, Poland, a town of 6000 inhabitants, there had been 435 cases, up to the 17th inst., 83 of which terminated in death.

The British House of Lords, on the 15th, the Lord Chancellor and Viscount Halifax defended, in the most vigorous manner, the measures proposed by the government at the present session of Parliament, especially those providing for the use of the ballot at elections, and for the regulation of the army.

In the House of Commons the government has been severely assailed for the use it has made of the royal prerogative on the purchase question, one member declaring that the continuance of the purchase system was to be preferred to its abolition by such an abuse of the prerogative. The Attorney General defended the purchase of the crops in this case, but added that the Queen had practically announced her resolution never again to interfere. Gladstone declined to enter into any controversy on the subject on account of the amount of unfinished business before the House.

Heavy thunder storms have caused much damage to the crops in the west of England.

Queen Victoria has gone to her favorite residence at Balmoral, Scotland.

The Scotch crops are all excellent. The herring fishery on the coast of Ireland has been unusually successful, and the fact has caused great rejoicing among the people in the west of England.

King Victor Emmanuel has appointed General Menabrea arbitrator, on the part of Italy, in the case of the Alabama claims. The Arno river has been swelled to a flood by the melting snows in the Apennines, and is causing great destruction to the crops, &c., by its overflow.

Gortschakoff, the Russian Minister, publishes a report of what passed between him and the Evangelical deputation, at their late interview. He says, having heard them, he replied that their mission had the appearance of interference in the domestic affairs of Russia; that he would permit no such interference, and that the Russian government could not tolerate a shadow of intervention, from whatever side it came. He first accepted the address of the American delegation to hand to the Emperor, but afterwards requested them to withdraw it, which they did.

The Spanish government have, at the expression of desire of the French cabinet, consented to the extradition of the Communists found on Spanish soil. One of the leaders of the Commune has been arrested and delivered up to the French authorities.

A committee of the International Society has addressed a letter to the Spanish Minister, Zorilla, desiring the clerk of the court and purposes of the organization. It denounces the existing order of things as false and hollow, being maintained only through brute force. The letter avows the hostility of the society to the government, yet authorizes the execution of its members by the authorities.

The French steamer *Le Liba*, on the 4th ult., caused the loss of 400 lives. Several vessels were also wrecked, including the *Pride of the Thames*.

The British Parliament was prorogued by royal commission on the 21st inst., and adjourned to 11th mo. 7th next. The Queen's address, read out on the occasion, contained a list of honours. After referring to the results of the war in Europe, and expressing satisfaction with the Treaty of Washington, the address states that Canada will be advised to assent to the ratification. Objection is made to the changes in commercial intercourse desired by France.

The United States—*Miscellaneous*—The Interests in Philadelphia last week numbered 360. There were 47 deaths of cholera infantum, 2 of cholera morbus, and 1 of cholera, of consumption 42, old age 17.

The international postal money order system, which goes into effect between the United States, Great Britain and Germany, in the 10th mo. next, will, it is probable, ultimately include Sweden, Norway and Denmark.

The ship canal through the St. Clair flats, above Detroit, has been finished, and is now in use. It is a mile and a half in length, and between 300 and 400 feet wide. It was three years in construction and cost \$428,000.

An arrangement has been concluded between the United States and Germany, to take effect on the 1st of Tenth mo. next, which reduces the rate of international postage for pre-paid letters exchanged between the two nations, to seven cents for each letter of half ounce or under. The reduction applies to letters only.

The total population of the United States, according to the last revision of the tables in the Census Office, is 38,549,987, an increase of 7,106,676 in the last ten years.

The Markets, &c.—The following were the quotations on the 21st inst. *New York*—American gold, 112½. U. S. sixes, 188½; ditto, 186½; 187½; ditto, 10-40, 10 per cent, 114½; Superfine flour, \$43.94 \$53.30; finer brands, \$55.84 to \$88.40. No. 2 Chicago spring wheat, \$1.35 a \$1.39; red western, \$1.40 a 1.44; amber do., \$1.47 a 1.50; white Genesee, \$1.55. Iowa barley, 75 cts. New Ohio oats, 47 a 50 cts.; Jersey, 37 a 40 cts. Rye, 90 cts. Yellow corn, 70 cts.; southern white, 87 cts.; western mixed, 67½ cts. *Philadelphia*—Cotton, 18½ a 19 cts. for uplands and New Orleans. Superfine flour, \$4.75 a 5 cts.; finer brands, \$5.25 a \$8.25. New western red wheat, \$1.32 a \$1.37; amber, \$1.10 a \$1.45. Rye, 70 cts. Yellow corn, 70 cts.; western mixed, 68 cts. Western oats, 41 a 40 cts. Lard, 94 a 9½ cts. Timothy seed, \$2.25 a \$3.50. Flax-seed, \$1.95. The receipts of beef cattle at the Avenue Drove-yard were 2390 head. Choice sold at 7 7/8 cts.; fair to good, 5½ a 6½ cts. and common 3½ a 5 cts. per lb. gross. The receipts of sheep were about 20,000 head, and the sales at 5 a 6 cts. per lb. gross. Hogs sold at 7 1/4 a 7 3/4 cts. for corn fed, 8 1/4 a 9 1/4 cts. for fruit fed, \$3.80 a \$4; family, \$1.25 a 1.50. Extra winter, \$4.70 a \$5.10. No. 2 winter red wheat, \$1.26 a \$1.27. Milled corn, 41 a 41½ cts. Oats, 33 a 33½ cts. Barley, 74 a 75 cts. *Milwaukee*—No. 2 spring wheat, \$1.13; No. 1, \$1.15; No. 2 oats, 30½ cts.; No. 2 corn, 46½ cts. No. 2 rye, 82½ cts. No. 2 barley, 69½ cts. *Cincinnati*—No. 2 spring wheat, \$1.12 a \$1.14. No. 2 mixed corn, 46½ cts. No. 2 oats, 30½ cts. *Cincinnati*—Family flour, \$5.40 a \$5.60. Red wheat, \$1.12 a \$1.16. Corn, 51 a 52 cts. Oats, 30 a 38 cts. Lard, 8½ cts.

RECEIPTS.

Received from James Scarlet, Pa., \$2, vol. 45; from William Bettles, Ill., \$2, vol. 45; from Isaac Hall, Pa., \$2, vol. 45, and for Jacob Roberts, \$2, vol. 45; from Daniel Green, Io., per Jos. Hall, Agent, N. O., to No. 26, vol. 45; from Jos. Warrington, M. D., N. J., \$2, vol. 45; from Sam'l Lee, N. Y., \$2, vol. 45; from Geo. W. Passmore, Agent, Pa., \$2, vol. 45, and for Rebecca Larkin, Sarah Larkin, Caleb E. Thomas, Harvey Thomas, Rebecca Trimble, and Rachel Hill, \$2 each, vol. 45, and for Amanda Gallenore, O., \$2, vol. 45; from Maria Pusey, Pa., \$2, vol. 45; from Sarah Greene, R. I., \$2, vol. 45; from Elizabeth A. Huntington, C. V., \$2, vol. 45; from Alfred King, Agent, N. Y., \$2, vol. 45, and for Geo. Baker, Samuel Simkin, Francis Armistead, Gilbert Weaver, Abiel Gardner, Susan King, and Pearl Hall, \$2 each, vol. 45; from Benj' N. Sheppard, N. J., \$2, vol. 45; from Rachel M. Thorp and William Thorp, City, \$2 each, vol. 45; from Elizabeth A. Huntington, C. V., \$2, vol. 45; from Charles L. Felwell, City, \$2, vol. 45; from Sarah North, Pa., \$2, vol. 45; from Elizabeth M. Cope, Pa., \$2, vol. 45; from Joel Harlan, Pa., \$2, vol. 45; from Hannah Roberts, Pa., \$2, vol. 45; from C. E. Hoopes, Pa., \$2, vol. 45; from Henry R. Post, N. Y., \$2, vol. 45; from Lydia A. Allen, Geo. B. Allen, and Nathan Allen, C. V., Bowland, \$2 each, vol. 45; G. Allen, M. D., and Richard J. Allen, City, \$2 each, vol. 45; from Richard E. Ely, Pa., \$2, vol. 45; from Gilbert Cope, Pa., \$2, vol. 45, and for Lucy Cope, \$2, vol. 45; from Lydia A. Hendrickson, N. J., \$2, vol. 45; from Wm. A. Robinson, N. J., \$2, vol. 45; from Sam'l P. Coe, N. Y., \$2, vol. 45; from Sarah North, Pa., \$2, vol. 45; from Amos Lee, Pa., per Jesse Hall, P. M., \$2, vol. 45; from Isaac Yarnall, Pa., \$2, vol. 45, and for William Webster, \$2, vol. 45; from Charles L. Willis, N. J., \$2, vol. 45; from Charles Cooper, Pa., \$2, vol. 45; from Isaac Fiske, M. D., Mass., \$2, vol. 45; from Jacob Edge, Pa., \$2, vol. 45.

Remittances received after Fourth-day morning will not appear in the Receipts until the following week.

WESTWON BOARDING SCHOOL.

The Winter Session of 1871-72 commences on Seco day, the 30th of Tenth month, next. Friends who tend to enter their children for the coming term, requested to make early application to AARON SEALESS, Superintendent, (address Street Road, P. O., Claret Co., Pa.), or to CHARLES J. ALLEN, Treas. No. 304 Arch St., Philada.

EVENING SCHOOLS FOR ADULT COLORED PERSONS.

Principal and assistant teachers are wanted for the schools, to open about the first of Tenth month.

Application may be made to
Elton K. Gillard, No. 28 North Third St.
Richard J. Allen, No. 614 Wood St.
Thomas Elkinton, No. 118 Pine St.
Geo. J. Scattergood, No. 413 Spruce St.

WESTWON BOARDING SCHOOL.

A Stated Meeting of the COMMITTEE ON INSTITUTION is to be held at Philadelphia on Seventh-morning, the 26th inst., at 10 o'clock.

CHARLES J. ALLEN, Clerk
Eighth mo. 15th, 1871.

FRIENDS' SELECT SCHOOLS.

These schools, under the care of the four Month Meetings of Philadelphia, re-open after the summer vacation on Second-day, 9th mo. 4th, 1871. The B. School, on Cherry St., above Eighth St., is under care of Zebedee Haines as Principal. The Girls' School on Seventh St., below Race St., is under the care of Margaret Lightfoot. There are also two Private Schools for the elementary instruction of those child who are too young to attend the higher schools; on which is held in Meeting-house at the corner of Se and Noble streets, and the other in the Boys' School building on Cherry St.

The attention of Friends residing in this city and neighborhood, is particularly invited to these schools. In the principal ones the children may acquire a liberal education embracing a considerable variety of the useful branches of study, at a moderate cost; and in primary schools the pupils are well grounded in the elements of knowledge.

It is desirable that applications for the admission of children should be made early in the session, and that parents returning children to the schools should do so at the beginning of the term.

WANTED.

A Teacher for the Classical Department of the B. School at Westwon; to commence his duties at opening of the next Session, on the first of the Eleventh month. Application to be made to

Joseph Passmore, Goshen, Chester co.
Samuel Morris, Olney, Philadelphia.
Charles Evans, M. D., 702 Race street.

FRIENDS' BOARDING SCHOOL FOR INDIVIDUAL CHILDREN, TUNESSANA, NEW YORK.

A suitable Friend and his wife are wanted to charge of this institution, in the month of January next. Application may be made to Ebenezer Wray, Marshallton, Chester Co., Thomas Wistar, Fox Chase P. O., Philadelphia Samuel Morris, Olney P. O., do. Joseph Scattergood, 413 Spruce Street, do.

FRIENDS' ASYLUM FOR THE INSANE Near Frankford, (Twenty-third Ward,) Philadelphia.

Physician and Superintendent—JOSHUA H. WOLINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

DIED, at his residence in Fayette county, Pa. Seventy-seven evening, the 24th of Sixth month, 1871, James COPE, a member of Providence Particular M. Cong. in the 90th year of his age. Being of a meek humble spirit, he was anxious to bear his sufferings with great patience and resignation. Near his close he requested his family to give him up freely, and to let him a poor departing creature, saying, "I'll be done, Oh Lord!" His mind was preserved clear and clear to the last. His removal is deeply felt by his family and friends; yet he has left behind him a soling assurance of his love to his eternal gain. He was in West Bradford, Chester Co., Pa., on the 8th of Eighth month, 1871; CAMILLA EMBREE, widow the late John Embree, in the 68th year of her age member of Bradford Monthly and Particular Meet-

Subscriptions and Payments received by

JOHN S. STOKES,

AT NO. 116 NORTH FOURTH STREET, UP STAIRS,

PHILADELPHIA.

Postage, when paid quarterly in advance, five cents.

For "The Friend,"

Hot Springs of New Zealand.

In the account of a journey made by Herbert Meade, in 1862 and 1863, to Lake Taupo, the interior of the northern island of New Zealand, are preserved some interesting particulars of the hot springs and other signs of bleemic disturbance, which are spread over considerable portion of that country.

On Ohinemutu, on the southern shore of Lake Ototorua, is "built in the very midst of the hot springs, which surround what is considered by one who has seen also those of Iceland, the largest geysers in the world, and an infinite number of hot springs; so that, except during a strong southerly breeze, the inhabitants live in a perpetual cloud of steam.

"The Maories [natives] aver, however, that this atmosphere is by no means unhealthy or human beings, though it drives away all mosquitoes, sandflies, and vermin; whilst the rain and highly-mineral baths, which are close at hand, in every direction, are a sovereign remedy for cutaneous and many other diseases.

"The whole village is built on a thin crust of rock and soil, roofing over one vast boiler. Hot springs hiss and seethe in every direction; some spouting upwards and boiling with the greatest fury, others merely at an agreeable warmth. From every crack and crevice burst forth jets of steam or hot air, and the pen bay of the lake itself is studded far and near with boiling springs and bubbling steam-tubs. So thin is the crust on which these men have built their little town and lived for generations, that in most places, after merely brushing a walking-stick into the ground beneath our feet, steam instantly followed its withdrawal.

"Nature is here the public cook. Food is oiled by being hung in a flaxen basket in one of the countless boiling pools; nature also adding salt. Stewing and baking are performed by simply scraping a shallow hole in the earth, wherein to place the pot, and covering it up again, to keep the steam in; or by burying the food between layers of fern and earth in one of the hot-air passages. The great intermittent and annual geyser, 'Waikite,' bursts out of the midst of a narrow arm of the bay, which nearly divides the town.

"In an open space in the middle of the settlement, stone flags have been laid down, which receive and retain the heat of the ground in which they are sunk. This is the favorite lounge; and here at one hour of the day, but especially when the shades of evening are closing round, all the rank and fashion of Ohinemutu may be seen wrapped in their blankets, luxuriously reclining on the warm stones.

"Before turning in for the night we went down to bathe in the warm lake, piloted by a native with a light; for it is no easy matter to get about here in the dark, from the immense number of deep, boiling pools, and places where the apparently firm crust will not bear a man's weight.

"Indeed, not long ago three unhappy people actually fell into one of these boiling caldrons, and were cooked in a trice. Stray horses frequently meet with the same horrible fate.

"On exploring some of the adjacent shores of the lake we found many more hot springs of different sorts, with sulphur in great quantity and purity. Whilst walking on what seemed to be hard, dry, firm ground, the treacherous crust gave way and let me into a hot-water spring, only knee-deep and not hot enough to take the skin off.

"We have been very fortunate in the date of our arrival, for the great geyser commenced playing this very morning for the first time this season.

"It continues to increase in strength and frequency, till it culminates in February, and then gradually dies away again before the winter. At present the eruption occurs with great regularity every twelve minutes, and lasts about twenty-five seconds.

"A vast volume of boiling water, surrounded by glittering jets of spray and curling wreaths of steam, rises in one grand bouquet to the height of 40 or 50 feet, an altitude which it retains for some seconds, and then slowly subsides into the bay whence it rose, where it dies away in a surf of seething foam, leaving huge banks of steam rolling slowly up the dark hill-side. An exceedingly grand sight!

"Bathed again this evening, but this time at the fashionable hour of eight.

"Young and old meet in the lake every evening, almost the whole population taking to the water, which is of an agreeable temperature, like that of an ordinary warm bath, all over the bay, except where the water boils. The whole lake seemed alive, for the rising steam prevented any more than the portion containing the bathers being visible, and the scene was a curious one.

"From every side were heard Maori songs and shouts from the players at some native game; and joyous peals of laughter came ringing along the surface of the water from beyond those misty veils.

"Apart from these revellers, there were a

few groups of staid old men, squatting up to their chins in water and smoking their pipes in conclave solemn."

After leaving this place our traveller visited the neighboring lake of Rotomahana, and thus describes a hot spring called by the natives Te Tarata.

"Te Tarata flows from a furiously-boiling pool which fills a deep crater opening on the side of one of the mountains surrounding the lake. The sides of the crater are lofty and perpendicular, and its dark and frowning walls afford a striking contrast to the huge, towering column of glistening white steam ever rushing upwards from its mouth.

"The size of the crater at the level where the violence of the central action forces the boiling waves over the lower margin of the pool, is probably about 60 feet by 50. The water is of an intense and brilliant blue, the reflexion of which slightly tinges part of the column of steam; but the action of the vapor in escaping keeps the middle of the pool perpetually raised in a cluster of foaming hillocks, several feet above the general level.

"From the mouth of the crater the widespread waters fall in thousands of cascades, from terrace to terrace of crystallized basins. The water from each successive pool escapes in little curving jets to fill more numerous and broader pools below, or falls in a curtain of glittering drops from the fringes of crystals and glassy stalactites which form the margins of all the basins and terraces, and finally flows into Rotomahana over a smooth, hard flooring of a semi-transparent white glazed surface, which paves the shores of the lake for a considerable distance.

"The traveller may here select a swimming-bath of any temperature he may prefer, from a mild tepid one in the basins nearest the lake to a heat several degrees above boiling point at the crater. The depth of these pools varies from 8 or 9 inches to as many feet; but in all of them the chemical blue coloring of the water is strong enough to bring out a vivid contrast with the snow-white over-hanging fringes. We could detect no smell arising from the cascade, but its taste brought to mind the 'sky-blue' milk-and-water of school days.

"The natives assured us that occasionally Te Tarata discharges the whole of the water from the crater in one tremendous explosion, which must indeed be a magnificent sight, but rather dangerous to any one in the neighborhood.

"Skirting along the eastern shore of the lake, every minute brought us to some fresh wonder, differing entirely from the last: here, a group of little mud volcanoes in full and rather comical action; there, a furious, boiling pool, clear as crystal, with periodical geyser eruptions; or again, a miniature lake of cold water of a brilliant green, surrounded by miniature cliffs of pumice-stone and silica.

"Now a basin of boiling mud of a dull white, then a pink one, and then again a black.

"Here a little geyser; there a solfatara, with sulphureous fumes issuing from a yawning orifice incrustated with crystals of sulphur; or occasionally a fumarole, from whose crater escaped a few fitful wreaths of smoke; while from a thousand cracks and crevices in the many-hued and decomposing rocks jets of steam hiss forth.

"There are about twenty-five large 'ngawha,' as the natives term the hot springs of the Te Tarata kind, scattered round the lake, and many hundred smaller ones.

"The mud volcanoes, of which there are a great number, might serve for miniature models of Mount Etna or Vesuvius, with boiling mud in lieu of lava. They are mostly of a sugar-loaf shape, rising from a flat surface covered with a very thin, smooth crust of naturally-baked earthware; some so small that, standing at the base, we could peep down the crater, wherein the mud or boiling fuller's-earth was being either violently thrown or 'flopped' about in a manner which suggested the notion of its containing some living and sportive animal, or ejected altogether after having been boiled into an almost impalpable paste.

"The red porcelain pavement extends to the cold lake mentioned above, whose shores and surface are so covered with floating and stranded pumice-stones that it is difficult to distinguish the outline of terra firma, till the floating pumice has actually given way beneath one's feet and let one into the lake beneath. Some of the earthware is thinner and more brittle than a teacup.

"There are two of these geysers about 100 yards apart, whose eruptions take place alternately, one beginning to play the moment the other ceases, and continuing in full action for about ten minutes, when its neighbor's watch begins again. Into one of these, named the Whaeana, some years ago there fell two little children, who were boiled alive; and the spot has been 'tapu' ever since.

"Every part of the valley not occupied by the lake and rushes is covered with a hard half-crystallized crust, as white as snow, and strewn with various objects similarly incrustated, so as to resemble a lake over whose frozen surface had swept a snow-storm. The brittleness of this crust and of the caking of baked clay makes it necessary to step very gingerly, and in some parts to place layers of brushwood to walk upon. Some of the waters have the power of fossilizing wood and similar substances. We found a good-sized fossil tree prostrate in the valley. Others merely cover the objects over which they flow with a hard white crust. So rapidly does this incrustation proceed, that, not very long ago a duck was found completely imbedded in a half-crystallized crust, which had preserved the flesh perfectly sweet.

"Crystallized leaves and other objects of beautiful and fantastic shapes, lay scattered about in profusion, and we felt that the day had been far too short when the lengthening shadows warned us to return; we could gladly have spent a week or more in exploring the many and ever-varied phenomena which almost every step disclosed.

"Our return route to the canoe led us again across Te Tarata, just below the crater, when we were greeted with a sight which defies

description, but will never be effaced from our memories.

"The sun was just setting behind the sombre western hills. Above us were clouds, orange, golden, and purple, of unusually warm and brilliant tints, even for an Australasian sky; before us, acres and acres of water-terraces, such as might belong to some giant's palace in Fairyland; every ray of the sinking sun caught and broken into a thousand prismatic hues by the countless crystals that hung like lustres round the margins of the successive basins, or mingling in the blue waters within them with the gorgeous reflexions of the glowing clouds above.

"Lower still, as a foil to this glorious picture, lay the dark waters of the calm lake, buried in the deep shade which the mountains cast eastward, and motionless save where the still surface was ruffled by the teeming flocks of wild fowl. Beyond the lake, towering dark and sharp against the warm western sky, rose the grim mountain 'Te Rangī Pakaru,' with its great crater vomiting dense clouds of sulphureous vapor."

An Epistle of Stephen Crisp's, exhorting Friends to Diligence, and a living concern in Meetings appointed for the Worship of God.

All Friends, every where, who have tasted of the goodness of God, keep in the savor thereof, and let not your minds be drawn away from that which is living, for that which is living cometh from above, and makes you lively; but that which is corruptible, cometh from the earth, and brings death with it over your souls; therefore, watch in diligence to retain the savor of the life of truth, that you may live from a sense that Christ liveth in you, who is the seed, the truth, the noble plan, and grows and bringeth forth fruit in you.

And all Friends, every where, who thus keep and retain the savor of life in them, they will come to feel daily quickenings thereby, and will have power over the nature that is dead in Adam to all good works, and especially to waiting upon God with a steadfast and stayed mind; nothing so hard as this to that old and corrupt nature which is soon weary. This is that nature, which cannot watch with Christ one hour; but let his trials and sufferings be ever so great, this leads from watching to sleeping, this hath no fellowship with the seed of God in its suffering, and shall have none in its dominion. And where this drowsy nature stands uncrucified, it keeps you in the weakness out of the power, and this brings out of the savor and feeling of the goodness of God, and so makes meetings unprofitable, and as it comes through custom to be allowed and submitted to, it leads into hypocrisy, that is to say, into a professing to wait upon God, and a presenting the body in the meeting, and then letting the heart (which God requires) depart far from him, even into the ease and liberty of the flesh, in which the apostle said, they that lived could not please God.

Therefore, dear Friends, I exhort you, consider what you do when you assemble together, and let it be in the name of Jesus, that is in his power, not in the weakness, nor in the fleshly or carnal mind, which is at enmity with God, but in his name and power make war with the fleshly, and with the drowsy spirit that lodgeth there, and in the faith overcome it, and be not overcome by it, for that is bondage: and hold your meetings in the spirit,

where every one is made alive and flourisheth and grows in life and in dominion, and shineth forth to the glory of God, and to the comfort and refreshing one of another.

For as any one suffereth himself to be overtaken with sleep in a meeting, he loseth the sense of the power of God, he becomes a grieve to the diligent, and an evil example to the negligent, and brings himself under the judgment of God's power in his own conscience, which when he awaketh riseth up against him; and also he is under the judgment of the power in the whole meeting, which, when he comes to a true sense of, will be no light thing; and further, if any come in and see such things among you, who make a profession of an inward power, and an inward quickening spirit, and a worship that is inward in the spirit and truth, herein such cause the name of God to be dishonored, the way of truth to be holden in little esteem, by such who know it not in themselves, and a stumbling-block is hereby laid in their way to hinder them from any further seeking after the truth. Oh, Friends! consider these things, and be all diligent in this matter, and let not that earthly part have liberty, but let it be kept in the cross till it dies, or else it will keep and hold you dead and insensible of God and one another. And this is it that hath hindered the growth of many, namely, their carelessness in coming to meetings, and their slothfulness when they are there. Therefore, for time to come, let every one that bears the profession of truth, be diligent in the work of God, and be good examples to each other; and observe your time and hour of coming to meeting; and set not one hour, and then come at another; and neglect not your week-day meetings, by reason of your outward occasions, for that will not bring a blessing upon your affairs, but let all things give way to the service of God, and then all things shall work together for good unto you, and there shall be no lack of any thing that is good for you.

So, dear Friends, in the true love of God have I written this unto you, as a word of exhortation, to stir up the pure mind in you all, and the God of power and strength give you of his might, and of his power to help you in all your necessities, and in all your combats, and strengthen your faith, in which, and by which the victory is obtained, which is the desire of my soul for you all, who am your friend in the fellowship of the gospel.

STEPHEN CRISP.

Wonderful Cats.—It is on record that a shoemaker in Edinburgh chanced to leave the door of a lark's cage open, of which the bird took advantage to fly away. About an hour afterwards, a cat belonging to the same person made its appearance with the lark in its mouth, which it held by the wings over the back in such a manner that the bird had not received the least injury. After dropping the bird on the floor, the cat mewed, and looked up to her master as if expecting his recognition on her cleverness. The writer has himself observed many instances of a remarkable instinct in cats, and at the present time has one which every day knocks at the door—sometimes modestly, sometimes with a sharp double knock, like a postman, occasionally with a series of raps, like a lady or a quiet single gentleman. The door is half glass, and the knocker low. The cat was not taught, but acquired the trick by his own observation.

of chemical tests is almost beyond belief. A drop of colorless liquid, added to a gal colorless liquid, may instantly produce a defined red, or blue or yellow throughout the entire mass of the latter; and yet, it is less than a hundredth part of a grain of the solid substance in solution that is to give such unmistakable evidence of sense.—*Journal of Chemistry.*

For "The Friend."

Memoirs of Mildred Ratcliff.

(Continued from page 411, vol. xliiv.)

10. 5th mo. 1st. We started on our way, and got about seven miles, when with some men who had been at the city informed us we could not cross. We were again detained, yet I esteemed it a blessing that my mind was kept quiet and easy, notwithstanding our unpleasant situation; and to stay at a dirty cabin, not only all day, but the next night, meeting with rough, not only in eating but in lodging. I fought all and over all, I think I may felt easy in my mind, and was enabled to all to give thanks.

11. Waited a while this morning to hear boat to the river. After a little time we informed we might pass over. At the place the poor waiting company seemed to their contentences cheered up, and we went; yet I felt a care on my mind, that I might take heed of these things raising to temptation. For great has been my complaint nothing might raise me up too high, and me down too low; so that I might know an even walking in fear before. That through his mighty power, with which I know I can do nothing, I may be rejoiced evermore, and in everything I thank. I may say awful were my feelings when we came in sight of the rapid. Yet my confidence I thought was shaken in Him, yea in Him alone, who overer over the winds and waves. Blessed name, his care is still over all who trust

12. While we waited on the shore for the boat, my mind being turned inward, I felt a good evidence of His care, and that I need not be dismayed at the foaming deep; for that I believed should pass over it. I believed in His gracious promise, and felt safe in my Father's hand. After we landed safely on the other side, as I rode along my spirit was lifted in secret, and sang praises to the Father of my life. There was a cry in my heart to all created nature, to give thanks to Him who was, and is, and is to come: for he will, for his mercy endureth for ever.

13. To-day we rode through much rain; continued travelling the more constantly, and the creeks were rising fast. Indeed throughout this evening several dangerous fords, through all I could but admire the Lord's wisdom in keeping my mind quiet and satis-

14. This morning I awoke with an unusual concern on my mind which I mentioned to my dear companion before we got to bed. At the conclusion of the day I ready to say, indeed it was no marvel that I should be thus—for as it was with me, so it was with her—had an unusual anxiety attending her as soon as we awakened. Notwithstanding we had a good pilot, which we esteemed a singular favor, such were our ups and downs, and our varied trials, that I have

no words to set them forth: so that those who have not experienced the like, could form but a faint idea thereof. Such poor pilgrims as account not their lives dear unto themselves for the truth and the gospel's sake, and have in a greater or less degree to experience these things, may sympathize with us in this journey. Yet I trust I may say the name of Israel's God was magnified above all.

15th. To-day have had a pretty pleasant travel. We parted with our kind pilot in Fincaster. He would have us to dine with him at his sister's. She and her husband were very kind to us, poor travellers, though they in appearance lived in great splendor.

16th. To-day we had pleasant weather, and pretty good roads; so that notwithstanding two of our horses were not quite well, and myself poorly with a sickheadache, yet through Divine mercy, after riding nearly forty miles, we got to a settlement of Friends.

17th. Being at a dear Friend's house to-day, we rested. O! what cause of thankfulness have we, in taking a retrospective view! May we not say, in the feeling sensation of our hearts, Blessed be the name of the Lord our God for all his benefits! Praised and adored be his worthy name for evermore; for he is good; his mercies endure forever.

18th. To-day we still have leave to rest at our beloved friends, Elias and Hannah Fisher. Oh! that all Friends everywhere could be leavened into that spirit of pure love wherein we met with these dear friends.

19th. We attended Ivy Creek Meeting, it being their meeting-day.

20th. At Seneca Preparative Meeting, where I felt a concern for the people of the neighborhood, and had a meeting appointed at four o'clock for them.

21st. Returned back to South river to their Monthly Meeting. All these last were hard, exercising meetings. My spirit mourned, and was much oppressed. Although I labored a little from motions of pure gospel love, I found but little relief.

22nd. Was again at South river. Although the meeting was large, there being besides Friends many others, yet I was quite shut up as to the ministry. I thought great was their anxiety for words; yet it had a tendency at that time, as well I believe as at many others, to shut up the gospel spring, and to cause it to become a sealed fountain, which otherwise might have flowed as a refreshing stream to the weary traveller. O! what a pity it is that any should be so blind to their best interest, as to be looking to the poor instrument, or depending upon streams, instead of the main Spring or Fountain Head.

That this is the frequent experience of ministers in their travels hither and thither, we have many testimonies. That it also tends to bring discouragement and close searching of heart to the poor instrument, as well as a degree of death to the meeting, there can be no doubt. Is it not a little humiliating that any should be more attached to a measure of grace in our fellow-worms, than to the unmeasurable, inexhaustible Fountain that is in Christ Jesus? Why are we not often reminded and instructed in respect to this, of what the poor aged colored man in effect said: If the crumbs from the Master's table be so sweet, what must the great loaf in glory be? Oh! when will the true Teacher—the source of all-sufficiency in the heart—be sought unto first and before all? In whom are hid all the

treasures of wisdom and knowledge; who is able to do exceedingly abundantly, above all we can ask or think; and from whom every living stream of fresh, sustaining grace and help can alone emanate. May the Bridegroom of souls, in His mercy, quicken us to a heart-felt sense and experience that in Him and in Him alone, are all the well-springs of light, and life, and true joy. That with him there is saving oil for all our lamps. Of whom and through whom, and to whom are all things; to whom be glory forever.

24th and 25th, rested amongst our friends: yet I may say, mourning in spirit has been a good deal my lot since I have been here, because of the slain of the daughter of my people.

26th, 27th and 28th, continued my journey to the Yearly Meeting. Arrived on the 19th, with a number of Friends from South river, at the house of our kind friend, John Stanton. Attended the Select meeting, wherein I was felt close exercise; some of us being dipped into suffering with the suffering seed. Some close hints were dropped, which if attended to, might arouse the camp to dig deep, that the hidden wedge of gold might be found, which has long retarded Israel's travel in Virginia as well as many other places. O Virginia! Virginia! the land of my nativity, how has my spirit secretly mourned over thee, not only in days that are over and gone, but now renewedly since my lot is cast within thy borders, when on a visit from a distant land! At my Master's command I have cheerfully left my home, and passed over many rocks and lofty mountains, weak as my frame is, in obedience to the God of my life. Unto whom I desire to devote every moment of my time, body, soul and spirit. For the sake of the children of my Father's house, unto whom I am now sent, I account not my life dear unto me, if I may, through the mighty power of a long suffering God, arouse the camp to action and to arms; that so the enemy may not take you captive, and carry you back into Babylon, out of which city ye were brought as a people in the beginning. O Holy Father! remember thy people Israel, and beautify the place of thy feet, if consistent with thy will and righteous judgments.

29th, were the public meetings for worship, which were large. Though we were a good deal interrupted by the inconsiderate, yet the power of God was, in a good degree, triumphant over all. Praised and magnified be his worthy name forever. Several lively testimonies were borne in those two meetings, which, to the pure in heart, were as refreshing showers from Hermon's top.

21st, 22d, and 23d, Friends were engaged in transacting the affairs of the church, which they were enabled to do in much love and condescension, being graciously favored, I think it may be said, through the several sittings thereof, with the overshadowing of the Divine wing.

34th. This Yearly Meeting, I am ready to conclude, has been a time of renewed visitation from the Father of all our mercies. Several messengers from different Yearly Meetings attended it, and through the mighty power of Him that sent us there, we were enabled, I trust, to discharge the message committed to us, so as to stand in a good degree clear of the blood of all who attended it. Above all vocal sounds, the sudden and unexpected death of a dear brother, J. P., a member of

this meeting, I thought might be said to sound an awful alarm to us his surviving friends, to set our houses in order for the certain change from the visible to the invisible world. He was at meeting on the 21st, and now gone from the militant church, we trust to join the glorious church triumphant, there to unite with the spirits of the just made perfect, in one continual song of praise, where the wicked cease from troubling, and the weary are at rest. How deep, how marvellous, O righteous Father, are thy works! How just and true are all thy ways, thou king of saints! How manifold thy matchless love and tender mercy to us-ward; even in proving seasons thou art yet mindful of us, visiting the sons and daughters of men. May this Yearly Meeting, and Thy gracious dealings therein, be profitably revived in each of our minds, who attended it, whilst we have life, or any sense of being. For thou art good, and thy love is still over all that put their trust in thee."

For "The Friend."

History Illustrated by Numismatics.

Excepting that branch which relates to the short period of our own history, the interesting science of numismatics has received comparatively little attention from the people of this country. Two causes have operated adversely to its study. One is, that from her geographical position, America is in receipt of only a limited number of specimens, and the other, a more discouraging one, is the fact of the existence of large numbers of the products of the counterfeit and the forger. For both imitations of rare pieces, and also others which are wholly or in part the product of the imagination of their fabricators, often make their appearance here. Some of these are readily discovered by a careful examination, but others are so skilfully made, as to be detected only after an experience and a knowledge that few persons attain. It is proposed to give the readers of "The Friend" some information on the subject, which will probably be new to the majority of them.

In order to a proper understanding, it seems desirable to state some first principles. Numismatics, then, is the science of coins and medals. A coin is a piece of metal stamped with certain characters by some power or government, making it pass current for money. A medal is never intended for money, but is struck in commemoration usually, of some historical or local event. It will thus be understood that unstamped money is not coin. And we know that the former circulated for a very long period before we have any evidence of the existence of the latter. Thus in Genesis xxiii. 16, we read, "And Abraham weighed to Ephron the silver, which he had named in the audience of the sons of Heth, four hundred shekels of silver, current money with the merchant." At this very early period, which chronologists compute at 1918 B. C., we have recorded the circulation of the precious metals. For Abraham was stated to have been "very rich in cattle, silver and gold." The metals may have been in the form of drinking vessels and jewels, but there are reasons for believing that a part of it might have been actual money. The Egyptian sculptures and paintings, some almost as fresh as when they were executed, have representations of figures weighing out rings of money, while others are making a note on a ta-

blet of the precise amount. Ancient authors also allude to leather money, clay money, shell money and iron money. Of the latter, Rollin relates that Lycurgus introduced it into Sparta, in order to sap the foundations of avarice, and had it made so heavy and fixed the rate so low, that a cart and two oxen were necessary to carry home a sum equal to about a hundred dollars of our money, and requiring a whole chamber to keep it in.

Humphrey says: "Coined money is not mentioned by Homer, which he most certainly would not have omitted to notice had it then existed, for his great poem is a sort of encyclopedia of the state of civilization in his time; and we find him, instead of coined money, alluding to the circulating medium then in Greece, as of a much more primitive character; as when he says that an ox was exchanged for a bar of brass three feet long, and that a woman who understood several useful arts was considered worth four oxen. Thus it appears that although metal was very early used as a medium of exchange, it merely represented in a very direct manner, actual barter, till coin was invented."

The most ancient coins that have come down to us, are those issued by the states and cities of ancient Greece. High authorities seem to be agreed that gold was first employed, and that a gold stater of the city of Miletus in Lydia, Asia Minor, now in the British Museum, exhibits marks of a more ancient character than any other known coin. This also accords with the statement of Herodotus, who says the Lydians first coined gold. The word "stater" signifies standard, and appears to have weighed twice as much as the silver standard or drachma, and to have equalled in value twenty drachma. The stater of Miletus is believed to be about twenty-five hundred years old, and illustrates the manner of the most primitive coinage. A die was cut, having the device (in this case a lion's head) in reverse. This die being fixed, a ball of gold of standard weight, was laid upon it, and driven by means of a punch upon its upper surface, into the die. Both the pattern and the execution, are as might be expected, very rude; and yet even these early pieces are characterized by a boldness of design very striking. As the art of coining improved somewhat, the metal was first more or less flattened before being stamped.

Of the same weight and of similar fabric are the dorics or gold staters of Darius Hystaspis. The earliest of these coins are supposed by some authorities to be cotemporary with, or even anterior to any others. Upon the obverse side is represented a crowned monarch kneeling on the left knee, and armed with bow and javelin; the reverse shows only the punch mark, or *quadratum incusum*. Respecting these dorics, and also the silver coins of like character, George Lawlinson makes the following remarks.

"The coinage of Darius Hystaspis, B. C. 521-486, consisted, it is probable, both of a gold and silver issue. It is not perhaps altogether certain that he was the first king of Persia who coined money; but, if the term 'doric' is really derived from his name, that alone would be a strong argument in favor of his claim to priority. In any case, it is indisputable that he was the first Persian king who coined on a large scale, and it is further certain that his gold coinage was regarded in later times as of peculiar value on account of

its purity. His gold dorics appear to be contained, on an average, not quite 124 gr of pure metal, which would make their value about twenty-two shillings of our money. They were of the type usual at the time both in Lydia and in Greece—flattened lump metal, very thick in comparison with the rest of their surface, irregular, and rudely stamped. The only dorics that can be assigned to the reign of Darius Hystaspis are those that bear the figure of a king with a bow and javelin on one side, and an irregular depression, *quadratum incusum* on the other. The silver dorics were similar in general character, exceeded the gold in size. Their weight varied from 224 to 230 grains, and they would thus have been worth not quite three shillings of our money. It does not appear that any other kinds of coin besides these were issued from the Persian mint. They may therefore, it would seem, have satisfied the commercial needs of the people."

Whether the art of coining was derived from the Persians from the conquered Greeks, whether it originated, as there is some ground for supposing, among the Persians themselves is not fully settled. But it is interesting to student in history to know that these dorics were employed in the payment of the Greek soldiers during the march and retreat of ten thousand, as narrated in Xenophon's *Anabasis*; and that they were also employed by the Jews as a freewill offering for the building of the temple, as stated in Ezra ii. 6. Other cities and islands of Asia Minor, as Sardis, Cyzicus, Clazomenae, Phocæa, Lampsacus, Chios, Teos, and Abydos.

(To be continued.)

THE FRIEND.

NINTH MONTH 2, 1871.

The great movements in scientific and religious inquiry which have marked the fifty years, while attended with unexampled success in the former, have disturbed cherished opinions in the latter, and are uniting creeds and ecclesiastical systems, to ascertain whether those who boast themselves being liberal thinkers can so remodel them to perfect a theological revolution consonant with what is claimed to be the advanced lightenment of the age.

Changes in the ideas respecting doctrinal certainty, and of the value of established dogmas, in the aims and activity of leaders in religious society, and in the understanding of manners of that society, relative to the obligations resting on it in its intercourse with the lukewarm and unbelieving world around all have combined to unsettle in the mind many, what they have heretofore considered fixed and stable, and by the common creation have reconciled many more, who are at the sincere lovers of truth, to innovations which would once have shrunk from with dread, and denounced with conscientious avowal. As in the enjoyment of civil rights, so the application of religious belief, and even admitted religious principles, the popular demand is, that it be independent of ecclesiastical control, untrammelled by unyielding formulas, and that each member in church organization be at liberty to believe and to act according to his own conscience and cho-

For "The Friend."

The following is offered for the columns of "The Friend," if deemed suitable. Of the instrument through whom this extraordinary message was delivered, William Evans thus speaks in his Journal, page 382. "This morning I received intelligence of the death of that pious and extraordinarily gifted minister and servant of Christ, Ann Jones, of Stockport, England. She visited this country about the period of the separation in 1827-8, and was a sharp threshing instrument, in the hand of the Lord, against the spirit of infidelity, then making fearful inroads upon many under the name of Friends, who knew very little of their principles, or of the sanctifying power of the grace, ruling in their hearts. Her controversy was with the leaders and principals, who were working in the dark to draw away ignorant and unwary members into the paths of unbelief, and into contempt for the yielding advocates of Christ's gospel, and the authority in the church. She was one of the most fearless soldiers in the Lamb's army, aided by his wisdom and strength was often instrumental in discomfiting the enemies of Christ; while she infused courage and firmness into the hearts of the little flock in different places, on whose shoulders rested with might, the support of the principles and discipline of the Society. When she informed the Yearly Meeting of Ministers and Elders in Philadelphia that she felt liberated to return home, William Jackson, of West Grove, expressed his unity with her and said, she had come amongst us in the same power and spirit, with which Samuel Fothergill visited his country, whom he had heard in the ministry."

This striking message was delivered about the time of the culmination of the Beaconite crisis, against the plausible unsoundness of which, London Yearly Meeting, we believe, ever bore open testimony. Though most of the active members of that day have passed away, the lesson then introduced into the Society has not ceased to work, and under a stumbling sense of the present state of things within it, we may say, though dead she yet speaketh.

Communication delivered by Ann Jones in the Yearly Meeting of Men Friends, held in London 6th mo. 1836.

I can truly say I came into this meeting, not knowing that I should have anything to communicate; but my mind has been impressed, as I have sat for a short time in silence among you, and I was willing to become a fool for the Lord Jesus Christ's sake; would that there were more among you who were willing to become fools for His sake. There are those amongst you, who are encouraging a carnal wisdom, a head knowledge, an outward learning, which exalteth itself and is ever endeavoring to find out the way of salvation by the study of the scriptures. This spirit has spread, even among those who are making a high profession; men who are robbing Christ. They talk much of belief in the Atoning Sacrifice, but are setting at naught and despising Christ in his inward appearance, and apply them in a carnal sense. Such was not the way in which our worthy predecessors acted. The Lord raised our predecessors in the Truth, to be a light in a dark, degenerate age, and through their instrumentality, He was pleased to reprove the carnal professors of the outward letter in their day;

but there are some among you, who are holding up to scorn the acts and writings of these our worthy predecessors, and are endeavoring to cast disrespect upon them. Take care, as you will have to give account in the awful day of righteous retribution, I charge you, take care how you hold up them and their writings to derision; they are resting from their labors far beyond the reach of your derision; your bitter cunning shafts will return upon your own heads. Beware, then, how you, with unhalloved feet, trample over the ashes of your worthy predecessors, or attempt to cast a shadow over the brightness of their character. These expressions may appear strong, but I cannot choose my own words as a minister of the gospel. I always desire to be the instrument through which the Lord shall speak, and not a word more than he shall give me, and to declare to you the whole counsel of God, so that I may be clear of your blood. The Lord hath a controversy with the spirit that has crept into this Society, and which is sitting in the judgment seat. The Lord I say hath a controversy with these, but he hath a still greater controversy with those who are seeking to please both parties. What concord hath Christ with Belial, what union between the temple of God and idols. But I have a word of comfort for the little remnant whom the Lord hath yet among His people; may He grant you his spirit to discern and avoid the grievous errors which abound. And the Lord God Almighty will show himself valiant on your side, and will arise for your signal deliverance.

The British census of 1871 was taken within twenty-four hours, commencing at midnight on Palm Sunday, and occupying the whole of Monday, April 3. To accomplish this result, England and Wales were divided into 32,606 districts, with an enumerator for each. To select, muster, instruct, equip and pay this vast army, to discipline their efforts so as to make their simultaneous movement a perfect success, required administrative abilities of a high order. Each enumerator received a guinea for his day's work, besides two shillings and sixpence per hundred for all the names over the first four hundred. The total expense of gathering and embodying the statistics was nearly \$400,000. The districts did not, in any case, exceed two square miles in area, averaging 131 houses and 696 people. The minimum return was from a rural district, where one man was supposed to have earned his guinea by enumerating sixty-four persons, scattered over a moor. In London the three most populous districts returned 3599, 3850 and 4800 respectively. The enumerators collected 5,020,895 schedules from that number of families residing in 4,259,032 houses.—*North American.*

On examination, though with thankfulness I can acknowledge, that the good hand has been near to help this day, and yet am conscious that more care and circumspection in speech, less quickness, and fewer off-hand remarks, would tend to more peace. When I am off my guard, and slip but a little in conversation, it brings the rod.—*T. Scattergood.*

From the true sheepfold as described by our Lord, the sheep went not forth of themselves. The Lord put them forth and went before them.—*G. D.*

Persecution in Russia.

Many readers of *The Friend* are doubtless aware that a large deputation, comprising representatives from various Protestant countries, has during the last month sought an interview with the Emperor of Russia, on the persecution to which some of his subjects are liable. The population of the three Russian Baltic provinces of Livonia, Esthonia, and Curland are to a large extent German in their origin and language, and attached to the Lutheran faith. On the cession of Livonia to Russia by Sweden, 150 years ago, the right of the people to remain in the Protestant faith, and to educate their children in it, was guaranteed by treaty.

The Greek Church, however, has persistently refused to acknowledge any bar to its inclusion of these nonconformists in the fold of its orthodoxy—and as suasion failed to effect their conversion, force and fraud were resorted to. The acts of violence and deceit which have been wrought to accomplish this end appear almost incredible, and the penal laws now existing against the offending sectarians, and all other "schismatics" throughout the empire, are severe in the extreme.

As an illustration of this, one article of the criminal codes provides that whoever is found guilty of having induced others to secede from the orthodox confession and to join another Christian Church, will be condemned to the loss of his social rights, to transportation to Siberia, or to the punishment of the lash and one or two years' imprisonment in a house of correction.

In 1864, in consequence of numerous petitions, the Emperor deputed General Bobrinski to make personal inquiries in Livonia. A translation of his report has been published by the Council of the Evangelical Alliance in an appendix to their appeal on behalf of the oppressed Lutherans. It is ample evidence in itself of the general charges which have been brought against the authorities. General Bobrinski says, that in two districts all the twelve Russian clergymen he spoke to acknowledged that they did not know a parish where the majority of the parishioners did not wish to return to the Lutheran Church. When the object of his visit was known, hundreds of villagers assembled to await his arrival, and "implore with tears" that they, or at least their children, might be permitted to confess the Lutheran faith. The general says all his facts are gathered from orthodox sources, and continues: "A compilation of these facts leads me to the positive conviction, that of the number of 140,000 orthodox, who are counted according to the official statistics in Livonia, perhaps scarcely the tenth part confess themselves really as belonging to the Orthodox Church. . . . Your Majesty! it has been painful to me, as a member of the Orthodox Church as well as a Russian, to witness with my own eyes the abasement of the Russian Orthodoxy by the open revelation of this official fraud!"

Still no material relaxation of the penal code took place until representations were made, about a year ago, to the Emperor, when the active persecution may be said to have ceased. It was believed the present was a suitable time for further efforts to obtain an alteration in the law which still remains unchanged, and deputations from branches of the Evangelical Alliance in America, Sweden, Denmark, Hungary, Switzerland, and Eng-

land—thirty persons in all—met lately at Sturgard, expecting there to find the Emperor, who was to visit his sister the Queen of Wertemberg. The Society of Friends was invited to join this deputation, and the Meeting for Sufferings, after due consideration, thought it best to do so. A separate memorial was accordingly prepared, and Isaac Gurney and Henry Hipsley were deputed, with Samuel Robson, to present it.

The Imperial visit was ultimately paid to Friedericks-hafen, on Lake Constance, not to Sturgard, as at first expected.

The Emperor, who is understood to be opposed to the persecution, but who views with some jealousy any outside representations with regard to the internal affairs of the country, declined to receive the deputation personally, and appointed Prince Gortschakoff, his prime minister, to receive it instead. The Prince refused the memorials asavoring too much of interference, but very courteously entered into the subject in an interview of an hour and a half's duration. He intimated that whilst laws were in force they should be obeyed; that any change rested with the Emperor, who altered them at such times as might seem best. No more definite reply could well have been expected; but it is quite hoped that some beneficial result may accrue to the poor people who are so justly the objects of the interest and sympathy extended towards them.—*London Friend.*

For "The Friend."

Acknowledgment of Aid to Tennessee Freedmen's Schools.

It is due to those who have contributed to this enterprise to be informed that they have been the means of establishing eight new schools; which, with three of the former ones, make eleven now in operation. If the liberality hitherto extended is continued, there will be twenty or upwards, and over 1000 pupils enrolled during the coming Autumn. Some of these schools are very promising. The Normal class at Maryville is filling up, and is the special object of care and of expense. We board a few of the students from a distance, and wish to have more in this way. Our policy is to make the *Freedmen cooperative*. Where we find those who are meritorious and gifted, we encourage them to try for the Normal class; and we give notice in the different schools to have such recommended to us as candidates for that class. It is hoped that this acknowledgment will serve the present purpose of reporting, to those who ought to know, what the pressure of work prevents me from writing for each individual.

Y. WARNER.

Beaver Creek School, Tenn., 8th mo. 24, 1871.

Wonderful Memory of Cardinal Mezzofanti.—Mezzofanti was the son of a carpenter, and was intended to be brought up to the same trade. A priest, however, saved him from a position out of which he would have certainly raised himself, and had him educated for the priesthood. He acquired, before the completion of his university career, the Latin, Greek, Hebrew, Arabic, Spanish, French, German and Swedish languages. At the age of twenty-two, he was made first Professor of Arabic, and afterwards of the Oriental languages, at the University. In 1841, Guido Gorres, the great German scholar, wrote of Mezzofanti, that he was familiar with Greek, Latin, Italian,

French, German, Spanish, Portuguese, English, Dutch, Danish, Swedish, Russian, Polish, Bohemian, Servian, Hungarian, Turkish, Irish, Welsh, Wallachian, Albanian, Bulgarian and Illyrian. He also stated him to be master of Sanscrit, Persian, Koordish, Georgian, Armenian, Hebrew, Arabic, Syriac, Samaritan, the Chaldee, the Sabotic, Chinese, Coptic, Ethiopian, Abyssinian, Ambroric and Anglose languages. Mezzofanti would detect the particular county from which an Englishman came—in fact, he was acquainted with all varieties of dialect, patois and provincialisms. Cardinal Wiseman asserted that to his certain knowledge Mezzofanti was once taken by a Portuguese for a fellow-countryman, and again was supposed by an Englishman to be a native of England. Before his death, which occurred 3d mo. 15th, 1849, Cardinal Mezzofanti must have been thoroughly acquainted with from seventy to eighty languages.

THE SPARROW.

I have no barn or storehouse,
I neither sow nor reap;
God gives me a sparrow's portion,
But never a seed to keep.

If my meal is sometimes scanty,
Close picking makes it sweet;
I have always enough to feed me,
And "life is more than meat."

I know there are many sparrows—
All over the world we are found;
But our heavenly Father knoweth
When one of us falls to the ground.

Though small, we are never forgotten;
Though weak, we are never afraid;
For we know that the dear Lord keepeth
The life of the creatures he made.

I fly through the thickest forests,
I light on many a spray;
I have no chart nor compass,
But I never lose my way.

And I fold my wings at twilight,
Wherever I happen to be;
For the Father is always watching,
And no harm will come to me.

I am only a little sparrow,
A bird of low degree;
But I know that the Father loves me,
Have you less faith than me?

RELIGION.

BY THOMAS LYLE.

O! wide they wander from the path of truth,
Who paint Religion with a brow of gloom;
Her step is buoyant with unfading youth,
Her features radiant with immortal bloom.

In life's gay morning, when the crimson tide
Of pleasure dances thro' each burning vein,
She leads with guardian care her charge aside
From the broad passage to unending pain.

And when the fleeting joys of time are past,
Each shattered planet from its orbit veers,
She bids with holy hope the sufferer cease,
To brighter regions his confiding gaze.

From slavish fears—from low deluding cares,
"Th' here alone the sinking soul to save";
For her its loveliest smile creation wears,
For her no terror has the frowning grave.

No—should this scene in headlong ruin close,
This shattered planet from its orbit veer,
She would not tremble, for right well she knows
The arm is near her of unbounded love.

If thou wouldst reap in love,
First sow in holy fear;
So life a winter's morn may prove
To a bright endless year.

Silver in the Sea.—The poet tells of the gems that shine with "purest ray serene" in dark unfathomed caves of ocean; but it is not in those inaccessible depths alone that the treasure of the sea is hidden. There is untold wealth diffused throughout the immensity of waters, as secure from human avarice as if it were in the abysses which plummet never sounded. Its very diffusion puts it out of our reach. The fact that it is everywhere makes it practically nowhere. Some years ago, certain French chemists demonstrated that sea water contains an appreciable amount of silver. They decided that, if it is equally distributed, there must be at least two millions of tons of the precious metal in the whole ocean, or more than has ever been dug from the earth. And experiments made at widely distant points, prove that the metal is thus uniformly diffused. The water of the Pacific off the coast of Chili, as analyzed by an English chemist, gives the same result as the Frenchman had obtained from the waters of the British channel.

The silver in the sea is only one out of a thousand illustrations of solid substances made invisible by chemical processes. And we must not suppose that it is only minute quantities of matter that can be thus lost to sight in transparent liquid. A silver half dollar (a mythical piece of money to our young readers, but the old folks can tell them how large it is, or was), can be dissolved in a very small amount of nitric acid, which, if pure, is a colorless liquid. Coin soon vanishes, and the liquid is as clear and transparent as ever. Many dollars' worth of silver might thus be concealed in a gallon of what would seem to be nothing but water. Other metals, and, indeed solid substances of all kinds, may be dissolved and made to disappear in a similar way. There is no visible form of matter which chemical agencies may not render invisible. What we commonly call the destruction of matter is merely this metamorphosis from the seen to the unseen.

When wood or anything else is burned it has simply undergone a chemical change which removes it from our sight. Not a particle of matter can be really destroyed, unless by the Power that called it into existence. The silver in our transparent liquid is not annihilated if we pour it into the sea; it is lost to us, but the silver is there, like the millions of tons of kindred metal that were already mingled with the waters. In like manner, the coal and wood we burn, except the small residuum of ashes, have become viewless gases, and are blended with the aerial ocean of the atmosphere. On the clearest day the air above us is laden with thousands of tons of carbon, in this transparent condition. It is there, though we cannot see it, and plants are continually turning it back into visible form again. This is the key to the mystery of their growth, which is mainly the withdrawing of carbon from its gaseous state of carbonic acid, and making it a part of their own structure.

We have said that the silver in the sea is useless, because it is diffused through so vast a bulk of fluid. But the fact that it has been possible to detect it when thus diffused shows that, if chemical agencies can make solid substances vanish from our sight, they can, on the other hand, compel a body thus concealed to show itself, even when it forms only the minutest proportion of the mixture. The deli-

out forfeiting his claims to equal standing with his fellows.

There is a strong tendency among no small number of the scientific and highly cultivated classes, to openly avow unbelief in the commonly accepted revelations contained in the Scriptures, and the doubts and disbelief emitted by them, have spread widely and unsettle the faith of thousands, who cannot themselves command the means to test their fallacy, probably will never learn how effectually error has been done by others. Again there are others, who, looking at the degradation and misery of large portions of human beings in every part of professing Christendom, are declaring that christianity is a delusion; not discerning that the failure is in the practical application of the religion proposed; the inherent principles of which, if followed out, would eradicate the evils connected with, and raise man into the dignified condition he was designed to occupy.

Notwithstanding all these sources of disbelievers there are very many who discard the tenets of the christian religion being unfit or inadequate to meet all the wants of man, whether as an individual, or associated in communities, and who speak of it freely, if not proudly, as all they stand in need of or desire. Among these, we are thankful to believe, are daily number of true disciples of Christ; men who know from experience the power and virtue of his religion, as it transforms a state of nature to a state of grace. But the evidence afforded by life and conversation, gives reason to fear that the religion originally embraced, the religion which may be said to be fashionable, is something different from that set forth in the New Testament. The arch-deceiver varies his temptations and his arguments, according to the position and condition of the subjects with which he deals.

While with some he plays upon the weakness of intellectual power, and the unwillingness to acknowledge the incapacity of finite beings to grasp and unravel all truth, to be them into doubts or denial of that which is known only through the revelations of Omnipotence, to others who would shrink with abhorrence from repudiating the recorded truths of the gospel, he presents and intermingles those truths, as intended to convey a message of peace, and requiring a life and conversation easily reconciled with a liberal self-interest, and conformity with the commonly received manners and maxims of the world. He same questioning of what may once have been accepted as the revealed will of God, is resorted to by Satan now, as he has reasoned with our first parents in Paradise. "Yea hath God said ye shall not eat of every tree of the garden?" and the lying promise accompanies. "Ye shall surely die. For God knoweth that in the day that ye eat thereof, then your eyes shall be opened, and ye shall be as gods, knowing good and evil." Arguments addressed to the passions which are in accordance with their gross prejudices, will hardly fail to be convincing, and so a system of religion that accords with man's self-love, and assumed independence and capacity to judge for himself, is presented with the double attraction of coinciding with the reasoning of his natural understanding, and gratifying the cravings of an unregenerate heart. And so the gospel is presented as a mere outward revelation, a written record of things to be believed,

which if accepted as true, is good for food, pleasant to the eyes, and to be desired to make one wise; but the unchangeable terms on which itself declares it can alone be saving to any man, viz., to deny himself, take up his daily cross and follow Christ in the regeneration, through obedience to the manifestations of the Holy Spirit in the heart, are kept out of sight.

The religion of the god of this world, as I. Penington says, is often a close representation of that which is true, but it lacks the vital principle which gives the latter life and power. As Christ was manifested to destroy the works of the devil, Satan will of course always take care that whatever show of zeal and good works may be required to give his counterfeit popularity, the great and miraculous work of laying the axe to the root of the corrupt tree which he has sown in man's heart, shall not be effected, nor be declared to be necessary.

Can any make themselves acquainted with "the signs of the times" in the world, and in the professed christian church, and not be convinced that not only vital religion, but the fundamental principles of the gospel, are undergoing an extraordinary and determined assault, both from openly avowed and from insidious, but not less dangerous, enemies; unbelievers in and opponents to the self-denying, cross-bearing discipline with which Christ has invested the acceptance of discipleship? However distant these may be from "the last days" predicted by the apostle, certainly "perilous times" have come, when very many professors of the religion which he preached, show they are lovers of their own selves, having "the form of godliness," but denying "the power thereof;" and it is of the utmost importance to the highest interests of humanity, that in such a time of anxiety and fear, the cause of vital christianity should be clearly defined, and in the meekness of wisdom uncompromisingly defended by all who understand its spirit and know its power.

As there are but two flocks, represented by our Saviour, as being formed by Him, in the great day of judgment, the sheep and the goats, so He declares there are but two ways through life, the one straight and narrow, leading to life eternal, the other broad or wide, leading to the chambers of death. There can therefore be no middle course or termination; we must be in one or the other of the two described. It is of infinite importance to each of us, that we start in the right path; for unless we do, we throw away our privilege to take hold or make use of the means provided to help us on our journey. Let us beware how we parley with or conform ourselves to the religion that Satan has made popular by taking away the "offence of the cross."

A religion easily embraced and easily lived up to, may obtain many converts, but it is not likely to be the religion of Christ. "Strive [or agonize] to enter in at the strait gate." "Few there be that find it." Christ's yoke is easy and his burden light, when the natural will is slain, and self crucified; but "The carnal mind is enmity against God; for it is not subject to the law of God, neither can be." There must, therefore, be a great fight of affliction before the strong man armed is bound, and all his goods spoiled and cast out. The soul may, in its first awakenings, be very ready to petition to sit on Christ's right hand or on his left; but it is a very different thing to drink

of the cup that He drank of, and to be baptized with the baptism wherewith He was baptized. Our Heavenly Father seeing man's wretchedness, his helplessness, and the deceitful working of Satan for his destruction, gave his only begotten Son, that whosoever believeth in Him should not perish but obtain eternal life. He died to make atonement for man's sin, and to reconcile to God all who show their belief in Him, by keeping his commandments. He commands all to repent and be baptized; the baptism of the Holy Ghost and fire. Christ declares that he that forsaketh not all that he hath; he that hateth not his own life—the life of self which must be slain and lost—cannot be his disciple. The heart of man is deceitful above all things, and deeply wicked; and he cannot know the depth of his depravity, nor the subtlety of his own deceitfulness, unless he permits the Light of Christ to shine into his heart and reveal to him the hidden thoughts, motives and acts of darkness. "Except a man be born again he cannot see the kingdom of God;" but he can no more create himself anew than he can create a world. He must know what it is to be born of incorruptible seed, by the word of God; that Seed which alone can bruise the serpent's head, and that Word which was in the beginning; is the Light of the world, and which is a discernment of the thoughts and intents of the heart; sharper than any two edged sword, piercing even to the dividing asunder of the joints and the marrow; neither is there any creature that is not manifest in his sight. This is the word which the Apostle says is high there, in the heart and in the mouth, the Spirit of Him who is the alone door into the sheepfold, and if any attempt to climb up any other way than by obedience to this word of faith, the same is a thief and a robber. Here, then, we have characteristics which distinguish between the holy, self-denying, transforming religion of Jesus, and the spurious, self-confident belief which the enemy of souls is palming off under the disguise of devotion. "If ye know these things, happy are ye if ye do them."

SUMMARY OF EVENTS.

FOREIGN.—The French government has paid another instalment of three hundred million francs of the war debt, to be remitted to Germany.

It is reported that assurances have been received at Versailles that the German troops in France will be reduced to 50,000 in the course of the month, and those who remain will be lodged in barracks.

The negotiations in relation to the evacuation of the forts in the vicinity of Paris by the Germans, has been transferred from Frankfurt to Versailles, and Baron Von Arnim has gone to Versailles to conduct the negotiations on the part of Germany.

The bill for the disbandment of the National Guard gave rise to an earnest and excited debate in the French Assembly. Some members demanded an immediate vote on the accompanying bill of disbandment, and others thought such a measure imprudent and unwise. Thiers objected to immediate action as unjust, and asserted that only a portion of the nationals were unfit to bear arms. Being violently interrupted by the Right, Thiers concluded by saying that it was evident he had lost the confidence of the Assembly, and that he knew what course to adopt. An amendment, proposed by General Duroc, providing for a gradual disbandment, was finally adopted by a vote of 487 against 154.

It appears that Thiers actually wrote his resignation after being insulted in the Assembly, but relinquished his intention of presenting it, on that body adopting General Duroc's amendment, which in good measure embraces the President's own views.

It is understood that Thiers is greatly dissatisfied at the unwillingness or hesitation of the Assembly on the question of prolonging his powers as President.

The German Ambassador has complained to the

French Minister of Foreign Affairs, of the existence of a league for the deliverance of Alsace and Lorraine from the hands of the Germans. The French Minister replied that such a league was illegal and it should be dissolved.

A circular addressed by Thiers to prefects of departments, directs them to appeal to the patriotism of the citizens to abstain from all demonstrations on the 14th of Ninth month, the anniversary of the declaration of the Republic in Paris, and that should any attempts be made to celebrate the event, all legal powers should be used for their suppression.

The ravages of the cholera are increasing at Konigsberg. The disease has also appeared at Dantzig and other places, but the south of Prussia is still free from the disease.

The committee of the Conservative Catholics has invited the Catholics of Germany, Austria and Switzerland, to the Congress to be held at Munich on the 22d of Ninth month.

The Emperor and Empress of Brazil, arrived at Berlin on the 23d ult.

The Emperor of Germany and the Emperor of Austria are to have a conference at Salzburg, in upper Austria, at an early day.

The Spanish budget is ready for submission to the Cortes. The expenditures of the year are estimated at 600,000,000 pesetas, and the revenue at 580,000,000.

The Archbishop of Madrid, in a circular to the clergy of his diocese, requests the clergy to exercise vigilance to those persons who are married only by civil rite. The church does not recognize any such marriages.

An Athens dispatch of the 20th says: During a violent storm which recently passed over Lania, a town on the Turkish frontier, the lightning struck a powder magazine, which exploded with terrible effect. The destruction of property was very great, and the inhabitants were panic stricken and fled to the country.

The report that the potato crop of Ireland was seriously injured by blight, is found to be greatly exaggerated.

The weather has been stormy, and much damage to shipping is reported on the British coast.

Two British ships San Cirus and Knight Errant, both bound from Liverpool to San Francisco, have been lost off Cape Horn.

On the 28th ult, Jay Cooke, McCalloch & Co., of London, issued allotment letters of the new U. S. 5 per cent. loan. Money to the amount required, amounting to \$2,000,000,000, has been offered, only seventy per cent. of such subscription was awarded to the parties.

The British Consul at Zanzibar, writes that Dr. Livingston, the African explorer, is safe, and is slowly making his way homeward.

The New York Herald's correspondent at Salzburg says, in an article on the affairs that a new treaty, offensive and defensive, has been concluded between Prussia and Italy. A special dispatch to the London Telegraph makes a similar statement.

The last advices from Algeria are unfavorable for the French. All the Yabria villages have been destroyed, and the rebels are attacking the tribes which remain faithful to the French.

The deaths in Paris last week numbered 823, including 6 from cholera.

In the French Assembly on the 28th, the committee appointed to consider the motion for the prolongation of the powers of President Thiers, made a report recommending that he should continue to exercise executive powers under authority of the Assembly; that he have power to appoint or dismiss ministers, and shall be responsible to the Assembly by his acts. The report would be considered on the 30th ult. It was objected by the friends of Thiers that the proposition lacked any expression of confidence in his administration, and asserted that perfect good understanding exists between Germany and Austria, and that the two countries are to assume a joint attitude on all questions of external policy.

London.—Coupons, 953; U. S. 5-20's, 1862; 93; tenforities, 905.

London.—Inquiries, 934; Orleans, 92d.

UNITED STATES.—The five per cent. loan.—The new loan of \$200,000,000, which the U. S. Secretary of the Treasury recently placed upon the market, is, it is reported, now all taken.

The revised and final tables of the census of 1870, return the population of the whole country at 38,957,963, not including the metivized Indians of the western territories. The colored population numbers 1,980,079. New York had 4,382,759 inhabitants; Pennsylvania, 3,521,791; Ohio, 2,665,760, and Illinois 2,539,891. Delaware, the smallest of the States, had 125,015, or less than 3 per cent. of that of New York.

The interments in Philadelphia last week numbered 282. There were 35 deaths of cholera infantum, and 35 of consumption.

On the evening of the 29th ult., a railroad collision occurred near Boston, by which about twenty-five persons were killed and others seriously injured.

On the 27th ult., a party of 290 excursionists left Mobile, on the steamer Ocean Wave, for Fish River. On their return in the afternoon the boiler of the steamer exploded, killing or injuring about one-third of the party. The steamer boiler, it is stated, was very old and quite worn out.

According to the late census there were 5,560,546 persons of foreign birth residing in the United States and territories. Of these 1,138,533 were in New York, 543,291 in Pennsylvania, 515,195 in Illinois, 364,499 in Wisconsin, 828,333,331 in Virginia. California contained 13,754 persons of foreign birth, and North Carolina 3,029.

The Markets, &c.—The following were the quotations on the 28th ult. New York.—American gold, 112 1/2. U. S. sixes, 1881, 118 1/2; ditto, 5-20's, 1867, 113 1/2; ditto, 4-40, 95 cents, 114 1/2. Superfine flour, \$5 to \$55.00; finer brands, \$8 to \$9. Wheat, 45; white, 45; white Michigan, \$1.32; amber State, \$1.50 a \$1.51; amber western, \$1.44 a \$1.48; red western, \$1.40 a \$1.43; No. 2 Chicago spring, \$1.37 a \$1.39. Oats, 40 a 50 cts. Western mixed corn, 67 cts. Philadelphia.—Cotton, 19 1/2 a 19 1/2 cts for uplands and New Orleans. Flaxseed, 88 and 83 1/2 cts for quality. White wheat, \$1.55 a \$1.60; amber, \$1.46; western red, \$1.37 a \$1.42. Rye, 75 cts. Yellow corn, 71 cts.; western mixed, 69 a 70 cts. Oats, 40 a 48 cts. Lard, 9 1/2 cts. Cloverseed, 10 a 10 1/2 cts. Timothy, \$3.50 a \$3.75. Flaxseed, \$1.95. The arrivals and sales of beef cattle at the Avenue Drove-yard reached about 3000 head. The market was dull, extra selling at a 7 1/2 cts., fair to good, 6 a 6 1/2 cts., and common 4 a 5 1/2 cts. per lb. gross. About 19,000 sheep sold at 5 a 63 cts. per lb. gross, and 2,832 hogs at 7 a 7 1/2 cts. per lb., net for extra fat. St. Louis.—Superfine flour, \$3.75 a \$4.25; corn, \$4.75 a \$5.10. No. 2 winter red wheat, \$1.28. Mixed corn, 62 cts. No. 2 oats, 39 cts. Rye, 72 cts. Lard, 8 1/2 cts. Chicago.—No. 2 spring wheat, \$1.19, 2 corn, 43 1/2 cts. No. 2 oats, 39 cts. Rye, 67 1/2 cts. Cincinnati.—Family flour, \$5.60 a \$5.75. Red wheat, \$1.16 a \$1.18. Corn, 52 cts. Rye, 65 a 65 1/2 cts. Lard, 9 a 9 1/2 cts. Baltimore.—Amber wheat, \$1.55 a \$1.60; good to prime red, \$1.40 a \$1.50; Ohio and Indiana, \$1.27 a \$1.40. Yellow corn, 69 a 70 cts. Oats, 43 a 48 cts.

We are also requested by our Agent at Winon Benjamin D. Stratton, to acknowledge the receipt him of the following subscriptions: from Sara Lupton, Christiana Kirk, Lewis E. Walker, D. Stratton, Zachens Test, Cyrus Brantingham, N. B. White, Christopher Allen, Barclay Stratton, Gilbert, Robert Stanley, Alfred Brantingham, and J. C. Cameron, \$2 each, vol. 45, and from Jonathan I. \$4.50, vol. 44 and 45.

Remittances received after Fourth-day morning will appear in the Receipts until the following week.

THE WESTTOWN BOARDING SCHOOL.

The Winter Session of 1871-72 commences on Sunday, the 30th of Ninth month next. Friends who intend to enter their children for the coming term, requested to make early application to AARON S. LESS, Superintendent, adjacent Street Road P. O., or Geo. W. (Pa.) or CHARLES J. ALLEN, Treas. No. 394 Arch St., Philada.

EVENING SCHOOLS FOR ADULT COLOR PERSONS.

Principal and assistant teachers are wanted for schools, to open about the first of Ninth month.

Application may be made to—Silas B. Gilman, No. 28 North Third St. Richard J. Allen, No. 614 Wood St. Thomas Elkinton, No. 118 Pine St. Geo. J. Sentergood, No. 413 Spruce St.

WANTED.

A Teacher for the Classical Department of the B School at Westtown; to commence his duties at the opening of the next Session on the first of the Eleventh month. Application to be made to—

Joseph Passmore, Goshen, Chester co. Samuel Morris, Olney, Philadelphia. Charles Evans, M. D., 702 Race street.

FRIENDS' BOARDING SCHOOL FOR INDIAN CHILDREN, TUNESSANA, NEW YORK.

A suitable Friend and his wife are wanted to charge of this Institution, and manage the Farm connected with it. Application may be made to—

Elmencor Wood, Marshallton, Chester Co., J. Thomas Wistar, Fox Chase P. O., Philadelphia. Samuel Morris, Olney P. O., do. Joseph Scattergood, 413 Spruce Street, do.

FRIENDS' ASYLUM FOR THE INSANE Near Frankford, (Twenty-third Ward,) Philadelphia.

Physician and Superintendent—JOSUAH H. WORTHINGTON, M.D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

DIED, on the 16th of 8th mo. 1871, at his residence in Lima Co., Iowa, after more than four years of an unintermitted suffering, FRANCIS H. WILLIAMS, 88 years of age, formerly a member of 88th Monthly Meeting, in the State of New York.

WILLIAM H. PILE, PRINTER. No. 422 Walnut Street.

THE FRIEND.

A RELIGIOUS AND LITERARY JOURNAL.

OL. XLV.

SEVENTH-DAY, NINTH MONTH, 1871.

N O. 3.

PUBLISHED WEEKLY.

Two Dollars per annum, if paid in advance. Two dollars and fifty cents, if not paid in advance.

Subscriptions and Payments received by

JOHN S. STOKES,

NO. 116 NORTH FOURTH STREET, UP STAIRS,

PHILADELPHIA.

Single Copies, when paid quarterly in advance, five cents.

On Dress.

For "The Friend."

ould the Editors of "The Friend" approve of the following selections on the subject, from "The Portraiture of Quakers" by Thomas Clarkson, they might insert as well to benefit some of the readers of our Journal:

Though George Fox never introduced new or particular garments, when he led the Society, as models worthy of the attention of those who joined him, yet, as a pious man, he was not indifferent on the subject of dress. Nor could he, as a reformer, those extravagant fashions which I have known to have existed in his time, without noticing them. We find him accordingly recommending to his followers simplicity and plainness of apparel, and bearing testimony against the preposterous and disgusting apparel of the world.

In the various papers which he wrote or set forth upon this subject, he laid it down as a position, that all ornaments, superfluities, and unreasonable changes in dress, manifested either a worldly or worldly spirit. He laid it down in, that such things being adopted principally for the lust of the eye, were productive of vanity and pride; and that in proportion as men paid attention to these outward decorations and changes, they suffered some loss of the value and dignity of their minds. He considered, also, all such decorations and changes as contrary both to the letter and spirit of the Scriptures. Isaiah, one of our greatest prophets under the law, had severely reprobated the daughters of Israel on account of their tinkling ornaments, canals, and tires, chains, bracelets, rings, and earrings. St. Paul, also, and St. Peter, had both of them cautioned the women of their own times to adorn themselves in modest apparel, not with brodered hair, or gold, or pearls, or costly array. And the former had spoken of these things as being common to both sexes indiscriminately not to conform to the world; in which latter expression he evidently included all those customs of the world, of whatsoever nature, that were in any manner injurious to the morality of the minds of those who followed them.

By the publication of these sentiments, George Fox showed to the world, that it was

his opinion that religion, though it proscribed no particular form of apparel, was not indifferent as to the general subject of dress. * *

* * * Robert Barclay and William Penn kept alive the subject of dress, which George Fox had been the first to notice in the Society. They followed him on his scriptural ground. They repeated the arguments, that extravagant dress manifested an earthly spirit, and that it was productive of vanity and pride. But they strengthened the case by adding arguments of their own. Among these I may notice, that they considered what were the objects of dress. They reduced these to two, —to decency and comfort,—in which latter idea was included protection from the varied inclemencies of the weather. Every thing, therefore, beyond these they considered as superfluous; of course, all ornaments would become censurable, and all unreasonable changes indefensible, upon such a system.

"These discussions, however, on this subject never occasioned the more ancient members to make any alteration in their dress; for they continued, as when they had come into the Society, to be a plain people. But they occasioned parents to be more vigilant over their children in this respect, and they taught the Society to look upon dress as a subject connected with the Christian religion, in any case where it could become injurious to the morality of the mind. In process of time, therefore, as the fashions continued to spread, and as the youth of the Society began to come under dominion, the Quakers incorporated dress among the other subjects of their discipline. Hence no member, after this period, could dress himself preposterously, or follow the fleeting fashions of the world, without coming under the authority of friendly and wholesome admonition. Hence, an annual inquiry began to be made, if parents brought up their children to dress consistently with their Christian profession. * * * * *

Thus has George Fox, by means of the advice he gave upon the subject, and the general discipline which he introduced into the Society, kept up, for a hundred and fifty years, against the powerful attacks of the varying fashions of the world, one steady and uniform external appearance among his descendants; an event, which neither the clergy by means of their sermons, nor other writers, whether grave or gay, were able to accomplish during the fifteenth or sixteenth centuries, and which none of their successors have been able to accomplish from that time to the present.

"Christianity, though it nowhere places religion in particular forms, is yet not indifferent on the general subject of dress. For, in the first place, it discards all ornaments, as appears by the testimonies of St. Paul and St. Peter, before quoted; and this it does evidently on the ground of morality,—lest, these, by puffing up the creature, should be made to give birth to the censurable passions of vanity and lust. In the second place, it forbids all

unreasonable changes, on the plea of conformity with the fashions of the world: and it sets its face against these, also, upon moral grounds; because the following of the fashions of the world begets a worldly spirit; and because, in proportion as men indulge this spirit, they are found to follow the loose and changeable morality of the world, instead of the strict and steady morality of the Gospel.

"Though the Quakers have no particular model for their clothing, yet they are not indifferent to dress, where it may be morally injurious. They have discarded all superfluities and ornaments, because they may be hurtful to the mind. They have set their faces, also, against all unreasonable changes of forms for the same reason. They have allowed other reasons also to weigh with them in the latter case. They have received from their ancestors a plain suit of apparel, which has in some little degree followed the improvements of the world, and they see no good reason why they should change it; at least, they see in the fashions of the world none but a *conspicuous* reason for a change. And here it may be observed, that it is not an attachment to forms, but an unreasonable change and deviation from them, that the Quakers regard. Upon the latter idea it is that their discipline is in a great measure founded; or, in other words, the Quakers, as a religious body, think it right to watch in their youth any unreasonable deviation from the plain apparel of the Society.

"This they do, first, because any change beyond usefulness must be made upon the plea of conformity to the fashions of the world.

"Secondly, because any such deviation in their youth is considered to show, in some measure, a deviation from simplicity of heart. It bespeaks the beginning of an unstable mind. It shows there must have been some improper motive for the change. Hence it argues a weakness in the deviating persons, and points them out as objects to be strengthened by wholesome admonition.

"Thirdly, because, these changes, made without reasonable motives, would lead, if not watched and checked, to other still greater changes; and because an uninterrupted succession of such changes would bring the minds of their youth under the most imperious of all despotisms, the despotism of fashion; in consequence of which they would cleave to the morality of the world instead of the morality of the Gospel.

"And fourthly, because, in proportion as young persons deviate from the plainness and simplicity of the apparel as worn by the Society, they approach in appearance to the world, they mix with it, they imitate its spirit, and admit its customs, and come into a situation which subjects them to be disowned; and this is so generally true, that of those persons whom the Society has been obliged to disown, the commencement of a long progress in irrequi-

larity may often be traced to a deviation from the simplicity of their dress. And here it may be observed, that an effect has been produced by this care concerning dress, so beneficial to the moral interests of the Society; that they have found in it a new reason for new vigilance on this subject. The effect produced is a general similarity of outward appearance in all the members, though there is a difference both in the form and color of their clothing; and this general appearance is such, as to make them still known to the world. The dress, therefore, of the Quakers, by distinguishing the members of the Society, and making them known as such to the world, makes the world overseers, as it were, of their moral conduct. And that it operates in this way, or that it becomes a partial check in favor of morality, there can be no question. For a Quaker could not be seen either at public races, or at cock-fightings, or at assemblies, or in public houses, but the fact would be noticed as singular, and probably soon known among his friends. His clothes would betray him. Neither could he, if at a greater distance from home, and if quite out of the eye and observation of persons of the same religious persuasion, do what many others do. For a Quaker knows that many of the customs of the Society are known to the world at large, and that a certain conduct is expected from a person in his habit. The fear, therefore, of being detected, and at any rate of bringing infamy on his cloth, if I may use the expression, would operate so as to keep him out of many of the vicious customs of the world.

"From hence it will be obvious, that there cannot be any solid foundation for the charge which has been made against the Quakers on the subject of dress. They are found in their present dress, not on the principle of an attachment to any particular form, or because any one form is more sacred than another, but on the principle that an unreasonable deviation from any simple and useful clothing is both censurable and hurtful, if made in conformity with the fashions of the world. These two principles, though they may produce, if acted upon, a similar outward appearance in persons, are yet widely distinct, as to their foundation, from one another. The former is the principle of idolatry. The latter is that of religion. If, therefore, there be persons in the Society, who adopt the former, they will come within the reach of the charge described; but the latter only can be adopted by true Quakers."

The Peasants Life in Tuscany.

In no country of the world, perhaps, do the signs of fertility, industry and abundance, so forcibly present themselves to the stranger's view, as in the largest portion of Tuscany. Art and nature, there going hand in hand, produces a series of rural pictures of the choicest, richest, and most attractive descriptions. Through the combined influences of a glowing summer sun, a fertile soil, and an elaborate system of cultivation, the vales of the Arno, the Chian, the Ombrone, the Nivole, and the plain of Lucca, teem with products unknown to our less fruitful soil, and less genial climate. From the carefully garnered harvest of the olive tree, the peasant extracts the oil to feed his evening lamp in the short days of winter. The vine until stricken by disease, in recent times, afforded him an

abundant supply of a grateful and strengthening beverage. In the Indian maize, which springs up vigorously in his fields, he finds a nutritious food. Fig, peach, pear, chestnut and walnut trees, drop down to him their fruits. Flowers, the hot-house nurselings and garden treasures of colder climes, offer spontaneously to his view. With the Bramble of the way side fence the sweet Clematis twines; the small singing bird, which frequents the copse, makes its nest amongst myrtle boughs; the purple gladioli raises its head amidst the growing grain; and, in many a grassy nook, the white petals of the gum-cistus strew the ground. With its teeming soil, and its varied produce, the primeval curse seems to sit lightly on Tuscany.

To see the actual state of things with the Tuscan peasant, let us visit him in his home, selecting a fine day in early summer for this purpose. Quitting the high road, we take a narrow pathway winding through the fields in the direction of a substantial-looking two-storied house, whose red tiled roof is seen rising above an intervening screen of foliage. Every yard of our progress, as we advance, is marked by features that cannot fail to be admired. On either hand are luxuriant crops of grain alternating with strips of lupin, vetches, peas and beans, intersected by rows of vines, whose long branches, hanging in rich festoons as they trail from tree to tree, close in the view in every direction; not a rood of ground we traverse but bears the mark of neatness, care and industry. No weeds, no crooked fences, no yawning ditches are visible—all waste of space, all waste of soil by useless vegetation, seem scrupulously avoided. Until we reach the immediate precincts of the dwelling, the rich picture is not marred by one unpleasant feature; but once there, arrived at our destination, the whole character of the scene undergoes a complete metamorphosis. The evidences of neatness, care and abundance, disappear, giving place to signs as unmistakable of dirt, slovenliness and poverty. The dwelling, which, viewed from afar, had an air of comfort and respectability, appears, on close inspection, a cheerless and utterly comfortless habitation: discolored walls, wood-work from which almost every trace of paint has vanished, windows without sashes or glass—mere large square apertures in fact, crossed at regular intervals by iron bars—present themselves to notice; and the vacant space before the entrance door is littered over with rubbish.

Inside, a still more dreary sight awaits us; stepping across the threshold, we enter a good sized apartment, which serves at the same time as kitchen and sitting-room for the inhabitants of the dwelling. The light that enters freely through the large unglazed casement, reveals walls begrimed with smoke and dirt, and blackened rafters. A bench here, a table there, a stool and two or three decrepit-looking rush bottom chairs, with a few pots and pans, compose the whole amount of furniture visible; ascending by a steep ladder with a hand-rail, serving as stair case, we gain the second-story, and find the characteristic features of the scene below repeated in the foul, comfortless, and almost furnitureless rooms, which are used as sleeping apartments by the members of the household. Harmonizing well with the aspect of the interior, is the appearance of the mistress of the dwelling; a dirty

slattern, without shoes or stockings, clad in coarse gingham dress, become, from the effect of dirt and age, of a kind of nondescript color her face, arms and neck, are, through exposure to the sun, tanned to a dark brown hue and a quantity of black, tangled, dishevelled hair peers forth from beneath a red cotton handkerchief, covering the back part of her head, and tied beneath the chin. The clon, clustering around in scanty, tatter garments, with shocks of uncombed hair, a face guiltless of any but a most remote; acquaintance with soap and water, corruscating in air and aspect with the maternal nod. From a scene so little accordant with our expectations, we turn away with a sensation mingled wonder and sadness; and retracing our steps, marvel at the strange discrepancy that exists between the peasant's neat, trim, luxurious fields, and his dirty, slovenly, poverty-stricken habitation.

As regards the majority of the peasant in Tuscany, the scene described presents an exaggerated picture of the homes belong to the mass of the rural population. Dwellings and inmates superior to the class described, may undoubtedly be found, and such I have visited myself in various parts of Tuscany; but even in the immediate neighborhood of Florence, I did not enter one peasant dwelling, however outwardly imposing in appearance, that was not characterized with by an air of discomfort and poverty. One house, which gave me shelter for half an hour from a shower of rain, I particularly remember, as affording a striking instance of the deceptiveness of outward appearances. Alms deterred from entering from its size and pretence of gentility, I hesitated, fearing to intrude, until the sight of one of its inmates the door convinced me that the dwellers beneath its roof belonged to the peasant class. As to size, many a gentleman in Great Britain with two or three hundred a year, lives in less capacious house; but as to comfort, could not be placed upon a par with the poorest laborer's cottage I ever saw in England. In the numerous bed-rooms through which was conducted, at my request, a low truck bed, covered with a coarse, dark-colored, dirty quilt, constituted the only article of furniture visible. One room contained a heap of grass another was devoted to the silk-worm's and adjoining the kitchen (the family sitting room) was an apartment occupied by cows and calves. Dirt reigned supreme everywhere; ceilings, walls, floors, dresses, faces all had a dingy, begrimed and sordid look.

Seen through the medium of experience the existence of industry among the peasant class in Tuscany is quite an anomaly; for instances can be found elsewhere of the utmost powers of the human frame being voluntarily exerted, with no higher reward in prospect than that of furnishing merely the common necessities of existence. Strange is it, then, for us, to find that the Tuscan peasant, who works so indefatigably in his fields from dawn till after the sun is set, possesses greater stimulus to exertion than that afforded by the prospect of gaining the means afford a bare subsistence for himself a family. If industry (as it is generally held to be an ever-gushing well-spring of wealth and independence, then should the Tuscan peasant with a silver fork, and fear the frown of a man. Scarcely is one crop gathered when the ground is uptumed afresh with

le and hoe, and the yellow stubble of the vest field is shortly succeeded by another, wing the tender green of the young sprout-plants of the Indian corn. Not a vine is wad to trail its branches on the ground, every weed is extirpated by the careful reaper. As if fearing to lose a moment of precious time, he works on with spade and hoe, even whilst answering the stranger's station with ready courtesy. Long as are hours of summer day, he knows he has to do which will keep him busy until the has disappeared below the horizon. But alone does the contadino work; his labors shared by his wife and family. That dirty, black-eyed woman, with the baby in her arms, an existence quite as laborious, if not more so, than that of her husband. Besides sufferings and cares which the maternal intuition involves, she has to cut fodder for the ole, to tend, to feed, and to clean them, and take a share in outside agricultural labor. All may her face be sunburnt and stamped with lines of premature old age, for her life a hard and struggling one, and will come so until the grass grows green above her head. Work, work, nothing but work, is on the day when she washes her face, she combs her hair to appear at mass; husband and wife are sharers alike in a toilsome poverty-stricken existence. Poor in quality, and often scant in quantity the food which sustains the lives of the lean peasant. When the landlord's share deducted out of their small patch of wheat, a portion that remains serves but a short time to afford a supply of white bread for daily use. In the absence of this luxury, a thick vile-looking compound of rye and other inferior kinds of grain, made into a thick flat cake or clumsy roll, is generally eaten. Black bread, kidney beans, and porridge of Indian corn, constitute, it may be said, the fare of the Tuscan peasant. Occasionally he has in the summer or autumn season a few luxuries, such as peas, tomatoes, berries, figs and chestnuts to vary his unattractive food. Milk he seldom tastes, for the peasant's cow is looked on as a means of rearing calves, and not of providing a nutritious beverage for himself and family; and after, it may be said, as a general rule, is solely unknown. The wife of a peasant, possessing several cows, asked me one day that it was, then how it was made, and attended to my explanation with much apparent interest and curiosity. The butter I used at the Baths of Monte Caterra came some thirty miles, from the dairy farms at Florence; and at Albano, a town containing several hundred inhabitants, the luxury was unobtainable; indeed it is only in those places in Italy where the English congregate, that butter is entitled to take its place in the list of Italian produce. From the ordinary dinner of the Tuscan peasant an English laborer would turn away with a sensation of scorn and disgust, and the more so, when he found that a cup of water was to prove its only accompaniment.—*M. Crawford.*

Books on Arithmetic.—Professor de Morgan lectures, that since the year 1500 there have been published 3000 works on Arithmetic, in Latin, French, German, Dutch, Italian and English. An average production of 1 a year to each of these languages.—*The Decimal System.*

For "The Friend."

Memoirs of Mildred Ratliff.

(Continued from page 14.)

"1810. 5th mo. 24th. Continued our journey to Richmond, where on the 25th we had a meeting to a good degree of satisfaction. There were several other travelling messengers there, and it may be remarked that the doctrine held forth, was after meeting acknowledged unto in a singular manner as being great truths, "great truths," as one of their great men acknowledged to us, and thanked God he had heard them. In the afternoon we paid the poor prisoners a visit at the penitentiary, and had there a memorable time. The truth in some of their hearts was reached I doubt not, and they convinced that it was the love of God, and not curiosity which had brought us there.

"26th. Went on to Charles City, and 27th attended their meeting at Wain Oak to good satisfaction, through the arising of that power which can alone qualify for divine worship.

"28th. Went to Scimino, and was once more indulged with the privilege of being with my oldest and very kind sister at her own house.

"30th. Attended Scimino Meeting, which was a trying laborious time indeed. I labored, but found little relief. My spirit was crushed down in feeling the misery of the inhabitants of my native neighborhood, and the situation which a few more revolving suns would reduce them to, because of sin and iniquity. I mourned much in my heart on this account. In the course of that afternoon, I was at my sister's with a good many relatives and friends. Yet such were my sorrowings amongst them, that but little enjoyment was felt. I left them in the evening and went to uncle Wm. Harrison's. Although it was pleasant to be with that family, yet with the precious seed in the hearts of many of that land, I felt as a prisoner in iron bands. I esteemed it a favor, and desire ever so to do, that I am accounted worthy to suffer with the suffering seed. I desire above all things to be with my Master, and feel his promise made good, 'Where I am, there shall my servant be.'

"31st. We returned back to Charles City, hoping to cross the river in the morning; but alas! pretty soon after getting to bed, I found I must go back to Scimino. Oh this was a mortal stroke indeed to all remaining nature! Magnified be the God of my life forever, I was made willing through suffering to give up in resignation to his will: was even willing to be called a fool, or to be trodden under foot of men, so that thereby I might be found in His sight, doing his will and not mine; well knowing nothing else would afford me any joy.

"6th mo. 1st, was the Preparative Meeting of Friends of Wain Oak, which we attended; as also their Monthly Meeting on the 2nd. I was glad of these opportunities, although come at so unexpectedly, and so much in the cross. Through this detention I had some service amongst them, I believe to their satisfaction, as well as my joy. After meeting we rode to Scimino, and were with a little band of there at their meeting on the 3rd. This opportunity I was also glad of; having some service for Truth there. In the afternoon at four o'clock we attended the public meeting, wherein I was enabled to sound an alarm to the inhabitants, and pronounce the woe against them, because of the principle of oppression, and the crown of pride. Although I felt after the op-

portunity some relief, yet as we returned back to Charles City, the 4th, I found I must leave behind me a written warning, before I could feel clear of the blood of the people in this my native land; the neighborhood where I was brought up in a particular manner. This I wrote after getting back to D. S. H.'s. On the 5th we crossed James River, and at present are all at our friend P. S.'s, having my husband with us, besides other affectionate friends. Oh Father! hitherto thou hast helped us. Be pleased to be with us to the end, that so thy worthy name may be glorified through all, for thou alone art worthy forever.

"6th. Attended Burleigh Meeting, where a portion of hard labor was given me to do; yet through the help of Him who is strength in weakness, I was enabled to get through to a good degree of satisfaction.

"7th, was at Sea Creek Meeting. This was nearly similar to that of yesterday. Oh, my Father! how shall I adore thee enough for all thy benefits, in thus far helping me through many outward difficulties, as also much weakness of body, with many and deep exercises of spirit. How shall I magnify thy mighty power for all thy goodness to me-ward. I know O Lord my God! it is by the might of Thine arm that I stand; and not by might that I can do. Therefore will my soul adore Thee, and give Thee all the praise, whilst I have life, or breath, or any sense of being.

"8th. Was at Blackwater. This has been in days over and gone a place for Friends, and no doubt highly favored; but now is almost left desolate. It will soon become quite so, after a few more heads are laid in the silent grave.

"9th. At Stanton Meeting; and 10th at Black Creek. At these last meetings I think I may say surely the Great Helper was near, and gave ability to preach the everlasting gospel in the demonstration and power of the Holy Ghost. There were other people besides Friends present. May the Master's name be magnified through all, and over all, saith my soul.

"11th, at Vixes, 12th at Summerton, 13th, at Johnsons, 14th, at the Western Branch. At all and through all these meetings, Divine help was near, giving ability to discharge my mind to the parties concerned, so as to feel easy and clear in a good degree, of them all. The precious seed in every heart was saluted in gospel love, comforted, and encouraged through the pure medium of undefiled love, to the praise of the good Shepherd. The wicked and slothful servants were faithfully warned, and encouraged to the occupancy of their several gifts, I am ready to say, under a renewed sense of Divine favor, even this day at the Branch. What cause hast thou, O my soul, to take courage and confide in Him who has hitherto helped thee. Before thou left thy home, He did promise to carry thee safely through the arduous task. Why so much finching under the power of the cross; though perhaps not so much apparent finching, as inwardly dreading the business of the day. O my Father! thou knowest how precious the praise of thy worthy name is to my feelings, and how awful the task thou hast given me to do. O then, be thou pleased to be always near. Increase my faith, and more and more confirm my confidence in Thee; that so Thy name may be glorified through all and over all, for thou alone art worthy.

"15th. We rested at the house of our dear

friend Ann Scott, and got a little recovered. In the evening came to Suffolk, to our friend R. J.'s.

"16th. Went on about fifteen miles to Bennet Creek Meeting, and in the evening returned back to R. J.'s.

"17th. Had a meeting at this place. These last two meetings were exercising, trying times; yet I hope the Master's name was magnified in some hearts above all.

"18th. Continued our journey, and got to the dwelling of Caleb Winslow, in North Carolina. He and his wife are precious, living Friends, I trust.

"20th. Had a meeting at the Narrows. Here again, I think I may say, the Divine Helper was near, to the praise of His own worthy name: so that, I am ready to say, hitherto O righteous Father, thou hast helped us! It is by thy power, which alone is able to qualify for thy own work, that thy little dependent handmaid has been enabled to preach thy everlasting gospel to the workmanship of Thy hands, so as to feel in a good degree clear of their blood, whether they hear or forbear. I know these things are thy doings, and they are marvellous in my eyes. O be thou pleased to continue thy Divine help in and through all! Be with me, and keep me near thy side; and then it matters not through what I have to pass. Thou knowest that in order to visit the seed of thy kingdom, I often have to descend into the deeps, yea, and to enter into loathsome prisons too, and there to suffer with it. Yet, O my Father, if after all I may but administer through thy holy help, any relief, it is enough! Thou knowest I am willing to take my part of that which remains of the sufferings of Christ, thy dear Son.

"21st. We were at Newbegun; 22nd at Simon's Creek, and 23rd at Little River. At all of these meetings, through deep baptizing exercises, and some hard labor, under much weakness of body, ability was given to do the Master's will, I trust to the praise of his own worthy name. It was considerably to my relief, and for any thing I know, to the satisfaction of His people. For all thy favors past, O Thou, mine only Helper, my soul magnifies thy name, and humbly pleads with Thee for strength through days to come.

"24th, at Sutton's Creek, and 25th at Boyce's Creek, where was a small house, with a little handful of Friends, who seemed to have but little sense of good. Indeed I thought there was not enough of the living to bury the dead—a discouraging affecting state to poor travellers who had come far to see them. Instead of rejoicing to meet with them, as brethren and sisters in good health, our lot was to mourn for them as over the dead."

(To be continued.)

Antipathy of Flies to the Magnet.—A person having an artificial magnet suspended from the wall of his study, with a piece of iron adhering to it, remarked for several years that the flies in the room, though they frequently placed themselves on other iron articles, never settled on the artificial magnet, and even that if they approached it, they in a moment again removed from it to some distance.—*Voight's Journal.*

Still to the lowly soil
He doth Himself impart,
And for His cradle and His throne
Chooseth the pure in heart.

MERCIES.

Selected.

My Father! what an I, that all
Thy mercies sweet, like sunlight, fall
So constant o'er my way?
That thy great love should shelter me,
And guide my steps so tenderly
Through every changing day?

Each morn thy light doth come and wake
My soul again, its course to take
A day's march on with thee;
Each night thou sendest gentle sleep,
And thine own ward and watch dost keep
E'en o'er one like me.

Thy mercy sought my wayward heart,
That long had wand'ring far apart
From happiness and thee;
Thy love each day its sin forgave,
And saw but Him who died to save
The host of those like me.

Oh, then, for His dear sake forgive
My thankless heart, and let me live
Henceforth alone to thee!
May all my life show forth thy praise,
Assured that through its fleeting days
Thy love shall shelter me.

Selected.

THE LAME BOY.

FROM THE GERMAN.

The school is out. A merry throng
Boonds o'er the meadows, wild and free,
Like bees that hum their summer song;
One follows slowly,—lame is he.

High flies the ball; hands, feet are quick,
"Tis caught. How loud the shout of glee!
The poor lame boy, with aspect weak,
Along the bank lumps quietly.

"With all the rest you'd gladly roam?"
"Oh no sir," smiling, answers he,
"Playmates enough I have at home,—
You'll hear them calling after me."

"I have a starting who can speak,
He'll bid me welcome, I can tell;
My friend's leg is far from weak,
He draws his bucket from the well."

"But when your schooling-time is past,
Some trade you'll have to choose, you'll see."
"I'll cobble shoes, and have a last;
No matter then how lame I be."

"Money I'll get when I grow tall,
And birds I'll buy for company;
While working I shall hear them all,
Nor will my lame leg trouble me."

Now peering through the cottage door
His mother's smiling face I see;
She loves her pupy cripple more
Than if his limbs were strong and free.

The linnet sang; the starting came
And welcomed him with voice of glee.
I turned away, and owned with shame,
The poor lame boy had tutored me.

A Plea for Those Who Sleep in the Morning.
—The fact is, that as life becomes more concentrated, and its pursuits more eager, short sleep and early rising become impossible. We take more sleep than our ancestors, and we take more because we want more. Six hours' sleep will do very well for a plowman or bricklayer, or any man who has no other exhaustion than that produced from manual labor, and the sooner he takes it after his labor is over the better; but for a man whose labor is mental, the stress of whose work is on his brain and nervous system, and who is tired in the evening with a day of mental application, neither early to bed nor early to rise is wholesome. He needs letting down to the level of repose. The longer the interval between the active use of the brain and his re-

tirement to bed, the better his chance of sleep and retirement. To him an hour after midnight is probably as good as two hours before it, and even then his sleep will not so completely and quickly restore him as it will his neighbor who is only physically tired. He must not only go to bed later but lie longer. His sleep probably lies in the early morning hours, when all the nervous excitement he has passed away, and he is in absolute rest.

Iron Paper.—In the great Exhibition of London of 1851, an American specimen of iron paper was shown, in the form of a sheet eight inches long and five and a half inches wide, having a surface of forty-four square inches, and weighing only sixty-nine grains. One thousand sheets of this leaf-like iron piled upon each other would measure but an inch in thickness. The "Ironmonger" states a lively competition in iron rolling ensued among British iron manufacturers, excited by the above challenge from America, as to the thickness of which steel could be rolled cold. Mr. Gillott rolled sheets the average thickness of which was the 1500th part of an inch. I other words 1500 sheets piled upon each other would collectively measure an inch in thickness, while the thinnest tissue paper to be purchased in the stationers' shops measure the 1200th part of an inch.

These very thin iron sheets are perfectly smooth and easy to write on, although porous when held up to a good light. It may no be out of place, considering the great interest that is taken by those connected with the great branch of industry, the iron trade, to give a few curious particulars as to what extent iron can be welded, and the thin sheet that can be rolled out. The mill manager of Messrs. W. Hallam & Co., of the Upper Forest Tin Works, near Swansea, has succeeded in making a sheet of the finest appearance an inch thick that has ever yet been seen by mortal eye. The iron from which the sheet was rolled was made on the premises. It was worked in a finery with charcoal and the usual blast afterwards taken to the hammer, to be formed into a regular flat bottom; from thence conveyed to the balling furnace, and when sufficiently heated, taken up to the rolls, lengthened, and cut by shears into the proper lengths piled up, and transferred to the balling furnace again; when heated, it was passed through the rolls, back again into the balling furnace and when duly brought to the proper pitch was taken to the roll, and made into a thorough good bar. Such is the history in connection with the forge department. It was then taken to the tin mills, and rolled till it was supposed to be thinner than 23 grains, after ward passed through the cold rolls to give it the necessary polish, and now it stands on record as the thinnest sheet of iron ever rolled. The sheet in question is 10 in. by 5½ in., of 55 in. surface, and weighs but 20 grains, which being brought to the standard of 8 in. by 5½ in., or 44 square inches, is but 16 grains, or 30 per cent. less than any previous effort, and requires at least 4,800 to make one inch in thickness.

The office of a minister of Christ is weighty and they who now go forth as watchmen had need to be steadily on their guard against the snares of prosperity and an outside friendship.—*J. Woolman.*

For "The Friend."

History Illustrated by Numismatics.

(Continued from page 14.)

The Parian Chronicle records that Phidon, king of Argos, first caused silver money to be coined by the people of Ægina, a rocky island in the Saronicus Sinus, (the modern Ægina.) Conjecture places the period somewhere in the eighth century before the Christian era. From the researches of Borrel it appears probable that the coins executed under order of King Phidon were different from those peculiar to the Æginetans, and used as a new currency, which are believed to have had an earlier origin. Those of the island are easily known by the invariable tortoise which occupies the obverse, the reverse being, as in the case of the early gold coins of Asia Minor, the simple mark of the punch in driving the metal into the die. It is interesting to trace the progress made in the art of coining by the improvement in the execution of the pieces. The earliest has a tortoise but boldly designed tortoise, with four triangular indentations on the reverse. The next exhibits the reptile with a row of knobs on his vertebral column, the reverse being a quadratum incusum. Still later we find more artistic tortoise, showing the convolutions of the shell, and also having the initials Aig. (anciently I was often used where I am now employed.) The punch mark, too, greatly improved.

The purity and standard weight of the money of Ægina, comprising several different issues, obtained for it a general circulation throughout the Peloponnesus. In fact for a time, it was nearly the only circulating medium there, the coins being known as tortoise, from their type. The tortoise was sacred to Mercury, to whom was attributed the invention of weights and measures. It is evident that the reliability of this money established for it such a character, as made it desirable not to change the type at any subsequent period, and it is known that such was the case long after improvements had been made in the coinage of other States.

There are coins in existence, similar in their general character to the above, which must have been minted at no very distant period before them. These, from the type which is found to be peculiar to a particular city or State, are usually easily located. For instance the Athenian type is the owl, the Boeotian, a heifer, the Dyræchian a cow suckling her calf, and the Sybarian, a bull. On later issues we usually add the initial letters, as Athe Athenian, Dyr on Dyræchian, &c., &c. The knowledge of our art must have spread first throughout Asia Minor, the islands in the Ægean Mare and the Peloponnesus,—then to the more distant parts of Græcia, into Italia Inferior, and the most distant Greek cities. As time progressed, great improvements are noticed; the punch was ornamented with various designs, and then an ornamental device was placed upon it. Still later, the initials of the city or province, and also those of various magistrates were arranged round a square space upon it, in some cases an indentation specially provided for the letters; and finally, a perfect die was substituted altogether for the punch, in other words *die*s were employed, and have continued in use up to the present day.

There was a peculiar style much in vogue at one time by the Greeks, and occasionally

made use of by the Romans long afterwards, that is deserving of notice. Indeed it must have dated from a very early period, inasmuch as it is found on coins of Sybaris, a city that was destroyed 510 B. C. This is what numismatists have called the *incused* style. Upon the punch was cut an exact representation of the design of the die, but in relief, so as when applied it would just fit into the latter. Necessarily when the coin was stamped, one side would represent the design as usual, and the reverse side, the same design sunken or incused. Milligen has suggested that possibly it had its origin in an attempt to prevent forgery. If so it was not successful, forgeries now being in existence which are evidently as old as the originals.

All the silver coins which have been mentioned, being of republican origin, are known as *autonomous*, as distinguished from a class now to be considered, which on account of their being issues of princes, are denominated *regal*. The earliest of the latter now known, and which bear his name, are those of Alexander I. of Macedonia, who reigned B. C., 500 to about 460. Several other kings succeeded him, each of which have left similar mementoes, before Philip II., 353-336 B. C., and his son Alexander III., the Great, 336-323, omitted from their various mints enormously large numbers of coins in the several metals of gold, silver and copper. The gold darics are alleged to have been melted up by Alexander to be employed in making his own staters. About this period the Greek art seems to have been at its height, as shown both on the autonomous and regal coins, the authority of the sovereign not interfering with the republican right of the city to issue its money quite independently.

After the death of Alexander the Great, and the establishment, upon the division of his empire, of the powerful lines of the Seleucidæ kings in Asia, and the Lagidæ or Ptolemæes in Egypt, the regular succession is faithfully chronicled in a series of beautiful coins emitted by the successive monarchs. The short-lived power, too, of Cassander, of Antigonus, and of Lysimachus are in like manner commemorated. There is usually around an artistic design, a Greek inscription to the effect that it is money of the King Lysimachus, Demetrius, &c., with his portrait on the other side. Upon some coins is recorded, in addition to the above, the assumption of, for instance, "the king, the protector," or "of the beneficent king," or even the blasphemous character of "the illustrious god." Upon the Arsacidæ coins, a line of kings established through a revolt in some of the provinces of the Syrian empire, denominated Parthia, the vanity and wickedness of title is carried to the most ridiculous extreme: The third Arsacidæ styling himself "the king of kings, Arsaces, the Great, the Just, the Beneficent, the Illustriously born, the Lover of the Greeks." There is abundance of historical interest in these regal coins, but it may be sufficient here to mention that in the Seleucidæ or Syrian series, the coins of the Antiochii recall the account given in the Apocryphal book of the Maccabees of several of these kings. Particularly important as persecutors of the Jews, were Antiochus III., the Great, and Antiochus VIII., or Gryphus, so called on account of his hook nose, most faithfully represented on his silver coins.

The standard of the Greek silver coins, as

has been remarked before, was the drachma. There were also hemidrachms of half the standard weight, didrachms of double, tridrachms of treble, tetradrachms of quadruple, and even octodrachms of eight times the weight of the standard. The obolus,—derived from a Greek term signifying a spike or small obelisk,—was the sixth of a drachm. It has also its multiples, diobolus and triobolus, and there was also the hemobolus, the smallest silver coin of ancient Græecæ.

An alloy known amongst the ancients as electrum, was sometimes coined into money. Its composition was a mixture of gold and silver.

The earliest copper money is now assigned to King Eropus, in Macedonia, about the year 397 B. C. It appears to have originated in an attempt to relieve the treasury of a drain consequent upon the ruinous expenditure necessitated by the Peloponnesian war. But its unpopularity is evinced by the circumstance that the orator Dionysius, who defended the project, became stigmatized with the epithet of "the brazen orator," or "man of brass." The largest copper pieces, excepting some enormously large ones of the Ptolemæes, are believed to have been coined about 200 B. C., and are about the size of the copper penny of George III., issued in 1797. In value they were made equal to the silver obolus. The chælus of half the size of the copper obol, seems to have been the standard, having three subdivisions into halves, quarters, and eighths of a chælus, and denominated accordingly tetralæpton, dilepton, and lepton. The last is the "widow's mite," and is the smallest copper coin of ancient Græecæ.

A *talent* was equal to six thousand drachmæ. As the silver drachma weighed only one half that of the gold stater, and had a value equal to one twentieth part thereof, the *talent of gold*, being estimated by weight, would be equivalent to one hundred and twenty thousand silver drachmæ, or twenty *talents of silver*. No fixed rate, however, can be assigned either to the talent or the drachma, as the latter varied in weight in the several States. The talent, then, whenever mentioned in the Scriptures, does not refer to a coin, as might be supposed, but to a sum of money, varying in amount according to whether gold or silver was intended. By valuing the silver drachma at fifteen cents, the gold talent would amount to \$18000, the silver talent to \$1500.

(To be continued.)

Indian Affairs.

For "The Friend."

The following letter from our esteemed friend Jonathan Richards, was published in the "Evening Bulletin" of this city, of 28th ult. "Agency of the Wachita and other affiliated bands of Indians, eighth month 10th, 1871.—Editor of the Evening Bulletin.

"Dear Friend: I hereby inclose a short article for the Evening Bulletin, denying the Indian story taken from the St. Joseph Herald and published in the Bulletin of June 29th. The accounts given of Indian outrages, published in some of our Western papers, are prepared by parties interested in keeping up an excitement in the public mind in order to break down any system that will deprive them of plunder to be derived under the old state of things in Indian management.

"With the exception of the Kiowas raiding into Texas to steal horses, and the attack

made by a party of those Indians, under Satanta, upon a train in that State, and the arrest of Satanta, Satank and Tall Tree (sometimes called Feather Lance), no depredations have been made by any of the Indians along the frontier of this territory. The Cheyennes and Arapahoes, the Comanches and Apaches, with a warlike people, are now at peace, and are friendly towards the white people who treat them properly, and towards the Government.

"Kicking Bird, chief of the Kiowas, and a number of head men among these Indians were here yesterday, on their way to Fort Sill, having collected 41 mules, to be given up to their agent, to replace those stolen from the train. This was demanded of them by the agent and General Grierson, who commands the post. The Kiowas have given a good deal of trouble in Texas, having an idea that it was perfectly fair to prey upon the people of that State. But the recent arrest of the Indians mentioned seems to have wakened them up, and they are now ready to make peace, which I hope, will be more lasting than former arrangements with them have been. Satank was an old, hard-faced Indian, and as hard as he looked. When starting from Fort Sill for Jacksboro, Texas, for trial, he got his hands loose in some way, and, having a knife concealed under his blanket, made a desperate fight and injured one man seriously. Satank was shot and killed on the spot. Satanta and Tall Tree are younger men, Satanta being a pretty hard-featured and surly fellow, but Tall Tree is a fine-faced, good-looking young Indian. They have both had their trial, were found guilty and sentenced to be hung in 53 days from the time of trial. But I understand that meetings have been held by the people of Texas, where the depredations had been made, and a resolution passed to ask the Governor to commute the sentence to imprisonment for life.

"Satanta's father has been here within a week or two. He is quite an old man; was very friendly, and expressed a desire to establish a lasting peace. I understand he had told their young men that if any demonstrations were made by them against the whites in retaliation for the capture of his son and the other two Indians, he would shoot their horses. This is one of the greatest punishments that can be inflicted on the uncivilized Indians.

"The article published in the Bulletin can have no connection with the one I have herein mentioned connected with the Kiowas, as time, place and Indians are all entirely different. I am, very respectfully, thy friend.

JONAS RICHARDS.

"Wichita Agency, Indian Territory, 8th month 10th, 1871.—Editor of the Evening Bulletin, Philadelphia, Pa.

"Dear Friend: I have seen, from time to time, articles in the newspapers giving accounts of Indian outrages, Indian massacres, Indian barbarities in every shape,—articles denouncing the Indians as heartless, cruel, savage, ferocious, and saying they ought not to live any longer. I would be glad to see these accounts placed in their true light. If this were done it would be found that most of the statements are groundless, having been published by parties interested in exciting the popular mind for selfish, if not wicked motives.

"I have no sentimental idea to advance, my experience with the Indians having been too

practical and real to admit of such an influence. But when I see papers holding a high position, as that of the Evening Bulletin, publishing articles like 'A Thrilling Story from Texas—The Train of a Government Contractor attacked by Indians,' as taken from the St. Joseph Herald, and copied into the Bulletin of July 29th, I think it is time to expose such an article as being untrue in every particular. As the Herald gives the party from whom the information comes credit for being well known in St. Joseph, and having respectable relatives there, the article is well calculated to deceive, and, like most other such statements, do the injured Indians great injustice.

"The article copied from the Herald, in speaking of this man's statement, says: 'Early in June last he engaged with one J. C. D. Blackburne, a government contractor, to drive a team to Fort Sill. Blackburne's train consisted of fourteen persons as drivers, and started from Smith Paw (Paul) Valley for the Fort. On Saturday evening, June 25th, the party had reached a small stream which was skirted with a strip of timber, about thirty miles east of Fort Sill, where they were suddenly attacked by two hundred and fifty Cheyenne Indians.' And it then goes on to tell how the Indians dashed out, with horrid yells, murdered and scalped some of the teamsters, capturing the rest, and gives minute details of terrible Indian barbarities, burning at the stake, &c.

"Having business that called me to Sherman, Texas, where J. C. D. Blackburne resides, I reached that town on the 2d day of the 7th month. My wife and other members of my family were with me, and we were all hospitably entertained at his house by his wife and family, he being then in New York. I might state that he is not a government contractor, but a merchant and cotton-dealer. We remained at Sherman until 7th mo. 9th, when we left there and started for our homes on the Washita river.

"During the week we were at Blackburne's not a word was said about his having a train on its way to Sill—much less of such a train having been captured by Indians. It will be observed that I reached Sherman one week after the terrible raid; we remained there a week, and not a word had come to his family, in this time, to tell them what had happened.

"On our way home we travelled the same road that Blackburne's train must have taken had there been such a train on its way to Fort Sill, and we came on to Smith Paul's Valley, reaching it on the evening of the 12th. We met parties direct from the fort. I was at Smith Paul's house—he being a prominent man, and known in all the country around—but not one word did I hear of there being such a train on the road as the one mentioned. Had there been any Indian disturbance I must have heard of it, as the people on the frontier are awake to every rumor of Indian troubles. After leaving Smith Paul's we travelled on the same road towards Fort Sill, and reached a point near where this massacre is said to have occurred, but not a trace of this terrible conflict, and not a person was found to tell the tale. We then left the Sill road and came on to this place—thirty miles north from the fort. I have been at Fort Sill since my return, and our mail is carried to and from the post weekly, but we hear no word of the Cheyenne massacre.

"This man, who is so well known at St. Joseph and has relatives in high standing in the telling of his escape from the Indian and reaching Fort Reiley, not only gives no evidence of untruthfulness in his statement but ignorance of the country. The post where he states the massacre to have been committed is 400 miles from Fort Reiley and there is no direction in which the Indians could have travelled with their prisoners and plunder that would have brought them within 300 miles of this post. But this may seem they made their escape on a certain night, and after travelling 150 miles they reached Fort Reiley, having made the journey in 24 days.

"The whole story is a canard, and worth more than a canard. It is an attack upon the existence of an injured race of people.

"The Cheyennes have not been on the 'war path,' nor attacked any body during the last year, and this statement, like many others of the kind, has been set afloat by designing parties for some selfish end. These Indians under Agent Darlington's admirable management, are desirous for peace, and are friends of the white man and of the Government, and if the same judicious care and system inaugurated by the agent are continued, they may have great hope of seeing these people making commendable progress towards a civilized life.

Very respectfully,
JONATHAN RICHARDS.

Lawrence, Kansas, 8th mo. 25th, 1871.

Editors of "The Friend."—Agent Larimer writes, that the Kiowa Indians had returned the full number of mules stolen from Satanta and others in their last raid in Texas. Kicking Bird, one of their leading chiefs, said on behalf of the tribe, that he had determined to quit raiding and to be at peace.

Agent Brinton Darlington writes, that on the 12th inst. Big Jake, Bull Bear, Grey Bear and Red Moon, with 800 or 900 Cheyennes and their Big Medicine Man, arrived at the Agency, and that he has never known the Indians under his care to be in better spirits or more amicably disposed, than at the present.

Yours truly,

WM. NICHOLSON.

Anecdote of an Indian.—A Christian Mohican Indian who in former days lived in Connecticut, relates a circumstance connected with his early life as follows: A certain man was going from Norwich to New London with a loaded team; on attempting to ascend the hill where Indian lives, he found his team could not draw his load; he came to Indian and get him to help him up with his oxen. After he had got up, he asked Indian what there was to pay. Indian told him to do so much for somebody else. Some time afterwards, Indian wanted a canoe; he went to Sheteket river, found a tree, and made him one. When he got it done he could not get to the river. Accordingly he went to a man and offered him all the money he had, if he would go and draw it to the river for him. The man said he would go. After getting to the river, Indian offered to pay him. "No," said the man, "don't you recollect so long ago helping a man up the hill by your house?" "Yes," "Well I am the man; there, take your canoe, and go home." So I find it after many days.

the Indian viewed this incident as illustrating the text in Eccles. xi. 1. "Cast thy bread upon the waters; for thou shalt find it after many days."

THE FRIEND.

NINTH MONTH 9, 1871.

The account given by the prophet Jeremiah his call to the solemn work of delivering the word of the Lord to his chosen people. He declared they had "forsaken Him, fountain of living waters, and hewed them cisterns, broken cisterns, that can hold no water;" of the suffering he underwent for hisfulness, and the providential support and vengeance he experienced, was no doubt depicted to convey lessons of deep instruction succeeding generations. It ought to be encouraging to all in the present day, who, before trial, are tempted to let go their hold in the unflinching mercy and power of the almighty, and to despair that He will again in His hand upon the people, and bring back remnant from their captivity," to the spirituality and purity of his glorious gospel, and life and conversation conformable thereto. In our own religious Society, not only those whom has been committed a gift of the history, and who feel constrained to "preach preaching" which Christ bids them, though they may be despised by the "uncircumcised in heart and ears," but all, who in simplicity of godly sincerity, are humbly striving to maintain and commend the doctrines and testimonies of the gospel, as becomes Friends, they be encouraged and strengthened by the striking reply of the Almighty to the prophet, "that, in the depth of his disappointment and despondency, he had ventured thus to reiterate, "Why is my pain perpetual, and my wound incurable, which refuseth to be healed? Will thou be altogether to me as a liar, and as waters that fail?" * * * "There, thus saith the Lord, If thou return, then I will bring thee again, and thou shalt stand before me: and if thou take forth the precious from the vile, thou shalt be as my mouth: let them turn unto thee; but return not thou unto me. And I will make thee unto this people a fenced, brazen wall; and they shall fight against thee, but they shall not prevail against thee; for I am with thee to save thee, and to deliver thee, saith the Lord."

The leading fundamental truths recorded in the Scriptures, are acknowledged by all orthodox professors of christianity, but Friends are truly brought under the government of the Spirit of Christ, find that its requirements are different from the practices of others, and that, they have to bear testimony, not only verbally, but practically to the portance of things which other professors esteem of no value, and to refrain from and oppose other things which they esteem not only harmless but commendable. The Society was used up for this purpose, being brought out much which the professing church had substituted for the simple self-denial religion of the gospel; and by divine help it was enabled to triumph over all opposition, and to stand boldly as a witness for the truth, as it is in Jesus.

Unreserved obedience to the high calling extended to all who claim to be followers of the holy, harmless, undefiled Son and Sent of

the Father, must necessarily make its subjects a peculiar people, even among those who, accepting "for doctrines the commandments of men," though sincere in that to which they have attained, are still, as it were, in the outward court; and much greater will the contrast be with those who are living altogether in the spirit and customs of the world." This involves trial, because the daily cross must be borne by such; and if a close watch is not kept up, the pride of the human heart, and the love of ease, will betray into little compliances with the maxims, manners and friendships of the community in which they live, until nearly every vestige of true gospel peculiarity is lost, and there will be little or nothing to remind beholders, that they are strangers and pilgrims upon earth, seeking a city which hath foundations. No such compromise can be in accordance with the will of the blessed Head of the church, who having called all to take up the cross and follow him, would have all to walk by the same rule and mind the same thing, and thus be brought to bear the peculiar characteristics of his flock and family. To the latter his command is, "Let them turn unto thee, but return not thou unto them." They may not from fearfulness or any other motive, compromise with the world, nor yet lower the standard of pure truth to please those who have adulterated it. Their duty is plain, whatever its performance may cost, "to take forth [or separate] the precious from the vile;" to be "as my mouth;" as preachers of righteousness, in the midst of those with whom they mingle, showing the broad line of distinction between those who are serving God, in the gospel of his dear Son, and those who are not.

Sad as are the consequences when any of the disciples of Him who was despised and rejected of men falter, their love waxing cold, and they giving way to "walk according to the course of this world;" but more deplorable and more widely extended are the evil results, where those who occupy the responsible station of Christ's ministers, lower the gospel standard, and preach doctrines that obscure the indispensable marks of discipleship, "taking up the cross," practising self denial, and abstaining from every thing that partakes of the leaven of the spirit of the God of this world. "Like priest, like people," is an old adage, and where a superficial religion is held and preached by ministers, it will infect the whole congregation. Such, instead of being unto the rebellious, lukewarm, or unconverted "a fenced, brazen wall," standing unmoved in opposition to all error, and in defence of the pure religion of the gospel, are likely to lead their hearers into a false estimate of the terms of discipleship, and to put them at ease in a shallow belief of the way in which "He hath made him to be sin for us, who knew no sin; that we might be made the righteousness of God in him;" so that they may rest satisfied in their carnal condition, without experiencing "that our old man is crucified with him, that the body of sin might be destroyed, that henceforth we should not serve sin," but "walk in newness of life."

Man's love of self gratification prompts him to turn away from "sound doctrine" and to "hearp to himself teachers, having itching ears;" teachers whose own ears itch to hear themselves speak, and who will "turn away the ears" of their hearers "from the truth," "unto fables;" he therefore will not "fight against"

these, but rather say to them, as did the Israelites of old to their seers, "Prophecy not unto us right things, speak unto us smooth things," and we will uphold thee. I. Penington speaking of a living gospel ministry says "He that will be a true minister must receive his gift, his ministry, and the exercise of both, from the Lord, and must be sure in his ministry to keep in the power, or he will never win others to the power. But keeping in the power while ministering and standing in the cross to his own wisdom, giving forth the truths which the Lord chooseth him to speak, even in the words which are given him by the power, in thus ministering he shall save his own soul, and those who hear him, who in fear and meekness receive the ingrafted word, which is able to save the soul. Alas! Alas! many have received words of truth and apprehensions of knowledge whereby they hope to be saved; but how few are acquainted with that knowledge which stands in the power, and which alone converts and keeps alive unto God. O, how many souls are to be answered for by them who take upon them to be pastors from God, who have fed the flock with words, with discourses which they have made, but have wanted the love and tenderness, the light and power of the true Shepherd! Oh, what will these do when God requires his sheep at their hands." To these, however great the opposition and contumely they may have to endure from those who love darkness rather than light because their deeds are evil, the words we have already quoted are applicable, "if thou take forth the precious from the vile, thou shalt be as my mouth: let them turn unto thee, but return not thou unto them. And I will make thee unto this people a fenced, brazen wall, and they shall fight against thee, but they shall not prevail against thee, for I am with thee to save thee, and to deliver thee, saith the Lord."

SUMMARY OF EVENTS.

FOREIGN.—The crisis in the French Assembly terminated amicably after an earnest and excited discussion. The Assembly assumed for itself constituent powers, by a vote of 433 to 227. Gambetta opposed this assumption vehemently. A declaration of confidence in Thiers and approval of his conduct was carried by a vote of 523 to 54. One hundred members abstaining from voting. The bill prolonging the powers of President Thiers, passed by a vote quite as large. A resolution of the 24th declares that the Assembly accepted the President of Thiers because they could get no one else to take his place. The Duc d'Anmale, MacMahon, Changarnier and Grevy, President of the Assembly, all declined the honor with its onerous duties. Grevy declared himself more of a republican than Thiers, and the others said they would not become a pretext for disorder. The Powers of Europe have sent congratulatory dispatches to Thiers upon the prolongation of his term of office. Advices from the departments say the people generally approve the action of the Assembly in relation to the Chief Executive.

The court-martial has pronounced the following sentences on the Communist leaders brought before for trial. Bressy, Ferre and Lullier are condemned to death; Urbaïn and Tringnet to imprisonment for life at hard labor; Assy, Billoury, Chaunpy, Regere, Grouset and Ferrat to deportation and imprisonment in a fortress, on others lighter sentences are imposed, and they are acquitted of the charge. The court will suspend its sittings for three days, after which it will take up the cases of Rochefort, Rosset and Maroteau. The female prisoners accused of firing buildings will be tried before a separate tribunal.

The mortality returns of the city of Paris for the past week show 846 deaths, of which four were from cholera.

The health of Paris is now considered good.

The third instalment, 500,000 francs, of the war indemnity to Germany has been paid.

The Grand Duke Alexis, of Russia, is sailing on the 2d

inst. from Cronstadt for the United States. The Car has gone to the Caucasus, and the Carina to the Crimea.

Cholera is spreading slowly in northern Germany. There were 329 deaths from cholera in Königsberg during the week ending on the 25th ult.

It is asserted that the conferences at Gastein resulted in the establishment of perfect good understanding between Austria and the German Empire. The Prussian Minister of State, Herr Arminius von Grolmann, says Prussia should make representations to Russia calculated to lead to the restoration of a good understanding between Russia and Austria. Italy, it is stated, declined to participate in the conference at Gastein. The Vienna *Free Press* regards the Gastein conferences as making a league for the preservation of the peace of Europe.

The anniversary of the surrender of the Emperor Napoleon and the French army at Sedan was celebrated throughout Germany on the 21st inst.

The number of emigrants who sailed from Liverpool during the Eighth month was 4900 greater than ever sailed in the same month of any previous year.

Many disasters to English vessels are reported, and much loss of life as well as property.

Dr. Kirk, of Zanabar, writes that Dr. Livingston is still in the country west of Lake Tanganyika. He was moving westward, and will leave no doubt as to the geographical problem whether Lake Tanganyika is the real head of the Nile, or empties by the river Congo.

A subscription has been opened in England for the relief of the people of Persia, and the Minister of that country has been named as chairman of the committee to collect aid for the sufferers.

At a conference of the National Union for the suppression of intemperance, held in London, the present license system was considered, and steps were taken towards securing amendments to the laws regulating the sale of liquors, so as to advance the cause of temperance.

A decree of amnesty has been promulgated in Spain, which applies to all political offences. The Carlists on the French border still threaten a rising against the present government.

Advices from St. Thomas to 8th mo. 22d, mention that a pestilence has been visited by a terrible hurricane, desolated the entire island, about 6,000 people have been left houseless and destitute. Many were killed or disabled by the falling houses. A heavy sea indicated the coming of the hurricane, and most vessels were prepared for it, so there is comparatively little damage to the shipping.

A meeting of engineers was held on the 21st inst., at Newcastle on the Tyne, which, it is stated was attended by fully 8,000 persons, at which it was determined to insist upon an arrangement of the term of labor in nine hours per day for six days in the week, or 54 hours in all.

On the 3d inst., a serious riot occurred in Dublin in consequence of a meeting of the sympathizers with the Fenian prisoners. The meeting was very large, and resolutions demanding the release of the Fenians were adopted. As the meeting was dispersing collisions with the police occurred, in which many persons were injured.

The disbandment of the National Guards in the cities of southern France begins the 15th inst. Troops have been concentrated in some places so as to insure prompt obedience to the law. It is supposed there will be no vacation of the French Assembly until after the evacuation by the Germans of the four departments surrounding Paris.

It was officially stated that Von Beust and two other Austrian Ministers, will assist at the conference of the Emperors of Germany and Austria, about to take place at Salzburg. After the conference the Emperor of Germany will visit Munich.

London, 9th mo. 4th.—Consols, 93½; U. S. Sixes, 91½; ten-twelves, 90½.

Liverpool.—Uplands cotton, 9½ d.; Orleans, 9½ a 9d.

UNITED STATES.—The *Public Debt* on the first inst. amounted to \$2,372,940,527, and subtracting \$98,782,436 in the Treasury, \$2,274,152,561. This is a reduction of \$1,000,000,000, and \$46,383,287 since Jan. 10, 1871. The Secretary of the Treasury has called in \$1,000,000,000 five-twenty bonds of 1862, to be refunded at a lower rate of interest in the 5 per cent. loan just negotiated.

An arrangement has just been concluded between the United States and Germany, to take effect on the first of the Tenth month next, which reduces the rate of international postage for pre-paid letters, from seven to six cents per each single rate of half an ounce or under.

The interests in Philadelphia last week numbered 253, including 31 deaths of cholera infantum. There were 103 under two years of age. During the first week of the month, 112 cases of cholera infantum were of Quarter Sessions has issued 4,122 tavern licenses for this city. This pernicious business is greatly on the increase.

The steamer Alaska arrived on the first inst. at San Francisco, in 36 days from Hong Kong, and 26 from New York. It carried 54,456 lbs. of tea, in 54,456 packages of tea, most of which was destined for New York and Boston by the overland route. The tea crop of China is said to be abundant, and the silk product much greater than last year.

The mean temperature at Philadelphia during the Eighth month of the Pennsylvania Hospital record, was 78.49 deg., the highest during the month 92.50 deg., and the lowest 64 deg. Amount of rain 5.97 inches. The average of the mean temperature of the Eighth month for the past 32 years, is stated to be 73.21 deg., the highest during that entire period was in 1863, 79.50 deg., and the lowest in 1816, 66 deg.

The Markets.—The following were the quotations on the 4th inst. New York.—American gold, 113 U. S. sixes, 118½, 118½; ditto, 5-20's, 1868, 114½; ditto, 10-40, 111½. Superfine flour, \$4.80 a \$5.15; finer brands, \$5.25 a \$8.55. No. 1 Chicago spring wheat, 1.35 a \$1.36; No. 2 do., \$1.33 a \$1.35; red western, \$1.25 a \$1.45; amber Michigan, \$1.30; white Ohio, \$1.45 a \$1.47. Black oats, 43 a 45 cts.; white, 47 a 51 cts. Western mixed corn, 66½ cts.; yellow, 69 cts. Cotton, 19½ a 20½ cts. for uplands and New Orleans. Philadelphia.—Cotton, 19½ a 20½ cts. for uplands and Orleans. Superfine flour, \$4.75 a \$5; finer brands, \$5.25 a \$7.25. White wheat, \$1.50 a \$1.60; amber, \$1.45; red western, \$1.36 a \$1.40. Rye, 77 a 80 cts. Yellow corn, 71 cts.; mixed, 68 a 70 cts. Oats, 44 a 47 cts. Lard, 90 a 93 cts. Clover-seed, 10 a 10½ cts. Timothy, \$3.50 a \$3.75. About 2800 beef cattle sold at the Avenue Brovayard; extra at 7 7½ cts.; fair to good, 6 7½ cts.; common, 5 7½ cts. Hogs at 45 a 50 cts. gross. Sheep sold at 5 a 6 cts. per lb. at 57 cts.; hogs at 57 cts.; 7½ cts. per lb. gross. St. Louis.—No. 2 winter red wheat, \$1.20 a \$1.22. No. 2 corn, 42 cts. No. 2 oats, 36½ cts. Chicago.—No. 2 spring wheat, \$1.11. No. 2 corn, 44 cts. No. 2 oats, 29½ cts. Rye, 68 a 69 cts. No. 2 barley, 57 cts. Cincinnati.—Family flour, 55 a 55.50. Red wheat, \$1.17 a \$1.14. Corn, 42 a 43 cts. Oats, 37 a 38 cts. Lard, 9 cts. Baltimore.—Amber wheat, \$1.45 a \$1.55; Pennsylvania red, \$1.35 a \$1.41. Corn, 68 a 78 cts. Oats, 46 a 50 cts.

RECEIPTS.

Received from William Smedley, \$2, vol. 45; from William Neal, City, \$2, vol. 45; from John D. Harrison, Pa., \$2, vol. 45; from Mahlon Hoffacker, Pa., \$2, vol. 45; from Deborah D. Horney, Ind., \$2, vol. 45; from Susannah Marriott, N. Y., \$2, vol. 45; from Truman Forrester, Pa., \$2, vol. 45; from Mary M. Applegate, N. Y., \$2, vol. 45; from Fanny Hill, Eliza Jones, & Co., vol. 45; and for the British Anti-Slavery Bazaar, McGreal, Lewis Taber, William Hall, Jr., and John W. Smith, \$2, vol. 45; from Jehu L. Kite, Agent, O., \$2, vol. 45; and for Joseph Lynch, Mary Warrington, Achshah Hall, John H. Stanley, Jane Woolman, Abner Woolman, Isaac Taylor, David Elyson, Joseph Painter, Lina, & Co., vol. 45; from John Fogg, \$2, vol. 45; from Thomas B. Woodman, and Edwin Fogg, \$2, vol. 45; for Ann Bailey, \$2, to No. 4, vol. 46; and for Lydia Warrington, \$2, to No. 18, vol. 46; from Jacob Roeder, 10, \$2, vol. 45; from George Brinton, Pa., \$2, vol. 45; from Thomas Twining, N. Y., \$2, vol. 45; and for Ezra Nichols, \$2, vol. 45; from Jonathan Zagar, \$2, vol. 45; from Emma L. Beckins and Augusta A. Comfort, City, \$2, vol. 45; from Harriet J. Smedley, City, \$2, vol. 45; from Nancy B. Buffinton, Mass., per L. B. Green, \$2, vol. 45; from Lewis Passmore, Pa., \$2, vol. 45; from Sarah Hoopes, Pa., \$2, vol. 45; from Elizabeth Hoopes, Pa., \$2, vol. 45; from John N. J., \$2, vol. 45; from Stephen Hobson, Agent, O., \$2, vol. 45; and for Ellwood Dean, Edwin Hollingsworth, Benjamin J. Hobson, and John S. Fowler, \$2, each, vol. 45; from Mary Ann Baldwin, Pa., \$2, vol. 45; from Mount Pleasant Boarding School, 0, per Josiah M. Gifford, No. 28 North Third St., \$2, vol. 45; from Charles Barton, \$2, vol. 45; from W. McGrew, Agent, O., \$2, vol. 45; and for Mark Wilbur, John Hoyle, Jr., James A. McGrew, James Edgerton, and Nathan Hussey, \$2, each, vol. 45; from Jesse Haines, Pa., \$2, vol. 45; from Ellis Winner, O., \$2, vol. 45; from John D. Harrison, \$2, to No. 1, vol. 46; from Henry Knowles, Agent, O., \$2, vol. 45; from Daniel Peckham, David Peckham, Robert Knowles, Benjn R. Knowles, and Benjamin Boss, \$2, each, vol. 45; from

Stephen Hobson, Agent, O., for Thomas Hobson, James Bowman, and Achshah Mott, \$2, each, vol. 45; from Thomas Bindy, O., \$2, vol. 45; from John W. Foster, L. I., \$2, vol. 45; from B. Foster, R. I., \$2, vol. 45; from Gilbert Macomber, Mass., \$2, vol. 45; from William Evans, City, \$2, vol. 45; and for Thomas Evans and Lydia T. King, Pa., \$2, each, vol. 45; from Cha DeCou, N. Y., per Daniel DeCou, \$2, vol. 45; from Isaac Cowell, O., \$2, vol. 45; and for Joseph Cowell, \$2, vol. 45; from James Kitley, Canada, \$2, vol. 45; from Gilbert Macomber, Mass., \$2, vol. 45; from William Evans, City, \$2, vol. 45; from R. L., \$2, vol. 45; and for Miller Chase, Mass., and Harvey Chase, R. I., \$2, each, vol. 45; from John S. Stokes, for Henry I. Ely, M. D., Elizabeth B. Stokes, Edmund Darnell, an Rachel E. Haines, N. J., and Delphina Mendonca N. C., \$2, each, vol. 45; from Phoebe Bowerman, N. Y., \$2, vol. 45; from Wm. P. 11th St., \$2, vol. 45; from J. H. \$2, vol. 45; and for John W. Townsend, Thomas Thorp Elizabeth S. Thomas, S. Emien Sharpless, Phine Pratt, Joshua T. Ballinger, James Smith, Sarah Yuall and Rebecca Conard, Edw S. Yarnall, Margaret W. Pyle, Enoch Harlan, Richard J. Thatcher, an Thomas C. Hoge, Pa., and Joseph G. Ehrhardt, Nebraska, \$2, each, vol. 45; from Rich'd Mott, Agent, lo, for Job Hampton, Stephen Holgin, Eli Holgin, Wm. P. D. weese, and Joseph Batey, \$2, each, vol. 45; from Am C. Hoopes, City, \$2, vol. 45; from James J. Lord, N. Y., \$2, vol. 45; from Thomas Doan, City, \$2, vol. 45; from Jonathan Williams, N. Y., \$2, vol. 45; from Ann Pim, Pa., \$2, vol. 45; from Mijatiah M. Morlan, Agent, O., for Richard B. Fawcett, Hannah Bossell, Elizabeth Reeve, Samuel Street, and Fredk. Maerk, \$2, each, vol. 45; and for Rachel S. French, \$2, to No. 47, vol. 45; from Joseph Masters, O., per Daniel Stratton, \$2, vol. 45; from Charles W. Satterthwaite, O., \$2, to No. 1, vol. 46; from Margaret Miller, N. J., \$2, vol. 45; from Samuel M. Sheppard, N. J., \$2, to No. 2, vol. 46; from John E. Sheppard, \$2, vol. 45; from Matilda Warner, Pa., \$2, vol. 45; from John Brantingham, O., \$2, vol. 45; and for Samuel Carr and Isaac Cope, \$2, each, vol. 45; from James P. Hancock, Pa., \$2, vol. 45; from Geo. P. Andrich, Pa. \$2, vol. 45; from Ann Evans, N. Y., per Jacob Smedley, Jr., \$2, vol. 45; from Phoebe Griffin and William D. Griffin, N. Y., \$2, vol. 45; from Mar B. Buffinton, Mass., \$2, vol. 45.

Also received by Benjamin D. Stratton, Agent, O. from Joshua Coppock, Barton Dean, Jeremiah Coppock, and Wm. G. Coppock, \$2, each, vol. 45.

Remittances received after Fourth-day morning will appear in the Receipts until the following week.

ERRATA.

On page 14, in the last number, columns 2 and 3, to "doric" read "daric."

WESTTOWN BOARDING SCHOOL.

The Winter Session of 1871-72 commences on Second day, the 30th of Tenth month next. Friends who intend to enter their children for the coming term, as requested to make early application to AMOS SHARPS, Secy. Superintendent, at his residence, 37 West 3d St., Chester Co., Pa., or to CHARLES J. ALLEN, Treasurer, No. 304 Arch St., Philada.

EVENING SCHOOLS FOR ADULT COLORED PERSONS.

Principal and assistant teachers are wanted for the schools, to open about the first of Tenth month.

Application to be made to

Elton B. Gifford, No. 28 North Third St.
Richard J. Allen, No. 614 Wood St.
Thomas Elkinton, No. 118 Pine St.
Geo. J. Scattergood, No. 413 Spruce St.

WANTED.

A Teacher for the Classical Department of the Boy School at Westtown: to commence his duties at the opening of the next Session, on the first of the Eleventh month. Application to be made to Joseph Passmore, Goshen, Chester county, Samuel Morlan, G. D., 702 Race street, Charles Evans, M. D., 702 Race street.

FRIENDS' BOARDING SCHOOL FOR INDIA CHILDREN, TUNNERS-ASIA, NEW YORK.

A suitable Friend and his wife are wanted to take charge of this Institution, and manage the Farm connected with it. Application may be made to Ebenezer Wright, Fox Chase, Pa. Thomas Wistar, Fox Chase, Pa. O., Philadelphia Samuel Morley, Olney P., do. Joseph Scattergood, 413 Spruce Street, do.

THE FRIEND.

A RELIGIOUS AND LITERARY JOURNAL.

VOL. XLV.

SEVENTH-DAY, NINTH MONTH 16, 1871.

NO. 4.

PUBLISHED WEEKLY.

Two Dollars per annum, if paid in advance. Three Dollars and fifty cents, if not paid in advance.

Subscriptions and Payments received by

JOHN S. STOKES,

116 NORTH FOURTH STREET, UP STAIRS,

PHILADELPHIA.

Single copies, when paid quarterly in advance, five cents.

For "The Friend."

Times and Trials to the Church.

It was a memorable era when, the more to exemplify the terms of the new covenant, "I will put my law in their inward parts, and write it in their hearts," the Society Friends was raised up as a distinct church. George Fox and his faithful co-adjutors had world-wide history, their close trials and provings, even sufferings unto death, the God of heaven in whom they trusted, spread them; and, he and his helping, a mind to work, they were not turned by the cruel enemy; but as in the days of Nehemiah—no inapt comparison—"they built on the wall, and they that bare burdens, with those that laded, every one of his hands wrought in the work, and the other hand held a weapon." With heartily tired of the prescribed formal external ceremonies of the professing church of their day, they sought and found nothing more real and life-giving according to the good hand of their God upon them. The Lord on high who knew the fervent desires and aspirations of their hearts, and to keepeth covenant and mercy for them that love him and observe his commandments, blessed his own work in their hands.

Truth, by the worldly-wise and the mere love of custom, hath ever been a despised and rejected thing. "Away with this fellow from the earth," was contemptuously said of the great Author of every virtue. And thus again written in Nehemiah, that when Sanballat and Tobiah heard of it, they were moved exceedingly that there was come a man to seek the welfare of the children of Israel. Of similar import, concerning Truth, the life of Christ in the heart, are some of the last words of James Naylor: "In God be it can rejoice, though none else regard, for can own its life. It is conceived in sorrow, and brought forth without any to pity, nor doth it murmur at grief and oppression. It never rejoiceth, but through sufferings, with the world's joy it is murdered. It findeth it alone; being forsaken. I have fellowship therein, with those who lived in dense and desolate places in the earth; who through death obtained this resurrection, and eternal life."

How animating is the reflection that the ever-blessed Head and Husband of our little portion of His professing Church, has not only caused its establishment in the earth, but has memorably stood by and sustained it; as He ever will do to His faithful, obedient children, however they may feel as "the remnant that are left of the captivity," or in whatever state of "affliction and reproach." He will indeed bear these as on eagle's wings; He will make them to lie down in green pastures, and lead beside the still waters; and "give them their meat in due season." Remarkable truly is the Divine support and strength which attended the rise of this Society; and the uncompromising faithfulness of those who so nobly, even to the death, espoused its cause. The Prophet's declaration from the Lord of hosts, has been fulfilled concerning this people, viz: "I have caused thee to multiply as the bud of the field, and thou hast increased and waxen great, and thou art come to excellent ornaments. * * * When I passed by thee, and looked upon thee, behold thy time was the time of love; * * * and I entered into covenant with thee, saith the Lord God, and thou becamest mine. * * * And thy renown went forth among the heathen for thy beauty; for it was perfect through my comeliness, which I had put upon thee, saith the Lord God." They were changed men themselves; being turned not only from the manners, maxims and ways of the world, but from the worship of the false, through the power of an endless life which was so generally dispensed, and whereby also a real change was wrought in them; and they became Jews after the inward circumcision, "that of the heart, in the spirit, and not in the letter; whose praise is not of men, but of God."

In this day, Israel was "holiness unto the Lord, and the first fruits of his increase." Well, is not the same hand of unspeakable power and mercy as we are to instruct and to preserve on the right hand and on the left, all those who call upon Him in sincerity and truth? Yea, will He not keep these from any device and enchantment, however specious, of the cruel foe? Is His hand shortened, or His ear heavy, or is He less omnipotent to save all those who in humility and contrition of soul are true to Him? What then is the cause of our present leprous and lapsed state? It may not, lamentably, but with too much truth be said, "Ephraim hath mixed himself among the people." "Strangers have defoured his strength, and he knoweth it not; yea, grey hairs are here and there upon him, yet he knoweth it not." "Yet I had planted thee a noble vine, wholly a right seed; then art thou turned into the degenerate plant of a strange vine unto me?" "But now, after that ye have known God, or rather are known of God, how turn ye again to the weak and beggarly elements, wherunto ye desire again to be in bondage?" "Behold, all ye

that kindle a fire, that compass yourselves about with sparks; walk in the light of your fire, and in the sparks that ye have kindled. This shall ye have of mine hand; ye shall lie down in sorrow." Has not the god of this world too greatly prevailed in persuading us that religion has softened her features; that there is no longer any need of walking in the straight and narrow path our forefathers trod; that the immediate guidance of the Holy Spirit—the anointing which we have received of Christ Jesus and which leadeth into all truth—is dubious and uncertain; that the way of self-denial and the daily cross is too difficult and offensive to be trodden; that repentance and good works are not necessary to justification by Christ; in a word, that we are justified and saved by what our Holy Redeemer has done for us *without us*, irrespective of His second coming in the heart as a refiner's fire and like fuller's soap, to thoroughly cleanse His floor by that which now saveth, even the answer of a good conscience toward God, derived to us through submission to the alone cleansing and saving baptism of the Holy Ghost and of fire. O let us beware of so much outwardness! Let us take heed of sliding, however unobtrusively, into the religion of the times. Is not the work of the great deceiver in this day of outward ease and much self-indulgence, to keep our religion on the outside wherein many mighty works may show forth themselves of us, instead of within, where the power of the Lord "shall burn as an oven," even "with burning and fuel of fire." Well has the poet expressed in writing of the Christian:—

"His warfare is within. There, unfatigued,
His fervent spirit labors."

May this inward warfare be ours, till our glorious Captain is pleased to say, "It is enough! May the stripping chamber, and the washing pool, be with constancy endured, until we are unclothed of self, or dependence upon any sufficiency of our own; and until a willingness is wrought to let the leave of the grace of God effectually operate to our own true peace and eternal salvation. It will not do for us, either as a Society or as individuals, to lower the standard we are called to maintain; to be turned aside from a faithful maintenance of the precious doctrines and testimonies committed us to bear before the world; neither to be beguiled into the belief that we may with impunity accommodate ourselves to the views and principles of those around us. For, respecting the standard and walk of others, how carefully should the Saviour's precept to Peter be heeded by each of us: "What is that to thee? Follow thou Me."

The outgoings alluded to, are the things that constitute the present a time of peculiar trial to the church: wherein its doctrines and testimonies seem put somewhat to the test, whether they will stand the overflowing surge—all that is brought to bear upon them—yea, or nay! But the writer has no doubt of the

result. Honest Gamaliel shall answer for us here: "If this counsel or this work be of men, it will come to nought: but if it be of God, ye cannot overthrow it: lest haply ye be found even to fight against God." Old fashioned Quaker principles, it is believed, are the Truth as it is in Jesus. They may be, as they have already been, again and again assailed, or substitutions attempted; numbers may turn away on this hand and on that; but like an impregnable fortress, these principles will endure and prevail, while those who have forsaken them may be in wandering mazes lost.

"What though a worldly spirit has crept in,
That faith the kingdom through new ways would win?"

What if, as we have recently been assured, a Friend in England a good while ago said, that the time would come when the principles of our Society would have to be contended for over again? It has already borne up and been strengthened to stand against many attacks of the enemy, and to endure varied kinds and varied times of trial. Hitherto the Lord has helped us. He hath brought us through again and again to the praise of His ever excellent Name. Let none then mistrust His power, neither His willingness to help; but rather be afresh animated to commit ourselves and our cause, with prayer and supplication, even with agonizing travail of spirit, to Him who ruleth over all; who can turn and overturn and make a way for our deliverance where to the outward eye there seems to be no way.

Times of trial to the church are not new, as the lives of Noah, of Abraham, of Elijah, of Deborah, of Nehemiah, of Mordecai, of the disciples of the Saviour, with that of our Lord himself when in the prepared body, abundantly represent. Let, then, no undue discouragement have place with any; but let each stand in his or her allotted place on the wall, with a single eye to the Captain of salvation who was never foiled in battle. Let us not yield to any divination or enchantment of the grand deceiver, neither allow the introduction of any new pattern of Quakerism, which like the piece of new (raw or unwrought) cloth, in the parable, will only take from the garment, and the rent be made worse. Above all, let us in no wise turn away from Him, Jesus the Mediator of the new covenant, who first gathered us to be a people; who remains to be "The Repairer of the breach, The Restorer of paths to dwell in." "For," in the language of the Apostle, "if it escaped them who refused him that spake on earth, much more shall not we escape if we turn away from Him that speaketh from heaven: whose voice then shook the earth: but now he hath promised, saying, Yet once more I shake not the earth, only also heaven. And this word, Yet once more, signifieth the removing of those things that are shaken, as of things that are made, that those things which can not be shaken may remain. Wherefore we receive a kingdom which cannot be moved, let us have grace, whereby we may serve God acceptably with reverence and godly fear: for our God is a consuming fire."

Cannot the Lord of the vineyard do as He pleases with his laborers? Knows He not where they are *most needed*? If the part they have been so long digging and watering bringeth not forth fruit, the laborers will be taken away from them.

History Illustrated by Numismatics.

(Continued from page 21.)

According to Le Normand, about the year 385 B. C., the substitution took place among the Roman people, from a square piece of cast metal that before the days of the regal period of Servius Tullius, had been employed as a weight, to a circular one, which was then first used as a coin. Its composition appears to have been an alloy of copper and a small portion of tin. It, as well as its predecessor, the weight, was called the *Æs*, or *Libralis*, and is stated by ancient writers to have originally weighed a pound. But Pliny avers that about the commencement of the first Punic war, it was reduced to two ounces. There appears to have been a series of reductions in the piece, to the degree eventually of only one-fifth of an ounce! The heaviest as that has come down to us weighs nine and a half ounces. Upon one side is represented the head of Janus with two faces: upon the other the prow of a ship and the numeral I, denoting the standard of value. There were subdivisions of this coin as follows, viz: The *Semis* or half, having the letter S to designate its value; the *Triens*, or third, with four dots or globules upon either side; the *Quadrans* or fourth part, with three globules; the *Sextans* or sixth, with two globules, and the *Uncia* or ounce, the twelfth of the *Æs*, with a single globule. Various devices occupy the obverse of these several fractions, most commonly the head of Jupiter, Minerva or Mercury.

Pliny is our authority for the statement that the first Roman silver money was coined five years before the first Punic war, in the year 269 B. C. Greek money had long been the circulating medium at Rome as well as in other Italian States, but not until after the defeat of the Greek colonies, and their ally Pyrrhus, did the Romans condescend to imitate the silver coins of their now tributary cities. The Roman denarius was made to correspond in weight with the Greek drachma of the period, which appears to have been then somewhat reduced from the Attic standard. We usually find an X upon the obverse of the denarius of the Republic to denote its value as being equal to ten bronze asses. There is the *quinarus*, or half denarius, with a V, being equal to five asses. Still smaller silver coins are also mentioned.

Pliny also states that the first gold coined by the Romans occurred sixty-two years after the silver coinage, in the year 207 B. C. The earliest pieces were called the *Scrupulum*, valued at twenty asses and weighing 18.06 grains, and its multiples the double and treble *scrupulum*. These were succeeded by the *Aureus*, which continued until the time of Constantine the Great, to be in its turn succeeded by the *Solidus*, and, like the Greek stater, was made of double the weight of the silver unit, and of the value of twenty silver pieces, being about equal to \$5.10 American money. Thus it will be seen that while the Greeks first coined gold, then silver, and lastly copper money, the Romans reversed the order, beginning with copper and using silver and then gold at subsequent periods.

The relative value of gold and silver has varied in different ages, but more frequently in ancient than in modern times. Herodotus, in his *Thalia*, in estimating the tribute paid to Darius, calculated the relation to be as 13 to 1. This was about 450 B. C. Livy makes

the proportion B. C. 190, as 10 to 1. Suetonius states that Julius Cæsar once exchanged it the proportion of 9 to 1, say at about B. C. 5. And it appears that in the time of the emperor Justinian, A. D. 527-565, it became 14 or 15 to 1.

The denarii of the Republic were issued in enormous quantity, the greater part of them being marked with the name of some Roman family, plebeian as well as patrician. Nearly the whole of this peculiar coinage is believed to have been issued during the period with fifty years of the reign of Augustus Cæsar many have devices commemorating events & legends in the history of Rome, and in the way numerous incidents and events connected with Roman history are preserved to us which would otherwise have been lost. Portraits too, of their most distinguished citizens, are accurately given, and transmitted to us for a period of time that they could have been rescued in no other way. These denarii of the Republic, as well as those following after the establishment of the empire, are possessors of great interest to the student in history, as the description of two of the former will give the reader an idea. One, of the Tituria family, represents the maiden Tarpeia crushed between the shields of Sabine soldiers, whom she had consented to open the gate of Rome upon the condition that she should have the "ornaments" they wore upon their arms (meaning the golden bracelets.) Instead of these, each soldier as he passed by her, threw his shield upon her, thereby causing her death. The Tarpeian rock, near which the occurrence is located, is still shown to visitor to the ruins of Rome; it afterwards became still more famous in consequence of the number of criminals who expiated their offenses by being hurled to death from its summit. The other, a specimen of which is not before me, has represented upon one side helmeted female head emblematical of Rome with the name *Læca*. On the reverse side a quadrigata or four horse chariot, driven at speed; beneath it is M. Porc. Rari. This coin is a denarius of P. Porcius Læca, who B. C. 256, introduced the Porciana law, *capite et tergo civium*, which was the law of appeal under which the Apostle Paul "appealed to Cæsar."

We have now reached the most interesting period both of Roman and of numismatic history—that of the empire. The portraits of the several emperors, also those of many of their wives and other relatives, up to the time of its dissolution, are faithfully represented upon the bronze, silver and gold coins. So correctly is this the case, that with a little experience, the student can tell whose head is represented in nearly every instance among a thousand coins, if well preserved, without reading the inscription. Not only so, but the also show the principal public buildings, instruments of worship and agriculture, manners and customs, &c., of the people, as well as the most important events of the several reigns. Which led Addison to remark, that "a series of an emperor's coins is his life digested into annals."

About the commencement of the reign of Augustus Cæsar, the bronze *Sesterius*, what is commonly known as first brass, & more properly, first bronze, was adopted as the standard for copper, in place of the *Æs*. The second, third and fourth bronze were of definite proportion smaller in size than the

st. But they were all issued only by authority of the Senate, a fact denoted on each of them for many years by the letters S. C. (Senatus Consulto.) It is a remarkable fact that the silver and gold money rarely have the letters upon them, and it is rarely that the emperors arrogated to themselves the right of coining in these metals, but in the bronze never without the decree of the Senate. As examples of Addison's remark, there are mentioned a few historical events recorded on the bronze money. The subjugation of Egypt and the announcement of its degradation as a mere Roman province, is in one instance expressed with characteristic vivacity in the two words, *Ægyptia capta*; and other coins is simply represented by a cordille chained to a palm tree! Likewise, under Vespasian, when the legions of his son were besieged and captured Jerusalem, there is recorded the death of a million of Jews, the emperor records the event by a captive Jewess weeping beneath a palm tree, whilst the conqueror stands in a meditating attitude overlooking the scene. Around them is the word *Judea capta*. The closure of the temple of Janus during universal peace by sea and land, between the Roman people and the world, which occurred three times during the reign of Nero, is commemorated on his bronze coins of all sizes, (each having a portrait of the emperor,) by a legend announcing the fact, as well as a representation of the temple itself closed. The well-known device of a lion of Trajan is very fine, where the emperor seizes, after paying the debt of the State, in the act of burning the cancelled bonds. In short, as it has been said, "they delineate with fidelity, and preserve with little variation, more portraits of real characters—give perfect representations of implements, dresses, buildings and symbols—fix precisely their chronological dates—record a greater number of historical events—and afford better specimens of manners and customs, than any other series of coins."

The denarius is the *penney* of the New Testament. The laborers in the vineyard were to have a denarius per day. The ten pieces of silver which the woman had, (Luke x. 8) one of which was lost and searched for with diligence; the thirty pieces for which he had betrayed his Master, (Matthew xxvi. 15) the money which the good Samaritan gave to the inn-keeper who was to have the care of him who fell among thieves (Luke x. 35) are all denarii. The penny which is mentioned in Luke xx. 24, our Lord asked to be shown him, and which bore the image and superscription of Cæsar, was a denarius of Tiberius Cæsar, the then emperor; they are so plentiful that a good one may be purchased in this country for a dollar. The value of these silver pieces, during the period of which we are speaking, was but fifteen cents. As money has depreciated now to less than one-tenth its value, the denarius would purchase more than ten times as much as a dollar and a half would now. That a penny a day would not be unremunerative wages for a day's labor.

(To be concluded.)

William Penn maintained, that there is, and must be, a judgment in the church when established, which is superior to the judgment of individuals, for the Spirit of God does not lead into confusion, but into order, harmony and love.

Phœbe Cary.

For "The Friend."

The recent decease of Phœbe Cary, on the 31st of 7th month last, has been the occasion of the publication in the N. Y. Tribune, of a short sketch of her life, from which the following is condensed.

Her sister Alice, with whose name her own is almost invariably associated, died about five months before.

Phœbe was born near Cincinnati, Ohio, in 1825. She first became known to the public by her contributions to periodical literature. In 1850 was published in Philadelphia, "Poems of Alice and Phœbe Cary," of which she wrote about one-third. Her next venture was in "Poems and Parodies," published by Ticknor & Fields, in 1854. Her best work was "Poems of Faith, Hope and Love," issued in 1868.

"Phœbe came to New York with Alice, in 1852 or 1853, and here they lived together until they were so lately separated by death. Few homes are more attractive than theirs was for many years. H. Greeley, in his sketch of the sisters in the 'Eminent Women of the Age,' says: 'Their parlor was not so large as some others, but quite as neat and cheerful; and the few literary persons or artists who occasionally met, at their informal invitation, to discuss with them a cup of tea and the newest books, poems, and events, might have found many more pretentious, but few more enjoyable, gatherings. I have a dim recollection that the first of these little tea-parties was held up two flights of stairs, in one of the less fashionable sections of the city; but good things were said there, that I recall with pleasure even yet; while of some of the company, on whom I have not since set eyes, I cherish a pleasant and grateful remembrance. As their circumstances gradually though slowly improved by dint of diligent industry and judicious economy, they occupied more eligible quarters; and the modest dwelling they have for some years owned and improved, in the very heart of this emporium, has long been known to the literary guild as combining one of the best private libraries with the sunniest drawing-room (even by gaslight) to be found between King's Bridge and the Battery.'

"One of her hymns is associated with a touching story. It is the one beginning with this stanza:

One sweetly solemn thought
Comes to me 'er and 'er;
I'm nearer home to-day
Than I ever have been before.

"A gentleman in China, intrusted with packages for a young man from his friends in the United States, learned that he would probably be found in a certain gambling-house. He went thither, but not seeing the young man, sat down and waited in the hope that he might come in. The place was a bedlam of noises, men getting angry over their cards, and frequently coming to blows. Near him sat two men,—one young, the other 40 years of age. They were betting and drinking in a terrible way, the older one giving utterance continually to the foulest profanity. Two games had been finished, the young man losing each time. The third game, with fresh bottles of brandy, had just begun, and the young man sat lazily back in his chair while the oldest shuffled the cards. The man was a long time dealing the cards, and the young man,

looking carelessly about the room, began to hum a tune. He went on, till at length he began to sing the hymn of Phœbe Cary above quoted. The words, says the writer of the story, repeated in such a vile place, at first made me shudder. But while the young man sang, the elder stopped dealing the cards, stared at the singer a moment, and, throwing the cards on the floor, exclaimed: 'Harry, where did you learn that tune? 'What tune?' 'Why, that one you've been singing.' The young man said he did not know what he had been singing, when the elder repeated the words, with tears in his eyes, and the young man said he had learned them in a Sunday-school in America. 'Come,' said the elder getting up; 'come, Harry; here's what I won from you; go and use it for some good purpose. As for me, as God sees me, I have played my last game, and drank my last bottle. I have misled you, Harry, and I am sorry. Give me your hand, my boy, and say that, for old America's sake, if for no other, you will quit this infernal business.' The gentleman who tells the story (originally published in *The Boston Daily News*) saw these two men leave the gambling house together, and walk away arm in arm; and he remarks: 'It must be a source of great joy to Miss Cary to know that her lines, which have comforted so many Christian hearts, have been the means of awakening in the breast of two tempted and erring men on the other side of the globe, a resolution to lead a better life.'

The poem alluded to is the following.

One sweetly solemn thought
Comes to me 'er and 'er;
I'm nearer home to-day
Than I ever have been before.
Nearer my Father's house,
Where the many mansions be;
Nearer the great white throne,
Nearer the Jasper sea;

Nearer the bound of life,
Where we lay our burdens down;—
Nearer leaving the cross,
Nearer gaining the crown.

But lying darkly between,
Winding down through the night,
Is the dim and unknown stream
That leads me at last to the light.

Closer, closer my steps
Come to the dark abyss;
Closer death to my lips
Presses the awful chrysm.

Saviour, perfect my trust,
Strengthen the might of my faith;
Let me feel as I would when I stand
On the rock of the shore of death;

Feel as I would when my feet
Are slipping over the brink:
For it may be I'm nearer home—
Nearer now, than I think!

These lines are truly beautiful, and their remembrance may well bring comfort to the devoted Christian; who, relying on the mercy of God in Christ Jesus, is struggling on in the narrow path, seeking to know a yet fuller redemption from the power of sin, and a closer union with the Divine nature. Such a one experiences that every temptation to evil successfully resisted, every buffet of Satan, every season of desertion patiently endured, and every humbling dispensation administered by the Divine hand, is among the providences designed to work together for good to them that fear God. When favored with a

se of Heavenly goodness which is administered at times for his consolation and encouragement, he may indulge the animating hope, that as time passes on, he is approaching,

Nearer his Father's house
Where the many mansions be.

Such a hope cannot safely be entertained by any whose hearts are not yet devoted to the service of their Heavenly Father, or who are not seeking to be brought under the government of that power, which can enable them to surrender themselves fully to the Divine will; for before we can gain the crown we must bear the cross.

A California Orchard.—Says the Marysville Standard, a few days ago it was our pleasure to visit the orchard of John Briggs, located about two miles south of Yuba City, in Sutter county. The proprietor is the owner of 426 acres, mostly bottom land, lying along the west bank of the Feather river. The soil is a rich, sandy loam, and composed of the yearly deposits of the river many years ago. No better or richer land is to be found in the State, and the orchard we shall briefly notice promises to be the pride of the Briggs Brothers, who have a State reputation as orchardists and fruitgrowers.

Before reaching the orchard proper we rode through a field of 150 acres of castor beans, which field is to give place to a new orchard next year, the fruit trees for the same at present growing in the nursery by the side of the field of castor beans, and containing 25,000 one year old budded peach trees, 16,000 plum trees, 6,000 eastern walnuts, 25,000 California walnuts, 2,000 apple trees, 500 Italian chestnut trees, &c. Passing along through this forest of young trees, we arrived at the present peach orchard, consisting of 600 trees, two years old, and some of them bearing this season 150 pounds of peaches. These trees have made a remarkable growth, owing to the rich ground upon which they are planted.

Passing the peach orchard we reached the apricots, two thousand two hundred in number, which are also two years old, and have borne a fair crop the present season. This orchard presented a sad sight in one respect. The late heavy storm had prostrated many of the trees entire, while in others the limbs had been torn off as if a tornado had swept over the place. However, the trees were healthy and stout, notwithstanding the mutilations here and there. We next rode into the cherry orchard, containing three thousand of the most thrifty young trees ever seen on any ground. The different varieties, fifteen in number, gave this orchard a variety of aspect, and broke up the usual monotony of the steeple-like formed cherry orchard. These cherry trees were all imported from Rochester, N. Y., about three years ago.

Off to the south of this wonderful wilderness are two thousand five hundred plum trees of twelve varieties, and five hundred apple trees, mostly of winter varieties. On returning from the orchard by the wagon road we had entered, we visited Briggs Brothers' steam castor oil mill. Here we found a hydraulic press, with a capacity of three hundred gallons of oil per day. The mill also contained twenty tons of castor beans, and two thousand five hundred gallons of oil, nicely bottled and cased, and ready for market.

THE BRIGHT SIDE.

There is many a rest in the road of life.
If we would stop to take it,
And many a tone from the better land,
If the querulous heart would wake it!
To the sunny soil that is full of hope,
And whose beautiful trust ne'er falleth,
The grass is green and the flowers are bright,
Though the wintry storm prevaileth.
Better to hope, though the clouds hang low,
And to keep the eyes still lifted,
For the sweet blue sky will soon peep through,
When the ominous clouds are rifted.
There was never a night without a day,
Or an evening without a morning;
And the darkest hour, as the proverb goes,
Is the hour before the dawning.

There is many a gem in the path of life,
Which we pass in our idle pleasure,
That is richer far than jeweled crown,
Or the miser's hoarded treasure:
It may be the smile of a little child,
Or a mother's prayers to heaven;
Or only a beggar's grateful thanks
For a cup of water given.

Better to weave in the web of life
A bright and golden filling,
And to do God's will with a ready heart,
And hands that are swift and willing,
Than to snap the delicate, slender threads
Of our curious lives asunder,
And then blame heaven for the tangled ends,
And sit, and grieve, and wonder.

Know well, my soul, God's hand controls
Whatever thou fearest;
Round Him in calmest music rolls
Whatever thou hearest.

What to thee is shadow, to Him is day,
And the end he knoweth;
And not a blind and aimless way
The Spirit goeth.

Nothing before, nothing behind,
The steps of faith
Fall on the seeming void, and find
The Rock beneath.

The present, the present is all thou hast
For thy sure possessing;
Like the Patriarch's Angel, hold it fast
Till it gives its blessing.

And in life, in death, in dark, in light,
All are in God's care;
Sound the black abyss, pierce the deep night,
And He is there!

Leaning on Him, make with reverent meekness
His own thy will;
And with strength from Him shall thy utter weakness
Life's tasks fulfil.

And that cloud itself, which now before thee
Lies dark to view,
Shall with beams of light from the inner glory
Be stricken through.

And like the meadow-mist through autumn's dawn
Uprolling thin,
Its thickest folds when about thee drawn
Let sunlight in.

Habits of Spiders.

In the south of Europe, and also in the south of France, there are found spiders large in body, but very poor in silk. But these use well their small stock; not being rich enough to construct dwellings of silk, these mygalæ make tubes in the earth of diameters suited to the size of their bodies, and as the walls would be rough, they are adorned with hangings of the most beautiful silk, so soft that the inhabitant feels no friction when rubbing against such tapestry. This is not all; if the retreat remained open at the surface, the mygalæ might easily be seized by some hungry

Selected.

animal. This spider, therefore, makes a solid door with the earth thrown out in hollowing the tube. The door is cone-shaped, so as not to be pushed in by a pressure from without. On the outside it is uneven, like the soil; but inside it is carefully covered with a silky web. To a door you must necessarily have a hinge and a lock or bolt are often wanted; the mygalæ knows how to provide for all these necessities. The hinge is formed with such tough silk that it can offer a resistance surpassing belief. A semicircle of little holes, very regularly placed in the side opposite to the hinge, forms a kind of bolt. See what intelligence this spider shows when any one tries to open the door; she drives her claws into the little holes, pulls down with all her might, and thus defends her domicile. When the mygalæ wishes to go a hunting, she pushes up the door, and lets it fall down again; on her return, she draws up the door with her claws and re-enters. This is very like what is now done in many towns in the north of France by the tenants of those lodgings where the door opens on the foot path.

Many spiders use silk for making tubes, or lurking places, where they watch for their prey, or for fortresses to secure themselves from foes.

M. Blanchard has called attention to a wonderful use of silk by the water spiders. These differ little in appearance and general structure from their more common relations. They make their homes in streams, but live much in the air. How is this managed? The spider form a house of silk, which is a true diving bell. This singular home is about the size of a thimble, is secured to some weed growing on the rivulet's banks, and there the spider lurks. This silk diving bell has a white and glistening appearance, like silver. The inhabitant is, therefore called argyronæta from two words, denoting "a spinner of silver."

Every one notices, and few can help admiring, the magnificent webs of the common garden-spider. The art with which they are formed is wonderful. The ancients who examined these works, understood all their beauty, and invented the pretty fable of Arachne. The web was so perfect that its author seemed capable of rivalling a goddess. The spider, when about to construct the web, places a thread cross-ways between two branches, then arranges other threads between them, which look as regular as if traced on a frame. From the horizontal thread the spider spins a vertical thread in a downward direction, and the centre of the work having been thus settled, the radiating lines are formed. Other threads are then spun, and the concentric circles constructed with a beautiful and wonderful regularity.

These threads are not all of the same kind. Those which compose the large transverse cord, the vertical cord, and the rays, are made of a silk which becomes dry the moment it comes out of the spider's body. On the contrary, those which form the circles are made of a silk which is highly elastic and glutinous—the most important properties, because the threads thus completely adhere to the rays. These same spiders produce silk destined to form cocoons, in which to envelop the eggs. This silk is sometimes quite different from that of which the web is composed. While the web threads are white this is of a golden color. The three kinds of silk are secreted

three kinds of glands, each secreting a particular silk. The cobwebs of our gardeners give an incomplete idea of some of the threads spun by other species of the same kind. In the hottest countries of the world

Madagascar, in the Isle of Bourbon, in Mauritius, in India, and in the greater part of Polynesia—there are spiders which construct webs of gigantic dimensions. They work their filmy lines across streams, fasten them to the trees on each side. Travellers that when these spiders are numerous, the webs, thus thrown across rivers, produce a most striking effect in the landscape. Explorers of Madagascar, or the Isle of Bourbon, have observed a species which constructs its webs somewhat like those of the garden spider; but there was one important peculiarity: there was in the centre a thick silvery thread, twisted so as to present a series of zigzag folds. This fact having been discovered, nobody could doubt the peculiar use of this thick thread. A few years later a naturalist, Dr. Vinson, attached to the Madagascar mission, made some interesting observations on these webs. He often passed several hours in observing the spider, whose mode of construction was so singular, asking himself what could be the use of this large web, a real cable compared to the other webs. Each day he repaired to some of the webs to study them. One day some one came and threw themselves on the spider; quickly the spider flung itself on its prey, throwing out some of the light threads, enveloping the flies. The cable did not break. The observer broke it three or four times; the spider each time made a new cable. One day a large grasshopper presented itself into the middle of this net. The light threads would not have been strong enough to keep such a victim. Mark now a sign of intelligence. As soon as possible the spider threw himself on his great cable, and surrounded the grasshopper with the greatest tightness. That no doubt might remain, our observer returned on the following days to the same place, being determined to make experiments. He took care to furnish him with large insects; and, throwing them on the spider's web, the same manoeuvre was constantly repeated. The use of the thread was now discovered; to hold strong insects. They have thought, for a long time, to employ the web of the spider; but it is difficult to obtain a sufficient quantity. The ordinary thread is ninety times thinner than that of the silk worm, and, therefore, it is necessary to have 1,800 spider's threads, according to Reaumur, to make a serviceable cable. This circumstance prevents the ordinary use of any considerable value, of the webs of spiders. However, M. Lebon, president of the parliament of Montpellier in 1709, made stockings and gloves, of a pretty grey color, for Louis XIV. from this silk. M. Pigny, made from the threads of a species of American spider, a pair of drawers, which held a long time. Travellers tell us that, in tropical countries, spiders' webs are seen to have so much strength that they catch swimming birds. It is even said that men can break the webs with difficulty.

It is not less return to the intelligence of these creatures. It is in the means they employ in seizing their prey that spiders display all their resources. The wall spider lies down in a hole, and there, after watching a fly, springs

upon it with one bound, rarely missing, so quick and sure is the jump. Another species watches on a tree for caterpillars, near the opening of the nest, and as soon as one comes near, the spider seizes it, sucks it quickly and then throws the body away. But that which denotes spider intelligence most is the making of their webs. Certain spiders set up a circular network with loose meshes for small flies; others form stronger tissues, with more solid warps, to hold larger flies. In the first network, the threads of the warp are stronger, and twisted, radiating from the centre to the circumference; other threads, more slender, are placed circularly. By this geometrical disposition, the spider, keeping to the centre, will feel, better than any where else, the least movement at the circumference. This, according to Virey, is what Schmid, a learned German mathematician, proved, who published a work in which he shows that spiders, like bees, display the most transcendent geometry. But what is most wonderful is the lodging in which the spider keeps himself on the lookout. It is a real circular tunnel, with a double outlet, and a double use. The entrance is horizontal, the outlet is perpendicular. It is from the former that the hunter throws himself on his prey; the other performs the office of a secret cell.

The spider takes the greatest care never to leave at the entrance the corpses of which he has sucked the blood; this charnel house would frighten its living food. Each time a fly has been immolated, it is dragged into a canal, and thrown into the lower opening. When we look at the floor of the den, we are surprised at the number of the spider's victims. Sometimes this hidden opening serves for a way to escape when danger is near; but this is a rare case. Its special use, its only destination, says M. Pouchet, who claims the honor of this discovery, is to receive the wreck of the spider's repast.—*Menault.*

For "The Friend."

Memoirs of Mildred Rateliff.

(Continued from page 23.)

"1810, 6th mo. 26th. Were at Wells. Oh! this was a time of refreshing indeed, as after a pinching drought. Here we were met by several living, affectionate Friends, and our spirits were refreshed in the revival of that cementing love which can alone unite us; whereby, as with the voice of one man, the Master's name is magnified. Here also the slothful, indolent, and wilful offenders were faithfully warned. O Father! though we are weak, Thou art strong. Though we are poor, Thou art rich in matchless love; and worthy to be trusted in forever.

"27th, at Beach Spring; 28th, at Piney Woods. At the last I may truly say when meeting gathered, I sat down in weakness, and felt as a vessel empty indeed. I was poor, yet was content; and much desired in my heart to be preserved from every motion which springs from the unsavory root; or of daring to stir up or awake my Love till he pleased. For some time I had no reason to expect to communicate anything. Under this prospect, though there were many present, both Friends and others, more than had been at some other meetings, yet I rejoiced, and gave God thanks, if so it seemed good in his sight, that I might be excused from opening my mouth; yet greatly desiring above all things, that His will and not mine might be

done. After a little while, my Commander was pleased to impress my mind with words and matter to communicate, to the praise of His own worthy name. Truth reigned above all, and the hearts of the upright rejoiced, under a sense of renewed favor, derived from the Fountain of all good: whose own works praise Him.

"29th. Took a solemn leave of our endeared friends Caleb Winslow, his well beloved wife, and honored sister Ann Scott, who was then on a visit to Virginia. Dear A. S. is an elder and mother in the church, worthy of double honor.

"Through this day's travel, but in particular the forepart of it, it would be difficult for me to set forth the overflowings of the love of my Heavenly Father, which filled my heart and overran my cup. I had once more so richly to partake of his bounty, as to raise in my inward life as I rode along, the language of the spouse, 'Stay me with flagons, comfort me with apples, for I am sick of love.' The seraphic enjoyment which the contrite spirit is sometimes favored with, even here while passing through the vale of tears! Methinks it is enough to engage every heart to seek after them, and willingly to part with everything that obstructs the soul partaking of them. In the overflowings of the unspeakable love of my God, tears of gratitude sweetly flowed, giving vent to an overcharged vessel. O Lord my God! be thou pleased so to keep my eye single, and ear attentive, and my heart so entirely devoted to do and suffer thy will, at all times and places, that neither the world, the flesh, nor the devil, may ever be able to mar thy work or frustrate thy design in having called me to labor in thy glorious cause of truth on earth! O remember how weak I am, and leave me not one moment exposed to my enemies, for they are many through Satan's malice, who is enraged against me. Yet Thou in whom I trust art strong, and able to keep me safe. Adored for ever be thy worthy Name.

"30th. Got into the neighborhood of Rich Square.

"7th mo. 1st. Attended Rich Square Meeting, which was a proving, death-like time. This kind of meetings are truly discouraging to poor exercised travellers, who, through many difficulties, and with longing desires to find those they come to see in good health, are made sorrowful to find them in such a situation, that instead of rejoicing with them in that love and life which are mutual and animating amongst the living, they have to mourn as the weeping of Jazar the vine of Sibraah. This night at a Friend's house I was much indisposed: indeed not able to sit up. A trying indisposition, and quickly occurring; but I may say, I was not overcome discouraged, having often through my short pilgrimage, to experience these changing scenes. Through all my mind was preserved in a good degree of patience, not daring to murmur at the dispensations of what might be called evil things.

"3d. I was so far recruited as to ride about thirty miles to Jack's Swamp.

"4th. Attended that meeting to some more satisfaction. There are here some hopeful plants among the younger sort. May they be watered and kept alive.

"5th and 6th. Through much bodily weakness we rode eighty or ninety miles to Contentnea.

"7th. Had a meeting to a good degree of satisfaction.

"8th. Was at Contentnea—a favored meeting.

"9th at Holly Springs, 10th at N., 11th at Bear Creek. All through close exercise, tending at least to the relief of my own mind. Praises to my only Helper for his goodness to me who often feels but as dust and ashes. In the afternoon of the 11th we started for Core Sound, and reached the little settlement of Friends on the 13th, after a slavish travel of upwards of one hundred miles, through a poor, barren country indeed: at least parts of it were so. At times it felt as though we might say, This is like laying down our lives for our Friends. Indeed in some degree we had this to experience before we started to see this branch of the family; feeling some hope to be excused from this turn: yet we were enabled, I trust, in a good degree of resignation to say, each as one, 'Not my will, O Father, but thine be done.'

"14th. Went with two kind Friends who were acquainted with boating, eight or ten miles by water to see the briny deep. Through the power of the wind, which was pretty high, we saw as much of the foaming waves as we were able to bear. In our passage to the sea and back over the foaming deep, we felt the need of faith in Him who yet has the command of the winds and waves. We walked I think more than a mile along the sea shore, taking a view of the marvellous works of Him who created the heavens, the earth, the seas, and the fountains of waters. He gave to the great deep its proper bounds, so that it cannot pass over them. This was a day of teaching indeed, giving rise to this acknowledgment, 'Great and marvellous are thy works, Lord God Almighty! Just and true are all thy ways thou King of saints.'

"15th. Attended the meeting at the Sound, 16th, started back for Contentnea Quarterly Meeting. Reached E. H.'s, a friendly man, with whom we left word as we went down for a meeting.

"17th. Agreeable to appointment, we had a meeting there, among a people not professing with us. These two last meetings, through Heavenly help, were times of such favor as are I trust not soon to be forgotten, at least by us. In the afternoon continued our journey.

"18th. Got to A. L.'s, weary indeed. 19th. Went home in the forenoon with our kind friend and pilot Caleb Hall, where we found a resting-place as at noon. We thankfully indulged ourselves, once more, with the privilege of resting, it being in the needful time.

"20th. Attended the Select Quarterly Meeting at Contentnea, where, through close searching labor under the power of the cross, I was enabled to drop some close hints to that part of the family, which if attended to, may tend to stir some of them up to their lasting profit. There was no doubt but some were sitting at ease in Zion, whilst the house of God lay waste. How has my spirit often mourned under a sense of these things, with some even in this part of the household who have been promoted to dignified stations in the church. Indeed I know of no state harder to reach, than that of an elder overgrown with the earthly nature. Truly none are more to be dreaded amongst men. May these remarks, O Lord my God, be read to the profit of such as these, when I am in another state of being, if it be thy will.

"21st. Was at the Quarterly Meeting for business: the forefront of which was a public meeting; and, through Divine aid, much favored. The latter a suffering time indeed. It gave rise to this moving query, 'Why, O why, righteous Father! why should thy people whom thou hast chosen out of all the families of the earth, and so peculiarly placed thy name amongst? Why should they be so stupid after all, as to have that Scripture declaration fulfilled on them, 'Verily, verily I say unto you, there are many that shall come from the east, and west, and north, and south, and shall sit down with Abraham, Isaac, and Jacob, whilst the children of the kingdom shall be cast out.' Oh Friends! have a care of this, seeing there is room enough in the Father's house for you and them.

"22d. Was at Contentnea again. It was a very large meeting, constituted of Friends and others. We had a highly favored time, not soon to be forgotten, I trust, by many that were there. May the God of my life have all the praise and renown, by all and over all forever.

"23d. At Neuse. Here we parted, after meeting, with several dear Friends that came with us from Contentnea. In the afternoon continued our journey for Piney Grove, having now for pilot our beloved friend and brother I. P.

"24th. Reached a town called Fayette. When there put up with H. B., formerly a member amongst us. He met us in the streets and took us home with him, where we were kindly entertained."

(To be continued.)

For "The Friend."
Halo of the Sun.

On the 24th inst., about 8 o'clock, A. M., this phenomenon became visible in E. Tennessee, and continued with unusual splendor till near 2 P. M. It was obscured at times by clouds; but the appearance, for hours, was that of a perfect rainbow-ring around the sun, with a secondary ring, which was an ellipse projected north; its southern limb cutting the circular rainbow south of the sun. Thus were two rings, of beautifully refracted light, linked together in a plane, majestically mounting to the zenith. The refraction in the ellipse was fainter than that in the ring.

Y. W.

Eighth mo. 25th, 1871.

For "The Friend."

From the Letters and Papers of John Barclay.

The deep interest long felt in the memoirs of the lamented John Barclay, has induced the compiler to undertake a selection from them for the pages of "The Friend." That his example of early, as well as life-long dedication and faithfulness to the cause he so fully espoused, and which only is dignified with immortality and crowned with eternal life; his youthful, whole-hearted submission to the tenderly striving influences made from time to time upon his heart and mind by the Holy Spirit, our Guide unto all truth; his resignation, meekness and constancy in enduring the self-denial and daily cross enjoined upon all the disciples of a world-renouncing Lord; his consistency and Christian integrity in carrying these out in his life and conversation, so as to be known and read of all men;—that these may have their proper alleviating effect upon all their readers, is the earnest, fervent concern of the writer.

These memoranda, commencing with the early life of their Author, and giving such graphic and intelligent account of the close judgments and proving baptisms, yet ever gentle leadings of the tender Shepherd Israel; the wooing, restraining influences of His holy Spirit; the sacrifice by him of his heart and will thereto; the circumscriptive course of life he felt it his religious duty to maintain in consistent practice; the various changes he was required to make for the sake of Him who was calling to glory and virtue and leading in the straight, and narrow, an only way to His kingdom; his faithful obedience in the day of small things, whereby he was enabled to overcome one after another the old inhabitants of the land, and to increase in the increase that is of God, until his path, like that of the just, shone more and more unto the perfect day, are deeply fraught with instruction; and commend them especially and forcibly to young men, by nature like himself, to whom these may come. May we so improve the parts and talents responsibly committed to them; solet obedience keep pace with knowledge to the still small voice of the Saviour whose tabernacle is with men, and whose teachings are never man taught; so walk worth of the vocation wherewith they are called, with all lowliness and meekness, as at the final, solemn closing scene of this probationary and very uncertain existence, they may stand through the unspeakable riches of Christ, an obedience to the exceeding grace that is given through, and to Him, know the joy of His salvation to be their strength and the portion forever.

The subject, extracted from an introduction to the work by his brother, A. Rawlinson Barclay, cannot fail to interest the serious reader:

"This Selection from the Letters and Papers of the late John Barclay, has been made partly from accounts of his religious experience and reflections, recorded chiefly in early life and partly from letters written to his friends which have come within the reach of the editor. From the state in which these accounts were found, as well as from remarks made during his life-time, there is no doubt, but that the author intended the publication of a compilation of them, as a narrative of his religious experiences, and as a testimony memorial of the Lord's goodness to him;—this collection of rough materials or notes he had prefixed a title page, of which the following is a copy; 'Some Memorials of J. Lord's goodness to a poor creature; to which was subjoined the quotation from Scripture affixed to the title page of this work, viz. 'I thought it good to show the signs and wonders that the high God hath wrought toward me. How great are his signs; and how mighty are his wonders! his kingdom is an everlasting kingdom, and his dominion is from generation to generation.'—Daniel iv. 2, 3.

"The editor regrets that he has not been able to present the reader with more of an connected biographical sketch of the author's life than will be found in this work,—a life which may perhaps be said to afford but little variety of incident. He believes, however, to those whose minds delight to trace the blessed and animating effects of Divine grace in the heart, that the religious experiences of the pious and devoted christian and fellow-professor, which are to be met with in his private memoranda or correspondence, are often de-

destructive; and they may be felt to supply the place of biographical variety, to some, with real interest, and even more pleasant satisfaction.

The following testimonial to the religious character of the author, drawn up by one of early and most intimate friends, may, it is thought, be suitably introduced at this place. It was one with whom I shared no common intimacy and friendship, both at an earlier period of our lives, and subsequently: we have taken sweet counsel together, and I may have been many times permitted to sit together "in heavenly places in Christ Jesus." My acquaintance commenced in the autumn 1816, at a time when his mind was sweetly led by the Day-spring from on high. How fresh is my remembrance of the state of his mind at that period; and how was my heart made to rejoice in the feeling of the preciousness of the love of our heavenly Father towards him, and the abundant shed abroad thereof in his heart. In this of the Lord's power, a willingness was wrought in him wholly to surrender himself to Divine disposal, and to count nothing dear or too dear to part with, which was done for at his hand. Thus by meekly giving his neck to the yoke of Christ, he found it to be made easy, and His burden light; and thus was he enabled to take up his cross, and follow his Lord and Master through of life. By yielding obedience to tendering operations of redeeming love mercy, he experienced an advancement in way of holiness; he became valiant for the cause of truth and righteousness in the world; and deep was his experience in the things of God.

He wrote not to exalt the creature, but with a view to magnify the riches of that grace, by which he was what he was, and which on him was not bestowed in vain. As he lived and died, in the Lord: his memory is precious,—the savor of his life remaineth; and he is dead yet speaketh. I now, as I reverently believe, having engaged in the good fight, and kept the faith,—coming out of great tribulation, and having washed his robes and made them white in the blood of the Lamb,—he has finished his course joyfully; and is gone to inherit the crown of life; and his righteousness laid up for all them that love and obey Christ.

The reader is referred to the annexed testimony of Gracechurch Street Monthly Meeting for a further but brief memorial of my dear departed brother.

A. R. BARCLAY."

(To be continued.)

THE FRIEND.

NINTH MONTH 16, 1871.

in the world but not of the world," is a motto which a Christian should ever keep in his mind. He believes the assurance given him by the omniscient and almighty Creator, that he shall live throughout eternity: that unending happiness or unending misery are before him into one or the other of which he must finally enter when death has relieved him from the shackles of mortality: and that, weak as he is, he is naturally, the means of his own redemption: and that, if he will provide for his securing the former, he will comply with the terms, and

employ his present state of existence in preparation for the glorious change that awaits the righteous.

Those terms include "Lay not up for yourselves treasures upon earth;" "But lay up for yourselves treasures in heaven;" and "Love not the world, neither the things that are in the world." But independent of the terms prescribed, his observation and experience counsel him, that even while using this world as not abusing it, its fashion passeth away, and that only as his affections are centred on those things that are not seen, can he keep himself unspotted from its impure spirit and ways. Revelation has disclosed to him that all this mundane scene is destined to perish. He sees change follow change in such rapid succession, that he feels as though he could almost hear the work of final destruction going on around him. History teaches him that he is daily walking among the ruins of the past. He knoweth that one generation of men passeth away and another cometh: the footsteps of the busy and learned and of the idle and ignorant have alike ceased: their voices of merriment and their cries of distress are equally hushed forever. The hopes and fears, the schemes for pleasure or profit of the worldlings that misunderstand and grieve him, perish before his eyes, and he sees that their firmest works are giving way with the corrosion of time. Sad severance of the tender ties of affection, have brought home the truth that his relatives, friends and acquaintances are as short-lived, and the happiness they confer as fleeting, as were those who, in the generations that preceded him, were engaged in the active scenes and trials of life, and quickly followed each other into the dark valley of the shadow of death. Those who went before knew not that he would tread the earth after them, and, though his memory may be cherished for a little while, by the few who love him, those who follow may be equally ignorant of his having lived, and he will be forgotten when his body has mingled with the clods of the valley. His consciousness forces the conviction upon him, even while enjoying health and vigor, that the sentence of death which has been executed on all who have gone before, must be carried out in him. He too ere long must submit to the stroke that has laid low the loftiest and made the strongest powerless. Soon his heart will cease to beat, his eye be closed in death, his voice be hushed forever, and the place that has known him shall know him no more.

Considerations such as these should make the Christian familiar with the truth that the things of time and sense are unstable and evanescent, and that as he is "looking for a city which hath foundations, whose builder and maker is God," and is passing through a world lying in wickedness, it is his duty though in it not to be of it, but to keep his heart with all diligence, lest its affections and hopes be drawn from durable riches and righteousness to the shadows that flit before him.

But while the religion of Christ calls the Christian thus to regard the world and its fleeting interests, it does not interfere with the proper and profitable pursuits of life. Co-operating with the intellectual processes of his mind and interweaving itself with the best feelings of his heart, it not only prompts and lends its aid to his performance of every duty, but it adds a pleasure peculiarly its own to

the ordinary enjoyment of whatever is necessary or allowable. Sent in kindness infinite with messages of love to fallen man, it sheds the glow of heavenly peace over the scenes of domestic life, takes away whatever would wound or embitter in the social circle, and changes the narrowness of self and the repulsion of pride into a genial interest in the welfare of all, and a humanity that recognises every man as a brother. While it fills the regenerated heart of its votary with gratitude and love to the great Architect of the universe, it draws aside from the fair face of nature the veil which baffles unbelief and "science falsely so called," and displays to him in all her lineaments, the beautiful impress of divine love and skill.

"His are the mountains, and the valleys his,
And the resplendent rivers; his to enjoy
With a propriety that none can feel
But who, with filial confidence inspired,
Can lift to heaven an unpresumptuous eye,
And smiling say, 'My Father made them all!'"

If it is his lot to "visit the fatherless and widows in their affliction," or his sympathy is awakened as he witnesses the misery oft found in the hovels of the poor, he finds in the very bond that links him to the wretched, and calls him so far as he may be able to relieve their wants and soothe their sorrow, there is a reward included that repays him far more satisfactorily, than do the riches and pleasures of this world the man who seeks after them. It fails him not in adversity nor deserts him in prosperity; enabling him to bear up with cheerfulness amid the trials of the former, and guarding him from the dangers that beset the dazing glitter of the latter; and having guided, sustained and soothed him through the checkered scenes of life, it accompanies and supports him as he descends to the narrow house appointed for all the living; thus proving, "That godliness is profitable unto all things, having promise of the life that now is, and of that which is to come."

SUMMARY OF EVENTS.

FOREIGN.—Paris dispatches of the 9th state that the Paris forts, and three of the four departments surrounding the city, will be evacuated immediately by the German troops. The Department of Oise will be occupied until the third half milliard of the indemnity is paid.

General Manteuffel, commanding the German army of occupation, after announcing yesterday the consent of his government to the evacuation of the departments around Paris, dined with Thiers, and Generals Ducrot and Chanzy. The northern forts will be evacuated first, after which the troops will withdraw from all other points at the rate of 3,000 a day.

The deaths in Paris for the past week were 943. The returns show that the typhus fever is becoming epidemic.

The French Minister of Finance has introduced in the Assembly, as a provisional and temporary measure, a bill levying one-tenth of the proposed increase in taxation to meet the immediate demands of the government. The Assembly has adopted a bill laying the burdens of the losses caused by the war on the whole nation, and providing for the immediate distribution of 106,000,000 francs among the sufferers by the Paris insurrection. After an excited debate, running through four days, the Assembly has adopted a bill providing for the continuance of his sittings at Versailles.

The trial of General Brossel terminated in his conviction and sentence to military degradation and death. Four of the female incendiaries have been sentenced to death, one to imprisonment in a fortress, and one to ten years solitary imprisonment.

The proposals of the Lower California Company to transport the Communist prisoners, and form a colony with them on the Pacific coast, has been referred to a committee, which will soon make a report on the scheme.

The latest news from Algeria is favorable. The Beni Menasser tribe have submitted. The insurrection in

the province of Algiers has been subdued and the state of siege partially raised.

The League for the delivery of Alsace and Lorraine announces that it will continue its labors, but has modified its title to the Society for the Promotion of Alsacian Emigration.

Marshal Bazaine has appeared before the Committee of Military Investigation. He made a speech in defence of his conduct of the war, attributing his failure at Metz mainly to the lack of ammunition.

The Empress Eugenie embarked on the 9th at Southampton for Spain, where she will remain about two months. Napoleon will in the mean time reside at Torquay.

The condition of affairs in Persia is still deplorable. The Levant Herald says the deaths at Tabreez average about two hundred and forty per day. The Christians are being persecuted in the mountains, and business entirely suspended. The Persian army has been disbanded.

Strikes among the workmen have been common of late throughout England. The proprietors of factories in Newcastle are sending in every direction to obtain more workmen. The proprietors of the collieries are arriving in considerable numbers from Cornwall, London, Norway and other quarters. Some factories have been able to resume operations with their former activity, although nearly four thousand old hands have left town.

A small explosion in a coal mine, near Wigan, in Lancashire, caused the death of sixty-nine persons.

Dr. Carl Marx, the founder and leading spirit of the International Society, died in London on the 5th inst, in his fifty-third year.

The Republican Committee of England has issued a formal declaration of the principles of the republican party. The programme proposes a federation of England, Ireland, Scotland and Wales; abolition of titles and privileges, suppression of monopolies, the abolition of standing armies; compulsory education; State provision for those who can work, and sustenance for those who cannot, with changes in land tenure, &c.

Prussia is abating in North Germany. The Prussian Cross Gazette announces the result of the Salzburg negotiations as follows:

Austria and Germany, repudiating aggressive ideas, will unite closely to repel aggression. Germany wishes Austria to be strong, and the Austrian Emperor and statesman, who has been decided to leave the Roman question to Italy. The conference is said to have been most satisfactory, and the two Emperors parted on terms of friendship and mutual good will. On leaving Salzburg the German Emperor visited the King of Bavaria, at Munich. It is reported that Austria and Germany have resolved to oppose the resolutions of the International Society.

King Amadeus, who has been journeying through Spain, has granted pardons to many prisoners. He has also visited several bull fights, and taken other means to make himself popular. The system of trial by jury will, it is stated, be soon introduced into Spain, and the scriptural law of Moses will have been made more liberal, exceeding the amount introduced.

Aali Kilrashi, Grand Visier of Turkey, died on the 6th inst. He was considered an able statesman. His successor is Mahmood Pacha.

The extent of railway communication now open in India in 1850 may be said to have been completed last year. Of 68,233 persons employed in the management and maintenance of the roads in the 9th mo. 1870, no fewer than 64,185 were natives.

Latest advices from Rio Janeiro state that the emancipation bill would not probably pass at the present session owing to the opposition it has encountered. The Welsh colliers refuse to continue and the strikers recently imported to supply the place of the strikers are dismissed from the mines.

The strike at Newcastle has failed. At least half of the usual number of hands are now at work, and a full complement, it is believed, would be soon obtained. The London Times in an editorial censuring the importation of foreign workmen, gives its support on both moral and sanitary grounds, to the British strikers in their movement for a reduction of the term of daily labor to nine hours.

The potato disease is spreading in Lancashire. It prevails also to some extent in Ireland.

A Paris dispatch of the 11th says, that negotiations have been commenced in relation to the evacuation by the Germans of the whole of France. The Paris Constitutional states that the government is buying 500,000 chapeaux from the Minister of War at Berlin. A correspondent of the Standard writes that they shall take a recess from 9th mo. 17th to 11th mo. 1st.

London, 9th mo. 11th.—Consols, 93½ a 93½. U. S. 5-20 bonds, 1862, 93½; ten-forties, 90½; Liverpools.—Uplands cotton, 9½ a 9½; Orleans, 9½ a 9½.

REGISTERED STATES.—The reports of the Dea Letter Office, for the Eighth month, shows that there were returned to that office during the month 322,279 letters. Of these 113,779 were sent to the offices from which the letters originated, and 25,300 were destroyed as valueless. The money division received 2,882 letters containing \$96,310, of which \$1,546 was mailed to the owners.

The interests in Philadelphia last week numbered 283, including 123 children under two years of age. The number of taxable inhabitants enrolled as voters in the 29 wards of this city is 144,957, which is 6,036 more than last year. The largest number of voters is in the 19th ward, 10,339, the smallest in the 6th ward, 2,414.

The following is the return of the New York State Assessors of the value of the real and personal property of that State, and the aggregate valuation, as filed in the office of the Comptroller: Assessed valuation of real estate, \$2,322,907,732; aggregate equalized valuations, \$2,052,537,808.

The U. S. revenue from customs the last fiscal year, was \$206,270,000. The cost of collections nearly seven millions.

The Markets, &c.—The following were the quotations on the 11th inst.—New York.—American gold, U. S. sixes, 1881, 118½; ditto, 5-20 U. S. ditto, 10-40, 111½. Superfine flour, \$5.50 a \$5.90; and the brands, 56 a \$9.15. White Michigan wheat, \$1.60 a \$1.65; amber western, \$1.56 a \$1.57; red western, \$1.53 a \$1.54; No. 2 Chicago spring, \$1.43 a \$1.45. Ohio oats, 40 a 51 cts.; white, 51 a 54 cts. State rye, 98 cts. a \$1. Yellow corn, 71 cts.; western mixed, 69 a 70 cts. Middling cotton, 21 a 21½ cts. Philadelphia.—Uplands and New Orleans cotton, 20½ a 21 cts. Superfine flour, \$4.50 a \$4.75; finer brands, \$5 a \$7.75. White wheat, \$1.60 a \$1.65; amber, \$1.52 a \$1.55; Indiana and Pennsylvania red \$1.48 a \$1.50. Rye, 80 cts. Yellow corn, 75 a 76 cts. Clover seed, 73 a 74 cts. Timothy, \$3.25 a \$3.50. About 2900 beef cattle sold at 7 a 7½ cts. for extra, 5½ a 6½ cts. for fair to good, and 4 a 5½ cts. per lb. gross for common. Sheep sold at 5 a 6 cts. per lb. gross and hogs at 6½ a 7 cts. Baltimore.—American wheat, 73 a 80 cts. Superior to prime, \$1.50 a \$1.55; common to fair, \$1.40 a \$1.45. Yellow corn, 73 cts.; southern white, 75 a 80 cts. Oats, 48 a 50 cts. St. Louis.—Superfine flour, 4 a \$4.25. No. 2 red winter wheat, \$1.28. Mixed corn, 44 cts.; yellow, 46 cts. Oats, 31 a 33 cts. Rye, 61 a 63 cts. Chicago.—No. 2 spring, \$1.45 a \$1.10. No. 2 corn, 46 cts. No. 2 oats, 30 cts. No. 1 yellow, 87 a 88 cts. No. 2 yellow, 86 a 87 cts. Wheat, \$1.20. Corn, 56 cts. Oats, 32 a 39 cts.

RECEIPTS.

Received from Amy Middleton, N. J., per Josiah L. Haines, \$2, 45; from Isaac Hancock, Pa., per Sam'l W. Smedley, \$2, 45; from Mary Ann Gibbons, City, \$2, 45; from Rachel E. Woodward, Pa., \$2, 45; from Joseph Waring, Canada, \$2, 20; to No. 23, 45, and Postage, and for Joseph Pollard, \$2, 20; 45, and Postage; from William Windle, Pa., \$2, 45; from James Lee, Jr., Pa., \$2, 45; from Joel Wilson, Agent, N. J., \$2, 45; from Mary Ann Gibbons, City, \$2, 45; from Joseph Scattergood, Jr., Pa., \$2, 45; from William T. Fawcett, Ind., \$2, 45; from Ambrose Boone, Canada, \$2, 45; from Henry Wood, Agent, N. J., for William C. Ivins, Samuel E. DeCou, and Philip P. Dunn, N. J., and Thomas A. Bell, Pa., \$2, 45, each, vol. 45; from John S. Haight, Agent, N. Y., \$2, 45; from John S. Haight, and Charles S. Branson, Hubbard Fuller, and Levi H. Atwater, N. Y., and Edward H. Fuller and John K. Fuller, Mich., \$2, 45, each, vol. 45; and for David Haight, N. Y., \$2, to No. 8, vol. 46; from Thomas Smedley and Edward G. Smedley, Pa., per Sam'l W. Smedley, \$2, each, vol. 45; from William B. Haines, N. J., \$2, vol. 45; from Rachel Ray, for Elisha Sidwell, Elisha Brackin, Lindley Brackin, Israel Steer, Nathan Steer, Joseph P. Lupton, Jonathan Fawcett, Joseph Raley and Isaac Raley, O., \$2, each, vol. 45; and for Branson D. Sidwell, O., \$2, to No. 18, vol. 45; from Sarah C. Winner, Pa., \$2, vol. 45; from Abel Wilson, Pa., \$2, vol. 45; from Mary Ann Gibbons, City, \$2, vol. 45; and for Rachel Parker, Eliza Wilson, David Stephen, and Henry Briggs, \$2, each, vol. 45; from Geo. W. Thorp, Frankford, per Jacob Smedley, Jr., \$2, vol. 45; from Mary N. Griffith, Mo., \$2, vol. 45; from Benjamin D. Stratton, Agent, O., \$2, vol. 45; from D. M. Smith, Phila., \$2, vol. 45; from Sarah Bailey, and Isaac B. Webb, Pa., per Charles J.

Allen, \$2, each, vol. 45; from Phebe McBride, Ia., \$2, vol. 45; from Joshua Jeffers, Pa., \$2, vol. 45; from William P. Smedley, Pa., \$2, vol. 45; from Josi Fawcett, Stratton, Jane Head, and Priscilla Coffee, O., per Micajah M. Moran, Agent, \$2, each, vol. 45; from Thomas Perry, Jr. I., for Charles Perry, \$2, to No. 11, vol. 46, and for Elizabeth Perry, and Geo. C. Foster, \$2, each, vol. 45; from Rufus Churchill, J. N. S., \$2, vol. 45; from Lydia B. Kite, City, \$2, vol. 45; from Anna Garretson, Agent, O., \$2, vol. 45, and J. Matilda Parker, Rachel Green, Catherine Willco Robert P. Sumner, B. I., for Joseph W. Davis, Jr. D., Ephraim Williams, Jesse K. Livezey, Pemp-Bundy, John Thomason, Aaron Frame, John Bund George Tatum, John Hall, William Stanton, Esth Sears, Arnelia Garretson, and Sarah Bundy, O., a Homer Gibbons, Io., \$2, each, vol. 45; for Joel Ball, O., \$1, to No. 10, vol. 46; from Joseph W. Davis, O., \$2, to No. 32, vol. 45, and for Francis Davis, O., \$2, No. 33, vol. 46; from Thomas Y. Hutton, Pa., \$2, vol. 45; from James Embree, Pa., \$2, vol. 45; from Jam R. Cooper, Pa., \$2, vol. 45; from Wm. P. Townes Agent, Pa., for Geo. B. Mellor, Caleb S. Cope, Jas Parker and Jonathan Tomlinson, \$2, each, vol. 45.

Remittances received after Fourth-day morning will appear in the Receipts until the following week.

WESTTOWN BOARDING SCHOOL.

A teacher is wanted for the Girls' Writing School one qualified to give instruction in Grammar and such other branches as may be required. The next meeting of next session, on the 30th of Tenth month.

Apply to Susan E. Comfort, Knox St., Germantown Elizabeth R. Evans, 322 Pine St., Phila.

Martha D. Allen, 525 Pine Union St.,

ERRATUM.

Owing to the proof not being seen by the writer at some 50 pages in the editing of the last number, error occurred in the thirteenth line from the end. It is "To these" read, "To the true ministers."

FRIENDS' FREEDMEN'S ASSOCIATION.

Our schools in North Carolina and Virginia re-open 11th mo. inst. We need a few teachers, and are desirous to engage for this winter a right and concerned Friend. Terms of salary \$15 to \$20 per month.

For further particulars please apply at this office 11th North Fourth St., Philadelphia. Ninth mo. 1871.

WESTTOWN BOARDING SCHOOL.

The Winter Session of 1871-72 commences on Second day the 30th of Tenth month next. Friends who tend to enter their children for the coming term, requested to make early application to AARON SHALESS, Superintendent, (address Street Road P. O., Chester Co., Pa.) or to CHARLES J. ALLEN, Treasurer, No. 304 Arch St., Philada.

WANTED.

A Teacher for the Classical Department of the Bo School at Westtown: to commence his duties at opening of the next Session, on the first of the Eleventh month. Application to be made to Joseph P. Sumner, Chester county, Philadelphia, or Charles Evans, M. D., 702 Race street.

FRIENDS' BOARDING SCHOOL FOR INDIAN CHILDREN, TUNESSA, NEW YORK.

A suitable Friend and his wife are wanted to charge of this Institution, and manage the Farm connected with it. Application may be made to Ebenezer Vost, Marshfield, Chester Co., P. O., Philadelphia Samuel Moore, Oberlin P. O., or Joseph Scattergood, 413 Spruce Street, do.

DIED, on the morning of 22d of Sixth month, 18 at his residence, near Salem, Ohio, JONATHAN COFFEE, an esteemed member of Salem Monthly Particular Meeting, aged nearly sixty-two years. He was born in D. M. Smith's P. O., Chester Co., on Fifth-day, 8th mo. 10th, 1871, A. S. A. WARR widow of the late Jeremiah Warr, in the 87th y. of her age, a member of Green Plain Monthly Meeting. She being dead yet speaketh.

WILLIAM H. PILE, PRINTER.

No. 422 Walnut Street.

THE FRIEND.

A RELIGIOUS AND LITERARY JOURNAL.

VOL. XLV.

SEVENTH-DAY, NINTH MONTH 23, 1871.

NO. 5.

PUBLISHED WEEKLY.

Two Dollars per annum, if paid in advance. Two Dollars and fifty cents, if not paid in advance.

Subscriptions and Payments received by

JOHN S. STOKES,

at No. 116 NORTH FOURTH STREET, UP STAIRS,

PHILADELPHIA.

Single copies, when paid quarterly in advance, five cents.

For "The Friend."

History Illustrated by Numismatics.

(Continued from page 27.)

In the latter part of the 17th chapter of St. Matthew, mention is made of two pieces of money. The 24th verse speaks of "tribute money" or temple tax, and the 27th verse of "a piece of money" sufficient to pay tribute to the king, our Saviour and Peter. The first is the Greek didrachm, the other a tetradrachm, probably of one of the Syrian kings, as spoken of, of the line of the Seleucidae, founded by Seleucus Nicator, one of Alexander the Great's generals.

Respecting the coinage of the Jews, W. C. Cresswell says: "The only extant Jewish coins are the several varieties of the silver shekel," the first book of Maccabees, xv. 6, in the reign of Antiochus the king to Simon the high priest, and to the Jewish nation, occurs the passage: "And I give thee leave to coin money of thine own stamp in thine own countenance." Simon Maccabees probably coined, under this permission, the first national coinage of the Jews. It of course bore no head or figure of a god on its face. The second commandment forbade it. But the pot of manna and the rods of Aaron's rod were the devices adopted, with legends varying, but most commonly 'Shekel of Israel,' 'Jerusalem Holy,' or 'Hisemichon Prince of Israel.' The legends are in the ancient form of Hebrew character, but in the debased form in use since the captivity.

"For what length of time this coinage continued in Jerusalem we cannot say. It is probable that it was of long duration. The Greek and Roman currency took its place in Palestine; and although coins of Herod and of Archelaus the rebel are extant, it seems improbable that these were issued to any great extent. We have copper coins of Agrippa, very rare, and these complete the entire series of coins of Judea."

A very interesting circumstance in numismatics, is the recovery of many facts concerning the history of Bactria and India, which had been lost until the recent discovery and deciphering of a number of coins appertaining to those countries. And also as Ham-

phrey's remarks, "as being the means of restoring at the same time a lost language—the inscriptions on some of the coins being bilingual, Greek on one side, and the Indian dialect of the region on the other; in the earlier period a dialect of Sacerit, and afterwards the Arian language." Our distinguished townsman, Dr. Joseph Thomas, informed the writer that whilst he resided in the east, a large number of coins were shown him, that had been removed from the beds of the Indian rivers. That they were a genuine accession to history, and not forgeries, the doctor thought indisputable—the natives not having the necessary knowledge or means of originating them, and their appearance being altogether in their favor. They were purchased by an English connoisseur without suspicion.

The period at which the ancient Britons first coined money is involved as yet in some obscurity. Coins have been found of tin and silver, the latter sometimes alloyed with copper, of a rudeness which indicates great antiquity. Some of them are manifestly imitations of the money of Philip and Alexander. The issues of those princes are known to have spread widely into barbarous nations that never came under their sway as conquered provinces. The Phœnicians, although possessed of no early coins of their own, were traders with Britain, and may have been the medium of introduction of the Greek money. The native rulers in Britain appear to have almost immediately commenced coining, on the invasion of their island by the Romans. Upon their subjugation under Claudius Cesar, the Roman money became their own, and so continued until the fall of the Western Empire and departure of the Roman legions about 414 A. D. We now find a totally different character of money introduced by their Saxon invaders, termed skeatta, being silver, and in value about the twenty-fifth part less than the penny or debased denarius.

The penny was introduced during the heptarchy, and with the exception of occasional half-pennies, was the only coin of the kingdom until the reign of Edward III. 1272 A. D. It is usually of pure silver, and still continues in a reduced size to form a part of the money of Great Britain. Thus we have seen the oldest standard of silver money, the Greek drachma, imitated among the Romans by their denarius, which they carried into England, there in its turn to be displaced by the penny, which is in use up to the present day. The gradual reduction in weight is shown as follows: The silver penny of Athelstan, 890 A. D., weighs 22 grs. troy; Canute, A. D. 1017, 18 grs.; Edward II., A. D. 1307, 18 grs.; Mary Queen of Scots, A. D. 1560, 16 grs.; Queen Anne, A. D. 1702, 8½ grs.; George II., A. D. 1820, 8½ grs. The groat, or fourpenny piece was first introduced under Edward III., who also coined the first English gold. The latter pieces were called nobles, half-nobles and quarter-nobles; the noble being valued at 6s. 8d. Under Ed-

ward IV. the gold coins were denominated angels and half-angels; and under Henry VII. as well as ever since, sovereigns and half-sovereigns. Henry VII. also introduced the shilling—Edward VI. the crown. The first copper farthings and half-pence, minted by the government for general circulation, were produced under Charles II.: the first copper penny under George III. in 1797.

An illustration of English history, probably nothing is more interesting to the numismatist than the successive changes in the career of the unfortunate Charles I. It is remarkable that throughout all the vicissitudes of his life, he never resorted to the practice so often adopted by sovereigns in time of extremity, of debasing his money. The rudest pieces made out of silver plate, when he was besieged from castle to castle, being invariably of standard weight and purity. The progress of his struggle with the Commons may be traced almost throughout from these siege pieces, as they are termed.

His son, James II., was less scrupulous in regard to preserving the purity of his money. During his last struggles in Ireland, in the vain attempt to hold his crown, he issued money coined out of his guns. At first the pieces which were stamped as though of genuine silver, had a small admixture of that metal in them, but as the supply lessened, the alloy was omitted. An interesting narration of the circumstance, and the ruin brought upon the Irish people in consequence of their having these base pieces forced upon them, will be found in Macaulay's History of England.

The first money coined in America was at a mint established in Massachusetts in 1652. First came the New England shillings and sixpences, being simple circular pieces of silver, stamped N. E. xiii., and N. E. vi. They were soon followed by the pine tree money, comprising shillings, sixpences, threepences and twopences. On one side of the shilling is a pine or oak tree, with the inscription "Masathvests in." On the other, "New England, An. Dom. 1652, xii." The others are similar, with the exception of the numerals being changed with the denomination. The same date seems to have been used throughout a number of years. A story is told of John Hull, the mint-master, whose commission for coining was one shilling out of every twenty; that on the occasion of the marriage of his daughter to Samuel Sewell, he gave her, by way of dower, as many pine tree shillings as would be equal to her own weight! Valuing the silver at sixteen dollars per pound, and supposing the girl not to have exceeded one hundred and fifty pounds, the dower would amount to only \$2400.—a much smaller sum of money than at first thought we might have supposed.

The earliest copper money coined in America, is believed to be that issued in Granby, Connecticut, by a man named Higley, who seems to have proceeded without authority

The shekel was originally a weight.

to coin coppers, each of which passed for three pence readily throughout New England.

In 1773, George III. coined a copper penny for circulation in Virginia, with the name of the State upon it. In 1785, Connecticut established a State mint for coining cents. Vermont also issued cents the same year. New Jersey commenced in 1786, New York and Massachusetts in 1787,—the latter also coined half cents. These State mints continued in much activity until 1788, after which, on the adoption of the Federal Constitution, they ceased their operations.

The first money that was coined at our mint in Philadelphia, appeared in 1793, and consisted of the silver dollar, half dollar and half dime, and the copper cent and half cent. In 1795, the gold eagle and half eagle, and in 1796 the quarter eagle, the silver quarter dollar and dime were introduced. The double eagle appeared in 1850, the gold dollar in 1849, the three dollar gold piece in 1854, the silver three cent piece in 1851, the nickel cent in 1856, the bronze cent and two cent pieces in 1864, the nickel three cent piece in 1865, and the nickel five cent piece in 1866.

For "The Friend."

Memoirs of Mildred Ratelif.

(Continued from page 33.)

"1810. 7th mo. 25th. Had a meeting in this town (Fayette) where there are many professors under different names. I think there are many amongst them that centre in a good degree in the one true religion. These the good Shepherd is disposed to gather more and more out of the shallow or outer court, to a nearer acquaintance with himself in their own hearts. O, thou Father of all our sure mercies! Be thou pleased to carry on this great work with and for them, to the praise of thy own worthy name. In spite of the serpent, who I felt to be much enraged, seeking to prevent thy Truth from rising into dominion, yet praised forever be thy name, thou art stronger than he, and was pleased to make it manifest this day. Thou causest thy Truth to gain the victory in many hearts, and that too among some of the noble men of the town, high in profession of religion, &c. Some of these came to our lodgings, and had to acknowledge the satisfaction with the meeting, expressing, at least one of these great men did, the desire he had for our company at his house, and his sorrow in having no prospect of another opportunity with us at meeting. He wished, as he expressed it, the meeting could have been on Sunday. These things I am deeply sensible are the Lord's doings, and they are marvellous in my eyes. O my soul! ever labor to dwell in his power, and always give him the praise of his own works; which ever did, and ever will, praise him.

"26th. Got to Pinegrove, and on the 27th attended their meeting, which I was glad of, notwithstanding I had my portion of suffering with the suffering seed, which in this place lies as in prison, bound with iron bands. The purity of religion is at a low ebb here.

"28th. Went on to Podoc. To-day an accident occurred, truly fearful; our lives appearing in great danger by the turning over of our chaise. The shafts were broken, and the horse frightened, yet we sustained no great wounds thereby, which was a mercy indeed; for as to outward appearance it looked likely at one time that our lives would be lost. This was a time that I trust will not

easily be forgotten. O my soul! thou knowest who it is that preserveth thee through all, and over all. Therefore fail not to give unto Him all the praise, thanksgiving, and renown forevermore!

"29th. Had an afflicting meeting here; and on the 30th crossed the river, and attended a little meeting not much better. We had nothing to glory in, but in this,—that we were accounted worthy to suffer with the suffering seed. This indeed is a favor which might give rise to joy and rejoicing, and ever keep us willing to follow the Master, and willingly to suffer with Him who hath said, 'Where I am, there shall my servant be.'

"31st. Parted with our endeared friend and brother Isaac Parker, he having served us for a pilot for several days past. We this morning had with him and some other Friends an opportunity, which I think may be said to have been one memorable to some of us.

"8th mo. 1st. We had to travel a rough fatiguing road. After night got among Friends, wearied indeed. Yet we found renewed occasion to magnify that Power who doth continue to furnish us with a resting place in the needful time. Praised be his worthy Name forevermore!

"21. Attended Enwamy meeting, it being their meeting day. There was no public notice. I was glad of this opportunity with them more select from others; and being enabled through my Master's help to use plainness with them on several heads, my mind was much relieved. My only Helper had all the praise of his own works.

"31. Not feeling easy to proceed without having a public meeting, notice was seasonably given; and many being gathered, we were favored, through Divine help, with a time that I trust will prove profitable to many of the parties concerned.

"4th. Were at Back Creek to a good degree of satisfaction.

"5th. At Holly Spring. Here a portion of hard labor was dispensed to me, causing, I think I may say, the largest drops of sweat to issue through the pores of my feeble frame, that I ever remember. To the praise of my sure Helper, I was enabled to get through to the relief of my own mind at least. It felt to me that there were not living enough here to bury the dead. They appear to have gone out of the way of righteousness, and it seemed notwithstanding the plain outward show of some of them, as though they were none that rightly pleaded for the cause of truth, or mourned for the desolations of Zion; but were at ease; under the name to live, while they were dead to the substance of religion. What will become of such dry, lukewarm, insipid professors as these, in the day when they must give an account of their stewardship, unto Him who is not, nor ever will be partial to the workmanship of his hands? What can they expect better than to be spewed out of the Master's mouth, in the day when they that are 'filthy shall be filthy still, and they that are holy shall be holy still.'

"6th. Was at the Ridge Meeting, and 7th at Eno. At these last two meetings there was some encouragement to hope there were some alive of Jacob's wrestling seed. May the number of these everywhere increase, and their faith be made strong.

"9th. Returned back on our journey to take the Quarterly Meeting at Spring Meeting-house.

"10th. Attended the Select Meeting; and on the 11th the Quarterly Meeting for business. Both of these tended much to the relief of my mind, and afforded renewed cause to thank God, and take courage to press through troops of difficulties in outward fatigue, in order to accomplish the arduous task designed for us by a good Master, who has hitherto helped us. O my soul! for all these unmerited favors give Him all the praise forever. An may his people do the same. For he is worthy of thanksgiving and renown for a our benefits!

"12th. At Spring Meeting again. A high favored, heavenly meeting I think this may be said to have been, to the praise of the Author thereof.

"13th. At South Fork—not much information.

"14th. At Cane Creek, also favored. In the evening went home with our much honored friend and father in Israel, David Vesta. Here we were as children kindly received at their father's house. For all these favors O righteous Father! enable us, who are unworthy thereof, to magnify thy name.

"15th. At Rocky River, 16th at Providence, and 17th at Concord. At all these meetings, through Divine aid, in deep searching exercise, I was enabled in much plainness to clear my mind to the several states then present, trust to the honor of the great cause, and satisfaction of those who feel it dear unto them. Praises to Thy name, O my Father. Be near to help thy dependent handmaid for days to come, as thou hast in days that are past: so that, through all, thy cause may be promoted, and Thy great name magnified.

"18th. At Center, it being their Monthly Meeting. A favored time to the relief of my mind.

"19th. At Marlboro—also favored through deep exercise and Divine help.

"20th. At Springfield; where as at many other places, through my Master's help, I was enabled to feel the different states, and administer unto them to my own relief, and as far as I know to the satisfaction of the living. These have had, with my soul, I doubt not in the course of this journey to say, 'This is the Lord's doings, and marvellous in our eyes,' that He should open the deep mystery of His kingdom to a little child. His power is thereby the more made manifest, than when an orator is called to advocate His cause. What am I, O my Father, that thou shouldst thus make use of me in this great work! Ye adored forever be thy worthy Name! If I am weak, Thou art strong; if I am nothing, Thou art all things unto me; and I trust Thou wilt ever be, whilst thou hast all my heart. Leave me not one moment, and then shalt thou have all the praise of thy own works.

"21st. We are now favored with the company at his own house of our well beloved friend and brother Nathan Hunt, with his dear wife and children. Oh, the many favors conferred, claim the warmest gratitude of my heart; and I doubt not that of my dear companions also.

"22d. Were at Kennett. Here I think may say through Divine help, we were favored with a heavenly baptizing time, to the refreshment of many of our minds."

On the 23d M. Ratelif was at Deep River Particular Meeting; and after visiting several others, not far distant from thence, she returned to Deep River, and attended the Monthly Meeting on the 3d of Ninth month

which she thus alludes: "This, I think, is precious Monthly Meeting. May it be so in the Master's sight. O my soul! mayst thou with his people dwell in his power, ing, hitherto he has helped thee thus far to clear and easy.

4th and 5th. Rested, wrote letters, and fed the afflicted.

6th. Attended their week day meeting, which I hope I had, through my Master's, good service.

7th and 8th. Was at the Select and Quarterly Meetings to good satisfaction: and on 9th attended a large public meeting at the same place. This was a heavenly, baptizing one. I hope by many minds it will not easily be forgotten.

10th. Started on our way to Hunting Creek, and had a hard travel. On the 11th ended that meeting. Here also I trust the Master's name was magnified. After meeting, visited an ancient afflicted Friend.

12th. Was at Brushy Mountain, 13th at Dry Creek; and on the 14th, after a hard travel through much rain, reached Hovers on our way to Westfield. Had to take my travel out of our way to get to a ferry, river being too full to ride through.

15th. Very weary with travelling over high roads, reached the house of our very dear friend J. W.'s.

16th. Attended Westfield Meeting, it being last in North Carolina.

(To be continued.)

Adventure in the Mammoth Cave.

When describing the Maelstrom, the name given to a deep and dark pit in the bottom of the cave, Dr. Forwood introduces the following narrative.

In connection with the Maelstrom, we cannot refrain giving the graphic and thrilling account of the adventure of William Courtland Prentice, son of George D. Prentice, Editor of the Louisville Journal,—who was an officer in the Confederate army, and was killed in a raid on the banks of the Ohio, in 1862, referring to his untimely death, the "Journal" said: "He loved to seek the wildest and most interesting portions of Kentucky. Repeatedly went far up among the bald and desolate crags of the cliffs of Dix River, a region haunted by the bear, the wild-cat, and the mountain. The piercing scream of the screech owl, even then, was a sound of rapture to his ear. He was ever in search of natural curiosities, and he discovered and explored several previously unknown, in all probability, to any man of our generation, and in one of them he found immense numbers of human bones that seemed to him to have belonged to a different order of beings from any now on our continent. He subsequently became familiar with the Mammoth Cave as the seat of its guides. An adventure of his in that subterranean realm attracted much attention for years ago. An account of it was published in our columns, and, as we have often requested to publish it, we will do so now.

At the supposed end of what has always been considered the longest avenue in the Mammoth Cave, nine miles from its entrance, there is a pit, dark and deep and terrible, known as the Maelstrom. Tens of thousands have gazed into it with awe while Bengal lights were thrown down to make its fearful depths visible, but none had ever the daring

to explore it. The celebrated guide Stephen, who was deemed insensible to fear, was offered six hundred dollars by the proprietors of the cave, if he would descend to the bottom of it; but he shrank from the peril. A few years ago, a learned and bold man resolved to do what no one before him had dared to do; and making his arrangements with great care and precaution, he had himself lowered down by a strong rope a hundred feet, but at that point his courage failed him, and he called aloud to be drawn out. No human power could ever have induced him to repeat the appalling experiment.

"A couple of weeks ago, however, a young gentleman of Louisville, Wm. C. Prentice, whose nerves never trembled at mortal peril, being at the Mammoth Cave with Professor Wright, of our city, and others, determined, no matter what the dangers might be, to explore the depths of the Maelstrom. Mr. Prentice, the enterprising proprietor of the cave, sent to Nashville, and procured a long rope of great strength expressly for the purpose. The rope and some necessary timbers were borne by the guides and others to the points of exploration. The arrangements being soon completed, the rope, with a heavy fragment of rock affixed to it, was let down and swung to and fro to dislodge any loose pieces of rocks that would be likely to fall at the touch. Several were thus dislodged, and the long-continued reverberations, rising up like distant thunder from below, proclaimed the depth of the horrid chasm. Then the young hero of the occasion, with several hats drawn over his head, to protect it as far as possible against masses falling from above, and with a light in his hand and the rope fastened around his body, took his place over the awful pit, and directed the half-dozen men, who held the end of the rope, to let him down into the Cimmerian gloom.

"We heard from his own lips an account of his descent. Occasionally masses of earth and rock went whizzing past, but none struck him. Thirty or forty feet from the top, a cataract from the side of the pit went rushing down the abyss, and as he was in the midst of the spray, he felt some apprehension that his light would be extinguished; but his care prevented this. He was landed at the bottom of the pit, a hundred and ninety feet from the top. He found it almost perfectly circular, about eighteen feet in diameter, with a small opening at one point, leading to a fine chamber of no great extent. He found on the floor beautiful specimens of black selix much larger than were ever discovered before in any other part of the Mammoth Cave, and also a multitude of exquisite formations as pure and white as virgin snow. Making himself heard, with great effort, by his friends, he at length asked them to pull him partly up, intending to stop on the way and explore a cave, that he had observed, opening about forty feet above the bottom of the pit.

"Reaching the mouth of the cave, he swung himself with much exertion into it, and, holding the end of the rope in his hand, he incautiously let it go, and it swung out apparently beyond his reach. The situation was a fearful one, and his friends above could do nothing for him. Soon, however, he made a hook of the end of his lamp, and, by extending himself as far over the verge as possible without falling, he succeeded in securing the rope. Fastening it to a rock, he followed the avenue

one hundred and fifty or two hundred yards to a point where he found it blocked by an impassable avalanche of rock and earth. Returning to the mouth of this cave, he beheld an almost exactly similar mouth of another on the opposite side of the pit, but he being able to swing himself into it, he refastened the rope around his body, suspended himself again over the abyss, and shouted to his friends to raise him to the top. The pull was an exceedingly severe one, and the rope, being ill-adjusted around his body, gave him the most excruciating pain. But soon his pain was forgotten in a new and dreadful peril.

"When he was ninety feet from the mouth of the pit, and one hundred feet from the bottom, swaying and swinging in mid-air, he heard rapid and excited words of horror and alarm above, and soon learned that the rope by which he was upheld had taken fire from the friction of the timber over which it passed. Several moments of awful suspense to those above, and still more awful to him below ensued. To them and to him a fatal and instant catastrophe seemed inevitable. But the fire was extinguished with a bottle of water belonging to himself, and then the party above, though almost exhausted by their labors, succeeded in drawing him to the top. He was as calm and self-possessed as upon his entrance into the pit; but all of his companions, overcome by fatigue, sank down upon the ground, and his friend Professor Wright, from over exertion and excitement, fainted, and remained for some time insensible.

"The young adventurer left his name carved in the depths of the Maelstrom—the name of the first and only person that ever gazed upon its mysteries."

Dr. Forwood was informed by the guides that since the occasion of Prentice's descent, two other parties have been bold enough to incur the same hazards—one an Englishman and the other an American.

For "The Friend."

Westtown School.

An esteemed Friend, who in former years was connected with this interesting institution, has forwarded for insertion in "The Friend," the following extract from a letter received years ago from our late valued friend Wm. Evans. The note accompanying it, after expressing the belief that the views contained in it are the only ground of safety for any of us, adds: "My heart often yearns toward Westtown, with sincere desires, that it may be preserved upon the original foundation; and those concerned in the conducting of it, be kept in this holy fear."

Philadelphia, 1st mo. 8th, 1856.

My Dear Friends,—I have recently returned from a visit to Westtown, in company with some other Friends; the remembrance of your acceptable services in that Seminary revives pleasant feelings, and I doubt not that the retrospect of time passed there by you, affords agreeable reflections. Conducted under a religious concern for the best welfare of the dear children, it is an Institution that confers important benefits upon them; the impressions which many receive there will doubtless have a useful influence in after life, and we may hope contribute to their growth in a religious sense. It is not only necessary that the Teachers and Caretakers be properly qualified to instruct them in the different

branches of learning, but they should know the regulating power of Truth in themselves, to keep them under a degree of religious exercise for their own growth, and also to fit them to govern, and lead the scholars in the path of holiness. I have often thought that the plain old fashioned religion of the founders of that Seminary, which consisted much in a proper self-denial, and the daily cross borne in humility, has had great effect upon the character of the Institution. The Committee and Teachers must be actuated by the same simple, humble religion, from a principle and conscientious conviction of its being their duty to maintain it *everywhere*, and to apply its principles and requisitions in the government of the school, if it continues to flourish and to produce the beneficial effects, which it has had on very many. Many Friends, I believe, hold these views, and feel strong desires that no other standard may be set up for its control. On no other ground can we hope for the Divine blessing upon our labors, than a steadfast adherence to the simplicity and the spirituality of our profession, and without the Lord's blessing and his protecting care, we cannot expect the preservation of the dear children from contamination by temptation and evil example.

I thought you would feel an interest in the old concern in which you had faithfully labored; and I have at many times felt much sympathy and affection for you, my beloved friends, under the afflictions you have had to endure, and desire that the Lord, in his tender mercy, would support and carry you through them, to his praise and your everlasting welfare.

With love, I remain your sincerely attached friend,
Wm. Evans.

Selected.

THE BRIGHTER DAY.

Faith, give me power to see a brighter day,
When all these "jangling things" shall pass away;
When the carnival which has no end in view,
Shall pause in silence, all its purpose done;
When the oppressors of the seed, shall wear
The mask no longer, all their acts laid bare;
When chaff and cheat shall to the wind be doomed,
And cross and stable be by fire consumed;
When to the world the worldly part is given;
When the redeemed shall close walk with Heaven;
When to our Zion shall the weary come,
Like "doves to windows," pressing to their home,
Oh, haste the day, when through his power divine,
The Father's light around his church shall shine!

Many there are whose prayers arise for this;
Whose greatest joy would be in Zion's bliss;
Whose morning breathing, and whose evening prayer
Is that the Lord would place his glory there.
What to the worldly spirit has crept in,
That faith the kingdom through new ways would win,
Scorning the narrow path our fathers trod,
And circling round would pass the cross and rod—
Yet they who look from Pisgah's height can see,
Such by-paths lead away from Calvary.—
When they who seek in empty forms for bliss,
Will stop at shadow, and the substance miss,
No, no!—as ancient Pennock's clearly saw,
Still with this people shall abide the law;
Still shall the testimony here be found,—
Still sons and daughters to the altar bound,
The Lord himself his attributes shall take;
Again shall order out of chaos be made,
Then shall the church in rapturous numbers sing,
And shout victorious as she owns her king;
While those who seek to draw her from the way,
Themselves shall lose in error's paths astray."

The Arm Chair.

* Caleb Pennock, upwards of 90 years of age, recently addressed the young men of his Monthly Meeting in a very remarkable manner, expressing his belief that the doctrines of this Society would not be suffered to fall.

LESSONS OF THE FLOWERS.

Selected.

Every flower is sweet to me:
The rose and violet,
The pink, the daisy, and sweet pea,
Heart's-ease and mignonette,
And hyacinths and adonises;
But sweetest are the spottless lilies.

I know not what the lilies were
That grew in ancient times—
When Jesus walked with children fair
Through groves of eastern climes,
And made each flower as He passed by it,
A type of faith, content, and quiet.

But they were not more pure and bright
Than those our gardens show
Or those that shed their silver light
Where the dark waters flow.
Or those that hide in woodland alley
The fragrant lilies of the valley.

And I in each of them can see
Some lesson for my youth;
The loveliness of purity,
The statelyness of truth,
When'er I look upon the lustre
Of those that in the garden cluster.

Patience and hope that keep the soul
Unruffled and secure,
Though floods of grief beneath it roll,
I learn, when calm and pure
I see the floating water-lily,
Gleam amid shadows dark and chilly.

And when the fragrance that ascends,
Shows where its lovely face
The lily of the valley heds,
I think of that sweet grace,
Which sheds within the spirit lowly,
A rest, like heaven's, so safe and holy.

For "The Friend."

From the Letters and Papers of John Barclay.

(Continued from page 31.)

A Testimony from Gracechurch Street Monthly Meeting of Friends, concerning John Barclay.

"Blessed are the pure in heart, for they shall see God."—Matt. v. 8.

This, our dear friend, was the son of Robert and Ann Barclay, and was born at Clapham, in Surrey, in the year 1797. His parents were members of our religious Society; his mother died whilst he was very young.

From his own memorandums we find that he was early visited with the convictions of divine grace; but becoming exposed to the influence of bad example at a public school, the sinful propensities of the natural mind were strengthened; and the strivings of the Holy Spirit were graciously continued, and he was often brought into deep humiliation and sorrow on account of his transgressions; and his tears of repentance and his prayers for preservation were poured forth in secret places. In reference to the state of his mind at this time he says: "As the evil tree cannot but bring forth evil fruit, as long as it is suffered to live and thrive in the heart; so this being the case with me, the fruits did show themselves abundantly indeed. Oh! that all who have been injured by my evil example could be shown a fiftieth part of the remorse and repentance, sorrow and trouble, which has been, through unutterable mercy, experienced by me." He was made willing to abide under the judgments of the Lord, and was favored to know, that these chastisements from his heavenly Father's hand were administered in love; in a sense of which, his heart was often made to overflow with thankfulness; and he was brought into a state of submission to the Lord's will, and humble

dedication to His requirements. Alluding, some years afterwards, to the circumstances of this eventful period of his life, he writes thus: "This I may say and leave upon record, that though many almost indescribable temptations and presentations of evil have been permitted to come about me, sometimes like mighty flood, so that in hours of extrem weakness, I have been many and many a time ready to give up the 'fight of faith,' yet t this day the Lord, strong and mighty, has been pleased in his abundant compassion, to encamp around me, and to give me songs of deliverance, songs of triumph and of praise. In His name will I set up my banner; who! a rock of defence, and sure refuge to my poor weary soul. O! young man or young woman to whom this may come,—my friend, m brother, my sister,—who art seeking the better country, and Him who is the way and the guide; oh! though thou art weary and heavy laden,—take courage: there is a staff, a stay and strength and succor with Him and I Him, who hath gone before, and who leader on his little ones gently and sweetly, as the are able to follow. Take this as the compass of one who writes from a *sure and living experience*, and who hath indubitably known His name (which is above every name) to be a strong tower indeed. He will be with *His* even to the end of the world."

His mind for several years after his father's decease, was brought under much concern on the subject of business; and he felt it to be his duty to give up an offer, which was considered to be very advantageous. In a retrospective view of this step, he says, in a letter: "I know not that I have taken any measure that now in seasons of calmness seems to afford the like peace to me." Alluding to this subject again, he adds: "The ground upon which I think it best for me to be not engaged with the things of this life is, the having experienced no small share of the forbearance and mercy of the Lord,—having been delivered from the pit of destruction, having sincere, hearty, and very fervent desires for my own preservation and salvation as well as for that of my poor fellow-creatures everywhere,—I have inclined towards the belief, that the Lord will make use of me, I am faithful to his requirements, in the way, time, and for the purposes which He sees best under this impression it is, and not to encourage or give way to an apathy, or want of energy or exertion, that I believe it right for me to sit loose to this world and the anxieties thereof; lest I should be incapacitated for performing that service which may be shown to be my duty. I believe it safest for me, if any business, that it should be one of moderate profit, and not involving much attention."

He believed himself required to observe much simplicity and moderation in providing the needful accommodations of life; and in reference to this subject, he says, "I am clear of the belief, that it is my duty to live in such a humble, plain, homely, simple manner; that neither in the furniture, food, or clothing used, any *misapplication of the gifts of Divine Providence* be admitted or encouraged."

About this time, which was in the twentieth second year of his age, he writes thus: "The love that the Lord hath shed abroad my heart!"—"O! the divine joy, the unspeakable peace, the blessed presence of the Most High,—how it seems to flow through m

king up for all trials, and tears of disquiet and distress!—O! my this feeble testimony speak out His adorable mercy, when poor frail flesh shall be laid low in the dust, may it induce others to fear Him that is of the heavens and the earth, and to trust in Him forever! Praises to the Lamb that has slain!—Amen.”

Early in the year 1820, he believed it right for him to move from the family circle, and reside for a time at Poole in Dorsetshire; about the end of the same year, he was married to Georgina Hill. Their union was happy, for in less than three years, his dear companion was taken from him by death, at Poole in Cornwall; whither they had retired for the benefit of her health.

(To be continued.)

For "The Friend"

Annual Report of the Associated Executive Committee of Friends on Indian Affairs.

This Report contains a large amount of information which will be interesting to the readers of "The Friend." The work undertaken by Friends is great, and involves much responsibility. We hope it may be blessed to the one who have entered upon it, and to the lives for whose welfare it is undertaken, to propose giving the greater part of the relief in our columns.

From the date of our first Annual Report to the month of last year, The Associated Executive Committee of Friends on Indian Affairs continued their attention to the duties devolving upon them. They have met once again at Baltimore, in 3d mo., and a number of them attended a called meeting of the Washington Committee, on the 27th of 1st mo., at New York. At each of these meetings various important matters were considered and disposed of with such ability as was afforded. One of our number, in company with Superintendent Hoag, and our general agent, died during last year nearly every one of our Agencies under our care, and another of our Committee spent most of the summer at Cheyenne and Arapahoe Agency and devoted himself to the best interests of the Indians there.

We deem it important, in the first place, to call the attention of Friends to the field of labor. The entire domain from the State of Missouri to the Rocky Mountains, and from the British possessions to the Red River of Texas, is divided into six districts, called Indian Superintendencies. The *Central Superintendency*, which is our field of labor, embraces all the area of Kansas and of the Indian Territory, consisting of about 114,000 square miles, a large portion of which is unexplored, untraversed by railways, and difficult access, not only for these reasons but because of many streams unprovided with bridges, ferries, and frequently so swollen with water as, for a time, completely to obstruct travelling and transportation. Some of these streams are very treacherous by reason of quicksands; and much difficulty, and some danger, result from this cause.

The most of the Indians occupying the northern portion of the Indian Territory are to a considerable extent, civilized, and capable of managing their own affairs; this may be said of the Cherokees, Creeks, Seminoles, Choctaws and Chickasaws. They are not specially under the care of Friends; other denominations have

charge of their educational and religious institutions, and their agents report directly to the Indian Bureau. Superintendent Hoag is required, however, to preside over their General Council, and to attend to such other matters pertaining to their interests as may from time to time be committed to his care by the Department of the Interior. Much might be said of these Indians, of a highly interesting character, but we have not space for details. They number about 50,000.

"The remainder of the Indians in the Central Superintendency, numbering about 20,000, and scattered from Northeastern Kansas to the southwestern part of the Indian Territory, are under the immediate care of ten agents, each of whom is required to make a quarterly report of the financial affairs of his agency to the Superintendent, in whose office these reports are carefully examined, and thence forwarded to the Indian Bureau at Washington, and in this and other offices of the Interior Department they are carefully inspected and audited. Each agent also makes a written annual report of the condition of his Indians in all their varied interests; and the Superintendent also reports annually to the Commissioner of Indian Affairs. In these annual reports it is the privilege and duty of the superintendent, and agents, to make any suggestions to the department which they may believe would tend to promote the welfare of the Indians, or to facilitate the benevolent designs of the Government.

"We give the following synoptical statement of the condition, numbers, &c., of the Indians at the several agencies, as derived mostly from recent reports to our general agent:

"The *Kickapoos*, under agent John D. Miles, number 307, and are located in Atchison and Brown Counties, Kansas. Very few of these are blanket Indians. Their habits are good as compared either with other Indians, or with their white neighbors. The men work on the farm, and the women attend to their household affairs. * * * * *

"The educational interests of this tribe will soon be still better cared for by the opening of a boarding school. This has been delayed by the absence of the agent and principal chiefs under instructions from the department to visit Mexico and persuade the Mexican Kickapoos to return to the Indian Territory. These Indians in company with Mexicans have long been engaged in raiding into Texas, and the Government is desirous of preventing this trouble by encouraging them with the offer of a home. But the Mexican authorities and people are exceedingly opposed to their removal, and the Indians themselves are very suspicious of the motives of our Government. * * * * *

"The *Shavonees* have mostly removed to the Indian Territory, but their unenclosed business is still in the hands of agent Reuben L. Roberts. That of the Miamis has also been transferred to him; James Stanley's agency having been discontinued, on account of the removal of most of the Indians belonging to it to their new homes in the Quapaw special agency. * * * * *

"The *Pottawatomies*, under agent Joel H. Morris, number only 350, a considerable part of the tribe having become citizens, and received their allotments of land and their respective portions of tribal funds. "The *Prairie Band*" now constitutes the tribe proper,

and is located upon a reservation 11 miles square, in Jackson County, Kansas. Nearly one-half are blanket Indians, and nothing has yet been done for their educational or religious benefit. The residence of the agent is too far from the Indians for him to exercise much beneficial influence over them. Estimates for agency and school buildings, to be erected on the reservation, have been forwarded to the department and returned without approval, on the ground that the Pottawatomies will probably soon remove to the Indian Territory. Sanction is, however, given to the erection of cheap, temporary school-houses; but this will be useless without dwellings at which the teachers can board. The agent should by all means live upon the reservation. We shall continue our efforts for the inauguration of schools amongst this much-neglected people.

"The *Kansas*, or *Kaw* tribe under agent Mahlon Stubbs, numbers 607, and owns a tract of over 30,000 acres of very valuable land in the valley of the Neosho, southward from Council Grove, Kansas, the remainder of their possessions has recently been sold under treaty provision. The whole number of children who have attended the Kaw mission school the present year is 35, with a very creditable average, under the circumstances, of 20.

"Agent Stubbs has been holding religious meetings with these Indians on First-day afternoons and endeavoring to instruct them in the truths of divine revelation. They are mostly blanket Indians and full of superstitious notions, but when collected they manifest a willingness to hear the gospel. We trust that the exertions of the agent, and his fellow-workers in this direction, will not be fruitless of good. These Indians sent a delegation with their agent, last autumn, into the Indian Territory to select a reservation, but as Congress took no action last winter to authorize the sale of their lands, on the Neosho, they are much discouraged. We still think their interest might be promoted by removal, provided the Indian Territory be kept free from white settlers.

"The Great and Little *Osages*, under the care of agent Isaac T. Gibson, number about 350. They are mostly blanket Indians, and obtain their subsistence largely from the plains. Since our last report they have removed from their former location, in the southern part of Kansas, to the Cherokee lands, west of the 96th meridian. The efforts of their agent in establishing schools, and in other beneficial work amongst them, have been greatly impeded by the failure of the government hitherto satisfactorily to locate the line of 96°. Hostile incursions of white people and the introduction of whiskey amongst these Indians have been fruitful sources of very serious trouble in their management. One school has been in operation for two months with an enrolment of 27. It is difficult to secure regular attendance, but there is improvement in that respect. The Roman Catholics have made earnest efforts to convert to their faith and civilization these tribes within the last 25 years, but amongst the full-blooded Osages they have had very little success, their pupils all most invariably relapsing into their previous wild habits upon leaving school. There are, however, about 225 mixed bloods who have adopted the habits of civilized life, and are men and women of average intelligence and education. * * * * *

(To be continued.)

For "The Friend."

To the Editors of "The Friend":—

Your Journal of Fifth month 13th, 1871, has been placed in my hands, containing a notice of a work on the Scriptures, which seems to require some explanation or comment from me. I know nothing of the work except from your review; but, as a member of "that Society commonly called Hicksites," am deeply interested in the subject-matter of your remarks. The separation of 1827—8 occurred during my non-age, and my connection with this portion of the original Society of Friends was, like that of thousands more, the result of circumstances and surroundings. I yield to none, however, in the heartfelt desire that Truth may be cleared of calumnies, and in this feeling will ask for space in "The Friend" to explain the reason of such an incongruity as that of my religious co-membership with the author of such a work as is set forth in your article.

Shortly after that separation, our Society changed the constitution of the Meeting for Sufferings as a censor or supervisor of the press. Its duties are, in this respect, thus defined by our Discipline: "2nd. To procure and distribute such books or pamphlets as may be a means of spreading the knowledge of our religious principles or testimonies; and to advise or assist any of our members, on their own application, who may incline to publish any such manuscript or work as may tend to promote the cause of Truth, or be beneficial to Society." This change, so entirely in accordance with the spirit of the age and the law of the land, leaves every individual at liberty to publish, and, of consequence, to dedicate his work as he may please. An attempt, however, "to undermine all belief in the authenticity of the Holy Scriptures," "to destroy belief in the deity of Christ," and "to promulgate anti-christian sentiments," is an offence clearly defined and to be testified against, in the usual order of our Society. This you charge against the author under review, and such an attempt should meet with a prompt denial of religious fellowship, if persisted in, on the part of any body claiming to be the Society of Friends.

So far as the Yearly Meeting, of which I am a member, and the five Yearly Meetings with which it corresponds are concerned, I aver that they profess to uphold in their integrity, the principles, the doctrines, and the testimonies of primitive Friends. Prior to the great division of 1827, there were many volunteer exponents of those principles, whom you, equally with myself, would repudiate as authorized promulgators thereof. The writings of Joseph John Gurney, on the one extreme, and the published letters of Elias Hicks on the other, would, doubtless, find no more a reception into your index of the hagiographa than into my own. And throughout the countless controversial pamphlets which followed that disastrous event, I know of but little that could profitably be rescued from the oblivion to which such a literature should ever be consigned.

I need scarcely affirm our belief in the authenticity of the Holy Scriptures, since close upon our borders as on yours, the First-day school associations are actively engaged, in imitation of the community at large, in teaching and disseminating the contents of that volume. A more profession of belief is, I am

aware, of little value without the qualification to understand these writings; and, I fear, there is in such efforts more the activity of the natural than the spiritual man. So, also, touching a professed belief in the Divinity of Christ, that staple of controversy throughout ecclesiastical records. You will refer me to such writers, members with me, as the one you have reviewed. I answer, let facts speak for themselves. I will quote from George Fox's Journal, vol. II, p. 294, published in 1800 by Isaac Collins, at New York, what I consider authoritative as the belief of Friends on this subject. He there informs us that he wrote thus to discover of what spirit the candidates for office were. "Do any here in London, who stand to be chosen sheriffs, own that Christ, who was crucified without the gates of Jerusalem, to be the light of the world, that enlightens every man that cometh into the world," &c., &c. And also from an old copy of T. Ellwood's Life, page 442, where the writer says: "He," i. e. George Keith, "has undesignedly acquitted William Penn from his present charge of Deism, by a story he told in his first narrative, page 38. That upon some urging him to give an instance of one English Quaker that he ever heard pray to Christ: W. Penn being present, said, I am an English man, and a Quaker, and I own I have oft prayed to Christ Jesus: even him that was crucified."

Now the biographer of Wm. Penn attended our Yearly Meeting some few years since, with a minute of concurrence from his own—sat near the clerks, and closed the last sitting with prayer to "Christ Jesus—even him that was crucified." In his language was, "Teach us to pray as thou didst thy disciples formerly."

I state the fact as it occurred, simply because of the coincidence. The occasion was unusually solemn. A very large and greatly favored assembly was about to separate, and the most appropriate organ seemed more than authorized to speak for the whole. I need scarcely remind your readers of the peculiar difficulties under which Friends labor in getting at the sense, or feeling, or conclusion of a meeting when there is any jar or controversy. The certificate of a clerk—the official imprimatur of a body like your Meeting for Sufferings, may set forth definitively what language can convey; but there is a feeling which has no fellow witnessed at times in these assemblies, and more authoritative than all formality and form—and it was manifest in this instance. I could multiply such, did space permit, apart from referring you further to our Discipline, recently republished, which, in these respects, stands as before the separation of 1827.

There can be no doubt of the fact that a larger license is to be found among us than is consistent with that lofty profession made by the people of God, in scorn called Quakers. It may be presumed that we took all the ranters of the Society at the separation, and, as a result, have had to contend with their spirit ever since. Nevertheless, the discipline and the order have been maintained. Those engaged in publishing matter calculated to undermine these have been disowned—memorably so in New York; and here a Friend, in persisting to preach against the advice of the elders, though the matter of her communications, and her general course otherwise were unobjectionable, was most decisively, I may

say unanimously, testified against at the final conclusion of her case in the Year Meeting. Although separations, or more properly, secessions, have occurred in several of our Yearly Meetings, they have, like those of Wilkinson and Story, in England, and of the Free Quakers in our revolutionary war, invariably come to naught. True, the door return has been kept more open on these occasions, than consists with the ordinary administration of the Discipline; but we have felt that great patience and long-suffering amid these trying storms, are better remedied than that party strife which culminates in schism. I do not wish to convey the idea that we are either a strong or a united people; but I trust, that notwithstanding such books as you have noticed, (if there be others,) and our expression sometimes little less offensive, we are not forsaken by Him who "roughsaw again" a new revelation of the good old gospel "to our primitive worthies some two centuries since."

The fact that those two centuries had nearly elapsed before the convulsion took place which shivered the body into fragments, since the multiplying still more hopefully, must sink deep into the heart of every sincere professor of our principles. We should be no less isolated now than at that early period, from the outward priest and the hireling, with his unfruitful works of darkness. On each and every one of us, members of Christ's militant church, does a portion of responsibility rest for its defective manifestation of His spirit and power.

Sincere-hearted, earnest inquirers, such as Frederick Lucas, among Friends, and John Henry Newman, among Episcopalians, have been compelled, by the logic of their principles, to recognize this manifestation in the outward Catholic or universal church, as historical unit, consistent and complete in its parts. For the soul, awakened to a sense of its lost condition, seeks for strength and nourishment in religious fellowship; and little they know of its workings through the thick covering of an unregenerate state of nature who undervalue the teachings and the aid of the visible church. A people professing, we do should, of all others, however diversified the gifts, the constitution, and the progress of its individual members, exhibit the fruits of the unity we claim, as subject in our movements to the immediate direction of the one ever-present Head. I cannot, therefore, look for any other future in the history of Friends than a mutual co-operation—a de-gathering. You may smile at this sentiment, uttered by one in such outward church connection as is here confessed. But we cannot live on our past history. The prophetho furnished, of moral purity and faith-sighted philanthropic enterprise, will not counterbalance the too evident antagonism of kindred, if not identical profession. There are many organizations claiming to represent the Society of Friends must ever make its usefulness in opposing the rulers of the darkness of this world. The prophecy of our great Apologist seen not likely to be fulfilled unless that "little spark" which appeared his day, shall consume what stands up to oppose it among his co-professors; and in unit alone, of the honest-hearted, may we hope that the Lord will "go on by the same as of power in his spiritual manifestation, until he hath conquered all his enemies, until

kingdoms of the earth become the kingdom of Jesus Christ."

JOHN J. WHITE.

ilada., 9th mo. 13th, 1871.

In justice to the writer of the foregoing communication we have given it a place in our numbers. The book reviewed in the 38th number of our last volume, has been for months before the public, and notwithstanding what is said by our friend, J. J. W., as its own claims to be a "member of the Society Friends," and dedicates his work to "the city of Friends," we cannot see how the writer with which he is in membership—which we will be "the Society of Friends," will be held by the public accountable for the sentiments contained in it, unless they fully disown those sentiments. As we are in our notice of the work, we would be glad to believe there are not many who relate the notions of that author, and we are glad the essay now given corroborates the former expressed.

To embrace this opportunity to commend the serious consideration of the members of the Society to which our friend J. J. W. belongs, the following extract from the epistle read by "The Yearly Meeting of Friends, in Philadelphia" in 1863, addressed to our members and to the members of other Yearly Meetings.

Impressed with the awful consequences we may attend doubt or disbelief of these elemental truths of Christianity in any who neglect the Holy Scriptures which set them forth, and who make profession of the indwelling of the Holy Spirit, it is our hearty desire and prayer, that those who were formerly members in our religious Society, but stumbled at these doctrines and went out from us, laying aside all traditional bias and prejudice of the carnal mind, would heartily embrace them and stand before the world as faithful believers in, and open advocates of Deity, Atonement and Mediation of Christ as our Lord. It would truly be a cause of grief to Friends everywhere, were all who take their name, one in faith on these points, and on all other doctrines of the gospel."

EDITORS.

being offended with those who fall into temptation.—It is of the infinite mercy and compassion of the Lord, that his pure love is any of us, and it is by the preservation of that alone that we stand. If He leave us any time, but one moment, what are we? who is there that provoked Him not to fight? Let him "throw the first stone" at that which falls.—*J. Penington.*

dence of entire disregard of the first principles of justice and honesty prevailing among very many in the community, and that the tone of public morals must have become greatly debauched. Where the crime is more startling and stupendous than ordinary, the voice of reprobation and the demand for reformation may be roused, and occasionally the culprits are brought to some kind of punishment; but more generally, though there may be strong animadversion for a short time the matter is soon passed by, and the low state of morals it betokens is little noticed or commented on.

In the visions of light vouchsafed to the apostle John, and recorded for the warning and instruction of succeeding generations, it is stated he saw a beast come up out of the earth, who caused "all, both small and great, rich and poor, free and bond, to receive a mark in their right hand or in their foreheads: and that no man might buy or sell, save that he had the mark, or the name of the beast, or the number of his name." Doubtless Satan is striving thus to consummate his reign among the children of men, and alas! he has met with great success in the marts of commerce, in the offices of trust and profit, and in the seats of political power. Living as we do in the midst of such great dereliction of the principles of justice and strict honesty, when so many betray that the mark of the beast is in their right hand, while others boldly and arrogantly walk abroad with it on their foreheads, how great is the responsibility of those who claim to be the converted followers of Christ, and how needful that their whole life and conversation should show to all around them that they are fighting under the banner inscribed with "holiness unto the Lord." To the members of the religious Society of Friends, those who are not ashamed to show to others with whom they associate, by their garb, their language and manners, that they profess the spiritual, self-denying religion of the gospel as promulgated by Fox, Barclay and Penn, the obligation to commend their religion "to every man's conscience in the sight of God," should never be lost sight of. They should ever remember that their religion—if realized—is far different and far deeper than a profession with the mouth, or any external profession; that it is the result of that interior spiritual communion with and obedience to the measure of Divine Grace, vouchsafed by the Author of eternal redemption and salvation, and that He has commanded them so to exemplify this, that they may be as lights in the world, "that others seeing their good works may glorify their Father which is in heaven." Those who have lived faithful to this holy profession, from the first gathering of the Society, to the present day, have found the teaching and transforming power of Christ within, their hope of glory, to bring them out of the spirit of the world, and restrain them from becoming absorbed by its ensnaming pursuits, either of riches or of pleasure, and to keep them constantly on the watch unto prayer, even after they "had gotten the victory over the beast, and over his image, and over his mark, and over the number of his name."

We suppose it will hardly be disputed that worldliness has crept in and obtained strong hold upon Friends as a Society; widely and mournfully so when compared to their condition in days gone by. Riches have increased

among us, and their usual companions, luxury, vanity and pride have not been excluded. The manners and ways of worldlings have found many advocates, and that which made Friends a peculiar people, not only in appearance and language, but in life and example, is spoken lightly of by many, and little heeded by others. Will changing or forsaking our primitive understanding of and belief in the truths of the gospel, expel these crying evils from our camp, make our members more self-denying, or emancipate them more generally and thoroughly from the undue pursuit of the things of time and sense, and separate them from mere nominal professors, so that they shall become lights in the world? Oh, that we were now as thoroughly taught Scripturists—taught by the Spirit that dictated the Scriptures, and confirmed in the knowledge of their truth, by experiencing them, in measure, fulfilled in ourselves—as were our early Friends when they were called to preach to the people the blessed doctrine of the Light of Christ within, God's gift for man's salvation, leading him, when they are known, to the acceptance of all the glorious truths recorded in the New Testament, relative to the coming, sufferings, atoning death, resurrection and mediation of Christ Jesus; whereby He set open the door into the heavenly sheep-fold for all who truly believe in Him. One of those sons of the morning has left this striking testimony respecting the members of the Society in that day.

"This Light," says Isaac Penington, "teaches us not to covet, not to desire earthly dignities or estates. Let it be looked at over England, which of us so much as mind these things? Nay, the Lord knows that the love of these things is daily rooted out of our hearts more and more, and we are a people whom the world cannot charge with covetousness or love of the world, wherewith all sorts of professors hitherto have been too justly chargeable."

SUMMARY OF EVENTS.

FOREIGN.—The British wheat crop is reported to be deficient. The manufacturing and industrial difficulties in England continue. The associated employers of Newcastle, in a letter to the Times, inform the public that 4,116 workmen are now engaged daily, and that constant additions are being made to the working force.

The London Times deplors the continuance of antagonism between labor and capital. The London Labor League has denounced the introduction of foreigners into English workshops as a dangerous political expedient, and the leaders of the International Society have promised that they will prevent the importation of foreign workmen.

The election for a member of Parliament in the town of Turin, resulted in the success of the conservative candidate.

A case of cholera has occurred at Newcastle, and a vessel from Hamburg has arrived at Cardiff with four of the crew dead from that disease.

A rich lead mine has been discovered in the island of Jersey.

The United States consul at Liverpool writes to the state department that, in consequence of the prevalence of the cattle foot and mouth disease in that country, he has discontinued granting certificates to ship cattle to the United States.

The budget committee of the French Assembly reported adversely on the bill provisionally increasing the taxes to meet the immediate demands of the government, pending sanction by the Assembly of new taxes. The Assembly has adopted a bill revising the pension list of the late imperial government. It abolishes all pensions, except in cases of extreme poverty, or where the grant was made for distinguished services.

The Assembly has accepted by a vote of 333 to 31, the customs treaty concluded by Remusat and Pouyer-Quertier representing France, and Von Arnim and Herzog on the part of Germany. Alsace and Lorraine

THE FRIEND.

NINTH MONTH 23, 1871.

ly a week passes by but the public is misled through the newspapers of some of our government, or some employé of a moneyed institution having been found to be a defaulter, and that he has either absconded to parts unknown, or has carried on his shieving practices so adroitly as to leave no ground for hope of recovering the property, or of bringing him to the punishment he richly deserves. In this and many other ways there is abundant evi-

are included in the treaty, the consequences of which are the immediate evacuation of the departments of the Aisne, Aube, Cote d'Or and Jura, and the reduction of the German army of the other departments to 50,000 men.

The Assembly has decided to adjourn from 9th mo. 17th to 12th mo. 4th next. A committee of count, composed of eleven members of the right wing, eight of the left, and six of the moderates, have been chosen to supervise the government during the absence of the President. Prior to the adjournment a long message from President Thiers was read, which was coldly received, some passages provoking laughter. Thiers asks the deputies to ascertain from their constituents at home whether the country wishes for reconstruction based on the glorious traditions of a thousand years, or for abandonment of the ship of state on the torrent leading to an unknown future. In brief, whether the people want a monarchy or a republic.

The disarmament of the national guard is in progress, and does not appear to have met with any serious opposition.

Additional courts-martial for the trial of Communists will shortly be appointed. There are now but 152 judges to examine the cases of 30,000 prisoners. Even with additional courts it is thought probable the government will be obliged to release a large part of the prisoners without trial.

The Centennial Exposition was inaugurated on the 17th inst. The French and Italian Ministers and local authorities of both countries, made the transit through in twenty minutes.

The details of the project for the issue of a new loan of the city of Paris, amounting to three hundred and fifty millions of francs, have been published in London. There were ninety-three new cases of cholera at Konigsberg on the 12th inst., and sixty-three deaths. On the 13th there were 68 cases and 45 deaths.

A Salzburg dispatch says: It has been decided by Prince Bismark, Count Von Beust and the other diplomats, which remained here after the departure of the Emperor William, that France, Joseph, to suppress the International Society and to settle finally the Schleswig question.

It is denied that the cholera is abating in Russia, and it is stated that there is still an average of one hundred and fifty deaths per day in Kiev.

The Spanish Official Gazette published in Madrid on the 16th inst. The Spanish Official Gazette publishes the instructions given by the government to the local authorities throughout Spain, for carrying into effect the decree of amnesty for political offences, just granted by King Amadeus. The Minister of the Interior has issued an order for the dismissal of all police inspectors who have been related to execute the orders by the government in relation to gambling houses.

The government of Turkey has decided to participate in the conference to be held at Berne, Switzerland, on the 25th inst., for the improvement of the telegraphic system and service of Europe. The Sultan has ordered the Grand Vizier to institute reforms to the end that public right be more secure, and the dispensation of justice be entrusted to worthy and capable men. The American institution of street railways has extended itself to the island of Java. A line has just been opened to public use in the city of Batavia.

The Mexican Congress met the first of this month to organize and two-thirds of the whole body were present. The supporters of President Juarez were found to have a small majority. There is a strong opposition to the Juarez government, and threats of forcible opposition were openly made. A pronunciamento has been issued in Zacatecas, and forced loans levied in the smaller towns of the State.

Advices from Zanzibar announce the receipt of positive intelligence of the safety of Dr. Livingstone, and a party of Americans had set out for the interior with the object of escorting him back to the coast.

Paris dispatches of the 18th state that the failure of the new customs treaty with Germany is imminent. The German plenipotentiaries object to alterations in the text made by the Assembly. The legislative committee of twenty-five will hold weekly sessions. In the interval the president and vice-president of the committee will represent the Assembly.

At a mass meeting of the Newcastle workmen, held on the 17th, it was resolved to continue the strike. Many foreign workmen are daily arriving at Newcastle and Gateshead. A great meeting was held at Chelsea on the 18th, in favor of the British workmen now on the strike.

London, 9th mo. 18th.—Consols, 93. U. S. five to note of 1862, 93 1/2; of 1867, 92 1/2; ten-forties, 90 1/2.

Liverpool.—Uplands cotton, 9 1/2; Orleans, 9 1/2.

UNITED STATES.—Census Statistics.—The City of New York, by the census of last year, had 942,292 inhabitants, of whom 323,198 were born in the United States.

Philadelphia had 674,022, of whom 490,398 were born in the United States.

Brooklyn, N. Y., 396,099, born in the United States 251,381.

Baltimore, 267,354, born in the U. S. 120,870. Boston, 250,523, born in the U. S. 172,510.

It is thus seen that the United States possess an aggregate population of 2,530,293, including 881,996 persons of foreign birth, and 1,648,297 natives of the United States.

In four of the Southern States the colored inhabitants outnumber the whites, viz:

	White.	Colored.
South Carolina,	239,667	514,814
Florida,	90,057	91,859
Mississippi,	382,996	416,281
Louisiana,	362,065	364,310

Of the 2,486,709 inhabitants of these States 1,412,014 were found to be colored, and 1,074,735 white.

Miscellaneous.—Mortality in Philadelphia last week 157, including 109 children under two years of age.

On the 16th, a cheese weighing 3,000 pounds was on exhibition in Buffalo, N. Y. It was made in Erie county, and was the product of 30,105 pounds of milk, yielded on the 15th of the preceding day by 2,200 cows.

The Commissioners on the Alabama claims which is to convene at Geneva, consists of five members. Lord Chief Justice Cockburn representing Great Britain, Charles Francis Adams the United States. Count Membray, Italy, ex-President Staempfelin, Switzerland, and Camberr, Brazil.

President Grant has appointed Wm. M. Meredith, of Pennsylvania, and Caleb Cushing, of Massachusetts, counsel of the United States before the Geneva arbitration.

On the 16th a most destructive conflagration occurred at Pioche, Nevada, causing a loss of property exceeding \$200,000. Three large brick gaspouzes, under a cellar exploded, leveling all the buildings in the vicinity. Six men were killed by the explosion, and a much larger number seriously wounded.

Vincent Colyer, special Indian Agent, advises the Secretary of the Interior that he has examined the valley of the Grand Coulee, with a view to an Indian reservation. He found it remote from all settlements, surrounded by mountains filled with game, and containing plenty of wood and water, with sufficient arable land. Accordingly, under the authority previously given, he has declared the valley, twenty-nine miles wide and thirty miles long, a reservation for the southern river Indians, and has offered to the Government to remove the agency from Canada Almosa, as soon as practicable.

The Markets, &c.—The following were the quotations on the 18th inst. New York.—Cotton, 60 1/2; U. S. 8s. cases, 188 1/2, 118 1/2; ditto, 1808, 114 1/2; ditto, 1807, 112 1/2; superfine fine, 87 1/2; and wheat, \$1.48; finer brands, \$6.25 to \$9.35. No. 2 Chicago spring wheat, \$1.45; red western, \$1.50 to \$1.55; amber State \$1.58; white Genesee, \$1.68. Oats, 50 to 54 cts. Western rye, 90 cts. Yellow corn, 74 to 75 cts.; western mixed, 71 1/2 cts. Philadelphia.—Cotton, 20 to 21 1/2 cts. for upland, 19 to 20 cts. Superfine flour, \$4.75 to \$5.00; finer brands, \$5.25 to \$7.50. Western wheat, \$1.48 to \$1.52; amber, \$1.50; white, \$1.65. Rye, 85 cts. Yellow corn, 76 cts.; western mixed, 74 cts. Oats, 50 to 52 cts. Clover-seed, 10 to 10 1/2 cts. Timothy, \$3 to \$3.25. About 3000 beef cattle were offered at the Avenue Drive-rail. Choice sold at 7 1/2 cts.; fair to good, at 5 1/2 to 6 1/2 cts., and common 4 to 5 cts. per lb. gross. Sheep sold at 5 to 6 cts. per lb. gross, and hogs at 7 to 7 1/2 cts. for corn fed. Baltimore.—Pennsylvania wheat, \$1.55 to \$1.64. Southern white corn, 74 to 82 cts.; yellow, 75 to 76 cts.; western mixed, 72 to 73 cts. Oats, 50 to 55 cts. Chicago.—No. 2 spring, white, \$1.16, No. 2 winter, 84 cts. No. 2 barley, 62 cts. No. 2 rye, 81 to 82 cts. St. Louis.—No. 2 winter red wheat, \$1.50 to \$1.51. Yellow corn, 47 cts.; white, 50 cts. Oats, 31 to 32 cts. Barley, 75 to 90 cts. Lard, 9 1/2 cts.

RECEIPTS.

Received from Ezra C. Lewis, Jr., \$2, 45; from Walker Moore, Pa., \$2, vol. 45; from Wm. W. Smedley, Frankford, \$2, vol. 45; from Jacob Smedley, Pa., \$2, vol. 45; from Daniel Nichols, N. Y., \$2, No. 18, vol. 46; from Richard B. Bailey, Pa., \$2, vol. 45, and for Lewis Embree and Lettice Barnard, \$2 each, vol. 45; from Aaron Sharpless, Pa., \$2, vol. 45; and for Sidney Smith, Philadelphia, \$2 each, vol. 45. Received from Richard W. Hutton, \$2, No. 6, vol. 46; from John

Bishop, N. J., \$2, vol. 45; from Naome Gibbons, P. \$2, vol. 46; from Gideon C. Smith, R. I., \$2, to No. 1, vol. 46; from Mary B. Evans, Ill., \$2, vol. 45; for Etwood E. Haines, N. J., \$2, vol. 45; from Micajah Morlan, Agent, O., for Rebecca Shaw, \$1.52, to No. 1, vol. 44, and for Sarah Allison, \$2, vol. 45.

Receipts received after Fourth-day morning will appear in the Receipts until the following week.

WESTTOWN BOARDING SCHOOL.

A Stated Meeting of the Committee who have charge of this Institution, will be held in Philadelphia Saturday, the 25th inst., at 10 o'clock, A. M.

The Committee on Instruction meet at 10 A. M., that on Admissions at the same hour. The Visiting Committee will attend at the School Second-day evening, the 25th inst.

SAMUEL MORRIS, Clerk.

Philada., 9th mo. 18th, 1871. For the accommodation of the Visiting Committee convenance will be at the Street Road Station, Second-day, the 25th inst., to meet the trains that leave Philadelphia at 2.30 and 4.45 P. M.

WESTTOWN BOARDING SCHOOL.

A Teacher is wanted for the Girls' Writing School one qualified to give instruction in Grammar and such other branches; to enter on her duties at the opening of next session, on the 30th of Tenth month.

Apply to Susan E. Comfort, Knox St., Germantown, or Elizabeth R. Evans, 322 Union St., Philadelphia. Martha D. Allen, 925 Pine St.

FRIENDS' FREEDMEN'S ASSOCIATION.

Our schools in North Carolina and Virginia re-open 11th mo. 1st. We need a few teachers, and are desirous to engage for this service rightly concerned Friends. Terms of salary \$15 to \$20 per month. For further particulars please apply at this office 116 North Fourth St., Philadelphia.

Ninth mo. 18th.

WESTTOWN BOARDING SCHOOL.

The Winter Session of 1871-72 commences on Sunday, the 30th of Tenth month next. Friends who intend to enter their children for the coming term, requested to make early application to AARON SALES, Superintendent, (address Street Road P. O., C. T. Corner, Pa.,) or to CHARLES J. ALLEN, Treasurer, No. 304 Arch St., Philada.

FRIENDS' BOARDING SCHOOL FOR INDIAN CHILDREN, TUNNUNGA, NEW YORK.

A suitable Friend and his wife were wanted to charge the Institution, and manage the Farm connected with it. Application may be made to Ebenezer Winter, Marshalltown, Chester Co., Pa., or Thomas Wistar, Fox Chase P. O., Philadelphia. Samuel Morris, Olney P. O., Pa., or Joseph Scattergood, 418 Spruce Street, do.

DIED, on the 18th inst., at the residence of her grandson, William P. G. Shotwell, in West Mifflin, Mercer Co., Pa., JEMIMA G. STORWELL, a member of her age, and 59th of her ministry, a mer and minister of Plainfield Particular and Rahway Plainfield Monthly Meetings of Friends, New Jersey.

WILLIAM H. PALE, PRINTER.

No. 422 WALNUT STREET.

THE FRIEND.

A RELIGIOUS AND LITERARY JOURNAL.

OL. XLV.

SEVENTH-DAY, NINTH MONTH 30, 1871.

NO. 6.

PUBLISHED WEEKLY.

Two Dollars per annum, if paid in advance. Two dollars and fifty cents, if not paid in advance.

Subscriptions and Payments received by

JOHN S. STOKES,

NO. 116 NORTH FOURTH STREET, UP STAIRS,

PHILADELPHIA.

Single copies, when paid quarterly in advance, five cents.

For "The Friend,"

The Telegraph and the Storm.

The above is the title of an article by Prof. T. B. Maury, which appeared in a recent number of *Harper's Magazine*, from which it is supposed to take copious extracts for the readers of "The Friend."

Almost every one who has had the opportunity of seeing the daily papers of the large cities, has become acquainted with, and regularly looks for the "Weather Report," and "Probabilities." The latter are particularly interesting, and often very useful, inasmuch as they have thus far generally proved to be reliable. The weather always appears to be an interesting theme, if we may judge from the amount of conversation it furnishes when other topics fail. But to be able to decide by inspecting the morning's paper, whether leaving home, whether to carry an umbrella during the day's journey, is more interesting, and is quite a new thing, in this age of wonders.

As the subject is yet in its infancy, we can only estimate the value it may be made to give in giving warning of approaching storms, thus enabling those who are exposed to the fury to be prepared for them. In the case of the mariner, and those engaged in commercial pursuits, it has already proved of great value in the saving of life and property. It is to be hoped that the time is not far off, when some means will be discovered extending its usefulness to another large class of our citizens,—the farmers,—to whom, especially in time of harvest, it would be a boon to be apprised of approaching rains.

To explain how the "probabilities" are made and how the changes of the weather are brought within the power of science to predict is the object of the following extracts.

A.

The attempt to presage great weather phenomena is nothing new. From time immemorial, civilized society sought after a plan for averting the violence of the storm and tempest as anxiously as has sought to resist the deadly approach of the pestilence and the plague.

The Great Plague of London, historians say, carried off in a year about 90,000 per-

sons. This was, however, in the rude and undeveloped condition of medical science, when the metropolis of England had but few hospitals, and every victim was left in his own house to spread and speed the march of the contagious foe. Appalling as such mortality seems for the year 1665, amidst the wretched and squalid dens of the London poor, it has been overshadowed in modern times by a greater calamity. On the 5th of October, 1864, the storm which swept over Calcutta destroyed, in a single day, over 45,000 lives! Yet this is but one of a large number of similar occurrences rivaling in magnitude the great Indian disaster.

"To give forewarning of approaching tempests on the coasts of the Adriatic, the Italian and old Roman castles, as described by an antique writer, had on their bastions pointed rods, to which, as they passed, the guards on duty presented the iron points of their halberds, and whenever they perceived an electric spark to follow, they rang an alarm-bell, to warn the farmer and the fisherman of an approaching storm. It is interesting to note that this ancient Italian custom was widely spread over the earth in former ages. And it is not difficult to connect it with those olden towers (not only in Ireland, Scotland, and Spain, but in Africa and the East, Upper India and China) in which the use of a similar conductor may have been one among the many objects of those relics of the past.

"But, as the title of our article shows, a new element of science has been introduced—the electric telegraph—an invention whose mission of usefulness is destined to unlimited enlargement.

In November, 1854, while the Anglo-French fleet was operating in the Black Sea, against the stubborn walls of Sebastopol, the tidings flashed across the wires that a mighty tempest had arisen on the western coast of France, and, by the warnings of the barometer, was on its way eastward. The telegram was sent by the French Minister of War, Marshal Vaillant, from Paris, and reached the allied fleet in good time to enable them to put to sea before the cyclone could travel the five-hundred leagues of its course, and disperse or destroy the most splendid navies that ever rode those waters. The storm came with a fatal punctuality to the predicted hour. The Crimea, shaken, ravaged, scourged by its fury, presented every where a scene of havoc and ruin in the allied camp more fearful than any the fire of all the Russian forts combined could have inflicted. It is perhaps not too much to say that, but for that telegram and its timely storm warning, the congregated navies, far from home and shattered to pieces, could not have sustained the besieging armies, and the event of the great Eastern war might have been different from what it finally was.

"So happily, in this instance, did theory (too often despised) blend with fact, that the French War Minister said, 'It appears that,

by the aid of the electric telegraph and barometric observations, we may be apprised several hours or several days of great atmospheric disturbances, happening at the distance of 1000 or 1500 leagues.'

"Less than three years after the occurrence of the famous 'Black Sea storm,' just mentioned, there appeared for the first time, and in an American paper, a formal proposition for the establishment of a general system of daily weather reports by telegraph, and the utilization of that great invention for the collection of meteorologic changes at a central office, and the transmission thence of storm warnings to the sea-ports of the American lakes and our Atlantic sea-board.

"'Since great storms,' says Thomas B. Butler, in his work on the "Atmospheric System and Elements of Prognostication," have been found to observe pretty well defined laws, both as respects the motions of the wind and the direction of their progress, we may often recognize such a storm in its progress, and anticipate changes which may succeed during the next few hours. When it is possible to obtain telegraphic reports of the weather from several places in the valley of the Mississippi and its tributaries, we may often predict the approach of a great storm twenty-four hours before its violence is felt at New York.'

"On the coasts of the kingdom of Italy mariners are forewarned that a storm threatens them by a red flag hoisted on all the towers and light-houses of the principal localities, ranging from Genoa to Palermo, and thence up along the Adriatic. On the most dangerous points of the coast of England, where the fishing-boats and small craft that perform the service of the coast are exposed to formidable gales even during the most promising season, barometers put up by the Meteorological Bureau are at hand to warn the seamen of bad weather. A striking illustration of the importance of storm weather signals was recently furnished (March 8), when a tornado swept over St. Louis, destroying several lives and \$1,000,000 worth of property.

"In former publications the writer has demonstrated at length the fire-sprinkled paths and tracks of these storms, some of which are generated in the torrid zone, and sweep over the Gulf of Mexico, and thence up the valley of the Mississippi; or, shooting off from the bosom of the Gulf Stream, strike upon the Atlantic coast, and thence commence their march upon the sea-board and central States of the Union. In these published papers the view taken of these tropic-born cyclones is, with some modifications, that announced in 1831, and then substantially demonstrated by William C. Redfield, of New York, viz., that they rotate around a calm centre of low barometer, in a direction contrary to the hands of a watch in the northern hemisphere, and with the hands of a watch in the southern hemisphere.

"It would, perhaps, be impossible to give a

more vivid and exact account of a cyclone (or typhoon) than the following account of the typhoon of the United States war vessel *Itaho*. After depicting the forlorn condition of the vessel after she had passed through the semicircle of the storm, the eye-witness writes: "At half past seven in the evening the barometer had fallen from 30.05 to 27.62. Suddenly the mercury rose to 27.90, and with one wild, unearthly, soul-thrilling shriek the wind was suddenly dropped to a calm, and those who had been in these seas before knew that we were in the terrible vortex of the typhoon, the dreaded centre of the whirlwind. The ship had been fast filling with water, and fruitless efforts had been made to work the pumps; but when the wind died away the men jumped joyfully to the brakes, exclaiming, "The gale is broken! we are all safe!" For the officers there was no such feeling of exultation. They knew that, if they did not perish in the vortex, they had still to encounter the opposite semicircle of the typhoon, and that with a disabled ship. It was as though a regiment of freshly wounded soldiers had been ordered to meet a new enemy in battle, and that without delay, for the cessation of the wind was not to be a period of rest. Till then the sea had been beaten down by the wind, and only boarded the vessel when she became completely unmanageable; but now the waters, relieved from all restraint, rose in their own might. Ghostly gleams of lightning revealed them piled up on every side in rough pyramidal masses, mountain high, the revolving circle of wind which every where inclosed them causing them to boil and tumble as though they were being stirred in some mighty caldron.

"At twenty minutes before eight o'clock the vessel entered the vortex; at twenty minutes past nine o'clock it had passed, and the hurricane returned, blowing with renewed violence from the north, veering to the west.

"The once noble ship, the pride not only of our own navy, but of the whole craft of ship-builders over all the world, was now only an unmanageable wreck. There was little left for the wind to do but entangle the more the masses of broken spars, torn sails, and parted ropes, which were held together by the wire rigging. An hour or two later the tempest began sensibly to abate, and confidence increased in the ability of the ship to hold together. When daylight dawned the danger was over, and we first became aware of the astonishing amount of damage the ship had incurred in bearing up through the perils of that dreadful night. It was evident that she had sacrificed herself to save us."

"The writer was aware, when this view was first publicly sustained by himself, that it was not accepted by all meteorologists.

(To be continued.)

For "The Friend,"

Memoirs of Mildred Ratliff.

(Continued from page 35.)

"1810, 9th mo. 17th. Rested and recruited; and on the 18th continued our journey over rough roads, and got to T. W.'s.

"19th. Attended a meeting in the State of Virginia, called Fruit Hill. "O my Father! thou knowest all things. Thou knowest I am thankful that through thy mighty power, thus far I feel clear and easy. Be thou entered for thy own worthy Name's sake, to

be with thy little dependent handmaid through the remaining part of this journey, and enable me to accomplish this arduous task to thy praise."

"After attending four other meetings, which were the last in Virginia, M. R. thus writes: "These meetings were all hard and afflictive indeed. Yet through all, and over all, I think I may say I am thankful we attended them. I suffered, I trust without murmuring, my portion with the suffering seed: and was enabled in Truth's authority to use plainness to them, which if attended to, might tend to alarm and stir them up. My spirit bows and magnifies thy name, O my Father, that through thy mighty power and renewed help, I feel clear and easy respecting them all! From the 24th to the 27th continued travelling through much weakness, and some outward discouragements, meeting with poor quarters, and resting but little: yet I hope I was in a good degree content.

"28th. Being in the settlement of Friends in Tennessee, we rested.

"29th. Were at a little meeting on the waters of Lick Creek. This was an afflictive time.

"30th. At the Nobs Meeting. It was somewhat more relieving, yet there is great cause to mourn because of the desolation of Zion. Here, as well as in many other places, it seems as though her walls are much broken down."

From the 1st of Tenth month, she notes without comment, the visiting of divers meetings, till she concluded this turn out at Grassy Valley Meeting on the 9th of the same month. Upon which she thus writes: "This finished our serious task of visiting meetings. It was much to the relief of my mind, and as far as I know to the satisfaction of Friends. Now I may say I have no words to set forth to the full, my feelings in taking a retrospective view. I beheld the tender dealings of the God of my life, whom to obey I humbly set out and I trust through his Divine aid accomplished, as far as I knew to be His will. Looking over the journey gave rise to such feelings as words cannot give a clear idea of. Now, righteous Father! in all and for all, thou knowest my spirit bows, and renewedly returns unto thee, all praise, thanksgiving, and renown.

"10th. Started towards home, I trust with thankful hearts and easy minds; and on the 19th, after hard travelling, through Infinite mercy, got there. Now let it suffice to say, I have no words to set forth the feelings of my mind. Oh! the praise and thanksgiving, which all that is alive in me freely offers unto Him who has manifested his power and fatherly care for and over me in this journey. He has carried me out, and brought me in, I trust in His own time; and has enabled me through much weakness of body and mind to perform this task, I humbly trust, agreeably to His will. For this my spirit bows. Rode in this journey, by computation, 2870 miles."

The following is an epistle of Mildred Ratliff's to the Monthly Meeting of Friends at Core Sound, dated "7th mo. 18th, 1810."

"Dear Friends,—In the fresh feelings of that love which makes truly dear to me all the children of my Father's house, I salute you,—the little band in that corner of His vineyard. I may say you have often been in my remembrance since I left you, in the renewal of that precious love which the world can neither give nor take away. In the sweet

flowings thereof, I have felt and do feel my mind impressed as with a duty to send you few lines as a memorial of it.

"Now, my dear Friends, dwell deep in power of an endless life! Remember ye the salt of the earth, which is good while savor is retained, but if that is lost it is good for nothing but to be cast out and trod under foot of men. Oh! remember thy things, and daily labor to have salt in yourself, and to be at peace one with another. To your neighbors ye are to be as a city on a hill which cannot be hid. Some of them have their eyes upon you, when you perform little away thereof. May they, thro' your watchfulness and care, beholding your good works, be constrained to glorify your Father which is in heaven. Oh! may you be incited by these hints, in pure love given your unworthy friend, to dig deep, and so your foundations sure. Then you will be far a help to your neighbors, as that your emplaty conduct amongst them, may prove safe way-marks for them, and as a lan- giving light to their paths, that none have just occasion to stumble over the corner of any of you. Should any of you be a case of stumbling to such, they must be num- bered in the awful day of just retribution, y those who would neither enter into the kingdom of heaven themselves, nor suffer that that would to enter in. If such should be case with any of your little band, how alas! ing must the consequence be! how great condemnation! Oh, endeared Friends! we entreat you often to scrutinize well. Often seek to bring your deeds to the foot of Christ, which you are making profes- sion to the world. Thereby you may perceive whether they have been wrought in God's love, and things that accompany salva- tion. Yet from a sense of Satan's snares, who is wearied in trying us upon every string, I moved in the flowings of love to write in manner. I wish to stir you up, if possible watchfulness and prayer against the cunning wiles of the serpent. Oh! watch and pray that you enter not into temptation. Do not but that such as we sow, such we reap! Where the treasure is, there will heart be also. We may prove whether have our treasure in earth, or in heaven. Whether we are sowing to the flesh or to Spirit. Oh Friends! great is the difference in these things. Yet the one or the other surely the experience of each one, agree to the Scriptures of Truth. Read those sacred records often, and consider the contents. Take heed to afford caution and instruction, and great consolation. We may justly rank the privilege of perusing them in the list of our most precious favors. For in them we may plainly hold the glorious plan of life and salvation.

"Dear Friends, have a care of lightly seeming the many blessings bestowed upon you, lest thereby they should at last be given as a dread handwriting on the wall against you. I am deeply sensible that your responsibility is upon you of that part of family, not only on your own account, but account of your neighbors. Some of us are watching with anxiety to see you yearning to gain some instruction, some direction in their journey from Babylon to Be Some of them are much concerned about things. With such my spirit sweetly sympathizes, and in that sympathy desires I

raised that nothing may cause them to be able.

Now having relieved my mind of what might impress it for you, who with other inhabitants of those parts have been brought to my best feelings, with desires for your welfare every way, I conclude; and, saluting in the flowings of gospel love, bid you of every age, an affectionate farewell,

MILDRED RATCLIFF."

Selected for "The Friend."

Life in Tuscany.

With the fertile soil and the warm sun of Italy, joined to the indefatigable industry of the peasant class, it is quite evident that in a beggarly aspect, their meagre food and cheerless homes, must arise from some similar evils in their position. Devoid, generally speaking, of property in the soil, the country are very far from standing in the relation to their landlords, as the two corresponding classes are to each other in England. The English tenant pays to the proprietor of the farm he cultivates a fixed annual sum of money; whilst the Tuscan tenant is bound to render to his landlord the total of all the produce raised upon his farm. Land, wine and oil are divided, share and alike; and even in articles of the most costly kind, the halving system is applied. Every brood of chickens the landlord can take his half, and even eggs may come under operation of a similar rule.

A secondary cause of the poverty that prevails in Tuscany may be discovered in the smallness of the farms. "We are too poor," they say themselves: "our holdings are too small." This is true indeed, in many instances, where a man's holding is limited, sometimes is, to two acres in extent; the produce of which would be required to support him, and his probably numerous family, a comfortable subsistence. Under such circumstances, a tenant must be poor, never equitable or even liberal are the terms on which his farm is rented. If the anticipated amount be not forthcoming, through negligent culture, the defaulting tenant has held his place to a more honest or competent man. Changes of tenantry, however, do not occur but rarely; and as a general rule, the peasant's home remains, if not for successive generations, at least for many successive years.

Amongst the tile-roofed dwellings that thickly dot the country, there may be seen, here and there, one wearing the air of greater dignity than the rest, one possessing the variety of glass windows, and some pretension paint. This dwelling, on inquiry, the stranger is pretty sure to find, is the one in which the steward—*fattore*, as he is called—lives. A very important personage is this steward under the land system of Tuscany. In his hands the landlord—invariably a resident in town for at least nine months in the year—commits the management of his affairs. To the *fattore* must the tenant apply for money to help to purchase cattle, and all the landlord's covenant to supply; and to the *fattore* must the tenant render account of every article of agricultural produce raised or sold.

Notwithstanding the alleviating influences of custom, the Tuscan contadini are far from being insensible to the hardships of their lot,

and very far from being reconciled to the poverty of their condition. In particular, I found the peasant women loud in their complaints and lamentations upon this subject. "We live like the beasts," they would exclaim, when at my desire, they showed me through their comfortless dwellings; "to work hard and to fare badly, is our lot from childhood to the grave. The hot sun scorches us in our hard field work in summer, and the cold winter's wind, as it enters through the many crevices of our wooden shutters, makes us shiver in our beds."

"Oh would to Heavens! I had never married," was a common exclamation with them, and they would often declare that to rear up children in any kind of decency was a task that wore out their lives with trouble, anxiety and toil. "From morning to night," they said, "we slave and slave to gain a scanty supply of the commonest necessaries of life. Ah the hard existence which falls to the lot of a mother of a family, can be hardly told."

Though from the interior aspect of their dwellings it is quite evident that an absence of comfort has invariably characterized the homes of the Tuscan peasantry, it cannot be disputed that their position has been much deteriorated by the vine disease which has for the last eight years prevailed universally in Tuscany. The Tuscan grape was in former times famous for richness and for sweetness, and the wine it yielded was highly prized. According to the best authority, the process of wine-making was better understood, and a greater number of good wines were produced in the Tuscan dominions, than in any other part of Italy. From France, from Spain, from the Canaries, the best species of vines have been imported. In those days autumn was crowned with beauty and mirth; and while the eye feasted on the sight of the rich pendant clusters of bright colored fruit, the ear drank in with pleasure the joyous sounds that came floating in from the vineyards, where the busy vintagers plied their task.

But now, contrasted with the scenes of former years, sad is the change which the universal prevalence of the vine disease has effected in the autumnal aspect of Tuscany. No longer do rich clusters of green and purple grapes present themselves in countless numbers to the traveller's view—no longer does the air resound with the vintager's mirthful voice and song. Though from tree to tree the vine still twines its slender stems, and by road side fences, in fields, by cottage doors, and on terraced heights, its graceful foliage meets the view; the small, gnarled, unsightly knots of dried-up, cracked, and blackened juiceless berries, which protrude amongst the changing leaves, are a hideous mockery and corpse-like image of that beautiful and delicious fruit.

Not merely, however, does the peasant mourn the loss of a pleasant beverage, in the destruction of his grape crop; this privation forms but one of others still more grievous, arising from that source. In former years, when the vine yielded an abundant and delicious fruit, the peasant could calculate, after deducting the landlord's share, on the possession of many more barrels of wine than what would be required for his own family's use. This surplus (always the best) being sold, afforded the means of purchasing, besides many little comforts, articles of prime necessity, such as clothes. "Our wine was food, and

drink, and covering to us," said a peasant, talking on the subject to me: "it bought us clothing for ourselves and children. With these old worn-out garments that you see, we must content ourselves, until the Almighty is pleased in his good Providence to give us back our wine again."

One absurd theory as to the origin of the vine disease prevails extensively amongst the Tuscan peasantry; the smoke arising from the coal used in the engines being alleged to exercise a deteriorating influence on the air; and very frequently I was asked my opinion whether the railroads were really the cause. "Were there railroads in England?" I was asked invariably by the contadina in reference to this point. On my giving an affirmative reply, the question immediately succeeded—if the vines were healthy there?

Little is it to be wondered at that ideas such as these described in reference to the origin of the vine disease, should prevail extensively amongst a peasantry so ignorant as is that of Tuscany almost universally. Throughout the country, schools are rare; and in those that exist, a very inconsiderable amount of knowledge is communicated. To the teaching of the arts of reading and writing, the endeavor of the master is generally limited; and to the acquirement of these two branches of knowledge, are the aim and desire of the pupil as generally restricted. Even amongst persons occupying what may be termed a respectable position in society, and amongst persons endowed by nature with a considerable degree of intelligence and quickness of comprehension, the grossest ignorance of the rudiments of knowledge may be often found prevailing. In the country lodging-houses and hotels, where I have been staying in Tuscany, it was no rare thing to find that, to the master or mistress of the dwelling, the simplest Italian book was about as intelligible as inscriptions in the cuneiform characters might prove to the world in general. Often did it fall to my lot to keep an account of expenses incurred, the correctness of which was only tested by some primitive system of self-invented mental arithmetic. At the very best, an imperfect acquaintance with the arts of reading and writing, and a mere smattering of arithmetic, constitute the utmost amount of knowledge obtainable, or obtained, by the rural population of Tuscany at the present day.

(To be continued.)

The Spirit Quickeners.

The Lord often comes to those to whom he graciously reveals himself, as he came to Elijah on Horeb. Has your own experience furnished nothing similar? Do you know nothing of the storm which he sends before him, as it were, rending the mountains; of the earthquake, which subverts every thing within us, and casts down imaginations; of a fire of terror and dread which precedes the Lord of glory? Are your rocks still unbroken? Have your heights not yet been cast down, nor the deceitful ground of self-righteousness and self-sufficiency removed from under you? And yet you imagine you have heard the gentle voice of grace! You are not perhaps aware that the father of lies approaches men occasionally as an angel of light, and whispers smooth things in their ears. This destroyer is able to pervert the promises of God into the snares of death; and he considers those

secured as his prisoners, who suffer themselves to be caught by his false assurances of Divine favor! O tremble at the artifices of the old serpent; and remember that the comforter who seeks to quiet your conscience without mortifying your flesh, is not the Lord, but the wicked one! For Jesus does not draw near with his still small voice, without first overthrowing every high thing that exalts itself against him, and subverting the power of the old man within us. "Strait is the gate and narrow is the way, which leadeth unto life." "Many shall seek to enter in and shall not be able." Seeking is not sufficient here—it must be *striven for*. The new creation within us rises upon the ruins of the old and corrupt nature. Wherever grace builds, it first pulls down; and it is by bringing to nought things that are, that God makes out of us what we by nature are not.—*Krummacher*.

THY WILL BE DONE.

My God, my Father, while I stray,
Far from my home in life's rough way,
O teach me from my heart to say,
"Thy will be done."

Though dark my path, and sad my lot,
Let me be still and murmur not,
Or breathe the prayer divinely taught,
"Thy will be done."

What though in lonely grief I sigh
For friends beloved, no longer nigh,
Submissive would I still reply,
"Thy will be done."

If thou should'st call me to resign
What most I prize, it ne'er was mine:
I only yield thee what is thine!
"Thy will be done."

Let but my fainting heart be blest
With thy sweet Spirit for its guest,
My God, to thee I leave the rest,
"Thy will be done."

Renew my will from day to day,
Blend it with thine, and take away,
All that now makes it hard to say,
"Thy will be done," AMEN!

THE OLD CHIMNEY-PLACE.

A stack of stones, a dingy wall,
O'er which the brambles cling and creep,
A path on which no shadows fall,
A doorstep where long dock-leaves sleep,
A broken rafters in the gable,
A sunken hearthstone, stained and cold;
Naught left but these, fair home, alas!
And the dear memories of old.

Around this hearth, this sacred place,
All humble household virtues grew.—
The grandsire's love, the maiden's grace,
The matron's instincts, deep and true;
Here first sweet words were lisped; here broke
Life's morning dream, and yet more dear,
The love that life's best impulse woke,
Grew warmer, gentler, year by year.

How cheerful, while the storm without
Milled the earth and leed the night,
The ruddy glow gushed laughing out
On merry groups and faces bright;
How chimed the crackling, freakish flame,
With rosy mirth or thoughtful ease,
Or, may-be, syllabled the name
Of one rocked o'er the shivering seas.

What father scenes, what golden lands,
What pigeons of romantic pride,
In the weird deep of glowing brands,
Saw the fair boy, the dreamy-eyed,
Till, nursing here, his spirit drew
Strong inspiration, and his years,
By Beauty's subtle nurture, knew
The paths of Nature's inner spheres.

Here, as the swooning embers sent
A faint flush through the quiet gloom,
In the warm hush love lovers blent
The fragrance of their heart's fresh bloom;
And, velling in soft drooping eyes,
Her tremulous joy, here blushed the bride;
Here, o'er pale forms in funeral guise,
Farewells from broken hearts were sighed.

This spot the pilgrim, 'neath strange skies,
Saw in his way-side dream; here stood
Old friends with gladness in their eyes;
Here grew the beauty and the good;—
Sweet friendships, faith serene and pure,
Manhood's strong purpose, warm and bold,
Courage to labor and endure,
And household feelings never cold.

Here, leaning in the twilight dim,
All round me seems a haunted air,
I hear the old familiar hymn,
My heart goes upward in the prayer,
That made the night so full of peace;
Kind lips are on my brow; my ear
Hums with sweet sounds,—they faint,—they cease,
And night o'er all broods calm and clear.

Household.

Tobacco's Work.—According to the statistics of Dr. Rubio, the number of lunatics is much greater in northern countries, where the consumption of spirituous liquors and the use of tobacco are much greater than in southern countries, where the people are very sober and small smokers. According to M. Moreau, not a single case of general paralysis is seen in Asia Minor, where there is no abuse of alcoholic liquors, and where they smoke a kind of tobacco which is almost free from nicotine. On the other hand insanity is now frightfully increasing in Europe, just in proportion to the increase in the use of tobacco. It appears that from 1830 to 1832 the revenues from the import on tobacco in France rose from £1,250,000 to £8,333,333—a tremendous figure certainly to have disappeared from the pockets of the people into smoke. But hand in hand with this increase in the consumption of tobacco there appears to have been during the same period an augmentation of the number of lunatics in France from 8,000 to 44,000, or rather 60,000 if we take into account other lunatics.

If one-tenth of the alleged evils of tobacco smoking be facts the entire human race must be seriously injured by the "Indian weed," for it appears that the average annual consumption of tobacco, by the whole human race of 1,000,000,000, is at least 70 ounces (4lb. 6oz.) per head, and the total quantity annually consumed is 2,000,000 of tons, or 4,450,000,000 pounds weight.

It is, however, to the young that the evil of smoking is apt to be the most disastrous. Whatever benefit may be derived from smoking in maturity and old age, it is obvious that the young cannot need the fictitious aid of a narcotic. Parents should look to this, and prevent the most deplorable physical and moral consequences of this habit of their children. Many a youth may date the ruin of his health and character from the first whiff of tobacco, which, by dint of nauseous practice, he was at length able to smoke, in the foolish imitation of manhood. That smoking may impair the digestion and derange the nervous system of the young seems certain, and that it may lead to drunkenness, or excess in drink, is more than probable, from the thirst which it necessarily occasions.—*Good Health*.

It is one of the first lessons that Truth teaches her disciples, "to do justly."

For "The Friend."

The Doctrine of the Spirit.

I was much impressed in reading an Editorial in "The Friend," (p. 15 of the current vol.) conveying the apprehension and query, "Can any make themselves acquainted with the signs of the times in the world, and the professed christian church, and not convinced that not only vital religion, but the fundamental principles of the gospel, are undergoing an extraordinary and determining assault, both from openly armed and from insidious, but not less dangerous enemies; believers in and opponents to the self-denying cross-bearing discipline with which Christ invested the acceptance of discipleship?"

While I much fear, nay, have no doubt there is ground for such an allegation, it cause of true sorrow that any should in the day of professed Christian light, subject their selves to the plaintive appeal of the Apostol—"But now, after that ye have known God, rather are known of God, how turn ye again to the weak and beggarly elements, wher unto ye desire to be in bondage?" To our own religious Society especially, which has been much brought out of this "bondage" with an high hand and with an outstretch arm, the foregoing stirring query seems to have a significance and force of greater reach and depth, than perhaps to any other. Will we not then take warning? Why not turn from all by ways and broad ways, into that straight and narrow one which alone leadeth to life; and which is marked, not only by the footsteps of Christ, who for the job that was set before him, as a faithful High Priest and as an example for us to follow endured the cross, despising the shame, but by those of the flock of His companions, who, having fought the good fight and kept their faith, have finished their course with joy. Why are we not willing to heed the Prophet's injunction to a lukewarm and apostatizing people formerly, "Shake thyself from dust; arise (out of thy carnal security) and sit down (in the meekness of wisdom) O Jerusalem: loose thyself from the bands of thine neck, O captive daughter of Zion;" "Turn ye, turn ye, why will ye die, O house of Israel?"

We believe that what is wanting, is more of a thorough, and a whole-hearted subjection to Christ Jesus the Mediator of the new covenant, unto the attainment of being "built up a habitation of God through the Spirit." He remains to be sufficient for all our need; the Physician of value to every hungry and thirsting and panting soul, that with repentance, faith and obedience come to Him, the Alpha and Omega of all, in a religious sense, that is, come, or is to come. As we thus wait for His inward appearance, being engaged in humility and contrition of heart to bow low before Him, even to "putting the mouth in the dust" if so be there may be hope, He will manifest Himself more and more for the help of them will lead them in the way they should go, engraft them into Him the living vine, and finally enable, by "the washing of regeneration and the renewing of the Holy Ghost which he shed on us abundantly through Jesus Christ our Saviour;" to "put on the new man which after God is created in righteousness and true holiness."

Thus while it has been well said to the effect, that the Society of Friends have a long considered the standing, lasting, and in-

pensable ordinance of the gospel to be the manifestation of the Saviour by His Spirit as guide into all truth; how lamentable is fact, that from the want, it is to be feared, full belief, acknowledgment, and appreciation or experience in ourselves of the humbling, transforming power of Divine grace, the saving efficacy of the light of the Holy Ghost, which enlighteneth every man that cometh into the world, we have too much cared it to fall in our streets; not having, the Society, practically exemplified the doctrine of the Spirit, or the reality of the presence of Christ dwelling in our hearts by faith. Notwithstanding, the dear Redeemer and our Saviour's own testimony to His disciples, the Comforter, which is the Holy Ghost, whom the Father will send in my name, he will teach you all things, and bring all things unto your remembrance, what-so-ever I have said to you; "He shall testify of me;" "He will glorify me;" "He shall take of mine and will give it unto you;" "He will show you things which I have said unto you;" "He will guide you into all truth." Similar import is the declaration: "If ye love me, ye shall keep my commandments, and ye shall abide in my love, and ye shall know the things which ye have heard of the Father, which I have said unto you." "And Paul also to the Ephesians enjoins ye: "Grieve not the Holy Spirit of the Lord, whereby ye are sealed unto the day of redemption." Again to the Romans: "But ye were not in the flesh, but in the Spirit, if so be the Spirit of God dwell in you. Now if any man have not the Spirit of Christ, he is none of us." "For as many as are led by the Spirit of God, they are the sons of God." Such passages might be greatly multiplied; but can be anything more clear and full and unequivocal than the prophecies came not in time by the will of man; but that, "I will give my law in their inward parts and write it in their hearts" (Jer. xxxi. 32-34); and, "I pour out of my spirit upon all flesh," &c. (Joel ii. 28, 29) are literally carried out by the Holy Spirit, Jesus the Mediator of the new covenant, in that "a manifestation of the Spirit is given to every man to profit withal," (1 Cor. xii. 7) that to those who thus or herein receive the Spirit into the heart, He will—all satisfying satisfaction—sup with them, and permit them to abide with Him.

His through submission and obedience to the power and spirit of Christ Jesus, whose abode is to be set up within man, that any man experience Him to take the government of his heart upon His own shoulders, and to reign there unto the perfecting of His will in the fear of God. Let us apply the promise: "If any man have not the Spirit of Christ, he is none of his." If we are not obedient to the Spirit that maketh manifest all things that are reprovable, or to the grace of God which bringeth salvation, and is able to build up in us that which we do not submit to that baptism which is with fire and the Holy Ghost, and which purgeth the floor; neither expect the new birth unto righteousness; nor the perseverance which is after "a godly sort"—through the effectual operation and blessing of the Holy Spirit—how can we expect to be participants in those blessings which are for "the poor in spirit;" "the meek;" "the pure in heart;" "they which hunger and thirst after righteousness?" But through the unspeakable mercy of God in Christ Jesus, as any are sincerely engaged to

how to Him in contrition and self-abasement, to offer unto Him the acceptable sacrifices of broken hearts and contrite spirits, and to watch unto prayer with all perseverance, then that kingdom which our Lord declared to be within, and which standeth not in word but in power, He will not only set up in the heart, but He will also reign there to the praise and glory of His own excellent Name.

This doctrine of the indwelling spirit of Christ, was very much the theme of the early Friends' ministry. By which, and through the power thereof attending, they no doubt were made so instrumental in drawing souls from all the lo-here's and lo-there's, and from the barren mountains of an empty profession, to sit each under the pure teachings of the Immanuel, God with us, where none can make afraid. It is a doctrine which, if silently, yet surely has been and is making its way in the hearts of the people, till one here and another there are openly advocating it as the truth as it is in Jesus. A few examples will suffice here: "Considering," says Orme, "the abuses of divine ordinances, which had so long and so extensively prevailed, it is not surprising that such a system as Quakerism should have arisen." "It may," he continues, "have answered a useful purpose in the promotion of spirituality of mind, and the enjoyment of communion with God." Richard Baxter, whose controversy lay for many years against the doctrine of the Spirit, as it was so prominently held forth by our honorable predecessors, later in life acknowledged: "I am now more apprehensive than heretofore, of the necessity of well grounding men in their religion, especially of the witness of the indwelling Spirit, for I more sensibly perceive, that the Spirit is the great witness of Christ and Christianity to the world. * * * Now I see that the Holy Ghost, in another manner, is the witness of Christ, and his agent in the world." It is the testimony of Archbishop Tillotson, "All that Christ hath done for us, without us, will avail us nothing, unless we be inwardly transformed, and renewed in the spirit of our minds, unless we become new creatures, unless we make it the continual and sincere desire of our lives to keep the commandments of God. * * * But if we receive the grace of God in vain, and take no care to perform the condition, and neglect to implore the grace and assistance of the Lord's Holy Spirit to that purpose, we have none to blame but ourselves," &c. Luther declares, "This is certain, that no man can make himself a teacher of the Holy Scriptures, but the Holy Spirit alone. No man can rightly know God, or understand the word (words) of God, unless he immediately receive it from the Holy Spirit. * * * Out of this school nothing is taught but mere talk." Calvin hath well expressed a similar view in these few words, "God never in anything hath failed those, who have been led and guided by His Spirit." Of more recent date, William Bacon Stevens, an Episcopal minister, uses this language: "We are living under that phase of the Divine economy known as the dispensation of the Spirit. * * * The work for us to do is to bring our individual souls more under the pervading influence of the Holy Ghost, to live more in the full realization and enjoyment of His indwelling presence, to be made by Him mighty in prayer, comely in the beauty of holiness. * * * For, only as the individual members of the church receive this promised Comforter, are they growing in grace,

and in the knowledge of our Lord and Saviour Jesus Christ."

How sad is the reflection, that in the face of all this, and much more—for almost exhaustive is the cumulative testimony—the doctrine which is so pre-eminently according to godliness, should not be by us faithfully maintained and exemplified through subjection to its crucifying power, before the world! The professors of christianity are not generally wanting in the belief and acceptance of the outward coming, the divinity and atonement of Christ. The history of the Saviour they do not deny, even if they do not give it a too exclusive place to the unequal upholding of Divine truth; but the mystery "now made manifest to his saints"—Christ in them the hope of glory—they miss of, stumble at, and cannot comprehend, because it is not to be comprehended by the unrenewed, carnal mind, which "is enmity against God." For, "The natural man receiveth not the things of the Spirit of God: for they are foolishness unto him: neither can he know them, because they are spiritually discerned." The Society of Friends, while dearly owning the sufferings, death, resurrection, and glory of the Immaculate Lamb, who hath given himself for us, an offering and a sacrifice to God for a sweet smelling savor, no less believe that the inward coming of the Spirit of Truth or Comforter, was part of the inestimable purchase obtained by the costly sacrifice of Christ our Passover, for us: agreeably to the sayings of that holy Lawgiver,—"It is expedient for you that I go away; for if I go not away the Comforter will not come unto you; but if I depart I will send him unto you." And again, "This spake he of the Spirit, which they that believe on him should receive: for the Holy Ghost was not yet given; because that Jesus was not yet glorified." It is this second coming of the Saviour in Spirit, which had its more manifest beginning in the ever memorable descent of the Holy Ghost on the day of Pentecost, that constitutes the new covenant dispensation of light and life, in which we live; and wherein "the tabernacle of God is with men, and he will dwell with them, and be their God." "Know ye not," saith the Apostle, "that your bodies are the temple of the Holy Ghost, which ye have of God, and ye are not your own?" And again, "No man can say that Jesus is the Lord, but by the Holy Ghost."

Would that we as a Society, both far and near, might again rally to the good old standard of ancient Quakerism; which at the first, through the power of the Holy Spirit, was so effectual in turning the people from darkness to light, and from the power of Satan unto God. May the ministration of the Holy Ghost—the epoch of the promise fulfilled of the pouring out of the Holy Spirit upon all flesh—which is of, and from, and through Christ Jesus our Lord and Saviour, the only true teacher in the heart, be boldly testified to, though it be "a stone of stumbling and rock of offence" to this, as well as to previous generations. That thus through the power of the grace and cross of the Redeemer and Sanctifier, we all may become more established, strengthened, settled in the unchangeable Truth, and multitudes also be brought to enlist under His banner, having inscribed thereon, "Not by might nor by power, but by My Spirit" saith the Lord of hosts; that so He "who walketh in the midst of the seven golden candlesticks," may look

with compassion upon us, may heal us and bind us up; and the shout of a king be again heard in the camp, to the joy and rejoicing of many exercised and travelling souls.

Size of the Sun.—Let the reader consider a terrestrial globe three inches in diameter, and search out, on that globe, the tiny triangular speck which represents Great Britain. Then let him endeavor to picture the town in which he lives as represented by the minutest pin-mark that could possibly be made upon this speck. He will then have formed some conception, though but an inadequate one, of the enormous dimensions of the earth's globe, compared with the scene in which his daily life is cast. Now, on the same scale, the sun would be represented by a globe about twice the height of an ordinary sitting room. A room about twenty-six feet in length and height, and breadth, would be required to contain the representation of the sun's globe on this scale, while the globe representing the earth could be placed in a moderately large goblet.

Such is the body which sways the motions of the solar system. The largest of his family, the giant Jupiter, though of dimensions which dwarf those of the earth or Venus almost to nothingness, would yet only be represented by a thirty-two-inch globe, on the scale which gives to the sun the enormous volume I have spoken of. Saturn would have a diameter of about five feet in its extreme span. Uranus and Neptune would be little more than a foot in diameter, and all the minor planets would be less than the three-inch earth. It will thus be seen that the sun is a worthy centre of the great scheme he sways, even when we merely regard his dimensions. The sun outweighs fully seven hundred and forty times the combined mass of all the planets which circle around him; so that when we regard the energy of his attraction, we still find him a worthy ruler of the planetary scheme.—*Proctor's Other Worlds than Ours.*

For "The Friend."

A Word of Encouragement.

The beginning and closing pieces of "The Friend," No. 4, were very acceptable to some of the readers of this periodical, believing that truth is truth, though all may forsake it, and that its foundation cannot be shaken, however lightly we may esteem it; and though the church may experience its low seasons, its times of bereavement, by the removal of some of its strong standard-bearers, and also by false brethren, yet all these trials and provings are not sufficient grounds for any of us to cast away our shield of faith; on the contrary, they should cause us to cleave closer to Him, who queried with his disciples in this touching language, "Will ye also go away?" Their acknowledgment was, "to whom shall we go?" for thou hast the words of eternal life." They were sensible that all power was given unto him, both in heaven and on earth; and therefore vain was it, to seek any other aid, but his sustaining arm of power. Ah! yes, to whom shall any of us go for support, when the blast of the terrible one is as a storm against the wall, or when it may seem as if the spirit of Absalom ruled in the hearts of many, endeavoring to draw away their allegiance from the King of kings, and from following Him who was never foiled in battle, nor ever hid his face from the wrest-

ling seed of Jacob. And while we stand true to the ever adorable Head of the church, we shall be preserved from following, or even listening to the voice of the stranger, who by his devices, would turn us aside from Him, who careth for his sheep, and refresheth them beside the still waters, and refresheth their souls in the green pastures of life. Therefore let us not be too much cast down at the signs of the times, for however any may spread themselves like the green bay tree, yet if we slide off the true foundation, the future will evince our building to have been upon the sand.

For "The Friend."

Second Annual Report of the Associated Executive Committee of Friends on Indian Affairs.

(Continued from page 37.)

"The *Quappa* Special Agency has been established since our last report, and includes the small tribes located in the northeastern corner of the Indian Territory, viz.: Senecas, Wyandottes, Eastern Shawnees, Ottawas, Peorias, Kaskaskias, Piankeshaws, Weas, and the Quapaws,—numbering in the aggregate nearly 1000 Indians. They have been under the care of sub-agent George Mitchell for several years past, but, recently the Department has requested the nomination of a Friend for appointment as special agent; and, at the late meeting of the Committee in New York, Hiram W. Jones, of Springdale, Kansas, was approved for that position. Two schools have been in operation during the year in this special agency. The one amongst the Ottawas, under the management of Asa C. Tuttle and wife, has been partly a boarding school, they having taken the care of ten destitute orphans, supplied them with food, clothing, and lodging, instructed them in household industries, and afforded them the tuition of the school. The larger portion of their pupils board at their own homes, and have made very commendable progress in their studies. The First-day School has been well attended by children and adults, and is followed by a religious meeting. The Divine blessing has evidently rested upon these religious labors, and the practical results are apparent in the improved moral condition of the people. The school amongst the Peorias has been taught by J. Collins Isaac. There is no provision for boarding children in connection with this school. Various and unexpected causes of delay have hitherto arrested our attempts at providing other schools within the limits of this special agency.

"In addition to the small tribes mentioned above as constituting this agency, there are located within its limits, and on the eastern bank of the Neosho, about 300 Delawares, who, becoming dissatisfied with their location amongst the Cherokees, have, by consent of the confederate Peorias, settled upon their lands, and opened farms. The Government has, until recently, tacitly connived at this movement, and sanctioned our proposition to erect school-houses for them. One house is already finished, and the erection of another was intended, also a farmhouse for a family,—the design being to open an establishment on a small scale for the care of destitute orphans, board of teachers, &c., and, by means of a farm, to render it as nearly self-supporting as practicable. Recently, however, the Department has decided not to sanction the settlement of these Indians on the Neosho, and has directed a suspension of further expendi-

ture on the part of the agent. We trust way will still open for some action for their benefit.

"The *Sac* and *Paw* Indians are now under the care of agent John Hadley,—Thomas Miller having resigned. There are 418 upon their new reservation, containing 480,000 acres, and located west of the Creeks, and between the Red Fork of the Arkansas and the North Fork of the Canadian. Beside the above, there are a few still upon their old reservation in Kansas, who refuse to remove. No schools have been established for these Indians. Until the recent erection of a saw-mill there was no supply of lumber for the necessary buildings. A building for a boarding school is now in process of erection, and will probably be completed by the 1st of 11th month. The crops of these Indians the present summer are almost a total failure from drought, and there is a prospect of suffering amongst them next winter.

"South of the *Sac* and *Fox* Indians, and west of the *Seminoles*, are the *Absentee Shawnees*, nearly 700 in number, who are also under the care of agent Hadley. They are an industrious and deserving people, but suffer the loss of all their property during the war and need help in their efforts to begin life again. They have suffered this summer from lack of provisions, being compelled to live mostly upon green corn, which has caused most sickness amongst them. Our intention of opening schools amongst these Indians has hitherto been obstructed by lack of lumber. As soon as the mill at the *Sac* and *Fox* Agency can supply it, it is intended to erect two or more school-houses and dwellings for families amongst them.

"The *Cheyennes* and *Arapahoes*, under agent Brinton Darlington, are mostly blanket Indians, and number about 3540. The agency is on the north Fork of the Canadian. Two schools, one for each tribe, have been in operation the present year, with encouraging results. There are several children who can read fluently in the First Reader, count to fifty, and sing a number of hymns. The *Arapahoes* are more docile than the *Cheyennes*. These tribes, formerly so warlike and so troublesome to the Government, have been quiet during the past year. The patient perseverance and Christian effort of their agent we believe, have been largely successful. The history of some chiefs in these tribes, who were once great warriors, but who now manifest a desire for the peaceable pursuits of civilized and Christian life, is full of incident of deep interest to those who are looking for the fruits of a peaceable policy in Indian management. But we have not space for details of this character.

"In the *Washita* Special Agency, under the care of Jonathan Richards, and located on the *Washita* River, there are 1216 Indian composed of several affiliated bands. No much has been done for the educational benefit of these Indians, as the necessary building could not be erected. A saw-mill has not been sent thither, and it is confidently expected that three schools will be opened the ensuing autumn. Agent Richards has had one school in operation a part of the year. The employees at that point have suffered considerably this summer with bilious affections.

"The *Kiowas*, *Comanches*, and *Apaches*, numbering about 6000, are under the care of agent Lawrie Tatum. These are all roving Indians never remaining longer than

weeks in one place. This habit almost prevents the success of any attempts at their education or civilization. Many of them have never come to the agency and of course have never seen their agent, they are the most restless, wild, and warlike Indians east of the Rocky Mountains, and the Apaches of Arizona, and some of the Sioux, may possibly equal them in these respects of character. Those who come to the agency to draw their rations are not long in the presence of their agent and his assistants to receive any good impressions. They are not willing to leave many of their children in the school, where they would be clothed, fed, sheltered, and educated. This school, under the care of Josiah Butler and wife, has had an average of 17 pupils during the present year. 15 of these can read to some extent, 10 can write pretty well, and 8 others write and print on their slates. They have all add small numbers, and locate the capitals of all the States and Territories of the Union. They are mostly from the tribes on the Washita river.

The Indians of this agency, especially the Comanches, have long been in the habit of raiding into Texas. The Comanches having been driven out of Texas by white men, have always claimed a right to commit reprisals upon the people of that State. The Kiowas, however, can lay claim to no such justification, and their chiefs have become so bold in this respect as openly to acknowledge it, and boast of their achievements in murdering, capturing women and children, and driving horses, mules and cattle. They have in this been greatly encouraged in this by Mexican soldiers, who receive the stolen property and apply them in exchange with contraband goods, such as whiskey, firearms, an ammunition. Agent Tatum has often counselled the chiefs of these tribes to desist from their predatory habits. Superintendent Hoag and the members of our committee who visited them in last fall, labored to show them the evil of their course, and warned them that their government would not always forbear. Early in the present year, President Grant, through the Interior Department, invited these chiefs in common with others, to visit him at Washington, in friendly conference upon these and other important subjects. They have treated his overtures with disregard and even contempt, and instead of going to Washington on an embassy of peace, Satanta, a leading Kiowa chief, organized and executed a murderous raid into Texas, and upon his return boasted of his exploits, and declared his intention of pursuing the same course in the future. It was apparent to agent Tatum that their forbearance was not only useless, but would certainly result in a succession of murders. He therefore determined to have Satanta and some other leading Kiowas arrested. There was no civil authority to which he could appeal, he requested the post commander, Colonel Grierson, to effect the arrest. General Sherman was also present at the post, and seems to have determined upon their arrest simultaneously with the agent, for he has ordered Colonel Grierson to arrest Satanta. It was also determined to send him to the county in Texas in which they committed the murders, and deliver them to the civil authorities of that State for trial and punishment. Agent Tatum addressed a letter to General Sherman in which he urged in

addition to his scruples against capital punishment, the plea of inexpediency against the execution of the chiefs, should they be convicted, and requested General Sherman's influence in favor of his views. The latter forwarded a copy of the letter to the Texan authorities, and recommended that the suggestions of the agent be carried out. The chiefs were duly tried, convicted of murder in the first degree, and sentenced to be executed. We learn, however, that the Governor of Texas has commuted their punishment to imprisonment for life. It is also asserted that a petition largely signed by the citizens of Texas living near the border, against the execution of the chiefs, was presented to the Governor. This committee brought the subject recently before President Grant, and requested such intervention on his part as might be legal and proper.

(To be continued.)

Selected.

I read abundantly in the Bible, and would set myself tasks, in reading; enjoining myself to read so many chapters, sometimes a whole book, or long epistle at a time. And I thought that time well spent, though I was not much the wiser for what I had read; reading it too cursorily, and without the true Guide, the Holy Spirit, which alone could open the understanding, and give the true sense of what was read. I prayed often and drew out my prayers to a great length; and appointed unto myself certain times to pray at, and a certain number of prayers to say in a day; yet knew not meanwhile, what true prayer was. Which stands not in words, though the words, which are uttered in the movements of the Holy Spirit, are very available; but in the breathing of the soul to the Heavenly Father, through the operation of the Holy Spirit, who maketh intercession, sometimes in words, and sometimes with sighs and groans only, which the Lord vouchsafes to hear and answer. This will-worship, which all is that is performed in the will of man and not in the movements of the Holy Spirit, was a great hurt to me and hindrance of my spiritual growth in the way of Truth. But my Heavenly Father, who knew the sincerity of my soul to him, and the hearty desire I had to serve Him, had compassion on me; and in due time was graciously pleased to illuminate my understanding further, and to open in me an eye to discern the false spirit, and its way of working, from the true; and to reject the former, and cleave to the latter.—T. E. Wood.

Selected.

His wife died in 1784, almost suddenly, leaving him seven children, the youngest ten weeks old. Nothing could be more characteristic than his conduct on this distressing occasion. Her death was wholly unlooked for. When the intelligence was brought to him he was stunned, and remained for some time in silence, quite incapable of giving utterance to his feelings. He then fell on his knees and returned thanks to God, that his beloved partner was now beyond the reach, or need of prayer, and that her Heavenly Father had crowned the abundance of his mercies towards her, by giving her so easy a departure. After her death he was grave, not gloomy. A word of murmuring or repining never escaped his lips. It was the Lord's doing, and it was right.—Oberlin.

THE FRIEND.

NINTH MONTH 30, 1871.

It is well known that one of the greatest hindrances to making the different tribes of Indians contented, and to the progress of civilization among them, and a difficulty that heretofore has, in many sections, been insurmountable, is the unauthorized settlement of large numbers of whites on lands nominally secured to the Indians by treaties. These persons are generally of low moral character and principles, they are bent on pursuing their own selfish interests, and having disregarded both law and justice in taking up their abode where they have no right, they hesitate not to use opportunity and influence to demoralize and cheat the natives. The report of the associated committee, now publishing in our journal, alludes to the many evils flowing from this disgraceful source. By a letter received from our friend Wm. Nicholson, we are glad to learn that the government has determined to right the injustice thus done to the tribes with which it has treaties, guaranteeing to them exclusive possession of certain portions of territory, by expelling the intruders therefrom. The letter from W. N. is accompanied by a printed sheet containing the instructions forwarded from Washington, and extracts from "The provisions of treaties and law."

Our space will not allow giving more of the sheet than the following:

Department of the Interior, Office of Indian Affairs,
Washington, D. C., Sept. 5th, 1871.

Enoch Hoag, Supt. Indian Affairs, Lawrence, Kansas.

Sir:—Referring to your communication of the 22d ultimo, enclosing copy of a communication from Agent Gibson, relative to trespassers making settlements in the Indian Territory, you are informed that the same, together with a communication from Agent Jones, upon the subject, were submitted to the Hon. Secretary of the Interior with report, under date of the 31st ultimo.

Under date of the 4th inst., the Hon. Secretary replies to the same, stating that an examination of the treaty stipulations in reference to this country, satisfies him that such settlements are in violation of the laws and treaties of the United States, and that they should be prevented if possible. He directs me, therefore, to instruct you to give notice of the decision of the Department in reference to the intrusions into the Indian country, before alluded to, and warn all persons who have already gone into the country, that unless they immediately remove therefrom, the Government will take such steps as are necessary to effect such removal.

The Hon. Secretary also directs me to instruct you to notify all white people, in the future, to desist from any attempt to settle in the Indian Territory south of Kansas and west of Arkansas and Missouri; and that, should any person already located in this territory (contrary to law) refuse to remove, or, should any hereafter, in violation of such notifications, settle within the Indian country, you should notify this office of the fact, in which case steps will be taken to remove such persons from the Indian country.

In accordance with the foregoing, and in order to execute the decision of the Secretary, you will give notice to trespassers, by publi-

cation in newspapers published in the vicinity, or by posting up printed notices, or by both.

Very respectfully your obedient servant,
H. R. CLUM, *Act'g Com.*

SUMMARY OF EVENTS.

FOREIGN.—The French Minister of Foreign Affairs has sent the amended customs treaty to Berlin, where it will be proposed, it would be ratified.

President Thiers will remain at Versailles until after the settlement of the question of the evacuation of French territory by the Germans, and of the treaty of commerce between France and Germany.

The German representative near the government of France has filed with the Minister of Foreign Affairs a protest against the excesses committed by the people of Lyons and its vicinity, upon German residents of that city and neighborhood, who, it is alleged, have been shamefully abused and maltreated.

The French wheat crop, it is supposed, will fall short of the average by nearly a hundred millions of bushels, but the yield of barley and minor crops is abundant.

The trial of Rochefort resulted in his conviction, and a sentence of transportation to a penal colony for life.

Favorable news has been received from Algeria, indicating that progress is making towards the restoration of French authority throughout the whole country.

The disarming of the National Guard is progressing quietly throughout France. All the arms taken from the National Guard are to be deposited in the arsenal at Bourges.

The German troops have left St. Denis and the forts have been restored to the French.

President Thiers has been officially assured that nothing was done in the Gasten conference hostile to France.

Odo Russell, the newly appointed British ambassador to the German empire, has arrived in Berlin. The German Reichstag will meet on the 15th of Tenth month.

General Von Moltke has been created Marshal of the Empire.

The German army will be placed upon a peace footing immediately, and reduced to the effective strength of 400,000 men.

The cholera has increased at Konigsberg. The deaths during the week ending 9th mo. 17th, were 300.

An insurrection has broken out in Morocco, and the Moors are making vigorous attacks on the citadel of Melilla, a seaport town belonging to Spain.

The Spanish government has sent a large number of troops to the relief of the garrison. Reinforcements to the Spanish forces are to be sent forward.

On the 21st, 1200 soldiers sailed from Cadiz for Havana.

The anniversary of the occupation of Rome by the Italian troops was celebrated in that city on the 20th, with great enthusiasm. In the evening an illumination took place.

The British and republican agents have been expelled from Rome.

Dispatches from Constantinople announce the appearance of the Asiatic cholera at Smyrna and Constantinople.

Late advices from the Cape of Good Hope state that diamonds continue to be found in great numbers in the fields north of the Cape.

On the 20th, the Chief Justice of India was assassinated in Calcutta by a native who stabbed him with a dagger.

The congress of the International Association met in London on the 21st, and adjourned on the 24th. Delegates from France, Belgium, Italy, Spain and Switzerland were in attendance. Arrangements were made for immediate movements in Germany, Italy and Spain.

Strikes of the workmen are reported in various parts of England. The German workmen recently in London, are returning to their homes.

White workmen were reopening the shaft of the Wigan coal mine, another explosion took place, killing five men and injuring many others. A large quantity of water has been pumped into the shafts, and the flooding continues night and day, but with little apparent effect on the flames.

The weather throughout England has been fair and favorable to the crops.

The postal money-order system, between the United States and Great Britain, goes into operation on the 2d proximo.

The British holders of Confederate cotton-bonds are ordered to give up their claims to the commission of arbitration at Washington.

The new Inman steamship, City of Montreal, has been launched at Glasgow. She is 4,600 tons measurement, and is said to be the largest vessel ever constructed on the Clyde. Another ship is building for the same company, to be called the City of Richmond, and of 4,800 tons measurement.

The Bank of England has advanced the rate of discount to three per cent.

A London dispatch of the 25th says: Newcastle is inundated with foreign workmen. It is probable there will be a strike of the Newcastle and Gateshead strike in a few days.

A dispatch from Calcutta announces the wreck of a steamer on the coast of India, and that one hundred and thirty-eight natives lost their lives.

Marshal MacMahon has been heard before the French Grand Jury in connection of the late war. MacMahon assumed the sole responsibility for the disastrous results of his march from Chalons to Sedan. He declared that he did not act by the orders of the Emperor Napoleon, who exercised no influence whatever upon his resolution.

The French Minister of Foreign Affairs promises the government will afford ample protection to the German residents of Lyons.

The French are now ready to pay the fourth half million (500,000,000 francs) of the German indemnity.

London, 9th mo. 25th.—Consols, 92½. U. S. Bonds of 1862, 91; of 1867, 92; ten-forties, 93½. Liverpool.—Wheat, 45; cotton, 91; Orleans, 94; 9½. No. 2 red western wheat, 10. 10d. 11s. 3d. per 100 lbs.

UNITED STATES.—*Miscellaneous.*—Late dispatches from Salt Lake City state that there will be an attempt to enforce the laws of the United States in Utah. When the Grand Jury was organized on the 19th, in Salt Lake City, all polygamists were excused. The Chief Justice, in his charge to the jury, informed them that they must be governed by the same principles of law which govern grand juries everywhere in the United States, and that acts which are crimes in the States of Ohio, New York and England, are equally crimes here. It belongs to the United States and the people, like those of the rest of the country, are amenable to the laws of the United States. On the 22d, subpoenas were issued to bring before the Grand Jury, Brigham with fourteen of his wives, and George Smith, who ranks next to Brigham Young in the Mormon Church. These proceedings have caused considerable excitement in the territory.

Interments in Philadelphia last week 258, including 48 of consumption and 13 id age. The election canvassers have prepared an extra list comprising the names of parties omitted by the assessors. They add 10,000 names to the regular list, making the total number entitled to vote 155,153. The number of legal voters show that the entire population in the city must be at least 750,000.

As an instance of the rapidity with which merchandise is now conveyed long distances, the San Francisco *Express*, a consignment of 100 silks which came from Japan, and was started overland 7th 17th, arrived in New York 7th mo. 27th, and in Liverpool 8th mo. 7th, making the transit from San Francisco in only 20 days, and from Yokohama in 46 days.

The Markets, &c.—The following were the quotations on the 25th inst.—New York—American gold, 115. U. S. Gold, 116½. Silver, 11½. Cotton, 114; ditto 10-40, 5 per cent, 111½. Superfine flour, \$5.70 a \$8.10; finer brands, \$6.25 a \$9.10. No. 2 Chicago spring wheat, \$1.47 a \$1.50; No. 1 do, \$1.51; red western, -1.52 a 1.57; amber Suet, \$1.61 a 1.62. Oats, 49 a 54 cts. Yellow corn, 74 cts.; western mixed, 71 a 72 cts. U. S. do, 70 cts. Corn, 44 a 45 cts. Beans, 20½ cts. Superfine flour, 4.75 a 5.75; finer brands, \$5.25 a 59. Pennsylvania red wheat, \$1.47 a \$1.50; western red, \$1.50. Rye, 45 cts. Yellow corn, 75 a 76 cts.; western mixed, 73 cts. Oats, 47 a 50 cts. Lard, 91 a 93 cts. Cloverseed, 10 a 10½ cts. Timothy, \$3 a \$3.50. Sales of about 2000 head cattle at 14 and 15 cts. Drove-yard. Extra sold at 63 a 64 cts.; fair to good, 51 a 61 cts., and common 4 a 5 cts. per lb. gross. Corn fed hogs, 61 a 74 cts. per lb. Receipts 4126 head. *St. Louis.*—Flour, \$4.50 a \$6.65. Red winter wheat, \$1.51 a 1.54. Corn, 44 a 45 cts. Beans, 20½ cts. No. 2 mixed corn, 48 cts. No. 2 oats, 30 cts. Lard, 91 cts. Cincinnati.—Family flour, \$6.20 a \$6.35. Wheat, \$1.33 a \$1.35. Corn, 35 cts. Oats, 32 a 40 cts.

RECEIPTS.

Fritchman, \$2, No. 19, vol. 46; from Micajah M. Morlan, Agent, or, for Elizabeth Fawcett, Mark Bonsall, and William Bonsall, \$2 each, vol. 45; from Moses Huntington, N. Y., \$2, vol. 45.

Remittances received after Fourth-day morning will appear in the Receipts until the following week.

WESTTOWN BOARDING SCHOOL.

A TEACHER is wanted for the Girls' Writing School one qualified to give instruction in German and in other branches, either on her duties at the usual of next session, on the 30th of Tenth month.

Apply to Susan E. Coafort, Knox St., Germantown. Elizabeth B. Evans, 322 Union St., Philadelphia. Martha D. Allen, 525 Pine St.

FRIENDS' FREEDMEN'S ASSOCIATION.

Our schools in North Carolina and Virginia receive 11th mo. 1st. We need a few teachers, and are desirous to engage for this service rightly concerned Friends Terms of salary \$15 to \$20 per month.

For further particulars please apply to this office 110 North Fourth St., Philadelphia. N. Y. mo. 1871.

WESTTOWN BOARDING SCHOOL.

The Winter Session of 1871-72 commences on Second day, the 30th of Tenth month next. Friends who intend to teach in the children's school, or who are desirous to make early application to AARON STARBUCK, Superintendent, (address Street Road P. O., Chester Co., Pa.) or to CHARLES J. ALLES, Treasurer No. 304 Arch St., Philada.

FRIENDS' ASYLUM FOR THE INSANE.

New Franklin (Twenty-third Ward), Philadelphia. Physician and Superintendent.—JUSTICE H. WORMINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

MARRIED, at Friends' Meeting-house, Hesper, Pa. on the 24th of 8th mo. 1871, AMOS BATTY, of Hesper to MARY CARSON, late of Monrovia, Ind., members Winesheick Monthly Meeting.

DEED, on the evening of the 20th of Eighth month 1871, between WILLIAM DIXON, the senior, sixth 7 of his age, a beloved and valued member and officer of the Monthly Meeting of Friends of Philadelphia, at the residence of his son-in-law, Nath Warrington, Coal Creek, IOWA, SAMUEL DIXON, his 82d year of his age, a much esteemed member of O. C. M. S. M. Meeting, after a protracted illness, of great physical and mental suffering, he was with a peaceful close.

For "The Friend,"

The Telegraph and the Storm.

(Continued from page 42.)

The observations, of the most reliable and extended character, made within the last few years, go far to show that the storms which bend on low latitudes of the earth from high latitudes are, as the storms of the tropical regions, likewise of a rotary or cyclonic character.

One of the most beautiful illustrations of a law which governs these atmospheric disturbances may be found in the gale which is celebrated as that in which, on the 25th of October, 1859, the noble steamship *Royal Charter* went down, and several hundred lives were lost, in sight of the island of Anglesea, the coast of Wales. 'The *Royal Charter*, so remarkable in its features, and so complete in its illustrations,' as Admiral Fitzroy has well remarked, 'we may say (from the fact of its having been noted at so many points of the English coast, and because the storm passed over the middle of the country,) one of the very best to examine which has occurred for some length of time.'

At the fatal time the barometer, for over a thousand square miles of sea and land, was generally low, and had become so gradually, during many previous days—some as much as a whole week. On the west coast of Ireland all was quiet in the atmosphere; the sky in the north of Scotland was serene. On the 21st of September a vessel sailed the Scilly Islands and encountered no gale, and on the 23d securely left the Channel. On the 24th a vessel bound for America sailed from Liverpool, and met no storm. The Channel squadron noticed the low barometer of 28.50 inches. In London rain was incessant and heavy, and the wind was from the south, while at Liverpool the winds were from the north and northerly. On the dark and rainy morning and evening of the same day the *Royal Charter* was making way around Anglesea, close in shore, to her sadly chosen anchorage on the north side of that island, but in the place where she would feel the full force of the next day's tempest. The tempest broke upon her the next morning near seven o'clock, and in one short hour 'that doubly-empowered ship of iron,' which had circumnavigated

the globe, was destroyed, with nearly all on board. Another vessel, and a wooden sailing ship, not a steamer, the *Cumming*, and several smaller vessels, encountered the same gale but a few miles off, and by a few hours' sailing on the starboard tack (standing to the westward) ran out of the cyclone, and not one was wrecked, nor even materially injured. Had the *Royal Charter*, with her powerful engines and the use of her sails, followed their example on the morning of the 25th, all would, doubtless, have been right with her. The gale did not reach Liverpool until about twelve hours after the wreck of the noble vessel. Liverpool is about fifty or sixty miles from Anglesea.

'The peculiarity of this gale which swept over the deck of the *Charter* was its intense coldness, being a polar current. Examining the diagram of 'the *Royal Charter* storm,' we see the tropical current advancing around the south and east of England with great force, to be, with greater force, speedily driven back by the polar current.

'A letter from Dublin said, 'In England you have had a tremendous gale (October 25-26). Here it was not felt.' A dead calm and a sharp frost of unusual severity prevailed on the west coast of Ireland. A vessel returning from Iceland had heavy gales from the east-northeast between October 23 and 25.

'While at Anglesea,' says Fitzroy, 'the storm came from east-northeast, in the Irish Channel it was northerly; and on the east of Ireland it was from the northwest; in the Straits of Dover it was from the southwest; and on the east coast it was easterly—all at the same minute. Thus,' he adds, 'there was an apparent circulation of cyclonic commotion passing northward from the 25th to the 27th, being two complete days from its appearance in the Channel, while outside of this circuit the wind became less and less violent; and it is very remarkable that, even so near as on the west coast of Ireland, there was fine weather, with light breezes, while in the Bristol Channel it blew a northerly and westerly gale. At Galway and at Limerick, on that occasion, there were moderate breezes only, while over England the wind was passing in a temper, blowing from all points of the compass in irregular succession, around a central, variable area.'

'The phenomena of the *Royal Charter* gale have been given not as being peculiar or anomalous in the annals of cyclonology, but for the accuracy with which they were recorded, and because they furnish the reader with the type to which most American storms, and, indeed, all storms, more or less strictly conform, as geographical or orographical circumstances permit or prevent.

'Storms similar in their conditions to that of the *Royal Charter* not infrequently occur in the United States, especially in the winter, when the conflict of the two currents, the polar and the equatorial, in high latitudes, is

marked by sudden transitions in January from mild, moist, and balmy weather to a sudden and fearful cold, below zero. The furious battle of the elements rages, and reminds us of the famous Homeric description of Hector's attack on the Grecian walls:

'As when two scales are charged with doubtful loads
From side to side the trembling balance nods,
Till, poised aloft, the resting beam suspends
Each equal weight, nor this nor that descends.'

It may suffice to give one instance of this in the great northwestern snow-storm of January last. Speaking of this storm, the Chicago *Times* of the 16th of January said:

'The tremendous storm which has just passed is without a peer in the knowledge of the oldest inhabitant.

'The great snow-storm which visited Chicago on Friday (the 13th) first made its appearance on the 10th ultimo at Reno, among the Rocky Mountains, where it commenced its initiatory rage with such violence and with such a blinding fall of snow that the workmen repairing the Union Pacific track could not see ten feet before them. It made its appearance in Cheyenne on the 11th, and since then has been steadily advancing across the country. It has been one of those peculiar northwestern storms whose coming was not indicated by the falling of the mercury in the barometer. On the other hand, the barometer rose, while the thermometer fell. The immediate cause of the storm is indicated in the falling of the thermometer so suddenly after such mild weather.

'The earliest direct news of the storm was received from Cheyenne, the most western meteorological station, it having commenced to snow there about 4 p. m. on January 11. Reports were also received from Omaha, Duluth, and St. Paul on the same day, showing that the storm had also commenced in those cities. The storm continued, with no cessation of violence, till about midnight of the 12th, when the weather telegrams failed to give any further knowledge of it. It had suddenly disappeared; but only to strike Chicago with a premonitory drizzle of rain on the morning of the 13th, the same symptoms showing themselves in St. Louis and Milwaukee.

'The amount of snow that has fallen during the present storm is almost unparalleled; but, great as it is, it furnishes no gauge for the quantity of moisture that has reached the earth, as the amount of rain and sleet held in the snow makes it almost as heavy as salt. Another interesting feature of the storm has been its extreme duration, as compared with its violence. As bitter as the driving wind has been, the storm took thirty-nine hours to reach Chicago from Omaha, a progress which would give the very slow momentum of about ten miles an hour.'

'The Chicago storm was from the great polar current, and, as is the wont of westerly storms (from the orographic peculiarity of the

country), made its way to the Atlantic along the lakes and through the valley of the St. Lawrence.

"With daily telegrams from the Azores and Iceland," Buchan says, "two and often three days' intimation of almost every storm that visits Great Britain could be had." The Iceland telegram would give tidings from the polar air current, and that from the Azores would advertise the movement of the tropical current.

"It is highly important that the United States should have telegrams from the Pacific, and from the valley of the Saskatchewan, or some point in British America on the eastern slope of the Rocky Mountains. The importance of reports from the southwest also was fearfully demonstrated in March, during the already mentioned interruption of the Signal Service, when the tornado in St. Louis destroyed many lives, and \$1,000,000 worth of property.

"It is due to the cyclone theory, or 'law of storms,' here and heretofore advanced by the writer, to say that many of the storms which seem to be deviations from the cyclonic law are modified by *interfering cyclones*. This view was formally adopted by the committee of the Meteorological Department of the London Board of Trade. Mr. Stevenson, of Berwickshire, England, as quoted by Fitzroy in the Board of Trade Report for 1862 (page 33), has some striking observations, founded on his own invaluable labors: 'The storms which pass over the British Isles are found generally to act in strict accordance with the cyclonic theory. In many cases, however, this accordance is not so obvious, and the phenomena becomes highly complicated. This is a result which often happens when two or more cyclones interfere—an event of *very frequent occurrence*. When interferences of this description take place we have squalls, calms (often accompanied by heavy rains), thunder-storms, great variations in the direction and force of the wind, and much irregularity in the barometric oscillations. These complex results are, however, completely explicable by the cyclonic theory, as I have tested in several instances. A very beautiful and striking example of a compound cyclonic disturbance of the atmosphere at this place was investigated by me in September, 1840, and found to be due to the interference of three storms.' Mr. Stevenson gives a number of instances of interfering cyclones which confirm this view. The points of *interference*, where two cyclones strike and revolve against each other, are best marked by a peculiarly and *treacherously* fine rain.

"It may not inappropriately be added here that the cyclone theory, so strikingly illustrated by the hurricanes of the West Indies, has been demonstrated by Dove to apply to the typhoons of the Indian Ocean and China Seas. And Mr. Thorn has long since shown that the theory holds good for the storms of the Indian Ocean, south of the equator."

(To be continued.)

Selected.

One secret prayer, or deep sigh from the wrestling soul, produced by the eternal Spirit, is of more real service to it, issues from it with more fervor, prevails more effectually with the Father, and procures it more refreshment, than ten thousand vain repetitions; because the virtue of the Spirit of the great

Intercessor being in these prayers and sighs, they cannot but find acceptance.

For "The Friend."

From the Letters and Papers of John Barclay.

(Continued from page 37.)

His mind had for several years been impressed with an apprehension that he should be called to the work of the ministry; and in the prospect of it, he was preserved in a waiting, dependent state; and fervent was his concern to be entirely given up to serve the Lord in the way of His holy requirements. At the interment of his beloved wife, in the Sixth month, 1823, he was engaged in vocal supplication; and in the autumn of that year he spoke as a minister. In allusion to this solemn and important work, after describing the fear and caution with which he had entered upon it, he says, "The weight and sweetness that dwelt on my mind after this surrender, cannot be set forth. Oh! how it rested on my spirit all the day in an unutterable manner! and yet such freedom of spirit,—so that nothing seemed a trial, or that to which I was unequal. I shall not easily forget how comfortable and at ease in my mind I felt. Oh! it was a heavenly feeling, and nothing short of Him that is in Heaven could give it."

He was acknowledged a minister by his Friends in Cornwall in 1825, and in the following year was married to Mary Moates, and removed to Alton. After a residence of three years at that place, he settled at Cropton; and in 1835 he removed to Stoke Newington, within the compass of this Monthly Meeting, where he resided during the remainder of his life. In the course of the before-mentioned period, he paid several religious visits, with the unity of his Friends; and in one of these journeys he travelled into Scotland as far as Aberdeen.

He had been from his youth of a tender constitution, and for the last few years of his life he had suffered much from a disease in his knee, which rendered walking or other active exertion difficult to him. He was, however, very exemplary in his efforts to attend our religious meetings; in which the exercise of his dedicated spirit was strengthening to many. His engagements in the line of the ministry amongst us were not frequent; but he was at times led to address his Friends in a weighty and feeling manner: endeavoring to turn their attention from a dependence on man, and from all that is superficial in religion, to a single reliance on the great Head of the church, "the Minister of the sanctuary and of the true tabernacle, which the Lord pitched, and not man."

Our dear Friend was remarkable for integrity and uprightness of heart; and in the private walks of life his conduct was strikingly circumspect, and his conversation, whilst innocently cheerful, was instructive, being seasoned with grace.

Notwithstanding he was, in the ordering of unerring Wisdom, much confined at home from bodily infirmity, yet his concern for the prosperity of our Society remained unabated; and his mind was actively employed in endeavoring to promote the spiritual welfare of its members. With this object his time was much occupied in editing a series of publications, selected from the writings of our honored predecessors in religious profession.

In the Eleventh month, 1836, he paid an

acceptable visit in the love of the Gospel, to the families of Friends at Brighton; and in the Eleventh mo. 1837, he felt attracted by the same precious influence, to a similar engagement in his own particular meeting at Stoke Newington. After going through nearly half the families, wherein his service was much to the comfort of his friends, finding his constitution increasingly enfeebled, he returned to the Monthly Meeting its minute grants him for that purpose, accompanying it with letter, replete with the expression of religious concern, from which the following is extracted. "On proceeding in the weighty engagement before me, I may acknowledge that though no wonderful outpouring of Divine power was my portion, I was mercifully favored, during the few days that I entered upon the work, with such a sense that the Lord preserved the simple and the upright that it was as my meat and drink to be in among my friends; hard things were made very easy, and bitter things full of sweetness, a gently flowing stream of heavenly goodness being extended in every hour of need, though in a way humiliating to the creature, and as nothing of the flesh could glory."

His health continuing to decline, he went to Brighton; but there his disposition increased, and on the 8th of the Fifth mo. he was, by medical advice, removed to Turbridge Wells; after which he survived but few days.

On the evening of the 9th, when about to retire to rest, on rising from his chair, an leaning on the couch, and on the arm of his beloved wife, he supplicated thus: "Oh gracious Father! if it please Thee, spare us each other a little longer, and make us *not entirely devoted* to Thee, and thy precious cause of Truth in the earth; nevertheless be our will, O Lord! but thine be done."

On the next day, which was the one immediately preceding his decease, he uttered many weighty expressions; amongst which were the following: "The Truth shall prevail—Truth shall reign over all.—None that truly in the Lord shall be confounded; but the shall be as Mount Zion, which cannot be moved. You all know my desire to be preserved near the Lord; to be strengthened and upheld by the Lord; to be found in Him; this is the way of peace. I trust we shall be strengthened and animated to go through on day's work; then we shall find mercy at the hands of the Lord.—Let us look to the Lord for strength, at all times, and under all circumstances.

In the latter part of this day, his voice was lifted up in a constant melody, and for man hours together, like a song of praise; during which, these words were clearly distinguished, "Oh Lord!—dear Lord!—come. I bless th Lord.—I am the Lord's for ever.—Cleave to Him, O! cleave to Him,—love Him *with a heart*." The name of Jesus was often to be heard, and the word Hallelujah was frequently repeated.

About four o'clock in the afternoon of the 11th of Fifth month, 1838, he peacefully passed away, aged forty-one years, a minister about fifteen years; and is, we reverently trust united to the redeemed before the throne, wearing the new song, "Worthy is the Lamb that was slain, to receive power, and wisdom and riches, and strength, and honor, and glory, and blessing."

(To be continued.)

From The "British Friend."

Thomas Drewry's Protest.

We may inform our readers that this document, a copy of which appears in our advertising columns, was sent to our last Yearly Meeting, but, as might be expected, was not read therein; it was also forwarded about the same time to the "Charity Commissioners," London, and its receipt duly acknowledged that body.

All whom it may concern:—

THOMAS DREWRY, of Fleetwood, in the County of Lancaster, Grocer, do solemnly, sincerely, and truly declare and affirm, That in a member of the religious Society of Friends, commonly called Quakers; that I long to Preston Monthly Meeting, which is a constituent part of the Quarterly Meeting in Lancashire and Cheshire, and within the bounds of the Yearly Meeting of London; I am entitled to all the rights and privileges of membership in the Society of Friends, such rights and privileges have not to this been called in question by any of the constituted meetings of said Society.

I declare that the adoption of, or acquiescence in new principles and new usages, at variance with the fundamental principles originally established in the Society, is a departure from the original compact, and a lowering of the ancient standard of faith, and that a meeting so departing becomes an alienation, and is thereby divested of all rightful claim to be regarded as a meeting in communion with the true Society of Friends.

I assert that great and fundamental changes have taken place within what is styled the Society of Friends, in recent years, in reference to Faith and Doctrine.

I declare that the Yearly Meeting of London, as it is called by the said Society, has officially embraced new Doctrines, and to that extent discarded those views of primitive Christianity, which, through the order of Infinite Goodness, were revived, promulgated, published to the world, lived up to, and suffered for, by Friends at the beginning.

I affirm that evidences of this defection are abundant and are almost everywhere apparent.

I assert, and am able and willing to produce the clear and ample proof, that the changes of Doctrine referred to, have been pointed out by well-concerned Friends again and again; and I also assert that for upwards of thirty years, these have availed themselves of the opportunities which the various Meetings for Discipline afforded, to speak of the hurtful influence of the changes in question, but that protest, expostulation, remonstrance, and warning, have been alike disregarded.

I affirm that nothing convincing to the Friends has been put forth in defence of the innovations in Doctrine, nor has it been done by official documents, or otherwise directed, wherein the Early Friends were mistaken in their views or apprehensions of the matter.

I assert that it is not in the power, or within the competency, or constitutional functions, of any of the Meetings for Church Affairs of the Society of Friends, called and known by the name of Meetings for Discipline, to alter, abrogate, or abolish the Religious Principles or Doctrines of Truth, which were held forth, maintained, and promulgated by the

founders of this people; or to rescind, abandon, or annul the Religious Testimonies, Practices, and Usages, which it was the care and concern of our predecessors in the Truth, in the fear of the Lord to maintain.

9. I affirm that not even a Yearly Meeting, the highest court as regards Faith and Practice amongst Friends, can change the fundamental Principles of the Society, or the Testimonies which have ever uniformly flowed from them, and which have been left to us in trust for succeeding generations.

10. I maintain that the abandonment of said Principles is an act of separation.

11. I affirm, in accordance with the doctrine of our ancient Friends, that all who desert the Religious Principles, which first drew together and distinguished the Society, be they few or many, are truly Separatists, and that those who adhere to the original faith, have the power to say to the dissentients, You have changed your views, we can no longer acknowledge you to be in fellowship with us.

12. I declare that London Yearly Meeting, as it is termed, has separated itself from the sound part of the Society; and I affirm that the taint of separation necessarily reaches and attaches to all meetings, of whatever kind, that remain subordinate thereto, whether they be Quarterly, Monthly, or Preparative, together with the subsidiary meetings thereto belonging.

13. Seeing that London Yearly Meeting, so called, has sanctioned and introduced into its midst, changes and innovations in Doctrine of a very important character,—seeing that it has done that which it had no constitutional authority to do,—seeing that it has broken the compact which bound the Society into one body, for the support and maintenance of the Principles and Testimonies of Truth,—I maintain that it has become the Yearly Meeting of a body of Separatists, and consequently has no lawful right, title, or authority to assume the name or to exercise the functions of a Yearly Meeting of the Society of Friends.

14. I, therefore, under a sense of apprehended duty, protest against the claim or prescriptive right, set up by this Meeting of Separatists, either by itself, or by any of its subordinate Meetings, to have, hold, retain possession of, deal with, or administer *trust property*, which belongs not to it, but belongs to those who adhere to the original faith of the Society of Friends, for whose sole use and benefit the several trusts were created, by their predecessors in religious profession.

(Signed) THOMAS DREWRY.

Declared and affirmed at Fleetwood, in the County of Lancaster, this twentieth day of May, one thousand eight hundred and seventy-one, before me, (Signed) J. KEMP, Justice of the Peace, acting in and for the County of Lancaster.

For "The Friend."

Memoirs of Mildred Rateliff.

(Continued from page 45.)

About the close of 1810, Rebecca Preston writes to Mildred Rateliff the following letter of christian love and sympathy:—

"Beloved Friend,—I received a letter from thee, dated 5th of the Ninth month last. It was truly satisfactory to hear from thee, with whom my spirit has often deeply travelled, since we parted in the fresh flowings of love, which I trust proceeded from the pure Foun-

tain of light and life. I do feelingly sympathize with thee through and in all thy sufferings and deep baptisms. They are the lot of the righteous: but through faithfulness and obedience we can rejoice in the God of our salvation, and sing praises to his glorious name. He has ever been our help, and I trust will be so, even unto the end.

"I may inform thee that we had a pleasant journey home from the Yearly Meeting; there being twenty of us in company. We reached Lyneburg on Seventh-day morning, took breakfast there, and soon got home, where we found all well. I received soon after a letter from Philadelphia, informing me of the death of my father. It was a cause of sorrow; yet I had to rejoice in finding that he said his work was done, and that he was willing to go. Oh, that it were the happy lot of all to live so, that they might lay down their heads in peace at last.

"I feel deeply concerned for Friends in these parts, for the pure principle of light and life is oppressed in many of them. Yet I have to rejoice in believing, there are some who are deeply concerned for the prosperity of the Truth; who desire that Zion might arise and shake herself from her many pollutions, gathered from the dust of the earth.

"I shall much rejoice to hear of your being agreeably settled, where you may enjoy sweet harmony and concord together, and in your friends. For my part, I seem much stripped. At times as if I was almost forsaken—poor and needy. These are humbling seasons, and so ordered in Divine wisdom for the trial of faith and patience. Oh, that I may ever be watchful, and keep a single eye to Him who has ever been my helper and strength through all trials, and in every needful time. A saying of our dear Lord has often occurred to my remembrance: 'In the world ye shall have tribulation, but in me peace.' This is great encouragement indeed for us to look unto Him from whom all peace floweth.

"It was truly satisfactory to hear such a particular account of thy journey, as also to hear of some of my beloved friends in Virginia and Carolina. I was sorry to hear of thy frequent indisposition, though I had to rejoice that thou wast so supported, and enabled under thy bodily infirmities to pursue thy journey.

"Friends are moving very much from these parts. Among the rest, dear D. M. and her family. Seneca Meeting, it is likely, will be broken up, as I expect Ivy Creek will also. I rather suppose our Quarterly Meeting must fall before long. If it should, I believe more of us will be anxious to move.

"I conclude in gospel love, thy real friend,
REBECCA PRESTON."

David Vestal, who was in Ohio on a religious visit in 1811, addressed a letter to Harrison and Mildred Rateliff before returning home. It was dated "9th mo. 16th, 1811." He says in it: "Dear Mildred, thou hast been very near to me, and still remains so to be. I conclude with a salutation of unfeigned love to you, and with a desire that all your movements may be in right counsel—and mine also."

Her memorandums are resumed 9th mo. 26th, 1811. She says: "From an apprehension of duty, I now take my pen in hand to set down a little of the exercise of mind through which I have lately passed, and

which seems awfully and weightily to impress my spirit. I believe it is required of me by my Divine Master, to pay a visit in gospel love to Friends and others in Philadelphia, and many other places through the Eastern States. When I take into view the situation of things every way, I have no words to convey my feelings. Yet I have been enabled in a good degree of resignation to say, 'Not my will, but Thine, O Father, be done! Thou knowest my situation. I need not make it known unto thee. I am glad and thankful that through Thy aid I am able to say, Lord thou knowest all things! Thou knowest that I love thee, and desire to serve thee in the line of thy appointments, while I live. All I ask, all I crave is, that thou mayest be my all in all, every day and in every place: then it matters nothing for aught beside.'

Although Mildred Ratcliff was brought into a state of submission of her own will in this concern, it appears that when opened to her Monthly Meeting at that time, some difficulties were thrown in the way of her accomplishing it.

In a letter to her beloved friend Rebecca Preston, she mentioned the prospect which weighed upon her mind, and received a reply, dated "11th mo. 11th, 1811," from which we extract the following:

"My mind is often turned towards thee in the love of the Gospel, and I nearly sympathize with thee in the many deep trials and baptisms thou hast to pass through. Mayst thou not be discouraged. He who is the God of thy life, thy dear Redeemer, will surely be near thee, and if thou art faithful, will preserve thee through every trying dispensation.

"Dear friend, the weighty prospect before thee is indeed awful. Mayst thou deeply weigh the matter, and then when the command is, 'Go forth in my name, and do my work,' the promise also will be fulfilled to thee, 'I will be with thee, and enable thee to perform it.' Then, too, I believe thou wilt have the concurrence and near sympathy of thy brethren and sisters of that Quarter. The prayer of my heart is for thy preservation.

REBECCA PRESTON.

In a memorandum M. Ratcliff writes: "My mind is once more strengthened and encouraged to trust in God! Yea, in that God who has, through every age of the world, proved himself to be the helper of the helpless, and the upholder of those who put their trust in Him. Under a fresh sense this morning that He is good, I venture to pen down what opens in my mind. Were it not for mercy, Divine mercy, vouchsafed to me, and the help handed to me from instruments in various quarters, I must long ago have fainted by the way, under the heavy load of affliction which has attended me on my earthly pilgrimage. Magnified be the Name of my God forever, I am yet able at times to say, 'I know that my Redeemer liveth, and because he liveth, I shall live also;' for He will keep me through the mighty arm of His power."

(To be continued.)

Ah! creeds and forms, and a literal faith, will do nothing for us; we must give up our own wills entirely, and become like little children; it is the only way we can enter the kingdom. I have known no other religion all my life, than the will of God, and now whether I live or die, I shall be with my dear Saviour.—S. L. G.

TRUST.

I know not if dark or bright
Shall be my lot;
If that wherein my hopes delight
Be best or not.

It may be mine to drag for years
Till's heavy chain,
Or day and night my meat be tears
On beds of pain.

Dear faces may surround my hearth
With smiles and glee,
Or I may dwell alone, and mirth
Be strange to me.

My bark is wafted to the strand
By breath divine,
And on the helm there rests a hand
Other than mine.

One who has known in storms to sail
I have on board;
Above the raging of the gale,
I hear my Lord.

He holds me when the billows smite,
I shall not fall;
If sharp, 'tis short; if long, 'tis light—
He tempests all.

Safe to the land—safe to the land—
The end is this:
And then with Him go hand in hand
Far into bliss.

Dean of Canterbury.

Selected.

murder and rapine, and with protecting those who boasted of their guilt. The latter charge, justly founded, would not only have been lamentable, but also far more damaging to the cause in which we are engaged, than are the present futile attempts of those who oppose our work and attempt to prove it a failure by citing the above case of arrest. We deny totally that this is any evidence whatever of the failure of the peace policy. From the nature of men, even in civilized communities, there is frequent necessity for legal restraint and punishment; and it cannot be wonderful that some Indians should so persistently violate law as to render necessary the enforcement of its provisions. Most surely Friends have never claimed that if they were permitted to fill all the offices in the land, no occasions would arise for arresting and punishing criminals. It is true, that Lawrie Tatum called upon the military to make the arrest; but there was no other authority in existence in that section. In short, we feel that under all the exceedingly trying and perplexing circumstances which have surrounded our agent during his period of care over these Indians, not one of us can feel confident that we would have done better than he.

"In the above enumeration in the several Agencies, various small and scattered bands have not been estimated. Recently also there is a large accession of Northern Cheyennes and Arapahoes to the tribes under agent Darlington. We think a complete census of the Central Superintendency would exhibit not less than 20,000 Indians.

"The Indians of our country may be classified into Semi-civilized, and Blanket Tribes. In the former class there are some individuals much in advance of others, educated, industrious and thrifty. As a class they are located, and live mainly by the cultivation of the soil. Many of them profess Christianity, but the greater portion are heathen, pay comparatively little regard to the sacredness of the marriage relation, and indulge in their dances and accompanying revelry and dissipation. Their numbers usually diminish rather than increase, for a state of semi-barbarism is less favorable to health and longevity than either civilization or the savage state. The savage is accustomed to constant exposure from infancy; the civilized man protects himself against exposure; whilst the semi-barbarian in his ignorance and improvidence, some times protects himself when he does not need it, and thus relaxes and debilitates his system and then again exposes himself to wet and cold without protection, and suffers the penalty in disease and premature death. The semi-barbarian, unchristianized, also gives a looser rein to his animal passions, in those increased facilities of indulgence, afforded by contact with vicious white people, and adds to his barbarian vices intemperance and a sensuality peculiarly potent in physical deterioration.

"The Blanket tribes vary very much in their condition. Some are located and derive a partial support from the soil; making occasional visits to uninhabited regions for securing buffalo meat, venison, robes and furs. Other tribes live a wandering life, roaming over the plains and only coming to their agencies, a band at a time, to secure their rations of sugar, coffee, flour, &c. The civilization of the latter class presents obstacles of the most formidable character, as has been already shown in our remarks upon the Kiowas and

BRING OUR SHEAVES WITH US.

The time for toil has past, and night has come,
The last and saddest of the harvest eves;
Worn out with labor long and wearisome,
Drooping and faint the reapers hasten home,
Each laden with his sheaves.

Last of the laborers, Thy feet I gain,
Lord of the Harvest! and my spirit grieves
That I am burdened not so much with grain
As with a heaviness of heart and brain;
Master, behold my sheaves!

Few, light and worthless, yet their trifling weight
Through all my frame a weary aching leaves;
For long I struggled with my hapless fate,
And stayed and toiled till it was dark and late;
Yet these are all my sheaves.

Full well I know I have more tares than wheat;
Brambles and flowers, dry stalks and withered leaves;
Wherefore I blush and weep, as at Thy feet
I kneel down reverently and repeat,
"Master, behold my sheaves!"

I know these blossoms, clustering heavily
With evening dew upon their folded leaves,
Can claim no value or utility;
Therefore shall fragrant and beauty be
The glory of my sheaves.

So do I gather strength and hope anew;
For all I know Thy patient love perceives
Not what I did, but what I strove to do;
And, though the full ripe ears be sadly few,
Thou wilt accept my sheaves.

For "The Friend."

Second Annual Report of the Associated Executive Committee of Friends on Indian Affairs.

(Continued from page 47.)

"We have heard of no depredations by the Kiowas since the arrest of their chiefs, and we hope they will take warning by what has occurred. The Cheyennes and Arapahoes do not seem inclined to justify the Kiowas, and will hardly be persuaded by them to join in measures of retaliation.

"In judging the action of agent Tatum, Friends must remember that he had been placed in a position by the Society itself, in which he must have acted as he did, or have stood justly charged with upholding acts of

anches. But even amongst these wild wandering people, there are usually a few who can be persuaded to locate and to cultivate the soil, and it is by assisting these in building houses, opening small farms, &c., a nucleus is formed for a larger work of civilization in the future. As these few individuals adopt the habits of civilization and become self-supporting and thrifty, and their children educated, they influence others to follow their example. The blanket is very much a type of the Indian's tendency to hurry. Whenever he undertakes to support himself by manual labor he lays aside his blanket of idleness and inconvenience.

One great object of President Grant's policy is to secure peace with the Indian, because war always entails much suffering and crime upon both parties, and a civil war is especially terrible in its consequences to women and children, as neither usually discriminates to much extent in the law of life for life and scalp for scalp, and war is far more expensive than peace. The government being already deeply indebted, it well became a wise administration looking at its own reputation, and at the good of the country, to inaugurate measures of retrenchment. Thirdly, the great Pacific Railroad and other schemes for the development of the vast resources of the continent which bind together by the force of common interest all its parts, would be seriously jeopardized by Indian warfare. The construction of long lines of railway, traversing lands inhabited by hostile Indians, would be almost impossible. Finally, it was doubted that a just and humane treatment of the Indians in the future, would tend in any degree to obliterate the odium which attaches itself in the eyes of the Christian world, to our Government, because of the violence and heartlessness and bloodshed which so often characterized its administration of Indian affairs.

When these were some of the promptings of the President, we believe it safe to say that he felt a strong desire to answer these promptings by cordial co-operation, both in the object in view as in itself a most noble one, and because they believed that it would offer the President to commit to their hands some of the red men, they saw an opening leading to their Master's harvest-field, and hoped to be able to bring some of the best of their care to a practical knowledge of Christianity and to a participation in its joys and blessings.

The question then arises—Can these objections be answered?

In considering this question, we must remember that in a matter of this kind *perfect* success cannot in the nature of things be expected—especially in a short time. The husbandman does not expect *every* seed which he sows to perfect fruit. He knows some of it will perish. Neither is he disheartened by the punts of his enemies who, *before the time* *ripest*, cry, 'failure,' 'failure.' In the putrefaction of the leaf and the opening of the bud, he sees indications of the hoped-for harvest and he labors on in faith, waiting till the dew and the dew and the rain have had their part to accomplish the results for which his providence has appointed them.

But let us consider the past of our work, as it has been, in reference to the great object of the President to secure peace with

the Indian. A little more than a year ago there was a grand Indian Confederation, from the Sioux of the Upper Missouri to the Kiowas and Comanches of the Red River of Texas, which threatened a most serious border war. Military men unhesitatingly declared their convictions, that war last summer was inevitable, and some of the post commanders called urgently for reinforcements. With the settlers upon the border there was much excitement, and the constant dread of those horrors heretofore so often enacted. At this juncture, a striking circumstance, bearing upon the general result, occurred. A member of our Committee, seeing the threatening storm upon our Western frontier, and anxious to prevent its fury and destruction, suggested to Vincent Colyer, the Secretary of the President's Indian Commission, that Red Cloud, the most influential chief of the Sioux Indians, be invited to Washington, in friendly conference with the President, upon the subjects which were rendering the Indians dissatisfied. Secretary Colyer at once recommended the suggestion to the favorable notice of President Grant. Near the same time, a telegram was received by the War department from General Smith, in command in the Upper Missouri region, saying that Red Cloud had just expressed to him a desire to visit his Great Father at Washington, in conference upon various matters with which he felt aggrieved. These concurrent propositions, apparently so diverse and disconnected in their origin, were immediately and favorably entertained by the President, and an order was issued to General Smith, to invite Red Cloud and other chiefs to Washington. We all know the effect of that visit upon Red Cloud, and through him, upon that most powerful and warlike of the Indian tribes, of which he is the most distinguished representative. In the meantime, our agents amongst those wild and restless tribes in the southwest, the Cheyennes, Arapahoes, Kiowas, Comanches, and Apaches, were earnestly striving to co-operate with the Government in bringing about a better state of feeling amongst their Indians, and to break up, by force of persuasion and skillful management, those warlike combinations, so full of terror to the border people. It is well known that we had no *Indian* war last summer, notwithstanding the confident predictions of military men, and the equally confident expectations of settlers. We cannot deem it wrong to attribute this result to the wise and pacific policy pursued; and in the prosecution of that policy, Friends certainly had an important share. Herein was a great pecuniary saving to the Government, for it costs \$5000 a day to support a regiment upon the frontier, or \$450,000 for a three months' campaign—and it would have required twenty regiments in such a war, over so great a territory—costing \$9,000,000. Herein was the saving of the lives of many soldiers, and of some Indian warriors; a saving of hundreds, perhaps thousands of lives of women and children, both white and Indian; a saving to the Great Pacific Railroad, and to all those interests of the entire country which are promoted by this truly wonderful interoceanic connection; a saving to the honor and reputation of our country; a saving in the demonstration to the Government, that peace purchased by honesty and fair dealing, is cheaper than war; a saving in the education of the popular mind to the practicability of

peace, and ultimately to a demand upon the government for such a policy as will maintain it.

(To be continued.)

The Domesticated Toad.—We shall finish this chapter on reptiles with a short account of a toad which lived more than thirty-six years in a hole beneath the door-step of a French farm-house. How old it was when first noticed no one could say, but it had probably lived a long time before familiarity with the sight of man emboldened it to rest tranquilly on the door-step, over which many persons were constantly passing. The step became, in reality, the reptile's hunting-ground, where, with little trouble, it might capture the ants which persisted in crossing and recrossing the step. The toad, "hunting for its supper," became one of the regular sights of the neighborhood, and certainly the skilful manner in which the creature used its wonderfully formed tongue, left an impression upon all spectators that this toad was a most clever insect-hunter. Four particulars, especially, fixed the attention of the more thoughtful observers. It was soon evident that the toad was most skilful in judging distances; and the tongue was never darted at an insect until it came within a certain range—this space was never miscalculated. The accuracy of the creature's aim was another matter for surprise. The insects were generally, if not always, in motion when the tongue was darted out against them; but the arrow never failed to hit. The singular rapidity with which the organ was shot forth excited equal wonder. Many curious watchers were unable to note every motion; only a few of the keener eyes could manage this. Yet this operation was a complex one. The tongue is doubled or folded up when in the mouth; there is therefore a twofold action required—an uncoiling of the weapon, and then the darting out process. The withdrawing of the tongue, with the captured insect on its tip, was not less remarkable than the other operations. Notwithstanding the rapid motion, the fineness of the tongue tip, and the struggles of the prey, the captured victim was never dropped.

Now it is clear that, in all this hunting work, the toad intelligently employed two instruments in harmonious co-operation—the eye and the tongue. The one never failed the other. The rifle-shooter knows how much practice is required before eye and hand act perfectly together; our domesticated toad had gained this power over the combined action of two dissimilar organs.

The tameness of this toad was so remarkable that we may justly call the animal "domesticated." It would remain quietly in one hand, and take its food from the other, provided a leaf were placed on the hand which held it. Without this precaution, the warmth of the human skin evidently annoyed the cold reptile. Few things seemed to please the animal more than placing it on a table in the evening when the lamp was lighted. It then, with the greatest confidence, would look round with its gleaming eyes, and when insects were placed on the table, snapped them up with a rapidity which seemed greater than in its day huntings.

In this way the animal lived for thirty-six years, in, or near the house, the pet of the village and the neighborhood. It might have lived for as many years more, had not a tame,

but spiteful and jealous raven pecked out one of the toad's eyes. Then we saw how much the proper use of its tongue depended on the sight. The toad could no longer measure distances accurately, or aim with certainty; it died in about a year after the injury, apparently from starvation.—*Merritt.*

THE FRIEND.

TENTH MONTH 7, 1871.

Our readers will find in to-day's number, a statement in the form of an affidavit made by Thomas Drewry, taken from an advertising page of the last number of the *British Friend*, and also what is said of it by the editor of that journal. We transfer it to our pages as a document which will throw some light on the history of the present eventful period in our religious Society. We know nothing of its author, nor of the motives that induced him to resort to this mode for giving expression to his opinions and feelings, except as he states the latter to be "under a sense of apprehended duty." While recognizing the truth of much that he affirms, we are unable to see what is to be gained by the course he has pursued for setting it forth, unless it may be intended to bear on some future legal proceedings, which we would greatly deprecate. Its perusal has awakened feelings of profound sadness.

In looking over the different meetings in our widespread religious Society, and meditating on the great changes in doctrine and practice that, within comparatively few years, have been introduced and found acceptance with many within them; in contrasting the powerful gospel messages, and the humble, self-denying, dedicated lives of those who, within the range of our memory, were considered the anointed ministers, or the practical exponents of the holy religion which Friends profess, with the doctrines preached, and the corresponding conduct exhibited by very many who, in the present day, occupy similar positions of influence; and when reading the high wrought accounts given of the varied utterances and other effects produced by the sensational religion now so much in repute, we are sometimes ready to fear that all the distinctive characteristics of original Quakerism will be lost, and that He who raised up the Society in the beginning, who "fenced it and gathered out the stones thereof, and planted it with the choicest vine," will entirely "take away the hedge thereof, and it shall be eaten up, and break down the wall thereof, and it shall be trodden down." But we know that these feelings of doubt and dependency ought not to be indulged, and that all who are waiting for the consolation of Israel, when thus tried, should pray for an increase of that living faith which, in former days of gloom and conflict, "subdued kingdoms, wrought righteousness, obtained promises, stopped the mouths of lions," and made those who possessed it wax valiant in fight, so as to turn to flight the armies of aliens.

Those who are grieved, and mourn over the condition of the Society, are not merely clinging to dead forms, with too much prejudice to recognize the original life in the new development, as they are not infrequently charged. The departures in doctrine are too palpable to be denied, the disregard of the testimonies growing out of sound doctrine are

evident to the most superficial observer. "Do men gather grapes of thorns, or figs of thistles? Even so every good tree bringeth forth good fruit; but a corrupt tree bringeth forth evil fruit."

We have no relish for a conservatism so intolerant that it will not bear new modes of thought, or listen to new forms of expression, even though they affect not any essential point of christian faith; or which sums up the evidences of vital religion in a determination to consider whatever varies from accustomed traditions or practices, as necessarily heretical and mischievous. We know that religion is not designed to erect a barrier against improvement, and that while it enjoins a righteous jealousy of every thing, however commended by intellectual culture, or upheld by popular excitement, that impugns the principles of the gospel or thwarts their application, it allows a liberty that is consistent with the Spirit of its Author, and welcomes every gleam of light which science or philosophy can shed on the problem of human life. We fully admit that as there are diversities of gifts, so there is difference of administration, by the same Spirit; and to a certain extent there may be development of individual opinion, without interference with the enjoyment of spiritual fellowship; and we are bound to subordinate these minor differences, so that they may not interfere with love and harmony. But where there exists among the members of a religious Society contrariety of opinion on points of vital importance, or which a part of them consider of vital importance, though others may deem them of little or no consequence, there will inevitably be expression of sentiments mutually subversive, and, if both parties are sincere, unless one or the other is disobedient to conscience and unfaithful to duty, there must be internal strife, and whatever form of visible unity may be kept up, there cannot be that unity which is the product of oneness in faith, and in inward, spiritual grace.

Many of the promulgators of the new belief and practices in the Society have seen this, and to avoid controversy respecting their departures, the popular notion of *comprehensiveness* in the church is not unfrequently recommended as applicable to the Society of Friends. It is said that the judgment seat is not to be occupied by man, when the truth and value of religious opinions are brought into dispute, but that an enlarged charity will keep the scales in which they are weighed equally balanced. That the integrity of a visible church consists not in unity of doctrine and general acceptance of its legitimate fruit, but in a common assent to association and co-operation, with the cultivation of that love and charity which will keep it as free as may be from mutual jealousy and distrust. Some carry this idea so far that in their opposition to what they consider the *bondage of creeds*, they seem to be indifferent to all set forms of belief, and while professing to value the primary truths recorded in Holy Scripture, claim that orthodoxy should give no weight in the estimate of christian character; so that none may be condemned if they only present the claims of an irreproachable moral life, and an all-embracing charity.

Corresponding with these views, there is diversity of belief and practice among those recognized as consistent members, which can hardly be found in any other religious body.

Fully to realize this, and the effect it may have on the settlement and edification of our own members, and its influence on the visit church at large, we must bear in mind the purpose for which the Society has ever declared its belief Friends were called out from other religious denominations by the Head of the Church. Among other things they were commissioned to bear testimony to the spirituality of the gospel, and the distinctive features of the new covenant, the Light of Christ within, or law of the Spirit of Life manifested the heart, obedience to which, in all itsquirings, is indispensable to salvation; to the headship of Christ in the Church, and to the necessity of his immediate perceptible guidance and qualification for every religious service; to the divine anointing and speed gift for the ministry derived from Christ himself, and exercised under his putting forth against all rites or ceremonies imposed by man, or devised as a substitute for a reserved obedience to the law of God revealed to the seeking soul. They were to be separated from the world by relinquishment of impure, untruthful language, its vain habits and manners, its greed for wealth, its pride its luxury, and its friendships. Their religion therefore made them a peculiar people, witnessing to other religious professors the simplicity and purity of christianity, exhorting and inviting them to leave the doctrines a commandments of men, and come have fellowship with them, and they would do the good. As they walked by the same rule that minded the same thing, the Lord blessed the honest labors and the precious cause he bountifully to support. Notwithstanding persecution and scorn from without, and lukewarmness and unfaithfulness often found with truths they upheld, once denied and despised found their way among other professors, and the testimonies connected with them were more or less openly acknowledged by large numbers attached to different denominations.

How is it in the Society now? We cannot undertake, on the present occasion, to specify the many departures from these principles which generally prevail: nor is it necessary they may be seen by all who choose to see they speak loudly to all who will hear. There are those high in authority who tell us that though the founders of the Society were godly and devoted men, they were not competent interpreters of scripture; that hence they drew wrong conclusions from many texts, and were mistaken in their definition of Quakerism. There are those who say that the *gospel* consists exclusively in what is recorded in the New Testament, and that this is "the power of God unto salvation" as applied under the influence of the Holy Spirit. Hence the measures provided, and the promises contained in are said to be restricted to those who possess a knowledge of the Scriptures. Some say that the Scriptures are the principal means of man's illumination and conversion, and, in fact, are the primary rule of faith and manners. Some hold up that *faith* is a natural faculty of the human mind, by which man himself may lay hold of the means provided in the *gospel* for his salvation, and make confession by word of mouth of his belief satisfy himself that he is saved. As a logical consequence it is inculcated by some that the scriptures are the *only* source of a knowledge of the truth taught by Christ and his apostles; they are also the source whence ministers

rive the matter for their public communications: that heretofore Friends have held diverse views relative to the possession and use of spiritual gifts, making too high claims for the doctrine of immediate inspiration. Hence many consider it a marked evidence of the progress made, that in nearly all of the Society it is practically asserted, under the authority conferred by the injunction to Peter, "Feed my sheep," "Feed my sheep," and the command to the eleven, "Go ye into all the world, and preach the gospel to every creature," every member who so inclined may undertake to "teach the gospel" to others. To sum up, without entering into particulars, after Barclay's Apology was once accepted and sanctioned by the Society as a clear and full exposition of its faith, in nearly two centuries, and as such, the Society everywhere has recommended it to, and adopted it among other professors, in order to inform them of the true belief of Friends, and to show the scriptural ground on which our belief rests, London Yearly Meeting, at its session, refused to sanction its further publication as setting forth the faith it holds. Most of the views alluded to as recently introduced in the Society, are similar to those held by many of the religious denominations, when Friends first came forth. Friends then believed that they, and the religion to which they belong, were outward and unscriptural; they stopped short of the requirements of the gospel, which is not the mere record of blessed truths in the New Testament, but the power of God unto salvation itself, and is not insisting on "the washing of regeneration" by the baptism of the "Holy Spirit and fire," they left the man of sin in possession of his goods in the heart. In their dissemination and adoption have they other effect than to lead our own members back to many of the same things Friends have raised up to witness against, to the outer door of the temple, whence they were commanded to depart? Look at the effects already developed. In many places our meetings are thrown open for ministers of other religious societies to promulgate the notions they hold. Silent meetings are deemed to be unsuited for mixed assemblies, reading the Scriptures is introduced into meetings for worship, and music into "Schools." Missionaries are sent out under the authority of associations of our members, who stand in distant lands as representatives of Friends, some of whom have no objection against participating with others in wine and as the Lord's Supper, or in singing out hymns to be sung by a mixed assembly. Some resort to the rite of water baptism, and are held up as examples of christian attainment, while others approve the use of other outward elements, as giving spiritual gifts. Members occupy the position of ministers and travel abroad, accredited by meetings who give no evidence of being Friends in their language, dress or manners, and who occasionally join with ministers of other denominations in religious exercises. In England the testimony against tithes,—for which nearly all Friends suffered so much: some of them even unto death—is very much given up. With the language and manners of the world, its changeable fashions and dissipating elements are largely introduced among our members, even among those who occupy conspicuous stations; and in many places, the

assimilation with other professors has left but few distinctive characteristics of Friends.

We are not imputing the sincerity or the desire to do good, of those within the Society who are teaching and acting as we have indicated. They may be teaching, so far as they know, and acting in accordance with the religious understanding to which they have attained, and to their own master they must stand or fall. But there are many of their fellow members, who, esteeming the doctrines and testimonies of the gospel, as set forth by the founders of the Society, to be unchangeable and beyond all price; believe that those who have introduced, and those who sanction these changes, are not Friends in the long-known sense of that appellation; that they and their influence are subverting the faith of Friends and the cause Friends are bound to support; they therefore cannot acknowledge their labors nor give them while thus doing, the right hand of fellowship.

The reiterated assertion that those members who speak disparagingly of the "peculiarities" of Friends, have got deeper than that state which requires their observance, and are too busy spreading the gospel net to pay attention to such small matters; the glowing accounts given of the extraordinary evidence of "the demonstration of the Spirit and of power," attending the preaching of that class of ministers suggestively described by one of their admirers, in a laudatory published letter, as "emancipated from the dominion of red tape;" the narratives of the large numbers who, under the contagious excitement produced in protracted meetings, and the urgent solicitation of speakers, make public confession of "having found Jesus," and who are then considered "converted," all force the consideration on those who love and adhere to old-fashioned Quakerism, and are longing for its spread, of what is the prevailing type of the revival said to be going on in the Society? They are fully aware that love of the world, and an unwillingness to wear the yoke of Christ, have for years produced coldness, indifference and deadness, among very many of its members; and they are waiting and hoping to see the same blessed all-powerful means—attention and obedience to the Light of Christ in the soul—which convinced the early Friends, and gathered them into a society, bringing forth the same blessed fruits. They look to see whether the promulgators of, and the converts to, this modernized quakerism, are led in the same way as were those who heretofore have been brought under "convincement" and "conversion." Do the converts now, as formerly, under the godly sorrow accompanying repentance and condemnation for past sins, put their mouths in the dust, if so be there may be hope? Do they sit alone and keep silence because they are learning to bear the yoke upon them? Is there manifested a humble, self-renouncing, teachable frame, an operative faith in Christ, not only as He wrought for man's redemption, when in the flesh, but as He appears the second time to the soul, to purge it from the power of sin, and perfect the work of salvation? and are they thus made willing to become fools for his sake, and to show to all around them by their garb, their language, their renunciation of the world, that they are true Friends, not ashamed of their religion and its requisitions? They think answers are given in the increase of departures from the primitive faith and practice

of which we have spoken; and the rapid approach to the standard of other professors saddens their hearts with fear that the Society may be swept altogether from its moorings.

We need not shut our eyes, then, to the contrariety in belief and its results, existing in the Society; the consequent lack of unity and harmony among the members, and the failure, more or less apparent or felt, in the objects for which they were originally and ought still to be associated together as a body of christian believers—building each other up on the most holy faith, and advancing the spiritual government of the crucified Redeemer, by lives consistent with the straight and narrow way He opened and trod for his disciples. It is vain to suppose that these deplorable evils can be eradicated or smoothed over by the Society sanctioning the system of *comprehensiveness* advocated by some. However such a compact may suit a national or "broad church," which embraces every shade of belief, from "high church ritualism" to bald unitarianism, or however successfully it may exist in civil or political communities, where the heterogeneous elements are kept together, and in their respective places, by force of law, it is opposed to and would be subversive of the constitutional principles of the Society of Friends, and would hardly be broached except in times of defection, and by those who are willing to say "We will eat our own bread and wear our own apparel, only let us be called by thy name, to take away our reproach."

Truth is not a mere matter of opinion, nor are the doctrines of the gospel uncertain or undefined. To prevent the Society from entirely deserting the advanced position assumed by it by the Head of the Church, there must be a limit to its members' right to promulgate whatever opinions they may choose, and to make whatever changes in practice may suit their modified quakerism. Unless this is insisted on, diversity of religious opinion and disunity in feeling will go on increasing; for we believe there still are, and will continue to be, very many who will not allow these novelties in the Society to supplant their belief in and love for its ancient faith and usages. These cannot but continue their testimony against the religion of sentiment and excitement which, in their view, is undermining that, which ought to be maintained by the Society, and experienced by its members individually. They cannot harmonize with others, however bold or popular, who seem bent on reasoning away any requisitions of duty in what they deem "small things;" on discarding the belief that obedience in these is essential to greater attainments, and on leading our members to suppose they are true believers in Christ, justified by his blood, and saved by his imputed righteousness, because they confess acceptance of the truths recorded in the Holy Scriptures, though they may give no evidence of having been washed, sanctified and justified in the name (or power) of the Lord Jesus, and by the Spirit of our God. This testimony must be maintained, not by public affidavits, but by patient continuance in well-doing, by prayer and supplication to Him who watcheth over his church by night and by day, and by advocating truth, and pointing out error in the meekness of wisdom. Notwithstanding the changed and degenerate condition of the Society, we believe the Lord

is waiting to do good: that He remembers the kindness of her youth, the love of her espousals, when she went after him in the wilderness, in a land that was not sown, when she was holiness unto the Lord, and the first fruits of his increase, and that He will, in his own time, "Turn to the people a pure language, that they may call upon the name of the Lord, to serve him with one consent." May He hasten the day!

SUMMARY OF EVENTS.

FOREIGN.—Bismarck refuses to accept article 3d of the customs treaty with France, and Thiers has abandoned the article and telegraphed his protest.

General Mantouffil has replied to the note of Thiers complaining of the delay in the evacuation of the department of the Oise by the German troops. The general says, the halt was caused by a misconception of orders, and the evacuation will proceed forthwith.

A dispatch to *Times* says, that France declines to give the other Powers the same favorable customs clauses that are accorded to Germany under the recently negotiated treaty.

The supporters of the Empire are becoming bolder in their intrigues, and are agitating openly for the restoration of the Bonapartes.

The count of the votes of Paris has been taken. The subscriptions were more than thirteen times the required amount.

Several conflicts have taken place between French citizens and the German garrison of Dijon. The town is intensely excited over these occurrences.

Honry de L'Hays has been appointed Ambassador of France at Vienna.

Henry Rochefort is pressing his appeal for a commutation of the sentence pronounced against him by the military court. His friends are also actively interfering by endeavors to influence the president in Rochefort's favor. Victor Hugo, among others, has written a letter to Thiers, strongly interceding for executive clemency.

The British revenue returns for the year closing 9th mo. 30th last, show a decrease as compared with the previous year, of over £500,000.

A terrific gale on the coast of England has caused much loss of life and property.

Prime Minister Gladstone, in a recent speech at Aberdeen, declared that he still looked forward and upward, and spurned all base motives. The government found the Irish question difficult, but hoped to solve it.

The Home Secretary, in a speech to his constituents on the 27th ult., advocated the most cordial friendly relations with the United States, and said there was now a fair prospect of the settlement of all questions in dispute between the two countries. The iron miners in Staffordshire have been conceded by their employers an advance of ten per cent. in wages, and are to be given a further increase as iron rises proportionately by the shipping ton.

A colliery explosion, attended with loss of life, has occurred at Danbury, in Yorkshire.

The Russian squadron escorting the Grand Duke Alexis, has sailed from Falmouth for New York.

The Court of Arbitration of the Alabama claims, members of which have been appointed by the governments of the United States, Great Britain, Italy and Switzerland, will not meet at Geneva for at least two months, for the reason that the fifth arbitrator, who is to be named by the Emperor of Brazil, has not yet been selected.

The kingdom of Bavaria is about to recall its ambassador to foreign States, and will in future be represented only as a portion of the German Empire.

A Protestant league is in course of formation throughout Germany, the object of which is the expulsion of the Jesuits from the country.

A rumor is current that the Emperor Francis Joseph is seriously disposed to abdicate. The cause assigned is despondency at his conscious unfitness for the constitutional crisis which threatens a dissolution of the Austrian Empire.

The Peace League Congress has had a tumultuous session at Lausanne. Many of the speakers defended the measures of the Paris Convention.

A terrible explosion of fire damp occurred on the 25th, in one of the mines in the canton of Grisons, in Switzerland, by which thirty persons were killed.

The Brazilian Chamber of Deputies finally adopted the bill for the emancipation of slaves. The details of the measure are not stated, but it is probably an act of

prospective and gradual emancipation. The Emperor is known to be in favor of the project.

A coalie vessel from India for Martinique has been lost on the coast of that island, with all on board. Two hundred bodies have been washed ashore.

Dr. Pecher, of Constantinople states that the cholera prevails in that city to a considerable extent. On the 30th ult. there were 70 deaths from the disease. The weather has been very warm, and the supply of water is failing.

Mondell, a member of Parliament, has endeavored to settle the difficulties between the masters and workmen in Newcastle, by arbitration, but all attempts of the kind have thus far been without success. The strikers held a mass meeting on the 2nd inst., and passed a resolution to insist on their demands and persevere in the strike until its objects were accomplished.

Liverpool, 10th mo. 2d.—Middling nplands cotton, 9½ a 9½d.; Orleans, 9½ a 9½d. Breadstuffs active. California wheat, 13½s; red western spring wheat, 11s. a 11s. 8½; winter, 11s. 9d. per 100 lbs.

U. S. 5 per cent. U. S. 5 per cent, 90.

The upper house of the Swedish Parliament has approved the clause of the bill for the reorganization of the army, which makes military service compulsory on all men in Sweden.

The recent gales which proved so disastrous to shipping in the English and Irish seas, have extended to the continent, with some damage to crops, vineyards, &c. Telegraph lines also were prostrated in many places.

UNITED STATES.—Miscellaneous.—The U. S. customs receipts for the week ending on the 26th ult., were \$5,958,668.

The Northern Pacific Railroad Company have contracted for the construction of the road from Red river to the Missouri river, 200 miles, to be completed by 7th mo. 1st, 1872. This, with other contracts already made, will put the territories of Dakota and Montana, as well as the District of Manitoba and the Valley of the Saskatchewan in direct communication with the United States. The United States and Canada have a total of about 850 miles of railway under the management of the Northern Pacific Company in Minnesota.

According to the late census the number of blind persons in the United States is 20,320 viz, 11,343 males, and 8,977 females; the number of deaf and dumb is 178,750, viz, 83,229 females, and 95,521 males. Of the 178,750, whom 1,956 are males, and 176,794 females. The number of idiotic persons was found to be 24,257, of whom 14,485 were males, and 10,142 females.

The presence of Brigham Young as the defendant in a suit brought by the United States authorities, and the preparations made to hold him as a prisoner at the 6th inst., and the indictments would probably be held until after that time.

The public debt of the United States on the first inst., after deducting cash in the Treasury, amounted to \$2,290,663,940, which is \$13,458,620 less than on the first of the Ninth month.

Interments in Philadelphia last week numbered 263, including 107 children under two years of age. The mean temperature of the Ninth month, according to the Pennsylvania Hospital record, was 63.80 deg. The highest during the month was 82.50, and the lowest 49 deg. The amount of rain 1.77 inch. In the Ninth month 1870, the highest temperature was 86 deg., the lowest 49 deg., and the average 70.2 deg., or 6.74 deg. higher than that of the last month. The average of the mean temperature of the Ninth month for the past eight-two years, is stated to have been 66.23 deg., the highest during that entire period was in 1865, 72.68 deg., and the lowest in 1840, 60 deg. The amount of rain during the first nine months of 1871, has been 35.5 inches; in 1870 the rain fall of the same period was 36.19 inches.

The Markets, &c.—The following were the quotations on the 2nd inst. New York.—American gold, 114; U. S. sixes, 1881, 118½; ditto, 5-20s, 1868, 114½; ditto, 10-40, 5 per cent, 111½. Superfine flour, 5.50 a 5.75; extra, 5.25 a 5.50; No. 1, 5.00 a 5.25; Chicago spring wheat, \$1.60 a \$1.62; red western, \$1.67; amber, \$1.73 a \$1.75; white Genesee, \$1.80 a \$1.82. Western barley, 90 cts. Oats, 51 a 55 cts. Western mixed corn, 76 a 77 cts.; yellow, 79 cts. Philadelphia.—Superfine flour, \$5.25 a \$5.75; finer brands, 86 a 89. Pennsylvania and western red wheat, \$1.60 a \$1.62; amber,

\$1.65 a \$1.70; white, \$1.75. Rye, 95 cts. Yellow, 85 cts. Oats, 49 a 51 cts. Barley, 92 a 95 cts. Corn, 19½ a 20½ cts. for nplands and New Orleans. Cts. seed, 10 a 10½ cts. Timothy, 83 a 85.00 per ton. The receipts of beef cattle were large, exceeding a head the market dull. A few choice sold at 4½, extra 6½ a 7½ cts.; fair to good, 4½ a 6 cts., and medium 3 a 4 cts. per lb. gross. Sheep sold at 5 a 6 per lb. gross. Receipts 18,000 head. Corn fed sold at 6½ a 7½ cts. Receipts 4,312 head. St. Louis Winter family flour, \$7.25 a \$7.50. No. 1 red wheat \$1.60 a \$1.65. No. 2, \$1.50 a \$1.54. A few choice sold at \$1.42. No. 2 mixed corn, 46 a 47 cts. No. 2 oat a 35 cts. Lard, 91 cts. Cincinnati.—Family flour, \$7.75. Wheat, \$1.52. Corn, 54 cts. Oats, 33 a 34 Rye, 78 a 80 cts. Lard, 91 cts. Louisville.—W. \$1.50 a \$1.45. Corn, 50 a 55 cts. Oats, 37 a 38 \$1.60 a \$1.65. Oatmeal.—No. 2 spring wheat, \$1. No. 2 mixed corn, 47½ cts. No. 2 oats, 34 cts. 66 cts. No. 2 barley, 57 cts. Lard, 91 cts. Midd.—No. 1 spring wheat, \$1.26. No. 2 oats, 30 and 2 mixed corn, 45 cts. Detroit.—Amber Michigan w. \$1.50 a \$1.51; No. 1 white, \$1.56 a \$1.57; extra, \$1.60.

RECEIPTS.

Received from Geo. Sharpless, Pa., \$2, vol. 45; Francis Taber, Vt., \$2, vol. 45; and from Mary H. Van Sledright, Va., from Elijah Kester, Md., \$2, vol. 45; William B. Oliver, Agent, Mass., \$2, vol. 45; and Pelatiah Purinton, \$2.50, vol. 44; from Charles F. City, \$2, vol. 45; Sutherland & Bonjames Evans, Pa., \$2, vol. 44; from Abraham Gibbons, Pa., \$2, vol. 45; Ellis Smedley, Pa., J. S., \$2, vol. 45; from La Pennell, City, \$2, vol. 45; from Isaac Hayes, Pa., vol. 45; from Horatio G. Cooper, Pa., per Th. Conard, Agent, \$2, vol. 45; from Evan Smith, vol. 45; from Mary A. Chambers, Pa., \$2, vol. 45; from Susan Penrose, \$2, vol. 45; from Wm. Walter, Pa., \$2, vol. 45; from Job Ballinger and C. A. Clement, N. J., \$2 each, vol. 45; from Joseph I. Walker, Io., for Thomas Heald, John Thomas I. Walker, Israel Heald, Sarah Sharpless, Sarah Atkinson, Aaron Roberts, Abraham Cowgill, Ch. Leach, Nathan Satterthwaite and Joseph Arms, \$2 each, vol. 45, and for Joseph W. Satterthwaite to No. 27, vol. 46; from George M. Eddy, Mass., vol. 45; from Elizabeth Bedell, Io., per J. S. E., vol. 45; from Lewis Forsythe, Pa., per C. J. A., vol. 45; from Thomas Sexton, N. J., \$2, vol. 45; from George M. Morlan, Agent, Io., for Mordecai M. and Abigail Ware, \$2 each, vol. 45; from Caleb Brae O., \$1, to No. 20, vol. 46.

Remittances received after Fourth-day morning will appear in the Receipts until the following week.

WESTTOWN BOARDING SCHOOL.

A TEACHER is wanted for the Girls' Writing School qualified to give instruction in Grammar and other branches; to enter on her duties at the end of next session, on the 30th of Tenth month.

Apply to Susan E. Connor, Knox St., Germantown, or Elizabeth E. Taylor, 829 Union St., Phila. Martha D. Allen, 525 Pine St.

FRIENDS FREEDMEN'S ASSOCIATION.

Our schools in North Carolina and Virginia re-open on the 1st. We need a few teachers, and are desirous to engage for this service rightly concerned. Pri Terms of salary \$15 to \$20 per month.

For further particulars please apply at this office, 115 N. 3d St., Philadelphia.

Ninth mo. 1871.

WESTTOWN BOARDING SCHOOL.

The Winter Session of 1871-72 commences on Sec day, the 30th of Tenth month next. Friends who tend to enter their children for the coming term requested to make early application to AARON SHLESSE, Superintendent, address Street Road P. O., or to Elizabeth E. TAYLOR, CHARLES J. ALLEN, Text Book, No. 304 Arch St., Philada.

DIED, on 29th of Fifth month, 1871, at the resid of Pearson Embree, West Chester, Pa., CARPES WALTER, in the 30th year of his age.

WILLIAM H. PILE, PRINTER.

No. 422 Walnut Street.

A RELIGIOUS AND LITERARY JOURNAL.

OL. XLV.

SEVENTH-DAY, TENTH MONTH 14, 1871.

NO. 8.

PUBLISHED WEEKLY.

Two Dollars per annum, if paid in advance. Two Dollars and fifty cents, if not paid in advance.

Subscriptions and Payments received by

JOHN S. STOKES,

NO. 116 NORTH FOURTH STREET, UP STAIRS,

PHILADELPHIA.

When paid quarterly in advance, five cents.

Selected for "The Friend."

Life in Tuscany.

(Continued from page 43.)

and the peasant women of Tuscany pay attention to their appearance; were neater, cleaner, and tidier in their person than they would be, in regard to looks, entitled to considerable praise; for nature has provided for the most part decidedly liberal kind to them in that respect. But as it is with their uncombed locks, their dirty faces, and slovenly style of dress, and their complexion spoiled by exposure to the weather, notwithstanding their large, bright, hazel eyes, their white teeth, and their thick tresses of black hair, they often present an exterior not agreeable. The bloom of youth fades away, owing to the hard life they lead, and being also, perhaps, in some degree, to the incessant sort of out-door head-dress they wear, which leaves their faces completely exposed to the summer's scorching sun. Strange it is, that almost universally in every land and nation, in every class of society, we find the notions of comfort and convenience commonly disregarded and set aside by women, in preference to the form of their attire. In Italy, where the midday's summer sun comes down with a dazzling, blinding glare—where the heat from the same source pours down upon the scorched intensity—the peasant woman seems to have been unable to devise a method of covering for their head, than a large flat hat, the limp leaf of which, instead of being the face, for the most part hangs over the back quite over the crown, or a cotton kerchief folded cross ways, placed on the top of the head, and tied by its two ends beneath the chin. In neither case is the face protected from the heat, or shielded from the light, in the least degree; the effects of this exposure are seen in the forehead prominently furrowed by the incessant effort made to screen the eyes from the dazzling glare; an effort that results in the habitual contraction of the brows. The observations made in reference to the appearance of the peasant women of Tuscany also apply in a great extent to the men; and good looking specimens of humanity, for the most part, are they, with their clean faces and best clothes; but on working days their

unwashed and poverty-stricken look detracts considerably from their natural advantages. Though in stature below the general English height, as are the women also, they are for the most part, strongly and symmetrically formed—a circumstance that appears something of a marvel, considering the barbarous system of compression to which infancy is universally subjected in Italy, by the means of swaddling clothing.

Ignorant as they are, the manners of both the men and the women are characterized by a politeness that, coming from the heart, is far more winning than the cold courtesies which is the offspring of artificial rules; and very pleasantly did their "felice giorno" or "felice sera" wish which they never failed to greet me, fall upon my ears. On entering their dwellings, the inmates would exert themselves to extend the rites of hospitality to the stranger visitor; and whilst many a regret was expressed that they had not a glass of wine to offer me, I was often presented with fruits and flowers, and in default of these, some young pea or bean pods were put into my hands. Could I not stay a little longer? and would I not come again? were the phrases I constantly heard on my taking leave; and the burden of many an unfulfilled obligation in this regard is resting on my conscience to this day. Genuinely courteous as I ever found the peasantry, the urgent solicitations which I invariably received from them to repeat my visit to their dwellings, were the result most probably, of a feeling stronger even than politeness acting upon their minds. Far different from the country life in England, is that of Tuscany, for whilst in the former three classes of society may be found existing side by side, in the latter there is but one. In England the cottage of the peasant rises in close vicinity to the dwelling of the retired tradesman, the independent yeoman, or the residence of the peer and country gentleman; and from this arises a mingling in some degree of the upper and middle with the lower class of society. The ladies from the Hall superintendent, perhaps, industrial schools, visit the cottages of the poor, send bowls of nourishing broth to pining invalids, and gifts of money or clothes to such as are in need; whilst in a more limited degree, the retired tradesman's and the yeoman's family contribute to the comfort and well-being of the necessitous classes of the community amongst which they live. But in Tuscany a very different structure of society, a very different order of things exists. Not scattered over the surface of the country, as in England, but concentrated in towns, are to be found in Tuscany the upper and middle classes of society. It is true that occasionally, here and there, the traveller's attention is attracted by a mansion whose size and air announce it to be a rich man's property; but for at least nine and probably ten months in the year, that mansion, large and handsome as it is, remains uninhabited. Ex-

cept, therefore, during the months of July and August, when the heat renders the atmosphere of a town unhealthy and oppressive, the gentleman's or nobleman's country seat is consigned to silence and solitude. Even, too, for the time that the family may be resident at the place, no intercourse of any kind occurs between them and the peasantry, in their vicinity.

The Italian lady never walks out if she can avoid it, except perhaps in some gay promenade, where she may display her costly toilet. The very idea of visiting a peasant's cottage and talking to the inmates, would disgust her excessively—she, with her silks and satins, her long trailing robes, to pass the threshold of their doors—she rich and well born as she is, to concern herself with the interests of poor and ill-clad people—what a preposterous supposition, what an absurdity! Not that she is devoid of charity—not at all; but her idea of that virtue begins and ends with dropping a *soldo* into a beggar's hat, with conferring *crazia* on some distorted cripple, or of contributing a *pablo* to the mendicant friar. With the same tastes for social pleasures as the class described, the prosperous merchant or tradesman never thinks of providing himself with a country house, where he may take up his residence permanently, and spend his declining days. Thus, unlike England, where country life presents to view a blending of the different classes of society, that of Tuscany, it may be said, exhibits one class alone. Remote from the sphere of the affluent and well-born, the peasant lives and dies, and in the stylish carriage which envelopes him in a cloud of dust as it dashes past him on the highway, he very rarely catches even a momentary glimpse of those whom the labor of his hand goes to sustain.

Cut off, thus, from all intercourse with the upper classes of the land, a strange sight did it appear to the peasant and his family to behold a person in the attire of a lady entering their doors. When in addition, too, they found that the lady was a foreigner, and had come from a country which they had all heard of as a country supremely rich and grand, the marvel at, and interest in, the apparition was heightened considerably. Many were the questions I had to answer about myself and the country from which I came. "Was I married? How did the peasants live in England? Were they rich? Did the vines give good wine?" Being obliged in answer to this latter question to confess the poverty of England in regard to vines, my words were always echoed by my auditors in a tone of profound surprise. "No vines in England! was it possible? how strange! they had always thought that England was the richest and most fertile country in the world." Still greater and greater grew their wonder, when they heard that not only had we no vines in England, but that we were destitute also of olives, figs and maize. At this information, whilst exchanging glances

of astonishment, they would exclaim, *sanctissima virgine!* what a poor country it must be! how can the people there manage to support their lives?" The commiserating tone in which this remark, or others of a similar purport, was certain to be uttered, always amused me highly; and no less droll was it to see their puzzled look when they tried to reconcile our miserable destitution of the good things of life—the absence of olives, wine and maize—with the fixed idea they entertained that every individual of the English nation rejoiced in a commanding stature and brilliant color, in addition to a well filled purse. Some concluded that the air must be very nourishing, though certainly the English did not look as if they lived on air; others gave up the matter as an inexplicable mystery, contenting themselves with repeating in a marvelling tone that it was very strange.

For "The Friend."

Memoirs of Mildred Ratelif.

(Continued from page 52.)

The following letter from Rebecca Hopkins to M. R., interestingly exhibits, with others in these memoirs, the christian sympathy and fellow feeling of their respective writers, with a beloved sister in a time of proving and of conflict. These are precious manifestations of love and regard between the suffering disciples of the same crucified Lord, as well as a carrying out of the precept, "Bear ye one another's burdens, and so fulfil the law of Christ." It is always pleasant to dwell upon such cases, whose tender soothing sympathy in the map of life; which in the early days of the Society so much prevailed, to the edification and encouragement of the tribulated seed of that day, who could foresee little else for themselves, than to say with the Apostle: "The Holy Ghost witnesseth in every city, (whither they might come) that bonds and afflictions abide me."

Though no scourges, and dungeons, and persecutions unto death, may now be inflicted outwardly on dissenter or professor, yet is there no lack inwardly of bonds and afflictions, of wounds and bruises and temptations by the great enemy, which should no less claim the brotherly care and prayerful solicitude of those who have spiritual discernment that they exist. Thus, in measure, would the whole body "fitly joined together, and compacted by that which every joint supplieth, according to the effectual working in the measure of every part, experience increase unto the edifying of itself in love." Could we instead of anything like envy or jealousy, evil-speaking or surmising, thus watch over one another for good, praying for one another in the ability received, or even handing the cup of cold water when we may have no more to give, how it would tend, like the Samaritan's wine and oil formerly, to bind up, to soothe, and to heal, and withal through the grace of the Lord Jesus, enable those upon whom it is bestowed, to thank God, and to take a little fresh courage in the great voyage and warfare of life.

Then may none of us withhold more than is meet of the word in season, either of caution, reproof, or encouragement. But rather, under the qualifying power of the anointing which teacheth all things, duly heed the injunction—alike applicable to all time—"Be ye one another's helpers in the Lord."

Rebecca Hopkins writes:—

"Waynesville, 2d mo. 1812.

"My dear Mildred,—I take up my pen this morning to address thee with a few lines, in much weakness both of body and mind. I have been feeling with thee, and dipped as in sympathy with thee for some months, my dear tribulated sister! for such I believe thou art. Thy tribulations I hope and believe have been patiently abode in, and strength has been afforded faithfully to endure all thy sufferings, which I have felt to be many. Suffer me, as a poor little traveller to say, be patient in all things, till the Lord in his wisdom, will, may I not say, disperse the enemies of His own house, and set his own exercised servant at liberty. Ye, my dear! thy Beloved will arise, and come forth as out of the garden of spices and myrrh, with a sweet smelling savor to revive thy weary fainting soul. This will be to thy great admiration, and will prove to the honor of His great and wonderful name. I am ready to say in my heart at times, O Lord! why should thy disciples or professing people be divided in Truth's service. Dear Mildred, I fear there are too many, may I not say, of the disposition of Herod, (or at least one comparable to him) who rather than fail of killing the dear Son of God, slew all the children who were born in that period when the blessed one was expected to appear, that he might put an end to the cause of Truth. So it appears to me in this day, some will say the babe of grace in their own souls, rather than encourage or promote the spreading of truth and righteousness in the earth or in others. These are not like meek, humble Moses, who said, 'Would to God all the Lord's people were prophets.' Here was manifested love to the whole creation.

"Thou mayst think me a little presumptuous or forward in saying thus much, without having heard anything concerning thy travail and exercise of feeling for service. But I have written according as things have felt to me for some time past, and the latter part that I have penned, seemed to occur plainly to me as I have been thus engaged.

"It was a trial that I did not see thee the last time thou wast down [perhaps at Quarterly Meeting], but it may perhaps be right for me to have to dwell alone. In much near sympathy, I subscribe myself thy loving friend,

REBECCA HOPKINS."

Mildred Ratelif having liberty to attend some meetings in her own (Baltimore) Yearly Meeting, principally on the way going to and returning from that meeting, with — and — for companions, she accomplished the mission. The following is from her journal:—"1812. 9th mo. 2nd, I set off to our Yearly Meeting to be held at Baltimore, also having before me a prospect of visiting some meetings within its borders, before and after that meeting, as the Truth might open the way for.

"8th. We reached a settlement of Friends, after a fatiguing travel over rough roads. This occasioned considerable indisposition of body, and surely I may say it was a time of proving to me, being outwardly afflicted and inwardly stripped. I was left in extreme poverty and want, so that I felt myself a poor creature indeed under the pressure of exercise in view of the awful service before me. Yet through Divine mercy I was enabled to hold

fast my confidence in the power of Him has hitherto helped me."

From the 9th to the 15th, M. R. attended the Select and general Quarterly Meeting Short Creek, with their meeting on First. Also was at one at Concord, Plymouth, Cross Creek respectively. "All these things," she says, "I was favored to attend good degree of satisfaction. They had a deny to renew my spiritual strength, an encourage me to perseverance.

"16th. Had a hard travel, and after n reached a Friend's house with difficulty our way to Salem Quarterly Meeting.

"17th. Attended New Garden Mon Meeting, and were refreshed with our Friends there.

"18th. Went to Salem, and was at a Select Meeting. Here I was enabled, notwithstanding my poor condition, to labor in simplicity and plainness among them. I was to my own relief, and for aught I knew to the satisfaction of Friends there.

"19th. This day Salem Quarterly Meeting is to be held. Oh, most merciful Father! Thou who knowest all things, thou know that I desire to be thoroughly dependent on thee. Oh, be entreated once more to render me for thy own glorious cause sake! I pray thee the tribute of praise favors past; and continue to bestow them on me.

"20th. We attended a large public meeting at Salem. This I think may be said to have been a time wherein the Good Shepherd was pleased to manifest His care for the May He ever have all the praise.

"21st. At Fairfield Meeting, and had a time indeed, mourning as over the dead.

"22d. Was at a little indulged meeting called Columbiana. This I think was a cious meeting. May the members there grow strong in Thy Truth, O Lord, and their numbers increase!

"23d. At —, a favored meeting. My town on the same day at three o'clock. So as to the ministry, but dropped a few marks.

"24th. At Carmel. Much favored in a flow of gospel love among the people. Pa in near affection with Friends of that part and went on over the Ohio river.

"25th. After a hard travel of upward fifty miles, being very desirous to be Friends at Westland at their Monthly Meeting on the next day, we reached the place timely, and were refreshed with them; remained over the 27th, it being the first of the week. The meeting on that day was a favored one also.

"28th. At Pike Run Meeting; where I again to stand long on my feet to advocate the cause of Truth. After meeting we see an afflicted sister and fellow laborer in gospel. She has been for some years a valid, not being able to get out to meet I was glad we got to see her and the children, being refreshed together. It been through much weakness of body, of God, thou knowest, that I have got a thus far. Yet I have abundant cause to thank thee, and magnify thy most excellent name, for all thy benefits. Be pleased more to accept the tribute of praise from little, yet dedicated handmaid.

"30th. Attended Red Stone Meeting, where I labored much among the people, to sense that there are many amongst us

as other people, that are far from the sary new birth. May the Lord of all rth, bless the labor of his servants and aids every where, so that the people be gathered home to himself."

For "The Friend."

The Telegraph and the Storm.

(Continued from page 50.)

To come now to examine the most int-branch of our subject, the organiza- of the Signal Service.

It would be wanting in acknowledgment at services which have been rendered to a whole country, and to science every where, not to mention the names of those who have been most directly engaged in es- in the Signal Service Bureau a tion of Telegrams and Reports for the it of Commerce.' Foremost in this work the Hon. Halbert E. Paine, of Wisconsin, a fine and cultivated intellect soon dis- the necessity for storm signals on the lakes, and whose ability and command- in Congress gave the proposition y and force. Warmly seconded by the Henry L. Dawes, of Massachusetts, the guished chairman of the Committee on operations in the House of Representa- in which he stands as one of the most and conspicuous leaders, General Paine's ay secured an early adoption of the ire. The Hon. William W. Belknap, the tary of War, although from the first he stered the entire management of the ser- to the chief signal officer, has been the st and able supporter of the enterprise, it will always be an honor to his adm- in of the War Department.

It may be added that, without distinction ety, the whole people of the country, the both Houses of Congress, and the Pre- t have earnestly sustained and advanced important branch of the public service.

The basis upon which all the operations of the Signal Service are conducted is that of *precision and promptness.*

Every candidate for the Signal Service is cted to an examination, prior to enlist- , before a board appointed by the chief l officer, and before which he must ap- at his own expense. Testimonials as to character and capacity, signed by per- known at his office, must be presented. Examination is chiefly directed to ac- cepting, legible handwriting, proficiency in arithmetic (including decimal fractions), the geography of the United States.

The United States is entitled to the whole of the person enlisted; but the duties re- d are of such a nature that, with care diligence, a good deal of time is at the disposal of the persons employed, which may be devoted to reading or study, without detri- to the discharge of their duties. Thus between the hours of reports can often be for this purpose, and on frequent occa- sions when no active duty is pressing. A boer of young men are already enlisted for such purposes in view. No employment of this nature can, however, be permit- to interfere, in any way, with that prompt constant attention to duty which is in- d upon.

The duties are chiefly those pertaining to observation, record, and proper publica- and report, at such times as may be re-

quired, of the state of the barometer, thermo- meter, hygrometer, and rain-gauge, or other instruments, and the report by telegraph or signal, at such times as indicated and to such places as may be designated by the chief signal officer, of the observations as made, or such other information as may be required—the telegraphic reports to be forwarded by the regular telegraphic operators, or in such manner as may be directed. The utmost precision is required in observations and reports.

"The observers are required to work out no difficult problems in meteorology, but simply to observe and record the indications of their instruments, and to transmit the same without delay or inaccuracy. In doing this work, they have become by tri-daily practice as expert and exact in reading the glasses as any of our veteran scientific men—indeed, as much so as a Fitzroy or a Leverrier could be.

"Regarding the Signal Corps scattered through and over all parts of the country, we may compare it to a regiment on drill three times a day, the telegraph instantly revealing to the commanding officer, General Albert J. Myer, at Washington, the slightest failure in any observer.

"By this now widely spread and magnifi- cently organized system, the United States army, engaged under the chief signal officer, is being educated to science, and also serving one of the most important ends ever devised for the benefit of commerce.

When an observer is found capable, he is assigned to a station, and the necessary stationery and instruments furnished him (the latter consisting of the barometer, thermom- eter, hygrometer, anemoscope, anemometer, and rain-gauge), and instructed to make three observations—daily, viz., at the time corresponding with 7.35 A. M., 4.35 P. M., and 11.35 P. M., *Washington time*, so that every observer at each station should be reading his instruments at the same moment, and in the following order, viz., 1st, barometer; 2d, thermometer; 3d, hygrometer; 4th, anemoscope; 5th, anemometer; and 6th, rain-gauge.

"Where a single person has been required to do the work of a station, receiving full reports from all stations, the labor occupied twenty hours out of the twenty-four. But the rule now adopted is to provide each station with two men—one a sergeant in charge and the other a private soldier as assistant. The observer stationed on Mount Washington has been alone on the mountain most of the time, and always responsible for the work.

"Professor Cleveland Abbe, long known as an officer of the Cincinnati Observatory, and as an eminent meteorologist, is employed chiefly in the work of making out the daily synopsis of the weather, and deducing therefrom the weather "probabilities," which are given to the public by telegram through all newspapers desirous of furnishing them to their readers.

"To the conspicuous ability of all the officers is attributable the success of the enter- prise.

"If the invention of the mariner's compass enabled navigators, as Columbus and Magellan, to leave the close seas and shores of the mainland, and strike their way across the great oceans in search of new continents, it is beyond dispute that (to use the words of a distinguished meteorologist) "the invention of the barometer has opened up a new world." Perhaps nothing has been so much in the way

of meteorologic success as poor and unreliable instruments. To obviate this difficulty, numerous eminent laborers have made both common and self-registering instruments the study and experiment of a lifetime. The common barometer has undergone many and vast im- provements within a few years, so that an old seaman like Lord Nelson would now hardly know a first-class Adie's or Green's barometer.

"The ordinary barometer in use by Signal Office officers is that of Mr. James Green (the well-known scientific instrument maker of New York)—an instrument adopted by the Smithsonian Institution, and also by the American navy, as the most perfect to be obtained.

"This barometer has its cistern furnished with a small glass index, which shows when the mercury is at the right height in the cistern. This is adjustable by a screw which works through the bottom of the instrument against the flexible bottom of the cistern. The instrument is ready for use when the mercury touches the little V-shaped index in the cistern. So simple and complete is this barometer that any one can use it, and it ought to be in the hands of all business gentlemen, and all who are interested in watch- ing the mutations of weather.

"In reading the barometer a *vernier* is used. By this simple mechanical contrivance the barometer is read to so fine a degree that the *variation of 1-100th of an inch in the mercurial column is detected!*

"The barometer has a slight fluctuation also under several influences. It rises when the moon is on the meridian in some places. It has a diurnal oscillation, amounting on the equator to more than one-tenth of an inch, but in the latitude of New York to about 0.05 inch, the greatest height being about 10 A. M., and the least about 4 P. M. The nocturnal variations are much less. In the latitude of Philadelphia and New York the northeast wind causes another variation of one-fourth of an inch, due to the meeting of two atmospheric waves giving a still higher wave, and hence a higher barometer. There is also the variation due to the height of the observer's station above the sea. This is, of course, of the first importance. The other fluctuations are comparatively unimportant, and do not blind an observer to those ominous fluctua- tions which precede the storm, the tornado, and the hurricane. The oscillations which indicate a storm are very marked. The tornado which recently ravaged St. Louis was preceded by a gradual fall of the mercury in the barometer, for thirty hours previous of an entire inch. At Boston, within thirty-seven years, the barometer has ranged from 31.125 inches to 28.47 inches, the difference being 2.655 inches. At London it has ranged through more than 3.5 inches; but in the tropics not so much.

"During the passage of a cyclone the mercury oscillates rapidly. The most noticeable fall occurs from four to six hours before the passage of the storm center. This fall is often over an inch, and sometimes two inches.

"Great changes are usually shown by falls of barometer exceeding half an inch, and by differences of temperature exceeding fifteen degrees. If the fall equals one-tenth of an inch an hour we may look out for a heavy storm. The more sudden the change the greater the danger. *But it is too often forgot-*

ten that the fall of the mercury is a forewarning of what will occur in a day or two, rather than in a few hours.

"A variation of an inch is certain to be followed by a tornado or violent cyclone. In the tropics 'the glass' has been known to show a fall of more than an inch and a half in one hour!

(To be continued.)

For "The Friend."

Why fear a Revival?

Some oppose any general religions awakening, because it may be they dread the stirring of their own nests.

But to those Friends who with a sincere desire that the cause of the Lord may prosper in our midst, yet fear that there may be something harmful and dangerous in the manifestations of religious life appearing in various parts of our religious Society, I would commend the following remarks of a recent Scotch writer, in answer to some who opposed what he considered a revival of religion.

"What parent would not prefer the noisy and even excessive demonstrations of his children to the decent stillness of a desolate home and the chamber of death? There is an order of life and an order of death. There is an order of lifeless form which breeds the saddest disorder; and there are disorders of a new born life that, to the discerning eye, carry in their bosom the germs of the truest order. By wise and gentle management the irregularities of ignorance and indiscreet zeal may, for the most part, be entirely done away with or reduced to insignificance. All things in the house of God ought, indeed, to be done decently and in order; but some of the worst disorders and errors are due to an unwise and cruel repression of new-born life."

Doubtless many Friends are fully awake to the undeniable fact that a number of our meetings are almost lifeless, and are rapidly dwindling, and that unless the Lord arise for our help, their early extinction must inevitably ensue. And even where the numbers are still large, all will confess that there is a great and perhaps a growing lack of single-hearted and self-denying dedication. Can we not, in our exceeding need, unite in rejoicing when the Lord's work prospers in the hearts of any among us, even if it be not in such a way as we of these later generations have been accustomed to—provided, always, it is proven by its fruits to be the Lord's work.

Excitement is not of itself an evidence of error. It is questionable whether there can be any form of life without excitement. While *indue* excitement is always to be deprecated, it has been well said that "Propriety may be the grave of life."

One scene is recorded in Scripture where the Lord was not in the wind, but in the still small voice. Another scene is recorded where there came a sound from heaven as of a rushing, mighty wind, and they were all filled with the Holy Ghost.

If we strive to keep our hearts open to acknowledge the Lord's power, in whatever way it may be manifested, willing to recognize that which is of God in any, tenderly sympathizing with any in whom there may be the springing of Divine life, and each one standing faithfully *in love* to his own convictions of fundamental truth, may we not then hope we are in the way of blessing, and that

the Lord will revive His work in the midst of our years,

Phila., 10th mo. 1871.

Our friend J. W., will find in the editorial of last week reasons why so many Friends, who would rejoice in a "revival" of true Quakerism, "fear" the excitement now pervading the Society.—Eds.

J. W.

Selected.

LITTLE MOMENTS.

Little moments, how they fly,
Golden-winged, fleeting by,
Bearing many things for me
Into vast eternity!

Never do they wait to ask,
If completed is my task,
Whether gathering grain or weeds,
Doing good or evil deeds;
Onward haste they evermore,
Adding all unto their store!

And the little moments keep
Record if we wake or sleep,
Of our every thought and deed,
For us all some time to read."

Artists are the moments too,
Ever painting something new,
On the walls and in the air,
Painting pictures every where!
If we smile or if we frown,
Little moments put it down,
And the angel, memory,
Guards the whole eternally!

Let us then so careful be,
That they bear for you and me,
On their little noiseless wings,
Only good and pleasant things;
And that pictures which they paint
Have no back ground of complaint:
So the angel, memory,
May not blush for you and me."

Selected.

TRUST IN THE LORD.

Cease thou from man. Oh, what to thee
Can thy poor fellow mortals be?
Are they not erring, finite, frail?
What can their utmost aid avail?

Their very love will prove a snare;
Then, when thy heart becomes aware
Of its own danger, it will bleed
For leaning on a broken reed.

Why does thy bliss so much depend,
On earthly relative or friend?
There is a Friend who changes never,
The love He gives, He gives forever.

He has withdrawn thee now apart
To teach these lessons to thy heart;
Has darkened all thy earthly scene,
That thou on Him alone mayest lean.

His precious love that balm supplies,
For which thy wounded spirit sighs,
That only medicine can make whole
The weary, faint and sin-sick soul.

Go to that Friend poor aching heart,
He knows how desolate thou art;
He waits—He longs to see thee blest,
And in himself to give thee rest.

For "The Friend."

Second Annual Report of the Associated Executive Committee of Friends on Indian Affairs.

(Concluded from page 53.)

"In confirmation of this view, we have the testimony of E. S. Parker, late Commissioner of Indian Affairs. In his last Annual Report, he says: 'Of the Superintendents and Agents belonging to the Society of Friends, I may confidently say, that their course and policy have been highly promotive of the welfare and happiness of the tribes under their charge. Even at the Agencies for the Cheyennes and

Arapahoes, Kiowas and Comanches, trib that have been so difficult to control for years past, where the least possible good could be expected to be accomplished, a commendable prudence and energy have been displayed and as favorable a condition of affairs exists there as could reasonably be expected. The Presidential plan of inaugurating the great degree of honesty in our intercourse with the Indians, by the appointment of 'Friends' some of the Superintendencies and Agencies has proven such a success, that when Congress at its last session, prohibited the employment of army officers in any civil capacity, the President at once determined still further carry out the principle by inviting other religions denominations of the country engage in the great work of civilizing the Indians.'

"Having said thus much in reference to the preservation of peace, we would refer to that part of our work which is religious and educational. And here again, we must not forget that time is an essential element of human success. We cannot point to the conversion of large numbers of Indians to Christianity, as a result of our labors. Indeed when we think of the thousands upon the sands of white people who have lived all the days within sound of the Gospel, and yet fail to embrace it, it would be a vain expectation that should look for greater results, all at once amongst a people whose language, moral and religious condition, and habits of thought must be radically changed; who are, moreover, imbued with superstitious notions which have gained strength through all the long ages of ignorance and darkness, a whose natures, by successive generations barbarism, have become more and more prone to animal gratification. When we add these inherent difficulties, the accidental or vastness of territory, inaccessibility which the means essential to success; and almost more than all these, when we think of the retarding influence of bad example and conduct on the part of many of our own race and nation, who are supposed by the Indians to be representatives of the religion and civilization into which we are desiring to introduce him, we may well be impressed with the formidable character of the obstacles in the way of rapid success.

"But has anything been done in an educational or religious way? Could those who make honest inquiry of this character, visit one of our Indian schools in which twenty more children have learned to read the English version of the New Testament, with a corresponding progress in other directions, a in which, also, these children have been taught the truth as it is in Jesus, and many of them brought to a real Christian experience, it would need no other answer. When, furthermore, such inquirers should see as fruits the labors of Friends, the Christian observance of the first day of the week, by the Indians, their meeting together to hear Scriptures read and explained, their reverent attention upon the preaching of the Gospel and their own direct participation in the exercises of public and private worship; when to these professions, are conjoined increasing regard for the sacredness of marriage relations; a decrease of intemperance; a forsaking of the heathen dance; its accompanying revelry; and a growing interest in agricultural pursuits, with those

ed domestic and social habits, which gen-
Christianity promotes, they would feel
at least something had been done. *
We have some valuable and efficient labors
in our field. It is not necessary to
look of each individual. It may be proper
to say, however, that superintending Hoag,
whose responsibility is heavier than that of
any one else, has excellent business qualifica-
tions, a strong physical constitution (very im-
portant for his office), and is thoroughly alive
to whatever bears upon the interest of the
an. * * *

We designed to increase the number of
buildings so soon as the necessary buildings
were erected, and wish to make them reli-
gious institutions as well as literary. We
were glad to procure teachers who were
willing to devote themselves to their work
as a whole-hearted service. We expect
to gather the children and adults upon
the first day of the week for religious instruc-
tion and Divine worship, and in every proper
endeavor to do the work of evangeliz-
ing.

In some parts of the field the harvest
is already ripe, and the result of Christian
labor has been, and will be, decided and rapid;
in other parts, the laborers must work in faith
for a comparatively little of visible good fruit,
in the condition of the most civilized In-
dians was once as hopeless as that of those
who now show so little good result of labor.
The privations and hardships of those
who risk life and health in this self-denying
cause on behalf of the red man, are, in some
instances, very great, but we hope that the
fruit of things will improve, year after
year, so as to diminish the sacrifices which
are now unavoidable. * * *

For "The Friend."

The Sinner Abased, the Saviour Exalted.

Whatever be the form or the profession of
religion we may make, that which is of Christ,
the only saving and true, is that which
begins in humility and contrition
(in the mortification and abasement of
fleshy heart and mind, and the thorough
renunciation of all that is opposed to his rights
and rule and reign in us. For unless the
heart is mortified—the deeply seated lusts
and affections of the natural heart—be first
abased and brought under dominion, how can
goods be spoiled, or he dislodged prepara-
tory to the reception and establishment of the
Redeemer's kingdom; consisting in righteous-
ness, and peace, and joy in the Holy Ghost?
See the declaration of the prophet: "It is
not for a man to bear the yoke in his youth,
to siteth alone and keepeth silence, because
his wrath borne it upon him. *He putteth his
yoke in the dust, if so be there may be hope.*"
Ezekiel. "That thou mayest remember, and
be confounded, and never open thy mouth
more because of thy shame, when I am pa-
red towards thee for all that thou hast done,
saith the Lord God." As also the invitation
of the Saviour, "Take my yoke upon you,
and ye shall learn of me; for I am meek and lowly in
heart; and ye shall find rest unto your souls."
These first lessons of self reduction and
lowliness, are calculated to bring down the
naturally proud and rebellious heart; and it is
only by also, that the eye is opened to see our
original, fallen, and lost state as children of
the first Adam, with the magnitude and pre-
sence of the sacrificial offering, as the re-
demption provided, if applied through faith in,

with submission and obedience to, the quick-
ening Spirit of the second Adam, for restora-
tion and salvation. Hence the Psalmist says,
"*I waited patiently for the Lord, and he in-
clined unto me, and heard my cry. He brought
me up also out of an horrible pit, out of the
miry clay, and set my feet upon a rock, and
established my goings. And he hath put a
new song in my mouth, even praise unto
our God."* The soaring, literal, and mere head-
knowledge must yield to that which leadeth
into "inward quietness, stillness, and humil-
ity of mind, when the Lord appears and his
heavenly wisdom is revealed." Thus the apos-
tle testifies: "Not many wise men after the
flesh, not many mighty, not many noble are
called: but God hath chosen the foolish things
of the world, to confound the wise, * * *
and things which are despised hath God chosen,
yea, and things which are not, to bring to
nought things that are; that no flesh should
glory in his presence." Again, "God forbid,"
writes the same in another place, "that I
should glory, save in the cross of our Lord Je-
sus Christ, by whom the world is crucified unto
me, and I unto the world." Consistent with
the same is the prophecy of the coming of
Christ's kingdom, "The lofty looks of man
shall be humbled, and the haughtiness of man
shall be bowed down; and the Lord alone
shall be exalted in that day. For the day of
the Lord of hosts shall be upon every one
that is proud and lofty, and upon every one
that is lifted up; and he shall be brought
low."

Through the quickening and renewed visi-
tations of the Holy Spirit, we become deeply
leavened and penetrated with a sense of our
utter vileness, unworthiness and nakedness;
and the agonizing prayer of the humbled and
abased heart becomes, "A Saviour or I die;
a Redeemer or I perish forever!" Here it is
that the creature is abased, and the Saviour
exalted. Here it is that the Physician of val-
ue becomes dear to us; and his promise of
saving health sweet. Here it is the assurance
from the Ever Present, "My grace is sufficient
for thee; for my strength is made perfect in
weakness," is precious to us beyond all price.
Here we see ourselves as we really are in the
unregenerate state, "wretched, and miserable,
and poor, and blind, and naked," without any
ability to save ourselves, or to do more than
to cast ourselves at the feet of Jesus, the Sa-
viour of sinners, determined to perish, if per-
ish we must, nowhere but here. But to these
"Their Redeemer is strong; the Lord of
hosts is his name; he shall thoroughly plead
their cause," &c. "In that day shall this
song be sung in the land of Judah; We have
a strong city; salvation will God appoint for
walls and bulwarks." The more we see and
feel our lost and undone condition, and thence
long for the Father's house, the more our
compassionate Helper and High Priest doth
pity and will help us. For "Him hath God
exalted with his right hand to be a Prince
and a Saviour, for to give repentance to Is-
rael, and forgiveness of sins." It has been
said that "man's extremity is the Lord's op-
portunity." And when the hard heart is thus
melted before the Great Refiner and Purifier,
and its plaintive language becomes, "Create
in me a clean heart, O God, and renew a right
spirit within me," then He, whose sacrifices
are a broken and a contrite spirit, will cause
the deaf ear to be unstopped, and the blind
eye to be opened; and though the vision may

be at first imperfect—seeing men but as trees
walking—yet the Omniscient, in his mercy,
will lead such as by the hand; He will make
a way for them where there seems to be
none; will weigh the mountains of opposition
and resistance in scales, and the hills of diffi-
culty and conflict in a balance; and finally, as
such continue faithful, will bring them into
his banqueting house, where His banner over
them shall be love.

"In the way of thy judgments, O Lord! have
we waited for thee," is an ancient testimony.
Again, "Zion shall be redeemed with judgment,
and her converts with righteousness." Again,
"Thy judgments are as the light that goeth
forth." And again, "The judgments of the
Lord are true and righteous altogether." So
the more we look for the healing through the
chastisement, the more the language of the
heart becomes, "I will sing of mercy and
judgment, unto thee, O Lord!" And, "O
Lord, quicken me according to thy judge-
ments;" the more we bow to the Son, and
submit in deep self-abasement and contrition
to His thoroughly cleansing baptism of the
Holy Ghost and fire, the more we shall know
of the Father, and of the revelations of the
Holy Spirit with his feeling life, to the inex-
pressible joy of our souls. It is submission of
the heart to the ordering and disposal of our
Sovereign Lord, and letting his righteous
judgments pass upon the transgressing na-
ture, to consume all in us that his holy con-
troversy is with, that shall redound to our
present and eternal peace, as well as His
glory. We must know our strong wills bro-
ken to pieces, preparatory to being built up
in Him, so as to experience a being filled with
his love. We must feel the malady of the
soul before we will apply with full purpose of
heart to our only Physician and Helper. The
sinner must be abased, before the Saviour can
be exalted.

May the Lord Almighty so baptize and re-
baptize into a humiliating sense of our utter
unworthiness and short-coming without Him,
as that the sinner may be thoroughly abased,
and the Saviour, in whom are hid all the
treasures of wisdom and knowledge, exalted.
May true passiveness and lowliness of mind,
under the tuition of that Wisdom which
dwelleth with prudence and leatheth in the
midst of the paths of judgment, so abound, as
that "the fruits of the Spirit, love, joy, peace,
long-suffering," &c., may be brought forth in
us to the praise of the glory of the Redeemer's
grace. Then will those who feel conscien-
tiously bound to elaw and the testimony at
the first committed to this people,—but whose
hands at times hang down from weakness and
discouragement, while their sighs neverthe-
less are often breathed and their prayers
raised, that the God of all mercy will again
arise, and favor the dust of Zion, that the
waste places thereof may be rebuilt and all
wanderers restored—"whose sighs are
many and whose hearts are faint," be afresh
animated and strengthened to hold on, and
even to press forward in the faithful sup-
port of doctrines and testimonies dear to
them as life. And thus will the blessing
that rested upon the head of Joseph, "unto
the utmost bound of the everlasting hills,"
rest in measure upon sons and daughters,
upon servants and handmaidens in this day
and generation. Who presenting their bodies
a living sacrifice, holy and acceptable
unto God, his injunction shall be fulfilled in

their blessed experience:—"Let your light so shine before men, that they may see your good works, and glorify your Father which is in heaven."

Cost of a Small Cheese Manufactory.—As there are doubtless many of our readers interested in this branch of farm industry, we take from a contemporary the following estimate of the cost of a small cheese factory, such as a farmer might erect alone, or such as might be established by several together, forming a joint stock company—the patrons furnishing the milk taking most of the stock.

For 100 cows a building 26 by 60 feet, with 16 feet posts, making it two stories, would be required. Take 24 feet from the lower story for a "make room," leaving the remainder and the upper story for curing rooms. The upper story should be partitioned the same as the lower. The 24-foot room over the make-room should be plastered and furnished with stores, suitable for curing early and late cheese. The cost depends upon the price of lumber and labor, which differs in localities. A rough, substantial building, which will answer in every respect, would cost about \$1000. If finished with paint, &c., \$1300. It could be furnished with vat, tank, presses, hoops, scales, &c., for \$300, making in all \$1600 for the finished building. For 200 cows the same sized building would answer. For additional vat and fixtures \$500. This is the size of many that were built in this State this season.

Stock companies are formed by those interested taking one or more shares, which may be \$50 or \$100 each. A committee is chosen, who superintend the building of the factory, hiring help, &c. A dairy of 100 cows can be managed by a man of experience with additional help. For 200 cows he would want an additional hand, who might be a woman, and inexperienced. The question is often asked, How many cows must a factory number to pay? For an individual to build a factory to work up milk for others at two dollars per hundred, which is the common price of making and furnishing the cheese all boxed and ready for market, he would want 300 cows or more to make it a paying business.—*Manufacturer and Builder.*

Selected for "The Friend."

William Grover appeared to think unkindly of no one; but when obliged to censure the conduct of any, he did it with great feeling and compassion. At the same time there was a quick perception of what was wrong, and it was not allowed to pass unproved. He had a strong objection to hearing the absent slightly spoken of, or their faults made the topic of conversation. On these occasions he would observe silence, or remind the company to be careful of their remarks on others, lest they should unguardedly injure the character of their friends; being himself careful not to make comparisons. He was of a cheerful, contented disposition, and considered it right to derive pleasure and gratification from temporal things, as blessings from the hand of an Almighty Benefactor, provided they were kept in subordination to the great purpose of life, and not suffered to engross too much of the time and affections. He met the vicissitudes of life with calmness, and was careful not to suffer cross-occurrences to discompose his mind, or to draw him into the use of impatient expressions.

8th mo. 6th, 1802. "One thing I seem inclined to mention for thy encouragement, and that is, to request affectionately that thou wilt not let discouragements take place, as to the attendance of meetings for discipline. I believe thy company will be strengthening and encouraging to the rightly concerned present, and their company reviving and consoling to thee. Let not thy deafness discourage thee; thy being, in measure, gathered into thy own exercise, will, I believe, help forward the cause.

Even the contentance of an Israelite, I believe, strengthens many a drooping mind; and there are opportunities now and then, though it may not be our lot to be very active, of manifesting on whose side we are. So that I am inclined, from some persuasions of its usefulness and fitness, to encourage those who with thyself sincerely love the cause of Truth, to keep close to it publicly, even in declining days, as to age. Indeed, I have been of the mind for some time, that if things go on well, the more active part in our meetings for discipline will not always fall on those far advanced in years; but they will probably often sit by, and, like careful fathers and mothers, encourage by their presence and by their weighty spirits, the younger and middle aged to come up in, and maintain their respective ranks; and now and then, in the language of experience, put in a few words well seasoned and well timed, to the increasing of the weight and solemnity. Oh! the use of the company of fathers and mothers in our Society; oh! the pleasantness of seeing the hoary head in our assemblies, having kept the faith, having loved the Truth, and believed in it to the end.—WILLIAM GROVER."

Food for Thinkers and Workers.—The *Phrenological Journal* says: Those who expect to think should not eat much food which simply produces warmth and fat, such as ham, fat pork, white bread, butter, rice, tapioca and starch. These contain very little phosphatic food, being chiefly carbonaceous. Professor Agassiz says: Fish enter largely into the requisition of the human system, especially after intellectual fatigue. There is no other article of food that supplies the waste of the head so thoroughly as fish diet. Fish contain phosphorus to a large extent, a chemical element which the brain requires for growth and life. He would not say that exclusive use of fish would make a blockhead a wise man, but that the brain would not be wanting in one of its essential elements.

Man cannot, however, live on fish alone, because most fish are not fat enough to furnish the heat-producing element in sufficient quantity. The amount of phosphate or brain-supporting food contained in the flesh of animals is in proportion to the activity of that animal; those of great activity, such as the canary bird, for instance, secure food which feed brain, nerve and muscle, but does not produce fat. The flesh of the trout, the pickerel or salmon impart more mental and physical vigor to the eater than the flesh of the eel and flounder. The flesh of wild animals, such as the bison, deer or boar, promote activity in the eater more than the stall-fed ox, sheep or hog. Wild game generally is considered the better food, especially for the convalescent, than the fatted domestic turkey or goose.

Barley, oats and wheat, ground without bolting furnish food for brain; but lawyers,

ministers and students eat the white, supine, or bolted wheat bread, and go to sleep. That which would fatten a pig and give him no desire to exercise or to think, is eaten by the learned and refined of the human race who look in pity upon the poor peasant following the plow, because he is obliged to eat his brown loaf, which brown loaf and cheap fish and wild game contain the incitements to brain work, in which poems, orations and are conceived and nursed. The proper food for laboring men—we mean those who have to exercise muscular strength chiefly—should be that which contains the greatest amount of nitrogen. Among these articles barley and cheese stand high.

For "The Friend"

Love of Excitement.

The following extract from Sewell's "Principles of Education" has appeared to us worth of consideration. The facilities for travel and the great increase of expensive toys and books, had need to make parents and guardians of children watchful, lest they fall into the errors herein described.

"Love of excitement, the craving for amusement, considered to be especially the fault and temptation of youth, are in many cases taught in childhood, almost, one may say, infancy.

"Instead of making little children self-dependent as regards amusement, the moment they appear in the drawing-room some one expected to amuse and play with them, a mother, or sister, or aunt, must give all her attention to them. Instead of being taught self-restraint and consideration, I being forced to be quiet while others are employed, they are allowed to interfere with every occupation. The exciting companionship of their elders becomes a daily necessity instead of an occasional treat; and after the early training in what is to them dissipative parents are surprised that their children cannot be satisfied with only common pursuits but always require some amusement to befall for them. Little do they think that one of the greatest blessings which can be conferred on any one is that of being contented with small pleasures; and that the child of a peasant, who can play happily with a piece of wood, has a possession which the little heir thousands, surrounded by his splended, to might envy.

"Few playthings, few companions, few books. Upon these children may be educated simply and thoroughly. Give them what we and we create artificial necessities, which can only be satisfied by artificial means. A with these necessities there must creep in a wretched spirit of worldliness which is a hidden worm eating away all that is good and noble in a character.

The child with her perpetual longing new tales, her listlessness when she is not continually engaged in study, her constant desire for little fineries, her craving for amusement—some one to play with, or to visit—some young party at home or abroad—is but hearing on a small scale what her elders are on a large one. She is practising discount learning to find duty and usefulness uninteresting, to live for pleasure, to care only what may excite. And it is this spirit which when carried out, ultimately becomes worldliness.

"Lovers of pleasure more than lovers

We want no other definition of worldliness. It is impossible to draw true distinctions between one amusement and another; say that a dinner party is lawful, and a game unlawful; for greediness and excess are as possibly be associated with the one, as vanity and idly may be with the other; display may be shared equally by both. When we attempt to define in these ways, we are almost certain to be uncharitable and impractical; but we cannot be wrong in saying that when amusement and excitement necessities, the spirit is worldly, and therefore when we teach children to crave them, we are educating them in worldliness.

This will not to many seem a very great error. Worldliness is an unobtrusive fault, cold and repelling, indeed, when we approach it closely, but it is perhaps rather useful and refused at a distance. And it never offends our taste, and seldom jars on us. We may live comfortably with it, long as we do not come in its way. Crossed it will turn against us with a tiger's fierceness; but leave it to itself and it will never trouble us. On the contrary, indeed, we only keep our religious peculiarities in certain limits, it will walk by our side, and do us the honor of offering its approval. There is (however) one great evil attached to it.

It absorbs the mind, and entirely prevents it from forcing itself upon the things which belong to the invisible world. It can therefore enter Heaven. Whatever, then, exists in training children in worldliness, at the same time we are training them for the place which is not Heaven.

That is a grave matter. Perhaps when we next incline to indulge ourselves and our children by a round of excitement, whether small or a large scale, we may pause and ask of it."

The Son of God is come into the hearts of true believers, and in boundless love and mercy is still standing and knocking at the door of the hearts of all.

THE FRIEND.

TENTH MONTH 14, 1871.

OHIO YEARLY MEETING.

The printed minutes of this Yearly Meeting have not yet come to hand, but several reports have been received from which we gather that the session of the general meeting was opened on the morning of Second-day, the 25th ult.; the representatives from the respective Quarterly Meetings being all in attendance. The Meeting of Ministers and Friends was held on the Seventh-day previous. At one of the sittings of the Yearly Meeting, in 1870, a Friend had opened a concern felt on account of the Indians. He related the members that the lands they now occupy, and the products of which they were deriving, had been taken from the natives, and a very inadequate compensation given them, and there seemed to him to be a duty upon their present possessors, to devote a portion of the income derived from those lands, to the benefit of the kindred tribes yet remaining in the more remote West. That the Yearly Meeting had long felt this concern, and had continued to labor in it until

the separation from it in 1854, when the channel through which their aid had been conveyed, was closed. The concern received the attention of the Yearly Meeting at that time, but no definite action resulted. At the Meeting just passed, this concern was again brought forward, and a large committee of men and women Friends appointed, to examine the whole subject, and report at a future time what action the Meeting could properly take in the case. No report was received this year.

The consideration of the state of Society as shown by the answers to the several queries, and by the religious exercise raised in the minds of individual members during the course of the Meeting, appears to have been attended with the expression of a lively concern for the preservation and spiritual growth of the members.

A Committee which had been appointed in relation to the condition of Springfield Quarterly Meeting, proposed attaching it to Salem Quarterly Meeting, but upon deliberate consideration, the subject was continued under the care of the Committee another year.

On two occasions visits were paid by women Friends to the Men's meeting. One of these Friends alluded to some young men who had joined Society Temperance Societies, and having briefly laid her burden on the meeting, she withdrew. The concern took hold of the Meeting, and led to the appointment of a Committee, which at a subsequent sitting produced a minute of advice on the subject, which was adopted and directed to the care and attention of the subordinate meetings.

The proper education and training of the children of Friends were felt to be subjects of great importance, and suitable advice was extended to both parents and children; the former being reminded of the blessing pronounced on Abraham who commanded his children and his household after him, and of the judgment that was executed on Ely, who permitted his sons to make themselves vile, and restrained them not. The minutes of the Meeting for Sufferings contained Memorials of two deceased Friends,—Joseph Edgerton and Abigail Branson.

The Meeting closed on Fifth-day, the 28th. In the meetings for worship several Friends were much favored in the exercise of their respective gifts, to the comfort and edification of those present.

From the tenor of the different letters received, we think there is good ground to believe, that the Yearly Meeting was a solid, profitable season, in which the members were brought under that religious exercise which makes sensible of our imperfections, and leads to the alone Source of strength and improvement. It is a very encouraging feature that this religious exercise appears to have spread over both the men's and women's meeting, inciting them to watch over their own members, and to labor for their preservation from evil, and the restoration of those who have gone astray. In this, as in every other good work, we heartily desire their encouragement, and that their labors may be blessed. The most fruitful field for labor is our own vineyards, and though our efforts are not always to be confined to these, yet in a healthy state of religious Society they will have the first place, and will be carefully wedded, watered and watched over.

One letter states that many of the young

people who accompanied their parents when withdrawing from the Society a few years ago, at the same time a few members of Philadelphia Yearly Meeting also left, having returned to their respective meetings.

A highly valued correspondent thus speaks of the Meeting:

"The Yearly Meeting opened on the 25th of 9th mo., and was concluded on the 28th. Several subjects of interest claimed its attention, and were resulted in harmony and brotherly condescension. Several deficiencies were apparent in the faithful maintenance of some of the christian testimonies committed to our trust to uphold, and ability was mercifully dispensed to labor for their removal; so that it was cause of thankfulness in that the love of the ever adorable Head of the Church was spread over us from sitting to sitting; reminding us of His gracious pleadings with a people formerly: 'How shall I give thee up, Ephraim? how shall I deliver thee, Israel? how shall I make thee as Admah? how shall I set thee as Zeboim? My heart is turned within me; my repentings are kindled together. I will not execute the fierceness of mine anger, for I am God, and not man; the Holy One in the midst of thee.' So that it is believed not a few returned to their homes, impressed with the feeling, 'Truly God is good to Israel.'

"The Meeting was largely attended; thought by some to have nearly as many in attendance as prior to 1854. Thirty-eight members attended from the Iowa Quarterly Meeting, who had traveled a great distance and at a considerable expense, to meet with their brethren and sisters in Ohio, in a Yearly Meeting capacity; some of whom were young Friends, and they have been heard to express their satisfaction in thus mingling with their elder friends. I cannot see, on reviewing the subject of the establishment of that Quarterly Meeting, how a better measure could have been adopted in order to secure the just rights of the members, and to exercise that care one over another, which appertains to the institution of the Church, or the proper subordination of inferior to superior meetings, and of members to their respective meetings. Inasmuch as most of them were members of Ohio Yearly Meeting in 1854, and could not give their approval to the separation which then took place from it, and which was sanctioned by Indiana Yearly Meeting. In the Meeting for Ministers and Elders, two Friends were present in the former station, who had not previously sat in that body."

When the printed minutes are received we intend to furnish our readers with further information respecting the Meeting.

SUMMARY OF EVENTS.

FOREIGN.—A London dispatch of the 7th says: The strike at Newcastle may be considered at an end. Only matters of detail remain to be settled. The employers have agreed to the nine hour system which will be carried into effect on and after the 2nd of 1st mo, 1872, and the men have promised to work nine and a half hours per day until that date.

The cotton manufacturers of Barbours have decided to discontinue the use of the operatives, on account of the depressed condition of business.

President Thiers has notified Earl Granville that the commercial treaty between France and Great Britain terminates at the beginning of 1872.

The number of emigrants who sailed from the port of Liverpool during the last three months was 50,000, an increase of 5,000 over the previous quarter.

An explosion of fire damp, attended with the loss of five lives, has occurred in the mines at Aberdare,

Wales. The regular mining force was not at work or there would have been a much heavier sacrifice of human life.

The Bank of England has advanced the rate of discount to five per cent.

London, 10th mo. 9th.—Consols, 92½. U. S. Bonds, 104½; ten-forty, 89.

Liverpool.—Uplands cotton, 9½; Orleans, 10s. The leader of the mob in the attacks upon the German residents in Lyons, has been arrested, tried and sentenced to fine and imprisonment.

The commercial treaty between France and Germany has not yet been arranged. Poyner Querier has gone to Berlin to secure its ratification if possible.

The court of revision, to which the case of General Rochard was appealed, has adjudged him guilty, and declared that he has incurred the penalty of death. Another court-martial has been ordered to be held at Versailles, in which the military offenders, German officers who surrendered their forces to the Gainsits will be brought before it.

Secret agents of Napoleon, who have been intriguing for the restoration of the empire, have been arrested in Paris. A manifesto from the late emperor on the subject of the French political situation, is about to be issued.

The sentence of Rochefort has been commuted from imprisonment for life to banishment from French territory.

It is understood that the German government refuses to accept Treasury bonds guaranteed by the French bankers, in payment of a further instalment of the indemnity, and requires bills of exchange and the re-establishment of diplomatic arrangements between Germany and France.

The Reichstag is convoked for the 16th inst. One of its most important duties will be to vote for the first time the army budget for the whole German Empire, including appropriations for the navy and coast defences.

A meeting of Protestants, representing the various portions of the German Empire, has been held in Berlin for the purpose of discussing the condition of the Protestant religion in Germany. The meeting adopted a declaration setting forth that it is the interest of Germany to oppose the doctrine of Papal infallibility. The dogma is inimical to the sovereignty of the State and the liberties of the people, and destructive of that freedom of conscience which is the basis of true religion, and of the only true and lasting peace.

A Constantinople dispatch states that the progress of the cholera has been checked, and the alarm which was felt concerning the spread of the epidemic is subsiding.

A letter from Teheran, dated 9th mo. 7th, gives a gloomy picture of the state of things in Persia. Pestilence still rages, and the horrors had been increased by destructive inundations, yet notwithstanding the deplorable condition of the people, the Persian government has refused to avail itself of the aid proffered by Russia and Great Britain. The country is disturbed by frequent insurrections. During the 8-month month 8,000 people perished in the city of Neschad, and about 40,000 inhabitants of the province were carried off into slavery by the Afghans, who took advantage of the general disorganization to make incursions for plunder.

The Spanish Cortes, by a vote of 123 to 110, having elected Sagasta president of that body, the Zarilla minister immediately resigned his office. On the 10th inst. the king then requested Espartaco to assume the task of forming a new ministry. He declined, and Admiral Malcampo was called upon and accepted. A semi-official statement of the policy of the new ministry announces that the measures of economy commenced under Zarilla will be continued, and that other measures adopted in furtherance of the ideas of the progressive party for the welfare of Spain.

King Amadeus has ordered the release of one hundred political prisoners.

Cadan, one of the new ministry, declares that the government cannot prevent the members of the international society so long as they obey the laws, but he promises to give the Cortes an early opportunity of debating the question.

The Italian government has determined that no professor of the University of Rome shall be permitted to continue to exercise his functions without taking the oath of allegiance to Italy. Twenty of the professors refused to take the required oath. Two Roman convents have been occupied by Italian troops, the inmates having quietly withdrawn. The Italian Parliament will be opened about the middle of next month.

The lower chamber of the Swedish legislature re-

jected the army reorganization bill. The session was closed by the king on the 7th. In his address on the occasion he expressed great regret at the action of the lower house, which would compel the postponement of a measure essential to the national defence.

Results from the election for delegates in France to the Council-General, indicate that the radicals have returned their candidates from the cities of Lyons, Toulouse, Marseilles and Avignon. The radicals have also carried the Departments of the Rhone and Vasaud, and probably all the industrial centres. The Bonapartists from the election for delegates in France. The moderate republicans appear to be in the majority in the northern Departments.

A Berlin dispatch of the 9th states that the German government has recalled Von Arnim from Versailles, for consultation regarding the customs treaty with England. Poyner Querier was in Berlin in conference with Bismarck, on the same subject.

UNITED STATES.—Miscellaneous.—Mortality in Philadelphia last week 262, including 23 deaths from small pox.

Daniel H. Wells, Mayor of Salt Lake City, and third president of the Mormon church, has been arrested by the U. S. Marshall, upon an indictment of the grand jury; or prominent Mormon polygamists have also been arrested for trial. It is yet uncertain whether the Mormons will offer forcible resistance to the execution of the laws. Brigham Young affects to treat the proceedings with indifference. Drought now prevailing in the northwest is the most severe during the last quarter of a century. The soil in many places is so dry that plowing is impossible. Fires in the woods and on the prairies are raging in Michigan, Illinois, Wisconsin, Minnesota and Iowa. It is believed the flames can only be arrested by heavy rains. Many small farms have been completely destroyed, the farmers losing every thing, homestead, live stock and crops.

According to the census, the total number of persons of German birth residing in the United States is 1,690,533, in Illinois, 203,738; in New York, 316,992; Pennsylvania, 1,041,919; in Ohio, 128,297; Wisconsin, 162,314; Indiana, 78,900; Iowa, 66,062.

A great portion of the city of Chicago has been destroyed by fire. The conflagration broke out on the 7th inst., in a large planing mill, and the wind blowing fresh at the time, the flames spread with great rapidity and the fire soon broke out uncontrolled. At 12 o'clock, it raged through the 8th and 9th inst., and by the evening of the latter the business portion of the city was nearly all in ruins. Among the buildings destroyed are the Sherman House, Custom House, Court House, Chamber of Commerce, railroad depots, grain elevators, &c., &c., together with many thousands of boxes and packages. The loss is incalculable, beyond computation, and it is supposed that between 50,000 and 100,000 persons have been rendered homeless by this terrible calamity. Prompt measures have been taken in the principal cities to send immediate relief to the sufferers.

Market.—The following were the quotations on the 9th inst.—New York.—American gold, 114½. U. S. sixes, 188½, 118; ditto, 5-20s, 1867, 114½. Superfine flour, 86.25 a 86.65; finer brands, 86.75 a 110.40. No. 2 Chicago spring wheat, 1.56 a 1.58; red western, 1.50 a 1.52; white Genesee, 81.28 a 1.53. Canada barley, 81.10. Oats, 50 a 54 cts. Western mixed corn, 73 a 78 cts.; yellow, 73 a 79 cts. *Philadelphia.*—Uplands and New Orleans cotton, 20 a 20½ cts. Superfine flour, 55 a 55.50; finer brands, 55.75 a 87.75. Red wheat, 1.59 a 1.61; amber, 1.60 a 1.65. Rye, 95 cts. Western mixed corn, 84 cts.; yellow, 85 cts. Oats, 50 a 51 cts. The entire market dull and prices lower. Above 2,000 bushels of better quality of Patric's Golden, 53 a 6 cts. fair to good, and 4 a 5 cts. per lb. gross for common. About 17,000 sheep sold at 4½ a 5½ cts. per lb. gross, and 3,900 hogs at 86.50 a 87 per 100 lbs. net. *St. Louis.*—No. 2 winter red wheat, 1.54 a 1.55; No. 3 do., 81.40 a 1.45. Mixed corn, 47 cts. Oats, 33 cts. Lard, 19 cts.

RECEIPTS.

Received from Benjamin Hoyle, Jr., \$2, vol. 45; from Nicholas D. Tripp, N. Y., \$2, vol. 45; from Isaac Lightfoot, or Asa Garretson, Agent, \$2, vol. 45; from Isaac Posegate, Neb., \$2, vol. 45; from John Adams, \$2, vol. 45; from Patricia Gilbert, O., per James R. Kite, Agent, \$2, vol. 45; from Isaac Huestis, M. D., Agent, O., \$2, vol. 45, and for Jesse Hunt, Amy John, Ann Smith, Martha Bay, Henry Crew, James Edgerton, Burwell Peables, Fleming Crew, and Nathan Morris, \$2 each, vol. 45; from Wil-

liam Hill, Me., \$2, vol. 45; from Amos Evans, N. Y., per Mary Kaighn, \$2, vol. 45; from Richard M. Agent, Io., \$2, vol. 45, and for John Hodgins, Willi Pierpont, Thos. D. Yocum, Joseph Emery, Rebe Askev, Samuel W. Stanley, Thos. G. Batty, Thos. Ward and Joseph Paterson, \$2 each, vol. 45; from Thomas Emmons, Io., \$2, vol. 45; from Gulleina J. and Mearler Allman, O., per James Heald, \$2 each, vol. 45; from William Wood, New York City, \$2, vol. 45; from Walter Edgerton, Ind., \$2, vol. 45; from Sam Morris, Chas. Chapman, O., \$2, vol. 45; from Anna L. Singley, \$2, vol. 45; from Samuel Bar N. J., \$2, vol. 45; from Parvin Smith, Pa., \$2, vol. 45.

Remittances received after Fourth-day morning will appear in the Receipts until the following week.

WESTTOWN BOARDING SCHOOL.

A TEACHER is wanted for the Girls' Writing School qualified to give instruction in Grammar and other branches; to enter on her duties at the open of next session, on the 30th of Tenth month.

Apply to Susan E. Comfort, Knox St., Germantown. Elizabeth R. Evans, 325 Union St., Philadelphia. Martha D. Allen, 328 First St.,

FRIENDS' FREEDMEN'S ASSOCIATION.

Our schools in North Carolina and Virginia report 11th mo. 1st. We need a few teachers, and are desirous to engage for this service rightly concerned Friends of salary \$15 to \$20 per month.

For further particulars please apply at this office 116 North Fourth St., Philadelphia.

WESTTOWN BOARDING SCHOOL.

The Winter Session of 1871-72 commences on Sunday, the 30th of Tenth month next. Friends who wish to engage for children for the coming term, requested to make early application to AARON S. LEE, Superintendent, (address Street Road P. O., Chester Co., Pa.) or to CHARLES J. ALLEN, Treasurer No. 304 Arch St., Philadelphia.

FRIENDS' BOARDING SCHOOL FOR INDIGENT CHILDREN, TUNESSASA, NEW YORK.

A suitable Friend and his wife are wanted to charge of this Institution, and manage the Farm attached to it. Application may be made to Ebenezer Worth, Marshallton, Chester Co., Thomas Wistar, Fox Chase P. O., Philadelphia Samuel Morley, Olney P. O., do. Joseph Scattergood, 413 Spruce Street, do.

FRIENDS' ASYLUM FOR THE INSANE Near Frankford, (Twenty-third Ward,) Philadelphia.

Physician and Superintendent—JOSHUA H. WORTHINGTON, M. D. Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

MARRIED, at Friends' Meeting-house, Germantown 10th mo. 5th, 1871, JOHN W. CADBURY to REBECCA daughter of Yardley and Hannah A. Warner, all of Philadelphia.

On the 4th of 10th month, 1871, at Friends' Meeting-house, East Woodland, LEVI S., son of Edward Thomas, of Beaver, died to SUNDAY P., daughter of Henry Walter, of Chester Co., Pa.

DIED, on the 2nd of Eighth month, 1871, in the Co. Pa., at the residence of her parents, SARAH daughter of James P. and Susanna J. Cooper, a member of New Garden Monthly Meeting, aged 22 years. Her mind appeared to be turned upon the Lord's love and affection, and as obedience to His divine will, revealed in scripture, was cheerfully submitted to, through an experience of the truth, "My yoke is easy and burden light." She became imbued with the nature of His true loveliness. Being meek, patient, and retiring in spirit, she is preciously remembered by those who were acquainted with her. Her illness was supported through every conflict that was permitted. She passed quietly away, leaving a full assurance of entrance into blissful immortality.

WILLIAM H. PILE, PRINTER.

PHILADELPHIA.

Age, when paid quarterly in advance, five cents.

Selected for "The Friend"

Life in Tuscany.

(Concluded from page 58.)

In some parts of Tuscany—for instance, in the Lucchese territory—a considerable spirit of enterprise exists among the lower classes of the community. From amongst the dwellers in the chestnut clad Apennine hills and mountains, as has already been stated, a large number of hardy laborers go forth yearly to till the Corsican soil; others from the same district wander off to gain their bread some way another in England or America. Even in the rich plains that encircle Lucca, it was not long since that it was a common thing for the younger members of a large family to seek employment in foreign lands. One stout young man I spoke of was on the point of starting off for France, where, on a railroad, which he had just been made three hundred miles beyond Marseilles, he hoped to be employed at wages of three francs a day. Others, from the same district, after a voluntary exile of some years, had returned from America, to take up their dwelling in their native land, with an amount of dollars that rendered them the envy of their relations and friends. To a poor Tuscan peasant the sums thus accumulated, though to English ideas moderate in amount, sound magnificently grand; for it is not the possession of so many scudi as might make up an income of forty or fifty francs a year, to confer on the rustic proprietor the reputation of a millionaire amongst his humble neighbors.

Such as the stranger is likely to be favorably impressed by the courteous manners and industrious habits of the Tuscan peasantry, cannot escape the observer's notice that much of the comfortable, tranquil aspect of the contadino's life is caused by circumstances for which they themselves are in a great degree to blame. Not only in the valleys of the Arno, where the peasant is liable to be dispossessed at a few month's notice, but in the plains of Lucca, where the tenant, so long as he pays a fixed annual rent of so many sacks of corn, enjoys a permanent tenure of house and land, the same uncleanness is to be found prevailing in the habitations of the peasantry, as well as in their attire and persons. Small as the expenditure would have been the expenditure of

money required to whiten the smoke and dirt-stained walls on which I looked, and slight the amount of time which would have satisfied the claims of personal cleanliness. Though their meagre fare, their homeliness of dress, be not the contadino's fault, yet on themselves most certainly must rest the blame of wearing tattered clothes, and living in houses where the dust and dirt of years encrust the walls, ceilings, floors and furniture, and where vermin, fostered by the congenial atmosphere, swarm often in excess. An indifference to cleanliness, indeed, partakes of the nature of a national vice, which is equally apparent in carpets stained and disfigured by spitting, among the upper classes, as in the foul dwellings of the poor, and in the peasant woman's disheveled hair and unwashed face. A happy day will it be for Italy when the great merits of soap and water come to be generally recognized.

The production of silk constitutes an important part of the avocations of the Tuscan peasantry; for in almost every contadino's house silk-worms are reared. Few farms, however small, are devoid of mulberry trees; but as in some farms there are more, and in others less, than their cultivators have need of, an active traffic in mulberry leaves, during the spring and summer months, takes place. Some mulberry trees are forced to produce three crops of leaves in the season, to feed three successive generations of silk-worms; but the trees are considered to be much weakened and injured by being so frequently docked and stripped. The hatching of the eggs of the silk-worm commences in the month of April, and is generally effected by artificial heat; the women carrying them about their persons during the day, and placing them beneath the mattresses of their beds at night. On Rogation Sunday, the peasants, both men and women, with the eggs of the silk-worms in their bosoms, go in procession to church to solicit the protection and favor of San Iolo, from whose wounds, it is believed, the silk-worms issued. As at the beginning of the process, so the conclusion of the silk harvest is terminated by a religious solemnity; for each peasant, taking from his store a few cocoons, repairs with them to his parish church, and lays them on the altar as a thank-offering to providence. These cocoons, so deposited, become the property of the priest, who sells them, either for the benefit of the poor, or to enrich his own exchequer, according as he may be charitably or selfishly inclined.

The silk crop is an uncertain one; for even with the greatest care, the silk-worms occasionally become diseased and die. A good deal of skill is requisite in their management, to produce a prosperous result; for at certain stages of the silk-worm's growth, they become extremely susceptible to harm—the slightest touch or the most trifling noise, as I was told, being capable of affecting them

prejudicially. Such crises occur during the five moulting sleeps through which they pass; after each of which they waken up, increased in size and with increased vigor of appetite. Progressively, however, as their eating capabilities are developed during their successive states of repose, the wakening up from the last sleep called *lagrossa*, arrayed in a final coat, is followed by a display of gormandizing powers astonishingly great; ravenous with hunger, they eat on incessantly for a space of eight or ten days; the supply of leaves required for their never-ceasing repast is enormously large; (said to be 60,000 times its own primitive weight within thirty days) and a happy moment it is for the contadino, when he sees the worms refuse the food, that for many days they had been devouring so voraciously, and, climbing up the branches of the trees he has placed beside them, begin their work.

Very assiduously do the worms labor at their task for four or five day's time; at the end of which, having quite enveloped themselves in their silken envelopes, they undergo a different fate, according to the purposes they are allotted to fulfil. Such cocoons as are destined to manufacturing uses are plunged into boiling water to kill the worm within; whilst other cocoons—which are reserved for seed, as it is termed—are strung together on a piece of thread, and hung up against a wall. From the cocoons treated in this latter way, there issue, in a few day's time, large white moths of the most sluggish nature, which never quit the cloth prepared for their reception; there, having deposited their eggs, they languish and die.

Not to the present, but to the former political institutions of Tuscany, is the garden-like cultivation of the country ascribable. When the rest of Europe exhibited nothing but poverty and barbarism, the open country belonging to each republican city of Italy, had its fertility increased by an active and industrious peasantry, through the medium of a system of scientific agriculture. Though then, as now, the proprietors of the soil were inhabitants of the towns, the merchant land-owners of former times contributed money far more liberally towards the cultivation of the land, than do now their impoverished successors. By them alone was the land-tax paid; at their cost were dikes and canals constructed: the former as preservatives against inundations, the latter to increase by irrigation the productive powers of the rich plains. The grand canal of Milan, which spreads the water of the Ticino over a large part of Lombardy, owes its existence to those times; and at this day in Italy, after a lapse of five centuries, the districts formerly free, and cultivated by a free peasantry, are easily distinguishable from those where feudalism prevailed. Through those five ages, amidst all the changes that have occurred in Tuscany as well as in Lombardy, have been handed

down from father to son, the knowledge and the practice of a system of agriculture which offered in by-gone times, as it does now, a model for imitation to other lands. And much, truly, is it to be desired that the time may arrive before long, when the Tuscan peasant's home will bear in character some resemblance to his fields; that the riches, neatness and cleanliness without will find a counterpart in the scenes within; and that his toil, furnishing him with more than the mere means of life, shall surround him with some of the comforts of a civilized existence.

For "The Friend."

The Jew Inward.

Seeing it is through the tender mercy of our God that "The Prophet of the Highest" was manifested, to give the knowledge of salvation unto His people by the remission of their sins; whereby also "the Day-spring from on high hath visited us, to give light to them that sit in darkness, and in the shadow of death, to guide our feet in the way of peace," how in earnest should we be not to neglect so great salvation, but through diligence in the occupancy of the talents committed, seek to render unto the beneficent Author of all our sure mercies the increase so justly due from us, and which He calls for at our hands. It is faithful obedience to this Day-spring from on high, this infallible Teacher in the heart, and with that godly sorrow which worketh unfeigned repentance turning to the Lord in the inward parts, and serving Him with all humility of mind, that constitutes the Jew inward: agreeably to the testimony, "For he is not a Jew which is one outwardly; neither is that circumcision, which is outward in the flesh: but he is a Jew, which is one inwardly; and circumcision is that of the heart, in the spirit, and not in the letter; whose praise is not of men, but of God."

The Jew inward while fully accepting—and precious beyond all price it is to him—the propitiatory sacrifice of the dear Lamb of God upon Calvary's cross as the ground of our justification, dares not so put asunder what God hath joined together, as to separate, neither confound justification—freedom from the guilt of sin, through repentance, faith, and obedience—and sanctification—redemption from the power and dominion of sin—by submission to the thoroughly cleansing baptism of the Lord's Holy Spirit manifested in the heart for our regeneration and perfection. Then while acknowledging fully the blood, or the outward offering of the Redeemer, he no less acknowledges the Comforter or Spirit of Truth, which was a part of the inestimable purchase made thereby for poor, lost, fallen man, and which constitutes "the dispensation of the grace of God;" "the ministration of the Spirit;" the new covenant of light and life; the riches of the glory of the mystery hid from ages and generations, "which," declares the Apostle, "is Christ in you, the hope of glory: whom," continues the same, "we preach, warning every man, and teaching every man in all wisdom; that we may present every man perfect in Christ Jesus."

The Jew inward while deeply sensible that his eye must be, and only can be made single by the eye-salve of the kingdom, the anointing received of God, and which enlighteneth all, and teacheth all, and who for this end hath given the earnest of the Spirit in our hearts, feels also that being bought with a price, he is

not only called upon but bound to glorify God in his body and in his spirit which are God's. He knows because his Lawgiver's own words have told him, that except he be born again, "not of corruptible seed, but of incorruptible," by the word of God, which liveth and abideth forever," he cannot see the kingdom of God. Through the same holy channel he learns, and which is of like import, that unless he be washed by the Saviour, and experience His baptism, which is compared to a refiner with fire, and like fuller's soap, which purging the floor of the heart, consumes not only the dross and the tin, but the reprobate silver also, whereby all in us is brought into conformity with the Lord's holy will, he cannot have part with Him, nor realize the sanctification and cleansing called for unto the perfection of holiness or the new creation of God in Christ Jesus.

Thus, if he only can be a Jew who is one inwardly, and circumcision be that of the heart, in the spirit and not in the letter, how much must the attention of those who are seeking such a state be directed *within* where the kingdom of Christ must come and be set up! Instead of looking outward for something above the witness, above the manifestation of Christ as a babe in Bethlehem's manger, or as a tender plant, and as a root out of dry ground having no form nor comeliness, neither beauty that we should desire Him though Lord of all, the true Jew will have his eye primarily directed *within*, where, always from small beginnings, the kingdom has its birth and development. It is sown in weakness and grows through *fear* and trembling. It cometh not with observation; but springeth and groweth up a man knoweth not how, "first the blade, then the ear; after that, the full corn in the ear." Being compared to a *little* leaven, and to "a still small seed" in the heart, the Jew outward too much, if not wholly overlooks it from its very simplicity and insignificance. "But," saith the Apostle, "we preach Christ crucified, unto the Jews (whose eyes are outward) a stumbling block, and unto the Greeks (the wise and prudent in their own sight) foolishness." Christ must ever be a stone of stumbling to the unmortified, and those, like Moab, who have "not been emptied from vessel to vessel, neither have gone into captivity." But though set at naught by wise builders, learned as they may be in the letter, He will unchangeably remain the precious, ever-living corner stone and foundation to those who are of the circumcision in spirit, whose praise is not of men but of God: in other words, "who worship God in the Spirit and have no confidence in the flesh." How carefully, then, should we guard against the loss of the inward life of righteousness which alone constitutes us Jews indeed, or living branches of the living Vine. L. Pennington, writing of this, says: "If the enemy can prevail to bind the inward eye, and steal away the life within, he hath enough. Then abound as much as thou wilt in knowledge, in zeal, in duties, in ordinances, in reading scriptures, praying, meditating, &c., thou art the surer his hereby; and so much the better servant to him; yet how much the richer thou art in knowledge, experiences, hopes, and assurance, *without the life of power*; so much the more acceptable, and honorable, and useful, art thou in his kingdom."

The Jew inwardly will often be led into

close searching of heart, whether he is before Him who seeth in secret, bearing the yoke and cross of Christ in the one straight and narrow way unto everlasting life. In downward stillness, in humility and contrition soul, he will be taught saving lessons. I will not find that way smooth and easy, which, which from the manger to the cross, so much one of tribulation and suffering, even to being made perfect thereby to his dearest Master. Baptisms deep, with deaths oft renewed, will be a portion of the bitter cup I will have to drink. But that his Saviour drank thereof before him, and with the humble hope, however unworthy, of the happy end they lead to, will give encouragement at consolation and support in every hour of trial in every pang of bitter suffering or poignant sorrow and travail of spirit. "For all I breathe, most for the severe," will be the breathing of his chastened, contrite soul, as nearing that celestial port where crosses and trials cease, and all tears are forever wiped from all faces. "May His hand not spare, nor His eye pity," is the submissive utterance of such one, till all that is in me bows, and remain wholly bowed, to endure with perfect patience His whole good pleasure concerning me.

Faith in the immediate manifestation of the indwelling of the Lord's Holy Spirit of saving power and efficacy, will as a mantle elude the heart of the circumcised and inward Jew. So that though this faith may at times deeply proven, and appear, from the withdrawal of the Bridegroom of souls for the time thereof, to be reduced almost to a grain, yet being through the operation of God will raise them from the dead. He will in His own good season return to His exercised child with healing in His wings; when the melot of the humbled, grateful heart will more as more be, "Spring up, O well; sing ye unto it." "Arise, Lord God of hosts, into thy resting-place, thou and the ark of thy strength! He thus becomes a witness of the saving faith of the gospel once delivered to the saints. (That faith which is the *substance* of things hoped for, the *evidence* of things not seen.) Faith which works by love to the purifying the heart, and giveth the victory over death, hell, and the grave. A faith by which the elders, of whom the world was not worth obtained a good report. A faith which purves from being "tossed to and fro, and carried about with every wind of doctrine or from wavering "like a wave of the sea driven with the wind and tossed." A faith which while it leaves us not strangers to the heavenly power of the Lord Jesus as He come in Spirit to cleanse the heart from sin, enables to adopt the apostolic language, and to say from a measure of living experience "I am crucified with Christ: nevertheless live; yet not I, but Christ liveth in me: as the life which I now live in the flesh, I live by the faith of the Son of God, who loved me and gave himself for me."

The kingdom that we are commended about all things else first to seek, is that, which our humility, and contrition, and deep abasement, Christ Jesus through his Holy Spirit sets up within man. In no other way can we know Him to reign over all in us, but through our submission and passivity as children of the Father's hand, to His holy will, which out of weakness, through the power of His might, maketh strong, and is our sanctification. For a holy and heart-searching Gr

not give us of His peace here, or accept any other terms hereafter, than as we faithfully "worked out our salvation" through letting obedience keep pace with knowledge, as the first great business of our lives, under the dictates and help of that restoration of His blessed Spirit bestowed upon us to profit withal. We conclude with a subjoined query and answer of I. Pennington, from whose deeply instructive works we have already quoted in this essay:—

Question. But what is the way of peace, and neither the profane, nor any sort of oppressors out of the life and power, ever knew, and how to know?

Answer. It is an inward way, a way for inward Jews, for the inwardly-renewed and circumcised to walk in. It is an holy or sanctified way, for the sanctified ones to walk in. It is a living way, which none but the Spirit can find. It is a new way, which none but those to whom God hath given the new can see. It is a way that God prepares hearts up, and leads men's spirits into who know unto Him, and guides the feet of His saints in. It is a strait and narrow way, that is not of the flesh, nor wisdom of the world, can find out, or enter into. Oh! how low, how low, how poor, how empty, how void, must he be, that enters into this way, walks therein! Many may seek after it, may think to find it, and walk in it; but shall be able, as our Lord Christ said, to circumcise outwardly avails not; here that that circumcision hinders not; hereby exercise profits little. The new creature is all here; the cross of Christ is all here; power of God is all here; and he that is according to this rule, peace is upon him and the whole Israel of God. But he that knows not this rule, nor walks according to this rule, peace is not upon him, nor is he of the inward Israel of God, who receive the Spirit of life in Christ Jesus, which is the inward rule of the inward Israel.

This was the way of peace from the beginning; this is the way of peace still; and there is not another. To be new created in Christ Jesus, to be ingrafted into him, to abide in him, to have the circumcision of the flesh (the body of the sins of the flesh cut off) by the circumcision of Christ (made inwardly in the heart without hands,) and to walk not in the flesh, but after the Spirit, even in the newness of the Spirit, here is life and peace, rest and joy forevermore. The Lord is tender mercy give me a sense of it, and lead me into it more and more. Amen."

For "The Friend."

The Telegraph and the Storm.

(Continued from page 66.)

Although the Signal Service is yet in its infancy, and must be patiently nursed and cherished by the people for some years before we can expect to do and discharge its full mission, under General Myer's indefatigable and skillful management it has already achieved much good, and more than compensated the public for the expense of its establishment. Since it was instituted last summer the chief signal officer has, to quote the words of the *New York World*, "thoroughly organized and equipped a system which now braces in its scientific grasp every part of the land from Sandy Hook to the Golden Gate California, and from Key West to the Dominion of Canada."

"Three times every day synchronous observations are taken and reports made from the stations—one at 8 A. M., one at 4 P. M., and a third at midnight. These observations are made by instruments all of which are perfectly adjusted to a standard at Washington. They are also all taken at the same moment exactly, these observations and reports being also timed by the standard of Washington time. The reports from the stations are transmitted in full by telegraph. By a combination of telegraphic circuits, the reports of observations made at different points synchronously are rapidly transmitted to the different cities at which they are to be published. They are, however, all sent of course to the central office in Washington. These reports are limited to a fixed number of words, and the time of their transmission is also a fixed number of seconds. These reports are not telegraphed in figures, but in words fully spelled out. There are now about forty-five stations for which provision has been made, and which are in running order. These have been chosen or located at points from which reports of observations will be most useful as indicating the general barometric pressure, or the approach and force of storms, and from which storm warnings, as the atmospheric indications arise, may be forwarded with greatest despatch to imperiled ports.

"These stations are occupied by expert observers furnished with the best attainable instruments, which are every day becoming more perfect, and to which other instruments are being added.

"The reports of observers are as yet limited to a simple statement of the readings of all their instruments, and of any meteorological facts existing at the station when their tri-daily report is telegraphed to the central office in Washington.

"Each observer at the station writes his report on manifold paper. One copy he preserves, another he gives to the telegraph operator, who telegraphs the contents to Washington. The preserved copy is a voucher for the report actually sent by the observer; and if the operator is careless and makes a mistake, he can not lay the blame on the observer, who has a copy of his report, which must be a fac-simile of the one he has handed to the operator. The preserved copy is afterward forwarded by the observer-sergeant to the office in Washington, where it is filed, and finally bound up in a volume for future reference.

"When all the reports from the various stations have been received they are tabulated and handed to the officer (Professor Abbe) whose duty it is to write out the synopses and deduce the 'probabilities,' which in a few minutes are to be telegraphed to the press all over the country.

"This is a work of thirty minutes. The bulletin of 'probabilities,' which at present is all that is undertaken, is made out thrice daily, in the forenoon, afternoon, and after the midnight reports have been received, inspected, and studied out by the accomplished gentleman and able meteorologist who is at the head of this work.

"The 'probabilities' of the weather for the ensuing day, so soon as written out by the Professor, are immediately telegraphed to all newspapers in the country which are willing to publish them for the benefit of their readers.

"Copies of the telegrams of 'probabilities'

are also instantly sent to all boards of trade, chambers of commerce, merchants' exchanges, scientific societies, &c., and to conspicuous places, especially sea-ports, all over the country.

"While the Professor is preparing his bulletins from the reports just furnished him by telegraph the sergeants are preparing maps which shall show by arrows and numbers exactly what was the meteorologic condition of the whole country when the last reports were sent in. These maps are printed in quantities, and give all the signal stations. A dozen copies are laid on the table with sheets of carbon paper between them, and arrow stamps strike in them (by the manifold process) the direction of the wind at each station. The other observations as to temperature, barometric pressure, &c., &c., are also in the same way put on them.

"These maps are displayed at various conspicuous points in Washington—e. g., at the War Department, Capitol, Observatory, Smithsonian Institution, and office of the chief signal officer. They serve also as perfect records of the weather for the day and hour indicated on them, and are bound up in a book for future use.

"Every report and paper that reaches the Signal office is carefully preserved on file, so that at the end of each year the office possesses a complete history of the meteorology of every day in the year, or nearly 50,000 observations, besides the countless and continuous records from all of its self-registering instruments.

"When important storms are moving, observers send extra telegrams, which are dispatched, received, acted upon, filed, &c., precisely as are the tri-daily reports. One invaluable feature of the system as now organized by General Myer is that the phenomena of any particular storm are not studied some days or weeks after the occurrence, but while the subject is fresh in mind. To the study of every such storm, and of all the 'probabilities' issued from the office, the chief signal officer gives his personal and unremitting attention. As the observations are made at so many stations, and forwarded every eight hours, or oftener, by special telegram from all quarters of the country, the movements and behavior of every decided storm can be precisely noted; and the terrible meteor can be tracked and 'raced down' in a very few hours or minutes.

A beautiful instance of this occurred on the 22d of February last, just after the great storm which had fallen upon San Francisco. While it was still revolving around that city, its probable arrival at Corinne, Utah, was telegraphed there, and also at Cheyenne. Thousands of miles from its roar, the officers at the Signal Office in Washington indicated its track, velocity, and force. In twenty-four hours, as they had forewarned Cheyenne and Omaha, it reached those cities. Chicago was warned twenty hours or more before it came. Its arrival there was with great violence, unroofing houses and causing much destruction. Its course was telegraphed to Cleveland and Buffalo, which, a day afterward, it duly visited. The president of the Pacific Railroad has not more perfectly under his eye the train that left San Francisco to-day than General Myer had the storm just described.

(To be concluded.)

A good man's steps are ordered by the Lord

For "The Friend."

From the Letters and Papers of John Barclay.

(Continued from page 50.)

"1817. I have been long settled in the persuasion, that it may be well for many of those who desire the promotion of truth and righteousness, whether they may have moved in a private or in a public sphere, to leave behind them, when they go hence to be seen no more here on earth, some written testimony, however slight it may be, to the blessed cause. As an individual, I confess that I have derived much instruction, comfort, and strength, from the living memorials left us by many christian brethren and sisters now removed from works to rewards; not only from their journals and from memoirs of them, but even from testimonies of Monthly Meetings. But especially I have to notice, that the expressions of those who have arrived near the confines of the invisible world, have sunk deep in my remembrance; nor do I know any other instrumental means, that have proved to me so searching, softening, effectual and abiding, as that last mentioned description of memorial. I believe that the profitable impressions which are made, particularly on the minds of well disposed children and young persons, remain with them for the most part through life; so that many amongst us, now grown up, can testify, that incidents and sayings, which in childhood they had heard or read, of truly excellent characters, do even at this day continue to have a beneficial effect on their minds; and even in cases where young people have wandered far from the line of duty, these things not infrequently arise in their remembrance. I speak from some degree of experience, however small it may be, compared with that of some others: for I have been a wanderer in my time, yet can testify that even when most widely separated by wickedness from the Author of all good, the recurrence of the wisdom of the wise, and of the sayings of the dying, to my thoughtless heart, has not been either infrequent or unseasonable. But the advantages which my soul has received in recent times, are still more decided. Many may think themselves unfit to tell of the Lord's goodness to them in their early youth, as well as under trials and troubles, and great variety of circumstances, even to their old age; but such humble-hearted ones are the very persons who are perhaps most fit, or most called upon, to make mention in some form or other, of the providences and mercies and many deliverances which they have met with. Often when I hear of the death of eminent servants of the Lord, I long that their wisdom and the weight of their long experience may not die with them; but that some memorial may have been left by them, for the instruction of those who are still travelling on their wearisome way. And surely, the very least of those who strive to follow the Lord, have had something happen, or have made some reflection worth leaving behind, for the encouragement and benefit of such as survive them. I indeed feel this practice of which I am speaking, to have been, and still to be, the source of a renewed feast to me; and I seldom recur to some of the manuscripts and scraps which I have written, without precious feelings of gratitude, and desires after a patient continuance in well doing unto the end. Some of these which have been written in the very depth of affliction, seem to stir up my faith in the Almighty power, and animate me with

fresh courage to endure all things, and to suffer, even unto the death of all that within, which would have its own way and will, and not the Lord's blessed will. Indeed I have been so aware of the instruction to be derived, both from writing such small pieces, and from reading the productions of others in this way, that I dare not refuse, however little I desire it, to allow of these little scraps, the feeble tokens of Divine favor, being made as public as any prudent person, after I surrender them up and go hence, may see right.

"1814, May. Some of the following reflections and remarks are taken from little books called 'Accounts of Time,' in which the hours of every day were accounted for, and the occupation which filled every individual hour of each day was put down. This was at all events an original design, if nothing better; but indeed it was of use, and no doubt was the means of bringing me into active and industrious habits, at a time when no sterling inward principle seemed to have full rule, and when I was left very much to my own direction, and at my own disposal as to my pursuits. I have often felt that it was a preservative at the time, and a stimulus to exertion. I think I may add, of this little contrivance for self-government, as well as of many others which occupied my attention about the same period, that they had their use, in awakening my mind to see the importance of bringing self and sense into subjection; and however insufficient they were of themselves to effect the same, they nevertheless urged me forward to press after the knowledge and attainment of that, which is now, (blessed be the Lord, who hath showed this to me,) experimentally found to be the only sure guide and leader. As far as these little relics show, how the wrestling seed struggled within me, and how tender and gradual were the leadings of the Shepherd of Israel, how the good seed seemed at times almost crushed, and every desire after such things as were truly desirable, was at seasons very feeble and faint; so far they are indeed interesting to me, and excite feelings of gratitude as often as they are examined. These 'Accounts of Time' were begun in the Fourth month 1814, [in the 17th year of his age], and were left off about the Eighth or Ninth month 1816. The reasons for preserving them, apply equally I think to those weekly reports which I was in the habit of drawing up; from which extracts will also be inserted here.

"1814, August 8th. I think I may say, that in proportion as I endeavor to do well, I feel that I am enabled to do so; that there is something within me that stimulates to good, that encourages me to persevere in what is good, and which even tells me what is good. O! may I ever listen to its silent but most important intimations,—may I indeed follow that secret monitor within me, and both desire and walk worthy of its reproofs and persuasions.

"1814, December 18th. Be anxious and ever ardent in the work before you, even your own eternal happiness, and that of your fellow-creatures, to the glory of God. There is such danger, such liability, whilst in these frail bodies and in this wicked world, even to those, seemingly the most confirmed among us, to slacken and decline, that on this head I cannot forbear suggesting a hint to myself, who am but just setting out on the arduous journey to Zion!—I cannot help urging my-

self to beware of that destructive indifference and lethargy, which are and have been the ruin of thousands, in a religious sense; who would palliate the guilt and error of other and excuse our own, which damp and chill any appearance of zeal in our neighbors, while they effectually, though gradually, quench any like disposition in ourselves."

(To be continued.)

CHRIST'S KINGDOM,

THIRTY-FIFTH CHAPTER OF ISAIAH.

The solitary place shall smile,
The wilderness be glad,
The arid desert's burning waste
In verdant robes be clad,
And lovely flowers upspringing there,
Shall glow in fadeless bloom,
To charm the eye, and load the air
With beauty and perfume.

The glory of the lofty hills
Of Lebanon shall lie,
And Carmel's wealth of beauty there
Shall greet the ravished eye,
With all that Sharon's dewy fields
Of excellence afford,
And over-spreading all, shall dwell
"The glory of the Lord."

Then shall the blind eyes open wide,
Then shall the deaf ear hear,
And music burst from unsealed lips,
In cadence sweet and clear;
Then shall the lame man walk and leap
As the hart upon the hill,
Exultant in his new-born strength
His joyous pulses thrill.

And there a highway shall be made,
"A way of holiness,"
Which naught unclean can travel in,
Nor feet of sinners press,
No lion shall go up thereon,
Nor any beast of prey,
But there the feet of the redeemed
Shall tread its shining way.

And there the ransomed of the Lord,
Will Zion's courts surround,
With songs of angel sweetness,
And joy and gladness crowned,
For there shall be no sorrow more,
Nor sickness, nor decay,
For grief shall all be turned to joy,
And sighing flee away.

Colum. Co., Ohio, 9th mo. 25th, 1817.

NIAGARA.

These lines were written by Lord Morpeth, now Earl of Carlisle, in the Guide Book at the Falls.

There's nothing great or bright, thón glorious fall,
Thou may'st not to the fancy's sense recall—
The thunder-riven cloud, the lightning's leap,
The stirring of the chambers of the deep;
Earth's emerald green, and many-tinted dyes,
The fleecy whiteness of the spray-skies;
The tread of aurns thickening as they come,
The boom of cannon and the beat of drum;
The brow of beauty and the form of grace,
The passion and the prowess of our race;
The song of Homer in his loftiest hour,
The unresisted sweep of Roman power,
Britannia's trident on the azure sea,
America's young shout of liberty!
O, may the wars that madden in thy deeps
There spend their rage, nor climb the encircling steep.
And, till the conflict of thy surges cease,
The nations on thy bank repose in peace.

Measures.—An Irish mile is 2,240 yards; Scotch mile, 1,984 yards; an English, or statute mile, 1,760 yards; German, 1,806 yards; Turkish 1,826.

An acre is 4,840 square yards, or sixty nine yards, one foot, eight and a half inches each way; a square mile, 1,760 yards each way, containing 640 acres.

QUERIES.

That number of families or individuals have been duly furnished with the Holy Scriptures by the Auxiliary during the past year?

What number of Bibles and Testaments have been given to the Auxiliary within the past year?

How many members, male and female, are there now in the Auxiliary?

That number of families of Friends reside within its limits?

How many families of Friends within your limits have been supplied with a copy of the Holy Scriptures in good type, and on fair paper; if so, how many?

How many members of our Society, capable of reading the Bible, do not own such a copy of the Holy Scriptures?

How many Bibles and Testaments may probably be disposed of by sale within your limits?

How much of the income of the Auxiliary sufficient to supply within its limits who are not duly furnished with the Holy Scriptures?

That number of Bibles and Testaments would it be necessary for the Bible Association to furnish gratuitously to enable the Auxiliary to supply each family?

What number would be required in order to furnish members of our religious Society, capable of reading, who are destitute of a copy, and unable to purchase?

How many Bibles and Testaments are now on hand?

For "The Friend."

Following little reminiscence of two dear friends, both gone to their everlasting home, may serve to encourage some to imitate the example of Jane Clark, who, like Cornelius, gave much alms to the people.

At a Monthly Meeting held 5th mo. 27th, Elizabeth Pitfield thus alluded to her dear friend: "I was said of Cornelius formerly, 'Thy prayers and thine alms are come up for a memorial before God.'

I have been thinking of our dear friend Jane Clark, and I believe by her good works and alms-deeds she has made the hearts of many to rejoice.

It is felt bound to bear this short testimony that her steadfast, upright walk, spoke for itself. 'Come, follow me as I follow thee,' and I believe it may be said of her, 'Her name is written in the Lamb's Book of Life.'

For "The Friend."

Near Chadd Ford, 10th mo., 9th, 1871.

This neighborhood was visited this morning by an earthquake shock. The first intimation I had of the shock was a loud rumbling noise, not quite so loud as the heaviest thunder, but more intense and of longer duration. I happened at the time to be in the open field and standing still, and the first thought was that Dupont's powder mills, which are some 5 to 6 miles south of us, had blown up; but on looking round southwards I perceived that the sound came from nearly due east, and seemed to pass directly under our feet, accompanied by a jarring motion of the earth vertically, and quite perceptible, and to die away in the west, perhaps a little south of west. The noise was heard before the motion was felt; in fact, we did not feel the motion until the noise seemed to be directly under us, when it sounded more like immense rocks falling down, than anything else I can liken it to. The man who was with me, I found upon comparing notes experienced the same sensations, and agreed with me in the direction of the sound. It occurred at a quarter to 10 o'clock, A. M., and continued from first to last perhaps 3 to 4 minutes. The people at the house describe the stove and windows as rattling. The day bright and clear, wind south west.

For "The Friend."

Memories of Mildred Rateliff.

(Continued from page 59.)

"[1812. 10th mo. 1st. Set off afresh for the Yearly Meeting. Had a day of hard travel through the mountains. In the evening our carriage broke, and our lots were cast in a place where there seemed but little hope of comfort. Filth and darkness, yea, darkness that could be felt, made but a gloomy prospect. I had but little sleep though more than I expected. Indeed I thought I had enough to do to watch, and I longed too to be fervent in prayer. So we, or rather I, spent the night; for my companion lay sweetly sleeping. In the morning several Friends came, being on their way to the aforesaid Yearly Meeting. Among them my dear husband, who with another friend stopped with us in order to assist in getting the carriage mended.

"2nd. We are yet detained. Now, O Lord my God, thou knowest I have been striving for years to bear all things, and profit by all things, and to be able in all to give thanks! Yet, O righteous Father, thou knowest this is not to be come at, but by the might of thy power! Therefore, O my Father! do I, and will I, through thy Divine aid, still plead with thee, that I may be so far from murmuring at proving trials, that I may be enabled to enroll them in the list of thy most peculiar favors. I ask not relief from trials before the time, but strength to endure to the end.

"3rd. Continued our journey to Baltimore, where we arrived on the 9th, and were kindly received by our friends there.

"10th. Attended the opening of the Select Yearly Meeting, where I believed it right for me to drop some close remarks. Had to allude to the testimony of our blessed Lord to his disciples, 'Ye are clean, but not all,' in which I found peace. May the labor have the desired effect, causing an impartial inquiry and deep search with the language, 'Lord, is it I?'

"11th. Were the public meetings; and from the 12th to the 16th inclusive, I attended the Yearly Meeting to its conclusion, which was under an evidence of Divine regard. May all the praise be ascribed unto Him to whom it belongs.

"17th. Set our faces homewards, with the continued prospect of visiting some meetings on the way. May it please Thee, O wonderful Counsellor, to be with us, that thy own most excellent Name may be glorified.

"18th. Was at a meeting near Ellicott's Mills, and 19th went on to New Market, where on the 20th, with our dearly beloved friend and brother, David Graves, we had a meeting. In the conclusion thereof I had to believe anewly, that if the testimonies delivered by the faithful messengers of the gospel were trodden under foot by any of the people, the Master would be clear, and his dedicated servants would be clear also: in which my soul did rejoice.

"21st and 22nd, went on to a settlement of Friends, and had a meeting at Berkley meeting-house. Here I sat long in suffering, and then had a close searching testimony to leave amongst them. After meeting went on to Hopewell.

"25th. Were at meeting there, where David Graves and Ruth Bonsall had testimonies to deliver. I sat in suffering under close exercise; earnestly entreating the Lord my God to direct my steps for me. I was straightened on every side, feeling my way bedged up as Israel's was in ancient days. In this condition I was consoled with the language, 'Stand still and see the salvation of God.' So then I was satisfied it was best for me to withhold in regard to appointing meetings, which had been my former prospect."

Under date of 11th mo. 16th, M. Rateliff writes: "We reached home through Divine mercy, and found all as well as we had any right to expect." She adds, "May thy journey, O gracious Father, teach me wisdom and lasting understanding."

As false answereth to face in a glass, so doth the crosses, and trials, and baptisms of the Lord's proved and tribulated children, in each other's experience. We trust that many of the poor and exercised servants of their crucified though risen Saviour, will read with deep interest the submissive, plaintive moan, conveyed in the following letter, of one who no doubt had known a putting on of Christ, through a being baptized into Him who was meek and lowly of heart; who was a man of sorrows and acquainted with grief; and who was taught obedience by the things which He suffered:

"Campbell Co., Va., 9th mo. 25th, 1812.

"Beloved Friend,—I am glad of an opportunity of sending a few lines to thee in answer to thy very acceptable letter. It was truly satisfactory to hear from thee, as from a child tenderly beloved. Although separated in body, yet I feel nearly united to thee in spirit, and often remember the near love and freedom that subsisted between us, when we were together in this State. Oh the simplicity of the Truth has been greatly departed from by many who remain here! which indeed is cause of deep mourning and lamentation to those who are concerned for the prosperity of Zion, and for the enlargement of her borders. * * *"

"Although many deep trials are permitted to await me, yet through and over all I have

cause to be thankful that I am thus far preserved, and at times am enabled to pour forth my cries in secret to Him who has hitherto been my helper through every deep probation. Beloved one, we know that flesh is weak. Thou as well as I know this, for we both have our trials. Sometimes I have let troubles prey too much upon me, and then they have brought me very low, I can truly say I have been a woman of sorrow, and well acquainted with grief. Yet I rejoice that I feel my strength renewed in the Lord my Helper, who is, and ever will be, a fountain of light and life unto all who love him, and his neck and lovely appearance in their hearts above all things. Here we have no continuing city! May we seek one to come, whose builder and maker is God.

"My mind is often turned towards thee in my retired moments, greatly desiring thy welfare every way. We have had the company from your State, of Ann Taylor, and her companion Elizabeth Wood. They were several times at my house.

"Now I must conclude in the love of the gospel, and bid thee farewell,

REBECCA PRESTON."

About this time, the following letter was written to Mildred Hatch by her friend Sarah Proctor:

"Baltimore, 10th mo. 29th, 1812.

"My Dear Friend,—The acceptable testimony of thy affectionate and lively interest for my well being, and well doing, was received the day after it was written. It was truly grateful to me, helping in some degree to ameliorate the feelings which the deprivation of the society of endeared friends does for a season produce. I have heretofore, as well as in the present instance, experienced the truth of that declaration of the Great Master to his immediate followers, that it was needful for them that He should go away. I have found it profitable, after his servants and handmaids who have been sent to labor in our part of his heritage, have accomplished that for which they were sent, that they also should go away. Doubtless these are the ways of wisdom, that we should be preserved from leaning too much on those who are Divinely commissioned to plant or water; forasmuch as the increase of all must come alone from Him, who is the Author of every good and perfect gift.

"I have often been humbled in perceiving that a place should be found for me in the affectionate remembrance of the Lord's dedicated servants. I often feel myself unworthy of their notice, and think I must be to them a deceiver—a character which my beloved mother, when I was a very child, once cautioned me about, when a valuable Friend once pleased with me. This has very often occurred to my remembrance since then, to my own abasement, although I do not remember ever communicating it to any one before. Like begets its like. Feeling thee near and dear in the openness in which thy letter was penned, thoughts have arisen unsought for, and been written, as I feel them going to one who can bear with the weakness of a child; which indeed I am in religious experience, although in years I have attained maturity. Let me ever commemorate the mercy of that Power that did not entirely leave me satisfied with the flesh pots of Egypt; nor suffer me, in my small progress towards the promised

land, to regret that I had ever turned my back on them.

"I have felt thy interest for me, beloved friend, as a hand reached forth to help my advancement. Oh! that this effect may be produced; that so I may become qualified to salute thee in a language thou canst understand, when sitting in the seat of true judgment, and when walking in the way.

"I have not heard from my beloved mother in Israel, Susanna Horns, since I saw thee, but doubtless her day's work is progressing with the day. Dear Charity Cook left us the second day after thou didst. She came and sat amongst us in our meeting on First day, and broke a little bread to our refreshment. When thou canst write, it will be truly acceptable to me to hear of your progress and safe arrival at your own habitation. I trust the sheaves of peace will be found with you, and ability given renewedly to raise up an Ebenezer to Him that has hitherto helped through and over all.

"Our dear mother in the Truth, Mary Millin is very feeble, only able at intervals to attend meeting. I look on her in some degree as Elisha did his Master, when following him from place to place in the expectation that the time of his departure was at hand. I am ready often to cry out in secret lamentation, "What will become of the little handful left?" Surely the ark will totter from their shoulders and be taken by the enemy.

"Many Friends whom I have not seen, I have nevertheless felt such a nearness for, that I apprehend if an opportunity for acquaintance with them should be afforded, they would be as bone of my bone, and flesh of my flesh. The love and fellowship which is the badge of discipleship, is indeed a precious feeling. May the proofs thereof more and more abound. Farewell! farewell! dear friend, says thine affectionately,

SARAH PROCTOR."

(To be continued.)

Manufacture of Spring Knives.—Few people, says the Mechanics' Magazine, have any idea through what a number of hands their pocket knives have passed in the process of manufacture. A bar of steel destined to furnish a number of blades is heated to redness. A length is cut off, and the forger speedily "moolds" this, that is, shapes it roughly into the shape of a pocket knife blade. Another heating is then required to fit the end for being fashioned into the tang, and yet another before it can undergo the further operation of "smithing," the last stage of which is the stamping of the mark of the thumb nail to facilitate opening. The tang is then ground and the blade marked with the name of the firm. The slight bulge on the reverse side caused by this operation is removed by fire or the grindstone. The blade is then hardened by heating it to redness, and then plunging it into water up to the tang.

The tempering process follows next, the bluish yellow tint being considered as indicating that the proper degree of heat at which to immerse the blade once more in cold water has been attained. After this the various kinds of blades are classified in the warehouse, and undergo sundry grinding operations to fit them for being hafted. Twelve distinct processes have by this time been gone through, and many more are necessary before the knife is completely finished, although the number

of hands which it has now to pass through depends in a great measure on the finish to be given to the handle, according to the style of the blades with which it is fitted, the price which the completed article is fitted to realize.

The giving of flattering titles to met between whom and me there was not any tention, to which such titles could be pretended to belong. This was an evil I had been addicted to, and was accounted a readiest in: therefore this evil also, was I required to put away and cease from; so that forward I durst not say, sir, master lord, madam, my dame, or your servant, to one.

Again, respect of person in uncovering head, and bowing the knee or body in salutations, was a doctrine I had been much the use of. And this being one of the customs of the world, introduced by the wit of the world, instead of the true h which this is a false representation of used in deceit, as a token of respect by sons one to another. And besides, thing a type, and proper emblem of that d honor which all ought to pay to Alm God, and which all, of all sorts who take them the christian name, appear in, when offer their prayers to Him; and ther should not be given to men. I found to be one of these evils, which I had been long doing; therefore I was now required put it away, and cease from it—*T. Elme*

THE FRIEND.

TENTH MONTH 21, 1811.

As a creature of time and circumstances with an invisible potent enemy constantly in wait to deceive and destroy him is beset with dangers on all sides, and neither the prescience to discover nor power to prevent the calamities that may assa overwhelm him. However correctly he sometimes judge of others by analogy himself, he really has no certain knowledge of what is going on in the minds of around him. His reason alone is an inadequate guide to the course that should be used to secure his own future happiness, less to reveal to him the designs of his Creator in permitting or ordering the events in which he finds himself an actor.

With these inherent deficiencies, his consciousness should teach him, that in himself, he is unable to rise above circumstances around him, and that the certain means of acting wisely and attaining the enjoyment of sure-grounded peace and safety, is firm faith in the superintending, and overruling providence of his Creator whose divine attributes can far more make up for all his own weakness and imperfections. The practical experience of the mission of Christ can alone enable him to realize his true relation to the Supreme origin of the universe; open his eyes himself and his surroundings in the undimmed light of the Omnipotent, supple weakness with the strength of the Alm and by producing heartfelt resigant obedience to the Divine will, cause him to know his own insufficiency to be clothed

its and graces derived from the fulness into perfection.

So prone is human nature to yield to influence of things seen or felt, and to the promptings of its natural propensities, that we may readily acknowledge the concurring hand of Divine Providence in the events occurring in the world, we too shut our eyes to his equal cognizance and guidance in the vicissitudes and trials of every day life, and thus lose the support strength to enable us to bear with cheerfulness the adverse circumstances which in ourness we murmur at as afflictions.

An account given of the life of the patriarch Jacob, is perhaps as instructive by the detail of his errors and mistakes, as by the display of his patient endurance, and his fruitful dedication. It teaches how acted is the view, even the good man takes of his present situation, how strong disposition to distrust and to repine when failings of his Heavenly Father towards him shrouded in mystery, and the circumstances of life press heavily upon him. He is man highly favored; had received from her the blessing appertaining to primogeniture, which was confirmed by the promise of Almighty. In various stages of his full life, he had often been extricated from distress and peril by the interposition of his wisdom and power, and had never one of the Lord's promises to fail. Yet, in old age, with all the assurance of power and support his experience should taught him, when distressed by the supposition of the loss of one of his sons, threatened the loss of another, grieved with the death of his other children, and with famine striking his family and flocks, he is found venting his griefs instead of numbering his blessings, and with his eye fixed on calamity, and his imagination picturing impending over the dark future, forgetful deliverances, he despairingly exclaims: "All these things are against me;" his natural shortsightedness and want of how blind was he to the gladdening view, which, in a brief period, was to be revealed. How little did he anticipate that the ominous cloud which he feared would bring rain hairs with sorrow to the grave, ended the full blessing of restoration of a loved and long-lost son, a home amid the ruins, and the crowning of a long life with honor.

He may have been under the consciousness of want of enduring faith, and his many doubts from the narrow path of duty, that part of his reply to Pharaoh's question prompted, where he says, "Few and evil are the days of the years of my life been." How different is the whole tenor of his situation, when, recalling the many remarkable providences in his past pilgrimage, now his happiness close, with a heart aglow with sense of unnumbered blessings received, his spirit rapt by the inspiration of his glorious, all-sufficient Preserver and Deity, he thus pours forth his benediction on two half Egyptian grandsons: "God, be whom my fathers Abraham and Isaac speak; the God which fed me all my life into this day; the Angel which redeemed me from all evil, bless the lads; and let my name be named on them, and the name of my fathers Abraham and Isaac; and let them grow in multitude in the midst of the earth."

Inseparably connected with the history of Jacob is that of his son Joseph, whose checkered life also affords the same exemplification of man's incapacity to unravel the woof and warp of passing events, or discern what lies enfolded in the dim future. Hated by his brethren, because, as the son of his old age, he was loved preeminently by his father, and that he had disclosed to them the dream that foreshadowed his future exaltation above them, they planned his destruction; but hesitating to shed his blood, they sold him into what appeared hopeless slavery. But maintaining his integrity, He who had watched over and worked for his oppressed servant, delivered him from his enemies and raised him from the servitude of the prison-house to stand next to the throne, and brought all Egypt under his government. Forced by famine, his brethren went down there to buy corn, and did obedience to him they had hated as a dreamer, now their unknown superior. Under the controlling providence of the Almighty, he became the instrument to save his father and all his house from perishing from want, and to establish them in the midst of a strange people.

When tottering on the brink of the grave, Jacob called his sons together that he might speak to them in the spirit of prophecy; how changed was the view he took of the vicissitudes and trials of Joseph's life, from that which once filled him with overwhelming grief. Still the same loving father, whose outward eye had bedewed with tears the torn and blood-stained coat of his darling child, whom he doubted not some evil beast had devoured, and who had rent his clothes and mourned him many days; now, with his mental eye, in the vision of light vouchsafed by Him in whom is no darkness at all, and who sees the end from the beginning, discerns that the past was rich in mercies; sometimes disguised in dark and distressing occurrences, but all overruled to bring about the divine purpose, and to be crowned with blessings to himself and his posterity. "Joseph is a fruitful bough, even a fruitful bough by a well, whose branches run over the wall. The archers have sorely grieved him and shot at him, and hated him. But his bow abode in strength, and the arms of his hands were made strong by the hands of the mighty God of Jacob (thence is the shepherd, the stone of Israel). Even by the God of thy fathers who shall help thee, and by the Almighty who shall bless thee, with blessings of heaven above, blessings of the deep that lieth under, blessings of the breasts and of the womb. The blessings of thy father have prevailed above the blessings of thy progenitors, unto the utmost bounds of the everlasting hills; they shall be on the head of Joseph, and on the crown of the head of him that was separate from his brethren."

Then lot not those who are disheartened and sorrowing over the many sad changes that have been effected in our religious Society, and who feel that in some respects they are separate from their brethren, indulge feelings of distrust of the notice and regard of Him who raised the Society up for his own purpose, and has promised He will never forget it nor suffer it to be destroyed. Remember affliction is often a blessed teacher of our own weakness, and our entire dependence on the care and mercy of the Almighty. There is an adequate support amid the trials and discouragements of the day, in the approval

of the uncorruptable judge within, and in the assured belief that Divine Providence sees all that is taking place, and has not forgotten his own cause, nor those who are striving in faith and patience to maintain it. However the day may seem dark and threatening, and their wearying labors and tearful prayers powerless to keep back the inroads of error, or advance the banner of truth, yet his eternal purposes cannot be always thwarted, and in his own time and way, He will cause light to spring out of obscurity, and darkness to become as the noonday. The Apostle says: "All things work together for good to those who love God." The main thing then is to learn to love Him as we ought.

SUMMARY OF EVENTS.

FOREIGN.—On the 15th inst., President Thiers announced to the Legislative Committee that the customs treaty for Alsace and Lorraine had been signed, and now only awaits ratification. He states that the principle of reciprocity is recognized. The payment of the fourth half milliard of francs is to be completed before the end of next Third month. The evacuation of French territory is to commence within two weeks after the evacuation of the Rhine, and Germany ceases to France a small strip of territory.

According to another Versailles despatch it is stipulated that the balance of indemnity money still due by France shall be paid in specie bills, to the amount of 80,000,000 francs, every two weeks until the entire balance is liquidated, such payments to commence 1st mo. 15th, 1872. The proposed German troops are to remain in France pending the liquidation of the indemnity, but six of the departments will be evacuated immediately.

The returns of the recent election in France are still incomplete. So far as received they show that 94 Bonapartists have been elected to the Chamber General, 194 legitimists, 261 radicals, 491 moderates, and 867 liberal conservatives. It thus appears that the cause of Napoleonism is dead in France for the present.

Advices from Algeria state that the natives in the northern part of the province of Constantine had risen against the French, and were in open hostility.

The expected settlement of the difficulty between the employers and employes at Newcastle has not yet taken place, the masters refusing to re-employ all their old hands, and to make other concessions demanded by the workmen.

The Manchester Chamber of Commerce, at a meeting held to consider the proposed abrogation of the commercial treaty with France, adopted a resolve expressing profound regret that the French government contemplated a measure which would fetter an exchange of commerce between France and other countries.

Liberal subscriptions in aid of the Chicago sufferers have been made throughout Great Britain. The railway, express, and steamer lines announce their readiness to transport every thing furnished for their relief free of charge. The outgoing steamers will carry large contributions, both in money and materials.

Gladstone has announced the determination of the government not to yield to the appeals for the release of the remaining political prisoners on the ground that their offences are not political, and the release of other Fenians imprisoned for political offences formed no precedent for dealing with those for whom pardon is sought.

The losses of the Liverpool insurance companies by the Chicago fire are estimated at £1,000,000.

The health of Queen Victoria is improving.

At Frankfort, and other places in Germany, subscriptions are on foot in aid of Chicago.

It is expected that the Emperor of Austria will soon visit the German Emperor at Berlin.

An important debate has taken place in the Bavarian Legislature on the subject of universal suffrage. The minister of worship and public instruction said, the State had at all times a right to make changes in the laws relating to the church. The church having declared a change of principles, and infallibility being a doctrine dangerous to the State, the government had resolved to prohibit any appeal of all its citizens who cannot accept the infallibility of the pope, in an article of faith. Moreover the minister declared that the sentiments of the king and council of state favored the separation of the religious and political branches of the government, and the complete independence of each.

The political excitement which has prevailed in Madrid since the assembling of the Cortes, is reported to be increasing, and the antagonism between the progressive and conservative parties becoming more violent. The order forbidding soldiers to belong to political associations or participate in any manner in political affairs has been renewed, and will be strictly enforced.

The threatened misunderstanding between Morocco and Spain has been averted by the payment of an indemnity by the former to the families of the Spaniards murdered in Morocco.

Advices from Rio Janeiro state that five articles of the emancipation bill had passed to a second reading in the Chamber of Deputies. The friends of the bill are confident of its final adoption.

An address has been issued by representative working men, demanding the separation of Church and State in England. The address announces that meetings of workmen will be held throughout the country in support of this movement.

A Versailles dispatch of the 16th says, that Poyner Quartier has arrived there from Berlin, bearing copies of the treaties just concluded between France and Germany.

The appointment of Ferry as Minister to the United States has been withdrawn in deference to public opinion.

There are rumors of disturbances in Corsica inspired by Bonapartist partisans.

The German Emperor opened the sessions of the Reichsrath in Berlin, on the 16th inst. He referred his address to the foreign relations of the Empire, which he declared were entirely satisfactory. Especially was the correspondence with Austria of a cordial nature, and the intercourse with that country was no longer shadowed by reminiscences of past conflicts.

The reorganization of the coinage of Germany is considered desirable. The Federal Council is now engaged in devising measures for the establishment of a gold coin basis, and for a uniform system of German coinage. The advances made by the several States of the confederation, must be repaid out of the funds received from France as indemnity.

A great preparatory meeting was held in Madrid on the 15th inst., at which resolutions were adopted declaring undying opposition to every form of government for Spain which was not purely republican; nevertheless in maintaining their principles, they would not violate the laws of the land.

London, 10th mo. 16th. Consols, 92½. U. S. 5-20's of 1867, 91; and 1868, 87.

Liverpool.—Uplands cotton, 9½ a 9½d.; Orleans, 10d. Red water wheat, 11s. 11d. per 100 lbs.; red western spring wheat, 11s.

UNITED STATES.—The previous reports of widespread desolation in northern Wisconsin and Michigan, in consequence of fires sweeping over extensive districts Michigan is almost deserted. The inhabitants were burned out, and obliged to flee for their lives, saving nothing. The loss of life also appears to have been fearfully great. A dispatch from Milwaukee states that a large number perished in the vicinity of Coshico, O. On the north shore of the lake had also many persons perished in the flames. The fire swept over a track of country eight or ten miles wide, burning all the timber and every building in its range.

The great fire in Chicago was attended with much destruction of human life, but not so much of property as was at first supposed. More than one hundred bodies have been discovered in the ruins, but it is supposed these are only a small part of the whole number destroyed. About 10,000 stores and private dwellings were burned, together with merchandise and valuable property to a great but unknown amount. The value of the buildings destroyed is roughly estimated at eighty-four millions of dollars, that of the personal effects, furniture and merchandise of all kinds would, it is supposed, amount to at least as much more. The fire which began in a planing mill had been completely extinguished for a number of hours, when another conflagration broke out in the vicinity of the city. This, it is stated, had its rise from a kerosene lamp which was taken into a small stable. The buildings in the vicinity were generally frame structures, and very dry from the long drought; the flames consequently spread rapidly until the more valuable portions of the city were reached. The destruction of the person as well as property conveyed the news of this terrible disaster, prompt action was taken all over the country to provide adequate relief for the sufferers, and the most pressing wants of the great mass of the needy have already been supplied. The work of rebuilding

commenced at once, giving full employment to laborers and all the building mechanics. In many instances temporary structures are erected in order to enable storekeepers and others to continue their business, and dwelling houses are hired and altered for business purposes. Many thousands of the inhabitants have returned to their homes.

The interments in Philadelphia last week numbered 316, including 54 deaths from small pox. At the election in this city on the 10th inst., 112,178 votes were given for the office of mayor, viz, Stokley 60,629, Bird 51,549; Republican majority, 9,080.

On the 10th inst. a slight earthquake was observed in many towns and villages, as well as in the country near Philadelphia. At Wilmington, Del., the rumbling sound and tremor of the ground caused general alarm.

The vault of the U. S. Custom-house in Chicago contained \$1,000,000 in gold and \$2,000,000 in paper currency; the latter was entirely consumed, and the gold was melted into a solid mass. Some of the fire-proof safes in other buildings preserved their contents almost uninjured, in others nothing remained but ashes and charred paper.

A body of Fenians from the United States recently crossed the Canadian boundary, and captured the custom house and the Hudson Bay post at Penikese. The invaders were quickly followed by U. S. troops, who attacked and dispersed them, taking General O'Neil prisoner. Another party of Fenians crossed the border line near St. Joe, Minnesota, but U. S. troops were promptly sent after them.

The Markets, &c.—The following were the quotations on the 16th inst. New York.—American gold, 113½. U. S. sixes, 1881, 116½; ditto, 5-20's, 1868, 113½; ditto, 10-40, 5 per cents, 100½. Superfine flour, \$6.20 a \$6.70; inferior brands, \$6.75 a \$10.50. No. 2 Chicago spring wheat, \$1.90 a \$1.98; red western, \$1.95 a \$1.98; amber barley, \$1.92 a Michigan, \$1.68 a \$1.70. Western rye, \$1.30 a \$1.35; Canada, \$1.05 a \$1.05. Oats, 49 a 55 cts. Western rye, 92 cts.; State, \$1.06. Yellow corn, 81 cts.; western mixed, 77 cts. Philadelphia.—Cotton, 20½ a 21 cts. for uplands and New Orleans. Superfine flour, \$5.75 a 56; inferior brands, \$6.25 a 89. Red wheat, \$1.58 a \$1.60; white, \$1.69. Yellow corn, 84 a 86 cts. Oats, 48 a 54 cts. Oats, 48 a 54 cts. The market very dull, choice beef cattle sold at 6 a 7 cts.; fair to good, 4½ a 5½ cts., and common 3 a 4 cts. per lb. gross. Sheep were also dull, fair to good selling at 4 a 5½ cts. per lb. gross. Corn fed hogs 6½ a 7½ cts. per lb. gross. Baltimore.—Pennsylvania red wheat, \$2.05 a \$2.10. Yellow corn, 78 a 80 cts. Oats, 35 a 38 cts. State, No. 2 winter red wheat, \$1.47; No. 3 do, \$1.37. Mixed corn, 47 a 48 cts. No. 2 oats, 35 cts. Cincinnati.—Family flour, \$6.75 a 57. Red wheat, \$1.40 a \$1.45. Corn, 54 a 55 cts. Oats, 37 a 40 cts. Lard, 9½ cts.

RECEIPTS.

Received from Joseph Hall, Agent, 10c, for Samuel Fawcett, \$2, to No. 36, vol. 44, and for Benjamin Elyson, \$2, vol. 45; from Benjamin V. Stanley, 10c, for Samuel W. Stanley, \$2, vol. 45; from Esau Eldridge, 10c, for Isaac Hall, \$2, vol. 45; from John H. Dillingham, Pa., \$2, vol. 45; from John Forsythe, Pa., \$2, vol. 45; from J. C. H. Mott, 10c, for Isaac Ver, 10c, for H. Talbot, Thomas E. Bundy, and Thomas D. Langstaff, \$2 each, vol. 45; from Margaret P. Warner, Pa., \$2, vol. 45; from Edw'd Michener, Pa., \$2, vol. 45.

ERRATA.

In the notice of the death of Carpenter Walter, published in "The Friend" of 26th inst. (Vol. 44, the date should have been the 26th of 15th month, 1871. He was a member of West Chester Particular and Birmingham Monthly Meeting.

BIBLE ASSOCIATION OF FRIENDS.

The Annual Meeting of "The Bible Association of Friends in America," will be held at the Committee-room of the Arcadian Meeting-house, Philadelphia, on the 10th inst. of Fourth-day, the 1st of Eleventh month, at 8 o'clock.

The members of the Philadelphia Auxiliary, both men and women, and Friends generally, are invited to attend.

CALDWELL, Secretary.

FRIENDS' FREEDOMEN'S ASSOCIATION.

Our schools in North Carolina and Virginia re-open 11th mo. 1st. We need a few teachers, and are desirous to engage for this service rightly concerned Friends. Terms of salary \$15 to \$20 per month.

For further particulars please apply at this office, 116 North Fourth St., Philadelphia.

SUFFERING IN CHICAGO.

Information has been received from Friends Chicago, that they have organized an association to relieve the suffering arising from the calamity that suddenly came upon that city. They appeal to brethren elsewhere for aid. We trust it will be liberally responded to.

Friends who incline to contribute through the Committee formed in Philadelphia may send their donations, in money, to Samuel B. Shipley, President of Provident Life and Trust Co., who has consented to act as Treasurer. Those who contribute in clothing send it to James Whittall, 410 Race St.

Those who desire to send aid direct to Chicago, may food, or clothing, may send it to Joseph Johnson, the Relief Committee, 1082 1/2 Third Avenue, Chicago.

The Annual Meeting of the "Auxiliary Bible Association of Friends of Philadelphia Quarterly Meeting" will be held at No. 109 North Tenth St., on Fourth-evening, the 29th inst., at 7½ o'clock.

A. M. KIMBER, Cor.

WESTTOWN BOARDING SCHOOL.

The Winter Session of the School will commence Second-day, the 30th of Tenth month.

Pupils who have been regularly entered and who have certificates from Philadelphia may send their tickets to the West Chester and Philadelphia Railroad depot of Thirty-first and Chestnut streets, viz their names to the Ticket-agent there, who will be furnished with a list of the pupils for that purpose, such case the passage, including the charge for the Railroad Station, will be charged at the School, paid for with the other incidentals at the close of the term. Conveyances will be at the STREET RAILROAD STATION on Second and Third-days, and the 30th of Tenth month, to meet the trains that leave Philadelphia at 7:25 and 10 A. M., and 2:30 P. M.

Baggage may be left either at Thirty-first and Chestnut St. on a Third-day morning. If it is left after place, it must be put under the care of Alexander & Sons, who will convey it thence to Thirteenth and Chestnut at a charge of 10 cents per trunk to be paid to them. Those who prefer can have their baggage sent for to any place in the built-up part of the city, or to any other place, at the same price. If it is left after place, it must be put under the care of Alexander & Sons, who will convey it thence to Thirteenth and Chestnut at a charge of 10 cents per trunk. For the same charge will also collect baggage from the other railroad depots if the tickets are left at their office. No. 5 North Tenth St. Baggage put under their care, if not marked, will not require any attention from the owner either at the West Philadelphia depot, or at the Railroad Station, but will be forwarded direct to the City. It may not always go on the same train as the one but it will go on the same day, provided the note H. Alexander & Sons reaches them in time.

DURING THE SESSION, passengers for the School be met at the Street Road Station, on the arrival of the first train from the City, every day except First- and small packages for the month, if left at the Street Road Station, No. 304 Arch St., will be forwarded Sixth-day at 12 o'clock, except on the last two Sixth in the Twelfth month, and the expense charged in bills; but the express charges on all packages sent 304 Arch street must be PRE-PAID. Tenth month 16th, 1871.

FRIENDS' ASYLUM FOR THE INSANE. Near Frankford, (Twenty-third Ward,) Philadelphia. Physician and Superintendent.—JUSTUS H. WEGSTON, M. D.

Applications for the Admission of Patients made to the Superintendent, or to any of the Board Managers.

DIED on the 16th of Seventh month, 1871, a residence in West Chester, Pa., WILLIAM Y. GRIF aged 73 years 5 months. He was born in Richmond, Kansas, 9th mo. 22d, WILLIAM B. PATTON, in the 23d year of his membership amongst Friends, on the 10th of 1st mo. 1828, on the 6th ultimo, in Upper Darby, S. Boss, in the 84th year of her age, a member of Philadelphia Monthly Meeting.

WILLIAM H. PILE, PRINTER, No. 422 Walnut Street.

Price, when paid quarterly in advance, five cents.

Concerning Faith, Justification, and Works.

What is faith?
Faith is the substance of things hoped for and the evidence of things not seen. Heb.

Is faith of absolute necessity?

Without faith it is impossible to please for so that cometh to God, must believe He is, and that He is a rewarder of them diligently seek him. Heb. xi. 6.

Are we justified by faith?

Wherefore the law was our school-master bringing us unto Christ, that we might be justified by faith. Gal. iii. 24.

What is the nature of this faith that leadeth to justification?

For in Jesus Christ, neither circumcision availeth any thing, nor uncircumcision, but which *worketh by love*. Gal. v. 6.

Are works then necessary to justification as well as faith?

But wilt thou know, O vain man, that without works is dead? was not Abraham's father justified by works, when he offered Isaac his son upon the altar?

How then faith wrought with his works, by works was faith made perfect? and the scripture was fulfilled, which saith, Abraham believed God, and it was imputed unto him for righteousness: and he was called the friend of God. Ye see then how that *by works* man is justified, and *not by faith only*. James i. 22.

If then both be equally required in justification, what are those works which the law excludes so much?

By the deeds of the law, that shall not be justified in his sight. Rom. iii. 20.

But though we be not justified by the law, is not this to exclude boasting that the grace of God may be exalted?

For by grace are ye saved, through faith, that not of yourselves, it is the gift of God, not of works, lest any man should boast, we are his workmanship, created in Christ unto good works. Eph. ii. 8, 9, 10.

Are even the works which are performed race excluded? Are we never said to be justified by them?

Not by works of righteousness which we have done, but according to his mercy we are justified, by the washing of regeneration, and

renewing of the Holy Ghost, which He shed on us abundantly, through Jesus Christ our Saviour; that being justified by his grace, we should be made heirs, according to the hope of eternal life. Tit. iii. 5, 6, 7.

Q. I perceive then, that to be justified by grace, is to be justified or saved by regeneration, which cannot exclude the works wrought by grace and by the Spirit; how doth the apostle add in the next verse, for the maintaining this against those that cavil about the law?

A. This is a faithful saying, and these things I will that thou affirm constantly; that they which have believed in God, might be careful to maintain good works. These things are good and profitable unto men. But avoid foolish questions, and genealogies, and contentions, and strivings about the law, for they are unprofitable and vain. Tit. iii. 8, 9.

Q. Doth the apostle Paul that is so much against justification by the works of the law, speak any where else of being justified by the Spirit?

A. But ye are washed, but ye are sanctified, but ye are justified in the name of the Lord Jesus, and by the Spirit of our God. 1 Cor. vi. 11.

Q. But since the law gives not power or ability to obey, and so falls short of justification, is there no power under the gospel, by which the righteousness of the law comes to be fulfilled inwardly?

A. For what the law could not do, in that it was weak through the flesh, God sending his own Son in the likeness of sinful flesh, and for sin, condemned sin in the flesh; that the righteousness of the law might be fulfilled in us, who walk *not after the flesh*, but after the Spirit. Rom. viii. 3, 4.

Q. Seeing then there is power in the Spirit, are not works through it, a condition upon which life is proposed under the new covenant?

A. For if ye live after the flesh, ye shall die; but if ye, *through the Spirit*, do mortify the deeds of the body, ye shall live. Rom. viii. 13.

Q. Do not the apostles then frequently propose life to people, upon condition of repentance and other works?

A. Repent ye therefore, and be converted, that your sins may be blotted out. Acts iii. 19.

And if children, then heirs; heirs of God, and joint heirs with Christ; if so be that we suffer with him, that we may also be glorified together. Rom. viii. 17.

It is a faithful saying: for if we be dead with him, we shall also live with him; if we suffer, we shall also reign with him. If a man therefore purge himself from these, he shall be a vessel unto honor, sanctified and meet for the master's use, and prepared unto every good work. 2 Tim. ii. 11, 12, 21.

Remember therefore from whence thou art fallen, and *repent*, and do the *first works*, or else I will come unto thee quickly, and remove

thy candlestick out of his place, except thou repent. Rev. ii. 5.

Q. It appears clearly by these passages, that the apostle excludes only our righteousness, which he elsewhere explains, as being the righteousness of the law, from being necessary to justification, and not such works as the law of the Spirit of Life leads to, and are not so much ours as Christ in us. Are not such good works rewarded, though they require no absolute merit, as being the fruits of free grace; yet doth not God judge according to them, and may they not be said to have a reward?

A. For the Son of Man shall come in the glory of his Father, with his angels, and then he shall reward every man according to his works. Mat. xvi. 27.

Then Peter opened his mouth and said, O Lord, I perceive that God is no respecter of persons; but in every nation, he that feareth him, and *worketh righteousness*, is accepted with him. Acts x. 24, 35.

The righteousness of God; who will render to every man according to his deeds: to them, who by patient continuance in well doing, seek for glory and honor, and immortality, eternal life: but glory, honor and peace to every man that *worketh good*, to the Jew first, and also to the Gentile. Rom. ii. 5, 6, 7, 10.

For we must all appear before the judgment seat of Christ, that every one may receive the things done in his body, according to that he hath done, whether it be good or bad. 2 Cor. v. 10.

Which is a manifest token of the righteous judgment of God, that ye may be counted worthy of the kingdom of God, for which ye also suffer. 2 Thes. i. 5.

But whose looketh into the perfect law of liberty, and continueth therein, he being not a forgetful hearer, but a *doer of the work*, this man shall be blessed in his deed. James i. 25.

Cast not away therefore your confidence, which hath great recompense of reward. Heb. x. 35.

And if ye call on the Father, who, without respect of persons, judgeth according to every man's work, pass the time of your sojourning here in fear. 1 Pet. i. 17.

And behold I come quickly, and my reward is with me, to give every man according as his work shall be. Blessed are they that do his commandments, that they may have right to the tree of life, and may enter in through the gates into the city. Rev. xxii. 12, 14.

Q. It should seem that the purpose of God, in sending his Son, the Lord Jesus Christ, was not simply to save men by an imputative righteousness altogether without them; but also by the washing of regeneration, or an inward righteousness: What saith the scripture further of this?

A. And thou shalt call his name Jesus, for he shall save his people from their sins. Mat. i. 21.

Looking for that blessed hope, and the glorious appearing of the great God, and our Saviour Jesus Christ, who gave himself for us, that he might redeem us from all iniquity, and purify unto himself a peculiar people, zealous of good works. Tit. ii. 13, 14.

For "The Friend."

Wyandotte Cave and its Life.

The following interesting description of this cave, which is situated in southern Indiana, is taken from a communication furnished to the Indianapolis *Daily Journal*, by my friend Edward D. Cope.

"A visit to the Wyandotte Cave, on our return from the Mammoth, enables me to make some comparison between the two, and to furnish some information respecting a new portion of the subterranean life of the limestone region of the West. For the opportunity of so doing I am indebted to the Geological Survey of Indiana and Professor Cox, for whom I am preparing a final report. The present notes are by his permission furnished in advance.

"The Wyandotte Cave is as well worthy of popular favor as the Mammoth. It lacks the large bodies of water which diversify the scene in the latter, but is fully equal to it in the beauty of its stalactites, and other ornaments of calcite gypsum. The stalactites and stalagmites are more numerous than in the Mammoth, and the former frequently have a worm or maecroni-like form, which is very peculiar. They twist and wind in masses like the head of Medusa, and often extend in slender runners to a remarkable length. The gypsum rosettes occur in the remote regions of the cave, and are very beautiful. There are also masses of amorphous gypsum of much purity. The floor in many places is covered with curved branches, and what is more beautiful, of perfectly transparent acicular crystals, sometimes mingled with imperfect turio-crystals. The loose crystals in one place are in such quantity as to give the name of 'Snow Banks' to it. In other places it takes the form of jappaning on the roof and wall rock.

"In one respect the cave is superior to the Mammoth—in its huge rooms, with step-like domes, and often huge stalagmites on central hills. In these localities the rock has been originally more fractured or fragile than elsewhere, and has given away at times of disturbance, piling masses on the floor. The destruction having reached the thin-bedded strata above, the breaking down has proceeded with greater rapidity, each bed breaking away over a narrower area than that below it. When the heavily-bedded rock has been reached, the breakage has ceased, and the stratum remains as a heavy coping stone to the hollow dome. Of course the process piles a hill beneath, and the access of water being rendered more easy by the approach to the surface, great stalactites and stalagmites are the result. In one of these this product forms a mass extending from floor to ceiling a distance of thirty or forty feet, with a diameter of twenty-five feet, and a beautifully fluted circumference. The walls of the room are encrusted with catarrac-like masses, and stalagmites are numerous. The largest room is stated to be 250 feet high and 350 feet long, and to contain a hill of 150 feet in height. On the summit are three large stalagmites, one of them pure white. When this scene is lit up, it is peculiarly awful to the view of the

observer at the foot of the long hill, while it is not less beautiful to those on the summit. There is no room in the Mammoth Cave equal to these two.

"An examination into the life of the cave shows it to have much resemblance to that of the Mammoth. The following is a list of the species obtained, which when compared with that published in the *Journal* for August 28th, will be found to embrace many of the same.

VERTEBRATA.

Amblyopsis species, (blind fish.)

ARTICULATA.

Insects.

Anophthalmus telkampff, (beetle.)

Anophthalmus No. 2, (beetle.)

Staphylinidae, species 1, (beetle.)

Staphylinidae, species 2, (beetle.)

Phalangopsis, species, (crickets.)

Flies, 2 species.

Spiders.

Arauca-like. Opilia-like.

Centipede.

Pseudotremia species.

Crustacea.

Astacus pellicudis, (blind crawfish.)

? Aquatic species with egg pouches external.

Lernaeidae species, parasitic on blind-fish.

Fourteen species.

"The blind-fish is very much like that of the Mammoth Cave, and direct comparison will be necessary to determine any difference, if it exist. It must have considerable subterranean distribution, as it has undoubtedly been drawn up from four wells in the neighborhood of the cave. Indeed, it was from one of these, which derives its water from the cave, that we procured our specimens, and I am much indebted to my friend N. Bart. Walker, of Boston, for his aid in enabling me to obtain them. We descended a well to the water, some twenty feet below the surface, and found it to communicate by a side opening, with a long, low channel, through which flowed a lively stream of very cool water. Wading up the current in a stooping posture, we soon reached a shallow expansion or pool. Here a blind crawfish was detected crawling round the margin, and promptly consigned to the alcohol bottle. A little further beyond, deeper water was reached, and an erect position became possible. We drew the seine in a narrow channel, and after an exploration under the bordering rocks secured two fishes. A second hand scened another. Another was seen, but we failed to catch it, and on emerging from the cave I had a fifth securely in my hand as I thought, but found my fingers too numb to prevent its freeing itself by its active struggles.

"If these *Amblyopses* be not alarmed, they come to the surface to feed, and swim in full sight like white aquatic ghosts. They are rarely easily taken by the hand or net, if perfect silence is preserved, for they are unconscious of the presence of an enemy except through the medium of hearing. This sense is, however, evidently very acute, for at any noise they turn suddenly downward and hide beneath stones, &c., on the bottom. They must take much of their food near the surface, as the life of the depths is apparently very sparse. This habit is rendered easy by the structure of the fish, for the mouth is directed upwards, and the head is very flat above, thus allowing the mouth to be at the surface. This structure also probably explains the fact of

its being the sole representative of the fish in subterranean waters. No doubt many other forms were carried into the cavern, since the waters first found their way there but most of them were like those of our present rivers, deep water or bottom feeder. Such fishes would starve in a cave river, where much of the food is carried to them on the surface of the stream. The *amblyopses* belong with two other genera of imperfect seers the family *hypsacidae*, which, with the pit shore minnow and mud-fish families, form a order of *Haplomi*. The shore minnows (*prinodontidae*) are their nearest allies, a many of them have the upturned mouth a flat head of the blind fish. One of the (*anableps*) has the special peculiarity of seeing both in the water and above it, the eye being enlarged, and a dermal band across the cornea, divides it into an upper and lower portion. This band is the water line for the fish swims at the surface. Fishes thin, or a similar family, enclosed in subterranean waters ages ago would be more likely to live than those of the other, and the darkness would be very apt to be the cause of atrophy of the organs of sight seen in *Amblyopsis*.

"Of the other animals, one beetle (*Anophthalmus*), the cricket (*Phalangopsis*), a fly, *Opilio*-like spider, the centipede, and the blind crawfish, are probably the same as the found in the Mammoth Cave. Two beet and two crustaceans are certainly different from those of the latter, and the centipede are much more numerous. The *Gammar* Crustacean, which we found in the waters of the Mammoth Cave, and which is, no doubt in part, the food of the blind fish, we did find, but some such species no doubt exist as we found an abundance of a lively little *Tetradecapod* Crustacean near the mouth of the cave close by. This little creature no doubt inhabits adjacent waters both external to subterranean, but the situation in which found it is peculiar. It was only seen in water and near an empty log trough used to collect water from a spring dripping from the roof of the chambers.

"The *Lernaeida* is a still more remarkable creature. It is a parasite on the blind fish, precisely as numerous species near of attach themselves to various species of marine fishes in the salt sea. The Wyandotte spe is not so very unlike some of these. It is tached by a pair of altered fore-limbs which are plunged into the skin of the host and held securely in that position, by the barbed or curved claws. The position selected by blind fish *Lernaeida*, was the inner edge of upper lip, where she hung in a position operative of attempts at mastication on part of the fish and reminding one of the ture of the man on the ass' back holding fork of fodder before the animal's nose, in illustration of the motto that 'persuasion is better force.' The little creature had an ocnopel suspended on each side, and was doubt often brought in contact with the by her host.

"The mutual relations of this cave-life is an interesting subject. In the first place, of the beetles, the crickets, the centipede, *Gammaroid* crustacean, (food of the blind fish) are more or less herbivorous. They fish food for the spiders, craw-fish, *anophthalmus*, and the fish. The vegetable food sucking them is in the first place fungi, which

ous small forms, grow in damp places in caves. They can always be found attached to water dropped by the bats, rats and other animals which extend their range to the air. Fungi also grow on the dead bodies of animals which die in the caves, and are found abundantly on fragments of wood and sticks brought in by human agency. They also have brought into fissures and cavi-communicating with the cave, seeds, nuts, other vegetable matters, from time immemorial, which have furnished food for insects.

Thus rats and bats have no doubt had to do with the continuance of land life in the cave, and the mammals of the post-natal or earlier period, which first wand and dwell in its shades were the intro-ducers of a permanent land life.

As to the Gammaroid crustacean, little is necessary to support its small economy, even that little might be thought to be given, as we observe the clearness and limpidity of the water in which it dwells. Nevertheless the fact that that water communicates with an outside river, is a sufficient indication of the presence of vegetable life and vegetation in variable quantities at different times. Like fresh water algae (sea weeds) no doubt occur there, the spores being brought by external communication, while remains of other forms, as coniferæ, &c., would occur long after floods. On this basis rests animal life which is limited in extent and to be subject to many vicissitudes. Yet a further examination will probably add to the number of species, and of these no doubt, a greater or less number of parasites on those already known."

For "The Friend."

Memories of Mildred Rateliff.

(Continued from page 70.)

Letter from Rebecca Preston to Mildred Rateliff:

"Campbell Co., Va., 9th mo. 10th, 1813.

Beloved Friend,—I received thine dated 6th mo. last, and was pleased to hear from one with whom I can so nearly sympathize. In the past, when we were favored with each other's company, it was our lot to be closely united, and often to suffer for the cause of Truth. I do not, dear friend, that thou art closely united. Remember it ever was the lot of the true living to be baptized for the dead. I tell thee with sorrow, that Truth appears at a low ebb amongst the few Friends now constitute this Quarterly Meeting. It is, indeed, cause of deep mourning.

Dear beloved friend, thou sayest in thy letter it is hard for thee to write; I may say so for me. Surely it is not for want of precious love and freedom which ever been between us! O, how often do I think of thee in my retired moments! Not one to perse with, or to complain to, in all my trials and deep conflicts. But I wish not to complain; but desire in humility, to trust in that holy Arm of Omnipotent Power, which has been my support through all. It is necessary there is of abiding in the presence; that when close trials await we may all firm and unshaken. I do not know how I should write thus to one whom I esteem so well qualified as thou art for the work which thou wast chosen, and whereunto thou art called. This work is very humbling to the creature, and I feel that thou art deeply tried under it. Dear child, be not discour-

aged! He that first raised thee up an instrument for His cause, will, if thou still remain faithful, be with thee, put thee forth, and go before thee. * * * * *

REBECCA PRESTON."

We doubt not that there are some readers of these memoirs to whom a part of the language of the above letter, as well as that of those which follow, will be recognised in the line of their own painful religious experience. Those who have in any measure put on Christ, know a fellowship in His sufferings, which only such as so participate of Him, the living Vine, can experience. These must, whether known or unknown, be one another's helpers in the Lord; and be in degree of one heart and of one mind, speaking the same language. O! that this tribulated, sorrowful number, such as are baptized into Christ, may be increased, and abound more and more. Though the feeling and the utterance of such may at times be with the Apostle, "As it is written, For Thy sake we are killed all the day long; we are accounted as sheep for the slaughter;" yet as these abide companions in tribulation in the kingdom and patience of Jesus, the promise, though it seem to tarry long, will be refreshingly verified, "The Lord whom ye seek shall suddenly come to his temple," &c. And also, "The young lions do lack and suffer hunger; but they that seek the Lord shall not want any good thing."

* Sarah Proctor to Mildred Rateliff:

"Baltimore, 4th mo. 7th, 1814.

"My Beloved Friend,—This afternoon I happened to step into a Friend's house, and saw the bearer; and being informed that he was from the western country, the interest I feel for many there, induced me to inquire after them. At the name of Hillsboro', thou, my dear friend, wast immediately brought into affectionate and grateful remembrance. The evidence, on thinking of thee, was renewed on my mind, that the precious cementing bond of fellowship is not dissolved or broken either by the distance that separates us, or the time in which there has been no outward communication. It is indeed a great favor that there is a union of spirit not subject to such casualties, in which the children of the Heavenly Father's family, are, at seasons, as epistles written in one another's hearts; not with pen and ink, but in characters that breathe and travail for each other's preservation and progress in the way cast up by Him, who through tribulation and suffering even unto death, led captivity captive, and received gifts for the children of men. Is this not animating to persevere in patience when trials and difficulties assail us on every hand? But why am I thus expressing myself to one who has attained the standing of a mother in Israel, and knows the certainty of these things? I am feebly endeavoring to understand? Indeed, my dear friend, my dwelling has long been in a dry and barren land—or rather such is the soil of my heart. My steps seem for some time to have been of the retrograde kind, and I in great danger of falling by my spiritual enemy. Remember me when it is well with thee, and please sometime to write me. It is now several months since I wrote to thee and a number of other Friends in Ohio, but have not as yet received

* Afterward Sarah Wilson, a minister belonging to the Southern District Meeting, Philadelphia.

a line from any one in answer. This is a disappointment. I gave thee an extract from dear Susanna Horne's letter, written after her arrival in England, which I did not doubt would interest thee. I have not heard anything from her lately.

"Thy affectionate friend,

S. PROCTOR."

From the date of the last letter, 1814, to that of the next one, 1818, no memoranda of Mildred Rateliff's have come to hand. She was in Philadelphia on a religious visit in 1817, but no account of her labors on this occasion seems to have been preserved.

Letter from Hannah Shinn to Mildred Rateliff:

"Philada., 5th mo. 31st, 1818.

"My Dear Friend,—I have often called to mind the few pleasant hours that I spent in thy company when thou wast in Philadelphia, with desire to have a further acquaintance with thee. A solicitude for thy welfare hath often found place in my heart, and a secret petition has been raised to the Father of mercies, that He would continue to be mindful of thee, and cause the angel of his presence to be round about thee, to guard, guide, and protect thee through all the vicissitudes of thy life. Mayst thou and I be able to say in substance with the apostle, that neither persecution, nor tribulation, neither heights nor depths, things present or to come, shall ever be able to separate us from the love of God in Christ Jesus. The blessed Saviour exhorted his followers to be of good cheer; as He had overcome the world, even so should His meek and lowly followers be made to overcome it.

"I think, my dear, I have at times been led to consider the situation of those of whom we have an account, who wandered about in sheep-skins and goat-skins, and lodged in dens and in caves of the earth, of whom the world was not worthy, and have viewed their situation as a desirable one. They were redeemed from the earth, and consequently freed from those abundant cares, which have a tendency to draw the mind into the spirit of the world, and divert it from a labor after that union and communion which the sanctified soul can have with the Holy Spirit.

"But what am I saying? Shall my ungrateful heart complain, when blessed with the necessary comforts of this life! Do I, by turning my attention to the gifts, neglect to honor the Giver with reverent gratitude, adoration, and praise, and by this neglect alienate my soul from the Divine harmony? Let me rather leave the things which are behind, and with more vigilance press forward towards the mark for the prize of the high calling of God in Christ Jesus, our blessed Lord. His grace is sufficient to ensure us the victory over all our soul's enemies, and finally to give us a place among those who having the harps of God, do sing the song of Moses the servant of God, and the song of the Lamb, saying, 'Great and marvellous are thy works Lord God Almighty; just and true are all thy ways, thou king of saints! Who shall not fear thee and glorify thy name, for thou only art holy; for all nations shall come and worship before thee, for thy judgments are made manifest.'

"To be of this blessed number, to have our names written in the Lamb's book of life, to be acknowledged by Him before the Father and his holy angels, is more to be desired than all else. That thou and I may attain

this is the solicitude of thy truly affectionate friend,
HANNAH SHINN.

"P. S. Our friends generally well at present. Sarah Wilson has just returned from a visit to her friends in Baltimore."

Letter from Sarah Wilson, late Proctor, to Mildred Ratcliff:

"Philadelphia, 6th mo. 8th, 1818.

"My Dear Friend,—I wish to convey an acknowledgment of the receipt of thy very acceptable letter. I assure thee I looked so long for it before I received it, that I could only suppose thou hadst been hastily called upon to go to a remote distance by the Master. It seemed to need some thoughts of this sort to reconcile me to waiting so long without knowing how thy husband and self got along on your journey homeward.

"I doubt not, my beloved friend, but thou canst claim the late dispensation among many that have preceded it, which have wrought together for thy good, furtherance, and refinement in the work of redemption, and hast witnessed a capacity to give thanks under it.

"From thy other correspondents I suppose thou wilt receive general information respecting Friends here, but may tell thee that when I was in Baltimore dear Mary Miffin seemed quite comfortable, and is preciously green and lively in spirit. May it not be emphatically said of her, though we have many instructors in Christ, yet have we not many mothers like her. Stephen Grellet has been liberated for an extensive prospect of visiting some parts of Russia, Norway, Sweden, &c. Mary Naftel, whose acceptable services in this land are nearly closing, returns home in the same ship with Stephen. The vessel is to sail from New York on the 16th of this month. Benjamin White sailed from this port about ten days ago for England and Ireland.

"9th. Whilst writing the foregoing last evening, several Friends came, which will render the conclusion of this brief. Amongst the visitors were Hannah Evans, who has been very ill since Yearly Meeting, and Mary Morton, both of whom I expect thou wilt remember with affection. Isaac W. Morris and family are in usual health, and, as far as I know, thy friends generally. Mary England, the ancient friend we went to see up stairs, has deceased; and Rebecca Jones soon after her. They were valiant for the Truth on earth, and we doubt not are now crowned with everlasting rest. Oh! that some who are at times desiring to follow in the footsteps of the flock, may never utterly fall by the hand of the enemy. Fears, the pit, and a multitude of snares often beset me. Remember me when it is well with thee, and desire that I may witness preservation.

I conclude in sisterly affection, thy friend,
SARAH WILSON."

(To be continued.)

The Cultivation of Rice.—A Southern correspondent of the Syracuse Courier writes of the rice lands: There is a belt of land stretching from Virginia down the coast to the Gulf of Mexico, and most of the distance it lies low, very little above the level of the ocean, some of which is covered by water at every high tide. The greater portion of this land may properly be called swamp land—not altogether given up to the domain of the water, but always damp and too wet for any grain except rice. It is not every swamp or wet piece

of land that is fit for the cultivation of rice. The alluvial swamp lying along the banks of the rivers having a deep soil, composed of decayed vegetables, is best fitted for the purpose, but it must be so located that it can be overflowed at high tide, or it is useless for the purpose. The lands must also be protected from the salt water and from the rapid currents occasioned by freshets. South Carolina is the greatest rice State, more being cultivated there than in all the United States besides. The rivers flowing down from table land of the interior reach this low land and forcing themselves to the sea, spread out and have generally a deep broad channel.

There is a volume of water sufficient, so that the tide will cause it to set back for many miles. Along many of these ravines the land is as level as the sea, and it can be flooded at pleasure. Gates are constructed through artificial embankments along the banks of the river, and when the tide is high the water is let in, and the land flooded and the gates closed. When it becomes necessary to draw the water off, the gates are opened at low tide. Some of these fields are very large and interesting when being prepared for a crop, and are very beautiful when the rice comes through the water, and throws its needle-like spars. These fields must have a secure embankment along the river, and must be thoroughly drained by artificial channels, so as to take the water entirely away when necessary. In large fields some of the channels have capacity enough to float a flat-bottomed boat, which is used to convey the harvest to the place of storage.

The land is plowed in winter, and in the first warm days in spring is flooded. The preparation of the soil commences in March. The ground is made as mellow as a garden. The seed is sown in trenches about fifteen inches apart. It requires about three bushels of seed to an acre. The seed is lightly covered with soil, and the water let in and remains about a week, by which time the grain sprouts, when the water is drawn off, but when the grain is a few inches above the ground it is flooded for four or five days and then drawn off, and the grain is then allowed to grow for four or five weeks, when it is cultivated and the ground thoroughly stirred, and then the water is let on, and it is flooded for a few days, and then gradually drawn down and again cultivated, and after the second cultivation the water again let on to remain until the crop matures, which takes about two months, when the water is drawn off and it is harvested, very much as we harvest buckwheat.

The crop in a favorable season is a profitable one. The grain is threshed and cleaned in mills. It is frequently sent to market before the hulls are removed. There are extensive mills at Liverpool and New York for hulling rice, and that enables the dealer to put it on the market fresh and white. There are mills at Savannah and Charleston, where the rice is hulled for the local market. The best hulling machines cost from \$15,000 to \$18,000, and have very intricate machinery. The rice, before hulled, is called poddy. The machine takes off the hulls and sorts the grain. After the hulls are removed, it is moved out on inclined screens, which are fine at first, and all the small and broken rice passes through, and then a little coarser, and the rice called "middling rice" drops through, and

last the "prince rice." The latter quality passed through another screen, which called polishing, and in that process is swayed clean and bright.

Rice is cultivated in all the warm countries of the world, and is used for food by more people than any other cereal except wheat. It is cultivated very extensively in the East Indies, and along the coast where the land is marshy it is the only crop raised. It is a staple crop in Africa, south of Europe, North and South America. Ceylon produces a large quantity in excess of consumption. There are several varieties, some of which grow on dry land, but the Carolina, or water rice, as it is called, is as fine as any in the world. It grows very rapidly, and is six or six feet high. When it is sufficiently high cover and hide the water, it presents a beautiful sight.

Mutual Subjection.

For "The Friend."

Occasions are unhappily too frequent in observing the mode in which the means will gradually escape from the soundest for words, when the form is relied upon rather than the spirit. One of the sound forms which is thus at present practically much overlooked, I apprehend, is the injunction, "ready always to give an answer to every man that asketh you a reason of the hope that is in you." (1 Pet. iii. 15.) The same fate seems to have befallen what may be called the counterpart doctrine intimated in the memorable testimony of the sorely smitten and triumphantly submissive Job, "The cause which I knew not I searched out." Both lessons must be admitted, are alike requisite both individual growth in the truth, and maintenance of true dignity or of intelligence and enduring usefulness in the conduct of life, but the literal precept of the apostle naturally demands the reinforcement of words more urgently than the eloquent example of patriarch. It is my main object in this communication, to supply such reinforcement briefly as may be.

"Be ready to give an answer to every man that asketh you a reason of the hope that is in you." I think we cannot carefully and prayerfully examine this command, without seeing that it enjoins a readiness not only to acknowledge the general obligation of duty in all that we do, and a sense of that obligation in every part of our lives, but also render a reason for every piece of conduct why we esteem it to be a duty, adapted to particular comprehension of any sincerequirer. In proof of our hearty acceptance of this standard of social propriety, we will course have freely to take shame to ourselves when unable to produce such a reason; by virtue of the strength which is "made perfect" in our weakness, we may so none less promote the spread of the love which "without dissimulation," and the "free coin of the unsearchable Word which is still creasingly to "be glorified."

Are we not now, as a religious body, passing through an era of confusion which only have overtaken us from the neglected such simple "first principles" as this; may we not accordingly now with eminent fitness seek to profit in this very matter the example of him of whom it is written "and the Lord turned the captivity of Sion when he prayed for his friends?"

The Telegraph and the Storm.

For "The Friend."

(Continued from page 67.)

While the observers now in the field are acting themselves in their work, the chief officer is training other sergeants at the post of instruction (Fort Whipple, Virginia), will go forth hereafter as valued auxiliaries. It has been fully demonstrated by signal officer that the army of the United States is the best medium through which to act most efficiently and economically in operations of the Storm Signal Service. Through the army organization the vast system of telegraphy for meteorological purposes can be made now being, most successfully handled, wherever else General Myer has not done, "the New York World," he has demonstrated that there can be, and now is, a network of telegraphic communication extending over the whole country, working in order, by the signal-men, and capable of furnishing almost instantaneous messages from every point to the central office at Washington. Think of a single jump by wire from San Francisco 2700 miles eastward three days! When General Myer undertook to put this system in working order, the telegraph companies said it was impossible—such a thing had ever been heard of in telegraphing. It is now a grand *fait accompli*, as in the passing of the Suez Canal by the British, or the escaping from Paris by the French.

Let us present the signal officer aims only to give a synopsis of each day's weather, and a hint of what weather may be expected will probably occur. The 'probabilities' so far have been most beautifully verified and unerringly correct.

It is not thought wise to undertake more than can be securely accomplished. The synopses and 'probabilities' are all that intelligent shippers and careful seamen require. Officers will not send their vessels to sea if the weather synopsis indicates threatening or alarming weather.

Travelers can consult the 'probabilities' before leaving home; and any severe storm threatens any city or port is now specially telegraphed thither, and the announcement made by bulletins posted in the most public places.

By the modest estimate of the signal office, the following is a table showing percentage of 'probabilities' that have been verified.

Fully verified,	50 p. c.
Verified in part,	25 "
Failed,	25 "

It must, however, be borne in mind that failures have often been due to lack of information from points where as yet no observer is stationed.

The Signal Service has, up to this time, not upon the wise maxim of 'making haste slow,' and undertaking to do nothing which was not in its power to do safely and securely without risk of failure. It has acted upon confidence it has in the people that they patiently await the development of solid facts, meantime leaving no stone unturned to hasten forward the observations which will lead to a more exact acquaintance with the habits, movements, and tracks of our American storms. Great progress has in a short time been made in this knowledge, and every day new light is dawning upon the face of storms.

"The instruments of the service have been bought on trial. They are undergoing the most varied experiments. In a short time, it is hoped, they will be greatly improved and perfected, and then the chief signal officer's result, will be more satisfactory to himself, and his labors will be greatly facilitated. The celerity with which important results have already been attained by this officer has surprised and startled both himself and the friends of the great movement.

"As soon as possible, therefore, the Signal Office will have its signal posts along the lakes and on our Atlantic sea-board, where cautionary signals will be displayed, warning vessels of approaching gales and storms, and also a signal for clear weather. These will be displayed by day and by night, by a very simple and suitable contrivance now being perfected by General Myer. In New York already arrangements have been made for displaying the signals to shipping in the harbor from a lofty structure on the roof of the Equitable Life Insurance Company's Office, the best station that could be chosen. The display of these storm signals proper will place the American Signal Bureau at once in a position to render inestimable service to shipping and all commercial interests.

"These signals will at first be neglected by ruder and more unskillful seamen and shippers; but, as in the case of the famous Fitzroy signals on the English coast, every week will add new demonstrations of the value and utility of this system—one of the most splendid gifts bequeathed by modern science to the human race.

"The signalling of storms and desolating cyclones to the unsuspecting seaman will, it is believed, mark a new era in our lake and coast navigation, and be the means of annually saving many lives and millions of dollars' worth of our floating property.

"The comparison of these signals with the weather following the signals will be then a matter of special attention. Every discrepancy can then be carefully noted and probed, and every day the meteorologists in charge of the 'probabilities' will find the means of rectifying any errors they may have fallen into, and daily increasing the accuracy and perfecting the plan of their forecasts.

"The storm signals will be displayed at any hour of the day or night when the instrumental indications give notice of bad weather; and experience has already shown that generally at least twenty-four hours' forewarning can be given from the central office in Washington of all important weather phenomena. With the telegraph to premonish, forecasts for two or three days in advance are hazardous and unnecessary. For almost all practical purposes of life a day's notice of atmospheric disturbances is quite sufficient, and more reliable than longer premonitions. It will be a grand triumph for American science when the electric telegraph—an American invention—is so utilized that it will bring all citizens of the United States into electric communication with each other, and the most fearful storm, as well as the sunshine and shower, shall be every day a subject of forewarning or gratulation throughout the land, and even on the lakes and oceans that wash the American coasts.

Bad tree produces no fruit.

Sandwich, 8th mo. 20th, 1836.

To Dover Quarterly Meeting of Friends to be held next at Berwick:

Dear Friends,—From the present feeble state of my health, and the nature of my disease, it is not likely that I shall see many of you any more in mutability, and I feel to salute you in a measure of that love that breathes "Peace on earth and goodwill to men," feeling deeply interested in the welfare of the human family, but more especially the household of faith, that we may be coming up in the footsteps of the flock of the companions of Christ, filling our respective ranks in righteousness; that all our religious meetings may be kept up in the dignity and authority of the Truth: that there may be an increasing care to attend as near the time appointed as may be, and by no means to stand about the house when it is time to be in meeting; nor unnecessarily to go or stay out of meetings for business; that none of us may content ourselves with meeting once in the week, but that there may be an increasing care to attend all our midweek meetings. For those who are in the habit of neglecting these, may do well to consider whether they love the Lord their God with all their heart, or whether the love of the world has in any measure blinded their minds. For in the language of the apostle, "If our gospel be hid it is hid to them that are lost, in whom the God of this world hath blinded the minds of them that believe not; lest the light of the glorious Gospel of Christ, who is the image of God, should shine unto them. For we preach not ourselves but Christ Jesus the Lord, and ourselves your servants for Jesus' sake. For God who commanded the light to shine out of darkness, hath shined in our hearts to give the light of the knowledge of the glory of God in the face of Jesus Christ, in whom is life, and the life is the light of men. He is the true light that lighteth every man that cometh into the world." As much depends on the foremost ranks in society as respects themselves, society and the great family at large, I have desired that we may experience the earthly mind properly subdued and replenished, and all our creaturely propensities brought into subjection to the law of Christ, that the ministry may be preserved clean and blameless. And as much depends on living elders rightly qualified to handle the golden snuffers—rightly dividing between the light and what dims the light, removing the latter so that the light may shine the brighter.

And I am firm in the belief that there is a wisdom, policy, government, religious worship and ministry, which together with their support, maintenance and defence, are all of God; proceeding from, gathering to, settling and centring the mind actuated thereby in God as their proper centre and source. And there is a likeness of all this, as near as human wisdom can devise, which, together with their support, maintenance and defence, are all of the world; proceeding from, gathering to, centring and settling the mind actuated thereby in the world, as their proper centre and source. As no fountain can rise above the fountain head, so neither can the wisdom of this world, unless influenced and governed by a higher principle, usefully officiate in things of a higher nature. And as there is a portion in man designed for heaven and heavenly enjoyments, hence the necessity of one coming from heaven to lead to heaven. That Jesus

Christ has come for that purpose, who is perfectly equal to the business, is evident; for he whose kingdom it is, invites all the ends of the earth to look to him and be saved, "Come unto me all ye that labor and are heavy laden and I will give you rest." "Take my yoke upon you, and learn of me, and ye shall find rest to your souls." This is the rest that remains to the people of God. He comes to us right where we are. What is to be known of God is manifest in man, for he hath showed it unto them. And the kingdom of heaven cometh not with observation, it is within you. It consisteth not in meats and drinks and divers washings and carnal ordinances, imposed on men until the time of the reformation, but in righteousness, peace and joy in the Holy Ghost. And know ye not that Jesus Christ is within you, the hope of glory, except ye are reprobates. The word is nigh thee, in thy heart and in thy mouth; that is the word of faith which we preach. And ye have received an unction from the Holy One, and need not that any man teach you, save as the anointing teacheth you.

It is matter of great consolation that our everlasting happiness is not left on so slender a foundation as to depend on the faithfulness of another equally frail with ourselves; but that we may learn of one who is surely at home in our own hearts. Although the term Gospel may apply to outward preaching, when the Master speaks through instruments; yet it is the power of God unto salvation, and properly applies to the preaching of Christ, who is called the wisdom of God and the power of God; whose inward spiritual preaching in the heart, is known to be the power of God unto salvation, to all them that believe and obey the Truth. For He is the only sure guide, that ever has or ever will conduct all safe home to glory, that give up wholly to be ruled and governed by him. Here we come under the influence of his wisdom, policy, government, religion, worship and ministry. Surely in this way all the kingdoms of the world may become the kingdoms of God and of his Christ, and know Him to reign until all enemies are subdued under his feet, even the last enemy, Death; that death which is inseparably connected with sin and transgression. For this was and is one important design in his coming "to finish sin, and make an end of transgression, and bring in everlasting righteousness," which He wrought out in that outward body, and works in every heart that is given up for him to work in, to will and to do of his own good pleasure. For where the Lord reigns, our soul's salvation is effected, and we know his kingdom to come, and his will to be done; and know it to consist in righteousness and peace and joy in the Holy Ghost.

That this may be, or may become, the happy lot of one and all, is the humble prayer of my soul to Almighty God.

In much love and brotherly affection, I remain your friend and brother,

CYRUS BEEDF.

The Lizard.—Some lizards are so readily tamed, and become so familiar with man, that we can scarcely refuse to believe in their intelligence. The beautiful green lizard (*Lacerta vivida*) will take food from the hands of its owner, and even lap water from the hollow of its keeper's hand. Our prettiest British species is a small greenish-brown reptile (*Lacerta vivipara*) speckled with orange and black, and it is by no means uncommon. If the green lizard were as highly endowed with intelligence as it is with a wonderful power of reproducing lost organs, it would rank with the "most subtil" of creatures. The naturalist, Blumenbach, destroyed the eyes of some, and found these organs completely restored after the lapse of some weeks. Of course no one is rash enough to ascribe this remarkable restorative process to any peculiar skill possessed by the animals; but a mysterious power must, it is evident, be at work in the physical constitution of these active little creatures.

Lizards are social beings, and are sometimes found in countless multitudes, dwelling together in perfect harmony. When Bruce visited the ruined Temple of the Sun at Baalbec, his attention was for a time directed from those wonderful ruins by the hosts of brightly colored lizards which had taken possession of the once magnificent house of Baal. These nimble reptiles were basking by thousands in the sun. They swarmed on prostrate columns, and darted in every direction over the Cyclopean granite masses of the temple walls. In such silent and lonely places these little creatures show the strength of their social tendencies. What a startling change is here! Syrian lizards finding a sunny home in the courts once crowded by priests of Baal.

One family of lizards, the geckos, are furnished with feet so complex in structure, that none but "clever animals" could use such elaborate walking machines. These feet are formed of a series of muscular layers, fringed with a sucker-like apparatus, and sometimes furnished with a sharp and hooked claw. The geckos are thus enabled to cling not only to walls, but to the smoothed surfaces, and to run along ceilings like the house fly. These reptiles know how to avail themselves of this peculiar organization. Is a gecko hungry, it suspends itself, back downwards, to the underside of a large leaf, and waits, even for hours, until an insect comes within reach. Here, then, we find an animal provided with a delicate tool—for such the gecko's foot is—and we also see that the creature uses this instrument in the most effective manner. If a mechanic has a thorough command over his tools, do we not deem him a skillful workman? Why, then, should we hesitate to admit a degree of intelligence in a reptile which uses its own special tools in the most perfect manner?

This adhesive power of the gecko's feet is not, of course, a mere mechanical result. The animal has to use rightly the numerous muscles by which the fan-like foot is expanded, and also those which draw the fleshy fibres close to the diversified surfaces of the bodies to which the lizard clings. These remarkable feet, and the reptile's intelligent use of them, early attracted the attention of the ancient Jews and Arabs. The Hebrew name for the lizard is generally derived from an Arabic root, signifying to *cling*.

The "spider" described in the Book of Proverbs, xxx. 28, as taking "hold with her hands," and living "in king's palaces," is probably the gecko, which is found in the most secluded parts of royal Eastern mansions. The cool manner in which these lizards await the near approach of a foe, and then suddenly disappear, indicates a degree of watchfulness, combined with courage, which would be called "presence of mind" in a human being. A man sees a gecko on a wall, he resolves upon its

capture, and slowly the hand or net approaches. The bright eyes of the little lizard are fixed on the coming peril; there is a sign of stupid fright in the creature—only keen observation of the enemy's motion. Just as the swoop is about to be made, if the creature disappears, as in the "twinkling of an eye." The disappointed man may, for moment, be at a loss to trace the lizard's place of refuge; but he sees, after some search, small chink between the time-worn stones the wall, into which the creature has darted, and where it is safe from human fingers. *Menault.*

For "The Friend."

The description of the shock of an earthquake, felt by a Friend in the neighborhood of Chad's Ford, on the morning of the 9th inst., has prompted me to relate what occurred near our home, about 30 minutes later, was sitting in a front second-story room, writing a letter, when there was a jar which I took the table I was writing on, so that I dropped my pen, and at the same time there was rumbling and grinding sound resembling what would be caused by the passing of a heavy loaded wagon. I immediately rose, and looked out of the window, expecting to see a stone wagon turning off the track, to get out of my way of an approaching car, but there was nothing there to cause such an effect. My son was in the parlor below, and coming up stairs said to him, "What was that?" "An earthquake," said he; and he described the same and the shock much as I have done. It was reported next day in our paper that 200 lbs. of powder had blown up near Wilmington which caused the alarm of earthquake there but this was proved to be a mistake, and the shock was felt at that place very sensibly so as to cause some chimneys to fall, and other disturbances.

As I have not heard any body speak of a shock being felt in our city, I felt willing to offer what came under our own observation in Chestnut St., West Philadelphia.

Tenth mo. 24th, 1871.

THE FRIEND.

TENTH MONTH 28, 1871.

We suppose our readers have learned from some of the various accounts published in daily papers, the awful calamity that has fallen Chicago and large sections of count in Ohio, Iowa, Michigan, Wisconsin and Minnesota, by the most extensive conflagration that have been known in modern times. The city of Chicago between ten thousand twelve thousand buildings are said to have been burned, rendering homeless upwards of six thousand persons, destroying some hundreds of lives, and involving a pecuniary loss of hundreds of millions of dollars. Two accounts are given of the origin of this fire—that it began in a planing-mill, another that it spread from a burning stable—and it probable that in both instances the flames were communicated to the adjoining buildings, and in neither effectually subdued. Would appear that the citizens generally were not aroused to a sense of impending danger until the rapid advance of the fire, the intense heat, and the violent wind, created in part

refraction of the atmosphere, rendered an efforts unavailing to arrest its course. The fires in the different States named, have different origins, and their course respectively has been determined by the circumstances peculiar to the district of country in which they raged. The devastation of property and the loss of human life, have varied the natural features of the district burnt, the sparseness or density of the population.

Throughout the past summer great portions of the north-western portion of the United States has suffered much from drought, especially the district that lies between Lakes Erie and Michigan, and that north-west of Lake Superior, embracing Wisconsin and Minnesota. Thus the underwood and fallen timber in the extensive forests of pine, and the immediate high grass on the prairies, have greatly dried and prepared for the rapid spread of conflagration, should fires be kindled. It is stated that in some cases the fire was communicated from locomotives passing the railroads traversing the country; in other instances it spread from camp-fires made by soldiers. We apprehend, however, that no certain information is known respecting this. Let the fact have been what it may, no similarity has ever been known in this country so extensive in its dread sweep of burning flame, or so destructive of human and animal life as on which was depended for subsistence and domestic society. The different districts are somewhat conflicting, but there is no doubt that altogether many hundred square miles have been laid waste by the destroying angel, and some hundreds of women and children have perished in the flames, others in the streams, and other bodies of water into which they were driven by the approaching devourer. In some towns and villages have been burnt up, in some instances but few of their inhabitants succeeded in escaping; losing all but their lives.

The object is not to recite the many heart-rending scenes as narrated in the accounts received from several points in the desolated districts; they must have been numerous and beyond description; but we would in our readers to the consideration of the available amount of destitution and suffering that must necessarily follow such a visitation, and that unless help is extended by those who have the means, many more will probably perish for want of food and clothing. In the agricultural districts the dwellings, the store-houses, granaries, stock, and farm-implements have fallen a prey to the flames, and those who were favored to save their lives, will probably in most cases be unable to means to feed and clothe themselves and families. The same must be the case in the lumbering districts, and it is stated that very several have died from starvation. It is reported there are at least ten thousand persons rendered homeless and stripped of all means of living, in the several parts of the country overrun by this awful conflagration. It was to be expected, the generous sympathy of the whole community, East, West, and South, has been aroused by these unprecedented catastrophes, and no time has been lost in sending help to the sufferers. In consequence of the destruction of a large part of the grain, and the consequent helpless condition of the many thousands who had been driven out of their homes and were without

food or shelter, first reached the public ear in different and distant parts of the country, and immediately money, food and clothing were freely given and forwarded for their relief. As the accounts were received from the districts overrun by the fire in the further north-west, it became evident that though the loss of property was much less, the loss of human life was far greater than it had been in the city, and the survivors were left, if possible, in a more helpless and miserable condition than their fellow-sufferers in Chicago. The towns inhabited by them are but little known to the public, and they are out of the track of railroad communication. It is therefore more difficult to obtain correct information of the existing state of things among the people; but enough is known to warrant the assertion that hundreds are destitute of means to procure food or clothing, are without houses to shelter them, and unless relieved by the liberality of their fellow-citizens, many of them will probably be unable to maintain life during the cold weather now near at hand.

There have been millions of dollars subscribed for the help of our suffering brethren and sisters, and millions are and will be required to keep multitudes of them from perishing. It is most grateful to witness how universal, in all parts of the country, has been the humane impulse to extend sympathy and the pecuniary means required to succor the sufferers from this dire calamity, and we trust our people will not grow weary in well-doing for the destructive effects of these fires will continue throughout the approaching winter.

The generous assistance afforded by our brethren in Great Britain is, we believe, deeply felt by our people, and we trust it will not only be a valuable help in meeting the wants of those whose substance has been destroyed, but will serve efficiently in securing the feeling of fraternal interest and good-will which should ever be cherished between the two nations.

Our friends in the country will see by the notices on our last page that an opportunity is offered for having whatever they may feel disposed to contribute, judiciously expended towards the help of the destitute.

SUMMARY OF EVENTS.

FOREIGN.—The labor difficulties continue in England. On the 21st a serious disturbance occurred at Lincoln with the men who are on a strike. The rioters drove off the police, attacked the houses of employers, and set fire to the houses.

Earl Granville, in a speech at Manchester, expressed a feeling of pride at the result of the Alabama negotiations, and the good relations they had established with a sister country. He also thanked the American government for so promptly suppressing the Fenian raids into British territory.

The stockholders and others in interest in the ocean telegraph cables, are demanding a closer amalgamation of the Anglo-American and French cable companies.

The evacuation of six departments of France by the Prussians, stipulated in the recent treaty, is to be completed by the 27th of the 12th mo. next. The definitive ratification by France of the treaty with Germany has been dispatched to Berlin. By the terms of the treaty the departments referred to are not to be occupied by French troops, and should France not fulfil her financial obligations, they may be re-occupied by the Germans. Poyner Quartier has been congratulated by President Lincoln in negotiating the treaty with the Cross of the Legion of Honor has been conferred on him as an official recognition of his services.

The last advices from Algeria are more favorable. They represent that the insurgents are submitting, trusting to the generosity of the French commanders.

Prince Napoleon, with the consent of the government, has gone to Corsica. He was insulted by the

people on his journey through France, and at Valence a crowd demanded his surrender into their hands. Being informed that he had a safe conduct from the government they showed their hatred by threats and hisses which followed the train until it had passed beyond the city.

A letter from Gambetta is published, in which he says, that though the Republicans of France were defeated in the recent elections, he finds nothing in the result to cause despondency. The same elections have distinguished the names of those who desired to see France recommitted to the Bonapartists, and have shown that the advocates of a monarchy under other dynasties are lukewarm.

The court-martial held in Paris for the trial of Communists, has sentenced sixty-one of the accused brought before it, and executed nine thousand.

The Government has issued an order to the commanders of military and naval posts and stations on the coasts of France, warning them to keep a careful watch on the movements of all suspicious or suspected persons, and to be prepared for prompt action to suppress any disturbances. The object of the order is to prevent the country from being disturbed or excited by the Bonapartist descent which it is feared may be undertaken.

Full reports of the last German expedition towards the north pole have been published. It is claimed that the expedition was successful, and that ice was discovered free of ice and swarming with whales.

The Prussian Cross Gazette contradicts the account given by Benedetti of the negotiations between Bismarck and Napoleon, in 1866. It asserts that the Germans, while at Versailles, found, in the archives of the French government, a copy in Benedetti's handwriting of the famous secret treaty which was published last year.

A Madrid dispatch says: The manifesto recently issued by the followers of Pagsa has called forth a counter declaration by the adherents of Zorilla, in which they advocate the maintenance of order and the strict enforcement of the law, the preservation of the prestige of the nation, and support of the Savoy dynasty. This manifesto is signed by 141 Progressists of various degrees of prominence in Spanish politics.

The cardinals have held a meeting in Rome and advised the Pope to quit that city to preserve his spiritual independence.

A distinguished prelate, an emissary of the Pope, has had an interview with the Emperor of Germany, to ascertain if it would be allowable for the approaching conclave to sit outside of Rome; for instance, in some French city. The emissary was referred to Bismarck, who evaded a reply.

A fire in the town of Bogoslov that eight hundred buildings in the town of Bogoslov have been burned by incendiary fires, believed to be the work of the fanatical oppressors of the Jews. The great proportion of the inhabitants of the town are of Jewish faith.

The details received of the recent storms and floods in China represent a loss of life and property to have been very great. At least three thousand persons are said to have perished.

Constantinople advices state that the cholera has again appeared, and in two days sixty persons died, ten of whom were Englishmen.

President Juarez has been re-elected President by the Mexican Congress receiving 493 votes—all that were cast. The opposition refrained from voting.

The last steamer brings the gratifying intelligence of the abolition of slavery in Brazil. When she left Rio Janeiro the bill had just passed the Senate by a large majority. The bill gives partial compensation to owners, allows slaves to acquire and hold property for themselves, makes all children of slaves hereafter born free, enables those who are now in slavery to buy their freedom at a moderate valuation, absolutely frees slaves owned by the nation, and provides a fund for purchasing and freeing those owned by the Church. There are about a million and a half or two millions of slaves in the empire.

The London Times of the 23rd states, that Napoleon has declared that recent reports from France of a Bonapartist conspiracy and intended descent upon the coast of France are entirely without foundation. The Emperor, claiming that he is the only legitimate sovereign of France, advocates violent measures for the restoration of his dynasty, but believes his partisans should urge the taking of the will of the French people upon the settlement of the government by means of a plebiscite.

Roderick Murchison, Baronet, president of the Geological and Geographical Societies, died in England on the 22d inst, aged seventy-nine.

The Convention of the International League (Committee) assembled at Geneva on the 23d. No noted leader was present, and the proceedings were without interest.

The Bank of France has commenced the issue of 35,000,000 francs in currency of small denominations. There is great scarcity of money in Paris, and the public discussion demands a great increase in its quantity. London, 10th mo. 231.—Consols, 93. U. S. 5-20's of 1862, 90; of 1867, 92;—Tenors, 80 1/2.
Liverpool.—Uplands cotton, 9 1/2; Orleans, 9 1/2.

UNITED STATES.—Miscellaneous.—Mortality in Philadelphia last week 313, including 74 deaths from Small Pox.

At the recent State election in Pennsylvania 553,840 votes were polled, and the Republican candidate for Surveyor General had a majority of 20,370. The majority for holding a Convention to revise the State Constitution was 290,158, out of 404,393 votes polled. The first of the Mormon trials in Salt Lake City terminated on the 20th inst. On the part of Hawkins, the defendant, it was contended that in taking a plurality of wives he had no intention of committing a crime, that there was no law against polygamy in Utah, and that he had been married according to the usages and customs of the Mormon church. The jury returned a verdict of guilty, and the defendant was taken into custody by the United States Marshal. The principal witness in the case of Hawkins was his first wife, to whom he had been legally married. This attempt to enforce the laws causes great excitement in Utah.

The people of Chicago have begun to work with great energy rebuilding and repairing the effects of the late terrible fire. About 18,000 men are engaged in clearing away the ruins, and bricklayers and carpenters find plenty of work at good wages. The price of bricks has risen from \$6.30 per 1000, to \$12 a \$15. The city is orderly, and relief is being given to the suffering. Immediately after the fire the daily applications for relief numbered about 40,000, but this number daily diminished. On the 21st there were about 25,000 daily applications for shelter. The business of the Board of Trade has been resumed, and the receipts and shipments of grain have again become quite large. The banks have also resumed their ordinary operations, but little money was called for, and they receive deposits to a larger amount than is daily withdrawn. A lot of ground in the burnt district, forty feet on Dearborn place by eighty-two feet on Randolph street, has been sold since the fire for \$50,000. It was purchased a year ago for \$100,000.

Denver dispatch of the 23d inst., says: The Denver and Rio Grande Railway was finished to Colorado Springs, 76 miles, to-day, and is now open for travel and freight. This is the pioneer three-foot road of the country, and a number of officers of other narrow gauge roads throughout the Union are now here to examine its operation.

The Markets, &c.—The following were the quotations on the 23d inst. New York.—American gold, 112 1/2. U. S. sixes, 1881, 110 1/2; ditto, 1865, 114 1/2; ditto, 1862, 114 1/2; ditto, 1868, 112 1/2; ditto, 10-100, 109 1/2. Superfine flour, \$9 a \$9.40; finer brands, \$6.50 a \$10.40. No. 1 Chicago spring wheat, \$1.50 a \$1.55. No. 2, \$1.47 1/2; amber, State, \$1.55; white Michigan, \$1.64 a \$1.68; white Genesee, \$1.60 a \$1.68. Cauda barley, \$1.08; western do., 78 a 80 cts.; mixed, 50 a 52 cts. Western yellow corn, 78 a 80 cts.; mixed, 75 a 76 1/2 cts. Philadelphia.—Cotton, 19 1/2 a 20 cts, for staples and New Orleans. Superfine flour, \$7.50 a \$7.75. Fine brand, \$8.15 a \$8.40. No. 1, \$1.55; amber, \$1.58 a \$1.61. Yellow corn, 75 a 77 cts. Oats, 48 a 49 cts. Lard, 10 cts. Clover-seed, 10 a 10 1/2 cts. Timothy, \$3 a \$3.25. The cattle market very dull. Sales of about 3,000 head at 6 1/2 a 6 3/4 cts, for extra, 7 cts, for a few choice; 5 1/2 a 6 cts. for fat to good, and 3 1/2 a 5 cts, per lb, for coarse. About 15,000 sheep sold at 5 a 5 1/2 cts. Hogs, 4 and 4 1/2 cts. \$6.25 a \$7.25 per 100 lbs. net. Baltimore.—Choice white wheat, \$1.75 a \$1.80; fair to prime, \$1.50 a \$1.70; choice red, \$1.70 a \$1.75; good to prime, \$1.48 a \$1.65; Ohio and Indiana, \$1.50 a \$1.51; Pennsylvania, \$1.53 a \$1.56. Mixed western corn, 73 a 75 cts. Oats, 46 a 48 cts. St. Louis flour, \$5 a \$5 1/2. Red wheat, \$1.31. Yellow corn, 48 cts. Oats, 32 cts. Barley, 75 cts. Rye, 65 cts. Lard, 9 1/2 a 9 1/4 cts. Milwaukee.—No. 1 spring wheat, \$1.20; No. 2, \$1.18. No. 2 mixed corn, 46 cts. Oats, 62 cts. Barley, 56 cts. Cleveland.—No. 1 winter red wheat, \$1.36; No. 2 do., \$1.33. Mixed corn, 58 cts. Oats, 38 1/2 a 39 cts.

RECEIPTS.

Received from Joseph Armfield, Agent, England, 10 shillings, vol. 45, and for Joseph J. Armfield, Arthur

Wood, Samuel Alexander, Samuel J. Alexander, John Edward Baker, William L. Bellow, James Bishop, Samuel Bradburn, John Bottomley, Joseph Bottomley, Robert Clark, John Dale, Joseph Frith, William Graham, Foster Green, Reuben Harvey, John Hodgkin, Samuel Hoop, Susanna Kirkham, William Irwin, Isaac Lloyd, Jno. Finck, Marsli, Walter Morris, Samuel Moore, Sarah Mason, William R. Peckover, William R. Nash, Daniel Pickard, Samuel Pickard, Rachel Rickman, Holman Shephard, Ann Sriihenbark, Rachel Sikes, Elizabeth Thwaite, Edward Watkins, Lucy W. Walker, and Jane Wright, 10 shillings each for vol. 45; for William Bingham, £2, for 4 copies of vol. 45; Samuel Evans, 10 shillings, 10 vols. 27, vol. 43; Henry Hornsbill, 10 shillings, to No. 40, vol. 45; Enoch Hadley, 41, to No. 45, vol. 45, John Horniman, 21, to No. 45, vol. 46; William Knowles, 10 shillings, vol. 44; Anna Nunn, 10 shillings, to No. 22, vol. 45, and Henrietta Peckover, 10 shillings for vol. 44.

FRIENDS' BOOK STORE.

No. 304 Arch Street, Philadelphia.
The first edition of the "Journal of William Evans" being nearly exhausted, a second edition has been published, and is now for sale at the Book Store. This edition contains the Memorial of William Evans, issued by the Yearly Meeting of Philadelphia, and has the yearly date at the top of each page, 27, vol. 43; Henry Hornsbill, 10 shillings, to No. 40, vol. 45; Enoch Hadley, 41, to No. 45, vol. 45, John Horniman, 21, to No. 45, vol. 46; William Knowles, 10 shillings, vol. 44; Anna Nunn, 10 shillings, to No. 22, vol. 45, and Henrietta Peckover, 10 shillings for vol. 44.

BIBLE ASSOCIATION OF FRIENDS.

The Annual Meeting of "The Bible Association of Friends of Philadelphia" will be held at the Committee of the Arch Street Meeting-house, Philadelphia, on the evening of Fourth-day, the 1st of Eleventh month, at 8 o'clock.

The members of the Philadelphia Auxiliary, both men and women, and Friends generally, are invited to attend. CALEB WOOD, Secretary.

WESTTOWN BOARDING SCHOOL.

The Winter Session of the School will commence on Second-day, the 30th of Tenth month.

Pupils who have been regularly entered and who go by the cars from Philadelphia, can obtain tickets at the depot of the West Chester and Philadelphia Railroad, on either of Thirty-first and Chestnut streets, by presenting themselves to the Ticket-agent there, who will be furnished with a list of the pupils for that purpose. In such case the passage, including the stage fare from the Railroad Station, will be charged at the School, to be paid for by the other incidental charges at the close of the term. Conveyances will be at the STREET ROAD DEPOT, on either of Thirty-first and Chestnut streets, on Tenth month, to meet the trains that leave Philadelphia at 7.25 and 10 A. M., and 2.30 P. M.

Baggage may be left either at Thirty-first and Chestnut St. or at Eighteenth and Market. If left at the latter place, it must be put under the care of H. Alexander & Sons, who will convey it to the depot, on either of Thirty-first and Chestnut at a charge of 10 cents per trunk, to be paid to them. Those who prefer can have their baggage sent for to any place in the built-up part of the City, by sending word to the day precedents (through the post-office or otherwise) to H. Alexander & Sons, No. 5 North Eighth street, or to their charge in such case for taking baggage to Thirty-first and Chestnut streets, will be 25 cents per trunk. For the same charge they will also collect baggage from the other railroad depots, if the checks are left at their office No. 5 North Eighth St. Baggage put under their care, if properly marked, will not require any attention from the owners, either at the West Philadelphia depot, or at the Street Road Station, but will be forwarded direct to the School. It may not always go on the same train as the owner, but it will go on the same day, provided the notice to H. Alexander & Sons reaches them in time.

During the Session, passengers for the School will be met at the Street Road Station, on the arrival of the first train from the City, every day except First-days; and small packages for the pupils, if left at Friends' Book Store, No. 304 Arch St., will be forwarded every Sixth-day, by the next stage, or by the next train, on the Tenth month, and the expense charged in their bills; but the express charges on all packages sent to 304 Arch street must be PRE-PAID.
Tenth month 16th, 1871.

FRIENDS' RELIEF COMMITTEE OF PHILADELPHIA, For Help to Sufferers by Northwest Fire.

Information received from various reliable sources principally from members of our own religious Soc renders it very evident there will be, during the proaching inclement season, a great amount of suffering arising from the dreadful fires which have devastated a very large tract of the Northwest, and including many small villages and settlements, as well as the city of Chicago. Friends in the West who near to this scene of suffering, and those in all parts of the land, will no doubt endeavor to render such as may be in their power. A committee of Friends has also been organized in Philadelphia, who will receive and forward contributions, taking due care they will be properly applied.

The following Friends are members of this committee, and donations may be forwarded to any of them, or directly to SAMUEL R. SHIPLEY, Treas. at the office of the Provident Life and Trust Co., 19 MARKET ST. CHARLES EVANS, M. D., 702 Race St. WILLIAM KINSEY, 469 Marshall St. HENRY HAINES, 47 Walnut St. ELLISTON P. MORRIS, 3782 Main St., Germantown.

HADDONFIELD SCHOOL FOR BOYS AND GIRLS, under the care of Friends.

This School is now in session—a few scholars are accommodated with board.

Terms given on application to Chas. Rhoads, 27 Seventh St., or to the Teacher, John Boadle, at school.

THE MORAL ALMANAC, FOR 1872.

Is now on sale at Friends' Book Store, No. 304 St. Being printed on superior paper, and the Cde from a new font of type, the attention of Friends generally is invited to its publication. A number copies are in printed covers.

Price, 40 cts. per dozen or 4 cts. a-piece. In covers, 50 cts. per dozen or 5 cts. "

NOTICE.

Chicago, Tue. 10th month 15th, 1871.
Finding a numerous class of sufferers by the late fire, which the large Associations for the relief of the masses do not and cannot reach, the Society Friends in Chicago this day organized a Friends' Relief Association, and appointed the following Friends Executive Committee, viz: Joseph Jones, Wm. Sherry, Balt. W. Wright, Wm. Doolittle, Geo. Fox Hill, and Elwood W. Jones. All who desire to aid through this Association will address Joseph J. Chairman Friends' Relief Association, 1082 In Avenue, Chicago.

In thus organizing, we wish it distinctly understood that it is not for want of confidence in the present organization by the city, or for the relief of members of the Society of Friends alone; but to co-operate with other Associations in the great work to be done.

FRIENDS' FREEDMEN'S ASSOCIATION.

Officers: Wm. B. GARDNER and Virginia Reed, 11th mo. 1st. We need a few teachers, and are desirous to engage for this service rightly concerned Friends of salary \$15 to \$20 per month.

For further particulars please apply at this 116 North Fourth St., Philadelphia.

FRIENDS' ASYLUM FOR THE INSANE Near Frankford, (Twenty-third Ward,) PHILADELPHIA.

Physician and Superintendent.—JUSTUS H. WINGSTON, M. D.
Applications for the Admission of Patients is made to the Superintendent, or to any of the Board Managers.

DIED, on the 15th of 5th mo. 1871, at Coal-Jowa, after a short but severe illness, PHEBE B. of Asaph Wood, and daughter of Elisha and J. Brackin, of Belmont Co., Ohio. She was natur an affectionate disposition, which endeared her to all who were acquainted with her. As at those we hope, she appearing, from many expressions before and during her illness, to have been from a previous endeavoring to prepare for the solemn which she felt awaited her. She was calm and throughout her illness; said she believed a more merciful God, and a more compassionate Father, her beloved husband to fear God, train up children in the way they should go, with many expressions to relatives and friends, and they assurance that through mercy her end was peace

For "The Friend."

From Death to Life.

The Lord Jesus, the faithful Witness and first begotten from the dead, describes to who truly come to him, as having passed death unto life. "He brought them," says the Psalmist, "out of darkness and the shadow of death, and brake their bands in sunder." And then continues, "Oh that men would praise the Lord for his goodness, and his wonderful works to the children of men." There is perhaps nothing in the whole of redemption that should so call forth heartfelt, deep-toned praise and gratitude to the beneficent Author and Arbitrator, as the unspeakable gift of His beloved to the Lamb immaculate, "who, through the eternal Spirit, offered himself without spot to God, to purge our conscience from dead works to serve the living God." This is both outward offering on Calvary for the sins of the world, and as the Comforter or Spirit of truth manifested in the heart, by whom we are baptised into Christ, and experience justification and belief of the truth: by whom the Father is glorified; and who is our guide in all truth. Upon which, how beautiful, expressive, and adapted is the language: "Be ye therefore the followers of God, as dear children; and walk in love, as Christ also hath loved us, and hath given himself for us, an offering and a sacrifice to God for a sweet-smelling savor."

It is not the invariable way of our sovereign to pull down before He builds up—according to those solemn words, "See now, I, even I, am he, and there is no God with me; I kill, and I make alive; I wound, and I heal." The very institution of self and the daily cross, as a test, in the excess of grace and wisdom, of our allegiance to a Saviour who was made perfect through suffering, shows that it is the way of purification and death to the flesh that our gain of salvation chooses, in order to crucify us to the world, and whereby the world is crucified to us; that no flesh should abide in his presence. So much is this the case that the practical value of the holy religion which we profess, consists in the subjection and death of the corrupt will of the

first Adam, as that which prepares the way for the reception with loving obedience into the heart, of the second Adam, the Lord from heaven. "It is a faithful saying," writes the Apostle; "For if we be dead with him, we shall also reign with him: if we suffer, we shall also reign with him." It is in this way that we become Christians in deed and in truth. For Christ is admitted into, and must rule and reign in all hearts that are His. His kingdom, though small at first as a grain of mustard seed—sown in weakness, but raised in power—becomes set up; and we become His by the solemn thorough surrender of the heart; His by keeping his covenant and remembering his commandments to do them: His for time and His for eternity.

There is perhaps nothing so poor or so pitiful, as the human soul, when, through disobedience or rebellion, it is unquickened by the power of the Holy Spirit, or when destitute of the experimental knowledge of God! It was from this fallen and lost state that the Saviour came to save us. And behold the means! "Know ye not," saith the Apostle, "that so many of us as were baptised into Jesus Christ, were baptised into his death. Therefore we are buried with him by baptism into death; that like as Christ was raised up from the dead by the glory of the Father, even so we also should walk in newness of life." It is through this death unto newness of life, that we all are called; and hence the injunction, "Awake thou that sleepest, and arise from the dead, and Christ shall give thee light." We are often instructed in this change by natural objects, as the following beautiful lines represent:—

"From death to plenty, and from death to life,
Is Nature's progress, when she lectures man
In hourly truth; evincing, as she makes
The grand transition, that she lives and works
A soul in all things, and that soul is God."
* * * * *
"He feeds the secret fire,
By which the mighty process is maintained,
Who sleeps not, is not weary; in whose sight
Slow circling ages are as transient days;
Whose work is without labor; whose designs
No flaw deforms, no difficulty thwarts;
And whose beneficence no charge exhausts."

The unspeakable loving kindness, grace and mercy of our Father in heaven, is so conspicuously shown in the coming in the flesh of His dear Son; His sufferings, death, resurrection and ascension, as well as His intercession for poor, lost, fallen man, that it would seem as though all hearts must, per force, be attuned to praise and adoration, that "unto us a child is born;" and for the precious price paid by Him, that He might, not without us but with us, through our whole-hearted allegiance and obedience, bring us to God. It is those who thus come to Him, the Physician of value, with broken hearts and contrite spirits, feeling their soul's malady, their impotency, their weakness, their nothingness, their unceasing need of Him, their death in

trespasses and sins, that He delights to condescend to; and pouring in the oil and the wine, to show the mighty power of His saving grace upon. "He brought me up also," says the Psalmist, "out of an horrible pit, out of the miry clay, and set my feet upon a rock, and established my goings. And he hath put a new song in my mouth, even praise unto our God." It is this "horrible pit;" this state of destitution and death; this depth where every human aid and comfort fails; this fool's state, to the last shrunk from and resisted by the carnal mind of man ever at enmity with God; this state where there remains no hope but to cast ourselves at His footstool, who has all power in heaven and in earth, and whose sovereign balm is alone sufficient for our truly helpless condition, that the light and life and grace and power of the Lamb of God who taketh away the sin of the world, is revealed for our rescue, help and salvation. Here the Saviour's precept is exemplified: "Except a corn of wheat fall into the ground and die, it abideth alone; but if it die, it bringeth forth much fruit." Without this death unto self, and sin, and the world, there can be no resurrection experienced through Him who must ever remain to be the resurrection, the way, and the life, unto the new creation of God in Christ Jesus. But where we are made willing to thoroughly yield ourselves unto the Comforter, which through the Saviour proceedeth from the Father, and who reproves or convinces of sin, of righteousness and of judgment, then are we brought to the pliant or easily influenced state, which it is the purpose of the Lord's chastenings and dealings to conduct us. Then is fulfilled the Scripture concerning the people of the Most High formerly: "He found him in a desert land, and in the waste howling wilderness; he led him about, he instructed him, he kept him as the apple of his eye. As an eagle stirreth up her nest, fluttereth over her young, spreadeth abroad her wings, taketh them, beareth them on her wings; so the Lord alone did lead him, and there was no strange God with him." To which well might we subjoin: "Happy is that people that is in such a case (at whatever cost or sacrifice of worldly ease, pleasure, honor, or prosperity) yea, happy is that people, whose God is the Lord." It is through the cross that the crown must be attained. And if he who conquers by suffering, brings forth, through our co-operation with His ever-blessed spirit within us, our measure of His precious image—the lamb-like state of humility and meekness and simple dependence upon the Father of mercies—it will be not only a sacrifice, well-pleasing, sweet and lovely in His sight, but like the precious spikenard, poured in the obedience which is of faith, upon the head of the Immaculate, the house also will be filled with the odor of the ointment.

May there then be no shrinking from that salutary, yet humiliating discipline of self-denial and the daily cross which produces

such fruitful and happy results. A discipline which requires the faithful servant to be "as his Master;" and to drink of the cup that He drank of, and to be baptised with the baptism that He was baptised with. A discipline which introduces to "fightings without and fears within." A discipline of secret and solitary struggles and conflicts. A discipline which experimentally teaches that the flesh lusteth against the Spirit, and the Spirit against the flesh, being contrary the one to the other. A discipline of tears, and prayers, and intercessions "with groanings which cannot be uttered." A discipline of reproaches, of necessities, of persecutions, of distresses for Christ's sake. A discipline of "deaths oft." But on the other hand it is a precious heavenly discipline, which teaches to "endure hardness" in fighting the good fight of faith. A discipline which strengthens to so run as to obtain; and which sets free from the law of sin and death. A discipline which enables to work out our salvation with fear and trembling before the Lord. A discipline which qualifies for professing a good profession before many witnesses; and for walking in the straight and narrow way unto everlasting life. A discipline which leads to the acknowledgment of Christ Jesus, our Lord and Saviour, in all our ways before men, that He may acknowledge us before His Father with the holy angels. A discipline that calls out of the world and its spirit—a leaven which so tends to draw away from humility of mind, and inward walking with God. A discipline that induces in degree the meekness and gentleness of Christ; and an earnest desire to "press forward" with power from on high, towards the mark for the prize of the high calling of God in Christ Jesus. A discipline, in short, that leads from death to life; that trains for heaven; and imparts ability at the close of all to say, "Thanks be to God, who giveth us the victory through our Lord Jesus Christ."

Clastic Models.

For "The Friend."

Modern education, notwithstanding the many air-castles which its noisiest advocates have built up in its path, under the idea that they were its goal, has been of late years constantly trending in the right direction. Its aim is improving; and as a sequence, its methods are becoming better and better every year. Perfection is far enough in the distance yet, but it is a very encouraging fact, that the educators of the land recognise, far more than formerly, that the true end of their mission is, the rounded character—the *man* in the best sense of the word—not necessarily a classical "scholar," nor a naturalist, nor a chemist, but one who has his *mental forces* all arranged and packed away, each in its proper niche, ready for use upon occasion. It is better to be able, at need, to read a Latin sentence that we may come across, than merely to carry about with us a dim recollection of ever so many books of Cæsar and Cicero, read at college; it is better to have the fundamental facts of geology fixed firmly in the mind—a substratum upon which to build up thoughts when occasion arises—than to know the names of all the minerals found in Wheatley's mine. I could forgive a man for confounding the names of tibia and fibula, or ulna and radius, if he showed me by his conversation, that his physiological knowledge was based upon a

comprehensive view of the structure and functions of his frame; and readily believe that he might have even a more "useful" stock of knowledge than his competitor, who on their examination passed him with a higher grade, because he could repeat the names of all the five hundred muscles in the body.

It will not be denied that the primary object of education should be to store up *power*; to change the boy into the man, by teaching him *how to use his mind as a man*: instead of as a boy.

Two carpenters build each a barn-door. One "knocks" it together; driving nail after nail, until the face of it is studded; yet in the course of a few months it cracks here, and gaps there, and finally becomes useless. The second lays the plan carefully, notes where the strain is likely to come, uses one nail where a dozen were used by the other, and *his door stands the winds of years*. What is the difference? This man *clinches* his nails. Any body can drive nails; it takes a little skill to clinch well. Now, in education, the best teacher is the best clincher. And the most useful tools with which a good teacher works, are those used in clinching. It took a long while for this idea to become fixed in the popular mind. Away back in the thirties, Horace Mann started it, and agitated it during his lifetime, and succeeded in creating almost an educational revolution in Massachusetts. Since his death, a devoted band of followers have not let the work flag. Yet much remains to be done. Up in, never mind what county in our own State of Pennsylvania, may be found plenty of school-houses, as innocent of a blackboard as they are of shutter-fastenings, and whose most powerful educational implement is a ruler or a rod.

Books have long been recognized as necessary helps in the work of education, but it has been only by slow degrees that one after another of the "clinching" tools has come to occupy its proper place in the school-house. It is now generally admitted, outside of the above county, and others like it, (where the school year consists of four months, and the teachers' salaries vary from fifteen to twenty dollars a month) that *some* philosophical and chemical apparatus is necessary to the furnishing of schools of the middle and higher grades. Let us hope that the time is not far distant when a case of Clastic Models will be found beside that holding the air pump and the electrical machine.

The word "Clastic" is derived from the Greek word *κλαστικός* which means to break to pieces; and "Clastic Models" are those which can be taken apart, and thus illustrate the minute details of organized structures. The idea is an old one, but it is only recently that it has been brought to what may be called perfection. In 1799, a wooden figure of a man was made by a philosopher of Florence, and by him presented to Napoleon, which is believed to have been the first specimen of clastic anatomy. It is still in existence, and is said to come to pieces very well yet. It is however to Anzoux, a Frenchman, that we owe the practical realization of this idea. After years of research and toil, which began in 1819, when he was a medical student, he at length discovered a substance, something like *papier mache* in appearance, but capable of being melted and run into a mould, where it takes the most delicate impressions, and on cooling, becomes very hard and tough, and is

withal, exceedingly light. Its composition as yet the secret of its discoverer, but on his death will become known to science.

The perfection of the models constructed with this material, soon attracted attention, and the demand for them became so great that large manufactory was established near Paris in which from 75 to 100 workmen are kept busy in filling the orders which keep pouring in. It is said that every cavalry regiment in France is required to have the model of a horse (which separates into about 100 parts, and shows more than 3000 details of its structure;) while all the premier schools on the continent and in England order in large numbers, those models specially designed for class instruction. America is rapidly falling into train, and the orders from across the water are now a very important part of the whole. Several colleges, among them Cornell University and Vassar College, have directed a complete collection of Anzoux models to be sent to them. A story is told of a down east yankee who greatly offended Anzoux by ordering a *thousand* manikins, intending to speculate with them. "A *thousand* manikins! He might as well order *thousand* Greek Slaves! Dis is a *fine art!*" and he would not make him one.

It is difficult, within the limits of a short article like the present, to notice even a few of the points of excellence in those wonderful models. That which would strike an aesthetist, next to the exceeding delicacy at beauty of the workmanship is the great *accuracy* in the details of anatomical structure. This has been commented on over and over again. It is evident that Anzoux has unusual anatomical knowledge, for in some of the more complicated models, such as the wood full one of the human brain, (perhaps the most remarkable in the whole series) the latest results of the most laborious research are embodied; and every nerve, almost every fibre is seen radiating from its centre, and stretching out towards its place of work. In the snail, the type of the annelids, apparently overgrown felloe, some two feet long, all the wonderful structure is displayed. The enormous liver, which seems made for no other purpose than to fill up the coils of the stomach, the digestive system, every thing in fact connected with its interior economy, is laid open before us, with all its intricacy of arrangement, relative size and gradations of color, preserved.

In Anzoux's collection as at present constituted, the whole organic world is represented by a series of *types*: the animal kingdom a type of each great family, from man to zoophyte; the vegetable by more than 1 species, embracing flowers, fruit and seed, from the most highly organized plant down to the mosses and lichens.

In addition to these types there are separate collections, designed to illustrate *comparative anatomy*; which are exceedingly interesting and useful in demonstration. Among these may be mentioned the *digest systems*—including the simple stomach of lion, (the carnivorous animal), the complex one of a sheep, (the ruminant),—that of horse, a gnativorous bird, a bird of prey, shark, a grasshopper, a bee, and several others. In the same way the circulatory nervous systems are illustrated.

From this extensive collection a select might easily be made, which could not fail

ing exceedingly useful in any school in which science, even in a very elementary one, is taught; and now that these models so easily accessible, and have become moderate in price, it seems not too much to that no school, making any pretension to giving instruction in the higher branches, can do without its collection of apparatus at all complete does not include some of them.

Physiology and anatomy, two of the most important branches of science, have not heretofore been very successfully taught in our common schools. This is no doubt owing to the difficulty in imparting clear ideas concerning the parts of the body hidden from view. It is which we can see and handle we gain our conceptions of. How many of us can reflect puzzling till our heads ached over the valves of the heart, or the delicate mechanism of the internal ear, in the vain attempt to comprehend those pictures which professed to take them clear. How like a flash of light it then, would have been one of these tangible, visible models which we could take in our hands, and open and see what was in-

one of the difficulties alluded to above, is that of making dissections. It is well nigh impossible, in a school of any size, in which the teacher's time is pretty well taken up, to give dissections before a class. Again if the dissections are unsatisfactory. Human anatomy has to be passed over entirely; and it is the most interesting, and for general purposes, the most important. But with these "Anatomic Models," a manikin, for instance, some of the larger models of portions of the human frame, such as the Hand, the Ear, the Eye, the Heart, all the difficulties in the way of illustration vanish. The dissection is made easy. The organs are all *in situ*, just as in nature, and if one is hidden by those in front, all we have to do is to take away the covering, to expose the hidden one. The little circle down in the palm of the hand that is to move the finger, and which nothing but the most careful dissection would reveal, is made to disclose its hiding place; the veins are followed from their remote capillaries through their many windings, to the heart; the folds of the intestinal membrane, so important in nature, but so impossible to represent on paper, stand plainly out to view. I speak from some experience, both of the difficulties of teaching anatomy without these models, and of the ease and pleasure with which, and feel no hesitation in asserting that a study may be made not only exceeding interesting to the pupil, but a good mental discipline. As works of art, for the sake of execution, for truthfulness to nature in all the details of shape, relative position, and notably of color, and finally, in a teacher's hands as "clinching tools," it is not too much to award Anzoux's models to the highest praise.

For "The Friend."

A Great and Weighty Trust.

The following is extracted from an epistle addressed to the Society of Friends by that worthy elder and wise seer in our Israel, John Woolman. His reflections herein conveyed, calculated to arouse the reader to a solemn inquiry whether he or she has been neglectful respect to a faithful maintenance of the promises and testimonies of this religious Society bequeathed to us as a sacred trust to

exemplify in our respective particulars, and to stand unimpaired to those who may come after us? That thus the Great Name may be honored through us and in us, to the praise and glory of that grace which comes by Jesus Christ and brings salvation to all that are obedient to its manifestations in the soul. J. Woolman says:—

"A trust is committed to us, a great and weighty trust, to which our diligent attention is necessary. Wherever the active members of this visible gathered church use themselves to that which is contrary to the purity of our principles, it appears to be a breach of this trust, and one step back toward the wilderness, one step towards undoing what God in infinite love hath done through his faithful servants in a work of several ages, and like laying the foundation for future sufferings.

"I feel a living invitation in my mind to such who are active in our religious Society, that we may lay to heart this matter, and consider the station in which we stand: a place of outward liberty, under the free exercise of our conscience towards God, not obtained but through great and manifold afflictions of those who lived before us. There is gratitude due from us to our heavenly Father, and justice to our posterity: can our hearts endure, or our hands be strong, if we desert a cause so precious, if we turn aside from a work, under which so many have patiently labored?

"May the deep sufferings of our Saviour be so dear to us, that we may never trample under foot the adorable Son of God, nor count the blood of the covenant unholy! May the faithfulness of the martyrs, when the prospect of death by fire was before them, be remembered! And may the patient, constant sufferings of the upright-hearted servants of God in latter ages be revived in our minds! And may we so follow on to know the Lord, that neither the faithful in this age, nor those in ages to come, may ever be brought under suffering, through our sliding back from the work of reformation in the world.

"While the active members in the visible gathered church stand upright, and the affairs thereof are carried on under the leadings of the Holy Spirit, although disorders may arise among us, and cause many exercises to those who feel the care of the churches upon them; yet, while these continue under the weight of the work and labor in the meekness of wisdom for the help of others, the name of Christ in the visible gathered church may be kept sacred. But while they who are active in the affairs of this church continue in a manifest opposition to the purity of our principles, this, as the prophet Isaiah expresseth it, is as when a standard-bearer fainteth. And thus the way opens to great and prevailing degeneracy, and to sufferings for such, who through the power of divine love are separated to the Gospel of Christ, and cannot unite with anything which stands in opposition to the purity of it.

"The necessity of an inward stillness hath under these exercises appeared clear to my mind: in true silence strength is renewed; the mind herein is weaned from all things, but as they may be enjoyed in the divine will. Where the fruits of that spirit which is of the world, are brought forth by many who profess to be led by the Spirit of Truth, and cloudiness is felt to be gathering over the visible gathered church, the sincere in heart

who abide in true stillness, and are exercised therein before the Lord for his name's sake, have a knowledge of Christ in the fellowship of his sufferings; and in inward thankfulness is felt at times, that through divine love our own wisdom is cast out, and that forward active part in us subjected, which would rise and do something in the visible gathered church, without the pure leadings of the Spirit of Christ.

"While aught remains in us different from a perfect resignation of our wills, it is like a seal to a book wherein is written that good and acceptable and perfect will of God concerning us; but when our minds entirely yield to Christ, that silence is known, which followeth the opening of the last of the seals. Rev. viii. 1. In this silence, we learn abiding in the divine will, and there feel that we have no cause to promote, but that only in which the light of life directs us in our proceedings; and that the alone way to be useful in the church of Christ, is to abide faithfully under the leadings of his Holy Spirit in all cases; and being thereby preserved in purity of heart and holiness of conversation, a testimony to the purity of his government may be held forth through us to others."

Zoology of the Amazon.

The Amazon, says Orton, is a crowded aquarium, holding representatives of every zoological class—inferalia, hydras, fresh water shells, aquatic beetles, fishes, reptiles, water birds and cetaceans. The abundance and variety of fishes are extraordinary; so also are the species. This great river is a peculiar ichthyic province, and each part has its characteristics. According to Agassiz, the whole river, as well as its tributaries, is broken up into numerous distinct fauna. The piraricú or "red fish," (the *Sudus gigas* of science) is at once the largest, most common, and most useful fish. The Peruvian Indians call it *payshi*. It is a powerful fish, often measuring eight feet in length and five in girth, clad in an ornamental coat of mail, its large scales being margined with bright red. It ranges from Peru to Para. It is usually taken by the arrow or spear. Salted and dried, the meat will keep for a year, and forms, with farina, the staple food on the Amazon. The hard, rough tongue is used as a grater. Other fishes most frequently seen are the prettily spotted catfish, Pescada, Piranba, Acará, which carries its young in its mouth, and a long slender needle-fish. There are ganoids in the river, but no sturgeons proper. Pickeril, perch and trout, are also wanting. The sting-ray represents the shark family. As a whole, the fishes of the Amazon have a marine character peculiarly their own.

The reptilian inhabitants of this inland sea are introduced by numerous batrachians, water snakes and anacondas. But alligators bear the palm for ugliness, size and strength. In summer the main river swarms with them; in the wet season they retreat to the interior lakes and flooded forests. It was for this reason that we did not see an alligator on the Napo. At low water they are found above the entrance of the Curaray. About Otidós, where many of the pools dry up in the fine months, the alligator buries itself in the mud, and sleeps till the rainy season returns. "It is scarcely exaggerating to say (writes Bates) that the waters of the Solimóens are as well stocked with large alligators in the dry season

as a ditch in England is in summer with tadpoles." There are three or four species in the Amazon. The largest attains a length of twenty feet. There is a smaller kind (only five feet long when full grown) which has the long, slender muzzle of the extinct teiösaurs. * * * Sluggish on land, the alligator is very agile in its element. It never attacks man when on his guard, but it is cunning enough to know when it may do this with safety. It lays its eggs (about twenty) some distance from the river bank, covering them with leaves and sticks. They are larger than those of Guayaquil, or about four inches long, of an elliptical shape, with a rough, calcareous shell. Negro vendors sell them cooked in the streets of Pará.

Turtles are perhaps the most important product of the Amazon, not excepting the piraricú. The largest and most abundant species is the Torturaga grande. It measures, when full grown, nearly three feet in length, and two in breadth, and has an oval, smooth, dark-colored shell. Every house has a little pond in the back yard to hold a stock of turtles through the wet season. It furnishes the best meat on the Upper Amazon. We found it very tender, palatable, and wholesome; but Bates, who was obliged to live on it for years, says it is very cloying. Every part of the creature is turned to account. The entrails are made into soup; sausages are made of the stomach; steaks are cut from the breast, and the rest is roasted in the shell. The turtle lays its eggs (generally between midnight and dawn) on the central and highest part of the plains, or about a hundred feet from the shore. The Indians say it will lay only where itself was hatched out. With its hind flippers it digs a hole, two or three feet deep, and deposits from eighty to one hundred and sixty eggs. These are covered with sand, and the next summer makes another deposit on the top, and so on until the pit is full. The hunting of turtle eggs is a great business on the Amazon. They are used chiefly in manufacturing oil for illumination. Thrown into a canoe, they are broken and beaten up by human feet; water is then poured in, and the floating oil is skimmed off, purified over the fire in copper kettles, and finally put up in three-gallon earthen jars for the market. The turtles are caught for the table as they return to the river after laying their eggs. To secure them it suffices to turn them over on their backs. The turtles certainly have a hard time of it. The alligators and large fishes swallow the young ones by hundreds; jaguars pounce upon the full grown ones as they crawl over the plains, and vultures and ibises attend the feast. But man is their most formidable foe. The destruction of turtle life is incredible. It is calculated that fifty millions of eggs are annually destroyed. Thousands of those that escape capture in the egg period are collected as soon as hatched, being considered a great delicacy. The wonder is that the race is not well nigh extinct. They are in fact rapidly decreasing in numbers, a large turtle which twenty years ago could be bought for fifty cents, now commands three dollars. * * * * *

But the most noticeable feature of the Amazonian fauna, as Agassiz has remarked, is the abundance of cetaceans through its whole extent. From the brackish estuary of Pará, to the clear, cool waters at the base of the Andes, these clumsy refugees from the

ocean may be seen gamboling and blowing as in their native element. Four different kinds of porpoises have been seen. A black species lives in the Bay of Marajó. In the Middle Amazon are two distinct porpoises, one flesh-colored; and in the upper tributaries in the Inia Boliensis, resembling, but specifically different from the sea-dolphin and the soo soo of the Ganges. "It was several years (says the Naturalist on the Amazon) before I could induce a fisherman to harpoon dolphins for me as specimens, for no one ever kills these animals voluntarily; the superstitious people believe that blindness would result from the use of the oil in lamps." The herbivorous manati is found throughout the great river. It differs slightly from the Atlantic species. It rarely measures over twelve feet in length. It is taken by the harpoon or nets of chamberi twine. Both Herndon and Gibbon mention seals as occurring in the Peruvian tributaries; but we saw none, neither did Bates, Agassiz or Edwards. They probably meant the manati.

COMFORT FOR SICKNESS.

Oh, how soft that bed must be,
Made in sickness, Lord, by thee;
And that rest, how calm, how sweet,
When thou dost the sufferer meet!

Come, thou good Physician, now,
Soothe my cheek and smooth my brow;
Whisper, raising up my head,
"It is I; be not afraid!"

Bless me, and I shall be blest;
Soothe me, and I shall have rest;
Fix my heart, my hopes above;
Love me, Lord, for thou art Love!

TRUST.

The child that leans on its parent's breast
Leaves there its cares and is at rest;
The bird sits singing by his nest,
And tells aloud
His trust in God, and so is blest
"Neath every cloud.

He hath no store, he sees no need,
Yet sings aloud and doth not heed;
By flowing streams or grassy mead,
He sings to shame
Men who forget, in fear of need,
A Father's name.

The heart that trusts forever sings,
And feels as light as if it had wings;
A well of peace within it springs,
Come good or ill;
Whatever to-day, to-morrow, brings,
It is His will.

For "The Friend."

Extract from the writings of Isaac Pennington, containing some remarks which in the present day may prove a salutary watchword:

"Let all strive to excel in tenderness and in long-suffering, and to be kept out of hard and evil thoughts, one of another, and from harsh interpretations concerning any thing relating to one another. Oh this is unworthy to be found in an Israelite towards an Egyptian; but exceedingly shameful and inexcusable in one friend towards another. How many weaknesses doeth the Lord pass by in us! How is he ready to interpret all things well concerning His disciples, that may bear a good interpretation! When they had all been scattered from him upon his death, he did not upbraid them, but sweetly gathered them again. Oh, dear Friends, have we re-

ceived the same life of sweetness, let us bring forth the same sweet fruits, being ready to excuse, and being ready to receive that which may tend to the excuse of another in any doubtful case; and where there is any manifest, wait; Oh wait, to overcome it will be good. Oh let us not spend the strength of our spirit in crying out of one another because of evil; but watch and wait where the mercy and healing virtue will arise. Oh Lord n God, when thou hast shown the wants of Israel in any kind sufficiently (whether particular or in the general) bring forth to supply thereof from thy fullness; so order it in thy eternal wisdom, that all may be ashamed and abased before Thee, and thy name praised in and over all works."

The above sweet sentences are copied with a hope, if they were inserted in "The Friend," they might be a help to some weary traveller and happy would it be if the members of our Society would so close in with the offers of redeeming love, as to be entirely freed from all backbiting, evil-speaking, surmising, telling an evil report of an absent Friend, thereby making it manifest that we have not submitted to the cleansing operation of the Holy Ghost, which would enable us to take the beam out of our own eyes, and to see the beam unless the beam is so taken out of our own eyes, we cannot see clearly to pull the mote out of our brother's eye. Oh, let us flee from these evil things, and not listen to the tale bearer.

Ohio, 9th mo. 3d, 1851.

Selected for "The Friend."

"A prudent wife is from the Lord." Prov. xix. 1.

In this day of so much outgoing in marriage in our religious Society, I would review the language of our excellent discipline, "of all young and unmarried people in membership with us [Friends], previously to their making any procedure in order to marriage do seriously and humbly wait upon the Lord for his counsel and direction in this important concern;" when the marriage covenant has been entered into after such counsel and direction have been vouchsafed, no cause for regret has been experienced.

That dignified minister of the Gospel, Henry Hall, leaves this beautiful and touching tribute to the worth of his wife:

"When I recur to the time of our first acquaintance, and the formation of our union in the bands of marriage, I cannot but believe, that as the servant of Abraham was directed by the favor of Heaven when selected a wife for Isaac, so the goodness of Isaac God was evidenced to me; our union being formed under the serious consideration of the expediency of seeking a blessing, as our prospects of a settlement in the world were flattering. * * * * *

"My dear Sarah entered cheerfully a helpmate into the duties of a wife; cross encounters sometimes assailed us, which affected her tender mind, but I do not remember that she ever murmured; if she did she was careful to conceal it from me. I often admired the turn she would give to these occurrences, and the pleasant way she had to keep me from being discouraged, always manifesting a willingness to continue the necessary exertions; saying, 'Let us not seek for grivings; if we can live comfortably, and have in our power to entertain travelling Friends—privileges which she enjoyed in her father's

—these are all the riches I crave; and I am so much I am willing to labor early in the management of my domestic concerns, and more particularly if it will be means of leaving these more at liberty to do to thy religious engagements? We so situated that we often had the comfort of Friends, many of whom were poor, if I observed any partiality in her behavior at such times, it was in showing particular attention to these. I have sometimes justly remarked this to her; when she would be, 'I know how to feel with the rich have many friends.' When I was in the service of the ministry she so far from holding me back, that she urged me to attend to religious duties, saying: 'If thou neglect thy religious duties, may not prosper in the world; and how much I miss thee when from home, I rather thou shouldst go than stay. I feel a sweet union with thee when thou art absent; and sometimes partake with thee in thy suffering, but in thy consolations

As a mother, she was prudent in the management and government of her children, training them early to industry, considering it not only necessary to enable them to provide for their subsistence, but also to conduce to their health; yet tenderly careful to watch over them, so as to contribute to their comfort, saying, 'Too much should not be required of children; I feel much for them in tender years, and would rather overvalue myself than require too much of them.' As a friend she was firm; slow to believe in the disadvantage of any one; truly a peacemaker; much respected in the neighborhood where she was best known; and I believe every person who lived near her, and acquainted with her, would join me in testimony to her disposition to promote peace and good will."

For "The Friend."

Memories of Mildred Lettiff.

(Continued from page 76.)

proceeding to a prospect which has been laid out at a distance for some years past, I came on the evening of the 21st of the 10th month 1819, in order to visit the friends on the east side of the mountains. I may say I am aware of the magnitude of the undertaking, and that it is only with great watchful care in humble prayer, I hope to get along with safety. I have for my companion my well esteemed friends Mr. Lloyd and Mary Steer."

After attending several meetings with but no comment, except that she could rejoice in our suffering, they, on the 3rd of the 10th month, were at Winchester. "Here," she writes, "it felt to me, and I believe to the Friends with me there, that our blessed and Master who did visibly bless the lives and two fishes when amongst men, and by the might of his own power arise for us, in blessing his own work in the midst of his little dependent ones unto satisfaction to multitude. Truth arose into dominion over everything that opposed. My soul is rejoiced whilst I note it; and I think I may say that the people were satisfied, and His most precious Name glorified."

On the 4th, at Hopewell Monthly Meeting. Hardly had little consolation. Alas! when will consolation arise?

"5th. Continued our journey to Baltimore Yearly Meeting. Got to E. J.'s, and lodged that night.

"6th. Stopped with Friends at their week day meeting at Waterford. Still low times, and nothing to rejoice in but that of being accounted worthy to suffer with the seed of the kingdom, and mourn with the little remnant which I trust is left in most places, who mourn for the desolations of Zion, and whose spirits are sometimes bowed in humble prayer for an enlargement of her borders.

"7th. Reached New Market; and on the 8th got to G. E.'s, where they seemed to be entrusted with much. May the Lord, the Great Giver, by the power of his sanctifying grace, give wise and understanding hearts so to act as faithful stewards, that when they must leave all the good things here below, they may be permitted to enjoy far better and durable riches eternally in the heavens, where no disappointment can arise.

"9th. Reached Baltimore. Attended the Select Meeting; still low in my mind; although indulged with the privilege of sitting with the heads of the tribes of Israel.

"10th. Was held the public meeting, which I hope was owned and favored by the Great Head of the church.

"11th. Began the Yearly Meeting for business. Lord be with thy people through the different sittings thereof, if it seem good in thy sight.

"From the 12th to the 15th attended this meeting, which was favored I think in the different sittings with that which has a solemnizing tendency, and ended well. Praise be ascribed unto Him to whom it belongs forever. On the 16th we left Baltimore, and went out to G. E.'s."

She attended their meeting on the 17th, and on the 19th got to her friend R. B.'s. "In the evening," her diary continues, "our dear friends William Rickman, and Elizabeth Coggeshall and her companion came; and on the 20th attended their meeting in course. Dear W. and E. had I hope good service here.

"21st. Were all at the Indian Spring Meeting. Here also the service mostly devolved upon them. Hard labor, and but little relief was my portion. Alas! alas! at most places true religion appears to be at a low ebb. When will Zion arise and put on strength, appearing in her ancient beauty? After meeting to-day we parted; our friends going on to Washington; and we returning back to Sandy Spring.

"22d. Attended their Monthly Meeting; and on the 23d left them in a good degree clear and easy. Went on to Washington, and am now at our kind friend William Yates.

"24th. Was at their meeting in Washington city, in the forenoon, which was a favored one."

After visiting several meetings hereaway, they started on the 29th for New Market. "But," as she records, "we had not gone far before my mind was introduced into such an exercise for the people left behind, that I had at length to let my friends know I believed we must go back and have a meeting at 3 o'clock. They were immediately dipped into feeling with me, and indeed we all seemed humbled together, and to experience a baptizing season by the road-side. We turned about. B. T. left us and went on to give notice. The people collected admirably from different quarters, whom we met at the time

appointed, and had I think a solemn meeting, by and through the power of Israel's God; who I humbly trust will have the praise forever. No tongue can tell, nor pen describe the consolation which was my experience that evening. May I never forget to be thankful and firmly trust in Thee, and willingly obey Thee, O righteous Helper. May thine everywhere, O Lord, love Thee more, and serve Thee better, now and forever."

They attended New Market and Pipe Creek meetings; and on the 3d of Eleventh month were at Gunpowder Monthly Meeting. "Here," she says, "true religion amongst Friends, as at many other places, seems to be at a low ebb. Yet the benefit arising from the purity thereof, and the path from earth to heaven were clearly pointed out, and through Divine aid the people invited to walk therein. There were a number who attended the first meeting not in membership. I hope some were encouraged and helped on their way. After meeting we went to see an aged Friend of nearly ninety-eight years, who lived with his son and his family. I was glad we went.

From this place they went to Baltimore, and attended the Monthly Meeting, the Quarterly Meeting of Ministers and Elders, and the general meeting in that city. On the 10th, continuing the Journal again, she writes, "We left Baltimore, although I was but in poor health of body. Yet such was the sweet peace of my mind, that I could not dare to complain. Nay, verily! but abundant is the cause for thanksgiving and praise.

"11th. Were at Little Falls Meeting, where there was a marriage; and I think it may be said Jesus, through His power was there. Divine help was afforded, and a solemn and good meeting we had. May the Lord God and the Lamb have the praise forever. Thus far the gracious Helper has been our caretaker; and I trust the cause of Truth has not sustained any loss. This day I am forty-six years of age."

On the 12th, 13th, and 14th, they were at Forest, Bush, and Deer Creek meetings, of which she writes: "In all these meetings the Good Shepherd of the flock was pleased to draw near, and I think there is reason to hope his excellent Name was glorified, at least in the hearts of some that were present; notwithstanding my lot has at most places been one of mourning, because the religion of Jesus our suffering Lord and Master, is at so low a state. Alas! alas! *was there ever a time* when the upright in heart had greater cause to mourn and lament, even as Rachel did, when such was her weeping for the loss of her children, that she would not be comforted because they were not. Such have been my feelings sometimes in viewing the large harvest field, that I have said in my heart, what will it amount to, O Father, for thy ministers—comparable to the reapers—to cut down the wheat, if those who should follow after to pick it up, to bind it and shock it, will so neglect their part of the work, that after it is reaped, the wheat should lie and rot on the ground. My soul has received a degree of consolation in the revival of the language, 'What is that to thee?' Thou knowest in a large field there are many hands, and each one has its proper portion of labor and care assigned! See thou wilt to thy own part, and leave the rest. 'Be thou faithful unto death, and I will give thee a crown of life.' Ah, surely under these impressions, I feel myself bound to obedience,

as well as to acknowledge 'It is enough' from day to day. I more and more crave a resolution like good old Joshua, Let others do as they will, as for me, through Thy help, O Holy One, I will serve thee, whilst life, or breath, or ability remain; for thou art worthy!

"15th. Was at West Nottingham Meeting. Here again,—notwithstanding I went to meeting, as far as I was able to judge as an empty vessel indeed, and in poor health, carrying nothing with me but a tottering frame which covered, I think I may say, a humble spirit and a contrite heart: knowing without the fresh anointing it was impossible to preach the gospel of Christ,—here soon after taking my seat, I felt afresh the empty water-pot filled to the brim, and ancient goodness anew worked a miracle by turning the water into wine, and the word of Divine command, Draw out now and hand to the guests; in other words, declare the solemn truths to the people, as I shall hand them forth one after another: which I did in such a manner as to cause me afresh to compare myself to a vessel that wanted vent. I am amazed at myself, and bound to say, 'This is the Lord's doing, and it is marvellous in my eyes.' Indeed, so far in this journey, such has been the solemnizing power accompanying the assemblies of the people, as to confirm my faith in the evidence I felt before I left my home, that the fields were white unto harvest. That the wheat is fully ripe, and it is time for the reapers to put in the sharp sickle and cut it down. May the Lord God and the Lamb be pleased to cause the blessing to descend, and arouse every faculty of feeling to industry, that the party amongst whom our lots have been cast, may profit by this Divine visitation, afresh extended with design to turn the attention from darkness to light, and from the power of Satan to serve the living God.

(To be continued.)

Be ye disunumbered of the world and discharged of its cares: Fly as for your lives from the snares therein, and get you into your watch-tower, the name of the Lord, which is not a mere literal name, but a living, spiritual Power—a strong tower, an invincible fortress, where dwell ye with Him, who speaketh peace to his children, and ordains quietness to them that trust in Him.—*Wm. Penn.*

THE FRIEND.

ELEVENTH MONTH 4, 1871.

As some of our subscribers are desirous to see some account of those parts of the proceedings of Indiana, Western and Iowa Yearly Meetings which are of general interest, we have taken the following extracts from a condensed notice of the two former meetings printed in the "Christian Worker," and from the minutes of the latter published in "The Weekly Oskaloosa Herald." No copy of the minutes of either of these meetings as usually printed has been received.

INDIANA YEARLY MEETING.

The semi-centennial meeting of this body convened on the 27th of ninth month, and closed on the 3d inst. The meeting for ministers and elders convened on the 26th.

The ministers and elders seemed to be knit together in one bundle of love, and to feel the preciousness of that fellowship that there is with the Father and with his Son.

When the yearly meeting for business convened the next morning, about the usual number of persons were in attendance. The number of accredited ministers from other Yearly Meetings was smaller than at many other times.

Soon after the meeting gathered, a solemn silence overspread the assembly, and utterance was given to prayer for the divine blessing. The desire was expressed that the Lord's work might be done in His own way. Soon after which a Friend rose and repeated a short text of Scripture. He was followed by about fifty others in the same way, little more than a text or two being expressed by any one, after which the meeting proceeded to business. The London general epistle, and special epistles from the other Yearly Meetings were read, most of which were unusually interesting, full of life and instruction, indicating an increase of vitality in the churches.

On fifth day morning, C. F. Coffin was appointed clerk, and Dougan Clark and Allen Terrell assistants. The report of the Central Book and Tract Committee was read, showing that their work had been gradually extending its influence to nearly all parts of the United States.

The report of the associated committees on Indian affairs was quite lengthy and full of interest, and enlisted the feelings of the meeting more generally than the subject had ever done before.

On sixth day, the state of society was brought before the meeting by reading the answers to queries, and the statistical reports. Various important points were spoken to with deep earnestness by several Friends. The counsel and admonition given were well calculated to encourage and incite to increased diligence in the christian warfare. The subject of temperance was brought prominently forward, and there was a deep feeling in the meeting in relation to it. An energetic central committee was appointed, with instructions to the Monthly Meetings to appoint cooperating committees, to labor as way may open for it for the overthrow of this giant evil in the land.

There are now about one hundred and sixty ministers belonging to this Yearly Meeting, and forty-two meetings without ministers.

On seventh day the report on Earlham College was read, showing that one hundred and thirty-eight students had been attending the institution, and that it was in a prosperous condition, and is likely soon to be placed on a more permanent basis by an endowment of fifty thousand dollars.

The proposition from Western Yearly Meeting for a general conference of Yearly Meetings was not united with. The trustees of White's Manual Labor Institute, near Washab, Ind., made a satisfactory report, showing that the institution has become self sustaining, and is doing good.

The committee on peace made a report, showing that much earnest and efficient labor has been bestowed on this important subject.

The committee on Education made encouraging report of the condition and progress of education amongst us. The work amongst the freedmen under the care of the missionary board was making commendable progress, but

much yet remains to be done in this important field of labor.

An important feature of the meeting, and which we trust many of those who attend will long remember, was the meetings for vine worship. The power of the Holy Ghost was sensibly present, many hearts were melted, indifferents persons awakened, the lukewarm, aroused, and earnest christians cheered and strengthened. A meeting was held every morning during the week, we believe, in First street meeting house, open to all, but attended mainly by younger persons and those seeking more perfect rest in Christ. One or two evening meetings were also held at the same place, and a similar one on first day evening in the Yearly Meeting house. Quite a number persons in these meetings professed to have found more perfect rest and peace to the souls than they had ever realized before.

The number of persons present on first day was about the same as for several years past, estimated at from six to ten thousand. Good order prevailed.

IOWA YEARLY MEETING OF FRIENDS.

At Iowa Yearly Meeting of Friends, held in Mahakosa county, commencing with meetings for worship, at Oskaloosa, and New Sharon, on 1st day, 9th month, 3d, and Oskaloosa for discipline, on 2d day morning, 4th, 1871.

Reports were received from all our Quarterly Meetings, and their representatives were all present except 10.

The reading of the London General Epistle and Epistles addressed to this Meeting by the Yearly Meetings of London, Dublin, N. England, Baltimore, North Carolina, O. Indiana, Western and Canada, occupied a large part of this sitting, accompanied by a fresh and lively interest, renewing and strengthening the bond of Christian sympathy and fellowship, in which our hearts are united to our brethren of the same household faith everywhere.

Our Friends of Philadelphia Yearly Meeting were feelingly commended to our prayerful interest, and during a little time of sole silence, we believe the united petition was raised that the Healer of breaches, and restorer of paths to dwell in, may heal our wound.

Joel Bean was appointed Clerk, and Cy Beede and Barclay Hinckman for assistant Clerks.

The Second Annual Report of the Associated Committee of Friends on Indian Affairs was presented and read, giving an interesting and encouraging account of the condition of the Indians, and of the situation and work of our agents and laborers in the Central Superintendency under the charge of Friend

Four of our members not clear of the necessary use of intoxicating drinks, and the habitual use of tobacco.

The Scriptures are read daily and fast worship maintained in 781 families.

There are 5899 members; 207 received during the year.

Number of Friends' children from first twenty-one years of age, 1888. Number of Friends' children taught in schools controlled by Friends, 308. Meetings without schools, 33. Number of Friends' children attending schools taught by Friends, 617. Number of attending schools not taught by Friends, 7.

How many Friends' children growing

literary instruction? Not any. Do pupils of Friends' schools attend mid-week? They do.

the reading of the Holy Scriptures aged, and are portions of them read in schools each day? They are encouraged, read daily with two exceptions. How of your members have been engaged during the past year? 122. Do we manifest a lively interest in establishing and sustaining Friends' schools? They are on an extensive extent. Do parents evince a hearty sympathy with the teacher in the school when their children attend, by visiting it daily? Not so much as is desirable. Do the committees make regular reports, at least once in each year, to the meetings that are held? They do.

Caretakers reported as follows, which is satisfactory.

1847.—We have given attention to the business of our appointment. Fifty-nine persons, members have been admitted to the sittings of the meetings; thirty-six males and twenty-nines. About three-fourths of these persons had a right of membership with us, and one-half the remaining fourth are present members of other religious denominations.

We conclude the business of this meeting, and adjourn to hold the usual meetings for the next morning, (the afternoon meeting closed.)

We gratefully acknowledge that "the Lord has opened us," and dispensed to us, from day to day, on this occasion, according to our desires, for our refreshment and encouragement. We conclude all the praise.

WESTERN YEARLY MEETING.

The Western Yearly Meeting opened ninth day, 15th, 1871.

There were fifty-five representatives, all were present except five, for the absence of whom no notice was given.

Ninth day, Ninth month 16.—Amos Doan, appointed Clerk, and Elwood C. Siler and V. Pearson assistants. The epistolary introduction of our other Yearly Meetings produced. It was felt to be a precious privilege thus to be brought into near remembrance and gospel fellowship with our distant brethren. The epistle from Indiana informed that our Quarterly Meetings in Kansas Territory had requested the privilege of attending a Yearly Meeting, and that they, in return, were united in granting the request, with the approbation of other Yearly Meetings. On deliberation, the meeting concluded that meeting in judgment.

Tenth day—Meetings for divine worship held at 10 o'clock a. m. and 2 o'clock p. m. The house, and at two stands out-doors, very large attendance and meetings highly interesting. Order very good. Several of the brethren present appointed a meeting in the evening at 7 o'clock. Also a favored meeting, and day—The consideration of the state of the Society was entered upon by reading the answers thereto from the Quarterly Meetings. Much pertinent counsel was given. The annual answers showed an increase in membership of 313, an increase of 169. Number of members, 9,749, of families, 2,063, number of meetings, 17.

Eleventh day, morning—The meeting assembled in joint session, when the report of the

committee on Indian affairs appointed by the meeting for sufferings was read, together with the report of the Associated Executive Committee of the different Yearly Meetings on Indian affairs. The action of the respective committees was satisfactory. Joint session closed, and men and women Friends resumed business as usual.

Five ministers were reported as recorded the past year.

A satisfactory report was received and read from the old Committee on Indian civilization. The committee was released, and the new committee take charge of the work. An executive committee on education was appointed. Report on Education was read. Report of Peace Committee was read, and an appropriation of \$6000 made to aid the executive committee. The Central Book and Tract committee made a satisfactory report.

Fifth day—A missionary Board was appointed. The executive committee on Freedmen reported. The action of the committee was approved, the committee was released and the Missionary Board take charge of the work. A donation of \$500 was made for the Asylum for Colored Children of the State, situated at Indianapolis. A committee was appointed to have charge of the General Meetings. Satisfactory report was made on first day schools. A minute was made of the action of the different Yearly Meetings in regard to a General Council as proposed by this meeting last year.

Satisfactory report from the meeting of ministers and elders was read.

Considerable other business of local interest was introduced and disposed of. The meeting concluded about 3 o'clock p. m. The impression prevailed very generally that we had been blessed with a highly favored Yearly Meeting.

The following is also taken from the "Christian Worker." "There are now so many innovations on the good order of our religious society, that we cease longer to marvel at them. Once it would have been thought strange that approved ministers should institute an independent meeting for the three objects specified. If the meeting can determine the gifts, and the best way of exercising them, why not determine where they are to be exercised?"

MINISTERS MEETING.

During the late Yearly meeting of Indiana, the ministers held several meetings of their own, aside from the regular meetings of ministers and elders. The object of these meetings was stated to be the mutual help and encouragement of each other. The proposition for such a meeting was made in the meeting for ministers and elders by our venerable friend Thomas Arnett. Quite a number of ministers present stated that their minds had been turned in the same direction, and they had hoped that some way would open for such a meeting. It was concluded with great unanimity to hold annually, and oftener if occasion required it, "Ministers' Meetings," the objects of which shall be, 1st. To assist each other in determining of our gifts and the best way of exercising them. 2d. That the holy scriptures may be held up and appealed to by ministers as the standard, and the only standard for determining all questions of faith and doctrine. 3d. That ministers may be enabled

more completely to harmonize in their views of the fundamental doctrines of the gospel, and assist each other in a right comprehension and application of these precious truths.

A committee was appointed to take into consideration the propriety of a classification of the various gifts according to apostolic order, and report to next meeting if way should open for it, a classification of the gifts, a proper body, a tribunal to determine the character of the gifts, and any suggestions they may see fit in regard to the proper exercise of those gifts.

The meeting adjourned to meet at the time of the next Yearly Meeting.

Ever since "The Friend" was first published, the "Contributors" have exercised the right to curtail obituary notices sent for insertion in their journal, where they have thought it needful; and where communications received, have been thought unsuitable for publication, they have been destroyed, instead of returning them to their authors, unless a special request has accompanied the essay.

This information has been frequently given in our columns, and it is now repeated in consequence of inquiries made relative to both subjects.

SUMMARY OF EVENTS.

FOREIGN.—A gathering of the people of Greenwich took place at Blackheath Common on the 28th ult., to hear an address from Prime Minister Gladstone. Nearly twelve thousand persons were present. The minister was greeted with prolonged applause. In his address he discussed the chief subjects of public interest, and defended the course of the administration. The chief complaint against the government was that it attempted to do too much, but necessity existed for stating views and introducing measures on more subjects than it was possible to carry into immediate effect. Gladstone spoke in wara terms of friends with his colleagues in the government; their labors had been arduous, and the result showed that they had not been in vain. He enumerated some of the measures for the public welfare which the present government had taken, viz., the legislation for Ireland, the economy effected by the abolition of official patronage, the withdrawal of troops from Canada and New Zealand, the abolition of the purchase system in the army, &c. The House of Lords had not acted wisely in rejecting the ballot bill, which would be again brought before Parliament at the next session.

On the 26th an explosion occurred in the Leatham mine, near Newcastle, by which thirty or more men were killed.

In the six departments of France named in the recently concluded treaty, the German evacuation is proceeding quietly.

The Duke of Anhalt has been elected President of the General Council of the Department of the North.

Rosell, the Communist leader, has appealed a second time from the decision of the military court before which he was tried, and his appeal has again been rejected.

The number of Communists released by the courts is not less than 10,000, and it is expected many more will be liberated when the Pardons Commission meet on the 8th inst.

Prince Napoleon has definitely resigned his seat in the Council General of Corsica, and has gone to Italy.

Tajuba, Brazilian Ambassador to France, has received official notification of his appointment by the Emperor of Brazil, as arbitrator under the Treaty of Washington.

The French government still owes the Swiss Confederation two millions and a half of francs, expended by the latter in the maintenance of Bourlak's army.

The German Parliament has adopted a resolution approving and ratifying the treaty with France. In answer to a question, the Minister of War informed Parliament that two-thirds of the infantry reserves would soon be permitted to return home. The cavalry reserves would have to remain with their corps. The utmost relief would be granted to the volunteers for one year.

A destructive fire broke out in Darmstadt on the 24th

ult., by which the Court, Theatre and other buildings, were destroyed.

A general strike has occurred among the railroad employes at Cologne and its vicinity. One thousand men have joined in a demand for higher wages and manufacturing. The operators at Cincinnati, a large demand and a reduction of the time of labor to ten hours per day, and increased pay for work done over time. The operations of twenty factories have been suspended in consequence of this movement.

A political crisis has occurred in Austria, and the resignations of the Ministers have been accepted by the Emperor. The difficulties seem to have arisen from the claims of the Bohemian and other nationalities to a degree of autonomy which the Emperor and Von Beust think would endanger the integrity of the Empire.

A St. Petersburg dispatch of the 27th inst., says: "The order of the war office directs the entire reorganization of the Imperial army, and calls to arms the whole adult male population. The order creates a numerical strength of the field and Landwehr forces—total, 1,600,000 men, sixty-six regiments of Cossacks, not included. The order creates, also, a further military force in reserve to be employed in the event of invasion—equivalent to the mobilization of the population of the entire nation. Reinforcements are ordered to the artillery and the addition of 1000 guns to the batteries already in service.

Spain appears now to be comparatively quiet and free from agitation. In the Cities on the 28th, it was stated that the Ministry that the cost of the war in Cuba, during the past year, had been \$82,000,000, and that the colonial deficit for the year would amount to \$11,000,000. The government asked for a credit of \$20,000,000 for military purposes.

An allocation of the Pope is published, in which, while he recognizes the bishop appointed by the Italian government as possessing the requisite qualifications of their office, he solemnly repudiates Italy's guarantee, and protests against the invasion of the Holy See's prerogative. He also condemns the course of Dr. Dollinger, and such as are following his example in warring against the decision of the Holy See. The cardinals, and the Pope's death, is shortly to be held at some point in France.

The workmen's societies of Rome and Naples have refused to participate in the Congress of Workmen, which will shortly be held in Rome, on the ground that the assembly was to be a mere republican demonstration, and as such unfriendly to Italy.

The government has relaxed the vigor of its precautions against the International and partisan republican agitation, believing that their principles have no hold upon the Italian people.

Advices from Rio de Janeiro confirm the news of the final adoption in the Brazilian Parliament of the bill providing for the emancipation of slaves. The vote upon the final passage of the bill in the Senate was 44 to 33, and the announcement of the result was received by the galleries with loud cheers. A circular has been issued by the government, recommending that the law be put into immediate execution. The Beneficent order has promptly emancipated all of its 1600 slaves.

The London Mansion House fund for the relief of the Chicago sufferers, amounted on the 28th ult. to \$42,600. The Manchester society for the same purpose to \$16,000. In London, on the ground, subscriptions have been made at Liverpool and other places.

London, 10th mo. 30th.—Consols, 92½. U. S. 5-20's of 1862, 91½; of 1867, 93; ten-forties, 89½.
Liverpool.—Uplands cotton, 9½ a 9½d.; Orleans, 9½ a 9½d. Sales of the 11th, 1,049 bales. The interments in the new ST. PAUL'S *Miscellaneous*—The interments in Philadelphia last week numbered 329, including 85 deaths from Small Pox.

The corruption and extravagance of the New York city government had become so flagrant as to lead honest men of both parties to form an earnest effort to arrest the evil. A Committee of the Citizens report that they had thoroughly examined the various works for the city, and rigidly scrutinized the charges therefor. The amount charged to the cost of the new court-house building and furniture is \$8,130,000, and \$3,280,000 is charged to county contracts. The total cost of the building, when completed, could not honestly exceed \$3,000,000.

The committee further report \$3,221,000 paid for armories and drill rooms, the real value being \$202,000; for lumber \$463,000 paid; real value \$48,000; for ad-

vertising, stationery and printing, \$7,168,980 paid; the real value being \$1,500,000. Loss to the city \$19,519,500. It is announced that suits will be instituted against several parties implicated in the frauds.

Thomas Wells, the Married Walter, who was convicted of polygamy, has been sentenced to pay a fine of \$300, and be imprisoned at hard labor for three years. Daniel H. Wells, the Mayor of Salt Lake City, and two other persons, have been arrested on a charge of murder perpetrated in 1857. After hearing argument, Judge Foster took the Married Walter into custody for \$600. The Mormons appear to be troubled and depressed by these proceedings, but do not threaten forcible opposition to what they denounce as persecution. At a large meeting in the tabernacle, at which ten thousand persons were present, they were counselled to abstain from every act of violence and trust in the Divine protection. Their church, they were assured, could not be overturned. Their faith was founded on inspiration, and would endure forever.

Los Angeles, California, has been disgraced by a riot and savage attack upon the Chinese at that place. The mob appear to have been actuated solely by hatred of the Chinaman and a desire for plunder. The Chinese were robbed of all their property, and eighteen of them murdered.

The wine crop of California the present year is estimated at 8,000,000 gallons.

The U. S. Commissioner of Agriculture estimates the grain crop of the United States for the year 1869, at 1,491,412,100 bushels, consisting of 744,320,000 bushels of Indian corn, 290,146,900 of wheat, 285,334,900 of oats, 25,652,200 of barley, 22,527,900 of rye, and 17,431,100 of buckwheat.

The Markets, &c.—The following were the quotations on the 30th ult. New York.—American gold, 111½; U. S. sixes, 188½, 116½; ditto, 1898, 113½; ditto, 10-40, 5 per cents, 109½. Superfine flour, \$5.90 a \$6.50; finer brands, \$6.60 a \$10.50. No. 1 Chicago spring wheat, \$1.55; No. 2, do., \$1.52 a \$1.53; amber western, \$1.61 a \$1.64; amber State, \$1.63 a \$1.65; white Michigan, \$1.62 a \$1.76. Oats, 48 a 53 cts. Western mixed, 87 a 90 cts.; yellow, 82 cts. & 83 cts.; southern white, 85 cts. *Philadelphical*—Uplands and New Orleans cotton, 18½ a 19 cts. Superfine flour, \$5.25 a \$5.75; finer brands, \$6 a \$9. Rod wheat, \$1.55 a \$1.58; amber, \$1.70; white, \$1.63 a \$1.68. Western mixed corn, 75 a 76 cts.; yellow, 78 a 80 cts. Oats, 47 a 50 cts. Lard, 9½ a 10 cts. Clover-seed, 10 a 10½ cts. Timothy, \$3.85 per bushel. The beef cattle market was rather firm. Sales of 2,500 head choice at 6½ a 7 cts.; fairer, 5 a 6 cts. and common 3 a 4 cts. per lb. gross. Sheep sold at 5 a 5½ cts. per lb. gross, and hogs at 6 a 6½ cts. *Baltimore*—Choice white wheat, \$1.80 a \$1.83; fair to extra, \$1.60 a \$1.65. Choice white, 80 cts. & 81 cts.; yellow, \$1.50 a \$1.61. Western mixed corn, 75 cts. Oats, 43½ a 49 cts. *St. Louis*—No. 2 red wheat, \$1.48 a \$1.80; No. 3, \$1.35 a \$1.38. *Milwaukee*.—No. 1 spring wheat, \$1.24; No. 2, do., \$1.21 a \$1.22. No. 2 corn, 49 cts.

HADDONFIELD SCHOOL FOR BOYS AND GIRLS, under the care of Friends.

This School opens in session—a few scholars could be received until next board.
Terms given on application to Chas. Rhoads, 36 S. Seventh St., or to the Teacher, John Boardie, at the school.

FRIENDS' BOOK STORE.

No. 304 Arch Street, Philadelphia.
The first edition of the "Journal of William Evans" being nearly exhausted, a second edition has been published, and is now for sale at the Book Store. This edition contains the Memorial of William Evans, issued by the Yearly Meeting of Philadelphia, and has the yearly date of 1869, and is published at the same price as before, according to the binding. Twenty per cent. deduction to those purchasing to sell again.
There are on hand between twenty and thirty copies of the first edition, which will be sold at twenty per cent. below the original price.

FRIENDS BOARDING SCHOOL FOR INDIAN CHILDREN, TENNESSEE, NEW YORK.

A suitable Friend and his wife are wanted to take charge of this Institution, and manage the Farm connected with it. Application may be made to Ebenezer Worth, Marshallton, Chester Co., Pa.
Thomas Wistar, Fox Chase P. O., Philadelphia.
Samuel Morris, One P. O., do.
Joseph Scattergood, 413 Spruce Street, do.

FRIENDS' FREEDMEN'S ASSOCIATION.

Our schools in North Carolina and Virginia are about starting for the season.

For the current expenses of maintaining them, and salaries of teachers, &c., we stand pledged. The Treasurer has now only about Two Hundred dollars in hands to meet these obligations, thus showing almost the sole reliance is contributions yet to be made.

In this state of things, we earnestly request Friends who feel called upon to give to this work, to forward their contributions soon to the Friend Life and Trust Co., 111 S. Fourth St., Philadelphia. The various collections of our neighbors will be useful to acquaint Friends in their neighborhoods with the urgent need of funds to meet pressing exigencies. James E. Rhoads, President of the Executive Board.
Philip C. Garrett, Chairman of the Committee of Instruction.

Richard Cadbury, Treasurer.
Philadelphia, 10th mo. 28th, 1871.

FRIENDS' RELIEF COMMITTEE OF PHILADELPHIA. For Help of Sufferers by Northwestern Fires.

Information received from various reliable sources principally from members of our own religious Societies renders it very evident there will be, during the proaching inclement season, a great amount of suffering arising from the dreadful fire which has destroyed the various villages of our north-western coast including many small villages and settlements, as well as the city of Chicago. Friends in the West who are near to this scene of suffering, and those in all parts of the land, will no doubt endeavor to render such as may be in their power. A committee of Friends has also been organized in Philadelphia, who will receive and forward contributions, taking due care they will be properly applied.

The following Friends are members of this committee, and donations may be forwarded to any of them, or directly to SAMUEL B. SHIPLEY, Treasurer at the office of the Friend Life and Trust Co., Philadelphia.
W. MADDOCK C. COPE, 1312 Filbert St.
CHARLES EVANS, M. D., 702 Race St.
WILLIAM KINSEY, 469 Marshall St.
HENRY HAINES, 417 Walnut St.
ELLIOTT P. MORRIS, 4782 Main St., Germantown.

NOTICE.

A Stated Meeting of the Female Society of Philadelphia for the Relief and Employment of the Poor will be held at the House of Industry, No. 112 N. Seventh St., 11th mo. 4th, at 3 o'clock.
JULIANA RANDOLPH, Co.

THE MORAL ALMANAC, FOR 1872.

Is now on sale at Friends' Book Store, No. 304 Arch St. Being printed on superior paper, and the Calo from a new font of type, the attention of Friends particularly called to this publication. A number copies are in printed covers.
Price, 10 cts. per dozen or 4 cts. a piece.
In covers, 50 cts. per dozen or 5 cts.

FRIENDS' ASYLUM FOR THE INSANE.

Year Frankford, (Twenty-third Ward), Philadelphia.
Physician and Superintendent—JOSUAH H. WINGSTON, M. D.
Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

DIED, on the 10th of 5th mo. 1871, at his residence in West Pikefield Township, Chester Co., Pa., in 96th year of his age, GEORGE MARRS, a member Uchlan Monthly and Particular Meeting.

On the 23d of 6th mo. 1871, WILLIAM COPE, the 96th year of his age, died at the Friends' Monthly Meeting, Columbus Co., Ohio.

On the 7th of 10th mo. 1871; at his residence Plainfield, N. J., ZACHARIAH WEBSTER, in the year of his age, an esteemed member of Plainfield parative and Railway and Plainfield Monthly Meetings. For many years he was much engaged in public business, and possessed in large measure the influence and esteem of the community in which he lived. The consoling assurance is felt that his end was peaceful, in this city, 8th of 10th month, 1871, EST THOMPSON, a member of Salem Monthly Meeting, in the 79th year of her age.

WILLIAM H. PILE, PRINTER, No. 422 Walnut Street.

THE FRIEND.

A RELIGIOUS AND LITERARY JOURNAL.

DL. XLV.

SEVENTH-DAY, ELEVENTH MONTH 11, 1871.

NO. 12.

PUBLISHED WEEKLY.

Two Dollars per annum, if paid in advance. Two Dollars and fifty cents, if not paid in advance.

Subscriptions and Payments received by

JOHN S. STOKES,

116 NORTH FOURTH STREET, UP STAIRS,
PHILADELPHIA.

When paid quarterly in advance, five cents.

Reading Room of the British Museum.

For the entrance of the great reading room of the British Museum is appropriately the bust of the late Panizzi—the founder he may be called. The huge domed ceiling behind him, his work and monument, is the wonders of Europe, now reaching considerable number.

The entrance to this hall is beset with difficulties. At the gate of the museum, on a day when the reading room only is open, the policemen and warders challenge the visitor with "pardon, sir?" Allowed to pass, he crosses the open space, ascends the steps, enters under the portico and finds himself at the great, crowded room with more police and warders. Any of indecision, and he is sure to be challenged, "Reader?" If he crosses boldly, and asks for the glass door, where there is another with a list, he is stopped once more, made to show his passport, unless he has one called at the theatres "a face admittance."

Down the long passage he goes, gives his coat, stick, umbrella, parcels; passes through glass swinging doors, past other policemen, and finds himself in the monstrous hall dedicated to learning, and, as some would say, to idleness.

It would be hard to give an idea of the *coup d'œil*; for there is literally nothing to see. It has the look nearly of a cathedral, all the comfortable, furnished air of a large library. Coloring for the sides is furnished by rows of the books themselves, which bound the walls to a height of some forty feet, and are reached by two light galleries. In the centre of the room is a round tier, within which sit the officials, and they communicate with the library outery by a long avenue shut in by glass screens. Beside this counter is another, which holds a enormous catalogue, reaching to some hundred volumes; and from this second counter radiate the desks for the readers. Nothing more comfortable or convenient can be desired. You have a choice in seats even; smooth mahogany or softly cushioned; sliding smoothly on castors. In the pocket back of the desk is a little recess for ink, pens, steel and quill; and on each side a small table. One of these pulls out a writing desk, which comes well forward, and

swings in any direction, or at any height; the other forms a ledge on which books can be piled up and be out of the way. A blotting pad, paper knife, and convenient pegs under the table for putting away hats, &c., complete the conveniences. There are over five hundred of these, each having a number and letter. There are, besides, a number of what might be called "research" tables—small, low, flat, and broad, which an antiquarian may have all to himself; and the lid of which lifting up, he finds a convenient repository, where he can store away all his papers, notes, and books until he returns the next day. Some of the more retired of the long benches are reserved "for ladies only;" but they do not seem very much to care for such seclusion.

Around the room, and within easy reach, is a sort of free library where every one can help himself. This, as will be imagined, consists of books of general reference, and is very judiciously chosen. It comprises dictionaries of all languages, the best, newest; encyclopedias of every conceivable sort; long lists of the old magazines, like the "Gentleman's," "Annual Register," &c.; ambitious collections of universal science and knowledge, such as the "Pantheon Littéraire," and "Didore's Encyclopedia;" histories of towns and counties in profusion, and the best and most favorite text books in the respective classes of law, theology, medicine, mathematics, physiology, &c. The only weak place is the class of English *belles lettres* and biography, which is ordered after a very random and arbitrary fashion, comprising such poor books as "Beattie's Life of Campbell," but not "Moore's Life of Sheridan," having "Twiss's Life of Eldon," and no "Life of Sterne," and being without Mrs. Oliphant's remarkable "Life of Irving." In fact, it would be hard to say on what principle the choice is made.

Having chosen a seat—and if you come late in the day you have to take a long, long walk seeking one—go to the catalogue, for your book. And here we may pause to survey this wonderful catalogue, a library of folios in itself. Every volume is stoutly bound in solid blue calf, with its lower edges faced with zinc, to save wear and tear from the violent shoving in of the volumes to their places. On every page are pasted about a dozen neatly lithographed entries, and between the pages are guards, so as to allow fresh leaves to be put in, as the catalogue increases. As the guards are filled up, the volume is taken and rebound with fresh guards. Nothing can be fuller than the arrangements for this catalogue, as it even refers you for a biographical notice of a well known man to some of those little meagre accounts prefixed to collections of their poems, and to biographical notices and reviews. It also, to a great extent, helps the student to the real names of those who have written under assumed ones. This is the new catalogue, but there is an old one partly in print and partly in man-

uscript, and both must be consulted if you wish to make your search exhaustive. Periodical publications make a department in themselves under the letter P, filling some twenty folio volumes, to which there is an index, also in many folio volumes. London has nearly one folio to itself, Great Britain and France each several. Every entry is complete, title in full, date, place of publication, and a press mark, such as $\frac{645 \times 10}{3}$ which is to be copied

on a little form containing the rules to be observed, with blanks for name of book, date, &c.

Having given in the ticket, the reader may return to his place, certain of having to wait at least half an hour, and he may amuse himself by watching the smooth running carts laden with volumes, which arrive every moment, and the attendants who are seen hurrying along through the glass screen, each with his pile of books, with their labels fluttering. Considering that some of these have to walk three quarters of a mile along passages and up steep stairs to fetch some remote book, and that often the forms are imperfectly filled, the delay is not surprising. A more intelligent, willing and obliging class of men cannot be conceived, always ready to volunteer assistance, even outside their special duty. It is pleasant to see how they exert themselves for novices, or for certain old veterans, filling up their forms for them.

The readers are a very singular and motley class. And here it is that some reform is wanting. A great deal of the time and trouble of the staff is taken up with supplying the wants of young boys and girls, and general idlers, who come to read novels and poetry, and take up the places of others who have real business. It cannot be supposed that the nation meant to pay for books and attendants, merely to wait on this useless class. A reform in the way of classification would be useful, the putting these drones in a department of their own, and with one attendant only to wait on them all. Every book ought to be procured within ten minutes, and by a system of speaking tubes and small lifts, the matter could be much simplified. The Museum would run fewer risks from the abstraction of books, by limiting the number of readers. There are many traditions in the Museum of those robbers, some of whom were always suspected, but to whom the matter never could be brought home: while there was a "gentleman" who was not suspected, but was at last discovered. A Museum book is fortunately very unmarketable, it is so stamped all over; and if a volume had two hundred illustrations, every one would bear this mark. To all libraries come people with a mania for cutting out prints, and at this one, on a stand made purposely, are exhibited two maimed and defaced books, thirty or forty leaves torn out, with an inscription explaining how they were placed there as a warning, &c. This exhibition is a little undignified, and it

seems quite purposeless. The evil doers would only chuckle at it, while the well conducted have no need of such reminders.—*Scientific American.*

For "The Friend."

From the Letters and Papers of John Barclay.

(Continued from page 68.)

"1815, January.—Business, in its proper sphere, is useful and beneficial, as well as absolutely necessary; but the abuse of it, or an excess in it, is pernicious in many points of view. I cannot approve, in very many respects, of the intense degree of application and attention, which seems often to be required of those that are in business.

"There is one danger to which the man of business is particularly exposed, and the more alarming, because it is concealed,—I mean the danger of gaining a worldly spirit, and of losing that tenderness of conscience, that love of religion, which is the ground of all virtuous conduct. The person who is engaged in worldly affairs, whether the sphere of his engagements be large or small, should be most anxiously attentive to his eternal interests, that they also may be kept in a flourishing, profitable condition: if this be not the case, the saying of W. Penn is true in regard to such an one, 'He that loses by getting, had better lose than gain.' He should also be very jealous of his scanty leisure, that he may not omit to employ some of it in his *daily duties* of his Maker, and in the *constant cultivation* of that *holy frame of mind*, which, it is the slow though *sure tendency of the spirit of the world*, silently to counteract. For I own I tremble at the very idea of any man's mainly pursuing his perishable interests, when perhaps in one short moment he is gone. How inconceivably terrible and exquisite must be that man's anguish, whilst on the very brink of going he knows not whither, to think that he has given up an eternity of bliss, for the empty grasp of that which is not.

"1815, January 15th.—The following reflection is taken from a 'weekly report,' and was penned just previous to my attendance by way of initiation into business at my father's banking-house:—

"What an eventful period is this, what an epoch in my life! When I look back upon the past, when I review the calm and sequestered hours which have been so graciously granted me, and which I have so happily enjoyed, I cannot help concluding, that the same Almighty hand, which has hitherto upheld me, will be 'stretched out still.' And when I cast my eye forward to the future, to that dark and dreary scene, that chaos of troubles and perplexities, which human life for the most part discloses, I remember with consolation the expressions of the apostle, 'We know that if our earthly house of this tabernacle were dissolved, we have a building of God, an house not made with hands, eternal in the heavens.' The time that has already elapsed, seems to be a season of preparation mercifully allotted to me, in order to qualify me for the part which I am henceforth to act; and those principles, which I have stored, must now with assiduity be put in practice. The greatest discretion employed at this first setting out in life, will not be sufficient to direct and keep me in the right path, unless accompanied with distrust in myself, and a corresponding confidence in Divine assistance.

"1815, January 29th.—The very great

benefit which may be (and which I trust is) derived from the system of self-examination that I have adopted, is more and more apparent to me every week. Every week have I to improve, to exhort, to encourage, and to recommend; as it were to call in my accounts, and to ascertain the real state of my heart; whilst every week—yes, every day, gives me abundant cause for contrition and abasement. I am thus led to a more intimate knowledge of the state of my internal affairs, and of the filth which still lurks within: whilst I am rendered less confident in my own unassisted efforts, and more desirous to be *strengthened in obedience.*"

Same date.—"Though I feel myself but a novice in serious subjects, yet further experience gives me fresh ardor and eagerness to seek after and attain to that knowledge, which alone 'maketh wise unto salvation.' The more I study religion, and the more time and attention I devote to it, the more I feel persuaded of its unspeakable importance. There is no pursuit in life, whether of a philosophical, literary, commercial, or worldly nature, which can be compared with the pursuit of religion, in respect to the peace and joy, the profit and the pleasure, which it yields to the willing student. The immediate good effects of it, are only exceeded by its ultimate consequences. In prosperity the true Christian is taught to be watchful and humble, and to consider that 'the Lord hath given, and the Lord can 'take away.' In adversity, how happy he is, if he do but remember, that 'this also is the Lord's doing.' In all that he does, his design is ever to do good,—his motive the glory of his Maker."

Same date.—"O! Lord, thou hast been pleased to bruise me with a sense of my own iniquity; thou hast in some degree opened to me my own heart: deliver me in thine own time and way, from under the burden of my transgressions: still continue to show me thy loving kindness, and to direct me onward in the path that leads to salvation. I know not, and it is better, O Lord! that I know not, in what condition or situation to-morrow's light may find me; nor can I see before me: yet I pray thee, if I do forget or forsake thee, O! forsake me not utterly, for thy mercy's sake.

"1815, February 5th.—O! may I not neglect or delay to take such effectual measures, as may certainly lead me to the attainment of a firm belief in the salvation brought about by the Saviour of men. May I not be satisfied with an historical acquaintance with these things, nor be content with what others may say, write, bear witness of, or believe in, respecting a Redeemer; but may I be encouraged, like Thomas the Apostle, to see and feel for myself; and may I make an availing use of every opportunity, every appointed means to gain the excellency of the knowledge of Christ Jesus, and him crucified,—that intimate knowledge and inward experience, compared with which, Paul counted all things else but as 'loss and dross.' Surely, such as are 'kept by the power of God through faith unto salvation,' are *none but those*, who have submitted themselves to the government and dominion of Christ by his Spirit in their hearts; and these truly know Him to be their Redeemer."

(To be continued.)

The enthusiasm of the present age becomes the common sense of the next.—*Coleridge.*

From The "British Friend."

Shipwreck of Mary Prior.

Having emigrated with my family to the United States in the spring of 1819, we to lodgings during the summer months at Villa Green, a rural spot about twenty miles from Philadelphia. This place had little to recommend it but its quietude and retirement, and the opportunity it afforded me to make excursions in different directions with the view of obtaining a permanent settlement. Our residence here was rendered the more agreeable by finding many members of the Society located in the neighborhood, to whose kindly we were much indebted.

During our stay we usually attended Chester Meeting, some three miles from our dwelling; and many a hot and fatiguing way to it we had in that sultry climate. But every kind friend who lived near us would often take up some of the female portion of our family in his homely carriage, which was a great relief to them.

One day as we were proceeding on foot to meeting, I was tempted to mount the fence by the road-side to gather some cherries which hung in great abundance within reach. The cherry-trees in this vicinity are very numerous, flourishing wherever they have been accidentally sown, and growing some as large as our elm-trees in England. Much of the fruit is never gathered, but is left to the birds, or to fall to the ground for swine. We had been given to understand that it was a common practice for travellers who wanted cherries to break off as large a branch as they were able, to save time, to eat them off the bough as they journeyed. While thus mounted on the fence engaged securing some of the tempting fruit, I started at perceiving a middle-aged man making towards me, whom I at once took to be the owner of the trees. For a moment I felt something like compunction at the situation in which I was discovered, began to make an apology, saying, I hope was not trespassing on his property. "No," said the man, "you are not trespassing but the fruit does not belong to me. You welcome enough, I daresay." And having recognized us at once as English people, added, "I am from the old country as well you. My wife and I came over many years ago." Perceiving that I was a Friend, added, "Did you ever hear of Mrs. Prior? told him that I had heard of her." "We said he," we took our passage in the ship as Mrs. Prior. We suffered shipwreck and lost all our property. My name is P. I live at that house yonder. If you will on us we shall be glad to see you."

The first suitable opportunity we had, wife and I called at the humble dwelling. The husband was absent, but his wife, who doubt was expecting our visit, gave us a dial welcome. She began almost immediately to give us an account of their disastrous voyage to America; during the recital of which it did not appear that the lapse of two years had in the least degree blunted the vividness of her recollections of the sufferings and perils which had befallen them in crossing the Atlantic.

Since my return to England, I have grieved often that I did not at once put poor woman's statement into writing; as I had heard it; but at that time I had no expectation of ever seeing my native coun-

or of being called upon to narrate the events of Mary Prior's shipwreck, all of which I supposed her relations and friends had been made fully acquainted with myself.

The woman stated that when she and her husband had made up their minds to emigrate, they were in possession of property to the amount of £500, the whole of which they laid out in the purchase of goods suitable, as they expected, for the American market, and which they expected to turn to a profitable account on their arrival. They accordingly embarked their property on board a vessel with other passengers, among whom was Mary Prior. They had made but little provision on their passage to America when they sprang a leak, which obliged the crew to endeavor to repair to the pumps to endeavor to keep her clear. But notwithstanding all their labor to effect this object, the leakage continually increased, and soon became so great that many on board began to be seriously distressed, and entertained great apprehensions of their ultimate safety. Relays of sailors were obliged to be constantly at the pumps; the fatigue of which was so great, apparently to so little purpose, that they were exceedingly discouraged, and adverse to labor, believing it was useless for them to endeavor to keep the ship afloat, as the leak increased upon them.

Under these appalling circumstances Mary Prior often came on deck and urged the men to relax their efforts to save their lives. Her earnest persuasions were so successful that the crew did continue their exertions, though laboring under such great and increasing discouragements. Our informant added, that Mary Prior was frequently engaged in the presence of the crew and passengers to ascend the Mast High that it might please God to preserve their lives. "O!" she exclaimed, "Mrs. Prior was a wonderful woman for her age!"

She continued thus, day after day, for a week, without any improvement in their prospects, during which time Mary Prior persisted in urging and encouraging the sailors to make renewed efforts for their common safety. Notwithstanding all she could do, however, their circumstances grew worse and worse, for the water in the hold still kept increasing, and even made its way into the hold. The sailors were so overcome with fatigue, in consequence of their exhausting exertions night and day at the pumps, that it was with great difficulty they could be persuaded to continue their exertions, for all expectation of their rescue seemed, with most of them, to have died away.

It was in this condition, struggling, as it were, at once against fatigue and despair, that Mary Prior, early one morning, came on deck, and, with a cheerful countenance, announced that she had good news for the company, for their deliverance was near at hand. She told them that she had been favored with a dream, or vision, in which she had been assured that a vessel that they could take them all off in safety from their perishing ship. Yet she told the men they must still use every exertion to keep the ship afloat, till the time of their deliverance should arrive.

Mary Prior made this extraordinary announcement in the most positive manner, but with any hesitation, and apparently with

the full persuasion that the truth of her message would soon be verified. She told the people also that even the name of the vessel that would rescue them had been made known to her, but that she had forgotten it. It was, however, she said, the same as the maiden name of one of the married women on board. There were several married women among the passengers, who were all summoned to tell their maiden names. "After many had spoken," said our informant, "I told them mine was Archibald, on which Mary Prior immediately said, 'That is the name of the ship which will save us.'"

Many an anxious look was now cast around for the friendly vessel, but for many hours none could be seen. At length, however, a ship was descried in the distant horizon. They eagerly watched her movements. She was steering their own course, and soon made towards them on perceiving their signals of distress.

When the ship came within speaking distance, and her captain found that they were in a sinking condition, he ordered out his boats, and with great promptitude proceeded to convey the passengers on board his own vessel, and happily succeeded in rescuing them all; but such was the emergency of the case, and so imminent their danger, that no attempt could be made to save any part of the cargo.

While they were being transhipped with all haste, and Mary Prior was about to be conveyed to the other vessel, she suddenly said she must go back to her berth for something she had left there, and which she must have. She was urged not to go down after it, as the water was then knee-deep in the cabin, and there was no time to lose. She, however, persisted, and, actually wading through the water, obtained the object of her search. This, we supposed, might probably be her certificates.

On their inquiring the name of the vessel which had thus providentially been sent to their rescue, they were told she was "the *Archibald!*"

In detailing to us this remarkable account of their shipwreck and deliverance, the woman did not appear to be influenced by any desire to exaggerate, or in any way to misrepresent the simple facts of the case. On the contrary, there was an appearance of truthfulness and sincerity, and an earnestness of manner, that left no doubt on our minds that we ought to give entire credit to her narrative. And, moreover, her mind seemed to be so imbued with a sense of Mary Prior's extraordinary religious endowments, that I think she would not have dared to speak of her in any other character than she did. Having listened with no small degree of interest to the poor woman's recital of the circumstances attendant on her emigration, we were about to leave, when she produced a few trinkets and a silver teaspoon—precious relics to her, as they were all that they were able to save from the wreck.

We soon after left Village Green, and removed to Wilmington, State of Delaware. Here, among many other valuable and kind Friends, we became acquainted with Deborah Brighthurst. One day reference was made to Mary Prior and to the circumstances above related, when she told us that she, with a number of other persons, was on the quay at Philadelphia when the vessel arrived which brought Mary Prior and her fellow-passengers; and that as soon as Mary Prior landed

she knelt down on the ground and gave thanks to their Almighty Preserver who had so signally delivered them, and brought them in safety to their intended port.

Since the foregoing narrative was written, the memoir of Rebecca Jones has been published. It contains an account of the shipwreck of Mary Prior, with several particulars not contained in this relation, but makes no reference to some of the remarkable circumstances which I have recorded. There is nothing contradictory in the two accounts, except in one particular, which induces me to refer to the memoir. It there states that Mary Prior was "the only female passenger on board." This, on the face of it, is scarcely credible, as her friends in England would hardly have allowed her to embark on board the vessel under such circumstances. Mary Prior was possibly the only female passenger in the cabin, but it is highly probable that there were several in the steerage, of whom the poor woman who related the foregoing narrative was one.

The statement in the memoir omits to mention the name of the vessel that received the sinking crew. However, having recently lent my narrative to Ann Alexander of Ipswich, she has returned it to me, with a copy of a contemporary paragraph in an American newspaper which has afforded me much satisfaction, as it confirms the statement as to the name of the vessel that brought the shipwrecked sufferers to land. "On Wednesday evening arrived at this port the schooner *Archibald*—Macey—twenty days from Halifax. On the 3d instant, lat. 37°, long. 69°, fell in with the ship *Fame*—Captain Perry—from London to New York; then in a sinking state, with five feet water in the hold. Captain Macey took from the wreck Captain P., his crew and passengers. Shortly after she fell in with a vessel bound for New York, on board of which he sent Captain Perry and his crew, and brought here twenty passengers, chiefly mechanics, artists, and their families, who, by this unfortunate event, have lost all with which they could have supported themselves, in a strange country, until they could get employment."

The paragraph goes on to relate the particulars of the disastrous passage, in full corroboration of the foregoing narrative.

In connection with the subject of Mary Prior's shipwreck, I may add that I have been informed, on good authority, that some time after she embarked for America, great uneasiness prevailed among her friends at the non-arrival of the expected intelligence of her having reached her destination; but that, in a private religious meeting which a few Friends had together, our late valued friend Samuel Alexander, of Needham, expressed in testimony his belief that Mary Prior was then safely landed in America. Soon afterwards, however, an apparently well-founded report was circulated that the ship in which she had taken her passage had foundered at sea, and it was supposed all on board had been lost. This, though but a vague rumor, gave Samuel Alexander much distress, from a fear that he had been under a delusion when he had so recently expressed his full belief to the contrary. He was, however, the very next day relieved by an authentic account having arrived, fully confirming the statement he believed himself warranted in making so shortly before.

Colchester, 5th month, 1851.

Practical Experimental Religion.

Selected.

In judging of piety, there is no substitute for a holy life. We are Christ's disciples if we do whatsoever he commands. We are the servants of the wicked one if we do the works of the flesh. We may boast of discoveries, of raptures, and ecstasies, but all in vain if a consistent life be not the result. So that many who say they know the time and place of their conversion are unquestionably deceived.

All religious knowledge which is unfelt and inoperative puffs up the mind, and hardens the heart. It is better to have the workings of gracious affections than to be able to define them, or to speak ever so learnedly respecting them.

It is often doubted whether the present age is remarkable for depth of religious feeling. In many cases ministers preach a *low* experience. The consequence is a painful laxity in religious practice. Among many professors there is a manifest disinclination to (speak) on vital subjects in religion. This is a great evil. Although hypocrites may babble on such topics, yet Christians should not thereby be deterred from diligently seeking to discover and command the highest manner of holy living. A minister of this generation said that he had received many hundreds of printed sermons, sent by his brethren, and that among them all he remembered but one on the subject of experimental religion—but one practical religious communication.

True religion must either be very low, or entirely wanting, in that heart who extends not his idea and treating of it beyond the doctrines and forms of religion. Doctrinal discussions, treatises on the history of the Bible, on branches of scripture morals, and on church government, are numerous. But rarely do we find able men turning their attention to the work of God in the soul. The tendency of this age is to become vague and superficial. Many real Christians have made but low attainments, and are too little dissatisfied with their present state. There is no way of preserving men from falling into error respecting the nature of true religion, but by bringing them to feel its power. The head may be strengthened till the heart is starved. Indeed, infidelity itself will be sure to gain a footing in a community where vital godliness is not experienced.

The friends of true religion ought carefully to guard against the abuses of religious experience, avoiding all boasting, learning wisely to discriminate between the genuine and the spurious, between effects produced by divine truth on the one hand, and by the nervous temperament on the other, and being especially careful not to rely on past attainments, which do not produce present good fruit.

Such are the views of one of our own time, though not of our Society, some of which it may be profitable for us to consider, as presenting a mirror to many in high profession and stations amongst us, who seem disposed to substitute for the cross of quiet, humble, reverential waiting, in the holy silence before the Lord (moving only at his command, and in his fear,) the activity of the creature, in sensational, doctrinal, man-pleasing ministry, without the heavenly savor.

ETERNITY.

Selected.

Eternity, eternity,
How long art thou, eternity!
Yet hastest on toward thee our life,
E'en as the war-steed to the strife,
The messenger toward home doth go,
Or ship to shore, or bolt from bow.

Eternity, eternity,
How long art thou, eternity!
As in a globe, so smooth and round,
Beginning ne'er nor end are found,
Eternity, nor more can we
Beginning find, or end, in thee.

Eternity, eternity,
How long art thou, eternity!
Thou art a ring of awful mould;
"Forever" is thy centre called,
And "Never" thy circumference wide;
For unto thee no end can tide.

Eternity, eternity,
How long art thou, eternity!
And if a little bird bore forth
One single sand-corn from the earth,
And took in thousand years but one,
Ere thou wert past, the world were gone!

Eternity, eternity,
How long art thou, eternity!
In thee, if every thousandth year,
An eye should drop one little tear,
To hold the water thence would grow,
Nor heaven nor earth were wide enough.

Eternity, eternity,
How long art thou, eternity?
Hear, man! So long as God shall reign,
So long continue to be his again;
So long last heaven and joy also.
Oh, lengthened joy! oh, lengthened woe!

SEA-WEED.

Not always unimpeded can I pray,
Nor, pivoting saint, unique intercession claim;
Too closely clings the burden of the day,
And all the night and mine that I pay,
But swells my debt and deepens my self-blame.

Shall I less patience have than Thou, who know
That Thou revisitest all who wait for thee,
Nor only fillst the measure of deeps below,
But dost refresh with punctual overflow,
The rifts where unguarded mosses be?

The drooping sea-weed hears, in night abyssed,
Far and more far the wave's receding shocks,
Nor doubts, for all the darkness and the mist,
That the pale shepherdess will keep her trust,
And shoreward lead again her foam-flecked flocks.

For the same wave that rims the Carib sea
With momentary braid of pearl and gold,
Goes hurrying thence to gladden with its roar
Lois weeds bound fast on rocks of Labrador,
By love divine on one sweet errand rolled.

And, though Thy healing waves far withdraw,
I, too, can wait and feed on hope of thee,
And of the dear recurrence of Thy law,
Sure that the parting grace that morning saw
Abides its time to come in search of me.

J. E. Lovell.

Soap Plants.—Many plants in different countries furnish useful substitutes for soap to the natives, when there are no conveniences or materials for manufacturing ordinary soap. Examples of these are the Soapworts (*Sapindus*), so called from furnishing, either in the pulp of the fruit or in the root or bark, a vegetable principle called saponine. Thus the Hindus use the pulp of the fruit of *Sapindus* *detergens* for washing linen. The capsula of another species, when bruised, forms suds if agitated in hot water; and the natives of India use this as a soap; for washing the hair, silk, &c. The aril which surrounds the seed of a South American species is used as a soap.

The fresh bark of the root of *Mouina p. stachia*, called "yalhoi," pounded and moulded into balls, is used by the Peruvians in place of soap. The *Canadian Naturalist*, states that the bruised leaves of the European *Sapona officinalis* forms a lather which much resembles that of soap, and is similarly useful in moving grease spots. The bark of *Quill saponaria* of Central America, answers same purpose, and is used as a detergent wool-dyers. It has been even imported lately into France, Belgium, &c., and sold in shops as a cheap substitute for soap. A vegetable soap was prepared some years ago Jamaica from the leaves of the American Aloe, which was found as detergent as Castile soap for washing linen, and had the super quality of mixing and forming a lather with salt water as well as fresh. In Peru the leaves of the *Maquey agave* are used instead of soap. The clothes are wetted, and then beaten with a leaf which has been crushed; a thick white froth is produced, and after rinsing the clothes are quite clean. The pulpy matter contained in the hard kernel of a tree called locally "Joboncillo" is also used there for the same purpose. On being mixed with water it produces a white froth. In Brazil soap is made from the ashes of the bassena or broom plant (*S. lanceolata*), which abounds with alkali. There are also some barks and pods of native plants used for soaps in China. The soap native California (*Phalangium pomeridianum*) is stated by Edwin Bryant to be exceedingly useful. The bulbous root, which is the saponaceous portion, resembles the onion, but possesses quality of cleansing linen, equal to any soap manufactured. From a paper read before the Boston Society of Natural History appears that this soap plant grows all over California. It is used to wash with in parts of the country, and by those who know its virtues it is preferred to the best of soap. The method of using it is merely to strip the husk, dip the clothes into the water, rub the bulb on them. It makes a thick lather and smells not unlike borax soap. At Nicholas, one of the Cape Verde Islands, they make a soap from the oil of the *Jatropha curcas* seeds and the ashes of the papaw tree. The oil and ashes are mixed in an iron heated over a fire, and stirred until properly blended. When cool, it is rolled up into about the size of a six-poung shot, looks much like our mottled soap, and produces very good lather.

For "The Friend"

The Ways of Zion Mourna.

While not doubting that there are not a left in our Society who mourn over the delations that abound, and whose earnest prayers at times are that the Lord will again to Zion, again build up her waste places, and store what has been carried captive, there at the same time, great need that all the warm and negligent most especially, should feel the responsibilities of a life given for serving our Creator according to His for filling up our respective stewardships, serving Him in newness of life, for we great end the Saviour also died. That as in the camp of Dan formerly, there should be a stir of spiritual life felt and manifested unto that individual growth and redemption which is in Christ Jesus. There is a danger in these easy-going times, when we and fulness, and the temptations to se

once much abound, of not keeping sufficiently alive to the great duty of the day, working out the soul's salvation with and trembling before the Lord. Great effort of forgetting that which is written for earning: "As I live, saith the Lord, every shall bow to me, and every tongue shall confess to God." And that "every one of us give account of himself to God." Great effort of taking up with a rest short of that in our Heavenly Father hath prepared for his people, and craving ease and smoothness for our pathway here, cause ourselves forever separated in the great end, from spirits of the just made perfect.

Could that the too indifferent and lukewarm amongst us, might be aroused to the living realities of our evidently lapsed condition; to the sorrow-stirring truth that the places greatly mourn because so few attend to the solemn feasts; to the fact that emanant that are left of the captivity, as aforetime, are in great affliction and woe; and that the wall of Jerusalem also broken down, and the gates thereof lamentable extent burned with fire. That with the zeal of a Nehemiah, circumscribed only by the restraining power and of the Lord's Holy Spirit, such may see need the need of weeping, and mourning, fasting, and praying before the God of men, as he did, or like the watchmen set on the walls formerly, which, as is written, "I will never hold their peace day or night." Making mention of the Lord, shall give no rest, till he establish, and till he make them a praise in the earth. Thus would prophecy be fulfilled, "A great company return." "They shall come with weeping, and with supplications will I lead them." "I would we become more and more living witnesses of the Truth as it is in its great Lord! Thus also become epistles known of all men! Thus be enabled to prepare bodies a living sacrifice, holy, acceptable unto God as our reasonable service! And as is recorded of the early disciples, "I did, not only our speech but our countenances manifest and bewray us that we had with Jesus.

is further represented in the book of Nehemiah as a command from the Most High Lord. "If ye transgress, I will scatter you out among the nations; but if ye turn unto me, and keep my commandments, and do them, though there were of you cast out unto the most part of the heavens, yet will I return them from thence, and will bring them to the place that I have chosen to set my name there." If there be any among us who would be made to feel at times that they have transgressed against the Lord, and have not turned to Him; that they are too much settled on their lees in a religious sense; that they do not enough drink of the Saviour's bitter cup of suffering; nor are truly grieved for the sins of Joseph; that they have grown warm like the church of Laodicea which neither cold nor hot; may the query of the prophet have place: "Is it time for you, to dwell in your ceiled houses, and this is the Lord's house) lie waste? Now, therefore, thus saith the Lord of hosts, consider (set your heart on) your ways." "Go up to the mountain, (turn inward to the omnipresent God of Israel,) and bring wood, and build the altar; and I will take pleasure in it, and I will be glorified saith the Lord."

Our all-wise Lawgiver has declared, "If ye abide in me, and my words abide in you, ye shall ask what ye will, and it shall be done unto you. Herein is my Father glorified, that ye bear much fruit; so shall ye be my disciples." A precept of extensive application, to which especial heed should be given in the present day! For if any will choose their own ways, even of doing good, and abide not in the Vine of life, without whom we can do nothing, the judgment of the Eternal may be meted, "They (thy enemies) shall make a spoil of thy riches, and make a prey of thy merchandise; and they shall break down thy walls, and destroy thy pleasant houses; so that that which we have shall be blasted." But as diligence with faithfulness becomes the watchword; as we are not jostled or turned aside by the wind, the earthquake or the fire, however arresting and imposing to the outward senses, but engaged to let obedience keep pace with knowledge to the still small voice of the Lord inwardly revealed; if we turn unto Him as manifested in His inward and spiritual appearance in the soul, and keep His commandments and do them; if, in a word, we keep true to our principles as bequeathed to us by our forefathers in precept, and maintain them in practice, then there can be no doubt that this branch of our Society will again be gathered to the place of the Lord's name; again take root downward and bear fruit upward to the praise and glory of the Redeemer's grace; and the language may become applicable, "Whereas thou hast been forsaken and hated, so that no man went through thee, I will make thee an eternal excellency, a joy of many generations."

Our grand enemy, ever wary and artful, pertinaciously plies us on our weakest side. It is alike indifferent to him whether we be hurried on beyond the passive submission and obedience becoming the blood-bought followers of a meek, and lowly, and crucified Saviour, or whether we be negligent and slothful in the application of the talents committed, so as to bring no increase to the honor of the great Giver. We may be as unmindful of our "high calling"—that of following Christ Jesus in the watchful, fear and trembling way He would have us to go—by insensibly sliding into a state of apathy or lifeless indifference to religion, and into a relaxation of its restraints and self-denial, and thus becoming more formal professors, as in having a zeal for God that is not according to knowledge; or that like Jehu of old, who, though he took no heed to walk in the law of the God of Israel, with all his heart, could nevertheless say, "Come with me, and see my zeal for the Lord." So true it is that a zeal which has not its foundation and abiding in the humility and contrition of soul our sovereign Lord calls for, is of but little worth. If we lose spiritual activity of mind and heart from any cause, and are thus brought into bondage to the god of this world, it will matter but little of what our fetters are constituted, whether of this or that. Of how important to us is the fact, that if we lack the vitality of union and communion with Christ, nothing can make up for the grand deficiency. How necessary too to remember what we are, and what we are called to; as well as most especially to keep in mind, "Who made, who marred, and who has ransomed man," that we may apply our hearts unto wisdom. We have been bought with a price; and hence are loudly called to

glorify God "in our bodies and in our spirits" which are God's. While for every degree of knowledge and strength communicated by the Great Husbandman in the day of His grace and mercy, corresponding increase will have to be accounted for in the fast approaching period of final retribution.

Then, in the language of the Apostle, "Let us not sleep as do others; but let us watch and be sober." It is thus continued "watch" (Mark xiii. 37) that constitutes the substance of the religion we profess. To watch against the presentations of the enemy, who on either hand waits to beguile and to destroy, is the only safe vantage ground of the Christian; and hence the injunction to Timothy, applicable to all time, "Watch thou in all things, endure afflictions, do the work of an evangelist," &c. May this watch "in all things," be duly kept up! As much against slothfulness and lukewarmness, which lead to the decay of a vigorous spiritual life, as on the other hand against any will service, or sacrifices to the Lord of that which He does not call for. While this may lead into a straight and narrow path wherein the heaven-bound pilgrim will have much need to draw about him "to an helmet, the hope of salvation," and to "watch unto prayer with all perseverance," yet the promise of the Ever-present, "My grace is sufficient for thee," will make up for all; and an humble dependence upon this, with the strength that is made perfect in weakness, will be an odor of a sweet smell, a sacrifice acceptable, well-pleasing to God; who then will supply all the need of these, "according to his riches in glory by Christ Jesus."

May then the self-denying, cross-bearing religion of the Redeemer, which makes contrite, humbles as in the dust, and which draws forth the submissive appeal, "Now, O Lord, thou art our Father: we are the clay, and thou our Potter: and we are all the work of thy hand," be more and more the daily practical religion of our heart and lives. A religion of which we enjoy the foretaste here, but whose fullness will be through all eternity. A religion which can make happy, as in the case of Lazarus, though in the depths of poverty, and destitute of worldly good. A religion not it is true, to be obtained without trial, and cost, and contest, but without which we can have no happiness hereafter, nor be truly happy here. "What things were gain to me," saith the Apostle, "those I counted loss for Christ. Yea, doubtless, and I count all things but loss for the excellency of the knowledge of Christ Jesus my Lord: for whom I have suffered the loss of all things, and do count them but dung, that I may win Christ." A religion that leads into, and yet brings through "great tribulations," but whose eternally glorious end will make up for, and inconceivably compensate for all. A religion which while it demands the heart and affections a whole burnt-offering and willing sacrifice to Him who gave his precious life for us, will as we are watchful, faithful, and true, and engaged above all things to have the wedding garment of righteousness wrought out, finally lead, through matchless love and mercy, unto living fountains of waters; where God shall wipe away all tears from the eyes.

I know no religion which destroys courtesy, civility and kindness, which, rightly understood, are great indications of true men, if not of good Christians.—*Wm. Penn.*

Temperature in Mines.—There is some interesting information on the maximum temperature of air which is compatible with the healthful exercise of human labor, in the report of the commissioners appointed to inquire into the several matters relating to coal in the United Kingdom, just issued. The committee who undertook to determine the maximum depth to which it would be possible to work coal found this question very difficult to decide. Evidence was given of extraordinary temperatures endured in the stoke holes of steamers and in the places where glass blowers work. In some of these cases labor has been carried on without serious detriment to health where the thermometer has indicated 180 degrees Fahrenheit. In these instances, however, the thermometer was chiefly acted on by radiant heat, and, therefore, did not truly indicate the actual temperature of the air. In an experiment made under the direction of the committee it was found that a thermometer suspended in a stoke hole, and exposed to the radiation from the boilers, indicated a temperature of 105 degrees; while another thermometer in the same position, but carefully screened from the radiant heat, stood at only 78 degrees. It is important also to observe that the men who work in stoke holes and glass houses have ready access to the external air, and avail themselves of numerous intervals in their labor to cool themselves. One of the medical witnesses, who had spent a great part of his life in tropical climates, states that he had experienced a temperature of 125 degrees Fahrenheit in the shade, and that this great heat was rendered endurable by the dryness of the atmosphere; on the other hand, he had felt a damp atmosphere almost intolerable at the comparatively low temperature of 86 degrees. The committee had information of mining work being executed in a Cornish mine where the air was heated by a hot spring to a temperature alleged to amount to 117 degrees, and was also by the same cause saturated with moisture. Dr. Sanderson was deputed to visit this mine and make an investigation. He found the highest temperature to exist at the extremity of an excavation forming a short cul de sac, where a stream of water entered at a temperature of 114½ degrees. At a distance of a yard from the end of this cul de sac the thermometer indicated a temperature of 103 degrees; but at a distance of only ten feet there was access to air, where the thermometer stood at 81 degrees. According to other evidence the temperature of the air occasionally reached 123 degrees. The miners remained in their workings six hours out of the twenty-four. Four men were employed at a time, of whom two were always at rest in the cool air and the other two were not always at work. The total duration of each man's work was less than three hours in the twenty-four. No miner remained more than fifteen minutes in the heat at one time. The condition of each miner on retreating into cool air is described as one of complete exhaustion; but by allowing cool water to pour over his body the distress and exhaustion quickly passed off. Dr. Sanderson came to the conclusion that the occupation in question was not necessarily inconsistent with the enjoyment of vigorous health; but he found there were many men who after trying the work were compelled to desist on account of the distress and exhaustion which was pro-

duced. It is Dr. Sanderson's opinion that labor is not practicable in moist air of a temperature equal to that of the blood, namely, ninety-eight degrees, excepting for very short intervals; and this conclusion is in harmony with the other medical evidence. The question of maximum temperature under which work could be carried on in a coal mine hinges in a great measure on the hygroscopic condition of the air. The depth at which the temperature of the air would, under present conditions, become equal to the heat of the blood would be about 3,420 feet. Beyond this point the considerations affecting increase of depth and temperature become so speculative that the committee felt it necessary to leave the question in uncertainty; but, looking to possible expedients which the future may elicit for reducing the temperature, they considered it might fairly be assumed that a depth of at least 4,000 feet might be reached.—*Pall Mall Gazette.*

Selected for "The Friend."

The Lord can raise up his servants, and give them power to preach his word, and all the opposing powers of darkness, and the secret resistance that others may cherish, who feel coldness and indifference towards them. True ministers of the gospel have nothing in view, but to comply with the Lord's will, that they may be found clear in the day of account. The spirit of opposition to such is felt at times in meetings, and may be permitted to close up the way for gospel service; but they who indulge in it will bring flatness over themselves, and have to suffer for their wrong opposition to the Lord's children and servants. How different is the state of meetings, where brethren and sisters draw near to one another in heart and spirit, like holding up each other's hands, travelling together for the arising of Divine life, and rejoicing when the Lord opens the way for the current of true baptizing ministry to flow freely. Elders are appointed to watch over the ministry, to guard and counsel ministers, when needed; if they have left the gift, or said anything not according to sound doctrine; but this is not all their duty. They have as much need as any others, to watch over themselves, that they may know what spirit rules and actuates them; and they are to give themselves up to sympathize with the ministers, and to share in bearing the burdens which they are brought under; by which they may be preserved from judging in their own will and temper, and may be made instrumental to help them, and by a harmonious labor and travail of soul, assist in bringing to the birth the concerns which ministers are brought under. Hereby they are fellow helpers in the Lord; and when ministers are raised up by their Divine Master in his authority, then a harmonious exercise is again known in the preaching of the gospel, the great Name is exalted, and the baptizing power goes over the meeting.

Ministers and elders thus fulfil their respective services, and contribute to each other's growth and establishment in the blessed truth. The one preaching what the Holy Spirit opens to them, and the other keeping close to them in spirit, to aid and steady them in their work, that they may not give out, nor deviate from the line of service appointed them by the Great Minister of the Sanctuary.—*Wm. Evans' Journal.*

The Blood of Christ.

"Not long after this there was another great meeting of professors, where George Fox came, who hearing them discourse about the blood of Christ, he cried out among them: 'Do ye not see the blood of Christ? Ye may see it in your hearts; to sprinkle your hearts and consciences from dead works, to see the living God.' This was a doctrine which startled these professors, which would have the blood of Christ only without them, thinking that it was to be felt inwardly."

Are there not many within the Society this day, who "discourse" much about the blood of Christ as it was shed outwardly, seem, from the tenor of their teaching, know as little about its being sprinkled the heart, inwardly and spiritually, as those professors who were so "startled" by George Fox's preaching? No spring can I above its source.

One Hundred and Sixty Millions of Need a Month.—Sewing needles are almost wholly of English manufacture, but a few German goods under English brands reach the American market. In England, the manufacture has been systematized and simplified to such a degree that English labor always has a monopoly of the needle trade. A needle passes through 120 operations, and a chain can control the machinery and turn the eye of 4,000 needles per hour.

The introduction of sewing machines restricts the increase in the sale of sewing needles, though they seem to hold to a steady increase, in the United States, of about three per cent. The statistics published by Commissioner Young's Bureau, in Washington, do not specify the importation of specimens of small wares, all goods going under general classification of the product to originate in. Hence the actual consumption of needles is something difficult to determine. The agents of the two leading makers in Boston, report the aggregate sold in Boston, New York, and Philadelphia, as about a hundred and sixty million of needles a month, running from 75 cents to \$2 dollar per thousand. The sales chiefly are on numbers from 5 to 10, while seven eighths of these orders take the numbers of 7 and 8. Knitting and darning needles, that twenty-five years ago were sold in amount over double the sales of sewing needles, have dwindled to a very insignificant item of stock. They hardly be said to sell now at one twentieth their former amounts. Crochet needles have a very large sale, and have taken the place made vacant in stocks by the disuse of darning and knitting needles.

Spending Half an Hour Alone.—A pious, venerable father had a vain and profigate son; often had he reasoned and expostulated with him, mingling tenderness and tears with remonstrance; but all was ineffectual. The company and vicious habits rendered the happy youth deaf to instructions. At length a fatal disorder seized his aged parent, calling his son to him, entreated him with dying breath, that he would grant him small favor, the promise of which would give great comfort. It was this—that his son would retire to his chamber half an hour every day for some months after his decease.

described no particular subject to employ his thoughts, but left that to himself.

He requested so simple and easy, urged by natural affection from the couch of death, not to be denied. The youth pledged his soul for the fulfillment of his promise; and he became an orphan, punctually performed it. At first, he was not disposed to improve the minutes of solitude, but in time his reflections arose in his mind; the Lord was withdrawn; his conscience awoke; he repented him for having slighted a parent, and done so much for his welfare; it recalled the impression of his dying scene; it pointed him to a supreme Cause, a Judge, and a solemn Euse. Remanded, under the operation of Divine grace, and what advice could not do, and a real permanent change took place. He quitted his companions and reformed his conduct; and his pity filled up the rest of his days, stamped sincerely on his repentance.

Uses of Gun Cotton.—The London Dispensary says: The important points in connection with the gun cotton of the present day may be thus briefly summed up. The material, in the first instance, is neither wool nor cotton, previous to conversion, but simply a quality of cotton waste, which, after being treated in acid, is reduced to paper pulp, in this finely-divided state, washed and cleaned by water. The pulp is then pressed into any desired figure or shape, and the cakes thus produced not only present the same in a highly compressed condition, but also in a remarkably handy form. As gun cotton is pressed while in a wet and, consequently, harmless state, no danger can occur in the whole of the manufacture from first to last, if we except possible accident from tampering with the acids—an event of but slight importance even when it might occur—and in this respect, therefore, gun cotton is much safer than gun powder. The dry gun-cotton cakes, however, may be ignited in two ways, either by simple inflammation, or by detonation. If a few cakes of gun cotton, in wooden cases containing the same, are set on fire, they will simply blaze away, slowly and violently, it is true, but, at last, without absolute explosion, and only when the material is strongly compressed or heated to an exceedingly high temperature, that its full force is developed.

When, however, instead of being set on fire by a flame, it is ignited by means of a charge of fulminate of mercury, one of the detonating compounds known to chemists, then gun cotton becomes another thing altogether, and explodes with the terrible force of a charge of fulminate of mercury.

This last important property of gun cotton, which was discovered about three years ago by E. O. Brown, of the chemical establishment, Woolwich, where indeed all the experimental investigation have been conducted on, adds greatly to the value of the substance, which under ordinary circumstances is comparatively inert and harmless until brought in contact with fulminate powder. The difference between burning and detonating gun cotton will be at once understood if we say that a half-pound cake may be held in a plate at arm's length during inflammation, while the action of the same cake fired with a fulminate charge would

be to fracture a one-inch slab of iron upon which it rests.

For the past five years several tons of the material have been manufactured by the British government, and employed to great advantage in mining and blasting operations, and especially for the demolition of submarine rocks and sunken wrecks, whose removal could certainly not have been so efficiently and completely effected in any other manner, and when we say that all these years no mishap has ever occurred in its manipulation, it must be admitted that there is something to be urged against hastily dismissing it in a panic, as a material too dangerous for practical use.

Confession of Count Struensee.—From the written and published confessions of many converted infidels, it would be easy to show that the most violent opposers of the Bible are generally those who are most ignorant of its contents. An illustration of this remark may be drawn from the history of Count Struensee, prime minister of Denmark, under Christian VII., whose downfall produced the tragical revolution in the Danish Cabinet of 1772.

This distinguished individual had long been an avowed and zealous infidel, when he was suddenly hurled from the summit of power to the horror and gloom of a dungeon. During the four months he spent in prison he became thoroughly convinced of the truth of Christianity, and, as it appeared, a true penitent. In the memorable confession he wrote before he went to the scaffold, he says, "My former unbelief and aversion to religion, were neither founded upon an accurate inquiry into its truth, nor upon a critical examination of the doubts raised in relation to it. They arose, as is usual in such cases, from a very general and superficial knowledge of religion on one side, and much inclination to disobey its precepts on the other, together with a readiness to entertain every objection which I discovered against it." And in another place, after having examined the evidences of Christianity, he declares, "I never imagined that Christianity was founded on such strong evidences, or that they would have convinced me so. After a calm examination I have found them to be unexceptionable, and none, if they only take the proper time, and are not against the trouble of meditating, can ever examine the subject without being convinced. Everything is naturally and well connected, and recommends itself to a mind given to reflection."

I have a sense upon my spirit beyond utterance, of the potent workings of the enemy in the generations of mankind to accomplish his end, viz. that after the Lord God Almighty hath appeared in any age, in the free dispensings of his love, and the breakings forth of his power, and the making bare of his arm, in order to restore man into covenant with God, then hath the enemy appeared with all his power, subtly, gradually and hiddenly, to undermine and frustrate the work of God.

His great end has been, by different shares to draw into a lessening of the estimation, in the visited people, of the power, appearance and manifestation of God in their day, and to draw out the mind by his transformings, into an esteem of the manifestation that hath been, or a strange affectation of what may or is to

appear; leading the mind out of a due regard to the present manifestation, which alone works the eternal welfare of the creature. This was their ease to whom it was said, "Oh! that you knew, even in this your day, the things that belong to your peace." This I have learned of the Lord, and therefore leave it both to Friends, to whom it may come in this age, and to God's people in the following generations of the world.—*Charles Marshall.*

Professor Gould, who has gone to superintend a new observatory, founded by the government of the Argentine Republic, at Cordova, in his remarks about the climate, gives a few particulars which exemplify its extreme dryness. "A bowl of water," he says, "left uncovered in the morning is dry at night; ink vanishes from the inkstand, and becomes thick almost by magic; the bodies of animals, left exposed, dry up instead of decomposing; and neither active exercise, nor exposure to the sun's rays, causes perceptible perspiration."

THE FRIEND.

ELEVENTH MONTH 11, 1871.

In the last number of "The Friend," we published an article in reference to the series of "Clastic Models," prepared by Dr. Auzoux of Paris, intended to assist the student in the acquisition of correct knowledge in different branches of Physiology, Anatomy and Botany. The Friend who furnished the contribution, is well qualified to speak understandingly of this branch of object teaching; and we think every one who has had opportunity to examine into the beauty, accuracy and adaptability of these models, must have been impressed with their great value to both teachers and scholars, and be convinced they have not been too highly commended by our correspondent, and that it is very desirable they—or some of them—should be introduced into Friends' schools generally.

An effort is now being made by some Friends interested in the improvement of education, to obtain a selection of the more important of these clastic models, for use at Westtown Boarding School, where the advantages they are fitted to confer, may be participated in by the children of Friends of Philadelphia Yearly Meeting generally. For this purpose it is proposed to raise one thousand dollars; which sum is required to purchase a suitable variety of models illustrative of animal and vegetable physiology and anatomy.

Friends disposed to contribute to this desirable object are requested to send their subscriptions to either Charles J. Allen, 304 Arch St., Joseph Walton, 413 Walnut St., or George J. Scattergood, 413 Spruce St.

SUMMARY OF EVENTS.

FOREIGN.—Queen Victoria has issued a proclamation announcing the further prorogation of Parliament to the 27th of Twelfth month.

The London Athenæum points out that the excess of the number of women over the number of men in England and Wales is rapidly increasing. The recent preliminary report of the census shows that the excess of females in 1871 is 623,302. In 1851 the excess of women over men was 365,159, and in 1801 it was 313,706.

It is announced that the French and English govern-

ments have compromised their differences relating to the commercial treaty, so that the former has withdrawn its notice of abrogation. Matters relating to all affairs, however, proposed, which make it less favorable to England.

The Gazette publishes the new regulations made to carry out the provisions of the bill for the abolition of the purchase system in the army. The main feature of the regulation is the right to demand which all applicants are required to do before they can receive a military commission. Early changes in the British Ministry are contemplated by the elevation of some of the present Ministers to the Peerage.

The Communist (Quessel), convicted of firing buildings in Paris, has been sentenced to death. Thiers has been strongly urged on behalf of Henri Rochefort, but declines to interfere with the course of the law. The trial of those members of the Commune who are charged with being directly concerned in the murder of Generals Leconte and Thomas, during the 3d day of the insurrection in Paris, commenced on the 31st inst. The disarming of the National Guard throughout France is nearly completed.

The latest intelligence from Algeria states that the insurrection has been suppressed, and that the natives were generally resuming their agricultural labors.

The German Parliament has passed the war fund bill. During the debate prior to its passage, Bismarck urged upon the members the necessity, in the present aspect of European affairs, of strengthening the country by first empowering the Emperor to act promptly and fully under any adverse or threatening circumstances which might arise.

The workmen's committee of Berlin have summoned a congress of workmen, to meet in that city on the 19th inst. The object of the meeting, as set forth in the call of the committee, is to organize a general strike for a reduction of the daily term of labor to nine hours, and for a general increase of wages.

The Emperor has issued a decree in the Bohemian Diet, emphasizing the supremacy of the fundamental laws of the Austrian empire, and pointing out their superiority over any mere local statutes or customs. The Diet is warned against any attempt to nullify or disregard them, and Bohemia is exhorted to send her usual representative to the Reichsrath, and ascertain that a failure or refusal to do this will involve the gravest political consequences.

A new Ministry for Austria is in process of formation, and it is stated that the Diets of Bohemia, Moravia, Carniola, Upper Austria and Galicia will be dissolved as soon as they have been summoned to meet. It is to be observed that the policy which caused the retirement of the Hohenzollern ministry.

The Italian government contemplates the fortification of the Alpine passes, at a cost of seven million francs.

The Convention for the sale of the Dutch settlements in Sumatra and on the coast of Guinea, to Great Britain, has been signed by the representatives of the Dutch and British governments.

Further arrests of conspirators have been made at Barcelona, and additional evidence of their guilt brought to light. Stores, arms, bombs and other articles belonging to the conspirators, were discovered. The International Society is at the bottom of the plot, and the men arrested are, for the most part, members of that organization.

A Constantine dispatch says, that the Papey evan has left the capital, having failed in his efforts to obtain guarantees in regard to the status of Catholic subjects in Turkey. The report refers to an entry into any discussion of the condition of its Christian subjects.

The emigration returns of Liverpool for the last month show 14,263 departures for the United States.

The subscriptions at the Mansion House, London, for the aid of the Chicago sufferers, amounted to £47,800 on the 6th inst. Other descriptions in other places continue to come in freely.

The British expedition for the observation of the total eclipse of the sun on the 11th of next month, has arrived at Malta.

The draft of the new coinage bill for Germany, has been approved by the Federal Council, and will be submitted to the Parliament.

A Paris dispatch of the 6th says: Means have been found for putting an end to the difficulties between the German army of occupation and the citizens near whom they are quartered, and it is believed they will be prevented hereafter.

UNITED STATES.—No. 6th.—Consols, 92 $\frac{1}{2}$. U. S. 5-20's of 1862, 91 $\frac{1}{2}$; of 1867, 93 $\frac{1}{2}$; ten-forties, 5 per cents, 89 $\frac{1}{2}$. Liverpool.—Uplands cotton, 9 $\frac{1}{2}$ d.; Orleans, 9 $\frac{1}{2}$ d. UNITED STATES.—The Public Debt on the 31st inst., after deducting the balance in the Treasury, was \$2,

251,713,418, having been reduced 88,950,482 during the Tenth month. The decrease of debt since 3d mo. 1st, 1867, has been \$29,459,811. The balance in the Treasury consisted of \$99,654,959 in coin, and \$10,285,800 in currency.

Miscellaneous.—The interments in Philadelphia last week numbered 325, including 95 deaths from Small Pox. The mean temperature of the Tenth month, by the Fothergill's thermometer, was 57.5 deg., the highest during the month 78 deg., and the lowest 37 deg. Amount of rain, 3.28 inches. The average of the mean temperature of the Tenth month for the past 32 years, is stated to have been 54.70 degrees; the highest mean during that entire period was in 1738, 64 deg.; and the lowest 32.27.

While severe droughts have prevailed over large districts in the West, the rain fall at New Orleans has been abundant. It is stated that no less than ten and six-tenths inches of rain fell during the 24 hours ending at 6 P. M., on the 3d inst.

A statement furnished by the Chief of Bureau of Statistics, of the number of vessels and tonnage of the United States, on the 3d of Sixth mo. last, as compared with the corresponding date of 1870, shows a gain of 76 sailing vessels, 153 steam vessels, and 965 unrigged, being a total of 1189, with a tonnage of 105,292.

The number of vessels 1,439, and tonnage transported over the Union Pacific Railway the present year.

The whaling business is declining in consequence of the discovery of petroleum and the manufacture of coal oil. In 1868 there were 328 vessels engaged in whaling, in 1869 there were 311, in 1870, 293, and in 1871 there are but 250 vessels.

An approximate measurement in Chicago shows sixty miles of streets laid waste in the great fire. Some of the Insurance Companies of that city, with assets amounting to \$3,000,000, have liabilities from losses reaching an aggregate of \$20,000,000. The Attorney General of the State has announced that he will sue the New York creditors of the burnt-out firms are very generally satisfied with the settlements they are making.

The Markets, &c.—The following were the quotations on the 6th inst. New York.—American gold, 111 $\frac{1}{2}$; do. 1870, 1871, 115 $\frac{1}{2}$; ditto, 10-10, 5 cents, 109 $\frac{1}{2}$; Superfine flour, \$5.85 a \$6.25; finer brands, \$6.50 a \$10.50. No. 1 Chicago spring wheat, \$1.51; No. 2 do., \$1.47 a \$1.49; red western, \$1.97 a \$1.60; amber, \$1.83 a \$1.64; white Michigan, \$1.96 a \$1.70. Western barley, 74 a 82 cts; do. 1870, 81 a 81.62. No. 1 white corn, 76 a 77 cts; yellow, 80 cts; new southern white, 85 cts. Philadelphia.—Cotton, 18 $\frac{1}{2}$ a 19 $\frac{1}{2}$ cts. for uplands and New Orleans.—Cuba sugar, \$1 cts. Superfine flour, \$5.25 a 5.75; finer brands, \$6 a 89. Red wheat, \$1.55 a \$1.60; amber, \$1.61 a \$1.62; white, \$1.65. Rye, 97 cts. Western mixed corn, 71 a 73 cts; old yellow, 71 a 75 cts. Oats, 48 a 51 cts. Clover-seed, 10 a 10 $\frac{1}{2}$ cts. Timothy, \$3 a \$3.25. The arrivals and sales of beef cattle at the Avenue Drove-yard reached about 2,000 head. Good cattle were in demand, choice selling at 7 a 7 $\frac{1}{2}$ cts.; fair to good, 5 a 6 $\frac{1}{2}$ cts. and common a 4 $\frac{1}{2}$ cts. Hogs, 39 a 40 cts. Sheep sold at 5 to 7 cts. lb. Live stock and hogs at 34 cts. Live, 9 a 9 $\frac{1}{2}$ cts. Receipts 5,666 head. Chicago.—No. 1 spring wheat, \$1.23; No. 2, \$1.19; No. 3, \$1.12. No. 2 mixed corn, 4 cts. No. 2 oats, 31 $\frac{1}{2}$ cts. Lard, 81 cts. St. Louis.—Flour, 55.25 a 87.50. No. 2 red wheat, \$1.30 a \$1.51; No. 3 do., \$1.40; No. 4 do., \$1.32 a \$1.35. Mixed corn, 42 a 43 cts. Hogs, 32 a 34 cts. Live, 9 a 9 $\frac{1}{2}$ cts. Baltimore.—Amber wheat, \$1.70 a \$1.80; red do., \$1.50 a \$1.65. White corn, 70 a 71 cts.; yellow, 68 a 70 cts. Western mixed, 73 a 74 cts. Oats, 46 a 50 cts.

FRIENDS' FREEDMEN'S ASSOCIATION.

Our schools in North Carolina and Virginia are about starting for the season. For the current expenses of maintaining them, board and salaries of teachers, &c., we stand pledged. The Treasurer has now only about Two Hundred dollars in his hands to meet these obligations, thus showing that although the sole reliance is contributed to us to make.

In this state of things, we earnestly request any Friends who feel called upon to give to this worthy cause, to forward their contributions soon to the Provident Life and Trust Co., 111 S. Fourth St., Philadelphia, and the various collecting Committees to be careful to accompany Friends in their neighborhoods with the urgent need of funds to meet pressing engagements. James E. Rhoads, President of the Executive Board, Philip C. Garrett, Chairman of the Committee on Instruction. Richard Cadbury, Treasurer.

RECEIPTS.

Received from Richard Hall, England, U. S. vol. 43, and for John Sadler, 10s., vol. 44, for Al. Altham, 25s., to No. 52, vol. 45, for Thomas Williams, 10s., for William Walker, Jane Priestman, Robert Bign, Elizabeth Williams, William Adair, George M. Grody, Nancy Ritson, Robert Jackson, Richard B. Brobank, William Dodgson, Martin Lidbetter, Josiah H. Joseph, Hall, William Wigham and John Little, 1 each, vol. 45, and for Sarah S. Moss, and Thom Jackson, 10s. each, to No. 31, vol. 46.

FRIENDS' BOOK STORE.

No. 304 Arch Street, Philadelphia. The first edition of the "Journal of William Evans being newly exhausted, a second edition has been published, and is now for sale at the Book Store. This edition contains the Memorial of William Evans, issued by the Yearly Meeting of Philadelphia, and has a yearly date at the top of each page.

Prices the same as before, according to the binding Twenty per cent. deduction to those purchasing to retail.

There are on hand between twenty and thirty cop of the first edition, which will be sold at twenty cent. below the original price.

FRIENDS' RELIEF COMMITTEE OF PHILADELPHIA FOR HELP OF SUFFERERS BY NORTHERN FROST.

Information received from various reliable sources principally from members of our own religious sect renders it very evident there will be, during the approaching inclement season, a great amount of suffering arising from the dreadful fires which have devastated a very large portion of our north-western count including many small villages and settlements, as well as the city of Chicago. Friends in the West who are nearer to this scene of suffering, and those in all parts of the land, will no doubt endeavor to render such aid as may be in their power. A committee of Friends has also been organized in Philadelphia, who will receive and forward contributions, taking due care that they will be properly applied.

The following Friends are members of this committee, and donations may be forwarded to any one of them, or directly to SAMUEL R. SHIPLEY, Trust Co., at the office of the Provident Life and Trust Co., PHILADELPHIA, C. COPE, 1312 Filbert St. CHAS. WILLIAMS, 100 N. 2d St. RAE ST. WILLIAM KINSEY, 469 Marshall St. HENRY HAISES, 417 Walnut St. ELLISTON P. MORRIS, 4872 Main St., Germantown.

THE MORAL ALMANAC, FOR 1872.

Is now on sale at Friends' Book Store, No. 304 Arch St. Being printed on superior paper, and the Calcutta from a new font of type, the attention of Friends is particularly called to this publication. A number of copies are in printed covers.

Price, 40 cts. per dozen or 4 cts. a-piece. In covers, 45 cts. per dozen or 5 cts.

FRIENDS' BOARDING SCHOOL FOR INDIA CHILDREN, TUNNESSA, NEW YORK.

A suitable Friend and his wife are wanted to charge of this institution, and manage the Farm needed with it. Application may be made to Ebenezer Worth, Marshalltown, Chester Co., Pennsylvania, or to Fox Chase P. O., Philadelphia Samuel Lewis, 100 N. 2d St., Philadelphia, or Joseph Scattergood, 413 Spruce Street, do.

FRIENDS' ASYLUM FOR THE INSANE

Near Frankford, (Twenty-third Ward), Philadelphia Physician and Superintendent—JOSUAH H. WATKINSON, M. D. Applications for the Admission of Patients are made to the Superintendent, or to any of the Board Managers.

DIED, at her residence in Germantown, Philadelphia on the 16th of Eighth month last, EDITH EDGE, an esteemed member and elder of Frankford Monthly Meeting, aged 76 years. She was a member of the church for a long life, her sound judgment, her consistent, exemplary deportment and religious experience, qualify her for much usefulness in the Society of which she was a valued member. "Thou shalt come to thy grave in a full age, like as a shock of corn cometh in season."

WILLIAM H. PILE, PRINTER, No. 422 Walnut Street.

THE FRIEND.

A RELIGIOUS AND LITERARY JOURNAL.

SEVENTH-DAY, ELEVENTH MONTH 18, 1871.

NO. 13.

PUBLISHED WEEKLY.

Two Dollars per annum, if paid in advance. Two Dollars and fifty cents, if not paid in advance.

Subscriptions and Payments received by

JOHN S. STOKES,

No. 116 NORTH FOURTH STREET, UP STAIRS,
PHILADELPHIA.

Price, when paid quarterly in advance, five cents.

From The "British Friend."

A Word in Season.

an address to the Society of Friends, in 1839, by the late George Richardson, of Newcastle, he says—

It appears to me that in perusing the history of the lives of many of our worthy predecessors, it will be seen that in the course of their Christian progress they became very devoted followers of the Lord Jesus Christ, and that they accepted his precepts and those of his apostles more simply, and with less endeavor to reason away their plain, obvious precepts, than was common with other religious sects; and following the guidance of the Spirit of Truth in singleness of heart, they favored with more clear views of the truth and spirituality of the gospel dispensation than was the case with many of those eminent and useful men who had been precursors in the work of reformation; and though it appears from the history of those men that some of these excellent men saw the need of a reformation in various respects, and possibly from their peculiar circumstances, they were not able fully to effect, and it was afterwards laid upon Friends, they apprehended, to carry out in practice. They observed that much had crept into the minds of Christians during the long dark ages of ignorance, superstition, and apostasy, and that much of corrupt or heathen origin, and which had yet had been permitted to remain, and which they believed themselves called to come out in their own corruptions, and to bear a faithful testimony against them.

Thus it was that they were brought to see that he who commanded his disciples to love their enemies did thereby virtually bid them to avenge themselves, or be engaged in wars and fightings. That when he said 'Swear not at all' he forbade all oaths; and that he who commanded them to give the gospel freely, seeing they had received it, he prohibited them from preaching for hire, or using their ministry as a trade. In the same manner they believed that when our Lord rebuked the scribes and Pharisees for seeking and receiving honor one of another, instead of desiring that honor which cometh from God only, and points out that they were prevented from believing in and receiving his gospel, he leaves an

awful warning to his followers in all succeeding ages. They saw that the spirit of this world exhibited itself amongst many high professors in a variety of customs which were completely at variance with the tenor of our Lord's precepts, and with the pure spirit of genuine Christianity. Hence they could no longer give flattering titles unto men merely because they occupied certain stations in civil or religious society, such as 'reverend,' 'right reverend,' 'father in God,' &c., to such as were appointed bishops or ministers of religion, or those of 'gracious,' or 'noble,' or 'excellent,' to such as were in exalted civil stations, unless they believed that such appellations were in accordance with truth, and strictly applicable to the persons in question; nor even then if they saw it would partake of the character of adulation or flattery. In reference to the terms 'master' or 'mistress' with the customary abbreviations of these terms when used to persons who do not actually stand in those relations to us, they conceived that their use is prohibited by our Lord Jesus Christ in Mat. xxiii. 5-12, when, speaking of the scribes and Pharisees, he says, 'All their works they do to be seen of men; they make broad their phylacteries, and enlarge the borders of their garments; they love the uppermost rooms at feasts, and the chief seats in the synagogues, and greetings in the markets, and to be called of men Rabbi, Rabbi; but be not ye called Rabbi, for one is our Master, even Christ, and all ye are brethren.'

The early Friends believed that our Lord's prohibition of the terms in question is directed against their *complimentary* use, both on account of their violation of truth when thus used, and also of the practice originating in an unprofitable love of distinction on the one hand, and of their character of flattery on the other. Therefore, in a tender, conscientious desire to obey our Lord's precepts according to their real meaning and import, and in accordance with that lowliness, meekness, and humility which his Spirit, precepts, and example lead into, they felt that they could not gratify the disposition of such as seek to receive honor one of another, and seek not the honor which cometh from God only, without endangering their own peace of mind. They therefore refrained from the practice in question, though thereby they subjected themselves to much scorn and reproach.

The Apostle Paul, addressing the early believers, says: 'Let no corrupt communication proceed out of your mouth, but that which is good, to the use of edifying. Wherefore, putting away lying, speak every man truth with his neighbor.' Again, 'I beseech you that ye walk worthy of the vocation wherewith ye are called.' He desires for them 'That speaking the truth in love they may grow up into him in all things, which is the head, even Christ.' (Eph. iv. 1-25.) And to the Colossians he says, 'Lie not one to another, seeing ye have put off the old man with

his deeds, and have put on the new man, which is renewed in knowledge, after the image of him that created him,' (ch. iii. 9, 10.)

Is it not evident that the usages in question are a *corruption of language*, that they do not edify, do not build up in newness of life, that they are inconsistent with our high and holy vocation, with Christian integrity and uprightness, with the purity and simplicity of the gospel, for this plain and obvious reason, amongst others, that they flatter the vain mind, and are inconsistent with truth?

Let me entreat my dear friends and fellow-members to consider, that whilst letting fall and tramping upon, as many do, these precious testimonies to gospel purity which, as a religious Society, we are called to bear, against many of the corruptions which have so lamentably spread amongst the professors of the Christian name, whether it does not increase the danger of descending further in this downward course than many of them have hitherto done. For after having adopted the customary forms of address, 'Mr.' 'Mrs.' &c., will they not be expected to go a step further, and conclude with the usual subscription of, 'Your most obedient humble servant,' &c.? Are they prepared to go on in such a course of falsehood and dissimulation, 'after the traditions of men, after the rudiments of the world, and not after Christ'? Will they pollute their minds with writing so palpable an untruth as this, in many cases, would most undoubtedly be?

Perhaps some may be ready to query what they are to do when they are not acquainted with the names of the persons whom they have to address. I would answer, be willing to appear among your fellow-mortals as fools for Christ's sake—confess plainly that you dare not disobey his holy precepts—that you cannot have solid peace of mind in sacrificing moral integrity, even in the smallest matters, to any circumstances of worldly expediency—that you must speak the truth in simplicity and uprightness of heart, let the cost be what it may—and rest assured that those who, from a principle of true love to God, are thus conscientiously concerned to manifest their allegiance to him may, under every difficulty, derive encouragement from the remembrance of that declaration of our blessed Redeemer, 'Whosoever therefore shall confess me before men, him will I confess also before my Father which is in heaven.' (Mat. x. 32.)

The ancient prophet foretold that, in the latter days, God would restore unto his people a pure language, that they may call upon the name of the Lord, to serve him with one consent. (Zep. iii. 9.) Therefore let none plead conventional usage for the terms in question, for this is a common apology for various falsehoods. We are called to holiness of life and purity of conversation, and to come out of the spirit of the world which lieth in wickedness.

"It is sometimes remarked that Friends act inconsistently in permitting themselves to be addressed by persons not of our Society, by the customary titles of 'Mr.', 'Mrs.', &c. Possibly this branch of the subject has hitherto claimed too little attention. I apprehend that the general feeling is, that we have no right to impose our views, relative to such subjects, upon those with whom we may have intercourse, beyond their own convictions. It is quite obvious that we cannot control the conduct of others. We teach them by example what we conceive propriety of speech and an adherence to truth require.

"The reformation of that which has been amiss is our obvious duty; let none plead that these are little things. We are exhorted to pray that the will of God may be done on earth as it is in heaven, and surely it becomes our duty to labor to promote its being so without reserve. Our Lord laid great stress on purity and simplicity of language, declaring that 'for every idle word that men shall speak they must give an account in the day of judgment.' All untruths are either idle words, or worse. And how impressive is the declaration, 'By thy words thou shalt be justified, and by thy words thou shalt be condemned.' (Matt. xii. 37.) We are commanded to yield our members servants to righteousness. The tongue is said to be an unruly member, a world of iniquity, full of deadly poison. But, when the heart is cleansed, the tongue may be tamed, and brought into subjection by divine power, and become an instrument in promoting the glory of God. 'As he who hath called you is holy, so be ye holy in all manner of conversation.' (1 Pet. i. 15.)

"My heart yearns over my brethren and sisters in religious profession, earnestly desiring that they may beware of apostasy, beware of going back into the corruptions and follies of this vain world, from which many have been measurably redeemed: beware of again becoming entangled with the grievous yoke of bondage to evil customs and fashions, out of which, I verily believe, the Lord himself led our worthy predecessors, and continues to lead the faithful amongst us down to the present day. My own mind was in early life deeply penetrated with the truths set forth in this paper; being brought under strong conviction, until I was made willing to take up the cross in these respects, and to yield implicit obedience to the manifestations of the divine will. Therefore, whereunto any of us may have attained in the narrow path which leads to eternal life, let us, in true humility and abaseness of self, endeavor to walk by the same rule; let us all mind the same thing—pressing onward toward the mark for the prize of our high calling of God in Christ Jesus, and let us not rest satisfied with any other rule, but the will of God, in what way soever he may be pleased to manifest it unto us.

"Persuaded I am, notwithstanding the terrible shaking which, as a society, we have had to endure, when, at times, it may have appeared to some as though the very foundations were about to be removed, that, even now, we may be comforted in remembering the promise, which was spoken by the Lord's prophet to his people formerly, 'I will leave in the midst of thee an afflicted and poor people, and they shall trust in the name of the Lord. The remnant of Israel shall not do

iniquity, nor speak lies; neither shall a deceitful tongue be found in their mouth; for they shall feed, and lie down, and none shall make them afraid.' (Zeph. iii. 12, 13.)"

Seal Fishing.

A correspondent of the *Evening Post*, writing from St. John's, N. F., gives the following interesting particulars:

On these shores, 140,000 persons are maintained by catching, curing, and exporting seals and codfish.

It is a stirring time here when preparations for the seal fishery commence. For the three weeks that precede the first day of March, the sound of hammers and axes reverberates cheerily. The offices of the merchants are crowded with rough, bony-looking men, who are eagerly seeking for berths. From the distant "outports" they have arrived, with bundles of spare clothing over their shoulders, slung on the "gaff" or pole seven or eight feet in length, with which the seals are to be struck and dragged over the ice to the side of the vessel. These are the "batmen;" the "gunners," who rank a step higher, carry on their shoulders the long, heavy sealing gun, with which the older seals are to be destroyed. The men are roughly but warmly clad, and wear long, heavy boots, well paved in the soles with "sparables" and spikes, to enable them to walk securely over the ice.

The men are well fed during the voyage, their diet being chiefly pork, biscuit, tea, and a few vegetables. They also feast on the heart and certain other parts of the young seals, when successful in capturing a number.

Let us now picture to ourselves sixty or seventy of these stout fellows on board one of these small sealing vessels of 140 or 150 tons, ready for their hunting excursion on the ocean fields of ice; and let us, in imagination, go with them on their perilous voyage, in order to form some idea of the great "swile hunt," as it is vernacularly called. About the middle of February, the seal casts its young on those huge ice fields that are borne along our shores by the great northern current that sets southward out of the Greenland seas. For three or four weeks after birth, the young remain on the ice, fed by their mother's milk, and growing rapidly. At the end of this period they are very fat and in perfect condition; and the object of the hunter is to reach them at this time, as they are then readily taken, and their oil is purer and finer than that of the old ones. For this purpose they sail from our harbors as nearly as possible to the first day of March. Steering northward, they endeavor to keep the open water, if such can be found; but generally they are not long out till they encounter the ice.

"At times the scene is terrific; howling night closes in, and the vessel, caught in a vast ice field, is momentarily threatened with destruction. The huge floes come grinding, crushing down upon her; the wind roars through the shrouds, driving on its wings the arrowy sleet and snow, sharp as myriads of needles, before which only men of iron can stand. Thus beset and locked in the embrace of the floe, the luckless vessel is drifted helplessly hundreds of miles, at times past the harbor from which she took her departure. Then suddenly the scene changes. Soft westerly breezes blow, unfolding a lovely sky studded with bright stars, adorned by the presence of the young moon, and brilliant with the flick-

ering aurora. Calmly the vessel makes its way through numberless islets of glittering ice, with shining pinnacle and fantastic form, realizing all the youthful dreams of fairy-land. The scenery on such a night, amid the ice fields, is said to be enchanting.

Suddenly, however, the enchantment is dissolved by the welcome whimpering of young seals, resembling much the cry of an infant in distress. The vessel has at last touched the seal meadows, and myriads of the "white coats" are all around amid the ice hillocks. Now the bloody work begins; not a moment is to be lost, for the wind may shift and the treasure drift far away. If the ice be firm the men eagerly leap on it, armed with "gaff," "loving line," and "sculping knife." If it broken, the word is given, "Out with the punts (boats)!" and from "pan" to "pan" they pursue their prey. The slaughter is terrible. The shouts of the hunters, the bellow of the "gaffs" as they dispatch their victim with a stroke on the nose, the blood gouts that cover the hands and arms of the murderers and stain the virgin snow, the carcasses denuded of skin and fat, and yet palpitating with warm life as they are flung on the ice, the eager, exultant hunters slaying, "sculping," dragging heavy loads of fat and skin towards the vessel—what a scene of death amid these ice solitudes of the ocean, with bright sun in the heavens lighting up the glittering pinnacles and far-spreading fields of ice!

Meantime, the vessel keeps moving through the ice; the men follow, clearing off the sea on each side as they pass along. Sometimes a dozen seals are found within a space twenty yards square. At other times there are more widely scattered, and the men have to disperse over the ice in search of them, a distance of several miles. In skinning, a cut is made through the fat to the flesh, a thickness generally of about three inches, from throat to the tail. The legs or "flipper" and also the head, are then drawn out from the inside, and the skin is laid out flat a entire, with the layer of fat or blubber adhering to it; and in this state the skin is called the "pelt" or "sculp." It is generally about three feet long, and two and a half feet wide and weighs from thirty to fifty pounds. The hunters nick two holes along the edge of one side of the skin, and then lay them one on the other, passing the rope through the middle of each "pelt," and lacing it through the holes in such a manner that, when pulled tight, it draws them into a compact bunch. Fastening the gaff in this bundle, they tie it to a rope over the shoulder and haul it up to the ice to the vessel. Six pelts are reckoned a heavy load to drag over rough and broken ice, often leaping from "pan" to "pan." Then what a scene the deck of the vessel presents as the seal skins are piled there, previous being stowed under deck! The men may about knee deep in fat and blood—the deck with gore, is slippery as glass. The hunters arrive with their boats, and snatch a moment to drink a bowl of tea or eat a pipe of biscuit and butter—their hands and boots reeking with blood and fat—they then haul off in search of new victims. The poor mot seals, now cubless, are seen popping their heads up in the small lakes of water and among the ice, anxiously looking for their snow-white darlings, and refusing to believe that the bloody carcasses on the ice, strip-

their warm coverings, are all that remain of their tender offspring. With a moan of distress, they plunge into the water, as if anxious to escape from a scene polluted by the unguined trail of the hunters. The seal hunt is full of perils and excitements. Sometimes when the men are a mile or two from their vessel, a blinding snow-mountain sets in, or a thick fog envelops them; and as they stagger along, trying to regain their ship, they fall through a hole in the ice, covered by the treacherous snow, and go down to ocean's depths "unknelted, uncolled, and unknown." Sometimes, too, the seal is on ice which they are at work separating into fragments, and they are floated off by the sea down and die on the ice, unless picked up by some passing vessel. Or perhaps a violent nor'easter blows for several days, driving huge blocks of ice, one on the other, around the imprisoned ship, crushing her length like a nutshell, and leaving the unhappy sealers shivering and perishing with cold on a floating ice field. At times their sufferings are very great, and in some seasons the seal is a serious loss of life. On the whole, however, such is their skill and fortitude in meeting all emergencies, and such their knowledge of the ways and manners of the ice, comparatively few mishaps occur.

There are four species of seals in our seas. The Bay seal lives on the coast, frequents the mouths of rivers and harbors, and is never found among the ice. The harp seal is so called from having a broad curved line of conical spots proceeding from each shoulder, meeting on the back above the tail, forming a figure like an ancient harp. The old seal animal alone has this figuring, and not the second year. The third variety is the hooded seal, and is much larger than the harp seal. The female, called the dog-hood, is distinguished by the female by a singular hood or bag of flesh on his nose. When attacked or annoyed, he inflates this hood so as to cover his face and eyes, and it resists seal shot. It is impossible to kill one of these creatures, even with a sealing gun, so long as his head or tail is towards you; so that the only way to aim at the side of the head, so as to strike at the base of the skull. The hoods bring on their young two or three weeks later than the harps, and keep farther north than mothers. The fourth species is the square-tailed harp. It is largest of all, but is rarely taken on the coast. The white coats, the young of the harps, are the most desirable for capture, the oil and skin being the finest.

For "The Friend,"

From the Letters and Papers of John Barclay.

(Continued from page 90.)

1815, February 12th.—O! for that prevailing seriousness, that habitual state of dependence, humility, and gratitude, as in the sight of the Supreme Being; that disposition of mind which inclines to 'pray without ceasing' 'in everything to give thanks,' and to 'avoid every appearance of evil.' These symptoms of a soul that 'walks with God,' have been needed greatly wanting. Although the outward tokens of a religious life, may have continued much the same as before; yet have I no knowledge and lament a general tendency to indifference and coolness, with respect to religious matters, as well as a neglect and forgetfulness of Him, whose right it is continually to reign in the hearts of His people.

How often is this half and half—this lukewarm temper, which loves the Lord with divided affection, the beginning of more flagrant transgression. But may I not be discouraged,—rather may I remember that He, who by his reproving witness has discovered to me this evil, has done so that I should through his assistance subdue it; and that he will by no means withhold that strength, which will enable me to do so.

"When I look back at the long course and succession of blessings which have been experienced by me,—when I review the opportunities which I have enjoyed of making the attainment of vital Christianity my constant study; and then see how very small has been my advance in religious principle and practice, I cannot help feeling extremely sensible of the long-suffering and compassion of that Being who has not merely heaped upon me, day after day, and year after year, innumerable outward blessings, but has in much mercy been pleased to rescue me from a state of hardened forgetfulness and abandonment of Himself. He has opened a way to me, whereby I might escape that bondage to sin, (which did at one time nearly overwhelm me,) and that punishment which would otherwise have inevitably overtaken me. He still continues His forbearance and His tender mercies, though I so often decline from the path which He has plainly pointed out. How long then, O my soul, wilt thou despise the riches of His grace, and reject His offered and extended salvation? How long wilt thou in words acknowledge, and in very deed deny Him? How long wilt thou in praises and in prayers draw nigh unto Him, whilst in the particular conduct of every day thou dost abuse His gifts, forget and forsake the Giver?"

"1815, February 26th.—Blessed be the Lord! I think that I am in some small degree enabled to trust and believe, that there has been some little growth and advancement in lowliness and meekness, which shall be the groundwork of true wisdom. How shall I sufficiently express what I feel, when I look upon myself, when I consider what and where I have been, and who He is, that has lifted me out of the mire, and rescued my soul from destruction.

"1815, September 5th.—Surely one would think the bitter cup, of which so many, so very many of our fellow-creatures have to drink, ought to be enough to stop the dissipation of the gay, to check the extravagance and the avarice of the rich, to make the heedless pause, and the wicked consider. For my own part, when I hear and see everywhere around me the affliction of the destitute, the cry of penury, the groan of sickness, and every extremity of anguish and trouble, both of body and mind, I cannot but exclaim, 'What am I, that I should be blessed so abundantly above others in every sense? and what ought I not to be, who am so eminently favored with almost every variety of earthly comfort? How shall I dare to encourage or give way to pride, envy, passion, intemperance of joy, or levity of heart, when in one short day I may be deprived of everything in which I have outward comfort and confidence, and in one poor moment may be levelled in the dust from whence I came?'"

No date; probably late in 1815.—"The first thing that I would recommend to any one seriously inclined is, that he should not quench or stifle in any manner the precious spark, which the Lord in infinite compassion, has

kindled within him. O! let such an one do nothing which is likely to impede the growth of this divine seed of grace within. Let not any dross to his own soul the nourishment which is to support it; for though the world esteem him very lightly, and even ridicule him, yet 'if his own heart condemn him not, then has he confidence towards God.'"

No date.—"I am much displeased when I see a person accommodating his character and turn of mind to those among whom he is cast, changing his appearance according to the situation he is placed in. I see little apology for such persons in that saying of the apostle, 'I am made all things to all men, that I might by all means save some;' because such persons omit the latter part of that text,—and thus I do for the gospel's sake.' In those of whom I speak, there is no intention by this variable conduct to serve others, but rather to save and deliver themselves from the social, odium, and reproach, likely to be cast by serious people upon any levity, folly, or sin, and by the less sober upon anything like sobriety. There is a consistency of character, which, whilst it does not bring on religion the charge of moroseness and unyielding severity, yet does not deny its Great Master; and which though it does not obtrude its opinions or practice upon the notice of others, is not backward to show decidedly, to which standard it belongs, and under whose banner it ranks."

No date.—"The more I am among Friends, and see the principles and nature of the religion which they profess, the more I feel convinced that true prayer is not that of the lips, or of the mere unrenewed understanding, but of the heart: that it neither consists in, nor depends upon, a peculiar dress, an appointed form of words, a particular posture of body, or what is termed a consecrated place. But this is what it does essentially and unequivocally require,—that the soul put on the garment of faith,—that the expressions used (if there be any) be those of the heart,—that the inward posture of the mind be humble,—and that the heart be the sanctified temple, out of which prayer comes."

(To be continued.)

Luther's Contempt of Riches.—Disinterestedness was a leading feature in the character of Luther; superior to all selfish considerations, he left the honors and emoluments of this world to those who delighted in them. The poverty of this great man did not arise from wanting the means of acquiring riches; for few men have had it in their power more easily to obtain them. The Elector of Saxony offered him the produce of a mine at Sneeberg; but he nobly refused it. The enemies of Luther were no strangers to his contempt for gold. When one of the popes asked a certain cardinal, why they did not stop that man's mouth with silver and gold; the cardinal replied, "That German beast regards not money!" It may easily be supposed, that the liberality of such a man would often exceed his means. A poor student once telling him of his poverty, he desired his wife to give him a sum of money, and when she informed him they had none left, he immediately seized a cup of some value which accidentally stood within his reach, and giving it to the poor man bade him go and sell it, and keep the money to supply his wants. In one of his epistles, Luther says, "I have received one hundred guilders from Tauberin; and Schartz

has given me fifty; so that I begin to fear lest God should reward me in this life. But I will not be satisfied with it. What have I to do with so much money! I gave half of it to P. Priorus, and made the man glad."

For "The Friend."

The following is an epistle addressed to Friends in Scotland, from William Dewsbury, the minister by whose instrumentality Alexander Jaffray, and others at Aberdeen, were first induced mercifully to adopt, as well as publicly to own in that city, the principles of Friends. There is a nobly toned, a deep and expressive religious feeling and savor about this letter, which will claim for it the notice and perusal of the true Friend of to-day.

"Warwick, 29th of 8th month, 1672.

"My Dear Friends,—All watch and wait in the light of the Lord, that every thought be judged down, that is contrary to the light; then will the cross be laid to the ground of your own thoughts, and the true baptism of Christ be known, which will bury you in such deep humility and sense of the free mercy of the Lord, as to raise you up in the living faith, to reign over your own thoughts and wills. Then will you be born again into a pure subjection to the pure light, to the thoughts and will of God, which is our sanctification and perfection of glory manifested within us, &c.; and so will you witness the new and holy birth which makes self of no reputation, neither boasteth in anything it doth; but followeth the Lord in his pure leadings, to serve Him and his people in love, in whatever he calls into, to the perfecting of his praises, and the comfort of his people forever! In which life, feel the yearning bowels of your brother towards you, who are truly poor in spirit; for the unspeakable mercies of the Most High God are your inheritance forever! The Almighty God keep all your garments clean in his holy power, and in it exercise you to the building up one another in your most holy faith; that, in the pure chaste love, you may grow up in the unity of the spirit and bond of peace, to shine forth as the morning stars, to enlighten the people in that nation. Oh! be faithful, my dear Friends; for the Lord hath a great people in Scotland; for whom I, with many of our brethren, have travelled, in jeopardy of our lives, in years past, casting our bread upon the waters, with hopes to find it after many days. And seeing God hath called you to be the first fruits, and to make you a blessing, as you will be to be ordered of the Lord, as before written—then will my great expectation be answered in the behalf of the holy Seed, whom my soul loves in that land—and remain your dear brother in the light, thoughts, and will of our God for ever!

WILLIAM DEWSBURY."

Novels.—Many works of fiction (says Hannah More) may be read with safety, some even with profit; but the constant familiarity even with such as are not exceptional in themselves, relaxes the mind that wants hardening, dissolves the heart which wants fortifying, stirs the imagination which wants quieting, irritates the passions which want calming, and above all, disinclines and disqualifies for active virtues and for spiritual

exercises. The habitual indulgence in such reading, is a silent, mining mischief.

Oliver Goldsmith, who was himself a writer of fiction, in writing to his brother, respecting the education of his son, uses this strong language: "Above all things never let your son touch a novel or romance. How delusive, how destructive, are those pictures of consummate bliss! They teach the youthful mind to sigh after beauty and happiness, that never existed; to despise the little good that our cup contains, by expecting more than is ever given; and in general—take the word of a man who has seen the world and studied it more by experience than by precept—take my word for it, I say, that such books teach us very little of the world."

Nicholas Ferrar, a very learned and pious man, who lived early in the seventeenth century, on the third day before his death, summoned all his family around him, and then desired his brother to go and mark out a place for his grave, according to the particular directions he then gave. When his brother returned, saying it was done as he had wished, he desired them all, in presence of each other, to take out of his study three large hampers full of books, which had been locked up for many years: "They are comedies, tragedies, heroic poems, and romances; let them be immediately burnt upon the place marked out for my grave; and when you have so done, come back and inform me." When information was brought him that they were all consumed, he desired that this might be considered as the testimony of his disapprobation of such books, as tending to corrupt the mind of man, and improper for the perusal of every serious and sincere Christian.

We have of latter time had to wade under many exercises and trials, not known fully to any but ourselves; yet I think we have cause humbly to acknowledge that we have been permitted to hold up our heads, and not altogether to sink under discouragement. If the varied conflicts which we have from time to time to endure in our different allotments, do but happily tend to increase our acquaintance with the Supreme Good, and to strengthen our confidence in the Divine superintending care and protection, it will be well; and we may have to acknowledge that it is good for us that we have been afflicted. I wish to guard against unprofitable bewailing; and rather press on, in a grateful remembrance, that we have many favors and blessings intermixed with the difficulties of the day. It is, indeed, a nice thing, and requiring a portion of Best Wisdom, to know how to move along in temporal concerns. To be suitably able to the useful discharge of our duty as to temporal matters, and yet to have the mind so detached from them as to have the one thing needful, perpetually before us, is a most desirable attainment.

Uncertainty is so stamped on all visible enjoyments that we had need, indeed, to be solicitous to have our minds established on something beyond them all.—William Grover.

Diogenes being at Olympia, saw at the celebrated festival some young men of Rhodes, arrayed most magnificently. Smiling he exclaimed, "This is pride." Afterwards meeting some Lacedaemonians in a mean and sordid dress, he said, "and this also is pride."

SELF-SURRENDER.

BY WILLIAM C. STODDARD.

Lord, one deep trouble of my soul,
From which I pray to be set free,
Is that I cannot self control
And give up all the world for thee.

My weak, corrupt, deceptive heart,
Whenever early lasts I flee,
Like Ananias, yields a part,
But will not give up all for thee.

Sapphira like, false thoughts arise
When, penitent, I bend the knee,
To hold the world before mine eyes
And say I gave it all for thee.

Well do I know how small the worth
Of all the gains that here may be;
But still my fond heart clings to earth,
And will not give up all for thee.

Lord, make me victor in the strife!
Thou who hast given so much for me,
Teach me this parable of life,
That I have naught to give for thee!

WAIT AND SEE.

When my boy, with eager questions
Asking how, and where, and when,
Taxes all my store of wisdom,
Asking *o'er and o'er* again,
Questions of to which the answers
Give to others still the key,
I respond, to teach him patience,
"Wait, my little boy, and see."

And the words I taught my darling
Taught to me a lesson sweet;
Once when all the world seemed darkened
And the storm about me beat,
In the "children's room" I heard him,
With a child's sweet mimicry,
To the baby brother's questions,
Saying wisely, "Wait and see."

Like an angel's tender chiding
Came the darling's words to me,
Though my Father's ways were hidden,
Bidding me still wait and see.
What are we but restless children,
Ever asking what shall be?
And the Father, in his wisdom,
Gently bids us "wait and see."

For "The Friend."

Proverbs.

A recent work on the Philippine Islands by John Bowring, late British Governor Hong Kong, contains a list of several of the religious maxims and proverbs current among the natives of those islands, some of which are well worthy of being remembered. The author remarks, "they would have some interest if they represented the thoughts and feelings of a civilized nation. Their interest will hardly be less when the social code semi-barbarians is studied in these short sentences." A few only of the more striking have been selected:

Sins are diseases of the soul.
Job had many troubles, but they did not affect the inner man.

Desire not what is not.
What thou doest do quickly.
The poor have no nurse.

Disquiet is the constant companion of jealousy.

Riches are the baits of the devil for man.
The cries of the wretched will reach heaven.
A candle in a house will illumine a street.
Reap thy rice with the reapers.

The monkey, however richly dressed, is a monkey.

Life is labor.
Where the wound is the plaster should
Sow not among stones.

Excesses are rare, when the heart is at rest.

For "The Friend."

Memoirs of Mildred Ratliff.

(Continued from page 86.)

19. 11th mo. 16th. At a little meeting at Octorara; and on the 17th at Eastland; but I think rather the best. Hitherto everlasting Father and wonderful Counsellor has been strength in weakness, so that I am clear whether they will hear or no. O mournful truth, that religion is a neglected thing! All who undertake the seed of the kingdom in these days do well to remember that "Man is not to be saved alone, but by every word that cometh out of the mouth of God."

20. Attended the Select Quarterly Meeting at East Nottingham; and on the 19th held at Q. M., which was large. Strength afforded to relieve my poor exercised soul. May the God of my life have the praise. 21. Returned to Deer Creek; and on the next day attended their meeting, which is the solemnizing power of Israel's law as a good meeting; such an one will be remembered by some I hope to their last advantage.

21. Went forward in order to be at the next Quarterly Meeting. Reached the home of Sarah Cowgill, a widow; and one ever to whom our blessed Lord alluded in His said, I will be a husband to the widow. Oh here I think it is to be felt that some Jesus is her Friend and Husband, being here as at home, in the secret of her heart where she is frequently seeking Him, inquiring of Him that which is indeed wanting to know. With such He is not an assisting man that carries but for a night, a short season; but takes up his abode with us. These know him, and He is known in us. Blessed be his Name for ever.

22. Was held the Quarterly Meeting; and the 25th a public meeting, which was attended by a number of the Lord's messengers from different Quarters, and was a good one; praised be the Lord our only helper. 23. Rested for the first time since we came home, though we made the attempt once. But, according to my faith, we have beyond the right time and place; moreover our horses is not well, and myself do deal indisposed with a cold. Thus in needful a time, to find a place where the spirit's peace is to be felt, and where we are kept inwardly and outwardly, is a favor, sweet so, and hope I am thankful.

24. Attended a meeting appointed for the honored people. The opportunity was rich to my mind, which was dipped into grace and sympathy on their account.

25. Was at Little Creek, where the people of Israel was again our Helper, and we had a good meeting. I hope the impression made on some minds will not be speedily effaced.

From here they went to Camden and other Meetings, which were both small. Remarks: "Alas! but little of the true was felt while there was great cause for mourning because of the desolations of Zion, and low state of religion: though I hope scarce yet a few that do feel bound to the usin most places. Ah, those who visit the seed of the kingdom in the present low state of church, must expect to find it in a manner, or Joseph-like, unjustly confined in prison. Lord, strengthen my faith, and please me daily bread.

"12th mo. 1st and 2nd. At Milford and Cold Spring Meetings, both small, and mostly composed of those not professing with us. Yet I think it may be said that He who said, 'I have sheep not of this fold; they also will I bring;' or gather, was pleased to be with us, and give the qualification, through which solemn truths were sounded vocally in their hearing, which did I trust reach the witness in some hearts: And I think, if I know anything, the Lord who hitherto has been our helper, has from my bowed down spirit all the praise: for I know I have sought of my own whereon to rely. I feel the weight of the task awfully increasing, and the secret language often is, Holy Father please to keep me as under the hollow of thy hand! Don't leave me one hour or one moment; for the magnitude of this undertaking is such, that I do often exceedingly fear and tremble.

"23d. Had an appointed meeting at a little village called Milton, where none professing with us dwelt: the service of which will not I trust be utterly lost."

On the 5th, 6th, and 7th, she had meetings at North West Fork, Centre, and Marsly Creek; "where," she says, "we found, as at most others, a precious few who are striving to enter in at the strait gate. Yet alas! I think it is to be felt, that true religion is much wanting, so that mourning seems almost incessantly my portion. Indeed my feelings inwardly and outwardly bind me to the testimony that weakness is ours, but strength cometh from the Lord. What a favor that there is a place, whereunto we may look in humble confidence that strength will be renewed."

Thence she went to Choptank, Third Haven, Tuckahoe, and at or near a village called Denton. At this meeting, she writes, "something seemed so to obstruct the current of life, as to cause a suffering time. Indeed I had here to remember the language, "If they have called the master of the house Beelzebub, how much more they of his household." I was glad however that we were there; counting it a favor to suffer with the suffering seed in that place. Lord, ever keep me humble and willing to endure that portion of suffering which thou in thy wisdom may see meet.

"13th. Went on by Milford, and had an evening meeting in the Methodist place of worship. It was large, and a good meeting, as I think was to be felt in many hearts; wherein the name of our God was magnified. There are a number of exercised souls in that place. Lord, feed them with the bread of life. Keep them as in the hollow of thy holy hand forever."

After visiting several meetings in course on the eastern shore of Maryland, she writes: "I went home with our beloved sister Sarah Cowgill, with whom we made our home when attending the Quarterly Meeting. So far in looking over the journey, the answer seems to be peace. And the consolatory language concerning some of the visited there, is, "I was a stranger, and ye took me in; naked, and ye clothed me; and I hungered, and ye gave me meat; thirsty, and ye gave me drink; sick and in prison and ye visited me." And when the humble contrite ones who have nothing to boast of, shall say, Lord, when saw we thee a stranger, or hungry, or athirst, or naked, or in prison, and administered unto thee, the answer shall be, 'Inasmuch as ye have done it unto one of the least of these my brethren,

ye have done it unto me.' My spirit is humbled in believing something like this will be experienced by some precious souls amongst whom our lots as poor strangers have been cast. For, praises to his holy Name forever, the Lord has not left himself without a witness. But notwithstanding this, pure religion is too little to be seen or felt."

She next attended Duck Creek and Appoquinimik meetings: upon which she writes: "Most or all of the meetings in this corner of the Lord's vineyard are small, yet I think there are some precious souls at them all; who are indeed hungering and thirsting after righteousness. These shall be filled, said our blessed Master, and so it will be everywhere the world over, saith my soul, as they continue faithful. Lord, increase the appetite of all after Thee, whilst life and breath and sensibility remain. The work is thine, the power is thine, and surely from every heart the glory shall be thine forevermore.

"19th. At Wilmington fore and afternoon meeting. The morning a favored one; the other not so much so.

"20th. At Stanton. It felt to me that true religion was as reduced here as the widow's barrel of meal and cruise of oil, when she was about to make the last cake for herself and son, expecting after that they must die. Notwithstanding which I did believe that if they would hearken unto the voice of the Lord's prophet inwardly, as she did outwardly, there would be an increase, and they not only preserved from death—the famine which sin has been the occasion of bringing upon them—but they would know a bountiful supply when the clouds would again gather, and the showers descend as from the presence of the Lord. So, that although death rather than life seemed to prevail, yet they need not doubt, that if obedience unto the requirements of the Lord's prophet inwardly speaking, keeps pace with knowledge, there would be an increase. May the Lord be pleased to bless, if so it seem good in his sight, the labor of his handmaid amongst them, to their lasting profit, saith my soul. We then went on to a very kind Friend's house at ———, and rested from the 21st to the 23d, being truly in need thereof, and feeling at liberty to do so. Here again, I trust it may be acknowledged with safety, and with feelings of gratitude, the Divine hand was underneath, and the good cause was preserved from suffering loss."

(To be continued.)

Nineteenth Annual Report of the Board of Managers of the Institute for Colored Youth.

The Managers Report: That while no very unusual event has occurred to mark the year just past, they are able to state that there has been no abatement of interest in their duties on the part of the teachers, nor diminished attention to study from the pupils.

At the date of the last report the roll numbered 226. Since which time 15 boys and 16 girls have been admitted to the High School, and 26 boys and 27 girls to the Preparatory Department; and the total number withdrawn has been 92; making the number at present enrolled in all the schools 218.

The average attendance has been

In the Boy's High School, 47.

Girls' " " 86.5

Boys' Preparatory, 28.

Girls' " " 35.—total 196.5

The total cost of conducting the Institute

for the year, not including interest on value of building, has been \$7,658.95, making the average cost of each pupil \$35.13.

The corps of teachers is mainly the same, with some changes made to adapt the schools to a modified system of instruction to be explained hereafter. James F. Needham, lately in charge of the Boys' Preparatory Department, having resigned his position to accept a clerkship in the office of the Receiver of Taxes, R. De R. Venning has succeeded him. Narcissa George was released in the 11th mo. 1870, to take charge of a school in Georgia; and Julia Jones subsequently took a similar position in Winchester, Virginia. Temporary leave of absence was granted to O. V. Catto, to visit Washington, to aid in the systematizing of a course of instruction for the colored schools there; and our esteemed principal, Fanny M. Jackson, was likewise relieved from her school duties to inspect the workings of the Normal Schools at Millersville, Pa., Trenton, N. J., and that in our own city, the place of each being supplied for the time being by Richard T. Greener, a graduate of Harvard University. The committee on Discipline and Instruction having rearranged the curriculum of the school, added some new recitations, and omitted Greek from the course; also provided for normal instruction for the graduating class, under the special charge of F. M. Jackson, R. T. Greener was engaged as a regular teacher in the Institute, and the services of two assistants dispensed with. It is believed that the new plan is a decided improvement upon the old, economizing time, and concentrating the energies of the teachers upon special subjects which they are best fitted to instruct in, while the graduates receive lectures upon the art of teaching, and practically aid in the school system, by taking charge of certain classes under the supervision of the Principal. There can be no doubt that pupils who take the normal course, will leave the Institute much better fitted to take charge of schools than if they had simply studied the prescribed text books, without the practical drill; and the Managers have had under consideration the advisability of making the Normal instruction a matter essential to the obtaining of the Diploma. Of the recent graduating class all but two remained to take the normal course, the others having at once entered upon the charge of schools, one in Maryland, the other in this city. Such is the demand for qualified colored teachers, that there are more applications from the Southern States than we can supply, and it is very gratifying that not only are the designs of the founders of the Institute being carried out, in "the preparing and qualifying of teachers," but that by availing themselves of the advantages offered by the Institute, any colored student of fair average ability, can, after graduation, enter at once upon a self-supporting career as a teacher. Indeed, the supply of cultivated colored teachers being, thus far, limited, it is not infrequently the case that they are receiving a higher rate of compensation than white teachers of the same grade.

The following interesting facts have been extracted from a recent report of the Principal, Narcissa George and Lucretia Douglass, two of our graduates, were employed as teachers in Darien, Georgia, at a time when the schools were supported by the people themselves. Subsequently the schools were

taken in charge by the public authorities. The examining board was composed of an equal number of white and colored persons, and was presided over by the mayor of the city, who from the account does not appear to have been incompetent, or prejudiced in favor of our teachers. They passed the entire examination with an average of 100. The mayor, learning that they were graduates of the Philadelphia Institute, required them to send home for their diplomas, and for testimonials of their moral character and ability to teach, which our Principal was able from her knowledge of them to furnish. After the reading of the diplomas nothing further was required, and Narcissa has now charge of the principal school for boys, and Lucretia that for girls.

Three pupils of the boys' High School have during the past year gone to different universities, to perfect themselves in studies commenced with us.

As some who will read this report may not be familiar with the present Institute building and its resources, it may not be inappropriate here to state that the premises, Bainbridge street above Ninth, contain on the first floor a library room, well lighted, and furnished with 2719 volumes of carefully selected reading matter, works of fiction being excluded. A few periodicals devoted to scientific and educational interests are subscribed for, and the pupils have access here to Encyclopedias, Dictionaries, and standard scientific works and text books. A number of photographs and engravings of natural scenery and historic events have been presented to the Library from time to time by its friends. The room is opened semi-weekly, not only to the pupils, but also to other colored persons, suitable guarantees being received of a right use of its privileges. The total number of volumes loaned during the year was about 2900. In this room, during the winter, the teachers and seniors and normal class were invited on two or three occasions to conversational teachings, with some of the Managers and other friends of the Institute. One hundred volumes were added to the Library since last report, five lost, and twenty-five removed as too much worn for use.

In the rear of the Library the remaining part of the first floor of the building is divided by glass partitions into two commodious rooms for the boys' and girls' Preparatory schools, access being had from the front of the building by separate entrances. The whole of the second floor, with the exception of two small rooms devoted to a Laboratory and place of deposit for philosophical apparatus is occupied by the boys' and girls' High schools, likewise separated by glass partitions, so arranged that the whole of the pupils in the two rooms can be addressed at once, the seats all facing the north. The desks are of an improved pattern, combining neatness with convenience, and the walls are lined with blackboards, at which large classes can be exercised at once. The ceilings are high, and ventilation is provided by flues concealed in the walls, as well as by moveable transoms over the doors. On the third floor are six recitation rooms, also provided with ample blackboard space. It is believed that the Institute furnishes, with its present corps of teachers, and the appliances at their command for illustration, opportunities not surpassed by any seminary for colored youth in

the country, and the Managers cordially invite parents and guardians everywhere, who may have the charge of children who wish to educate themselves to become thorough and practical teachers of their race, to themselves of the benefits here afforded; total expense of tuition is but five dollars a year for a pupil in the Preparatory Department, and ten dollars for the same period a pupil of the High school, the use of books provided gratuitously to those who wish it.

The subject of suitable religious and moral instruction is one which the Managers desire to keep steadily in view. At the opening of the schools a chapter from the Bible is read daily, followed by the reciting of texts variously committed to memory, and opportunities are frequently taken for impressing upon the minds of the children the highest most important truths relating to their present and eternal welfare. We are informed Ellen Jones, a pupil of the introductory class who has recently been removed by death amongst us, spent much time before her decease in repeating texts and verses which had learned at the school.

A course of lectures has been delivered recently by Dr. Labberton, on Grecian History which has been very interesting and beneficial to both teachers and scholars; a course on Zoology by Grace Anna Lewis been arranged for, to commence next Autumn with a subsequent examination of the course upon the subject of each lecture.

In addition to the Text Books already employed in the Institute, the following have been added since the introduction of the plan of study before alluded to, viz: Lyster's Astronomy; Trench's Study of Wood; Warren's Physical Geography; Hool Child's Book of Nature; Steel's Four Weeks in Chemistry; Anderson's General History.

At the commencement, in the 12th mo. last, one boy and seven girls received the diploma, making the total number of graduates to this time 83. The following are the names of the recent graduates:

Geo. O. Moore, Laura F. Barney,
Maria C. Barney, Nancy C. Smith,
Priscilla E. Ehrlicke, Ada V. Le Count,
Arena M. Ruffin, Harrietta G. Sylvester.

The averages obtained in the private examination were more than usually creditable.

In the Twelfth month last a committee was appointed to examine the by-laws of Corporation, with a view to determine whether any change would, in their judgment, be advantageous; after a careful revision they reported a list of by-laws, with some modifications, which are herewith submitted.

Signed by direction and on behalf of the Managers, WILLIAM EVANS
Philadelphia, 5th Mo., 1871. Secy.

The Mont Cenis Tunnel.—This enterprise is remarkable even among the many engineering triumphs of the present day, was formally opened by a grand ceremonial, on Sunday, September 17. We have taken pains to inform our readers informed as to the progress of the work and the details of its construction, and need not recapitulate the ingenuity and perseverance of the engineers, and the difficulties they so courageously overcame.

The immediate effect of throwing open the

nel is to bring Turin within eighteen hours of Paris, and to relieve the journey of long, wearisome, and often perilous ride through the mountain. But, as with all the great undertakings, there will be many secondary and collateral advantages to be derived from the success of the world, which time alone can develop, and of which the most obvious is the facilitation of Brindisi, on the eastern coast of the Italian peninsula as the chief European port for the commerce of the east. There have been unbroken lines of railroad from Genoa and the channel ports, Havre, Calais, Boulogne, to Brindisi; and the traffic to the East Indies and China, via the Suez canal and the Euphrates Valley railroad, will, no doubt, shortly quit Marseilles for the more proximate Italian port.

In view of this fact the French authorities, opposed by some critics to have looked upon the tunnel with coldly, and they have not yet completed the railroad leading to it. This important link in the chain of communication will, it is expected, be open in November next. The journey from Calais to Brindisi will then take only sixty hours' time, and that from London about sixty-four. The railroad approaches to the tunnel on the north side have long been complete.

The solidity of the work, and the perfect execution of the enormous excavation, elicited expressions of admiration and surprise from the large party who attended the opening ceremony, which included many of the distinguished men from both countries. On Tuesday, the 19th, the municipality of Turin gave a grand banquet in honor of the occasion. Two names which would have been prominent in the list of visitors, must have been remembered with pain by every one present. The great statesman of united Italy, M. Camille Cavour, gave all the weight of his talents and influence to the furtherance of the work; and to Germano Sommellier is due the credit of originating the idea, of fighting against all obstacles for twenty years, and finally completing it, to the satisfaction and honor of the world. Both these men are gone; but they have left us an enduring monument of their far-seeing wisdom and invaluable courage and genius.

Excavations are now running regularly through the tunnel, the subterranean transit occupying twenty minutes.

In alluding to some rumors of accidents in the work, the engineer states that there has been one stone displaced from the fianchiera of the Alpine tunnel; that the work itself is so solidly constructed that it is well nigh as durable as the rocks themselves. The circumstance which served as a foundation for these absurd reports was the falling of eighteen or twenty feet of work, which happened in the last days of June, at the Barce end, in consequence of the falling of a scaffolding broken by the explosion of a single charge.

The total cost of the tunnel is represented to be some \$13,000,000, or 65,000,000 francs; the 20,000,000 francs are to be contributed by the Victor Emmanuel railway, or railway of northern Italy. This sum is to be paid in or before the opening of the tunnel. The French government was to pay 19,000,000 francs if the work was accomplished within twenty years, reckoning from 1862, but if the work was accomplished at an earlier date, she bound herself to pay 500,000 francs

more for every year gained upon the stipulated time.

As there have been eleven years thus gained, France will have to pay 5,500,000 francs besides the 20,000,000 of the original stipulation. She has besides to pay 5 per cent. interest on the money due for the work as it proceeded from year to year. Thus Italy will pay something less than 20,000,000 francs. Had the construction of the tunnel continued beyond the stipulated term of twenty years, Italy would have lost 500,000 francs for every year in excess of that period.—*Scientific American.*

THE FRIEND.

ELEVENTH MONTH 18, 1871.

The remark has often been made, and perhaps more frequently of latter time, that in different meetings there are not a few, who while professing to be attached to our Society and to approve of its principles and order, have long manifested, and still continue to manifest, what may be called, a cold indifference, to the things which belong to their own eternal interests, and to the support or promotion of the cause of vital religion. Those best acquainted with the condition of the Society, know that this charge cannot be escaped, nor the saddening feeling to which its truth gives rise.

Cannot some who read these lines, call to mind among those with whom they mingle, members, young or old, who, having been educated amid religious influences or surroundings, and perhaps trained in the practice of the external duties of our profession; it may be dressing plain, and attending meetings for worship and discipline, are nevertheless traditional christians, and nothing more. They believe the truths recorded in the Holy Scriptures, and acquiesce in the teachings of others respecting Christ as the Saviour of men, and the necessity of believing in Him, and that salvation is to be obtained by and through Him alone; but the tenor of their lives shows that they know little or nothing of that operative, living faith, which can give the victory over their heart's lusts, and crucify them to the spirit and engrossing pursuits and friendships of the world, through the washing of regeneration and the renewing of the Holy Ghost. They can see that godliness is beautiful; they are alarmed at evidences of unsoundness in belief, and shocked at palpable departures from virtue; but their religious principles, and their love for what is good, are held in the wisdom of man, and not in the power of God. Their time and energies are employed indifferently in the pursuit of wealth or amusement—it may be they are closely engaged to obtain the means for supporting themselves and families—and they take satisfaction in the conviction that in their transactions with their fellow men, no one can lay unfair to their charge as respects honesty and fair dealing; but their cold indifference betrays a lack of experience in a life of prayer and self-denial, and of righteous zeal for the welfare of the church. It is evident they do not allow the Light of Christ to reveal to them the depth of corruption in the natural human heart, nor his goodness to lead them to repentance and the forgiveness of

their sins, so that their justified and sanctified souls may have fellowship and hold communion with a living Saviour.

The question often presents to those who anxiously ponder their condition and their well-being, How are such to be reached? How are they to be aroused to a consciousness of their danger, and to realize that man is something more than a machine to eat, to digest, and to scrape together the perishing riches of this world? How may they be quickened to feel that they are at the opposite extreme of, and supply the most plausible plea for, those who under an undue excitement, and an unauthorized activity, are also causing great concern lest they become hopelessly stranded amid the shallow and noisy streams of a religion of sentiment.

The church has often mourned and travailed in spirit on account of this class of its members, and we trust will continue to labor on their behalf. But if she has performed her whole duty towards them; if in the light of heavenly wisdom and under the constraining love of Him who came to seek and to save that which is lost, she has warned against and striven to take the little foxes that destroy the tender vines; if under a deep sense of her accountability and a fervent concern for the welfare of the flock, her petitions have continued to go up, "Awake, O North wind! and come thou South, blow upon my garden, that the spices thereof may flow out," and yet these still cling to their idols, and refuse to enter the vineyard and work, then her only hope for such must be in the immediate operation of that all-powerful Word which can raise the dead, and bring up sinews and flesh on dry bones.

Well would it be if among the various invocations of the present day, the ears of the nominal professors among us were open to hear, their own peril, the dangerous signs of the times, and the needs of the church, as the voice of one crying in the wilderness, prepare ye the way of the Lord, make his paths straight; breaking up their monotonous formalism, and inducing them to flee to the hope set before them in the gospel.

It is one of the strong evidences of the divine origin of the Christian religion, that its terms of salvation, its transforming power, and its happy results, are equally applicable to all, whether high or low, rich or poor, and that by the submission to Divine Grace which it enjoins, every one can obtain a sufficiently clear and full understanding of its doctrines and the duties it imposes, for all practical use. We are not called to receive and reason upon these doctrines and truths as we would the acknowledged principles of science, nor as the exposition of judicial enactments, within the scope of whose prescribed action any one may decide that he has come, and is therefore safe; but the virtue and sufficiency of the whole plan of redemption consist in a personal experience of the work of Christ, both without and within us. Thus, and thus only can we know what it is to be regenerated; born again not of corruptible seed, but of incorruptible, by the Word of God which liveth and abideth forever.

How strong the contrast between the nominal professor, though he may live a moral life and keep up the external duties of religion, and him who has not only heard the call of the Most High, but has obeyed it; and being created anew in Christ Jesus, finds new pur-

poses and motives in life, and feels his spirit stirred by a divine spring of endurance and joy, as he resigns himself wholly to obey the commands of his ever-present Saviour.

Did the cold, or lukewarm members, whose gifts of time and talents are being rapidly squandered, but look at things in the light of Truth, how changed would be the estimate formed of their intrinsic value, from that set on them by the natural man. How comparatively insignificant the external events of life compared with those connected with the welfare of the immortal soul! Seen in this light, vouchsafed by Him who is Judge of quick and dead, to every man that cometh into the world, how stupendous are the interests involved in the fact that He has made us accountable beings; and that whether we acknowledge our responsibility or not, He has declared He will call all to a strict reckoning for the deeds done in the body, and unless we have complied with his terms of salvation, however we may call him Lord, and claim that He has taught in our streets, He will refuse us an entrance to the marriage supper of the Lamb.

In this time of shaking and trial in the Society, the call is loud to all its members to live consistently with the principles which Friends have ever professed; to leave the things that are behind and to press towards the mark for the prize of their high calling in Christ Jesus. Many may stumble and fall while "darkness and gloominess are as the morning spread upon the mountains," but the light will soon dawn and a brighter day shine forth, as the members individually enter into the vineyards of their own hearts, and labor there under the direction of the great Husbandman: the upright in heart and the fervent in spirit serving the Lord will receive their wages and gather fruit unto life eternal. There can be no dignity of character, no elevation of employment comparable to being qualified for and rightly engaged in the service of the glorified Head of the church. The honor attached to it comes from Him alone, and is conferred for the earnestness and devotion with which the service is performed, uninfluenced by the changing opinions of men, or the position in which the servant may stand in relation to his fellow laborers. For by one Spirit, all the living members are baptized into the one body, and all have been made to drink of the same Spirit. Thus there can be no sechism in the body of Christ, but the members have the same care one for another. As this came to be the case with our members, as it was in great measure in the early days of the Society, our meetings for worship and discipline would be more generally seasons of encouragement and renewal of strength. Instead of this cold indifference or lukewarmness, impeding the circulation of divine life, and weighing down the spirits of the burden bearers, there would be communion of that worship which is in spirit and in truth. Each one retiring to the divine gift in himself would be enabled to offer upon the altar of his heart, the sacrifice prepared by grace, acceptable to Him who seeketh such to worship him, through Jesus Christ the great High Priest of our profession. Thus we should know Him who is in the midst of those gathered in his name, to shed over the whole assembly the humbling life-giving influence of his holy presence, and his spiritual blessings would descend on their contrited

hearts as the dew of Hermon, diffusing a glow of reverent joy, and strengthening that "hope which maketh not ashamed."

SUMMARY OF EVENTS.

FOREIGN.—A Paris dispatch of the 11th says: In an interview President Thiers has authoritatively stated that when the Legislative Assembly meets next month, the government will propose to end the provisional regime and establish a definitive republic.

The French newspapers very generally discuss the recent speech of Gladstone, the English Premier, and decline therefrom the necessity for France to seek henceforth a Russian alliance.

La France of the 12th inst. says, that the Pope has intimated to Thiers his intention to establish his residence in France, and that the Emperor made efforts to dissuade the Pope from his purpose, without success, and has finally placed at his disposal the Castle of Pau. The news from Algeria continues satisfactory. Tranquility is very nearly restored to that country.

The Council General of the Department of the Seine has, by the vote of 130 yeas, decided in compulsory and gratuitous education, but has rejected the proposition to make the common schools wholly secular.

A terrible explosion of fire damp occurred on the 9th, in a coal mine near St. Etienne, while the miners were at work. None of the men had been recovered alive. Thirty bodies had been taken out, and thirty more were still in the pit, all supposed to be dead.

The Committee of Inquiry on the capitulations made by French Generals during the late war, is prosecuting its investigations with vigor. Marshal Bazaine, who had already appeared before it in person, has now sent in a detailed and voluminous report of the siege of Metz, with letters received by him from Napoleon during the investment.

The French Minister of War has prohibited the circulation of newspapers in barracks and camps.

The navigation of the Baltic is closed for the season in consequence of severe frost and the rapid formation of ice.

At the Lord Mayor's banquet in London, Prime Minister Gladstone, in replying to the toast to the Queen's government, said he was thankful to be able to state that at the present moment England had actually no quarrel, feud or controversy with any foreign Power, and that in the face of the fact, England's place in Europe was that of one among many sisters, inseparable from the European family, but he was glad that her peculiar position removed her from the risks of European dissensions. He concluded by declaring that England had little to fear from internal troubles, and that the only danger to the Society, the source so much to be apprehension to her neighbor, caused no uneasiness here.

The trial of the famous Tichborne case, interrupted by the long vacation, has been resumed by the Court of Queen's Bench.

The mechanics and laborers employed in the shipyard at Birkenhead, have held a meeting and unanimously resolved to insist upon a restriction of the hours of labor to nine hours a day.

The London *Times* rejoices in the result of the late election in New York, and hopes an example will be made of the men guilty of corrupt practices.

The cholera epidemic in Constantinople, and many deaths are daily reported.

The Bank of Belgium has reduced its rate of discount to four per cent.

A Berlin dispatch says that a conference of diplomats will soon be held in Dresden, to devise precautionary measures against the return of cholera.

Extensive strikes have occurred in Elbing, an important port of eastern Prussia, noted for its manufactures.

Count Von Beust, Chancellor of the Austrian Empire, has tendered his resignation on the ground of ill health. The Emperor has accepted it and appointed Count Julius Andrusy to succeed him. Andrusy belongs to an ancient and honorable Hungarian family, which for centuries has taken a prominent part in the affairs of the country. The new Premier took an important part in the military and civil events of 1848, on the revolutionary side; and when the Hungarians were about to declare war against Austria, he was distinguished war of 1866 with Prussia. Count Andrusy was one of their acknowledged leaders.

The Bohemian Diet, in session at Prague, has voted unanimously against electing delegates to the Austrian Reichsrath. The government has in consequence, ordered the dissolution of the Diet.

The Emperor of Austria has addressed a letter to

Count Von Beust, thanking him warmly for his services, and appointing him, for life, a member of the upper Chamber of the Reichsrath.

The Spanish Cortes have passed a vote of confidence in the existing government. The vote stood 191 yeas to 58 nays; the radical members abstaining from vote. A political treaty was concluded to combat the designs of the International Society, has been formed at Madrid.

King Victor Emanuel, on his arrival at Rome, occupies apartments in the Quirinal Palace, which has been prepared for his reception.

A Paris dispatch of the 13th says: the courts-mart are rapidly disposing of the cases of the Commun prisoners. Of the accused who have thus far been tried, 10,645 have been discharged, and 773 convicted & sentenced to various degrees of punishment.

A dispatch to the *New York World* states that a political treaty, concluded to combat the designs of the International Society, has been discovered.

A very destructive fire broke out in Geneva on the 13th, and destroyed a large number of buildings. London.—Consols, 93. U. S. 5-20's of 1862, 91; 1867, 94; ten-forties, 90.

Paris.—Consols, 94; cotton, 91 a 91½; Orleans, 9; Sales of the day 15,000 lots on the 13th.

UNITED STATES.—Miscellaneous.—The customs receipts for the week ending 10 a. m. 25th, amounting \$4,726,124; of this sum \$3,922,552 were collected New York.

On the 7th inst. elections were held in Massachusetts, New York, New Jersey, Maryland, Michigan, Illinois, Wisconsin, Kansas and Mississippi. Maryland had decided Democratic majority, and the same party elected their candidate for Governor in New Jersey but failed in the Legislature, both branches of which are Republican. The Republicans have control of the other States named.

The interments in Philadelphia last week numbered 372, including 101 deaths from small pox, 10 of typh fever, 6 of scarlet fever, and 8 of crop. Of the total number 171 were under 20 years of age.

The Pennsylvania Central Railroad, and the Annapolis and Eastern Railroad and railroads with which connected, was finally concluded, and these works are under the control of the Pennsylvania Central Railroad which now has an unbroken line of transit from New York and Philadelphia, to the Lakes, the south of the Mississippi, St. Louis and San Francisco, to the West, to the mountains, and other points south to be completed.

The corn crop of the west, the present season, proved the best harvested for years. In some part Indiana, Iowa, Missouri, Nebraska and Minnesota western paper states, that corn is offered in the crib from ten to fifteen cents a bushel.

On the 13th inst., the German steamer Franklin at quarantine, in the lower bay of New York. On passage to New York there were about 40 deaths of cholera on board, and there were 40 cases of the distill remaining, most of which were transferred to hospital.

The Markets, &c.—The following were the quotations on the 13th inst. *New York*.—American gold, 11 11½. U. S. sixes, 1881, 116½; ditto, 1868, 114½; do 10-40, 109½. Superfine flour, \$5.65 a \$6; finer bar \$6.25 a \$10.50. No. 1 Chicago spring wheat, \$1.10; No. 2 do, \$1.05; No. 3 do, \$1.00. Superfine flour, \$5.25 a \$10.50. St. Louis, \$1.61 a \$1.65; western Michigan, \$1.17; white Canadian, \$1.74. Western barley, \$5 Canadian, \$1.05. Oats, 52 a 57 cts. Western mixed cts. 78; yellow, 83 cts.; white, 84 cts. Philadelphia Cotton, 18½ a 19½ cts. for uplands and New Orleans. Sugar, 8½ a 9 cts. Superfine flour, \$5.25 a \$10.50. Flour brands, \$7.75 a 89. Red wheat, \$1.57 a \$1.71; white, \$1.63 a \$1.68. Rye, 95 a 98 cts. Yellow cts. 75 a 76 cts. Oats, 51 a 53 cts. Lard, 9½ cts. Cattle, 11 a 11½ cts. Timothy, 83 a \$8.25 per bushel.

The arrivals and sales of beef cattle reached 3 head. Extra sold at 7 a 7½ cts.; fair to good, 5½ cts. and 6½ cts. 3 cts. per lb. gross. The sales of sheep were about 17,000 head, market dull, sell fair to good at 4½ a 5½ cts. per lb. gross. Corn fed sold at 6½ a 7 cts. Baltimore.—Amber wheat, \$1.81 a \$1.83; Ohio and Indiana, \$1.59 a \$1.60; Pennsylvania, \$1.62 a \$1.65. New white corn, 70 a 78 cts.; new lot, 72 a 78 cts. Oats, 33 a 35 cts. Rye, 90 a 95 cts. Spring wheat, \$1.21. No. 2, 33 cts. No. 2, 43 cts. Cincinnati.—Family flour, \$6.60 a \$7. Wheat, \$1.43 a \$1.45. New corn, 45 cts.; old, 85 cts. 35 a 40 cts. Chicago.—No. 2 spring wheat, \$1.10. No. 2, 84 cts. Oats, 33½ cts. St. Louis.—No. 2, 84 cts. No. 1, \$1.28; No. 2, 84 cts. No. 1, 1.30. Corn, 42 a 42½ cts. Oats, 33½ cts. No. 2, 70 cts.

For "The Friend"

The Two Ways.

Our blessed Lord and Lawgiver has spoken out two ways: in one or other of which all mankind are travelling. "For," said He, "wide is the gate and broad is the way that leadeth to destruction, and many there be that go therein; but narrow is the gate which leadeth unto life, and few there be that find it." It thence becomes a point of the greatest importance whether of these two we have chosen to walk, or are really walking in.

As the Apostle Paul represents, "The carnal man receiveth not the things of the Spirit of God; for they are foolishness unto him; neither can he know them, because they are spiritually discerned;" it would seem that before we can distinguish the narrow and uncounted way with its few mournful travellers unto eternal life, from the one broad and crowded, but leading to destruction, it will be well to experience, through submission to quickening, leaving, and transforming power of the Holy Spirit, a putting off of the man with his deeds, and a putting on of the new man which after God is created in righteousness and true holiness. For unless we passively realize a purging out of the old man, we cannot be a new lump; and hence, zealously to the Apostle, cannot distinguish or receive of the things of the Spirit of God. In this yielding of our hearts submissively to Christ Jesus that causes that which is blind to see, the lame to walk, and the dumb to speak. This, in effect, is to buy of Him our portion in the fire that we may be rich, and to kindle the eye with the eye-salve that we may see of the things which belong to our age, and whether we are walking in that light and narrow way which only leadeth to the kingdom of heaven.

Another important precept bearing upon the subject, to be duly recognized and weighed upon, is that of our Lord when he rejoiced in the spirit, and said, "I thank thee, O Father, Lord of heaven and earth, that thou hast hid these things from the wise and prudent, and hast revealed them unto babes: even so Father: for so shall all things come by thy sight." It is hence as simple as "babes," in humility and contri-

tion and abasement of soul to glory only in the Lord, and to set Him always before us, that we are helped to make the most important choice we can make in this life, that of choosing Him for our portion, and following Him through this stage of trial in the straight and narrow way which alone leads to life. Without this, our blindness from the sinful and lost condition we are in by nature, would not fail to cause us to choose amiss. "For the wisdom of this world is foolishness with God." And again, "The Lord knoweth the thoughts of the wise that they are vain." Concurrent with the same, two intelligent writers have left the following testimonies: "Many persons are seeking after Truth in natural science; but how few in spiritual things! The reason probably is, that when found in the former, it exalts the creature; but when discovered in the latter, it lays him low." And,

"Not many wise, rich, noble, or profound
In science, win one inch of heavenly ground."

Again it has been well said to the effect, that true religion is not a science of the head, but an inward and heartfelt perception, which casts down imaginations, and every high thing that exalteth itself against the knowledge of God, and brings every thought into captivity to the obedience of Christ. Here the learned have no real advantage over the ignorant; both see when the eyes of the understanding are enlightened; till then both are equally blind. And the first lesson in the school of Christ is to become a little child, sitting simply at His feet that we may be made wise unto salvation. Most especially needful then as the straight gate of entrance into the narrow way, is the teachableness, humility and meekness of a little child; to whom, and not to "the wise and prudent" of this world, it is the Father's good pleasure to unfold the mysteries of His kingdom.

We can hardly be too much impressed with the requisites of simplicity and meekness that characterize the straight and narrow way of the Christian. "The Lord preserveth the simple;" "The testimony of the Lord is sure, making wise the simple;" "The entrance of thy words giveth understanding to the simple," saith the Psalmist. And the Apostle: "Our rejoicing is this, the testimony of our conscience, that in simplicity and godly sincerity, not with fleshly wisdom, but by the grace of God we have had our conversation in the world." Again, "I fear, lest by any means, as the serpent beguiled Eve through his subtlety, so your minds should be corrupted from the simplicity that is in Christ." Again writes the Psalmist: "The meek will He teach his way." "He will beautify the meek with salvation." And the Saviour, "Blessed are the meek," &c. "Learn of Me, for I am meek and lowly of heart, and ye shall find rest unto your souls." And the Apostle in speaking of our adorning, enjoins that it be

"a meek and quiet spirit, which in the sight of God is of great price." Thus are simplicity and meekness the evidences of being engrafted into Christ; without which, like the wild olive tree in the parable, there can be no fruit to the praise and glory of the Redeemer's grace.

But the capital offence perhaps, the cause greatest above all others tending to depopulate the narrow way, and make that which is broad to be thronged, is the humility, purity, and strictness of the religion of Christ Jesus, who thus propounds the terms of discipleship with Him: "If any man will come after me, let him deny himself and take up his cross daily and follow me." It is this cross which the Apostle Paul gloried in, and the early Christians rejoiced that they were counted worthy to suffer humiliation and shame in the faithful maintenance of, that "the lovers of pleasure, more than the lovers of God," as perseveringly turn from, and reject and oppose, because it is a doctrine which preaches death to all that constitutes their life and happiness. Which enjoins a life and conversation absolutely at variance with the customs and pursuits of the world whose slaves they are; being a way too straight and narrow for the lusts of the flesh, the lust of the eye, and the pride of life, which so beguile these, to find room in. So fully verified respecting this is the Scripture, "The carnal mind is enmity against God," that it not only hates the mortifying, self-reducing discipline of low self-denial and the watchful restraints of the cross, but even those who uphold and enforce its obligations. Thus it is recorded that Ahab, king of Israel, said, "I hate this Micaiah (a true prophet of the Lord) for he doth not prophesy good concerning me, but evil." And to the same point our Lord thus testifies of His disciples to His Father, "I have given them thy word; and the world hath hated them, because they are not of the world, even as I am not of the world." And again, "If the world hate you, ye know that it hated me before it hated you," &c. Lamentable truly is the fact, that "the new and living way" to the kingdom, which the Saviour who died for us, and who is himself the way, hath opened up and given, is the one which any should deem too straight to be circumscribed by, or too hard to walk in; when at the same time the bewitching world in which we should be but "strangers and pilgrims," "seeking another and a better country," and where we are to live by faith and not by sight, is but a school place, a transient residence, a state of trial and conflict, and from which we are continually passing away.

How loudly then are we called upon not to seek to modify, to improve upon, or to explain away the plain requisitions of the gospel of Jesus! But rather, cheerfully submitting ourselves to all the wholesome restraints imposed as the only way to the incorruptible crown, seek to become the willing disciples of a suffering Saviour. And though in following

out such a course, hard names, and even the imputation of superior sanctity may be heaped upon such, lest them not fear but that He who hath never forsaken His wrestling, tribulated seed, and who hath ever made the way to life straight and narrow, will protect, and with Fatherly tenderness watch over all those who are engaged first and before all to magnify the Lord, to endure the turning and overturning of His holy hand upon them, unto their establishment, regeneration, and holiness.

These may have to suffer for the name and cause of Christ; and to themselves seem to enwrap often and long by the waters of Mara. For their refinement, the cup of bitterness may at times appear to be filled as to the brim, and the gold-proving furnace be heated seven times hotter than it was wont to be heated, yet the testimony is as sure as the days of heaven. "If ye suffer for righteousness sake, happy are ye." "Unto you it is given on behalf of Christ, not only to believe in him, but also to suffer for his sake." "Rejoice, inasmuch as ye are partakers of Christ's sufferings; that when his glory shall be revealed, ye may be glad also with exceeding joy." And again, "Let them that suffer according to the will of God, commit the keeping of their souls to him in well doing as unto a faithful Creator." It is in this school of "suffering, affliction and patience," that the good and wise in days over and gone, have been enabled to fill up that which is behind of the afflictions of Christ for his body's sake, which is the church. As "it is enough for the disciple to be as his master, and the servant as his lord," the kingdom of Him who was made perfect through suffering, must necessarily involve the sufferings of its subjects. But if we suffer with Christ in the straight and narrow way He requires all His humbly to walk in, we shall also reign with him in glory. Jeremy Taylor has well expressed that "He made for us a covenant of sufferings, His very promises were sufferings, His rewards were sufferings, and His arguments to invite men to follow Him, were only taken from sufferings in this life, and the reward of sufferings hereafter." So that though a faithful walking in the straight and narrow way does lead through sufferings and great tribulations; "through a land of deserts and of pits;" "through a land of drought and of the shadow of death;" it at the same time leadeth most surely and safely unto light, and life, and joy; even unto that city which hath foundations whose maker and builder is God.

John Newton.—"Nothing was more remarkable," says the biographer of John Newton, "than his constant habit of regarding the hand of God in every event, however trivial it might appear to others. In walking to his church, he would say, 'The way of man is not in himself, nor can he conceive what belongs to a single step. When I go to St. Mary Woolnoth, it seems the same whether I turn down Louthbury, or go through the Old Jewry; but the going through one street, and not another, may produce an effect of lasting consequence. A man cut down my hammock in sport, but had he cut it down half an hour later, I had not been here, as the exchange of crew was then making. A man made a smoke on the seashore at the time a ship passed, which was thereby brought to, and afterwards brought me to England.'"

The Potato.—It is popularly believed that we are indebted to Sir Walter Raleigh for this most important of esculent vegetable foods, the cultivation of which extends over a wider area than any other food plant; indeed so universally is it diffused over the habitable globe, that it is found in almost every position where man can subsist; even in the Arctic regions it struggles for existence, producing stunted watery tubers, in an imperfect state of development, whilst it flourishes in tropical as well as temperate climates, so easily does it adapt itself to circumstances. It ranks among the most useful of vegetable productions; it is highly prolific, and its value, which is incalculable, is hardly understood to its fullest extent. The whole family of the Solanacee is suspicious—great numbers are narcotic, and many of them poisonous; though in the case of the *Solanum nigrum* (one of the potato family) the young and tender shoots, when cooked, are used as a vegetable in some countries. It is curious to note that the poisonous bitter sweet, the tobacco plant, the tomato, the Cape gooseberry, the capsicum, the deadly nightshade and the henbane, the thorn apple, mandrake and petunia, all belong to the same genus as the potato; which most excellent vegetable was at first regarded with the eye of indifference by our forefathers, until it was imported by Sir Walter Raleigh, in the seventeenth century, who endeavored to attract public attention to it, and cultivated it himself on his estate in Ireland. So, although not actually the first to introduce it, he was, nevertheless, the means of first bringing it into public notice. He could not, of course, have been acquainted with one half of its useful properties, and little did he dream that in after years it would radically revolutionize the diet of the country where it was first cultivated. It was known by the Indian name of the sweet potato "*Batatas*," and under this name it continued to be spoken of and written about for some time after its introduction. We read that it was supposed it would be found useful for feeding "swine and other cattle."

The scientific analysis of the potato is not within the province of this paper, and it will be sufficient to say that it is rich in starch, that it does not contain as much gluten as our cereals, and that it is wanting in nitrogenous matter. It is, however, more nutritious than any other of our succulent vegetables. To derive the necessary nourishment from a diet almost exclusively consisting of potatoes, the stomach requires a considerable bulk of this kind of food. Hence the Hindoo who lives on rice, the Negro who lives on plantain, and the Irishman who lives on potatoes, are obliged to consume large quantities of these articles in consequence of the insufficient proportion of gluten which they contain. Potatoes are not nearly so nutritious as wheat, and the constant employment of them as a chief article of diet is not thought favorable to the development of the physical powers; neither does it tend to enlarge the mental faculties.

Potatoes have been said to possess the advantages of solidity like bread, and to have the healthful properties of many fresh vegetables, without their acidity. As an article of diet, when not used exclusively, they are of untold value; so universal has the use of them become, that they are almost an essential dish at dinner, for who ever thinks of

dining without potatoes? The potato is wanting in mineral substances; and it is curious to note how, in Ireland, this deficiency is supplied by the water which is almost universally strongly impregnated with mineral matter. The use of potatoes is a preventive against scurvy, if not an actual cure for it. Potatoes that have been exposed to the air and have become green, are unwholesome and new potatoes, *i. e.*, uricæ ones, have much to do with the prevalence of cholera and such like diseases, during the summer months.—*Food Journal.*

For "The Friend."

From the Letters and Papers of John Barelay.

(Continued from page 93.)

"1815 or 1816.—Surely I ought to thank and praise the Lord, for his abundant mercy in thinking of me; and especially in *mounting my vain confidence and self-dependence*; surely I am highly favored by His numerous and heavy corrections. The worldly man, and the evildoer, and the indifferent nominal Christian go on 'fair and softly'—they have perhaps few and slight troubles; but he whom the Lord visits and notices—he whom the Lord deigns to regard, and to prepare for himself is purified in the fire of affliction, as silver seven times tried. Why then should I be troubled and disquieted? why not rather endeavor to co-operate with the Lord? since I know well that it is for my good, to teach me from the consideration of the brevity of life, the uncertainty and instability of earthly things, its weakness and wickedness of my own hear and the frailty of others, to teach me,—I suffer from these and other considerations, to pre-prepare to the attainment of those things, which will open unto me a way to peace at joy eternal, through Jesus Christ.

"1816, January.—I am unexpectedly led this time into much inward exercise of mind being earnestly desirous that I may lay hold and keep hold of those things, which pertain to life and salvation,—to run daily that race which is set before me. Those who seek the Lord to serve him, shall indeed find him in the knowledge of his will: where the desire is, there is favorable evidence; seeing they every good gift and every perfect gift come down from the Author of all good. Divine grace which begets this desire, though smothered in many hearts, has freely been given without respect of persons to all; and is sufficient, if obeyed, to work out the salvation of all, to lead them in the way they should go, and to give them strength to walk in it; hence should we cherish this precious desire after holiness, and that little seed which preserved and fostered, will grow up and become a large tree, bringing forth fruit abundantly. * * * Let us then seek unto the Lord still more earnestly, and patiently wait his coming, in silent subjection of soul, desiring not our own will, way, and time, but I surely there is cause for thankfulness in the midst of the driest season, and even when our own apprehension are forgotten or forsaken by Him whom our soul desires; we know that it is the same Lord, who goes to us the gift of his grace, that has himself permitted the sensible feeling of it to be taken away, and all for our good, though we do not think so. Let us then learn, in whatever state it may please infinite wisdom and goodness to place us, therewith to be content. * * * 1816, February 4th. I have been led

think that the only substantial source of consolation in times of trouble, is a firm and an abiding faith in our Maker and Redeemer. Whatever anguish a sincere Christian may roam under, whatever wretchedness is permitted to come upon him, yet let him trust in the name of the Lord, and stay upon his God." David seemed to trust with great energy, when he says, "God is our refuge and strength, a very present help in trouble; therefore will we not fear, though the earth removed; &c.—"The Lord of hosts is with us, the God of Jacob is our refuge." Though an is born to trouble, and every one of us sooner or later suffer; yet a simple and implicit reliance on him in whom we have believed, will be found sufficient for our consolation and support. We are allowed to mourn;—a blessing is attached to mourning;—the act of godly sorrow is said to be repentance;—Jesus himself wept; and it is said of him, that he was a man of sorrows, and acquainted with grief. But we are reminded not to sorrow as those who have no hope." Let us, in the midst of the most acute and poignant grief, never despair; but rather with bright Job, let us endeavor to attain to that *sublimis, submissive frame of soul*, which leads us to commit ourselves to the disposal of an Almighty Creator and merciful Father.

"1816, February 8th.—The deepest affliction which is caused by the privation of outward objects and things, (however near and dear those objects may have been to us,) cannot be compared to that utter distress, and anguish of spirit, which the pilgrim is permitted at times to undergo on his journey towards Zion. Who can have an idea of it, without having experienced this trying situation; when man, who is by himself a poor, weak, helpless creature, dependent upon his Maker for strength, encouragement, consolation, and ability to do and to think any thing right, is thus left apparently, and exposed to the attacks of a relentless enemy, without aide or guardian, naked, hungry, blind, distressed,—where shall poor man find shelter in his stormy season of life? O! "Let him trust in the Lord, and stay upon his God." In this time of desertion, when after "toiling in the midst of the sea," being "tossed with the waves," and "the wind contrary," he seems all night spent, and apparently no nearer his desired haven;" then, if he cry unto the Lord in his trouble, He will bring him out of his distresses: He will make the storm a calm, and that the waves thereof will be still; and the troubled disciple shall see Jesus coming to him walking on the waves, and shall hear him distinctly to say, "Be of good cheer, I, I am, I am not afraid."

"1816, February 18th.—The Lord in his infinite mercy has been pleased to strike me to the earth, like Saul, with a sense of my sins, and to enable me sincerely and fervently to inquire of him, "What wilt thou have me to do." I can indeed testify that his forbearance and long-suffering towards me have been wonderful; and I have great cause for daily thanksgiving, that I have been taught in some small degree the knowledge of myself, and in which mercy shown the abominations and gross evils, in which my heart was enveloped: to coverings of self and sense that *disguised the real state of my mind from me*, have been imparted removed; and I have been permitted to discover a glimpse of what I ought to be. My ardent desire therefore is, that He who

has helped me thus far, would be pleased to continue to extend his paternal care over me; that he would preserve in me an invariable desire to do and abide by his will, at all times, and in all things; that he would teach me the knowledge of the Truth; and that I might be so strengthened therein, as to be enabled to say in sincerity,—I am thine,—do with me what thou wilt."

(To be continued.)

The Leisure Time of Boys.—Every father of a family knows that there is a time in the life of his sons that gives him much trouble and some anxiety. We allude to the period of boyhood, when exuberance of spirits and thoughtlessness are at their height, and when the studies imposed by school discipline are entirely insufficient to find adequate employment for their too active-minds and bodies. And it is not possible, or even desirable, to increase the already considerable application of all well bred boys to the study of books and the acquirement of learning.

We would suggest, to the many parents who have been perplexed with this difficulty, to give their lads every possible opportunity of acquiring a mechanical trade. The industry and ingenuity of a boy of average ability may easily be made to furnish him with a never failing source of amusement of the best order. The boy who can produce or make something already begins to feel that he is somebody in the world, that achievement of a result is not a reward reserved for grown people only. And the education of mind, eye, and hand, which the use of tools and mechanical appliances furnishes, is of a great and real value, beyond the good resulting from the occupation of leisure time. Having nothing to do is as great a snare to the young as it is to the full grown; and no greater benefit can be conferred on youths than to teach them to convert time now wasted, and often worse than wasted, into a pleasant means of recreation and mental improvement.

As logic and mathematics have a value beyond accuracy in argument and the correct solution of problems, in that they teach men the habit of using their reflecting powers systematically, so carpentry, turning, and other arts are of high importance, even if the boxes and silk spoons produced are of little value. These occupations teach boys to think, to proceed from initial causes to results, and not only to understand the nature and duty of the mechanical powers, but to observe their effects; and to acquire knowledge by actual experiment, which is the best way of learning anything. All the theories culled out of books leave an impress on the mind and memory, which is slight compared to that of the practical experience of the true mechanic.

Our advice is, to all who have the great responsibility of the charge of boys, give them a lathe, or a set of carpenter's, or even blacksmith's tools. Give their minds a turn towards the solid and useful side of life. You will soon see the result in increased activity of their thinking capabilities, and the direction of their ideas towards practical results; and, still more obviously, in the avoidance of idle mischief and nonsense (to omit all reference to absolute wickedness and moral degradation,) which are, to too great an extent, the pastime of the generation which is to succeed us. The future of the world is already sown, and is

springing up in our children; is it not worth while to bestow a little thought on the cultivation of a growth so important to society, and so easily influenced for good or for evil?—*Scientific American.*

Be at your Posts.

"The removal of many dear Friends from among us, calls loudly upon survivors to have their loins girded and lights burning, with oil in their vessels with their lamps, that they be not taken by surprise, but be found on the watch, prepared to enter with the Bridegroom, at whatever hour he may be pleased to come. It is *his will* that is our sanctification, not the multiplicity of engagements in *our own will*, though we may be induced by the transformations of the enemy, to value our acts as doing God service. If we are led away from the footsteps of Christ's companions by the power of deception, in a path which he does not point out for us, we shall land in confusion, and in destitution of the divine life, equally as if we had been captivated by the love of the things of the world, and it may be in a condition more difficult to discern our sad mistake. Abasement and deep humility before the Searcher of hearts, is the place of safety, wherein we may be kept from falling, and prepared to be presented faultless before the presence of his glory, through unmerited mercy, with exceeding joy, where our stewardship in the use of his gifts is to be accounted for. The great business of the church and its members is to cooperate with her holy Head in the salvation of souls, which can only be done by his grace working in the heart by faith, and love to him and our fellow-creatures, and leading us to do his will in all things."

The Prussian Miller.—Near Potsdam (Prussia) in the reign of Frederick, King of Prussia, was a mill which interfered with a view from the windows of Sans Souci. Annoyed by this inconvenience to his favorite residence, the king sent to inquire the price for which the mill would be sold by the owner. "For no price," was the sturdy reply, and in a moment of anger, Frederick gave orders that the mill should be pulled down. "The king may do this," said the miller, quietly folding his arms, "but there are laws in Prussia," and forthwith he commenced proceedings against the monarch, the result of which was, the court sentenced Frederick to rebuild the mill, and to pay besides a large sum of money as compensation for the injury he had done. The king was mortified, but had the magnanimity to say, addressing himself to his courtiers, "I am glad to find that just laws and upright judges exist in my kingdom." In the reign of one of Frederick's successors, the head of the miller's family, who had in due course succeeded to the hereditary possession of his little estate, finding himself, after a long struggle with losses occasioned by the war, which brought ruin into many a house besides his own, involved in pecuniary difficulties that had become insurmountable, wrote to the then king reminding him of the refusal experienced by Frederick the Great at the hands of his ancestor, and stating that if the king now entertained a similar desire to obtain possession of the property, it would be very agreeable to him, in his present embarrassed circumstances, to sell the mill. The

king immediately wrote, with his own hand, the following reply:—

"My dear neighbor; I cannot allow you to sell the mill; it must remain in your possession as long as one member of the family exists; for it belongs to the history of Prussia. I lament, however, to hear that you are in circumstances of embarrassment; and therefore send you six thousand dollars to arrange your affairs, in the hope that this sum will be sufficient for the purpose.

"Consider me always your affectionate neighbor,
FREDERICK WILLIAM."

Selected.

The Overspreading Cloud.

"The original cause of the cloud which covers our once highly favored but now afflicted Society, is *disobedience to, and forgetfulness of God*. We live at a period when earthly prosperity furnishes the comforts, and to a large number, the luxuries of life, in great abundance. With comparatively little labor, the means are obtained to gratify the appetite for sensual indulgence, and in the bountiful provision of a gracious Creator, all classes are prone to forget the great Giver, and the solemn duty of constant reverent walking before Him. Self gratification is more the object of men, than the daily inquiry, 'Lord, what wouldst thou have me to do? What shall I render unto thee for all thy benefits?' In proportion as self-love prevails, the love of God is forsaken, until it is rarely felt in the heart; for if any man love the world, to which pertain the lust of the flesh, of the eye, and the pride of life, the love of the Father is not in him. What then can we expect, but that we shall be left to our own choice, and that *emptiness and confusion, in principle and practice, will come over us.*"

Poison of Tobacco.—There is more poison in a single package of tobacco, than in the foil which surrounds 100. If any body doubts this, let him hold a sheet of paper over the smoke that curls from the burning tobacco, and after a pipe full, or a cigar, has been consumed, scrape the condensed smoke from the paper, put a very small amount to the tongue of a cat, and he will see her die of paralysis in 15 minutes. To human beings tobacco may be a slow, but it is a sure poison, causing many diseases which arise from stimulation, and poisoning the blood, such as vertigo, depression of mind, dyspepsia, paralysis, &c. Hundreds and thousands; yea, and hundreds of thousands, are shortening their days by its use, who may be so self-deceived as to suppose their health is rather strengthened than weakened by the habit, so pleasant are the immediate effects of it, stimulating the brain, and exciting the mind to undue elevation, to be followed by corresponding depression.

Tea growing is now carried on in various parts of the South with considerable success. A gentleman in Wilmington, N. C., has successfully raised plants and cured tea, which he claims cannot be excelled in flavor by the imported article. He obtained the plants from the Agricultural Bureau of the Patent Office, previous to the war, and their number has increased every year, the latter plants being fully equal in every respect to those first grown. Successful experiments have also recently been made in South Carolina, Tennessee, and California, and the climate of

several other sections of the United States is well adapted to this plant. California especially seems to possess peculiar advantages in this respect, and tea culture has already commenced among the Chinese who have settled there, and with the most encouraging results.—*North American.*

MY BIRTHDAY.

BY JOHN G. WHITTIER.

Beneath the moonlight and the snow
Lies dead my latest year;
The winter winds are wailing low
His dirges in my ear.

I grieve not with the moaning wind
As if a loss befall;
Before me, even as behind,
God is, and all is well!

His light shines on me from above,
His low voice speaks within,—
The patience of immortal love
Outwearying mortal sin.

Not mindless of the growing years
Of care and loss and pain,
My eyes are wet with thankful tears
For blessings which remain.

If dim the gold of life has grown
I will not count it dross,
Nor turn from treasures still my own
To sigh for lack and loss.

The years no charm from Nature take;
As sweet her voices call,
As beautiful her mornings break,
As fair her evenings fall.

Love watches o'er my quiet ways,
Kind voices speak my name,
And lips that find it hard to praise
Are slow, at least, to blame.

How softly ebb the tides of will!
How fields, once lost or won,
Now lie behind me green and still
Beneath a level sun!

How hushed the hiss of party hate,
The clamor of the throng!
How old, harsh voices of debate
Flow into rhythmic song!

Methinks the spirit's temper grows
Too soft in this still air;
Somewhat the restless heart foregoes
Of needed watch and prayer.

The bark by tempest vainly tossed
May founder in the calm,
And he who braved the polar frost
Faint by the isles of balm.

Better than self-indulgent years
The outflowing heart of youth,
Than pleasant songs in idle ears
The tumult of the truth.

Rest for the weary hands is good,
And love for hearts that pine,
But let the manly habitude
Of upright souls be mine.

Let things that blow from heaven refresh,
Dear Lord, the languid air;
And let the weakness of the flesh
Thy strength of spirit share.

And, if the eye must fall of light,
The ear forget to hear,
Make clearer still the spirit's sight,
More fine the inward ear!

Be near me in mine hours of need
To soothe, or cheer, or warn,
And down these slopes of sunset led
As up the hills of morn!

It is the part of folly to be too sagacious in seeing the faults of others, and to be ignorant of our own.

Selected for "The Friend."

Those who leave our Society because of the Cross

Our Divine Lord and Master, when he so joined outwardly among men, assured his followers, "If a man abide not in me, he is cast forth as a branch, and is withered." Whilst He has ever shown himself abundantly willing and able to save to the uttermost those that come unto him, and has in every age proved himself to be a stronghold in the day of trouble, and a very present help in every time of need, delighting to manifest himself for the comfort and strength of those who abide in Him the Vine; so, on the other hand this awful alternative has been all along conspicuously fulfilled upon those, who having once known the blessedness of being engrafted into the Truth, have gone from it, and fallen away. It was remarked by Robert Barclay, and it has been observed from that day to the present, that few who leave on Society on account of the way of the cross *become too narrow for them*, ever turn out to be any way eminent or truly estimable among those to whom they may attach themselves. Perhaps the case of George Keith is as strongly to this point as any other that could be named and therefore may be suitably held up to the notice of the Society and to others, at this day, for our warning and instruction; seeing that the most accomplished Christian has need to watch and pray that he enter not into temptation, and also to take heed lest there be in any wise an evil heart of unbelief departing from the living God, whose preserving presence and grace, duly heeded, is sufficient for every possible exigency.

In regard to natural abilities, as well as those acquirements which are so eagerly and perseveringly aspired after at schools and colleges, George Keith is said to have excelled and these were in good degree subjected and regulated, as we have ample ground to believe, by the yoke of Christ. Of this he gave evidence, both by doing and suffering, for a long course of years, upon his joining the Society of Friends. He was fully convinced of their principles, zealously advocated them by preaching, by writing, and by public disputation, and sealed his attachment to them by sharing with his brethren the cruel persecutions and imprisonments they endured. Might we not then have reasonably expected from such an one, when he became dissatisfied with this religious profession, and joined what is termed, "The established Church of England," that he would have done credit to the cause he had taken up? Surely, he had made inducement, from motives that act strongly on most men, by his whole future career endeavor to convince both his former and his new friends, that he had made a wise choice; that he had discovered a higher, purer, and "more excellent way," wherein, also his gift and talents should shine more advantageously. But how opposite to this, was the downward path of the once worthy and admired George Keith!

He had been beyond all question, a man truly enlightened, and deeply versed in things that relate to the kingdom of God—"once enlightened," when, among the tribulated people called Quakers, he was strengthened with might in the inner man to endure hardness and to despise the shame of the cross of Christ; with them he had been "made partaker of the Holy Ghost," had "tasted that good word of God and the powers of the world

e." But, leaning to his own understand-
 heart was wroated from, and grew
 above the lowly witness for God in
 science, so that he grew wise in his
 respect, impatient of rebuke or control,
 the more easily fell into the subtleties
 and reasonings of the adversary.

contrast was great, certainly, between
 and his frequent companion, Barclay,
 must be the case between those who
 st their integrity, "the beginning of
 confidence steadfast unto the end," and
 who, like Keith, have not kept their
 tribulation in the light and truth of Christ,
 to become "wandering stars" from the
 sent of God's power, even "as unstable
 as so as at length to be like unto the
 big waves of the sea, foaming out their
 foam," whose troubled waters "cannot
 be cast up mire and dirt." These
 individuals had similar advantages, were
 able to similar temptations: they were
 flows in religious experience, and often
 ous services, inasmuch that some, in
 attempts to undervalue Barclay's labor
 have even attributed to Keith the
 merits of Barclay, as though the latter
 merely borrowed and copied the senti-
 ments of the former. They had indeed often
 taken sweet counsel together, and gone
 in company as to the house of the Lord,
 and sat together by one Spirit into
 unity, yea, oneness, even by that Spirit
 of truth and humbles, purifies and sus-
 tains soul.

Keith was the truth of that well
 language fulfilled, "With the talents
 of a man may be a fool," or as the
 words it of some, who "professing
 selves to be wise, became fools," and
 their imaginations, their foolish heart
 darkened." Accordingly that very sys-
 tem of religious faith and practice, which poor
 Keith had loathed and rejected as cor-
 rupt and which he had borne so noble a
 martyr, did he come to embrace and to
 go down with all its accompaniments;
 and into his mind a most virulent en-
 emity against the whole scope and tendency
 of views of Christian doctrine which he
 unverserably defended; so that he
 did in reply to his attacks upon them
 his principles, were readily able "out of
 his mouth" to judge him: it was literally
 his gainst Keith.

Keith is precisely the situation and di-
 stance which some in connexion with us
 a danger of falling, or have fallen, at the
 juncture. George Keith and his fol-
 lowers called themselves "Christian Quakers,"
 though the original Quakers were no Chris-
 tians, as they set up separate meetings.
 He led the Society at large of Deism and
 denying Christianity, because they set
 up above the Scriptures, saying, "that
 which the Spirit was any lawgiver to
 us since the days of Christ and his
 death is of no less dangerous conse-
 quence to overthrow Christianity and introduce
 a new religion, &c."

Keith becoming imbued with disaffec-
 tion towards Friends, the first occasion he
 against them in point of doctrine was
 that they did not sufficiently preach
 outward or personal appearance, suffe-
 ring death, &c.; indeed he represented
 the important truths were actually

suffered to go into oblivion, were even dead
 and buried among the Quakers; and that he
 was raised up to be an instrument in the
 hands of the Almighty, by whom in a heavenly
 vision he had been expressly instructed to
 revive and proclaim these ancient fundamen-
 tal truths. Well might Thomas Ellwood ex-
 claim, "Judge now, what a conceited opinion
 this man hath of himself, and what evil
 thoughts he hath let in concerning Friends,
 that he could let fly a slander, which affects
 not only all our ministering Friends, but even
 the body of Friends in general." "That sug-
 gestion," continues he, "is as false as it is foul.
 For these great and weighty doctrines not
 only always, since we were a people, have
 been, but still are at this day owned, received,
 believed, confessed to, and acknowledged by
 the body of Friends, and declared and set
 forth in our public meetings in the openings
 of the Divine Life, and in the movings, guid-
 ance, and direction of the Holy Spirit." And
 John Whiting gives a similar testimony as
 follows: "For my part I will freely declare,
 (having been conversant among the Quakers
 from by childhood, and can remember longer
 ago than George Keith was a Quaker, and
 have had intimate acquaintance with many
 of the most eminent among them for many
 years, and heard their declarations, and read
 more of their books than ever George Keith
 saw perhaps,) that I never heard or found that
 they did in the least slight or undervalue
 Christ's coming and suffering in the flesh, or
 the fruit and benefit of it in order to salvation;
 but only that people had made the historical
 belief of the outward transactions of it all their
 faith that they counted necessary to salvation,
 and had neglected the inward work of it.
 Therefore were they raised up of the Lord to
 turn people's minds to the measure of Christ's
 Spirit in themselves, that thereby they might
 come to know and partake of the benefit of
 it." And Ellwood also makes a similar obser-
 vation, to this import: That the apostacy in
 the early ages of the Christian church was
 rather from the inward life and power of god-
 liness, than from an acknowledgment of the
 outward appearance and work of Christ in
 the flesh; inasmuch that while the latter doc-
 trines continued from age to age to be admit-
 ted and preached among every sect of pro-
 fessed Christians, the doctrines relative to
 the manifestation of Christ by his Spirit in the
 heart were generally departed from, lost, and
 forgotten. "Therefore," continues he, "when
 it pleased God to raise up and send forth a
 true Gospel ministry again, in this latter age
 of the world, to restore true Christianity, and
 to gather out of the many professions a pecu-
 liar people to himself, it was agreeable to the
 Divine Wisdom, to bring to light that which
 had been hidden, to restore to the nations that
 which had been lost, to turn people to that which
 they were most ignorant of, and strangers to,
 rather than that which they professed to
 know before and had been all along trained
 up in."

The sequel of George Keith's history need
 not be much enlarged on. His adherents
 gradually forsook him, perceiving that his re-
 ligious tenets were fast verging towards those
 of the "Established Church of England." At
 length, after having used his utmost endeavors
 to traduce and trouble Friends, in a highly
 dishonorable and unworthy manner, but pro-
 fessedly with a view to recover them from the
 error of their way; as a reward for his ser-

vices, he was presented with the living of
 Ellerton parish, in Sussex, where he ended
 his days. It seems, he was favored near his
 latter end with seasons of serious reflection,
 wherein he viewed the peaceful state of his
 mind, whilst in unity and peace with the
 "Quakers" as brethren, and felt remorse
 under the loss of it; on his death-bed using
 this language, "I wish I had died when I was
 a Quaker; for then, I am sure, it would have
 been well with my soul!"—*Friends' Library.*

For "The Friend."

Tennessee Freedmen's Schools.

Athens, 11th mo. 10th, 1871.

To Y. Warner:

Dear Friend,—Thy letter was received
 yesterday—we were glad to hear from thee.
 The books arrived Third-day evening, all
 safe—were needing some very much: have
 succeeded in getting slates for about all that
 can read; and are in hopes the whole school
 will be supplied in a few days: then all can
 be employed. We have 117 enrolled; and an
 average attendance during the four weeks
 since the organization of the school, of 85.
 We find plenty to do for both. The large
 ones seem very industrious, for the most part,
 and most of them are learning very well; and
 as far as I can learn come as regularly as they
 can. Some walk three or four miles.

The First-day school is not as large as it
 should be; but we still urge them to come—
 have had about 74 there at a time.

The people are always inquiring when we
 have heard from thee, and want to know
 when thee is coming.

We have concluded to go to Quarterly
 Meeting—will dismiss school 6th and 24 days:
 so, if nothing happens to prevent, will be at
 Lenoir on 6th day: are enjoying good health
 and feel interested in our work.

Very respectfully,

ALMIRA KING,
 LIZZIE KENDALL.

Appreciating the valuable services of these
 young Friends as worth more than mere
 money, I invited them to Quarterly Meeting,
 offering to meet them at Lenoir.

Patrons of these schools will please to ac-
 cept scraps until there may be time for re-
 ports. It is due, however, to acknowledge
 the liberality of Wm. H. Pile, and Sherman &
 Co., printers, in various aids to our supplies,
 as circulars, cards, vowel and elocution charts,
 &c., at different times, cheerfully, and well
 executed, gratis. Y. WARNER.

Maryville, 11th mo. 13th, 1871.

SCRAPS FROM TENNESSEE.

"I want something religious." (This was
 said by one of our good readers (and a good
 reader he is) on asking for a library book. It
 was said modestly and not for effect, in the
 hearing of the teacher and a few other pupils,
 only. "Youthful Piety" was handed to him,
 with which he was well pleased. When any
 one has read a book through, and shows by
 examination it has been well read, he may
 return it and get another without waiting for
 "library day." This has been done frequently.
 The library is small yet. Friends having
 really good books, and suitable for youth—
 very plain sensible reading—and wishing to be
 relieved of them, or to give them from
 another motive, may send them to 116 North
 Fourth St., up stairs. Wm. P. Hastings, in
 speaking of the influence already due to the

circulating library, remarked, "I am pretty sure I have seen the good effect of this reading, just in the effort in school to be better scholars."

The following shows that opposition still exists:

"Cloyd's Creek, Nov. 13th, 1871.

"Dear Friend,—Years of the 7th is before me. I spoke of your meeting (about a school) to the Freedmen. They think best to have it at Ebenezer, because the church at Cloyd's Creek has been sold. The man that bought is opposed to educating blacks, and they think he would oppose the meeting at that place. You will please meet at Ebenezer the time you designated.

H. M. EAKIN."

Yesterday, while waiting for the train at "Mossy Creek," a Freedman said, "Is you the gentleman attending to helpin git up schools for us freed'uns." Yes. "I wish you'd see about our settlement over yonder." He stated that they had money, but no land-holder would let them a place to "set the school-house." I found this so; and took the matter in hand, for the care of those who will make it right.

Y. W.

Eleventh mo. 17th, 1871.

Commented.

The Last Days of John Wilbur.

Some time ago there appeared on the pages of *The Monthly Record*, of Birmingham, under the head of "Visit of William Robinson and Henry Binns to America," who were then travelling as ministers in that land, a few particulars respecting the last days of John Wilbur, which appeared to be almost if not altogether devoid of foundation. These were in effect that the two above-named Friends had been informed by the wife of Ezra Wilbur, that she was in John Wilbur's family at the time of his last sickness, that he was brought under great distress on account of his course of opposition to J. J. Gurney's doctrines, that he retracted that opposition and repented, and then was favored with forgiveness, and that she thought the time had now come when it ought to be known.

This report, as might be expected, attracted a good deal of attention, and efforts have been made to remove the erroneous impression conveyed by it; and quite recently a Friend resident in Philadelphia, hearing that Clara Willits, the person from whom Henry Binns and William Robinson received the story, lived near to Le Grand, Iowa, where several Norwegian Friends have settled, wrote to one of the last named Friends to inform him what she (C. W.) had to say on the subject. He soon sent her statement, written on the 16th of 5th Month, 1871, and signed by herself, in his presence which is as follows:—"I am willing to state that I never saw John Wilbur; and furthermore I would say, at the time the conversation occurred referred to, my mind was in such a state, I do not feel that I am accountable for what transpired."—(Signed) Clara Willits.

The above shows how useful it is for those professedly going abroad as ministers of the everlasting Gospel, to watch carefully that they be not thus found lending an ear to that in themselves, or in others, which is not of Truth, or truth-speaking, but is fruitful in evil report.

Let it be a watchword unto all.

Hat Honor.

For "The Friend."

The following incident, related by Robert Proud in his History of Pennsylvania, is interesting, and may be new to some of the readers of "The Friend." The jealous care which the members of our Society at that day evinced to maintain their religious testimonies unblemished, may incite to faithfulness in the particular referred to at the present day.

"At this court, (the Court of Chancery), in which Sir William Keith (then Governor) was President, John Kinsey, a Quaker and a lawyer of eminence, who was afterwards Chief Justice of Pennsylvania, was, in the year 1725, obliged, in the way of his business to attend; where appearing with his hat on his head, according to the usual manner of that people, the President ordered it to be taken off, which was accordingly done. His friends, the Quakers, took the affair under consideration; and soon after, at their Quarterly Meeting, in Philadelphia, appointed a committee to wait on the Governor; and, in a respectful manner, to request him to continue the privilege, to which the Quakers conceived themselves legally entitled, of appearing in courts, or otherwise, in their own way, according to their religious persuasion." An address was also presented signed by ten Friends under appointment of that meeting, which after reciting the legal grounds of their refusal to submit to the common usage in this particular, states, that "though no people can be more ready, or willing, in all things essential, to pay all due regard to superiors, and honor the courts of justice, and those who administer it, yet in such points as interfere with our conscientious persuasion, we have openly and firmly borne our testimony in all countries and places, where our lots have fallen."

This address was read in open court, and upon consideration the following entry was directed to be made. "On consideration had of the humble address, presented to the Governor, this day read in open court, from the Quarterly Meeting of the people called Quakers, for the city and county of Philadelphia, it is ordered, that the said address be filed with the Register, and that it be made a standing rule of the court of chancery for the Province of Pennsylvania for all time to come, that any practitioner of the law, or other officer, or person whatsoever, professing himself to be one of the people called Quakers, may and shall be admitted, if they so think fit, to speak, or otherwise officiate, and apply themselves, decently unto the said court, without being obliged to observe the usual ceremony of uncovering their heads, by having their hats taken off; and such privilege heretofore ordered and granted to the people called Quakers, shall at no time hereafter be understood or interpreted, as any contempt or neglect, of the said court, and shall be taken only as an act of conscientious liberty, of right appertaining to the religious persuasion of the said people, and agreeable to their practice in all civil affairs of life."

So well was this scruple known and regarded, that the late Samuel Bettle used to relate that in the galleries of the building where Congress was accustomed to meet in Philadelphia, a notice to visitors reminding them that persons were expected to remove their hats upon entering, expressly excepted members of the Society of Friends.

John Wooman in an epistle to F. wrote: "A trust is committed to us, a and weighty trust, to which our attention is necessary. Wherever the members of this visible gathered church themselves to that which is contrary to purity of our principles, it appears to breach of this trust, and one step back to the wilderness, one step towards undoing God in infinite love hath done through faithful servants in a work of several and like laying the foundation for sufferings."

The Grape Sugar Industry.—The manufacture of grape sugar has assumed large proportions. In Germany there were, in sixty establishments in operation, which produced that year 22,000,000 pounds of and 8,800 pounds of sugar. Since that other and more extensive factories have established, and the cultivation of potato for the purpose also covers a large extent of territory. The potato plantations are in sandy districts, adapted to their growth. The method pursued in nearly all of the factories is identical. The wet starch is put in to a large washtub, where, under constant stirring for an hour, it is entirely solved in water and dilute acid. Pro-washtub it is run into vats, where it is boiled by steam; here it remains, for four or five hours; for syrup, two or three hours. It is then put into the neutral tanks to be treated with carbonate of soda and left until the sediment, chiefly composed of gypsum, has settled; this usually requires six hours. The sweet liquid thus obtained evaporated in vacuum pans, filtered, and to crystallize, if sugar is to be made, manufactured into syrup.—*Technologist*

That man or woman, who grows big conceit of themselves, can scarcely see their eyes with seeing, or their appetite craving. Hence it follows, "What shall I eat? What shall I drink? Where will I deck and adorn myself?" Nay, says incessant seeker after the fashions of the world, which is the newest fashion, or dress? All this is but vanity and vexation of spirit. I take these to be like those prophet spoke of, "Israel is an empty vessel, bringeth forth fruit unto himself." O children of believers, may you not be of this sort. Seek not to come up in imitation of those who follow the foolish fashions of the world, lest you grieve God and your parents, whose love and zeal for the cannot admit of such sinful liberty. I seech you, let your conversation be uncovering these things. Do not prove the patience of your tender parents by murmuring and reasoning, by bringing examples of wise, "Such Friends' children have clothes made after this fashion or the other, urging your parents by that reasoning, which hath no reasoning in it." Oh! let such fear in time, for these borders near upon willful disobedience, and is to be feared the next step they take into the wide world of wickedness.

I entreat young people who have been any measure, guilty of the above mentioned evils, be humbled before the Lord; strip selves of your vain attire; repent that you gave way to the reins of your vain

drawn out after the glory of this world.
John Jacob.

British Postmaster General, in his report issued, in order to give some idea of the magnitude of the operations under his management, states that last year, in the General Office, in London, alone, there were 8,000 yards of string used in tying up letters for the country, and 17,637 pounds sterling wax for securing the bags in which letters were contained. The bags in use were of purpose numbered seven hundred and ten. The quantity of ink used in England and Wales for impressing post marks on letters, and for obliterating postage stamps amounted to four tons, and the forms employed to 26,692,000.

In 1870, there were delivered in the Kingdom of Great Britain and Ireland, 2,722,000 letters and 108,608,000 newspapers, book and pattern packets. Money was issued to the amount of 899,000, and 875,495,520 were deposited in the Savings Banks by 1,183,153. The number of registered letters increased from 3,318,569, to 3,045,994, in 1870, of which 12,000 were lost. The number of valances sent to the London offices is estimated to have been in 1,448,841, in 1869, to 1,545,755, and the number posted in London increased from 241,864 to 1,396,201. The greatest number of postal cards circulating through the offices of the United Kingdom during the year 1870, amounted to 1,668,000 or 100 in England, 167,000 in Scotland, and 100 in Ireland.

What desires have been almost unremitted at the Lord would not let me be overcome by any temptation which the evil one might present. I feel the necessity of watching over my thoughts and words, as well as my actions, wherever I go; in the street, in the house, at the store, at home and in the family, lest any thing should slip from me which would injure another, or wound my own conscience. *Wm. Evans' Journal.*

THE FRIEND.

ELEVENTH MONTH 25, 1871.

We have that many Friends in this country have been aware there has been, for more than three years past, a difficulty in publishing the East Monthly Meeting, Lancashire, arising from some of its members holding sentiments relative to fundamental principles of the Christian religion, irreconcilable with the faith held by Friends. After drawing attention from the Quarterly Meeting to its succeeding in removing the cause of dissension, or being likely to reclaim or to separate the persons holding the unsound sentiments, the case was brought before the Yearly Meeting in 1870, and a committee appointed to give the necessary care in the case. The result has been, that one of the principal officers has been disowned, twelve have resigned their right of membership, and a protest against the proceedings in the case, signed by thirty others in membership, has been brought to the Monthly Meeting, but, of course, not read nor accepted. This protest, however, is the case given by the pro-

testants, has been published; from which it is evident that their religious views correspond in several particulars with those held by the majority of the Hicksites in this country.

In order that our readers may be more particularly informed respecting the case, we take the following from a communication published in the last number of the British Friend, written apparently by a member of Hardshaw East Monthly Meeting.

"It may be well in the first place to direct attention to the address from the Yearly Meeting's Committee presented to Hardshaw East Monthly Meeting on the 12th of First month last, in which it is stated that there has been brought before them the existence among us of opinions freely propagated, tending to throw discredit upon Holy Scripture, and upon some of the great truths therein set forth.

"At the Monthly Meeting in 4th Month, this committee brought before the meeting the name of a Friend holding and propagating these unsound views, and expressing their willingness to take further charge of the case, to which service the meeting appointed them.

"At the Monthly Meeting in 5th Month the minute was continued. In the 6th Month, when the minute of the previous month was read, and no report received from the committee, one Friend said it was cruel to continue the case month after month; another said that if the committee expected any retraction they would be disappointed; and a third hoped the case would be dismissed from the books. Several other Friends giving as their judgment that no unnecessary delay had occurred, the case was continued.

"Soon after this, Charles Voysey came to Manchester and delivered his notorious lecture on the Bible in the Memorial Hall, at which the Friend, whose name was on the Monthly Meeting books, took the chair. He also invited to his house about forty Friends, and others, to meet Charles Voysey the same week. This induced a common remark, that 'the Quakers had taken Mr. Voysey by the hand.'

"At the Monthly Meeting in 7th Month, twelve of the committee were present, when they reported the labor they had given in his case, and that they had no hope of further effect producing any change in the opinions held by the Friend. After more than three hours' deliberation and discussion, the meeting concluded to separate the Friend from membership, and a minute was made to that effect.

"At the Monthly Meeting in 8th Month, eleven resignations were sent in. They were read, but the consideration of them deferred to a future meeting. These resignations were chiefly on the ground that the writers were united in belief with the Friend, who had been separated the previous month, and that they could not therefore remain in membership.

"The Friend who was separated often publicly expressed himself thus:—'God sent Moses at the right time, he sent Christ at the right time, and he sent John Stuart Mill at the right time, thus placing our Saviour on a level with man. He also said on one occasion, when Christ had been pointed out as the Son of God, 'Yes, we are all sons of God.'

"Some of those who resigned their membership have said publicly that the Scriptures are no more inspired than the works of Thomas Carlyle; and one of their number

publicly affirmed that 'God was a God of love and required no propitiatory sacrifice for the sin of man.' I could adduce numerous similar sentiments both of the individual who was separated and of those who sympathized with and supported him, but these will suffice.

"At the Monthly Meeting in 9th Month another resignation was received and read, when the whole twelve were solily considered. It was concluded to comply with the request of the writers, except the one named by their correspondent 'H.'

To allow those who have so widely departed from Christian doctrine as held by Friends, to withdraw from the Society, without the meeting issuing a public testimony against them and their errors, appears to us a superficial way of maintaining the truth, but it was the course pursued towards the Beaconites.

In a note received from Thos. Drewry,—the Friend whose protest against the departure of London Yearly Meeting from many of the principles of Friends, was published in the 7th number of the present volume of our Journal,—he says there was "a misprint in the initial of the name of the magistrate who signed the document. His name is Frederick Kemp, therefore it ought to have been F., not L. Kemp. It was corrected in the *British Friend* of the following month."

We likewise received from England the article in to-day's issue headed "The last days of John Wilbur."

SUMMARY OF EVENTS.

FOREIGN.—A dispatch has been received from the State Department at Washington, thanking consuls of the United States in England and on the continent, for their efforts on behalf of the suffering inhabitants of Chicago. The circular says the American government is gratified to see in the liberal response to the appeals of its representatives abroad, unusual evidences of international sympathy.

Dr. McLeod states officially that he has attended the trial for over thirteen years, and declares all reports that she has shown symptoms of mental weakness are unqualifiedly false.

The Standard announces that negotiations between the British and French governments, for the modification of the Commercial Treaty, have been broken off. No cause is assigned.

The first Roman Catholic mission ever sent from England to America, has sailed for the United States. The party consists of four priests, whose duty it will be to labor exclusively among the colored people.

Louis Kossuth, the Hungarian patriot, has been elected a member of the London branch of the International Society.

The British government has granted a pension of £300 to the children of Dr. Livingstone, the African explorer.

Letters from Constantinople represent that the cholera is spreading in that city, and the number of deaths from the epidemic increases daily. A firm has been issued by the Turkish government, directing the Minister of Works to inaugurate a comprehensive system of public improvements, in view of the network of railroads projected by foreign capitalists in the Ottoman dominions.

The trial by court-martial of the persons accused of the assassination of General Thomas and Le Comte has ended. Nineteen of the prisoners were pronounced guilty. Verduguer and seven other officers were sentenced to suffer death; one to imprisonment for life at hard labor, and ten to various terms of confinement. Several additional court-martial have been created, the more rapidly and effectually to dispose of the large number of Communist prisoners still remaining to be tried. Gambetta, Louis Blanc and Victor Hugo have issued a card soliciting subscriptions for the relief of the families of Communist prisoners.

The reorganization of the French army is making rapid progress, and by the end of this year the strongest strategic position on the eastern frontier will be occupied by thoroughly equipped troops.

Gambetta has made a speech at St. Quentin, the tone of which is moderate, and has had an excellent effect on public opinion. He assured his hearers that no danger at present menaced the existence of the Republic, but reform was necessary to sustain it, and the people should see that legislation to that end be not kept back too long in the National Assembly.

The French Ambassador to the Papal court has sent a telegram to the Minister of Foreign Affairs, stating that the Pope has expressed his intention of leaving Rome when a bill, as presented by the Italian Parliament convening that body in session in Rome.

A decree has been issued suspending the publication of two French newspapers, for printing articles insulting to the government.

General Sickles, American Minister to Spain, has made a statement before the recent debate in the Cortes on Cuba, and explaining documents received from the Cortes on Cuba. He says it is due to the former Ministers Rivero, Martos, and Becerra, and the lamented Pinar, to state that they all and severally assured him that Cuba should be justly treated as a province of Spain, entitled to all the rights granted by the constitution of 1809. General Sickles adds, these promises prevailed on the American government from intervening in Cuban affairs.

The Committee of the Cortes on the budget have agreed to report in favor of a tax on the interest of Spanish bonds held by foreign countries.

The movement of the radical members of the Cortes, having resulted in a defeat of the ministry, Admiral Mulcaupo, head of the ministry, at once mounted the tribune and read a royal decree, proroguing the sitting of the Cortes without day. The king, on the following day, summoned to his presence the presidents of the two houses for consultation on the grave aspect of the political affairs. It has since become known that the ministry have resigned in a body, but it is hoped that with some modification they will continue in office.

The German Parliament is still engaged in the consideration of the change law. A proposition to place an effigy of Emperor William on all new coins, instead of those of princes of the respective countries comprised in the empire, was rejected by a considerable majority. The Russian government perseveres in its attempt to Russinize its provinces on the shores of the Baltic. The Senate of the University of Dorpat has been transferred to the West, as the Russian is the only language to be used in public decrees, in courts and in churches. The Moscow Gazette counsels Russia to demand the neutralization of Denmark, and the restoration of Northern Schleswig to the latter country, as a means to counteract the power of Prussia on the Baltic sea.

A semi-official Austrian report says, the emperor, Count Von Bounst from the Chancery of the Austrian empire and Ministry of Foreign Affairs, has no effect upon the relations between Prussia and Austria, the friendliness of which is impaired.

The Bohemian Diet steadily refusing to send deputies to the Austria Reichstag, the emperor, by a special decree, has ordered popular elections to be held in Bohemia instantly for the Reichstag, without any intervention of the Diet. That body is thus shorn of a great power, and an element of Republicanism is really introduced by the Emperor.

On the 20th inst., a disaster took place in the Mersey. Two ships ran into each other with such violence that both sank almost instantly. As far as is known all on board were lost.

A Berlin dispatch of the 20th says: The Reichstag has sanctioned the extension of the North German law making military service compulsory to all Bavaria.

London, 11th mo. 20th, Consols, 92½; U. S. 5-20s, 1862, 91; ditto of 1867, 91; ten-forties, 90.

Liverpool.—Uplands cotton, 91d.; Orleans, 91 ½ d. Sales of the day 15,000 bales.

A heavy earthquake occurred at Equique and the town of Peru, on the 10th inst. The towns of Pico and Matilla were destroyed, nearly a thousand being left standing. Other towns also suffered severely, but very few lives were lost.

UNITED STATES.—Miscellaneous.—Twenty-two vessels of the Gloucester fishing fleet have been wrecked this season, and the loss of life was greater than in any year except 1862, number of 95, and 1,000 men, 100 left widows, and nearly 100 children were rendered fatherless.

The Grand Duke Alexis, eldest son of the Emperor of Russia, arrived in New York on the 20th, for the purpose of making a short visit to the United States.

Act to repeal the Territorial laws have passed an Act to repeal the national suffrage law. All the Republican members voted against the repeal.

Dispatches from Washington say that the administra-

tion will continue firm in its Indian policy. A rigid investigation into the operations of the Indian agents will be had, and those found guilty of defrauding the Indians severely punished.

The interests in Philadelphia last week numbered 406, 316 deaths from small pox, and 1,000 the value of taxable real estate in Philadelphia this year assessed at \$502,415,863, the property being generally assessed at its full market price. The value of real estate exempt from taxation is \$50,391,223. Last years assessment was \$49,844,006.

The market for flour this season has not proved so prosperous. According to the Cape Ann Advertiser the catch is not more than two-thirds of that of last year.

The Markets, &c.—The following were the quotations on the 20th inst. —New York.—American gold, 110 ½; U. S. 5s, 1881, 117 ½; ditto, 1867, 114 ½; ditto, 10-40, 5 per cents, 110. —Savannah flour, \$6.25; finer brands, \$6.50 a \$9.85. No. 2 Chicago spring wheat, \$1.51; red western, \$1.62 a \$1.04; white Michigan, \$1.75. Canada barley, \$1.15; western, 95 cts. Oats, 53 a 57 cts. Western mixed corn, now, 77 a 79 cts.; yellow corn, 82 cts, white, 81 cts. —Philadelphia.—(Cotton, 15½, 19½ cts. for uplands and New Orleans. Superfine flour, \$5.25 a \$5.75; finer brands, \$6 a \$9. Red wheat, \$1.60 a \$1.63; white, \$1.68. Rye, 95 a 97 cts. Yellow corn, 76 a 77 cts.; western mixed, 74 a 76 cts. Oats, 52 a 53 cts. The cattle market dull and prices somewhat low. A pair of oxen, 100 lb. head were sold at 6½ a 7 cts. for extra, 5½ a 6 cts. for fair. Sheep sold at 4 a 5 cts. per lb. gross including skins. Sheep sold at 5 a 6 cts. per lb., and corn fed hogs at 4 a 7 cts. Baltimore.—Good to prime red wheat, \$1.65 a \$1.75; common to fair, \$1.45 a \$1.60. Oats, 40 a 52 cts. Mixed western corn, 71 a 72 cts.; southern white, 70 a 72 cts. —Chicago.—No. 1 spring wheat, \$1.25; No. 2 do, \$1.21; No. 3 do, \$1.13. No. 2 mixed corn, 42 cts. Rye, 62 cts. Oats, 31 cts.

FRIENDS' FREEDMEN'S ASSOCIATION.

Our schools in North Carolina and Virginia are about starting for the season.

For the current expenses of maintaining them, board and salaries of teachers, &c., we stand pledged. The Treasurer has now only about Two Hundred dollars in hand to meet these obligations, thus showing that almost the sole reliance on contributions yet to be made.

In this state of things, we earnestly request our Friends who feel called upon to give to this worthy cause, to forward their contributions soon to the Provident Life and Trust Co., 111 S. Fourth St., Philadelphia, and the various collecting Committees to be careful to acquire Friends in the neighborhood with the urgent need of funds to meet pressing engagements. James E. Rhoads, President of the Executive Board, Philip C. Garrett, Chairman of the Committee on Instruction.

Richard Cadbury, Treasurer.

FRIENDS' RELIEF COMMITTEE OF PHILA.,

For help of Sufferers by Northwestern Fires.

Information received from various reliable sources, principally from members of our own religious Society, renders it very evident there will be, during the approaching inclement season, a great amount of suffering arising from the dreadful fires which have devastated a considerable portion of our north-western country, including many small villages and settlements, as well as the city of Chicago. Friends in the West who are nearer to this scene of suffering, and those in all parts of the land, will no doubt endeavor to render such aid as may be in their power. A committee of Friends has also been organized in Philadelphia, who will receive and forward contributions, taking due care that they will be properly applied.

The following Friends are members of this committee, and donations may be forwarded to any one of them, or directly to SAMUEL R. SHIPLEY, Treasurer, at the office of the Provident Life and Trust Co., Phila.

MARMADECK C. COPELAND, 17th St.
CHARLES EVANS, M. D., 702 Race St.
WILLIAM KINSEY, 469 Marshall St.
HENRY HAINES, 417 Walnut St.
ELLISSTON P. MORRIS, 4782 Main St., Germantown.

DEED, on the night of the 7th inst., at the residence of her son-in-law, George F. Wood, in Ullyses, Tompkins Co., N. Y., MARTHA OWEN, widow of the said A. Owen, in the 77th year of her age, an elder of Heceta Monthly Meeting. She had loved the Truth from early

life, and was one that mourned on account of degeneracy in our Society, and because so many of us she had hoped better things had come to lightly our christian testimonies. Her last sickness, a few weeks, was marked with patience and a faith if consistent with the Divine will, her strength but feeble. She was gratified with having children with her a few days before her decease, though her sufferings at times seemed great, minded those about her that she had had many as well as afflictions, and we must not look all on the dark side. It being remarked to her it was well she said, "Yes, I am all weak, but I am in and without, what should I do without the Supporter." At another time being told that her to be released was likely to be realized, she said, pause, that she could think of nothing more good. These, with various other expressions of a nature together with her sweet frame of mind, evinced to her friends that she was prepared for the change.

On the 11th inst., at his residence in East Ford, Chester Co., Pa., SAMUEL COPE, in the 83d his age, a minister of the gospel and member of B. Monthly Meeting. This beloved Friend was a most watchful care of religiously concerned and brought up in the love of the truth, in the cross of Christ. Through submission to the operations of the Holy Spirit, he became prepossessiveness in the church, and by a diligent exert his life in the ministry, under the fresh putting of Him from whom it was derived, he was made a man of great usefulness in the truth and righteousness. He was a practical believer in the christianities and testimonies of our religious Society held and promulgated, and with others, greatly did the attempts which have been made to change the surely draw away the members from the unity of the truth, which he so faithfully guarded. As occasion required, he manifested his dissent such innovations, and encouraged his friends to firmly to the faith of the gospel as always maintained by the consistent members. Several years before his death his health became impaired, so that he was unable to attend the meetings of his congregation to place. Notwithstanding this affliction and of infirmities incident to advanced age, he continued firm in the attendance of religious meetings, an interest and concern for the cause, the advances which had long been the prominent object of his life, and he was ever ready to be faithful throughout the Yearly Meeting, and in other places he is believed, will be long remembered, evincing his concern that his fellow members and should realize, in their own experience, the hearing work of true religion, and become the humble followers of the Lord Jesus Christ. Having the long life been faithful in occupying the gifts bestowed upon him in the service of his Heavenly Father was graciously favored with assurance of His grace. While laboring under indisposition, he was with much feeling to two friends who visited him, he said, "I have adopted in measure the language of the apostle, 'I have fought the good fight, I have the faith, henceforth there is laid up for me a crown of righteousness,' repeating the remainder of the passage. At another time, after alluding to the death of a brother, he remarked, "I think I can say as the did in their departure, 'The Lord is my shepherd and I shall not want. He maketh me to lie down in green pastures, He leadeth me besides the still waters, He restoreth my soul, He leadeth me in the paths of righteousness his name's sake," with some addition. An interesting testimony, and one which should encourage us to strive for the same. A similar happy experience of obedience to the manifestations of the witness of Grace by which he was what he was. Upon the 9th inst., from a neighboring meeting, in he had some religious service, he was taken sick in a few hours became unconscious, and so on until he was released from the shackles of mortality to go to we may reverently believe the world to say, "Well done thou good and faithful servant, enter into the joy of thy Lord."

On the 27th of 10th month, 1871, JONAS I. in the 68th year of his age, a member of the Monthly Meeting of Friends in Philadelphia for the 3d District. He was a firm adherer of the doctrines and testimonies of Friends.

PHILADELPHIA.

Single Copies, when paid quarterly in advance, five cents.

From The "British Friend."

Round about Swarthmore.

Not far from the sloping shores of Morecambe Bay, and within a mile of Ulverstone, there is a spot fraught with historical associations—steeped in memories of

"The Quaker of the olden time,
So good, so calm, so true."

Close to the road leading from Ulverstone to Birk-rigg and Urswick, there is an old meeting-house, tree-shaded, ivy-covered; and from the porch on the white door of its courtyard, a welling not far away, the visitor may rightly infer that this is the spot given by George Fox nearly two hundred years ago, and by him dedicated to its present use. As it cannot be expected, the building—low, and of its slated side—is simple in character and ornamented, surrounded by green leaves, or a darker shade of firs; but surely marked by clustering memories of the just. There is a courtyard, with its mounting steps of stone, unshaded, that tell of the times when, on saddle-pillion, or in their carts, the Friends of Ulverstone hitherwards over marshy downs, through winds, and over heaths that bore only heather and wild flowers.

Internally, there is, I suppose, little change in the day when this house was appropriated to its present use, with the "three acres of land, more or less"—all the land in the house" their owner had in England. The oldest to which the Bible was chained for reference is removed, but there still is "the great elbow-chair that Robert Wilders sent," and there also are the posts of the "ebony bedstead," heirlooms given by the donor, so that wayfarers "may have a bed to lie on, and a chair to sit in." And in this quiet room, with white-washed walls, and ceiling with projecting beams, and on the narrow olden seats, the generations Fox's successors have met, in the winter cold and the wet, and the summer heat." There, too, remains the old chained Bible, still shown, though more than 200 years old; in the quaint black letter of which the reader may discover the word now rendered "balm" (of Gilead translated as "treacle," and with other instances of olden and expressive wording. A visitors' book is kept on the premises, in which it was interesting to notice the names of men of many creeds and coun-

tries. There were, in a few pages, the signatures of Philadelphia descendants of the Fells; well-known names of visitors from Darlington, Sunderland, Stockton, Huddersfield, Ackworth, Gloucester, Ireland, &c.; there were the well-formed characters of "John Bright, Rochdale;" and there was an exhibition of bad taste on the part of two Episcopalian clergymen, who (in such a book) had prefixed to their names "Rev.," in strong contrast to another of their cloth, known as that of one "in labors more abundant," who had simply subscribed the name of "William Caine, of Manchester." . . . This is "the house and land called Petty's," and though it is simple almost to rudeness, when compared with ornate churches or cathedral piles, yet the long bead-roll of visitors shows that it has more than a sectarian, local, or party interest.

Not many yards away is Swarthmoor (or Swarthmore) Hall, from the door-limbo of which George Fox is stated to have preached; and whence Margaret Fell was imprisoned for years for refusing to swear—a place in which the happiest years of the two were spent. The old hall is dilapidated now; its embayed windows and "rough-cast" walls bear the marks of age; but the holer-pierced barn, the trees in the old-walled orchard, the study, and the oaken parlor, remain apparently in the state they were two hundred years ago; and discourse eloquently of Margaret Fox in her "red cloth mantle," and her husband in his "gray suit, with alchemy buttons"—tell of the days before the erection of the place we have just left, in the hedge-shaded lane—then a moorland field, now rose-bespangled and fragrant with honeysuckle. There seems to pass before the mind dim shapes of those who met "in this old hall"—grave men and reverent women, such as Fox and Burroughs, Fell, and even him whom Elia calls "that much injured, ridiculed man, James Naylor"—who were honored instruments by whom religion was purged of many errors, and placed in a newer and nobler light.

Classic ground is this! The names of the places and persons here around read like pages from the diaries of George Fox and his friends—the very stones bear witness to their labors and sufferings. Just below yonder Eddystone-like monument on Hoad Hill is Ulverstone Church, where, says Fox, "The people fell upon me in the steeple-house, . . . knocked me down, kicked me, and trampled upon me;" there, too, close by, is the common where the constables beat him "among the rude multitude," who beat him till he was senseless. Close hereto, also, is Walney Island. "With staves, clubs, and fishing-poles," forty masculine Christians rushed upon him when he landed, with the intent to drive him into the sea. Lyndal, Dalton, Baycliffe, Cartmell, Aldenham, and others of the villages and places here around, were often visited by him, were often the scene of his labors, and were also

near to the residences of some of his fiercest persecutors—the Kirbys and Sawreys of the bay. Just across the Bay, too, is "time-honored Lancaster," the scene of more than one of his imprisonments—the place where his quick-wittedness and common sense baffled judges and confused justices. All around speaks of these times, from the day when his address drove conviction to the heart of Margaret Fell to the time when she was laid in the unmarked grave near Sunbrick, on Birk-rigg's sloping side, where the waters of Morecambe sing an eternal requiem by the resting-place of this mother in Israel—a quiet ground covered by "a thick swathe of the greenest grass," standing beside which the words of the man of Uz come irresistibly to mind; for there, indeed, "the prisoners rest together; they hear not the voice of the oppressor;" for there "the wicked cease from troubling, and there the weary be at rest." In burial-grounds on lonely roads, in unmarked villages, and in vast towns, are laid the remains of these ancient heroes; and in the midst of the din of the great city, in Banhill Fields, rests the body of their leader, mourned for then in such words as these of Ellwood, Milton's friend:—"Very tender, compassionate, and pitiful he was to all that were under any sort of affliction; full of brotherly love; full of fatherly care; . . . he lived and died the servant of the Lord." Yet, among the people his name and fame are dying out, and small now is his part in

"All the pomp that fills
The circuit of the summer hills."

But though the world, which owes much to him and his friends, seems willing to forget its indebtedness, there be some for whom "neither days nor length of time will wear out their" memory. And if the world knew the lesson taught round about Swarthmoor—read aright the history of Fox and Fell, Burroughs and Howgill; knew how great is their indebtedness to these men; knew that to Penn and Mead in the bail-dock, they owe one of "the great charters of our liberties;" and that to their successors—an illustrious bead-roll—they owe much in "all that is decent and civil" in the region of education; knew that these, with countless deeds of philanthropy and mercy, were due to the principles propagated here two hundred years ago, a deeper interest would be felt by the common people in this lovely locality.

In addition to the interest which is attached to the central figures that people Swarthmoor Hall, there is the memory of many a martyr to the cause of religious liberty who in those early days were here honored guests. Here had been Francis Howgill, who, from Kendal, was sent to Appleby jail, and after years of confinement found freedom in death. Edward Burroughs, who was seized while preaching, and died in the crowded courts of Newgate; Parker, Pearson, Whitehead, Barclay, and Penn, with many another—all sufferers alike

for one cause; all freely giving themselves up to spend and be spent in the cause they esteemed just and true. Theirs, indeed, was a hard battle to fight, for they were, as Charles Lamb says, "betwixt the fires of two persecutions, the outcast and off-scouring of church and presbytery."

Often the fierce rabble, parson-instigated, fell upon them; but the church "militant" turned its malice upon their unresisting heads; a savage soldiery and brutal sea-ruffians invaded their meeting-places, and often maimed with their swords those therein; justices oppressed them, and even the majesty of law turned its terrors on the innocent. They were scoffed at, scorned, spitefully used, spit upon, but feted by rude hands, beat, bruised, wounded, slain; tender women and hoary-headed men were remorselessly flogged, despoiled of their goods, their estates seized, themselves bitterly tortured, cruelly imprisoned by thousands in vile dungeons, where they languished and expired—their lives worn out by labor and suffering. The very bones of their dead were disinterred and vilely treated—all because they dared to worship in the manner conscience dictated.

Upon them, at a critical period, was thrown the burden of English Nonconformity. When fines and imprisonments were by the law adjudged the due of all frequenters and keepers of what were contemptuously called conventicles, other sects bowed their heads or fled before the storm, which burst in all its fury upon the Friends' devoted heads; and they met it with an unflinching endurance. If their ministers were hurried to prison, others arose; if their meeting-places were seized, and themselves excluded, they met in the courtyard, or even in the street; and if their meeting-houses were destroyed, they still met in the ruins. Nothing daunted them; nothing could bend their minds; and so the malice of their persecutors spent its fury; and their sufferings and perseverance purchased for Nonconformists in general the repeal of odious enactments, and the right for congregations to meet "under their own vine and fig-tree, none daring to make them afraid." Swarthmoor brings up this picture of heroic endurance in the times and turmoil in the troublous seventeenth century; and brings to memory the life of him who merits Longfellow's lines; for that life was—

"Made beautiful and sweet

By self-devotion and by self-restraint—
Whose pleasure was to run without complaint
On unknown errands of the Paraclete."

J. W. S.

For "The Friend."

Memoirs of Mildred Rateliff.

(Continued from page 101.)

"1819. 12th mo. 24th. At New Garden. 25th. At Spencers Meeting. To-day I left the meeting sorrowing, under an apprehension it was broken before the right time, not designedly, but for want of a deeper dwelling in that power which alone is able to direct all these solemn duties. O, the necessity for those who take the foremost seats in our meetings, to dwell in that which enables to judge righteous judgment, lest they neither enter into the kingdom of Heaven themselves, nor suffer others that would! May it not be said as was formerly by the servant, "Lord, it is done as thou commanded, and yet there is room." Yea, verily, there is room for more care, room to increase in prayer and fasting.

"26th. Was at West Grove; and the next day at Doe Run Meeting, the last such an one as will prove memorable to some who attended it. The Lord our only Helper was with us, and I thought that glory to his name from many hearts was to be felt. And surely, O my soul, thou wilt not be so ungrateful as to forget to give Him all the praise, for he is worthy.

"28th. At Fallowfield. 29th. At London-grove, where we had a large and good meeting. May all the praise from every heart be ascribed unto Him who was indeed our only Helper."

On the 30th and 31st, and 2d of First month, 1820, she attended meetings at Kennet Square, Marlboro', and Bradford; where she writes, "I think it is safe to say, hitherto the Lord has helped us. Though the state of things in many places is indeed discouraging, yet there is a remnant that do know the Lord is good, and worthy of all dedication.

"3d. Rested at our very kind friend Nathan Sharpless'. To-day we got the sorrowful account that dear James Steer, the father of my kind and willing companion, had gone to another state of being. No doubt it may be said, his death is one of those which is precious in the eyes of the Lord; so that our loss is his eternal gain. May we be also ready, when in our turn we are called, is the humble intercession of my soul. My dear Mary bears it as well as could be expected, yea, and I hope she will more and more give him up with christian acquiescence that may increase her spiritual strength to follow him as he has followed Christ. I think she is one of the simple and meek of the earth. Lord be pleased to keep her so with my own soul forever.

"4th. At their meeting in or near Downingtown. 5th. At East Caln Monthly Meeting. 6th. At Uwehlan Monthly Meeting; and 7th. at West Caln, a small, and perhaps indulged meeting; and I fear for want of industry but a poor, starved one.

"8th. At another little indulged meeting called Cooper's. Here there seemed a little more life. But alas, the state of things, if I know anything about it, is truly discouraging.

"9th. At Sadsbury Meeting; pretty large, though it gathered irregularly, and was sometimes a good deal unsettled. I told them I thought some, from the way they came together, had let the watch run down, the watch of the mind; and some others when they came there must first serve themselves by talking together before they came in. Thus by putting the cart before the horse, they could not travail in that exercise which would afford them consolation, or increase their spiritual strength. On account of these things I often have to mourn. I long for the time when the countenance and conduct of the people will demonstrate the magnitude and solemnity of these opportunities for divine worship. But alas! how few manifest that concern which the dignified occasion calls for. Yet there are those that do, which is a comfort. We had however a pretty good meeting; praised be Thy name forever.

"11th. Had a good meeting at Little Britain.

"12th. At Drumore. Here after a few remarks in the forepart of the meeting, I believed it to be my place to be still. Dear Mary Brown, who met us here, was favored

in solemn supplication, and the meeting on well.

"13th. Our dear sister, with several of Friends went on with us to a Friend's home from which we attended a meeting appointed in the evening at Lancaster. Though went to it in weakness and under discouragement, we were favored with best help, at doubt not but a remnant were willing gather up the fragments that nothing might be lost. We were glad of the opportunity and had fresh cause to believe that when we are weak then are we strong through the arm of Divine power which can alone ca the mountains to skip like rams, and the hills like lambs.

"14th. Our dear friends turned about their homes, and we pursued our way, at we paid a visit to the Poorhouse at Lancaster."

From the 15th to the 23d they visit several meetings; at the latter date they I one at Lampeter, which is thus alluded "Here appears some more ground to be there is a little remnant, wrestling Jacobin for the blessing. May the Lord Jehovah f these with food convenient for them; and consistent with his righteous will, incre the number of such every where.

"25th. Had a meeting at West Chest and not feeling clear of that neighborhood more general notice was given that we be at meeting at the same place next day.

"26th. It being their meeting in common attended; and I think it safe to Truth opened the way for a close search testimony amongst them. May the Lord pleased to fasten it as a nail in a sure place.

"27th at Goshen; 28th at Willistown; 29th at Newtown. At all these, deep exertion and hard labor were my portion, under a feeling sense of the situation of things. O, low state of true religion in many places! World, the flesh, and the devil, seem to be taken many captive. What must these without an alteration? O! who can comprehend the sad condition of these when called upon to give an account of their stewardship! I cannot doubt but some of this description have been seriously aroused at these last meetings. Some have afresh seen that they have been and are in the way that leads down the chambers of death; and have been resolved to conclude that for the time to come it will try to do better. May this resolution, cease, by and through the might of T power, O righteous Father, until they go forth conquering and to conquer all their so enemies.

"30th. At Middletown; 31st at Providence Monthly Meeting; and 1st of Second mo at Springfield. True religion much wanted and the reason it is so seems clearly be the people's minds are more outward it inward, more carnal than spiritual. Let turn about these by thy own divine power for none else can do it. Turn us, and we shall be turned; keep us, and we shall be kept; falling into the pit of woe.

"2d. At Chester. Many crowded in, though they were hungering and thirst after something good. I felt that of my I had nothing for them; and there seemed be something in me that was ready to Send the multitude away that they may themselves victuals, for we have nothing dividing amongst them. But He! remains to have compassion, was not dispo

ave it so: who did so bless the weight of
eise into which my mind was introduced,
it appeared in degree to resemble the
when the multitude were outwardly fed;
now by the same Divine power were in-
ally administered unto. I trust it might
id they were all satisfied, and some were
ing, amongst whom I freely numbered
elf, to gather up the fragments that noth-
ould be lost.

d. At Darby. This I hope was also a
meeting. The foolish virgins, the hypo-
sies, the careless and unconcerned, were
ed up to more diligence. Next day rested,
visited some dear friends.

th. Went to the city of Philadelphia, and
ded the Select Quarterly Meeting. The
ollowing was at the North Meeting in
e noon, and Arch Street in the after-

th. Attended the general Quarterly Meet-
g the same place. This last meeting
ributed much to show that the Lord's
e have at least become great in numbers,
e they not for want of faithfulness, fall
Israel of old in the wilderness, short of
e allotted inheritance, saith my soul."

(To be continued.)

Can Birds Reason?

BY T. W. BREWER.

The most common and best known [of the
ow-family] to us of New England is the
called "harn-swallow." Of the general
of this graceful and beautiful bird, our
will not permit us to give our readers
y details further than relate to its entire
e of habits caused by the settlement of
e country. There is ample evidence that
has had two hundred years ago this species,
so abundant, and found in every farmer's
y throughout this extended land, from the
Ohio to the Pacific, and from Florida to
settlements of the Hudson Bay Company,
e distant Yukon and Anderson Rivers,
a comparatively rare and infrequent, and
d found in localities where overhanging
y huge piles of boulders, or cavernous
ies enabled it to build in places of shelter
comparative safety. Even now, among
eavers of the Pacific Coast Range, and
e wilder limestone countries, where vari-
openings occur among the rocky cliffs,
e the original unchanged swallow may
be found plastering his simple mud nest
t against the cavern's roof or under some pro-
e ledge. But every where else these birds
as been taught and educated into a new
e contact with civilized man, and this
e lasted so long that we have well nigh lost
e of the fact that our own Swallow's Cave
abundant was once peopled by these fair-
ies. Now, everywhere in warm and com-
eable barns, under the shelter of hospitable
e, these swallows build their curiously
ablated homes. And what an improvement
e all are upon the structure of the wild
e night swallow! Not the least remarkable
e peculiarity is a projecting solid platform built
e upon the edge of the nest, upon which the
e affectionate husband attends, and watches
e his partner in her maternal duties. Is
e this an instinct? Is it not rather a higher
e of educating reason.

en more remarkable and far more recent
e changes which contact with man have
e about the Rocky Mountain swallow. For a
e while this swallow dwelt in distant soli-

tudes, afar from the dwellings of the white
man. There on the sides of high and rocky
cliffs he constructed a very curious and a very
elaborate nest. It was in shape like the re-
ort of the chemist, the bulb of which was
affixed to the rock, and the entrance to it was
through its long tube-like neck that hung
down below. It was a peculiarly social swal-
low, and wherever found, existed in large
colonies of often many thousands of pairs. It
was met with by Major Long's party in 1820,
and about the same time was found by the
ill-starred Sir John Franklin in his first Arctic
journey. Five years after they made their
first appearance at Fort Chippewayan in 1825;
and there we have the first recorded instance
in which these birds built their nests under
the eaves of dwelling-houses within the Arctic
circle. Trading-posts had been in existence
in those regions a century and a half, yet now
for the first time this swallow placed itself
under the protection of man within the widely
extended lands north of the Great Lakes.
What could have thus suddenly called into
action that confidence in the human race with
which the Framers of the universe has endowed
this species and all the swallow tribe? Was
it not education, experience, and reason?

Once taught the greater convenience and
safety of the sheltering eaves of houses for its
breeding, the example became contagious;
and now all over our continent, from Penn-
sylvania to the Arctic seas, and from New-
foundland to Oregon, these swallows abound
about the dwellings of man. We know of no
authentic record of their breeding thus upon
houses within the limits of New England,
before the year 1837, though De Witt Clinton
found one pair thus breeding at White Hall;
on an outbuilding near a tavern, in 1817.
The next year there were seven pairs, the
third year twenty-eight, and the fourth near
forty. In 1822, when Clinton published his
paper, there were seventy pairs thus nesting.

The writer first met with these birds in
1839, in Jaffrey, N. H., where a large colony
had settled only the year before, under the
eaves of an old church, in the centre of the
village. Three years before, these same birds
are said to have made their first appearance
at Burlington, Vt., in large numbers. In
1842 a large colony settled in Attleborough,
Massachusetts, and a few pairs also appeared
in various parts of this State. One pair built
on the front of the Boston Athenæum, and
continued so to do for several years. We have
said that originally their nest, when built in
exposed places, was like the retort of the
chemist, the entrance from below through a
long tubular opening. This was a necessity
for protection against the weather, and also
against their enemies, so long as they nested
in exposed places. But since these birds have
placed themselves under the protection of
man, they have found that there is no longer
any need of all this superfluous architecture,
and the shape of their nests has been gradu-
ally simplified and improved. In 1851, on one
of the islands in the Bay of Fundy, the writer
met with a large colony whose nests, on the
side of a barn, were placed between two pro-
jecting boards put up for them by the friendly
proprietor. The very first year they occupied
these convenient quarters, every one of these
sensible swallows built nests open at the top,
discarding the old patriarchal domes and
narrow entrances of their forefathers. How
much of instinct was there in this instantane-

ous change of habit? Not a particle, say we.
It was pure, unadulterated reason, and noth-
ing else.—*Atlantic Monthly.*

For "The Friend."

Some Remarks of a deceased Minister of our time
on the condition of our Society, &c.

It is mournful to reflect upon the present
state of our religious Society, in many places.
While there is preserved a body of substantial
Friends, many others, deeply immersed in
the love of the world, the desire of ease and
outward greatness, and wanting in religious
depth, are degenerated from that purity of
heart and well-founded zeal for the support
of our principles and christian testimonies,
which so conspicuously appeared amongst
our primitive Friends. * * * Weakness and
blindness have so overtaken many at this day,
that they seem scarcely to know their own
religious principles, and not being circumsised
in heart and ears, are carried away with the
sophistry of some, whose self-conceit and
dependence on their own powers, have led them
into the dissemination of unsound views.
But through the baptizing of the Holy Spirit,
our primitive Friends were united together
in bearing a faithful protest against the devices
of Satan and his agents, and were thus rendered
instrumental in warning and preserving the
flock from his desolating ravages.

Changes are gradually taking place amongst
us. There are now very few left to whom
some of us can look as fathers and mothers,
counsellors and supporters, in the trials and
exercises of the day. * * * When we have
looked around to see who would be found
prepared for the important station of elders,
we can discover but few who have not fallen
back, or are making but little progress; so
that instead of being ready for watchmen and
watchwomen, and instructors of ministers,
they have need to be reminded of their slack-
ness, and of the mournful feelings which their
unfaithfulness brings over those who have
been watching for their growth in the blessed
Truth.

In some of our meetings for worship, of
latter time, the world seems to absorb the
minds of very many, so that we are in danger
of being left by the Head of the church; and
without his life-giving presence what will all
our assemblies together avail us? A few
years ago we had many exercised, experienced
Friends, who were thoroughly acquainted
with the nature of true spiritual worship, and
the labor that is indispensable in our meet-
ings, that the spirit and things of the world
may be kept out, and the bubblings up of the
well of Divine life may be known in every
heart. Figuratively speaking, they dug as
with their staves in their hands, while the
secret breathing of their souls was, "Spring
up, oh well, sing ye unto it."

In conversation on the peculiar state of our
Society, and in reference to the wishes of some
for separation, I took the opportunity to say
that I did not unite with Friends running out
of a back door, to get away from trouble. Our
place is to stand firm and face it openly,
contending for the truth, and opposing wrong things
as they appear. Separations deprive those
who leave of the opportunity of opposing
error in the members from whom they have
separated; and none know how soon some-
thing may again arise among themselves to
create contention and lead to another separa-
tion. If we keep our places and bear a faith-

ful testimony for the truth and against all departures from it, though at the time we do not see the effect, yet we may believe that the Lord will carry that testimony home to the hearts of some, so that it will arise from time to time with convincing power, and finally prevail. Jerusalem is a burdensome stone to those who would pervert and turn away judgment backward, and the Lord can save by few or by many.

Where un sanctified persons obtain the rule, and seek to carry out measures opposed to the principles or testimonies of the gospel, the rightly concerned and faithful members should labor in the ability which God gives, to prevent their adoption. Should these efforts be disregarded they will be clear, if they have done what they could; the Lord will plead his own cause, and we hope will, in his time, make way for the truth to rise into dominion. Seducers and evil workers will wax worse and worse; they will be removed by death as well as others; and through patient suffering, a right seed keeping their places, will be prepared to take the government, under the blessed Head, and to restore the good old way in which our primitive Friends walked, and to put down what is inconsistent therewith.

The trials of this day are hard to bear, but if they drive us more and more to the Master, and keep out a light spirit, and deepen us in the blessed Truth, so that our example will be effectual to draw others to the love of it, they will be great blessings to us, and fit us for greater service in the Lord's church and vineyard. We have depended much on one another instead of relying upon the Lord alone for guidance, wisdom and strength; and he has been taking from us fathers and mothers, and permitting the spirit of separation to get in, by which many Friends have been alienated from each other. The unity of the Spirit being greatly lost, the strength which it gives is much withdrawn. There is no way by which the strength of the church can be restored, but by the members coming back to the first principle, of waiting upon the Lord and seeking to receive from Him the spirit of prayer, that he would return to us, and show us our real condition; what he would have us to come out of, and the high and holy way he would have us to walk in. His mercies are the same from generation to generation; and when we are rightly humbled and brought back, he will condescend again to our low estate, and lift us up and put songs of praise into our mouths; and the children will be enabled to join in thanksgiving and praise to his great and ever adorable Name.

Trees and Rain.—In Italy the clearing of the Apennines is believed to have seriously affected the climate of the Po Valley, and now the African Sirocco, never known to the armies of ancient Rome, breathes its hot blighting breath over the right bank of that river in the territory of Parma. The similar removal of the pine forests near Ravenna, about twenty miles long, induced the same desolating wind, which continued until the wood had been allowed to grow again. There is no doubt that in France the removal of the old forests of the Vosges sensibly deteriorated the climate on the plains of Alsace; and it is a historic fact that the ancient destruction of the forests of the Cevennes, under the reign of Augustus, left the large and rich tracts near the mouth of the Rhone exposed to the

steady violence of the north-west wind, before which the area of olive culture has retreated many leagues, the orange is confined to a few sheltered points on the coast, and fruit trees can hardly be reared in places where they were formerly prolific. The curtailment of the rain fall is a well known consequence of the disappearance of forests; and in Egypt, where during the French occupation, near the end of the last century, not a drop of rain fell for sixteen months, and from time immemorial the country has been a rainless bed of sand, Mehemed Ali, by planting his millions of fig and orange trees, has caused the country to be blessed with an annual rainfall of several inches.

SOON.

I know not if He come at eve,
Or night, or morn, or noon;
I know the breeze of twilight grey,
That fans the cheek of dying day,
Doth ever whisper—Soon!

I know not why our souls should doubt
His promise to appear,
When every flower's opening eye
Looks up into the changing sky,
And seems to murmur—Near!

I know not round His blessed feet
What peerless glories throng;
I only know from rending tomb
The good shall burst, in beauty's bloom;
And faith assures—Not long!

I know not if His chariot wheels
Yet near or distant are;
I only know each thunder-roll
Doth make an echo in my soul,
That saith—Not very far!

Selected.

I know not if we long must wait
The summer of His smile;
I only know that hope doth sweep
With thrilling touch my heart-strings deep,
And sings—A little while!

I know not on this glorious theme
Why lips so oft are dumb;
I only know the sacred earth
Will flush with beauty and mirth,
At sound of, "Lo, I come."

SUBMISSION.

"In your patience possess ye your souls."
Be still, my soul! The Lord is on thy side,
I bear patiently the cross of grief and pain,
Leave to thy God, to order and provide,
In every change He faithful will remain,
Be still, my soul! thy best, thy heavenly Friend
Through thorny ways leads to a joyful end.

Selected.

Be still, my soul! thy God doth undertake
To guide the future, as He has the past;
Thy hope, thy confidence, let nothing shake,
All now mysterious shall be bright at last.
Be still, my soul! the winds and waves still know
His voice, who ruled them while He dwelt below.

Be still, my soul! when dearest friends depart,
And all is darkened in the vale of tears,
Then shalt thou better know His love, His heart,
Who comes to soothe thy sorrow and thy fears.
Be still, my soul! thy Jesus can repay
From His own fulness all He takes away.

Be still, my soul! the hour is hastening on,
When I shall be for ever with the Lord;
When disappointment, grief, and fear are gone,
Sorrow forgot, Love's purest joys restored,
Be still, my soul! when change and tears are past,
All safe and blessed we shall meet at last."

Be still, my soul! begin the song of praise
On earth, believing, to the Lord on high;
Acknowledge Him in all thy works and ways,
So shall He view thee with a well pleased eye.
Be still, my soul! the Sun of life divine
Through passing clouds shall but more brightly shine.

Prodigal Turned Miser.—A young man vicious principles and habits, wasted in two or three years a large patrimony in prodigal ways. When his last means were exhausted, worthless associates, who called themselves his friends, treated him with neglect. He, who had been accustomed to absolute want, he went out of house with an intention to put an end to life; but wandering awhile almost unobserved, he came to the brow of an eminence which overlooked what wretchedly his estate here he sat down and remained fixed thought for some hours, at the end of which he sprang from the ground with a vehement exulting emotion. He had framed his resolution, which was, that all these estates should be his again; he had formed his plan, to which he instantly began to execute. He walked hastily forward, determined to see the first opportunity to get money, though ever so small a sum, and resolved not spend, if he could help it, a farthing of what he might obtain. The first thing that drew his attention was a heap of coals, shot out carts on the pavement before a house. He offered himself to put them in the place where to be laid, and was employed. He received a small sum for his labor; and then, in pursuit of the saving part of his plan, he purchased a gratuity of a little food, which he gave him. He then looked out for the means that might offer, and went with in the fatigable industry, through a succession servile employments in different places, longer and shorter duration, still scrupulously avoiding, as far as possible, the expense of penny. He promptly seized every opportunity which could advance his design, regarding the meanness of occupation or appearance. By this method he gained, after considerable time, money enough to purchase in order to sell again, a few cattle, of which he had taken pains to understand the value. He speedily but cautiously turned his gains into second advantages; retained without a single deviation his extreme parsimony and thus advanced by degrees into large transactions and incipient wealth. The final result was that he more than recovered his lost possessions, and died an inveterate miser worth sixty thousand pounds. Happy was it have been for this individual, if he had discovered the same anxiety to recover his heavenly inheritance he had lost, and had pursued it with similar decision and perseverance.

Alas how many there are who would like to obtain the pearl of great price and be possessors of the true riches, who yet need earnestness and singleness of purpose which are requisite in order to secure them!

Selected.

The dead are often powerful preachers to the living, warning them to flee from the wrath to come, by preparing for their latter end. For we must all appear before the judgment seat of Christ, that every one may receive the things done in the body according to that he hath done, whether it be good or bad. "Every man's work shall be made manifest for the day shall declare it." Blessed are the happy are they, that are building on the sure and sure foundation, which the righteous in all ages, have built upon; even Christ, Jesus that tried corner-stone, "unto the Jews stumbling block, and unto the Greeks foolishness; but unto them which are called, by

and Greeks, Christ the power of God the wisdom of God." This is a stone of bling and a rock of offence, to all unbelievers now, as in the day when this declaration was made; but to those who believe, it is the chief corner-stone elect, precious, and the chief means appointed for the salvation of mankind, who are willing to submit to the will of the Holy Spirit of the Lord Jesus Christ in their hearts.—*Daniel Wheeler.*

For "The Friend."

The Editors.—Inclosed please find an article on "The Virtue of Vaccination" cut from the "Public Record" of yesterday, which I think may be interesting and perhaps useful to the readers of "The Friend."
R. J. A.

"THE VIRTUE OF VACCINATION."
Physician in London, Dr. F. Page Atkinson has had an opportunity to study smallpox upon a large scale, has recently published in an Edinburgh medical journal the result of his observations, in an article headed "A Few Words on Vaccination and its Efficacy." He here presents, in concise and several conclusions which may be of great value, not only to the members of his profession, as showing how false many of the prevailing ideas on the subject are, but also throwing the opinion of many persons who might either deny the efficacy of vaccination or fear that it may contaminate them in some constitutional disease.

At the same time he presents, when variola in its forms is raging with a violence which has not receded since the importance of the discovery of Jenner was fully recognized by the medical fraternity,* it is absolutely necessary that not only the believers but the doubters should, for the safety of the others, take themselves of the protective power of vaccination, in order to confine the epidemic to the narrowest possible limits and to reduce its mortality to the lowest degree. It is the benefit that has heretofore resulted from vaccination may, in some measure, act upon the extent and virulence of the present epidemic, as it is quite possible that the immunity from smallpox which the operation has occasioned may have produced a feeling of security which led to the neglect of the proper precautions.

Dr. Atkinson publishes three propositions which appear to be fully acknowledged by the medical men of the present day, viz: First, that vaccination, though it greatly lessens the susceptibility of taking smallpox, does not render the reception of it in after years altogether impossible. Second, That vaccination in most cases greatly modifies the character of the smallpox eruption, and lessens the severity of the attack. Third, That vaccination gives absolute (?) immunity to smallpox.†

The author cites in proof of these propositions the experience of Dr. Marson, who took several thousand cases of this disease at the smallpox hospital in London. Of five hundred cases of smallpox, this observer found that thirty-five per cent. of those who had never been vaccinated succumbed to the disease. Among those who had been vaccinated,

It is by far too strong a statement.—Eds. OF THE FRIEND.
A mistake. Medical men do not generally hold that vaccination prevents any liability to varioloid.—Eds. OF THE FRIEND.

nated, but exhibited no cicatrix—showing that the operation had been imperfectly performed—the deaths were 25.57 per cent. In marked contrast with this, we find from these statistics that only 2.52 per cent. of those patients who presented one well-defined cicatrix were fatal, while of those who were but faintly marked by the vaccination 8.62 per cent. died.

These facts ought to convince the most sceptical of the invaluable service rendered to the community by Jenner's discovery. They prove that, while smallpox in its unmodified form destroys more than one-third of all the persons attacked, vaccination, even when most carelessly and inefficiently performed, reduces the death rate to one-fourth: when better done, though still imperfectly, to one-twelfth, and, finally, when thoroughly performed, to one-fortieth. The actual number of deaths occurring from smallpox after proper vaccination is, of course, very much less than one-fortieth of the persons who might have been affected with true smallpox had they not submitted to this protective measure, as the immunity afforded by vaccination extends not only to modification of the severity of the attack, but even more decidedly to preservation from any attack at all.

In further proof of the great value of vaccination, the statistics of Dr. Marson may be cited as showing that, of those who had had smallpox, about one-fifth died when attacked a second time, whereas, as already stated, only one-eighth as many died from this disease occurring after efficient vaccination. The London "Lancet," in an article upon this subject, says that "not a single vaccinated case has been admitted into the smallpox hospital at Homerton, and no death of a vaccinated person has occurred under seventeen," and the inference is logically drawn that this shows the protective power of even imperfect vaccination up to the age of puberty, and also the necessity for revaccination at this time.††

The remarkable security afforded by vaccination is further exhibited by the record of infant mortality in Scotland, where the deaths from smallpox have been diminished to one-half, and in some places to one-third their former number since the introduction of compulsory vaccination.

Many persons refuse to allow their children to submit to this operation from the fear that some impure disease may be conveyed through the virus, and in order to remove this uncalculated prejudice, Mr. Simon, of the London board of health, directed inquiries to a large number of physicians. He received replies from 539, who, with scarcely an exception, denied the existence of any such danger. While it was admitted that by gross carelessness

†† Physicians are not unanimous in their opinion relative to this point. The French doctors generally think it unnecessary, the German majority insist on it. As revaccination is seldom accompanied by serious symptoms, and may tend to remove anxiety, it can, at least, do no harm to resort to it.

One great cause why vaccination is thought not to afford the protection from Small Pox once attributed to it, is that in many cases the system has not been properly brought under its influence. It is necessary that the virus should be pure, and that it should be so absorbed as to produce its specific effect on the constitution. The person vaccinated should be kept under the eye of a competent physician until he is satisfied that the system has fully submitted to the virus. This is often neglected.—Eds. OF THE FRIEND.

ness in collecting vaccine virus an impure disease might be inoculated, the supposition that any such disorder could be transmitted by the use of vaccine virus alone was totally contradicted.

It seems now to be a well attested fact that if lymph which is not contaminated with the blood of the person from whom it is removed is used there can be no possible danger of transferring any other disease whatever. In other words, it is confidently asserted that the vaccine lymph itself cannot at the same time contain two poisons, one of which will produce a disease dissimilar to variola. Not even smallpox itself can be conveyed by lymph taken from the true Jenner's vesicle. This has been tested repeatedly by taking the lymph from a person who has been vaccinated too late to prevent the occurrence of smallpox, and in these cases nothing more than the symptoms which ordinarily follow vaccination were observed in the persons who were vaccinated, although the patients, at the time the lymph was collected, were suffering from severe and unmodified smallpox.

The "Lancet" further says: "As regards the idea of serofula being conveyed by vaccination, there can be no doubt that it is a mistake. Its development is, on the contrary, greatly prevented, inasmuch as smallpox, by weakening the system, was often the occasion of serofulous and tuberculous diseases. Again, when skin eruptions are occasioned by vaccination the fault is not necessarily with the matter, but with the constitution of the child vaccinated." The same remark might have been as truthfully made in respect to serofula occurring after vaccination, which may, undoubtedly, take place after such a mild affection as variola in unhealthy children, just as it may follow measles and scarlet fever.

While it is thus contended by the best authorities that no disease but the one intended can possibly be transferred by vaccination, even if the lymph is taken from an unhealthy person, there is no physician who has the credit of his profession and the welfare of his patients at heart who would knowingly select such unhealthy material. It follows, then, that vaccination may be unreservedly recommended as being not only free from danger in itself, but as providing us with an almost certain preventive from a dreadful scourge.

If the operation had been properly performed upon every person in this city, it may be safely asserted that instead of the death rate of sixteen per cent. which we now have, according to the statement of the registrar, it would not have been one-fifth as great, even if the same number of persons had been attacked, which certainly would not have been the case under such circumstances, since varioloid is nothing like so contagious as genuine smallpox.*

For "The Friend."

As it is always a matter of interest and encouragement to find the peculiar views which Friends have ever held, advocated by other religious professors, I send the following extract from a communication in a late number of *The Episcopalian*, respecting the right understanding of the Holy Scriptures.

It would be well if some among our own members fully appreciated the force and scope of these truths.

"It was not the wise and prudent, men of fame in the schools of men, who wrote the Scriptures; no, no, but men called of God and inspired by the Holy Ghost; these were the men that wrote the Scriptures. And it is by, and only by, the inspiration of the same Holy Ghost, that men have, do, or can spiritually understand the Scriptures. I thank Thee, O Father, Lord of heaven and earth, that Thou hast hid these things from the wise and prudent, and hast revealed them unto babes; even so, Father, for so it seemed good in Thy sight." The more men shall labor to compass a spiritual knowledge of the Scriptures of God by the help of what is called the liberal sciences, so much the more fearfully will they err, and carry souls with them down to perdition, because that which is hidden by the Lord, the world, by the wisdom of His schools, can never search out and find.

"All that which the Holy Ghost works in the souls of sinners saved by grace, these saved ones can see it noted in the Scriptures, so that what they feel written within them they can see it is written without them, and the Holy Ghost teaches them to compare what is written within with that which is written without, and that which is without with that which is within, and this is called, 'comparing spiritual things with spiritual.'

"This work of the Holy Ghost in the soul is the only key that will unlock the precious treasures contained in the Scriptures of truth."

Snakes at their Meals.

A writer in the English *Naturalist's Note-Book*, who has recently noticed the feeding of the serpents in the Zoological Gardens in London, says they are fed once a week, though some of them, and in particular the pythons, do not take their food so often, but will eat enough at one meal to last for weeks, and even for months.

Disregarding the scientific divisions of the order which comprises these animals, we may divide them into three classes; firstly, those which seize their prey with their teeth, and crush it in their folds; secondly, those which seize and swallow it alive, after the manner of lizards; and thirdly, those which bite, or rather strike it with poisonous fangs. Of the first, the finest examples are the pythons and boas, besides which there are the yellow snakes of the West Indies and others. Those of the second are fewer in number; they include the rat-snake of Bengal, viperine snake, English snake, &c. The present specimens of the third class include rattle snakes, and Indian and Egyptian cobras, water vipers, &c.

The constricting serpents, as we may term them, are kept in large cases, the entrance to which is either by a glass door in the front, which opens by a sliding up, or by a similar contrivance at the back, in the wooden partition. The colubrine snakes are in some of these cases generally, and indeed are so harmless, that little precaution is needed. The venomous serpents have no opening but a small one on the lid of the case, about two or three inches square. Through this their food is introduced; and all necessary operations for the cleanliness and order of the interior are performed with a rod of stout wire, to the evident disgust of the occupants, who, if new comers, strike at it vigorously with their fangs. The first to be fed were the yellow snakes, and other species in the same case.

The keeper, having unceremoniously removed the blanket, beneath which most of the occupants of the compartment were huddled together, as usual, quickly introduced under the glass door about a dozen sparrows and one or two Guinea-pigs. The former immediately retired to the darkest corners, seeming, however, to be quite unconcerned as to the presence of the snakes, as in some cases they stood on the bodies of the latter, which for the most part remained motionless. The Guinea-pigs were more restless, moving slowly about, as if in search of food. They seemed to be preferred by the snakes to the sparrows; and presently one of the reptiles, waiting his opportunity, seized a Guinea-pig by the neck, and, jerking it nearer, threw two or three folds round it, killing it in a few seconds.

The other snakes rapidly dispatched the sparrows in the same way when seized; but they were apparently in no hurry, as there was a number of the birds in one corner for more than an hour, which had not been touched during that time. It may be well to remark that there is nothing revolting in the spectacle of a serpent taking its food. Its victim suffers neither the mental or bodily torture ordinarily supposed. When seized, it is killed without delay, especially if it struggles to escape; and before its seizure it is never conscious of danger. Not only is this well known to those in charge of the creatures, but we can verify it from actual and careful observation. A rabbit will approach a snake out of mere curiosity, and after sniffing at its head, and even being touched by its tongue, will start to another part of the enclosure, and resume its composure, returning again in the course of its explorations to the same snake without the least uneasiness, except what arises from a want of cabbage-leaves and the indigestibility of the gravel flooring. Guinea-pigs show even less concern, and are not so easily startled by any moving object.

The snakes which had seized the sparrows, &c., waited till their prey was quite dead before they uncoiled, and began slowly to prepare for swallowing it. The pythons, which occupy an adjoining case, and are the largest serpents in the collection, were next supplied with two or three ducks. The largest python instantly seized one, and threw one fold around it. He then remained perfectly motionless, appearing to be satisfied with having secured the bird, and did not at once kill it. The duck did not seem at first much concerned at such unusual treatment, but soon became restless, on which the python tightened the fold, and in about a minute had quite destroyed it. Having waited for some minutes, as if to make sure that life was extinct, he slowly unwound his coil from the body, and touched it with his muzzle, moving it about till he had found the head. The idea of lubrication with saliva, now quite exploded, evidently arose from this habit of feeling over the body with the mouth. Having taken the head into his mouth, he began to swallow the carcass,—his jaws stretching to an immense extent to allow of its passage. When he found any difficulty, he used the part of his body which lay nearest to it to push it gently, and, considering the apparent difficulty, was not long in completing his meal. The supply of food is never stinted, and we believe that it is not uncommon for a python to devour six or eight ducks and rabbits on one day. Of

course a full meal takes a long period, as is the case with all reptiles.

The colubrine snakes might with proper be termed legless lizards, as, with the exception of the want of limbs, they are in respects similar in structure to the saurians. A fine, lively specimen of the Bengal rat-snake was fed with half a dozen frogs, which pursued with great speed round the enclosure, and, driving them one by one in corner, seized and swallowed them in spite of their struggles.

The keeper having put two young guinea-pigs into the case containing the rattlesnake one of the snakes instantly struck at nearest to him. The action of a venomous serpent in wounding an animal cannot strictly be called a bite, as, though the fangs undoubtedly represent teeth, the jaws are not closed upon the object struck, which is simply pierced,—the snake in most cases retiring immediately. The guinea-pig almost instantly showed signs of giddiness, but its body did not appear to swell; it seemed to be thrown into violent convulsions, and in a minute fell helplessly on its side, without other sign of life than occasional spasmodic motion of the jaws. A larger animal would not have been so soon killed; but as snakes, being confined, have not often a chance to use their venom, it is probably more powerful than when they are in a wild state. There are a large number of puff-adder one case; and a guinea-pig being introduced began sniffing about as usual; but though he was touching one of the reptiles, it did seem disposed to strike, when suddenly another puff-adder darted at full length from the opposite corner, and, striking the first, remained with its fangs apparently buried in its flesh, contrary, we believe, to the habit of the reptile. His intention was, perhaps, to prevent any of the others from vouring it.

There are specimens of the two species of cobras,—the Indian and Egyptian,—perhaps the most interesting of all serpents. Be account of their excitable nature, it has become necessary to hide them partially view by filling the lower half of the case with ground-glass, so that it is not easy to observe them. The appearance of the cobra when about to give the fatal stroke, is so full, and yet terrible to see. The inflated waving motion of the head, and the peculiar expression of the eye, combine to impress the observer of its consciousness of the power which it possesses, and with which it threatens any living creature that dare approach it.

THE FRIEND.

TWELFTH MONTH 2, 1871.

The holding of General Meetings by the editor of the "Christian Worker" exercises it, become "the order of the day." The Yearly Meeting has the power to decide and where—within its own limits—meet for Divine worship may be held, and, with right authority, to appoint committees to make arrangements for and have the oversight of such meetings. It is however serious and responsible movement.

How far primitive Christianity, as pre-

Friends, will be promoted by the "General Meetings" now so much in vogue, time and place for holding are advertised long beforehand, arrangements are made with railroad companies to the fares charged those who will attend and urgent invitations are extended to others and other speakers, from all quarters to be present at them, and partake in what has been termed "the religious festival." The kingdom of the Redeemer is in any way spread by them, we can rejoice at it; but the accounts of them published, and from imitation derived from other sources, were not but fear there is very much the same of excitement attending, as, a few years since, spread over the north of Ireland, agitating the people and dying out, without leav- ing permanent good fruit. Be that as it may, are certainly things said and done at these meetings, which show how the departure from the order of our Society, and how nearly both in doctrine and practice, the participants copy after each other.

From what is made public, the subject appears to be to instigate as far as possible of those whose feelings are excited by what they hear and see, to "public confession" of their belief in the assurance they will thus be "saved," and then to stimulate them to set to "save" others in the same way.

It cannot surprise us that persons of other denominations, witnessing the changes effected among those who have left the faith of Friends, should conclude they are amalgamating with other professors. As the account of Indiana Yearly Meeting published in "The Indiana Radical" was as follows:

"W. Wetherald, [of Canada,] took a prominent part in conducting our evening meeting for members, much after the manner of Methodist experience meetings, and was very popular at the meetings for prayer.

There were two outside meetings beside the house, and the extensive grounds were like a sea of persons, horses and vehicles. Most of the outside preaching was of a wonderful similarity to that of Methodists. The speakers would frequently repeat passages from hymns, just as Methodist ministers do. Both in sentiment and manner the singing was rather in the revival style.

Doctrines, too, were more Methodist than Friends. If we understand the difference. In respect this "new departure"—denominational speaking—must be entirely commendable, in that which leads to going out of the Society, in the way of religious influence and teaching, preaching to other societies and those of no religiousity."

Other than our readers may have opportunity to judge of the correctness or otherwise of the views expressed relative to the departure from some of the doctrines and tenets of Friends, we give a few extracts from the report of the General Meeting, held in 10th mo. last, at Poughkeepsie, N. Y., published in the "Christian Worker" of 11th mo. 15th, 1871, a periodical conducted by two Friends, at New Vienna, Ohio. As our space is limited, and it is not necessary for a correct understanding of what is given, we will specify the day or hour of the meeting, and the subject is chiefly our own.

"It lasted five days, and was largely attended. Many were strengthened and refreshed, and some, we hope, converted. Friends' meeting-house, seating 300 or 400, proved too small, and the Presbyterian church, which seats 700, was generously offered, and thankfully accepted.

"S. F. Smiley related the details of Paul's conversion, and deduced three practical lessons. 1. To be converted, we must have Jesus revealed to us. 2. Instant surrender is necessary. 3. As soon as we are saved ourselves we shall work to save others.

"W. Wetherald illustrated the love of God. A disobedient son had wasted his father's possessions, ran away from home, gloried in wickedness, and broken his mother's heart. He heard of her illness—returned—sought her chamber—she lay there dead. As he sank down in remorse by the bier, he heard a groan on the other side, and looking up, beheld his injured father, who stretched out his hand to him across the dead and said, 'My son, for her sake who is lying here, I will forget the past and be reconciled.' Thus does our heavenly Father hold out His hand to us across the dead Christ whom our sins have slain, and, for His sake, forgives us freely.

"William Wetherald quoted the example of Epaphras. It is a mistake to wait for extraordinary influences before we dare to pray. We are commanded always to pray, and are invited to come fully to our Father. We should always be in the spirit of prayer, and often engage in vocal supplication. *Repressing the latter, chokes out the former.* The use of the voice and of language gives point and force to petition. Desire alone is not prayer; desire must take wings and fly up to God. The poor heathen who prays mechanically intends to express dependence or gratitude, and thus condemns enlightened men who never pray at all. How sad there are children who never hear the voice of prayer except when absent from home!

"First-day.—Meetings were held in Friends' meeting-house and Presbyterian church today, simultaneously, and were densely crowded.

"At the church, whose usual congregation was present in addition to a multitude of Friends, Methodists and others, the pastor called attention to the privilege and duty of Christian union. Regiments in the same army, in the darkness of cloud and storm, had sometimes fired upon each other, but when light broke in they knew each other for friends. In the darkness of past days the different denominations had been hostile, but now they perceived that they were defending and serving the same—one work to do, one end in view, 'one Lord, one faith, one baptism.'

"In the afternoon C. Talbot held a temperance meeting, other Friends a children's meeting, a mission school was visited, and a meeting held with the young ladies of Vassar College.

"W. Wetherald preached on the leading evidence of the truth of the Christian religion, prophecy, miracles and internal evidence, closing with a forcible plea for the Bible, as our only revelation of the Saviour.

"At the meeting-house an excellent meeting was held at the same hour, attended by a large number of ministers. At the close, all were invited to rise who wished to renew their covenant or to dedicate themselves henceforth

wholly to God; all in the gallery and many others stood while J. H. Douglass offered appropriate prayer. This was very solemn.

"Some attempt was made to introduce and expound the peculiar doctrines of Friends, but others felt it a more suitable time to preach the simple gospel of Jesus crucified. As this sentiment prevailed a new life and power developed in the meeting. An intense solemnity was felt. Sins were confessed, prayers requested, hopes acknowledged. The husband and the wife, the venerable and the young followed each other in brief prayer and testimonies. It was difficult to close the meeting.

"Zacchus Powell offered prayer. J. H. Douglass enforced the language 'Repent and be converted.' C. E. Talbot appealed to the impenitent. The church was crowded, and the deepest seriousness pervaded the whole congregation. Those who were seeking salvation were invited to rise. Several did so, and manifested great earnestness and anxiety. Others who had not courage to rise were weeping and alarmed. Very fervent prayers were offered for the convicted and repenting.

"The meeting was similar in character to that of yesterday morning. Many established Christians spoke in brief exhortation, and many trembling ones who had never publicly spoken before. Children rose with the simple confession, 'I love Jesus.' Brethren and sisters of other churches joined their testimonies to ours, and were not always to be distinguished from us, because the same in heart and hope. Sarah Smiley spoke of the offices of Christ. We have two who plead for us in Heaven. The word in one place rendered 'Comforter,' is translated 'Advocate' in another. The Spirit intercedes—Jesus intercedes. We ask Christians to pray for us—let us ask Christ to pray for us.

E. L. Comstock read Isaiah 60. After several prayers, S. F. Smiley preached on the parable of the prodigal son. J. H. Douglass made one last, earnest appeal to the impenitent. R. L. Murray said he would not invite those who were out of the visible church, to come to us, but that the Lord had need of them, and that they should seek to know His will, and make a Christian profession. J. H. Douglass bade farewell, and asked all those who loved the Lord Jesus Christ in sincerity, and would follow Him through life, to acknowledge it by rising. More than three-fourths of the great congregation stood upon their feet—united in one faith, soon to part until the last tribunal, and then to rejoice in eternal reunion. Still standing, they were commended to God in solemn prayer, which closed in benediction."

"In the same number of this paper is a letter signed J. Hill, dated Logansport, Indiana, 10th mo. 9th, 1871, giving some account of a "General Meeting," held, we suppose, there. Among other things, J. H. says:

"For these many days I have desired the privilege of attending a "General Meeting" of Friends. And amidst many other privileges, this also has been granted.

"Two evening meetings were held, which were of considerable interest. They were not, however, under the care of the committee; a good deal of talking was done, and a high standard of Christian perfection or holiness was professed to have been reached by some. We did not have so good a set of singers as Fifth Street folks are favored with, to warble forth their beautiful hymns from time to time,

filling the house with melody, and mouths with praise, and giving life to a Quaker meeting.

"How much loss have we suffered from this lack, I cannot determine. The meeting came and is gone. We have met, and meet perhaps never again. The sun of that moment is set, and I trust has not risen in vain, for we were made to rejoice that we had been there."

There is another letter given in this number, showing, though in a different way, the change going on among many in the Society, from Quakerism to Methodism. It is as follows:

"A METHODIST MEETING.

"It was my privilege, not long since, to attend a Methodist meeting, held at Friends meeting-house, Starksboro, by appointment. The congregation was made up of Baptists, Methodists, and Friends, the latter much in the majority, and the poor minister evidently labored under embarrassment from the fear that his mode of worship would not be acceptable to the greater part of his hearers, but remembering, doubtless, his allegiance to his risen Lord, and that praise is comely to the upright in heart, this devout servant arose, and in much earnestness sang a portion of the hymn commencing with these lines:

'Had I a thousand tongues to sing
My great Redeemer's praise,' etc.

"Not alone, however, did the melody of his heart rebound from Quaker walls, but mingled therewith was the sweet voice of a Quaker mother, clad in the habiliments of simplicity—bearing the badge of discipleship in her countenance, and upon her head.

"After a few moments of silence, the prayer and exhortation, accompanied with the spirit and power of Jesus, was sensibly felt, and the season acknowledged to be one of Divine approval; thus the God of Methodists, Baptists and Quakers, was realized to be in our midst, a respecter of souls but not of persons, and we thought how applicable were the words addressed to Peter: 'What God has cleansed call not thou common or unclean.'

"When our Methodist brother had concluded his earnest exhortation, and invited all to be faithful to the convictions of duty, in reference to confessing Christ before men, a young man rose and gave in his testimony to the love of Jesus shed abroad in his heart, expressing his serious determination to follow in the footsteps of his Master, thus beautifully exemplifying the Scripture declaration, 'that it is good for a man to bear the yoke in his youth.' When near the close of his remarks, a Friend near the gallery shouted a hearty Amen, after which a prominent member of the Society of Friends fully endorsed the Methodist Gospel, and bade him Godspeed on his mission of love. The meeting closed in much solemnity, and the canopy of Divine love was spread over all, irrespective of name or sect.

"I looked, and it seemed the partition walls were falling—Sectarianism crumbling—primitive Christianity reviving, and the Quakerism of thirty years ago in the distance for a background. Verily, a mighty change is taking place amongst us, which will result, I trust, in a warm, earnest, living Christianity that will wage a successful and aggressive warfare amid all nations, kindred, tongue and people,

to the glory and honor of Him whom we profess to love.

"I would that Friends, as a body, would throw off the shackles of formalism, and let their light shine brighter and brighter upon all people.

H. L. P."

Truly, we think if these changes continue to go on in the same pace for a year or two longer, there are some of the honest-hearted among our members, who have been, and are encurring those who are faithfully maintaining the testimony of Truth against all these innovations and their abettors, that will yet rejoice that their faithfulness has been a means of preserving a remnant from being swept away by the current.

SUMMARY OF EVENTS.

FOREIGN.—In England the weather has been unusually cold for the season, so that thick ice has formed on the ponds near London, and skating was common. The sudden and severe coldness has caused great distress among the poor, and the police returns show that within the city limits seventeen deaths had resulted immediately from that cause. Measures are being taken to provide clothing for the sufferers.

The Prince of Wales is sick with typhoid fever. On the 26th his illness appeared to be of a serious character.

A colliery explosion occurred on the 24th ult., near Broadwell, while men were at work. Eight miners are known to have been killed. A similar accident is reported in a coal mine near Haversford, by which twenty men were injured, but, as far as has been ascertained, no one was killed outright.

A mass meeting has been held in Bristol, at which the speakers were unrestrained in denunciation of the monarchy of Great Britain. The Queen has removed her residence from Balmaral to Windsor Castle. John Bull, secretary of the total abstinence society at Brisca, has publicly accused the Queen of intoxication. He has been arrested and the magistrates at Torquay have refused the application for bail in his case.

Reports of disasters to shipping by the recent storm, continue to come in from all quarters. The *Edgway* was driven ashore on the Irish coast in France, and became a total wreck. Five of her crew were drowned and ten were saved.

London, 11th mo. 25th.—Consols, 94½; 93½. U. S. bonds of 1862, 91½; ditto of 1867, 91½; ten-forties, 90. Liverpool.—Upstairs cotton, 93 a 94½; Orleans, 10d. Sea-cotton, 40 a 90,000 bales.

A Paris dispatch says that the government has resolved to support a motion for making the seat of government at Paris at the next session of the Assembly.

The French Minister of Finance, in the budget to be submitted at the coming session of the Assembly, will cut the debt loan of \$190,000,000.

The trial of Communists who were engaged in the destruction of the residence of Thiers has terminated. All were convicted, and sentenced to imprisonment for terms ranging from two to twenty years.

The Commission of Pardons has rejected the appeals of Ferré, Rossel, and other leading Communists. In the German Parliament a bill has been introduced and advocated by the Bavarian Minister, providing for the criminal prosecution of clergymen who shall abuse the privileges of their office. This bill is understood to be the first of a series of bulwarks against the encroachments of the church upon the liberties of the people.

The commission upon the budget estimate the annual expenditure for the regular troops, based upon a force of 401,569 men, exclusive of officers, at \$90,333,090, and recommend an appropriation of \$225 per head for that number of enlisted men for the ensuing three years.

Emperors of Germany has consented to act as arbitrator between the United States and Great Britain upon the question of the disputed line between the U. States and Vancouver's Island, in the Straits of San Juan de Fuca.

In Belgium the appointment of an unpopular man to the governorship of the province of Liege, has been rejected by the people at a recent election in Brussels followed. In order to allay the excitement and relieve the government from its embarrassment, the obnoxious governor resigned.

Victor Emmanuel made his entry into Rome on the 1st ult. The people filled the streets in immense numbers to greet the king with enthusiasm, and during his progress to the Quirinal, where he has taken up his residence.

It is now stated that after the municipal elections changes will be made in the Spanish Cabinet, admit of the entrance of Sagasta and Admiral T. who are understood to have signified their willing to take portfolios on certain conditions. The session of the Cortes was prorogued until 24 mo. 1872, and it is probable that the presence of the king will be in office. In the mean time the decision of many questions now pending is postponed.

An Alexandria dispatch of the 24th says, a steamer crowded with pilgrims from Algiers, en route to Suez via the Suez Canal, was run into yesterday and Severely injured. The passengers were drowned.

UNITED STATES.—Miscellaneous.—The Intercity Philadelphia last week numbered 394. There were deaths from small pox, 15 disease of the heart, 4 of consumption. Males 190, females 204. The sum of the City Treasurer have paid a 100,000 to the Solicitor, and the property of the detailing Clerk has been sequestered. He has also been arrested bound over for trial.

Salt Lake dispatches mention the prevalence of weather and severe snow storms in that region, snow in some parts is from five to six feet on a and had fallen in some places. A number of persons in the snow. Some of the Mormons have resigned polygamy in obedience to the law, and sent away their plural wives, but these are denoted as no longer members of the Mormon church.

The recent storm in western Kansas is said to be unusually severe. Large numbers of Texans were frozen to death, and some persons also perished.

The Markets, &c.—The following were the quotations on the 25th ult. New York.—American gold, U. S. sixes, 1881, 117½; ditto, 1868, 114½; ditto, 5 per cents, 109½. Superfine flour, \$5.80 a \$6.20 brands, \$6.25 a \$10.75. No. 2 Chicago sugar, \$11.00—1.52; red western, \$1.60 a \$1.62; amber, \$1.60 a \$1.62; Michigan, \$1.70; white Genesee, \$1.63 a \$1.67. Iron barley, 90 cts.; Canada, \$1.22. Oats, 53 a State rye, 95 cts. Yellow corn, 79 cts.; white, Middling cotton, 19½ a 20½ cts. Philadelphia.—Cotton, 24½. Western mixed corn, 73 cts.; no yellow, 71 a 72 cts. Oats, 41 a 42 cts. No. 1 Family flour, \$6.60 a 57. Wheat, \$1.42 a \$1.45. 44 a 45 cts. Chicago.—No. 1 spring wheat, \$1.23 a 1.18. No. 2 corn, 41 cts. No. 2 oats, 30 cts. St. Louis.—No. 2 winter red wheat, \$1.35 a 3 do. Oats, 45 cts. Oats, 38 cts. Spring, 60 cts. Lard, 8½. No. 1 white, \$1.17 a 1.18. No. 2 do., \$1.35. New corn, 55 cts 40 cts. Detroit.—No. 1 white wheat, \$1.46 a Oats, 47 cts. Corn, 62 cts.

FRIENDS' RELIEF COMMITTEE OF PHILADELPHIA.

For the Relief of Sufferers by Northwestern Fires.

Information received from various reliable sources by the members of our own religious societies, has rendered it very evident, there will be a coming, impending season, a great amount of arising from the dreadful fires which have devastated a very large portion of our north-western country including many small villages and settlements, as the city of Chicago. Friends in the West, peculiarly to this scene of suffering, and those in the land, will no doubt endeavor to render assistance as may be in their power. A committee of Friends has also been organized in Philadelphia, who receive and forward contributions, taking due care they will be properly applied.

Friends in Philadelphia are members of this committee, and donations may be forwarded to any of them, or directly to SAMUEL R. SHIPLEY, Treasurer of the Providence Life and Trust Co.

MARSHALL C. COPE, 1312 Filbert St.
CHARLES EVANS, M. D., 702 Race St.
WILLIAM KRUSKY, 408 Market St.
HENRY HAINES, 417 Walnut St.
ELLISTON P. MORRIS, 4782 Main St., Germantown.

DIED, on the 25th of Ninth month, 1871, FREDERICK R. BURR, in the 74th year of her age, a member Monthly Meeting for the Western District, Philadelphia.

WILLIAM H. PILE, PRINTER,
No. 422 Walnut Street.

THE FRIEND.

A RELIGIOUS AND LITERARY JOURNAL.

VOL. XLV.

SEVENTH-DAY, TWELFTH MONTH 9, 1871.

NO. 16.

PUBLISHED WEEKLY.

Two Dollars per annum, if paid in advance. Two Dollars and fifty cents, if not paid in advance.

Subscriptions and Payments received by

JOHN S. STOKES,

NO. 116 NORTH FOURTH STREET, UP STAIRS,
PHILADELPHIA.

Single Copies, when paid quarterly in advance, five cents.

For "The Friend."

Memoirs of Mildred Ratliff.

(Continued from page 115.)

"320. 21 mo. 9th. Attended the Select Quarterly Meeting of Abington; and on the 14th the general Quarterly Meeting. I think it was a good meeting. All within me bows, now I hope while I write these lines. Rather, I do acknowledge that thou art great, and worthy of humble dedication from me, up to the grave."

"For attending meetings at Darby and when she reached Concord on the 14th, and at their Select Quarterly Meeting. Next she attended the Quarterly Meeting at Philadelphia, after which she writes: "This has been thy gift of Divine favor, which I think was so precious to me. The faithful had afresh to rejoice in humble confidence that the Lord has forgotten to be gracious; giving evidence in His is still mindful of His people. Many of them were reached. Be pleased, O right-ous Father, to cause the blessing to descend on the hearts of thine own dedicated children; and, through the might of Thy power, an increase of living members may be added to the church."

"5th. At Centre; the day following at Abington; and on the 18th at Birmingham. Not only to rejoice in, but in being accounted worthy to suffer with the suffering seed. Yet these are a few faithful Friends in almost every place; and this is cause of thanksgiving and praise."

"9th. At Whiteland. I think it may be the everlasting gospel was preached here, and some minds were afresh humbled, and the ear of our God was glorified. O my Father, let to accept all the praise from every heart, for thou alone art worthy."

"At Radnor and Haverford on the 20th and 21st 221 at Merion. This was of the number of meetings wherein the glorious name of our God was magnified. O my soul, hold fast thy confidence, since thou hast often known when thou art the most sensible that weakness is not, then it is that strength cometh of the Lord."

"31. At Pine Street Monthly Meeting, Philadelphia, and next day at their Monthly Meeting on Arch street. These were comfortable meetings.

"25th. Went on to Frankford, and was at their Monthly Meeting, which was indeed a painful one. The seed of the kingdom here, has been and yet is under great suffering; or at least it felt so to me, a poor stranger. Such a testimony as I here felt bound to deliver, has not been common for me; but felt easy in believing I had done my duty. Some well exercised Friends, who no doubt felt bound to the law and the testimony, told me after meeting was over, no doubt for the strengthening of my faith, they were glad I had strength to be honest and faithful. For, searching as it was, it was nothing more than there was cause for. May the Lord remember his wrestling suffering seed in that meeting."

"26th. Went on to Byberry, and attended their meeting next day. Here the excellency of the Divine principle was precisely opened, and the people invited unto it."

"28th. At the Select Quarterly Meeting in Burlington, New Jersey; and on the 29th at the meeting at large. We made our home at the house of dear Martha Allison—a widow. This is a precious family indeed; and in this place it appears the Lord has a number of dear children, that know a being fed from His hand."

"31 mo. 1st. Visited a few Friends; and then went on to Lower Mansfield Meeting, which was a poor little one indeed."

"31. At Mansfield. 4th. At Barlettown; where, in the forenoon, we had a public meeting. In the evening one for the members alone. And though it wound up with a degree of relief, in sympathy with the few mourners here for Zion's sake, yet it was a lay of ex-reprise to my poor body and mind."

"5th. At Chesterfield. Owing to the people's minds being too much outward, true genuine religion is at a low ebb. Lord, turn the current, or else many thousands in the world must, in the winding up of all things to them here, go down to the chambers of death."

"On the 6th, 7th, 8th, 9th and 10th, M. R. and company attended meetings at East Branch, Upper Freehold, Shreve's Mount, Upper and Old Springfield, respectively. Of this service she writes: "Through all this far the Lord Jehovah has been our Helper, and owned us I am bound to believe. However unworthy, thus far His excellent name has been magnified in many hearts. O my soul, do thou keep close to the watchtower! Yea, trust in the Lord; for many a time thou hast proved that His arm is everlasting strength."

"11th. At Ranococas. A few precious wrestling souls are here, who are struggling rightly for the blessing of blessings—an interest in our Lord and Saviour Jesus Christ. Because of these things [no doubt for the want of more such spiritual wrestlers] my mind is often covered as with the garment of mourning."

After attending meetings at Mt. Holly and

Vincentown, on the 11th, she says, "We went on, and found a pretty comfortable resting place at ——'s, who from appearance has gotten rich from his great iron works. His wife, and several others of his family, are members of our Society, though he is not, yet a truly kind man to us."

"We have on this journey met with several who have been very kind to us poor travellers; and yet after all without a serious change of heart and mind, it is to be feared they will be found wanting in the one thing needful. Alas, what pity for these!"

"16th. Was at their mid-week meeting at Little Egg Harbor. Truly lamentable it is that in most or all places, true religion is so much wanting. Yet it is comfortable to find a living remnant are still preserved."

"17th. At Barnegat, where we had a painful time. On the 19th were at Bass River Meeting. Here there is a good ground to hope Truth may grow and prosper; and I have no doubt it will, if the few friends here keep to the principles of Truth. This will cause others to flock to them. Lord, be pleased to give these few an increasing sense of the great responsibility attached to their little indulged meeting."

"20th. I being very poorly, we found a comfortable resting-place at the house of a colored Friend, David Mapps, whose situation seemed to manifest that a blessing had attended their efforts. And I thought the state of these friends (for indeed we found them friends to us) might serve to confirm the testimony that God is no respecter of persons."

"21st. Had a meeting near this place, in a school-house, to satisfaction."

"23d. Was at Galloway or Leed's Point Meeting. 24th, at great Egg Harbor. Both these were poor, and painful seasons indeed. Next day travelled nearly forty miles; and on the 26th were at Cape May. The few little meetings hereaway have been attended with such feelings of death and darkness, that except for a very few here and there who seem to be pleading for daily bread, and except that the Lord's mercy is everywhere, there would be little or no hope. It has indeed felt to me, that it might be said, "Darkness has covered the earth, and gross darkness the people." I think I have not known any part of the world where true religion seemed to be so entirely rooted out."

"28th. At the Meadow Meeting, which proved in a good degree refreshing, after having inwardly and outwardly passed as through the region and shadow of death. This was a comfort in the needful time, and is renewed cause of thankfulness and of praise unto Thee, O righteous Father, who has thus led us about and instructed us."

"29th. At Manrice River. Though we found some precious Friends here, yet it was to be felt that true religion is in a low state. When will our Zion arise, and shake herself from the dust of the earth, and put on her

beautiful garments as at the first? The answer seems to be, *when her members deepen in the root of religious exercise.* Hasten this desirable period, O Thou that hast power, if so it seemeth good in Thy sight!

"31st. At Greenwich. Here the blessed Master was with us, and gave us a good meeting; notwithstanding it is a mournful truth, that religion is here also in a lapsed state.

"4th mo. 1st. At Alloway's Creek. Here also we had a good meeting. The name of our God was magnified. I have no doubt in my hearts, for all his benefits. O righteous Father! my spirit bows low, and ascribes all praise to Thee.

"2d and 3d. At Salem and Pilesgrove: both preciously refreshing seasons. The salt of the heavenly kingdom was to be felt. Lord, increase it more and more, if so it seemeth good in thy sight.

"4th. At upper Penn's Neck; and the day following at Woolwich. At these also the glorious cause of religion was exalted, and the blessed Master's name magnified. I charge thee, O my soul, never forget to be thankful, and to give Him all His due: for He is worthy!

"6th. At Woodbury Monthly Meeting. Here I thought we found a number of preciously exercised Friends. May this class everywhere, multiply more and more."

(To be continued.)

Florence and Galileo.

BY MABEL SHERMAN CRAWFORD.

By the remembrances which its name invokes, Florence powerfully commends itself to the sympathies of every cultivated mind. Distinguished in power, in industry, and above all in literature and art, Florence shines out in the prevailing darkness of the mediæval times, with a lustre peculiarly brilliant. The woollen stuffs, the gold and silk brocades, the produce of Florentine looms, were prized, renowned, and sought for throughout the western world; and to Florence especially belongs the merit of making the merchants' an honored name. Of all the republics of Italy to which the Middle Ages gave birth, Florence was the one in which the love of liberty was the strongest, the cultivation of the intellect the greatest, and the laws the best framed and the best administered. Noted for the genius of its citizens, and the intelligence of its people, to Florence belongs the glory of having given to the world, during the Middle Ages, a greater number of illustrious men, than all the rest of Italy was able to send forth. Whilst the darkness of barbarism still hung densely over the British Isles, while knowledge there could find no resting-place save in the monastic cell, the poet, painter and scholar, daily met together as honored, cherished guests at the noble Florentine's board.

But amongst the many sons of Florence, who shed honor on that republic in bygone days, there are none who left behind them names so well deserving our respect as Galileo and Michael Angelo; the first, astronomer and philosopher combined—the teacher of great truths to an incredulous world. Florence is full of the memorials of her two great sons; and in Pisa, where Galileo lived for several years as teacher of philosophy in the university there, his memory is indissolubly associated with the far-famed Cathedral and Leaning Tower of that city. Their very names are eloquent to us of him, for with both

these structures are connected incidents of no small moment in history.

To the philosophic mind, trifles are often fraught with teachings of wisdom. The swinging of a large bronze lamp, suspended from the roof of the Cathedral at Pisa, was apparently an incident of the most trivial description, but to Galileo that sight evoked a train of thought which resulted in the discovery of the theory of the pendulum. Hanging yet where it hung in the days of that great man, that lamp can never be looked on without interest.

Still more suggestive of Galileo than the Cathedral, is the far-famed Leaning Tower adjoining it, for here it was that he proved by a simple experiment, that the doctrines of Aristotle, which he had been appointed to teach, in the University of Pisa, were fundamentally wrong. Denounced by his brother professors as an ignorant pretender in the school of philosophy, as the defamer of an illustrious and unerring sage and the disseminator of untruths, Galileo eagerly called out, "Bring my doctrines to the test of experiment, and by this prove whether Aristotle's theory of mine, in regard to the law of falling bodies, is true." The challenge was accepted, and the Leaning Tower of Pisa was selected as the place where the demonstration was to be made.

Let us bring up the past before our view, and see assembled round that wonderful Leaning Tower, grave professors and solemn sages, who have come, confident of triumphing in the approaching discomfiture of an ignorant pretender in the paths of science and philosophy. Around them cluster an eager crowd, looking with curiosity at that obscure young man; who, though alone and friendless, the object of reproach and scorn, yet strong in the power of truth, stands up before them with sparkling eye and undaunted bearing.

The experiment is to be made by means of two balls, one of which is twice as heavy as the other. If Aristotle be right in his theory of the velocity of falling bodies, the heavy ball, when dropped from the summit of the tower, should reach the ground in exactly half the time taken by the lighter ball to pass through the same space, both being dropped at the same time. If Galileo be right, the two balls should not differ one instant in the rate of their descents. Nothing can be simpler than the experiment, and nothing more clearly and easily ascertainable than its result.

The moment comes when the issue is to be determined, and at a given signal down drop the balls from the tower: they strike upon the earth in the same moment of time. A proud moment was it for that young sage, and exulting was the look he cast on the discomfited philosophers. Again and again the experiment was repeated with the same results; and from that day Aristotle lost the sway that he had exercised for centuries over the human mind.

But the pioneer of knowledge, the discoverer of truths, needs a brave heart to sustain him in his battle against error and ignorance in this world; and no one more than Galileo required the endowments of a daring spirit and unflinching mind. Through his whole life he had to contend with determined incredulity, and with ignorance that pertinaciously refused to be enlightened. "Oh, my dear Kepler," writes Galileo to his friend, "how I wish we could have one hearty laugh

together. Here at Padua is the principal professor of philosophy, whom I have repeatedly and urgently requested to look at the moon and planets through my glass, which, pertinaciously refuses to do!" Unhappily Galileo's lot in life, the Paduan philosopher was only a fair sample of the pseudo-scientific sages of his day.

Florence warmly cherishes the name a memory of the great astronomer, and exhibit to this day many memorials of him. Attached to the Museum is a temple erected by the present Grand Duke to Galileo, and here may be seen the telescope which revealed to him the satellites of Jupiter. The observatory which most of his observations on the moon were made, still exists; and the stranger is shown the residence where, blind, infirm and weighed down by years and humiliation, his vexed and suffering spirit passed away.

But Florence possesses a still more touching memento of her great son than any those described. In the church of San Croce, the stranger's step is arrested by a tomb that bears Galileo's name; and inscribed is the heart that does not do homage to the illustrious dead—a teacher of truth which can never die, and who by years obloquy and persecution (by the cardinals of the Roman Church) by imprisonment and shattered frame, paid a heavy penalty for distinction he enjoyed of being the greatest genius of his age.

For "The Friend,"

From the Letters and Papers of John Barleah.

(Continued from page 107.)

In the following memorandum is perhaps the first direct allusion of J. B. to alteration in his life and conduct, with that also of change of dress and address, as foreshadowing what afterwards so decidedly took place in his own particular. That which at the time of writing was his friend's painful experience from submission to the cross Christ, was ere long to become his own. It is instructing to trace the gradual development of this concern, as a duty laid on to be shrank from, in the case of one variously gifted; and who, as he tells us, one time entertained nothing short of a contempt for these peculiarities. But the Lord's ways are not as man's ways; and in day like this, when the slavery of fashion with the love of dress, and the gewgaws and superfluities of its votaries, so painfully at shamefully abound, it is not to be wondered at, that the meek and lowly and world-renouncing Saviour, who, in the religion brought to fallen man, made no provision for show and parade—for pride, and vanity, and folly—should require His disciples to detest themselves herein; and to set the example that the narrow way to life admits not of outward adorning, but calls for "a meek and quiet spirit," even the becoming "all glorious within." May the Lord in His mercy so preserve from conformity to the spirit, and example of the world in this particular, as that a testimony so rational and comprehensive be not ignored among us, or suffered to fall in our streets.

"1816. April 3d.—I can scarcely refrain from writing a few lines, on the occasion of your bearing open testimony to those principles, which I believe he very sincerely espoused. It must indeed be a trying trial

him, not only just now, but perhaps
 eforth through life. The change of dress
 address, though a simple small thing in
 must doubtless be a pretty constant
 of ridicule and contempt, both in his
 ence and behind his back. I could say
 in favor of his sincerity, and I think
 exercises have not been few or slight, even
 as I have seen. Though I have had
 little direct communication with him on
 tious subjects, yet, in his deportment and
 act, in general so reasonable and upright,
 he has been much instruction for me. I
 have seen many evils and errors in him, evi-
 dently brought under correction and govern-
 ance, and the chords of his practice and daily
 conduct drawn tighter and tighter into tune;
 in witnessing this process, my admiration
 has been not a little excited, in the full belief
 that it evinces a power greater than his
 own, under the influence of which he en-
 dorses to live: he has proved and does prove
 a living lesson and example to me, and I think
 of others. On looking again at the matter
 which gave me occasion for writing this, I
 inclined to add, that the following con-
 siderations seem of too much importance long
 for examining; First, whether I am satis-
 fied to continue as I am, in respect to out-
 ward profession; Second, if not, when is the
 best time to make any alteration; Third,
 what precise change is to take place, in what
 particulars, and on what grounds. And may
 I who alone can preserve my soul from
 being with me; that so I may not err on the
 one hand, or on the left.

1816. April 11th. Having a short reprieve
 this week, before entering into a business
 which is marked out for me, [at a solicitor's
 office] I avail myself gladly of it to record my
 most joyful and sincere expressions of gratitude,
 to manifest all my backslidings and omis-
 sions, during the period of retirement which
 I have had of late, there remain to me yet
 some small bright spots and points, at which
 I can with satisfaction look back. For though
 there have been many and great errors and
 failings, and at times an almost total forgetful-
 ness of that Being, whose wisdom made me,
 whose mercy is still over me; yet am I
 encouraged in the belief, that at many seasons
 I have been a desire after, a searching for
 the living God, and for the knowledge of his
 will whom to know is life. I have indeed
 acted by reiterated and painful experience,
 a constant liability to which poor man is
 exposed of forgetting or forsaking the foun-
 tain of living waters, the Father of infinite
 love, who is daily striving with his self-
 created man. O! I have learnt, and
 the lesson he has indelibly impressed on my
 mind that it is good for a man to watch—to
 pray and be sober,—to fear always,—to
 be in His love who loved us.

1816. April 14th.—Uncertainty as to the
 manner and of our departure hence, and
 proximity as to the fact itself, seems to be the
 chief of our knowledge in regard to this awful
 event. We know indeed neither the day
 nor the hour when we shall be summoned, by
 a righteous Judge, to render an account.
 Seeing then that such is our case, may we
 not more and more earnestly strive after a
 state of preparation,—having our loins girded
 about and our lights burning; that, so
 whenever the awful call shall go forth, whether
 in the night, in the morning, or at noonday,
 we may be found amongst the trusty ser-

vants, 'whom the Lord, when he cometh,
 shall find watching.'

"1816. May 29th.—O Lord God of my
 fathers, the protector of every one that putteth
 his trust in thee, be pleased in thy un-
 bounded compassion and unutterable mercy,
 to look upon thine afflicted servant for good.
 O! Lord, thou knowest my ease and circum-
 stances better than I can possibly relate;
 thou seest all my wants, my troubles and my
 fears; in thy abundant and overflowing mercy,
 forsake me not in this time of trial and deep
 exercise of spirit. O! thou that art mighty
 to save and to deliver, help me that I perish
 not in this extremity; but that aided by thee,
 I may be enabled to do thy will whilst here,
 whatsoever it may be; and be prepared to
 glorify thee forever hereafter.

"1816. May 30th.—O Lord! the Father of
 the fatherless, the helper of the helpless, the
 friend of the afflicted: who hast promised
 never to forsake them that seek thee, and
 trust in thee; receive the sigh and tear of one
 whose spirit crieth unto thee day and night,
 —yea Lord, thou knowest, through every
 hour of the day: I pray not that thou wouldst
 take me out of the world, or from that station
 and place in it, which in thy infinite goodness
 is appointed for me; but this does my spirit
 crave of thee with unspeakable fervency, even
 that in all things, at all times, and in all
 places, thou mayst be pleased to dwell with
 me, and to keep me on every hand from all
 evil."

(To be continued.)

Wheat the Completest Food.—Man has both
 a mental and an animal nature, each of which
 must be properly fed and developed, or he is
 imperfect. Wheat is pre-eminently the food
 of civilized nations, and perhaps there can be
 no better measure of their civilization than
 the culture and consumption of that cereal.
 Nations have grown sturdy and progressive
 in the ratio of the consumption of wheat by
 all classes. Lovers of "brown bread" need
 not deny these statements, for the consumption
 of wheat does not imply the use of bolted
 flour. Scientific analysis confirms the indica-
 tions of history. Anatomy and chemistry
 show that food to be best which gives tough-
 ness to muscular fibre and tone to the brain;
 that nutriment to excel which best rescues
 the flagging spirit when the energies lie pro-
 strate without maddening stimulants.

That wheat fulfils all these conditions is
 not only attested by the character and fate of
 nations, but is susceptible to scientific demon-
 stration. The nice adjustment of its vital
 properties supports brain and blood and muscle,
 in just the proportion requisite for the
 highest type of manhood. Refined, fortified,
 and enterprised most distinguish those
 nations which most consume wheat. Beef
 eating and wheat-consuming races dominate
 and elevate the rice and pork consumers with
 whom they come in contact. Russia's serfs,
 lifted above the poverty of "black bread," are
 becoming consumers of the wheat they raise,
 and are rising in everything that appertains
 to true manhood, with a rapidity second only
 to the United States. Purchase something
 more than the satisfaction of appetite was
 included in that promise to the faithful:
 "They should be filled with the finest of
 wheat."

The "New Northwest" will remain the
 wheat garden of the United States, and in

after centuries will become the granary of the
 world. To this distinction will be added an-
 other: Rich enough to consume all they need
 of the wheat they raise, living in a climate
 wondrously adapted to bring out their best
 efforts, amply supplied with schools and
 churches, here will grow up the highest type
 of manhood, who will ultimately compel the
 world to admit that the "New Northwest" is
 indeed the "Seat of Empire."

For "The Friend"

Vital Religion a Quiet Inward Spiritual Experience.

Vital religion is an inward spiritual experience,
 that is not found with the froth of exci-
 tating outward demonstration of natural en-
 thusiasm and zeal, or display of intellectual
 gifts and acquirements; but in a solid settle-
 ment, in quiet childlike dependence and obe-
 dience, sitting as at the feet of the blessed
 Master listening to his gracious words of coun-
 sel and comfort, as Mary did. He declared,
 "Mary hath chosen that good part that
 shall not be taken from her." And saith the
 Psalmist, "Sacrifice and offering thou didst
 not require, but mine ear hast thou opened,"
 confirming the testimony of the prophet, that
 "Obedience is better than sacrifice, and to
 hearken than the fat of rams."

The religion of Christ leads out of all heats,
 out of all self-exaltation and human inven-
 tions, out of all disposition to outward display
 of eloquence, learning, or oratory in the work
 of the ministry, and out of the desire to sub-
 stitute human wisdom and critical knowledge
 of the letter, for humble waiting upon God.
 His promises are confined to them that wait
 upon and ask wisdom from Him; seeking that
 honor which cometh from Him, more than
 the praise of men. "How can ye believe
 who receive honor one of another," in mutual
 admiration for outward gifts and the pleasing
 display of their use in religious oratory and
 learned eloquence?

Surely are these inconsistent with the pro-
 fession of Christ, who made self of no reputa-
 tion and became obedient unto the death of
 the cross, not seeking to do his own will, but
 the service of Him who had sent him. We
 must be willing quietly to suffer as well as
 labor for the blessed cause which we profess
 to maintain, with fear and trembling before
 God, as his representatives and the compan-
 ions of our worthy forefathers in the
 Truth, who were brought out from the formal,
 literal believers of their day, to set up and
 maintain a spiritual standard, according to
 the teaching of that Grace which hath ap-
 peared to all men. This inward monitor and
 guide which would direct every attentive
 mind to its special duty, opens the scriptures
 to the spiritual understanding, as we have
 need and can bear it.

The Quaker religion has always required a
 meek and quiet waiting upon God for the
 teachings of his Spirit, free from all haste and
 heats; not relying on outward critical know-
 ledge, which is held entirely subordinate to
 the immediate teachings of the Spirit in the
 heart. Therefore this religion being free from
 outward display or dependence on the know-
 ledge which "puffeth up," has always been
 far from popular. Nevertheless it requires
 faithfulness to be maintained while it cherishes
 that charity which edifieth.

How many ways there are of sliding off
 the right Foundation.

KEEPING A VIGIL.

BY MARY E. C. WYETH.

"A little white and ye shall see Me."

Only a little white—the stars are fading,
Faler and paler, one by one away.
Only a little white—the night is passing;
Lo! in the east behold the coming Day!

Sad eyes, grown dim with tears of weary longing,
Look upward, see the mist that greets the Sun!
Soon o'er the hills the glory will be shining;
Soon thy sad vigil end, thy watch be done.

Pale lips, cold lips, that through the solemn watches
Of night and darkness mirror ceaseless prayer,
The sounds of night grow faint, the day is dawning,
Pray on in hope—the morning will be fair.

Ah, weary night! Through storm and tempest dark-
ness,
Through blinding, numbing flash, through fearsome
fear,
The lonely watcher kept her tearful vigil.
"This morning now; she weeps and prays no more.

Oh! too, across whose sky dark clouds are sweeping,
Night's shadows deepening, storm winds wailing low,
When one by one thou seest each star's declining,
Lift to the hills thine eyes—see morning's glow!

Patient endure. Thy silent tears, down dropping,
At length will bring thee, from the other shore,
With words of cheer, the herald of the morning;
And when the Day appears thou'lt weep no more.

Only a little white; the night is passing,
Soon shall we end life's vigil wearisome;
Soon shall the shadows flee, soon come the morning;
Only a little white. Lord Jesus, come.

—Independent.

IN THE FIRELIGHT.

BY AMELIA E. DALEY.

Brown little Ben at the fireside stands,
Patiently warming his half-frozen hands,
Down the broad chimney the cold wind is sighing;
By the broad chimney the red sparks are flying,
Warming the kitchen from ceiling to floor,
Melting the black frost away from the door,
Brightly illumining the figure that stands
Thoughtfully warming its little brown hands.

Standing there, lost in a half-waking dream,
What does Ben see in the firelight's gleam?
Why is that smile o'er his dimpled mouth going?
Why are his eyes in an instant so knowing?
Why is the flush on his cheek deepened now?
Why so determined his smooth, beyside brow?
What does he think, as he silently stands,
There in the firelight warming his hands?

Many a poet has dreamed the same dream,
Thought the same thoughts in the firelight's gleam.
Many a scholar and leader of earth,
Stood, when a child, on an humble hearth,
Ben, the poor farmer's boy, reads in the flame,
Promise of knowledge and promise of fame;
Sees a great future, as silent, he stands,
Patiently warming his brown little hands.

—Household.

For "The Friend."

The following account will perhaps be read with interest, as it sets forth the life of the present Emperor, who has recently, at a large pecuniary sacrifice, liberated all the slaves belonging to the property of the crown. A general scheme of emancipation has been adopted by the Brazilian government, under the provisions of which slavery in Brazil will disappear within the century by a gradual process, involving no violent convulsion, and perilling neither the safety of the slave, nor the welfare of his master.

H. C. W.

Dom Pedro II, Emperor of Brazil.

The Emperor of Brazil, Dom Pedro II, who has so recently visited our shores, and who is distinguished for the excellence of his personal

Selected.

character, his scientific and literary attainments, and his enlightened views as a ruler, is the son of Dom^{*} Pedro, the first Emperor of Brazil, before a colony of Portugal, was made a kingdom in union with that power in 1815, and was proclaimed independent in 1822. This event had been foreseen by King Dom John VI, of Portugal. King John, driven from his throne in Europe, in 1808, by the political events consequent on the invasion of Portugal by Napoleon I, took refuge in Brazil, where he remained till 1821. On his departure from Rio de Janeiro, the monarch conferred on his son Dom Pedro, Prince Royal, the office of regent of the kingdom of Brazil. Just as the vessel which was to bear him back to Portugal was about to sail, the old king pressed his son to his bosom for the last time, and exclaimed, "Pedro, Brazil will, I fear, ere long separate herself from Portugal, and if so, place the crown on thine own head, rather than to allow it to fall into the hands of any adventurer." The crisis soon afterwards occurred. The arbitrary measures of the Cortes of Portugal towards Brazil had the effect of hastening the declaration of independence. It was in the neighborhood of the city of San Paulo, and on the 7th of 9th month, 1822—the day from which Brazil dates her independence, that the Prince Regent read the "dispatches which drew from him the exclamation, "Independencia ou morte," and which became the watchword of the revolution. On the 12th of 10th month he was proclaimed, and on the 1st of 12th month crowned Emperor, as Dom Pedro I. Portugal acknowledged the independence of Brazil in 1825.

Until the middle of 1823, the first emperor possessed in Brazil a high and well-deserved popularity. He was the creator of the empire—he had delivered Brazil from anarchy, and had given her political liberty. But the jealousies between the Portuguese and the Brazilians, and the difficulties which ensued in the government, led to the forcible dissolution of the assembly by the emperor, and to the loss of his popularity. The administration of Dom Pedro I, lasted about ten years. The first emperor was energetic, a lover of representative institutions, but as a ruler imprudent and inconstant. With formidable difficulties to surmount, he committed grave faults; and in 1811 events occurred which led to his abdication in favor of his son, the present emperor, then a boy of five years of age.

Dom Pedro I, embarked for European board the English line-of-battle ship "Warspite," possessed, it is said, with the idea that his personal popularity would enable him to unite the crowns of Portugal and Spain, and rule over the whole peninsula, by means of a revolution that would compensate him for all he had lost in Brazil.

From on board the "Warspite" he addressed to his son these parting words of paternal advice: "Love your country; follow the counsel of those who have the care of your education; and rest assured that the world will admire you, and that I will be filled with gladness at having a son so worthy of the land of his birth." The guardian to whom Dom Pedro committed the care of his son, was José Bonifacio de Andrada, the Franklin

* The word "Dom" (Dominus) which always precedes the name of the emperor, is not used indiscriminately in Spain, but is a title applied by the Portuguese, and their descendants, only to monarchs, princes and bishops.

of Brazil, as he has been termed. This eminent Brazilian statesman and man of science conducted the early studies of the young emperor, and perhaps from him the royal prince imbibed those scientific tastes and that desire for knowledge which have throughout characterized him.*

From the time of the abdication of Dom Pedro, the government was conducted by regency, which lasted till 1840, when a revolution resulted in the proclamation of majority of the emperor, then in his fifteen year. During the whole of this period country was torn by factions, a prey to war, and ravaged by bands of marauders; it was not until the emperor assumed the reins of government, that peace and prosperity dawned upon Brazil. In the year preceding the proclamation of the majority of the emperor, steam navigation had been introduced along the whole Brazilian coast, so that news of the events at Rio de Janeiro was made known in every town of the Atlantic-board, and in a few weeks the most note parts of the empire were sending their viras for Dom Pedro II. The emperor was crowned on the 18th of 7th month, 1841. The titles acknowledged by the constitution as pertaining to him are, "Constitutional Emperor and Perpetual Defender of Brazil."

One of the reasons assigned by the General Legislative Assembly for investing the emperor at so early an age with his constitutional prerogatives, was that that body "recognized that happy intellectual development with which it has pleased Divine Providence to endow his Imperial Majesty." These were no words of adulation, but of sober truth. The mind of Dom Pedro was of mature age at the age of fifteen he was remarkable all in his tastes, application to study, and advancement in knowledge. He delighted the natural sciences, and he had besides shown a marked facility in acquiring foreign languages.

Dr. Reinhardt, who spent many years in Brazil as a naturalist, visited the capital of the empire when Dom Pedro II was young. Hearing that an American Savoy was about to enter upon a scientific exploration of the country, his majesty sent for him to receive his aid in performing certain chemical experiments, an account of which he had perused in the European journals of science. Dr. Reinhardt has said that young monarch, in his enthusiasm, paid attention to the time that flew by, as if tropical clime and in a close room, they were cooped up for hours over the fumigant chemicals.

It is well known at Rio de Janeiro that emperor is a good topographical engineer, and has a taste for art. The royal library about in the best histories, biographies, and encyclopedias. It has been remarked that a stranger can scarcely start a subject in regard to own country that would be entirely new to Dom Pedro II. With the literature of England, Germany and the United States, he

* José Bonifacio de Andrada, was the eldest of 10 brothers, all remarkable for their talents, learn public service, and sterling patriotism. He had the post of Prime Minister of Brazil at the time of Declaration of Independence, and in 1833, when promoted to the office of tutor to the emperor by a fact the venerable man retired from public life, to the little island of Paqueta, in the Bay of Rio, and died in 1838.

ry considerable acquaintance. When
 arline's appeal for assistance was forwarded
 the waters, it was the Emperor of Brazil
 rendered him greater material aid than
 other, by subscribing for 5,000 copies of
 orks, for which he remitted to the sen-
 LITTERATEUR one hundred thousand

Selected for "The Friend."

Pike on the Government of Families and
 the due Restraint of Children.

parents rightly discharge their duty
 their children, it might go a great
 together with their own good examples, in
 religious impressions upon them, as
 in influencing them to perform their
 towards their parents. But, through
 care of parents in both these respects,
 few thousand of children have been
 of which number I will not exclude many
 in the compass of our Society. Abraham
 his faithfulness, is called the friend of
 and God gives this character of him. "I
 him, that he will command his children
 his household after him, and they shall
 the way of the Lord, to do justice and
 ent." Gen. xviii. 19. And Israel was
 ally commanded, diligently to teach
 children, and to tell their sons, sitting
 rising up, in the house, and on the way,
 to keep the law of the Lord, and to fear
 all the days of their life. David instruct-
 his son to keep the law of God; and when
 in the other hand, though Eli reproved
 his, yet, because he did not restrain them
 judgments of God came upon him. A
 way to train up a child in the way he
 go; he, who truly loved his children,
 chasten them betimes; and to bring
 up in the fear, nurture, and admonition
 of the Lord, and to have them in subjection
 to his gravity. It most plainly appears how
 how absolute, and how indispensable a
 duty upon parents towards their children,
 in order to their instruction in the way and
 of the Lord, by commanding, instruct-
 ing, correcting, restraining, admonishing, and
 bringing them in subjection from their child-
 hood all in due measure, time, and place, at
 different occasions may require. But
 contrary hereto, I have observed two sorts
 of parents, who, by their own ill manage-
 ment, and by keeping their authority over,
 and charging their duties to their children,
 define obligation they are enjoined to do,
 have remained them with regard to all that is
 due. The first are such, who, though they
 have moral in their own lives and conver-
 sation, and are no bad examples to their
 children, yet, by their foolish indulgence, falsely
 deduce, have thereby been the very means of
 ruin. A child may be not unfitly com-
 pared to a young growing twig, easily bent
 fit, but as it increases in strength, be-
 comes pliable, and when it is a great tree,
 unshakable; and thus, most children when
 young, by the golly care of parents, be-
 come up very much as the parent pleases;
 and, to what purpose, were the above prop-
 erties given? But, as evil and folly are natu-
 rally band up in the heart of a child, so, that
 nature, not being kept down or restrained
 by an indulgent parent, gradually grows
 stronger and stronger, and in the end becomes
 standing, and rules. Thus, I have, with
 me, seen some foolishly indulgent parents,

who were so blind as not to see faults in their
 children, or if they did see them, through
 excessive indulgence, would not restrain them,
 which in the end has proved their ruin. No
 wonder then, if such parents should lose all
 authority over their children, as well as such
 children disregard their parents, for want of
 keeping them in due subjection, as soon as they
 attain to any degree of understanding, which
 they will soon do, to discern their parents'
 fondness. And, when too late, those very
 parents begin to feel the smart of their own
 folly; and yet, by reason of their blindness,
 can hardly even then see, that they have been
 the original cause of it, for want of keeping
 their children in due subjection; and some
 have erred out for advice, complaining their
 son is grown so disobedient, they know not
 what to do. And yet I have known when
 Friends have gone under a religious concern
 to such parents to give them advice, instead
 of taking it well, as they ought to do, they
 have been so blind and stupid as to return
 undue reflections; and others again, who have
 taken it better, would excuse themselves with
 the most plausible reasons they could invent,
 saying, the child is wild and playful, and they
 do not like to correct it as it has a weak con-
 stitution, &c. Now, in those cases, it is my
 judgment, that when such private admonition
 has been without effect, it becomes the indis-
 pensable duty of the church to interpose, by
 dealing with them more closely or openly;
 as the example of such parents and children, is
 a hurt to our youth, and a dishonor to our
 holy profession in general, and, as the wise
 man said, "Foolishness is bound in the heart
 of a child, but the rod of correction shall drive
 it far from him." Prov. xcii. 15. So, foolish
 fondness being bound up in the heart of those
 parents, the rod of church discipline should
 be used, in order, if possible, to drive it away.

But notwithstanding all the care of golly
 parents, it has happened that some will be
 disobedient; for we find that Samuel, a great
 and good man, had wicked sons, yet we do
 not read that he was blamed, no doubt be-
 cause he did his duty. The difference lies
 here,—that, if parents do truly discharge their
 duty, the children's blood will fall on their
 own heads; but on the contrary, if parents
 by their indulgence do contribute to it, the children's
 blood may lie at their doors.

As to the education and management of my
 own children, I shall not say much. I love
 those of them who deserve it, very dearly;
 and, when I have observed them sober and
 religiously inclined, I thought them as near
 and dear to me as my own life: on the other
 hand, when I have observed anything in them
 that tended to their hurt, such as wildness,
 rudeness, evil words, or actions, bad company,
 or an inclination to pride or height, or to this,
 or the other new fashion,—these things, I
 could not see in my children, without duly
 discountenancing, and advising, reproving, or
 correcting, as the nature of the offence re-
 quired. Neither does my conscience reproach
 me for conniving at, or countenancing any
 of these things in my children; and I can, in
 sincerity, say, that I have often desired, that
 as they grow in years they may grow in the
 fear and favor of God, more than to increase
 in all the riches of this world; and I bear my
 dear wife witness, that she has been of the
 same mind with me, in all these respects. As
 example very often prevails beyond precept,
 and children are generally apt to take their

parents for example, so the example of bad
 and wicked parents is apt to prevail upon
 their children, without an overruling Provi-
 dence interpose; and to this cause, I believe,
 is owing the great deluge of wickedness that
 has so much overspread the christian world.

Grape Culture in Los Angeles.—Good grape
 land here costs from \$10 to \$25 per acre.
 When the latter price is given, the land has
 facilities for irrigation. At present many
 think irrigation unnecessary in new vine-
 yards; but vines accustomed to it cannot
 safely dispense with it. In planting a vine-
 yard, the land is ploughed at least eighteen
 inches deep, and a hole is made with a crow-
 bar, into which the cutting is dropped. The
 mission grape is giving place to foreign varie-
 ties, cuttings of which have been purchased,
 at prices varying from \$5 to \$10 per thousand.
 They are planted in February and March,
 and, when irrigation is considered necessary,
 the water is turned on both before and after
 planting. The vines are about six feet apart,
 or at the rate of a thousand to the acre.

Plowing the first year costs about \$5 per
 acre; after that, a light surface plowing,
 to keep down the weeds, is all that is required,
 and costs about \$1.50 per acre. Water for
 irrigating costs about \$5 yearly. Pruning,
 per acre, costs about \$1 the first year, \$2 the
 second, and \$3 a year when the vines are in
 full bearing. This work is done chiefly by
 Indians or Mexicans. At the end of three
 years the yield may be estimated at five
 puns of grapes to the vine; at four years,
 eight pounds; and at five years, twelve pounds
 or upward. The whole cost of an acre of
 grapes, including price of land, cuttings, water
 and cultivation, up to the time they commence
 bearing, may be estimated not to exceed \$16.
 The yearly expense after this, without count-
 ing the cost of gathering and sending to mar-
 ket, would be only about \$10 p. r. a.

The manufacturers of wine in Los Angeles
 are willing to buy all the grapes they can get.
 The price ranges from 65 cents to \$1 per one
 hundred pounds. This would give the price
 of an acre of grapes as ranging from \$75 to
 \$120, and upward. When made into wine
 they would be worth \$300 or \$100. Taking
 the lowest price paid for the grapes, the profit
 per acre, after paying for cultivation, gather-
 ing and hauling to market, cannot be less than
 \$50. It is seldom that a piece of land pro-
 ducing nothing but grapes is sold, and, there-
 fore, we have but little in the way of actual
 sales from which to form an opinion relative to
 the price of an acre of vineyard in full
 bearing. But we can derive our conclusions
 from another source equally trustworthy. A
 hundred dollars will bring their owner, in the
 way of interest, from \$12 to \$15 annually.
 From this we may conclude that an acre of
 grapes that brings its owner a profit of \$50
 annually is worth \$300—a good return for the
 \$16 originally invested.—Overland Monthly.

Selected.

Should the hour of darkness be extended to
 the latest moment, should the final cup and
 baptism be the most bitter; should our dy-
 ing words under these awful feelings, be in
 that most loving language of the Son of God,
 "Eli, Eli, lama sabachthani!" I should have
 no more doubt of the righteous soul thus
 tried, a-cending from the cross and apparent
 dereliction to an immortal crown of righteous-
 ness, and mansion of eternal glory; no more

doubt of these, than if I saw them ascending in the fiery chariot of sensible, celestial, soul-rejoicing favor.—*John Thorp.*

For "The Friend."

Although approving in great measure of the article in the last number of "The Friend," entitled "The Two Ways," and with no desire to lessen its real value, does not the author carry the idea of the necessity of suffering a little too far, in quoting the passage from Jeremy Taylor which says: "He made for us a covenant of suffering, His very promises were sufferings, His rewards were sufferings, and His arguments to invite men to follow Him were only taken from sufferings in this life and the rewards of sufferings hereafter?"

That the path of the true disciple is now, always has been, and will continue to be a tribulated one, there is no question; but do we not also read that tribulation worketh patience, patience experience, and experience hope? Why then surround it so entirely with forebodings of continued and unmitigated sufferings; does it not require a care on this point, lest we should make it so forbidding in its aspect as to cause our young people to turn aside, and seek something more attractive, at least in appearance? True religion is not a gloomy thing—the writer well remembers, when a young man, having been called from scenes of gayety to the bedside of an aged grandparent, suffering from bodily disease but clear in intellect, who addressed him in language similar to that used by Addison to his son-in-law Altamont, "I have sent for thee that thou mayest see in what peace a Christian can die;" and that placid death-bed scene, has again and again risen up before the view of his mind, accompanied by such feelings of deep encouragement, as to furnish a true foundation for hope, when afterwards encompassed by many doubts and fears. The foundation does indeed stand sure, and we fully believe the great Maker of the Universe knoweth them that are His, and will not permit them to be tried beyond their power of endurance, but will, with each temptation, make a way for their escape.

Again, do we not read that Light is sown for the righteous, and gladness for the upright in heart. And the work of righteousness shall be peace; and the effect of righteousness quietness and assurance for ever. How many are there of those who, although treading the narrow path, can testify to the deep feeling of true peace, which from time to time, and from one season to another, is graciously permitted to rest upon their minds. The many interesting accounts recorded in the four vols. of Piety Promoted, are full of promise and encouragement.

"These things have I spoken unto you, that in me ye might have peace. In the world ye shall have tribulation; but be of good cheer: I have overcome the world."

T.

Soundings in the Baltic.—During the past summer, a German vessel has been employed in taking careful series of soundings in the Baltic, cruising in different directions, with a view to ascertain the depth, the currents, and other phenomena of that peculiar sea. The greatest depth, 720 feet, is between Gotland and Windau; from which it appears that the sea is not so deep, by 350 feet, as was believed from former soundings. Between 600 feet

and the bottom, the water was exceedingly cold, even in July; no vegetation was brought up by the dredge, and no living thing, except a few worms. Plants are most abundant in the first sixty feet below the surface, and animals are numerous down to three hundred feet. Below that depth, the cold probably checks the existence of fresh-water species, while the small quantity of salt in the water is fatal to the life of marine animals. Generally speaking it may be said that the western half of the Baltic contains abundant life and vegetation, while the eastern half is barren. We understand that a full account of this exploration, with the scientific results, the force, extent and direction of currents, the proportion of fresh, salt and brackish water, and lists of animals and plants, is to be published. Salt water is poured in an unrecurrent from the North sea, while the brackish water flows out as a surface current.—*Chambers' Journal.*

For "The Friend."

Two kinds of Ministry.

Our early Friends in the ministry, it is said, directed people to a principle *within themselves*, though not of themselves, by which all they asserted, preached, and exhorted others to, might be wrought in them, and known to them, through experience, to be true; while others say many things true in words, of God, Christ, and the Spirit; of holiness and heaven, that all men should repent, &c., and yet speak not of their own knowledge and experience, nor direct to a divine principle or agent, placed of God in man, to help him; nor how to know this, and wait to feel its power to work that good and acceptable will of God in them; even as some formerly of whom the Prophet testifies, saying: "Though they say the Lord liveth, surely they swear falsely;" because not, like Paul, from the evidence of their own experience, who says: "Now I know that my Redeemer liveth, and because he liveth I live also." Much of our modern preaching seems of the latter sort; a sentimental, sensational, superficial display of words, uttered seemingly more to please and excite than to correct and humble into self-nothingness; more in the finite wisdom of the preacher seeking to draw the attention of the people to himself, than in that which is from above, and points to Christ as the only true teacher and guide, our only hope of salvation; even as "the Minister of ministers," from whence all true ministry flows, as directly or immediately witnessed in the secret of the soul, or through his appointed instruments.

The Early Days of Chicago.—James Thompson writes to the editor of the Randolph (Ill.) Plaindealer a letter containing some interesting reminiscences of the early days of Chicago. He says: "I laid off the first lots ever laid out in Chicago, in the year 1828, I think. I laid off four hundred lots by order of the commissioners, Edmund Roberts, Kaskaskia, Dr. Jane, of Springfield, and another whose name I do not recollect; he was from Alexander county. There was only one hotel or boarding house in the place. There was an election held at the time we were there for captain of a militia company, and the election was warmly contested by two prominent men of the place, and I think all the legal voters attended the election and voted. When counted there were twenty-seven in all.

There was a small fort on the bank of the

lake, near the mouth of the Chicago river was guarded by about fifty men, who vented the Indians from doing mischief, also ran the line of the canal from the mouth of the Fox river—where Ottawa now stands to the fork of the Chicago river, a distance of ninety-five miles, but there was no peo- ple living near the line of the canal at that time. We also laid out the town of Ottawa, and, as now settled, above and below the Fox river and on the south side of the Illinois river there was not any person living where the town now stands when we surveyed it.

THE FRIEND.

TWELFTH MONTH 9, 1871.

A copy of the printed minutes of the Yearly Meeting having come to hand take the following extracts therefrom: At Ohio Yearly Meeting of Friends, at Mount Pleasant, by adjournments, the 25th of the 9th month to the 28th of same, inclusive, 1871.

Reports have been received from all Quarterly Meetings. The Representative thirty-nine in number, were all present.

The exercise that prevailed in this meeting last year on behalf of the Indian nation coming again before it, it was concluded to appoint the following Friends, to unite a committee of women's meeting, to have subject under care and to report when required.

The reports from the Quarters show aggregate of 936 children of a suitable age to school; 378 have attended Friends' schools exclusively; 422 have attended trich schools exclusively; 59 have attended Friends' and district schools; 1 at the deaf and dumb asylum; 66 have not been going to school the past year, most of whom I have been receiving instruction at home; schools have been taught the past year, varying from one and a half to ten months, one family school for two months. The heretofore is again referred to subordinate meetings, and the Quarters are desired to forward accounts to this meeting as heretofore.

The representatives are desired to go together and propose to next sitting Friends to serve the meeting as Clerk the year, and one to assist him; also two Friends to serve as messengers to the women's meeting.

Third day of the week and 25th of the month. The meeting gathered near the time to which was adjourned.

Elwood Dean, on behalf of the representatives, reported that they had conferred together and agreed to propose the name Edward Stratton for Clerk, and John Smith for assistant, which was united with and they appointed to the service. Also names of Aaron Frame and William Blum for messengers to the women's meeting which was united with, and they appointed to that service.

The committee continued from last year's visit Springfield Quarterly Meeting and Monthly Meetings comprising it, reports follows: The committee continued from year to year visit Springfield Quarterly and Monthly Meetings composing it, have given attention thereto, and after conferring with

Committee of Salem Quarterly Meeting, and a free interchange of sentiment there we would now propose to the Yearly Meeting that Springfield Quarterly Meeting be discontinued, and the Monthly Meetings being thereto attached to Salem Quarterly Meeting on behalf of the committee.

On deliberation thereon, way did not adopt the proposition contained in the report, and the subject is referred back to the committee for another year, and they are desired to render such care and assistance to the Quarterly Meeting and its branches as may think best, and report again to this year next year.

The state of Society was then considered regarding the Queries and the answers from the Quarterly Meetings, and proceeded in as to the fifth Query, inclusive.

Exercise having prevailed on the present day, in consequence of some of our members having joined with and participated in other organizations, and believing that all such associations have an injurious effect on engaged therein, and are altogether inconsistent with our religious profession, there the following Friends were appointed to be the subject into consideration, and to report to a future sitting what course of action they may deem best in the case.

On the 10th day, afternoon. The meeting assembled pursuant to adjournment.

On the consideration of the State of Society concluded by reading the remaining Queries and the answers from the Quarters.

When thus assembled to consider the queries concerns of the Church, our hearts were humbled under a feeling of our own weakness, and the many deficiencies brought to our notice by reading the answers to the Queries, have been cause of mourning, notwithstanding our unfaithfulness, and have the unslumbering Shepherd of Israel still watching over us for good, and in our sense of His continued mercy and unfeigned goodness, we feel drawn to address you, our absent brethren, desiring that we may be more earnestly engaged, and by your calling and election made sure, endeavoring more diligently to follow the path of our salvation in all His requirements; and we would be strengthened to put hand to hand, and shoulder to shoulder, to remove any deficiencies apparent amongst us. We are fully persuaded that a diligent attitude of all our meetings for worship and prayer is a duty incumbent upon us all, without which we cannot hope to grow in grace; and in the knowledge of the ever precious Truth; as says the Apostle to the Hebrews in his day, "Not forsaking the assembling of ourselves together, as the manner of some is; but exhorting one another: much the more, as ye see the day approaching." If we are concerned to assemble for the purpose of Divine worship, and to be earnestly engaged to know our own willings and doings to be brought into subjection to the Divine Will, we shall, no doubt, expect the gracious promise verified, "Where two or three are gathered together in my name, here am I in the midst of them." As the Holy Redeemer is present to reprove, strengthen and comfort us by his Holy Spirit, we shall not only be preserved from a wandering mind, but from a drowsy or luke-

warm disposition, and enabled to bow in deep prostration of soul before the Lord, the ever-living God, and to worship Him in spirit and in truth; and thus our spiritual strength will be renewed and we enabled to mount up with wings as eagles—no run, and not be weary; walk, and not faint. So walking, parents will be brought to feel the weighty responsibility resting on them, and the necessity of endeavoring to train up their precious offspring in "the nurture and admonition of the Lord;" not only by directing their youthful minds to the teachings of Truth in the secret of their own hearts, and encouraging them in the way of virtue, by suitable precept and consistent example, but also by proper restraint; doing all we may be enabled to do to bring them to Christ, that His blessing may rest on both parents and children. As was said of the patriarch Abraham, "I know him that he will command his children and his household after him, and they shall keep the way of the Lord, to do justice and judgment; that the Lord may bring unto Abraham that which he hath spoken of him;" that we may be preserved from the sin of Eli, who restrained not his sons, for which the judgments of the Lord were visited upon him and his household. And we desire that Friends may be encouraged to collect their families at least once in the day for the reading of a portion of the Holy Scriptures, having their minds turned towards Him from whom all our blessings come, both spiritual and temporal, fully believing that He who dictated them, by His Holy Spirit, often condescends to be with His humble, dependent children on such occasions, uniting their hearts together and renewing their faith and confidence in Him.

And dear children, "Obey your parents in the Lord, for this is right." May we all, both old and young, come more and more to sit under the teaching of the Holy Spirit, the Unction of the Holy One, to which the Apostle alludes, "But the anointing which ye have received of him abideth in you, and ye need not that any man teach you; but as the same anointing teacheth you of all things, and is truth, and is no lie, and even as it hath taught you, ye shall abide in him." As we are brought under this teaching, we shall have no desire to follow the lo lo heres or the lo lores. If favored to sit under the teaching of the Minister of the sanctuary and of the true tabernacle which the Lord hath pitched and not man, we shall feel that a man-made and a man paid ministry will not satisfy the longings of an immortal soul, but will more and more see the beauty and excellency of sitting under our own vine and under our own fig-tree, where none can make afraid.

The guarded and religious education of our youth continues to be a source of much solicitude; and we would earnestly desire Friends to withdraw their influence and support from district and mixed schools, the evident tendency of which is to lead a way the tender and susceptible minds of their children from the simplicity of the truth. And they are affectionately entreated to endeavor to establish family and select schools under the care of Monthly Meeting Committees, thus guarding them as much as may be from the hurtful influences of the world around them; that when the solemn inquiry shall be made, "What have you done with those precious lambs entrusted to your charge," they may be enabled to present themselves, together

with their dear children, before the Lord in our solemn assemblies, entreating Him to remember them and the children He has given them.

The following report from the Boarding School Committee was read and united with, the several propositions contained therein were adopted, and the committee encouraged to continue their care in making the institution answer the object of its establishment:

From the minutes of the Acting Committee it appears the amount charged for boarding and tuition for session ending 3d month 16th, 1871, for an average of about 79½

pupils,	\$1,779 61
Articles sold and income from other sources,	1,267 68
Stock and provisions on hand,	1,127 00

Making	\$7,174 29
Expenditures,	\$6,333 13
Balance in favor of school for the session,	841 16

Amount charged for board and tuition for session ending 9th month 6th, 1871, for an average of about 24 pupils,	\$1,201 17
Articles sold and income from other sources,	420 06
Stock and provisions on hand,	912 50
Produce of farm,	550 00

Making	\$3,083 73
Expenditures,	\$3,513 31
Showing a deficiency for the session,	429 58

And a balance in favor of school for the year,	411 58
Financial condition of school at the close of session 9th month 6th, 1871.	
Claims in favor of school,	\$403 07
Cash on hand,	109 96
Live stock and provisions on hand,	912 50
Produce of farm,	550 00

Making,	\$1,975 53
Deduct debts owing by the Institution, including an unexpended balance of interest on the Benevolent Fund,	786 20
Shows a balance in favor of school of,	\$1,189 33

Making,	\$1,975 53
Deduct debts owing by the Institution, including an unexpended balance of interest on the Benevolent Fund,	786 20
Shows a balance in favor of school of,	\$1,189 33

Considering the remote situation of our friends in Hickory Grove Quarterly Meeting, the expense necessarily incurred in getting their children to and from the school, we propose that in their case a deduction be made of fifteen dollars for the winter session and ten dollars for the summer session, from the established prices for board and tuition.

We propose that each session be shortened two weeks, the winter session commencing three weeks after the week of Yearly Meeting and continue 20 weeks. Then to have a vacation of three weeks, and the summer session to continue 20 weeks. We would also propose that the price of board and tuition be reduced to fifty-six dollars for the winter and forty-six dollars for the summer session. The subject of the scholars making social visits from the school coming under consideration, it is our conclusion that it would be to the advantage of the scholars and the good of the school in general to dispense with such visits during the school sessions.

Meetings for worship are regularly held twice a week at the school while it is in session, and for the information of such of our members as are unacquainted with the man-

ner in which the first-day of the week is spent, we will add that, in addition to the usual daily reading of the Holy Scriptures, the scholars are collected in the morning and evening, and portions of Friends' writings or other approved selections read to them. During the afternoon they are exercised in reading and reciting Scripture lessons, thus endeavoring to increase their interest in useful and instructive reading, hoping, should it fail to produce the desired impression at the time, it may be like "bread cast upon the waters," and exert a favorable influence in after years.

Fifth of the week and 28th of the month.

The meeting met near the time to which it was adjourned.

The minutes of the Meeting for Sufferings were read and its proceedings approved.

A testimony of Somerset Monthly Meeting concerning our late beloved friend Joseph Edgerton, produced by the Meeting for Sufferings, was read to our edification and was referred back to that body for its disposition.

Also one from Flushing Monthly Meeting concerning our beloved friend Abigail Branson, produced by same meeting, was read to our comfort and edification, and returned to the Meeting for Sufferings for printing and circulation.

The committee to whom was referred the consideration of the subject of secret organizations, produced the following report, which was satisfactory, and directed to the notice of subordinate meetings.

The committee on the subject of "Secret Organizations," having nearly all met, and taking the subject into consideration, were united in judgment that where our members enter into such organizations, including that called "Good Templars," such connections are subversive of the good order of our Society, and if continued in, must eventually lead such away from the principles of Friends. And as we believe all proper objects, either of benevolence or the cause of temperance, can be better sustained by our members in our own Society, we would most earnestly entreat all such as have become entangled with these alliances to return to the good order established by the Society of Friends. And we would encourage parents, overseers, and concerned Friends, to labor for the restoration of such, as they may be enabled to, in the true order of the gospel.

The meeting having brought its business to a close, under an humbling sense of our unworthiness of the favors bestowed by the Head of the Church, through the several sittings of this meeting, in granting us a little evidence of His protecting care being over us, the meeting concludes, to meet again at the usual time and place next year, if so permitted.

EDWARD STRATTON, Clerk.

NOTE.—The Ohio Yearly Meeting is held at Mount Pleasant, Ohio, commencing the first day in the 9th month. A public meeting is held at the tenth hour in the morning, and another at three o'clock in the afternoon. The meeting of Ministers and Elders the day preceding at the tenth hour.

SUMMARY OF EVENTS.

FOREIGN.—President Thiers, in his message to the National Assembly on the reopening of the session, refers to the treaty between France and Germany, the commercial convention with England, military law, and general reorganization of the administration, but offers no suggestions as to constitutional changes, and makes no allusion to political subjects. The Assembly met again at Versailles on the 4th inst.

The Germans have commenced fortifications in the passages of the Vosges.

General Rassel, the Communist commander, and two of his companions, were executed pursuant to sentence on the 28th ult., and on the 30th, Cremieux, one of the four communist leaders condemned to death by the communal court, was also shot outside the prison walls.

In Belgium there has been great dissatisfaction with the Ministry and some riotous popular demonstrations. On the first inst., it was announced in the Chambers that the king had demanded the portfolios of the ministers, and they had accordingly resigned. The Chamber of Deputies was also shot outside the prison walls. A new ministry was formed. The resignations had a tranquilizing effect, and Brussels became quiet.

The Austrian government has appointed Count Von Benst Minister to England, and Baron Von Laugenan Minister to Russia. Prince Meternich has asked permission to resign his post at the head of the Austrian Legation at Paris, which he has held since 1859.

The Pope protests against all ideas of compromise with the rulers of Italy, and expresses his confidence in the triumph of the church.

Much measles is felt in Spain in relation to the state of Cuba, where numerous military executions have recently taken place, among others eight medical students were shot in Havana.

There has been an increase of cholera in Constantinople within the last few days.

On the first inst., the cholera was raging with great violence at Havana Bay.

A Berlin dispatch of the 4th says: In consequence of the continued and frequent commission of murderous assaults on German soldiers in France, all provinces still occupied by the armed forces of Germany are declared in a state of siege. Perpetrators of such crimes will hereafter be tried by German court-martial, on the spot.

On the 4th inst. the Prince of Wales was still quite ill, but it was thought the symptoms show gradual amelioration of the disease, and it was hoped the crisis was over.

London.—Cansols, 92½. U. S. 5-20's of 1862, 92½; do. of '93, 1 ten-forties, 90½.

Liverpool.—Uplands cotton, 95½; Orleans, 95 a 10½. UNITED STATES.—The Public Debt statement of the Secretary of the Treasury shows that on the first inst., the total debt, less cash in the Treasury, was \$2,213,231,368, having been reduced \$3,402,080 since 11th mo. of 1871. The amount in the Treasury 996,256,555 in coin, and \$10,123,559 in currency.

The interests in Philadelphia last week numbered 508, including 233 deaths of small pox. The mean temperature of the Eleventh month, per Pennsylvania Hospital record, was 41 deg.; the highest during the month being 45, and the lowest 29 deg. The amount of rain 4.29 inches. The average of the mean temperature of the Eleventh month, for the past 82 years, is stated to have been 43.37 deg., the highest mean in that entire period occurred in 1849, 50.50 deg., and the lowest in 1842, 35.4 deg. The mean temperature of the three Fall months, 1871, has been 52.2 deg. The average of the Fall temperatures for the past 22 years has amounted to 47.8 deg. The rainfall of the past eleven months has amounted to 43.02 inches.

Miscellaneous.—The Chicago relief aid society had, on the 24th ult., received \$2,908,000 in cash, for the benefit of sufferers by the famine. The contributions came from forty foreign territories.

The Legislatures of Colorado and Wyoming have repealed the laws of those territories granting the right of suffrage to women.

The State debt of South Carolina, according to Governor Scott's message, is \$11,994,900. The second session of the forty-second Congress convened at Washington on the 4th inst., quorum present in both Houses. In the House of Representatives 310 members took their seats.

The President's message, sent into Congress on the opening of the session, treats a variety of subjects in a concise and lucid manner. His civil service policy is spoken of as succeeding, and liberal appropriations are recommended. The propriety of a general amnesty for the rebels disfranchised under the fourteenth amendment is suggested to Congress, as the exclusion does not now seem necessary or useful. The President speaks in favorable terms of Italy, and expresses the hope that the commission now under appointment will report a practicable plan. He notices the large and continued reduction of the national debt, and advises the abolition of all internal taxes except stamps and taxes on liquors and tobacco. In relation to the various reports and suggestions that revenue collections be made of the amount of surplus revenue col-

lected under the present laws, after providing for current expenses of the government, the interest, and a sinking fund, and that this surplus be divided in such a manner as to afford the greatest aid to the greatest number. The fluctuations in the relative values of gold and currency, are spoken of as attended with serious evils, which can only be remedied by return to specie payments, and this object should steadily kept in view. The initiatory steps to emancipation in Brazil, are noticed with satisfaction. The President in view of the fact that persons claim to be citizens of the United States, are large owners of slaves in foreign lands, recommends stringent legislation against such a practice. He renews the request an appropriation to determine the true position of forty-ninth parallel of latitude, between the Lakes Woods and the Rocky Mountains. He expresses dissatisfaction at the settlement of the troubles with England by a treaty, and recommends the necessary legislation with reference to the several commissions provide under it. He also recommends legislation to carry effect the provisions of the treaty relative to the British American provinces, before the commencement of fishing season.

The national debt has been reduced to the extent \$36,077,126 during the past year, and by the negotiation of the national bonds at a lower rate of interest, the interest on the public debt has been so far diminished that now the sum to be raised for the interest is only \$3,107,000,000 less than on the first of March, 1869. The total decrease in the public debt during 34 mo. 1st, 1869, to 12th mo. 1st, 1871, was \$211,892.

The revenue from customs for the last fiscal year was largely in excess of the estimates, amounting to \$206,270,408. The receipts from internal revenue \$143,998,453, being four millions less than the estimate.

The Postmaster General states the ordinary revenue of the Department for the year ending 6th mo. last at \$2,037,043, and the gross expenditures 390,104.

The Markets, &c.—The following were the quotations on the 4th inst. New York.—American gold, 150.00; do. 1851, 117½; ditto, 10.40, 5 per cent. Superfine flour, \$5.80 a \$6.20; finer brands, \$6.10, \$6.00. No. 1 Chicago spring wheat, 1.55; No. 1, \$1.51; red western, \$1.57 a \$1.60; amber, 1.61 a 1.62 white Michigan, \$1.67 a 1.69. Oats, 56 a 57 Western mixed corn, 78 a 79 cts.; yellow, 80 cts. No. 1, 80 cts. No. 2, 75 cts. for a bushel. Corn, 60 a 61 and 58 and New Orleans. Superfine flour, 5.75; brands, \$3 a \$3.82. Red wheat, \$1.53 a 1.61 a \$1.63. Rye, 95 a 95 cts. Old yellow corn, 78 a 80 cts, 54 a 55 cts. The cattle market was active prices rather higher. Sales of 1500 head of beef at 7 a 7½ cts. for extra; 7½ cts. for a superior; 4½ cts. for fair to good, and 4 a 4½ cts. per lb. gross for mutton. Sheep sold at 5 a 6 cts. per lb. gross, and at 6 a 6½ cts. per lb. for corn fed.

NOTICE.

The committee appointed by our last Yearly Meeting on the report of Benjamin Hovey, John Shreve, and R. W. May, Monthly Meeting will on the 13th inst., at 4 o'clock, P. M., in the large middle-room on Arch street, Philadelphia, 12th mo. 6th, 1871.

FRIENDS' ASYLUM FOR THE INSAN Near Frankford, (Twenty-third Ward,) Philadelphia. Physician and Superintendent.—JUSTUS H. WINGTON, M. D.

Applications for the Admission of Patients are made to the Superintendent, or to any of the Board Managers.

FRIENDS, on Fifth-day, the 16th of 11th mo. at Friends' Meeting-house, Philadelphia, ROSE LOVELL, of Falls Township, to SARAH, a daughter, Michael Satterthwaite, of Middletown, all of county Pa.

DIED, on the 7th of the Tenth month, aged 44 LETITIA M., wife of William Thorp, and daughter of Benjamin and Mary B. Sheppard, a member of Ford Monthly Meeting.

On the 10th of Tenth month, 1871, at his residence, near Marlton, New Jersey, SAMUEL B. B. in the thirty-second year of his age, a member of Evesham Monthly Meeting.

WILLIAM H. PILE, PRINTER, No. 422 Walnut Street.

Dom Pedro II, Emperor of Brazil.

(Continued from page 125.)

As stated in Fletcher and Kidder's "Brand and the Brazilians," that the emperor's favorite modern poet is Longfellow. In recognition of his admiration for Longfellow, we have the following anecdote related by F. J. Longfellow's exhibition of American books, in May 1867, at the National Museum at Rio, presided over by that gentleman, "the emperor," he "opened the 'Homes of the American Poets,' and surprised me by the extent of his knowledge of our literature." He made remarks on Irving, Cooper, and Prescott, showing an intimate acquaintance with each. His allusion on the name of Longfellow, he made me with great haste and eagerness, reciting several of his poems de Monsieur Longfellow. It was the first time that I ever saw Dom Pedro II, manifest an enthusiasm which, in earnestness and simplicity, resembled the warmth of childhood when about to possess himself of some long cherished object. I said, 'I believe not, your Majesty.' 'Oh, no, no, I am exceedingly sorry, for I have not in every book-store of Rio de Janeiro Longfellow, and cannot find him. I have only a few of beautiful *morceaux*, but I wish the whole work; I admire him so very much.' On a subsequent occasion, for the purpose of presenting his majesty with a superb edition of Webster's Unabridged Quarto Dictionary, Hawthorne's Mosses from an Old Manse, and Longfellow's "Hyperion." Mr. Fletcher repaired to the palace of San Christovao. It happened to be a court-day, when noblemen, judges, ministers, and ambassadors were in attendance. "Presently," says our author, "Dom Pedro II appeared, his fine manly countenance glowing above every other. He was dressed in black, and with the exception of a richly jeweled sword on his left breast, his costume was simple, and contrasted with the brilliant uniforms of the court. Merely bowing to the titled gentlemen and representatives, he came directly to the 'Webster,' Hawthorne's, and 'Longfellow.' With a demure smile he addressed me, and led me to a open area, where he examined the books. I spoke of Hawthorne as an author of whom I had heard, and was glad to possess the Mosses from an Old Manse.' I called his at-

tention particularly to the 'Celestial Railroad,' which caused an allusion to Bunyan's "Guide and Road-Book to the Celestial City." Since the month of May he had procured all the poetical works of Longfellow; but had not yet added to his library any of his prose compositions. He there considered "Hyperion" a most interesting acquisition. 'Mr. Fletcher, when you return to your country,' said the emperor in conclusion, 'say to Mr. Longfellow how much pleasure he has given me, and be pleased to tell him how much I esteem and love him.'"

Since 1855, the same writer has visited Brazil four different times, and has had several long and intimate conversations with Dom Pedro II. He speaks of that monarch's continued interest in works that treat of Morals, Literature and Art. With the writings of Longfellow, and the Quaker poet Whittier, he is especially intimate, and on more than one occasion has made felicitous translations from their poems, of which he has sent autograph copies to the authors. In 1850, Dom Pedro II was made an honorary member of the New York Historical Society. This circumstance furnished occasion for a remark of Dr. Osgood, which may here be repeated, as not less forcible than true: "Dom Pedro II, by his character, by his tastes, application, and acquisitions in literature and science, ascends from his mere fortuitous position as emperor, and takes place in the world as a MAN." Seldom a session of the Geographical and Historical Institute of Brazil is held which is not honored by the presence of the emperor, and sometimes he takes part in the discussions of that learned body.

We may here give an extract from a composition of Dom Pedro II, written in 1852, and rendered into English from the Portuguese original, by an American writer. If the poetic expression of the translation is not felicitous, the noble sentiments of the royal author carry with them their own commendation:—

"If I am pious, clement, just,

"I'm only what I ought to be;

The sceptre is a weighty trust,

A great responsibility;

And he who rules with a faithful hand,

With depth of thought and breadth of range,

The sacred laws should understand,

But must not act by his pleasure-chance.

The chair of justice is the throne;

Who takes it bows to higher laws;

The public good and not his own,

Demands his care in every cause.

Neglect of duty—always wrong—

Detestable in young or old,

By him whose place is high and strong,

'Is magnified a thousand fold."

In the year 1865, Professor Agassiz made a scientific expedition to Brazil. One of the reasons he assigns for undertaking it is the fact that the Emperor of Brazil was deeply interested in all scientific undertakings, and had expressed a warm sympathy with his

efforts to establish a great zoological museum in the United States, and had even aided him by sending collections, made expressly under his order for that purpose. On arriving at Rio, Agassiz visited the emperor at the winter palace of San Christovao, which stands in bold relief against lofty green mountains. On the following day occurred a total eclipse of the sun. This was observed by the sovereign and the philosopher together, from the imperial observatory; but the clouds were poor countenances, and unfortunately obscured the phenomenon at the moment of greatest interest. The emperor showed a cordial interest in all the objects of Agassiz's expedition, and afforded him every possible facility in carrying out his plans. He visited the "Colorado," the steamer which had brought the Americans to Rio. From the pen of Agassiz (wife) who saw him on board, we give a description of Dom Pedro: "The emperor is still a young man, but though only forty, he looks careworn, and somewhat older than his years. He has a dignified, manly presence, a face rather stern in repose, but animated and genial in conversation; his manner is courteous and friendly to all."

At a large pecuniary sacrifice, Dom Pedro II, liberated all the slaves belonging to the property of the crown, and a general scheme of emancipation has been projected, the wisdom, foresight, and benevolence of which can hardly be too highly praised. Should nothing hinder its being carried out, slavery in Brazil will disappear within the century by a gradual progress, involving no violent convulsion, and perilling neither the safety of the slave nor the welfare of the master. The emperor openly declares his abhorrence of the system, but he is so circumstanced that in Brazil great social changes must be gradual. In a recent debate, which lasted three days in the Chamber of Deputies, the opposition to emancipatory legislation was defeated by 63 to 35. The vote showed that the oppositionists belonged mainly to the provinces of Rio de Janeiro and Minas Geraes.

The Roman Catholic religion is established in Brazil, yet Dom Pedro II has shown himself a friend of toleration. He has aided in the construction of Protestant chapels for colonists. The government has promptly suppressed riots attempted against the Brazilian Protestants; and other facts might be cited to show the favorable position of religious toleration in Brazil.

Much has, however, to be done in the way of public education. The emperor is keenly alive to any thing that can stimulate the love of knowledge among his people. When Agassiz was at Rio he was invited by him to give a course of lectures on scientific subjects. The emperor with his family attended all these lectures; and it is worthy of note, as showing the simplicity of his character, that instead of occupying the raised platform intended for them, he caused the chairs to be placed on a

level with the others, as if to show that in science there is no distinction of rank.

The pretty town of Petropolis, situate about three thousand feet above the level of the sea, is the summer paradise of all Rio Janeiroans whose circumstances enable them to leave the heat and dirt of the city, for the pure air and enchanting views of the Sierra. In central position stands the summer palace of the emperor, a more cheerful-looking edifice than the palace at San Christovão. Here he passes six months in the year.

When recently in London, Dom Pedro II devoted himself to systematic inspection of all interesting objects in the great metropolis. Beginning each day early, he made the most of his time, visiting Kew, Harrow, and other distant places before "London" was awake. Like a true man of science, as he is, one of his first visits was made to Sir Rodrick Murchison, then confined by illness to his own house. He attended a meeting of the Royal Geographical Society, of which he had been elected an honorary member in 1864, and in his address referred to the interest he took in the objects cultivated by the society, and said that he watched attentively the proceedings of all the learned societies. He spoke also of his ardent admiration for English literature. Sir Henry Rawlinson, president, acknowledged the indebtedness of the Royal Geographical Society to the Emperor of Brazil, for the assistance and appreciation he had accorded to it, and for the way he had used his high position to advance the interests of geographical science. Many splendid works owed their origin to the liberal encouragement of the Brazilian Government. His majesty, said Sir Henry, had shown himself actuated by the same spirit of geographical adventure, combined with the sagacious foresight which had distinguished his ancestor, Prince Henry, the great navigator.

Dom Pedro II, married in 1843, Theresa Christina, sister of the king of the two Sicilies; in his person he unites the blood of the Braganzas, the Bourbons, and the Hapsburgs. His father, Dom Pedro I, was an energetic Braganza; his mother, Donna Leopoldina, a Hapsburg, and sister-in-law to Napoleon I. By marriage he is related to several of the royal and imperial families of Europe. His eldest sister, the late Queen of Portugal, was married to Prince Ferdinand of Saxe-Coburg Gotha. His other two sisters are respectively married to the Prince de Joinville and the Comte d'Aquila.

In 1844, Brazil rejoiced in the birth of an imperial prince, Dom Alfonso, but his death in the following year brought mourning to the nation. In 1846, the Princess Imperial, Donna Isabella, the present heir-presumptive to the throne was born, and in the year 1847 her sister, Donna Leopoldina, who died recently. Isabella married Louis d'Orleans, Comte d'Eu, eldest son of the Duc de Nemours; and Leopoldina, Prince Auguste of Saxe-Coburg Gotha, whose mother was Clementine d'Orleans, so that both princesses married grandsons of Louis Philippe. The Comte d'Eu, it will be remembered, commanded the Brazilian forces in the late war against Lopez, and exhibited considerable military ability. It is well known that the education of the imperial princesses was not only superintended, but in a great measure personally conducted by the emperor himself. During the absence of the emperor and empress on their

European tour, the Princess Imperial was invested with the office of regent.

The empire of Brazil, in respect of the grandeur of its physical features and resources, is the most magnificent in the world. Since the accession of Dom Pedro II to the throne, its commerce has doubled every three years, and has been so extended with other nations, and particularly with Europe, that Brazil has attained by far the first place among those South American States, which were founded by the Peninsular races. As a field for emigration it has attracted large numbers of Germans. The throne of Brazil, surrounded as it is by institutions of a somewhat democratic character, has been securely maintained by the prudence and good government of the present sovereign, and by the moderation of his subjects, on whom the lesson of years of disorder has not been lost. — *Leisure Hour.*

Errors in Religion.

For "The Friend."

It has been said that most errors in religion arise from an attempt to separate what Christ did for us in His flesh, and what He performs in us by His Spirit. In the mean time this unequal upholding of Truth, or defective Christianity, has its leavening, stumbling, if not deadening effect, not only, in the first place, upon those who advocate and teach it, but secondly no less perhaps on those taught, who cannot clearly distinguish between the pure and the impure; between that which is whole and that which is but in part; between that which serveth God, and that which serveth him not. Which tending more closely to veil the understanding, causes that veil to be upon everything connected with spiritual life and progress.

That the unrenewed, ease-loving heart should try to build up a system of belief from embracing only what Christ did for us in the flesh, is not to be wondered at, seeing that there is so little of the daily cross and self-denial, of mortification and repentance, with that evidence of a real work of grace—a truly contrite spirit—called for or recognised in it. So that, as appears, exponents of this superficial profession of religion, have lately and repeatedly set forth in a mixture of truth and error, that "God, in his grace, has provided righteousness for us in Christ." That, "This righteousness is perfect, spotless, and it is 'on all who believe.'" That "It is well, in a way when so many theories are afloat, to understand the great doctrine of substitution." That "Christ as our substitute, gave his life a sacrifice for our sins." And,

"Payment God will not twice demand;
First at his bleeding Saviour's hand,
And then again at mine."

The latter on the other hand, embracing what Christ performs in us by His Spirit, and including the former, full many shrink from and reject because it demands the sacrifice of the will and affections—the all we have and are—to Him who died for us and rose again. Thus to the young man whom He loved, Jesus said, "Sell whatsoever thou hast;" "and come, take up the cross, and follow me." Again, the kingdom of heaven is compared to

treasure hid in a field; and to a merchant seeking goodly pearls; for which, all else first to be parted with. This latter, more is represented as an inward, diligent sowing of the house of the heart for the loss of silver; as submission to Christ Jesus Mediator of the new covenant of light life; as an inward warfare "with burning fuel of fire;" an operation like to "a refire, and like fuller's soap;" a baptism thorough in its working, even "with the Holy Ghost and with fire." Involving also a surrender of ourselves, and obedience to that which is quick and powerful, and sharper than two edged sword, piercing even to the dividing asunder of soul and spirit, and of the joint and marrow, and is a discerner of the thoughts and intents of the heart." This likewise for repentance which precedes either a remission of sins, or transformation from a sterner nature to a state of grace. A repentance which the Most High, through His Prophet thus describes: "Then shall ye remove your own evil ways, and your doings were not good, and shall loathe yourself your own sight for your iniquities and abominations." A repentance unto salvation which godly sorrow alone worketh. Repentance in which we are humbled by God, in true contrition for sin which hitherto separated us from Him. A repentance which His goodness leadeth unto without which all must perish.

This plunge into the depths of the judgment; this godly sorrow for sin, true-hearted repentance and amended life; this taking up the cross of Christ, not only crucifies to the world, but yokes the rebellious uprisings of the unrenowned heart, is what our carnal will and wisdom wholly at enmity with God, will ever so to withstand; and, however vainly, seek substitution for. And hence the many objections—the by-ways and high-ways—there are and the lo-ther's—that abound avoid the humiliating sacrifice of the will that daily, prayerful dependence, which it requires all those who come unto God "believe that He is," at the same time for much more than this, even to yield selves passively and wholly to Christ Jesus Lord of all, unto the experience, through eternal power, of being buried with Him baptism into death; that like as Christ raised up from the dead by the glory of His Father, even so we also should walk in newness of life. "For," continues the Apostle "If we have been planted together in the likeness of His death, we shall be also in the likeness of His resurrection: knowing this our old man is crucified with him," &c. The way to receive Christ Jesus, and to saveingly to Him; to avoid fatal errors of opinion, by placing the government of ours upon His shoulders; to be rooted and up in Him, and established in the faith which Jesus is the Author and Finisher through which those of old subdued doms, wrought righteousness, stopped mouths of lions, and out of weakness made strong, &c.: a faith that overcome world, and the end of which is the salvation of the soul.

Seeing that man's true happiness or eternal consists in the saving knowledge of God; seeing also that our ease-loving heart, seconded by the subtlety of an unweary are in constant danger, unless the "wate

* See "Conference of Friends at Willow Park, Dublin," held on the 22d and 23d of 8th month, 1871. Quoted from because at hand; but which corresponds with similar testimonies from similar gatherings as well as divers other sources in this land.

dily kept, of taking up with that which
 present peace, though it be but a false
 and rest; and seeing, moreover that
 once settled in worldly ease, the first
 power, caused by conviction for sin through
 of the Holy Spirit, having subsided,
 hard it is to break up this false repose
 confidence, and to seek afresh the new
 living way; how careful should we be
 the first not to mistake error for truth,
 ination for revelation, or the shadow for
 substance. But rather through submis-
 of soul and body to the Lord Jesus, know
 after that He hath humbled under a
 of sinfulness and vileness, to raise up
 us, to open the eyes, to turn from darkness
 light, and into the power of Satan unto
 light; that we may, in our measure, with the
 Apo-tle, receive forgiveness of sins, and
 brance among them which are sanctified.
 the life that was in the Eternal Word, and
 is the light of men, is sufficient for all
 needs, if we will but believe in and obey
 It will take of the things of Christ, and
 them unto the obedient soul. "While
 we the light, believe in the light, that ye
 be the children of light." Again, "This
 condemnation, that light is come into the
 world, and men loved darkness rather than
 light, because their deeds were evil. For
 every one that doeth evil, hateth the light,
 for he cometh to the light, lest his deeds
 should be reproved. But he that doeth truth
 cometh to the light, that his deeds may be
 made manifest that they are wrought in
 light."

mistakes in religion, in the case of those in
 whose desires have been begotten after Christ-
 ness, perhaps very often arise from not
 making a thorough surrender to Him who
 is all power in heaven and in earth; who,
 giving up our weak estate, is sufficient for
 our own work; and who must be the Alpha
 and Omega of all in redemption, which, from
 beginning to end, is only through the mercy
 and forgiveness of God. Were there a more
 ready yielding of ourselves to the thoroughly
 reforming power of Heavenly grace; were
 we, like Mary of old, brought to sit at the
 feet of Jesus, in self-abasement and humility
 at the words from His mouth; did we
 draw from all power but power Divine to give
 life, and preserve the soul in the way it
 should go, it would do much to draw down
 the eternal, sustaining grace, sufficient for all
 needs, and give us the joys of God's salva-
 tion.

When I am weak (in myself), then am
 strong (in the Lord,) saith the Apostle: who
 knew where alone to look for refreshing
 powers, the living supplies of celestial dew.
 Errors in religion mostly have their begin-
 ning in very little things. Thus a deviating
 step, though scarcely noticeable at first, being
 unheeded, will at length reach a divergence,
 and the duller observer could not fail to
 detect it. Many, it is believed, have thus almost
 without suspicion, entered wrong ways, who
 they had seen the end from the beginning,
 and distinguished the fatal termination from
 the beguiling smoothness of the entrance,
 and had been very far from taking the
 step in a path which leads from, rather
 than into the footsteps of the flock of Christ's
 disciples, and beside the shepherd's tents.
 "Many it is to be feared, though aiming
 at a revival in religion, have in this way
 turned aside, little by little, from the christian
 path of their fathers, and, not retracing their

steps, have ultimately made shipwreck of faith
 and a good conscience. The doctrines and
 testimonies of our Society, for instructing us
 in which we have great cause to be thankful
 to our Father in heaven, must be preserved
 entire, if preserved at all. How lamentable
 is the fact that of those who have turned
 aside from a faithful support of them, even in
 their so accounted smaller requisitions, how
 few but have found one deviation to be but a
 stepping stone to another, one giving way to
 reasoning, but the opening door to the enemy
 with his multiplied grosser presentations, till
 more and more weakened and blinded by the
 mists and darkness of error, they have ultim-
 ately become like the salt that has lost its
 savor. If we are not faithful in *that which is
 least*, says the Saviour, we are not likewise in
 much; while he that is unjust in *the least* is
 unjust also in much. Let us, then, avoid the
 smaller deviations (as some term them) from
 the right way of Truth which the Lord
 opened to our forefathers, and in which we
 have measurably been kept hitherto, and the
 larger ones will not have to be mourned over
 and repented of.

Did we but faithfully acknowledge the Lord
 in all our ways, and, with the Psalmist, set
 Him always before us; did we duly heed the
 awful admonition conveyed in the life of king
 Saul, and not keep back part of the price of
 obedience, in reserving "the best of the sheep
 and the oxen,"—"the least offensive sins, but
 most cherished and loved by us,—but yield
 all a willing sacrifice to the Lord; could we
 but be induced to cast out, with the profligate
 aid from on high, all the old inhabitants of
 the land—the native loves and lusts of the
 fallen corrupt heart—so that they should not,
 as "snares and traps," as "scourges" and
 "thorns," hinder nor vex us, beguiling in
 our weakness and blindness; did we turn a deaf
 ear to the cruel charmer, however wisely and
 persistently he charm, and through humble
 dependence upon Saving Help, say when pre-
 senting any of his designs upon us, "Get thee
 behind me, Satan," how would the Lord Al-
 mighty arise as a morning without clouds, and
 more manifestly bare His arm of deliverance,
 clothing the soul with the peace and the
 righteousness of Christ. He, as an ever-
 present Helper, would make a way where
 there seemed to be none; would say to the
 threatening billows, thus far and no farther
 shall ye come. In the light and fellowship of
 His Holy Spirit, we should be permitted to
 see light; as participants in the sufferings of
 a lowly-minded Lord and Saviour, we should
 not be allowed materially to contravene His
 will concerning us; and thus the living, soul-
 rejoicing experience would more and more be
 ours: "Lo, I am with you always, even unto
 the end of the world." "This God is our
 God forever and ever; he will be our guide
 even unto death."

The Pores.—It is a curious fact illustrating
 the necessity of cleanliness, and of keeping
 the pores of the skin open, that if a coat of
 varnish or other substance impervious to
 moisture be applied to the exterior of the
 body, death would ensue in about six hours.
 The experiment was once tried on a child in
 Florence. On the occasion of Pope Leo the
 Tenth's accession to the papal chair, it was
 desired to have a living picture to represent
 the golden age, and so a child was gilded all
 over with varnish and gold leaf. The child

died in a few hours. If the fur of a rabbit or
 the skin of a pig be covered with a solution
 of India rubber the animal ceases to breathe
 in a couple of hours.

Monkeys in India.

I always found that those places in the East
 which pleased me most, were such as had no
 pretensions to imitate my native land, and
 that away in the jungle, or amongst the least
 frequented parts of the cantonments, where
 nothing which struck the eye provoked an
 unfavorable comparison, but all was thorough-
 ly in keeping with the customs of the country
 to which it belonged, I was able to enjoy and
 interest myself as I ever failed to do in the
 more civilized quarters. There was just such
 a drive in Bangalore—one which led by a
 large tank through the "monkey-top" and
 "pettah" to the fort which we took, in 1799,
 and which is now garrisoned by European and
 native troops.

A "monkey-top" means a monkey grove:
 the "pettah," the native town; but it is to the
 former I wish to allude.

The English children in Bangalore used
 constantly to petition to be driven out to the
 "top," to feed the monkeys with bread; and
 it was certainly a most curious sight to drive
 quietly along this road of an evening.

As soon as the last English house has been
 left behind, the jungle-bushes rose up gradu-
 ally on each side of the hedge which skirted
 the thoroughfare, until it was thick grove
 everywhere, and the larger trees met over-
 head and interlacing their branches, formed a
 leafy avenue for some distance.

When I drove out for the purpose of feed-
 ing the monkeys and watching their gambols,
 this was the spot where the carriage was
 brought to a standstill. I would look all
 round me and neither see nor hear signs of
 any living thing, except perhaps the whirr of
 beetles and grass-hoppers, enjoying themselves
 in the hedges. Then I would direct the horse-
 keeper who accompanied me (and which long-
 enduring individual had run on foot behind the
 vehicle the whole way from the cantonment)
 to call the monkeys in his native tongue. Ad-
 vancing to the front, and looking very much
 (in his blue-and-white turban, blue coat and
 short white breeches) like a big monkey just
 hopped off an organ himself, he would call to
 the brutes in the Tamil tongue, "Bah! bah!"
 (Come! come!) and after a few seconds the
 effect would be magical.

Peering through the leafy branches would
 be seen one grinning face after another, and I
 then, reassured by the voice and appearance
 of their own countryman, the monkeys would
 drop silently from bough to bough, until a
 whole colony of them stood in the main road,
 surrounding the carriage and waiting eagerly
 to see what I had brought for them.

Thus viewed, they formed a wonderful sub-
 ject for speculative thought. I have seen the
 place covered with them, from the old grey-
 beard, which had seen, perhaps, a dozen or
 more summers, to the baby-monkey, which
 had just left its mother's arms.

Regarding them as a whole, as a colony or
 nation, they were just like human creatures.
 There were the mothers, holding their young
 in their arms; and, with the exception that
 they will occasionally fly after their enemies
 right over a hedge, or up a tree, regardless of
 the terrified looks of the little pink-faced crea-
 tures that cling round their waists all the

time, they behave much as other mothers do. Then, there were the old gentlemen of the party—the "Father Abrahams," as we used irreverently to term them, who cultivated white bristles and showed all their teeth, and growled when they felt themselves insulted. I used to carry bread and fruit for these brutes, and when I threw a piece amongst the crowd, if a young monkey got it he was sure to be pursued by a "Father Abraham" and bitten, until, with a horrid squeak he relinquished his prize. This coarse injustice used vastly to excite my indignation, and my greatest triumph was, when having by dint of much coaxing and many a tempting bait, induced a "Father Abraham" to approach within reach of my driving-whip, I was enabled to give him the lash as he deserved. With one bound he would fly beyond reach and remain there, shaking and growling with rage, as he showed all his teeth and longed for the revenge he dared not attempt.

There was one monkey in the Bangalore top which used quite to frighten me by her audacity in trying to snatch the bread out of my hands. One day she took off the whole loaf as I was about to break it, and, I have no doubt had a fine feast, as she was quite able to hold her own. She was a mother, which perhaps accounts for her boldness; but more than once she laid hold of a piece of my dress, and swung herself into the carriage, almost on to my lap, and she was such a formidable-looking creature that I was afraid to refuse her anything. She had had her upper lip bitten off, I suppose in fight, which had left all her teeth exposed, and gave her a most savage appearance.

In the "pettah," monkeys were almost as numerous as in the "tope," and made themselves twice as unpleasant. The lower class of Hindoos worship this animal as the representative of their god Hanimann, and therefore they dared not interfere with them. They ran all over the roofs of the houses and shops just as they pleased, gibbering, and chattering at the passers-by; and the native women, who kept fruit-stalls in the bazaar, were obliged to sit over them with a stick to ward off the thieving brutes.—*Church's Sketches of Anglo-Indian Life.*

The stronghold of Christianity is in the hearts of those who have felt its power. We do not undervalue the evidences which have been wrought out of the miracles, prophecies, history, striking coincidences, moral character of the sacred writers and social results effected,—all of which attest the truth of the Gospel; still, the great argument is what the Gospel actually does in the heart of the individual believer. Paul, transformed from a persecutor into a preacher, was in himself a more conclusive demonstration of what Christ's grace could do than was any epistle he ever wrote. And it is because the experience of the Christian, led on by the Holy Spirit, explains and confirms the teaching of Scripture, that the latter has its convicting and comforting power. The Psalms "find" us, because the experiences they describe, and out of which they sprang, have been reproduced in us. The terror and anxious question of the Philippian jailer seem natural, when we have passed through like convictions and been calmed into peace by the same answer,—*"Believe on the Lord Jesus Christ, and thou shalt*

be saved." When there is an inward assurance of pardon, renewal, and well-founded hope—Christ within us, the hope of glory,—then the doctrines of the Gospel become clear in their own light, and the evidences for its divinity are satisfying beyond possibility of doubt. Said the illiterate candidate, when questioned as to his creed: "How do I know that Jesus Christ is divine? Why, by this, He has saved my soul." And the answer was sufficient.

CHICAGO.

BY JOHN G. WHITTIER.

Men said at vesper, "All is well!"
In one wild night the city fell—
Fell shrines of prayer and marts of gain
Before the fiery hurricane.

On three-score spires had sunset shone,
Where ghastly sunrise looked on none.
Men clasped each other's hands, and said,
"The City of the West is dead!"

Brave hearts who fought, in slow retreat,
The fiends of fire from street to street,
Turned, powerless, to the blinding glare,
The dumb defiance of despair.

A sudden impulse thrilled each wire
That signaled round that sea of fire;
Swift words of cheer, warm heart-throbs came;
In tears of pity died the flame!

From East, from West, from South and North,
The messages of hope shot forth,
And, underneath the severing wave,
The world, full-handed, reached to save.

Fair seemed the old; but fairer still
The new, the dreary void shall fill
With dearer homes than those o'erthrown,
For love shall lay each corner-stone!

Rise, 'stricken city!—from the throw
The ashen sackcloth of thy woe;
And build, as to Amphion's strain,
To songs of cheer thy walls again!

How shriveled in thy hot distress
The primal sin of selfishness!
How instant rose to take thy part
The angel in the human heart!

Ah! not in vain the flames that tossed
Above thy dreadful holocaust;
The Christ again has preached through thee
The Gospel of humanity!

Then lift once more thy towers on high,
And fret with spires the western sky,
To tell that God is yet with us,
And love is still miraculous!

—Atlantic Monthly.

"WHEN I REMEMBER."

Sorrows humanize our race;
Tears are the showers that fertilize this world;
And memory of things precious keepeth warm
The heart that once they did not hurt.

That have lost nothing; they are poorer far
Who, losing, have forgotten; they most poor
Of all, who lose and wish they might forget.

For life is one, and in its warp and woof
There runs a thread of gold that glitters fair,
And sometimes in the pattern shows most sweet
Where there are sombre colors. 'T is true
That we have wept. But oh! this thread of gold,
We would not have it tarnish; let us turn
Off and look back upon the wondrous web,
And when it shineth sometimes, we shall know
That memory is possession.

When I remember something which I had,

But which is gone and I must do without,

I sometimes wonder how I can be glad,

Even in cowslip time when hedges sprout;

It makes me sigh to think on it; but yet
My days would not be better days should I forget.

When I remember something promised me,
But which I never had, nor can have now,
Because the promiser I no more see

In countries that accord with mortal vow;
When I remember this I mourn—but yet
My happiest days are not the days—when I forg
Jan Inge

How Paper Boxes are Made.

In the establishment which we visited heating and power of the establishment furnished by two boilers, one being general although not exclusively, employed for engine, and the other for drying and heat purposes. The amount of pastebord used the manufactory under consideration is al four hundred tons per year, and the am of flour for paste covers five hundred bat annually.

On the second floor is the cutting department, which is in many respects the most interesting in the entire building. The machinery employed at this business are men and numbering a score or more, and the machinery is of the most ingenious character, being together with the rest of that used in this manufactory, the special adaptation of the proprietors to the wants of the constantly increasing needs of manufacture. One machine worked quite easily by a mere lad, cuts the top and bottom pieces of the little boxes, of which such an immense quantity constantly used. The work is done in all the various sizes of needed discs are regular by a simple ratchet arrangement, and it requires the strips of pastebord to be fed have in a twinkling the little round pieces the boxes desired. Another machine, by adaptation of an adaptable disc, cuts out perfect accuracy oval pieces, such as for the tops and bottoms of hat boxes and like. Still another cuts out the bottom sides, at the same time, of a prospective cutting out the piece of the necessary; and scoring the pieces at the place where side pieces will rise. This is a beautiful arrangement and a great saving of time, machine working by steam, as most of others, and turning out its work with great rapidity ready for use. Other larger machines also propelled by steam, cut out work larger size, for large shirt and trim boxes and the like. In each case the cutting and scoring is done simultaneously, the fitting being accomplished as expeditiously that of the printing press, and with as little trouble. Not quite in the line of cutting, moving in a similar direction, is a machine which, by a simple turn around two cylinders gives the strips of pastebord their curve the use of paper-collar boxes, ready for pasting and the addition of the tops and bottoms. All the cutting, with the exception some fine work, is done in this room. The smallness of the order will not warrant the expenditure of steam machine work, but cutters are used,—the well known grad-board with its ponderous scythe-like blade, loaded at the lower end with a heavy s. The various sizes are cut on these boards with great facility by hand work, but with not much exactness, and, of course, with decreased celerity. The work, as it is cut up by the gross for the sake of regularity, the quantity of word done. It is then taken up stairs to be pasted together and made the various styles of boxes.

The third and fourth stories are occupied with the exception of a small special cut

ment, by girls, of which there are about a hundred. These do the pasting and combing work. Long tables ranged along the sides are occupied at small intervals by the box workers. Glue pots are sunk in the benches, one for each girl. She receives the pieces and tops of the boxes, and puts them together, completing them in every part, and sends them ready for packing. The work is so simple, and yet requires the exercise of considerable amount of tact and taste. It is necessary to make both ends meet, as well as the manufacture of paper boxes as in the interests of household expenditure, and requires long practice to attain celerity and the same time neatness in the task. The work is done by skilled hands, are, of course, intrusted with the finer work, requiring much delicacy of arrangement and the utmost care.

Work is done by the piece, and swiftness is necessary as a skill. It is a very interesting sight to see these very fair champions of the glue-pot and brush, as like skilled artisans construct the important articles which are destined to hold so many and precious pieces of manufacture. To smooth off and fit the work a little steel instrument is held with which every little edge is held up to its place and made as neat and tight as the senser fingers and sharp eyes can make it. At the end of each of the upper stories are the packing rooms, where the boxes are put up by grosses or otherwise for shipping. One of the most interesting of the departments is that in which small cylindrical boxes of pasteboard are formed for the pills, whose tops and bottoms were, as mentioned, cut out below by an ingenious machine. The cylindrical rings which form the sides of the box are taken out of the hollow cylinders previously formed by gluing together the long sides of a rectangular slip of cardboard. This cylinder is then placed on a revolving turning machine, and the cylindrical figure cut out by a few deft applications of a knife to a grooved strip, as in the operation of the turning wheel. The celerity with which these little box frames are turned out is wonderful, and the exactness with which they are cut, is a great improvement over the old and cutting arrangement.

The various sorts of work made average, at the establishment mentioned, forty in a day, and in the month, of various descriptions, a thousand different kinds. One firm in the city requires three hundred sorts of boxes of different patterns, and one paper collar factory uses from fifteen thousand to twenty thousand boxes a year. Druggists' boxes, perfumers' boxes, boxes for soap, confectionery, jewelry, hardware, shoes, paper hats, hats, bonnets, segars, woolen goods, trunks, fancy articles, such as pipes, china and the like, brushes, handkerchiefs, pills, and what not, are here manufactured by the thousands, plain, and glorious in every hue of the rainbow, from an inch in diameter to two or three feet square, and of all imaginable shapes.—*Phila. Inquirer.*

The next evil I have to warn the youth of, is the beware of an high, proud mind, from which he desires after the glory of this world, which bring on a train of unnecessary cares and troubles. It may be easily seen, the proud man and woman never want to be satisfied, because they seldom have a settled contentment. The chief reason is, they go far

from God, the alone Author of true content. As saith the Scripture, "The Lord beholdeth the proud afar off."

For "The Friend."

From the Letters and Papers of John Barclay.

(Continued from page 123.)

The subject of business is one, which our Author not unfrequently alludes to in his memorandums, as claiming his serious attention. He no doubt felt the need of a jealous and watchful care over himself, lest he too should be carried away by the all-engrossing spirit of the world in his lawful pursuit, as he could not fail to see had been lamentably the case with very many who, neglecting to seek first the kingdom of God and the righteousness thereof, had for want of this preserving ballast, made shipwreck of faith and a good conscience. How desirable that we should not allow our eyes to become so blinded by the love of wealth or the conveniences which it procures, neither by the example of others bent on amassing it, as to cause our hearts to be diverted from Him, whose are the cattle upon a thousand hills; who can alike bless a little or a blast a great deal; and who is the chiefest among ten thousand, yea altogether lovely. How desirable that we should not put our trust in uncertain riches, but in the living God, who giveth us all things richly to enjoy. How desirable that heaven should be the anticipated home, and the earth, with all its accumulations, its promises, its hopes, and its pleasures, but the footstool of such as have experimentally to realize the awfulness of the eternal state, with the solemn reality of our having a never-dying soul to be saved or lost. How desirable to forestall, so far as we can, the whole concerning our immortal well-being, by laying up in store for ourselves, not "Wealth heaped on wealth, which truth nor safety buys," but a good foundation against the time to come. How this would tend to humble the unhalloved heart; how point to costly sacrifices in self-denial; how abate the ardor of slavish ambition; and how remind of the Saviour's solemn interrogatory: "What shall it profit a man to gain the whole world, and lose his own soul?"

"1816. June.—According to my present feelings and experience, I do verily believe that the business upon which I have entered, is such, as requires much more time, close study and attention, than I can conscientiously give up thereto; it does entail such entanglement and engrossment in the things of time, as to leave to uncertainty and almost inevitable neglect the things of eternity. I also am of the firm persuasion, that business is not of that first importance, which is so generally attached to it; but is and should be secondary and subordinate to the first and greatest object in life.

"1816. June.—On considering the subject of the business proposed to me to enter upon, [that of a solicitor,] I can acknowledge that I would this day sign the articles of clerkship, if I thought it right to do so; but I feel too much given up and dedicated in heart and mind to Him, who for all my life long blessed and helped me, for me to undertake this proposed occupation; and therefore I do trust, that though my relations may not approve the decision, they will respect the motives. It is, and has been day and night, my most ardent desire to acquaint myself thoroughly, in spite of every obstacle, with the will of the

Lord concerning me; and I may safely and sincerely add, that there is and has been no fear, no grief, no joy, so impressed on my soul, as the fear of not doing, the grief at not having done, and the joy of having done, what I know or believe to be right.

"1816. I remember, when under great exercise, long continued on the subject of business, and amidst many thoughts as to getting a livelihood in the world, with my very restrained views every way, I opened a book in great fluctuation and sore grief of mind, as it lay near me, craving that I might be secretly informed in this way, or in any way with certainty, as to the line of duty prescribed to me by heavenly wisdom: when, to my astonishment, I found immediately to my hand this passage from William Penn's No Cross No Crown,—"Whoever thou art that wouldst do the will of God, but faintest in thy desires from the opposition of worldly considerations,—remember, I tell thee in the name of Christ, that he that prefers father or mother, sister or brother, house, &c., to the testimony of the light of Jesus in his own conscience, shall be rejected of Him in the solemn and general inquest upon the world, when all shall be judged, and receive according to the deeds done, not the profession made, in this life. It was the doctrine of Jesus, that "if thy right hand offend thee, thou must cut it off; and if thy right eye offend thee, thou must pluck it out;" (Matt. v. 29, 30.) that is, if the most dear, the most useful and tender comforts thou enjoyest, stand in thy soul's way, and interrupt thy obedience to the voice of God, and thy conformity to his holy will revealed in thy soul, thou art engaged, under the penalty of damnation, to part with them."

"Part I: chap. i: sect. 21st. O! here was a revelation indeed to me, if ever there was one; for as surely as there is a secret Divine Power, it was manifested in my soul in the reading of this passage; and it so overcame me in gratitude to the Father of mercies, that my knees were bowed and my heart was contrited before Him at that favored season, and tears fell in abundance.

"There has indeed been a wonderful Providence all along about me, too large to be fully set forth in order. When the time for my decision and signing of the articles of clerkship arrived, whereby I was to serve in an attorney's office for five years, with every prospect that a handsome income would succeed my application to this line of business; and when the draft of the deed was about to be sent to be engrossed, and I was to take it to the law-stationers for that purpose; borne down by hidden trials, my earnest fervent petition (in a secret place, where I stepped aside to pour out my soul unto God) was, that if the Lord was my guide and my leader, he would make a way even now, when there appeared none, to get out of the predicament in which I was so closely confined: and speedily that day I was taken ill, and obliged to see a physician, who ordered me to Southampton as soon as I could go; which was accordingly effected in three days. I have cause to remember to this day, how closely the Mighty Helper was about my bed and about my path at that time; so that my tenderness of heart, and my cries and tears in secret, were often remarkably answered, and were felt even to prevail with God. My song also was unto him in the night season; and living praises would ascend, in very small intervals of time,

when the soul had a few seconds only to turn to its Comforter. When I returned from Southampton I resumed my station at the desk; but my eye saw clearly that that place was not my lot, though I did not even then think of giving up the profession altogether; but that was also shown me in due season, when I was able to bear it. So that there is indeed ground for me yet to trust and not be afraid, as well as for others; seeing that there is One, who can make darkness light, and crooked things straight, and hard things easy."

"He finally relinquished the pursuit of the law in the latter end of this year.]

(To be continued.)

A Father's Advice to his Son.

Selected.

I have no doubt of thy industry and attention to business, and yet a few hints may not improperly be offered for thy consideration. In carrying on the important business thou hast undertaken, keep such an oversight as to be acquainted with all its parts, and particularly with the account books; however trustworthy any one may be whom thou employs, a personal knowledge appears to be indispensable.

Keep a distinct cash book, and let it be balanced at least twice in every week: my practice when in business was to do it daily. Always examine whether the cash on hand corresponds with the balance.

Let no piece of work leave the premises without the requisite entry having been first made. A personal inspection will detect errors either in quantity or price.

Avoid leaving balances due and uncollected. Sometimes a considerable sum is absorbed in this way. My master was accustomed to say that more money was lost from not asking for it when it was to be had than from any other cause. Some persons feel a delicacy about asking for money due them; that seems rather out of place. It ought always to be understood that men are at liberty to claim what they are justly entitled to. In making collections be sure to call at the time mentioned by the debtor.

A bill book should be kept, and it might be well to have a memorandum book for daily inspection, an account of payments to be made as well as important business to be attended to. Make a practice to be punctual in thy own payments, or if any unforeseen contingencies render it impracticable, pay a part on account, and ask as a favor an extension on the balance.

I scarcely need express my confidence that whatever may be thy press of business, thou wilt endeavor to arrange it so as not to interfere with the attendance of religious meetings; but I would just hint my earnest wish that on these occasions thou may be favored to leave the world and its concerns at home, and through the fresh extendings of divine love and mercy, be made and preserved a living worshipper. I have no doubt that thou wilt continue plain and exemplary in thy personal appearance and language, and I earnestly desire that thy whole conduct and deportment may be in correspondence with it.

Examples of uprightness in bearing these and the other precious testimonies committed to our forefathers, are much needed in the present day.

For "The Friend."

I have feared that Friends of the present time, in giving prominence to the necessity of thorough cleansing from sin and the defilements of the flesh and spirit, through the washing of regeneration, as opposed to the slight and easy process by which some appear to expect to attain to all the benefits of the coming, sufferings, death and resurrection of our Saviour, might give ground for the accusation that they do not look for complete freedom from sin and condemnation, and the consequent peace and assurance of salvation, until they reach the borders of the grave.

Our early Friends were full and clear in declaring the doctrine, at that time a strange one to many, of christian perfection and present salvation from sin and its punishment hereafter. Though this was to be effected by the operation of the Holy Spirit, inwardly revealing the cleansing blood of Jesus Christ, and applying His purging fan; not by picturing to the imagination Him bleeding and dying on the cross. "For by one offering He hath perfected forever them that are sanctified."

Let us be careful to proclaim all the inestimable blessings of faith in Christ through good works made perfect; and to speak well of the ever-blessed name of the Lord and His preserving power, so that from the rising of the sun to the going down thereof, His name may be great among us, and have that praise which is comely from his followers, whereby it may be glorified among the people, and they drawn to come under the government of the Prince of Peace, and Jerusalem to become more and more a joy and rejoicing in the earth.

Twelfth mo. 1871.

Novel Reading.—President Porter of Yale College says of the effect of Novel Reading. It is not easy to turn to a history or scientific essay when an attractive novel is lying by its side, particularly for one to whom novel-reading is new. There is no fascination connected with reading to be compared with that experienced in youth from the first few novels. The spell-bound reader soon discovers, however, that this appetite, like that for confectionery and other sweets, is the soonest cloyed, and that if pampered too long it enfeebles the appetite for all other food. The reader of novels only, especially if he reads many, becomes very soon an intellectual voluptuary, with feeble judgment, a vague memory, and an incessant craving for some new excitement. It is rare that a reader of this class studies the novels which he seems to read. He knows and cares little for the novel of character as contrasted with the novel of incident. He reads for the story, as he says, and it usually happens that the sensational and extravagant, the piquant and equivocal stories, are those which please him best. Exclusive and excessive novel reading is to the mind as a kind of intellectual opium eating, in its stimulant effects upon the phantasy and its stupefying and bewildering influence on the judgment. An inveterate novel reader speedily becomes a literary *roue*, and this is possible at a very early period of life. It now and then happens that a youth of seventeen becomes almost an intellectual idiot or an effeminate weakling by living exclusively upon the enfeebling swash or the poisoned stimulants that are sold so readily

under the title of tales and novels. An apprenticeship at a reform school in literature with a spare diet of statistics, and a hardy of mathematical problems, and the sim beverage of plain narrative, is much need for the recovery of such inane and half mented mortals.

Selected.

How many are enduring afflictive bereavements, or painful suffering; and while we in the body, I anticipate little else than tortification or affliction of some kind. I work for us a far more exceeding and eter weight of glory, this will outbalance every possible tribulation we can here endure. is, however, not necessary to be constant dwelling on the gloomy pictures of life; us gird up our loins, and try to keep our lan trimmed, so as to be ready to open to our L at his coming; and all those servants wh He finds thus watching, He will command sit down to meat, and come forth and se them himself. And thus we shall, as we p along, realize the blessedness of the relig we profess, to sustain in the hour of t comfort and cheer with Divine consolat from time to time, and furnish in the with a blessed hope of everlasting rest peace; where all sorrow ceases and God s wipe away all tears from every eye.—I
Evans.

Tamed Animals.

R. H. Elliot, in describing his experie when a resident in the jungles of Mys in Southern India, mentions several case which the wild animals of that country only became domesticated, but seemed to fer the company of man to the society of t own species. He says:

"The first instance I have to notice is t of a stag which belonged to a neighbor mine. This animal, which had been ca when a fawn, used to accompany the coo to their work and remain with them al but in the evening it went away to the ju regularly, to return as regularly the follo morning. It thus roamed the jungle night, and remained with man all day. last it became dangerous, as tame stags o do, and had to be shot.

Another still more extraordinary instst was a pet of my own—what the natives a flying cat, but in reality a flying squirr an animal that sleeps all day and feed night, and is in habits somewhat like the tribe, though clearly of the squirrel or Its wings, if they can be called such, cor merely of a flap of skin stretching from fore to the hind legs. When at rest this is not very noticeable, and the animal sents, when on the ground or on the bra of a tree, the appearance of a very l grey-furred squirrel. It cannot, of course from the ground, but when travel from tree to tree, it simply starts like a on the trapeze—descending from one p to rise again to about a similar level on opposite tree. One of these animals brought to me when it was about half-gr and soon came to consider my house a natural home. It soon found out an clothes bag hanging at the back of a c and in this it slept all day. It came o dusk, and used often to sit on the back of chair at dinner, when it got fruit and b After dinner away it went to the jungles,

dom saw anything of it till about three o'clock in the morning, when I used to return to the house and curl myself up at my feet. When I rose in the morning my pet took itself to the es-bag, and there spent the day, to go through the same round the following night. A very interesting animal met with the usual of defenceless pets, and was killed by a hawk as it was making its way to the jungle the next night.

Another pet of mine was a hornbill, one of the birds of discordant note, huge beak, and box-like crowned head. This creature was also totally unrestrained, but showed a decided preference for the society of man. One day I joined some of its species which made its appearance in the jungle near my house, soon got tired or disgusted, and speedily abandoned them. It used to swallow its food as a man taking a pill; and it was surprising to observe the ease with which balls of about the size of two large walnuts were swallowed. On one occasion it flew off with a bunch of keys, but was luckily seen by my servant, who gave the alarm. The bird flew back his head the moment he alighted on a convenient branch, and it was only the fact that prevented his bolting the entire nest. Finding my people close upon him, I soon had the satisfaction of seeing him fly through some hundreds of yards off, where he seemed to take a peculiar pleasure in turning his keys from the tops of the high-crooks, and it was some time before he let them drop, which I conluded he did merely to see he could not swallow them.

Now, none of the pets I have mentioned, may be observed, were made miserable by their habit; but it is very remarkable that all of them must have had frequent opportunities of resuming the acquaintance of their species, the force of habit seems to have chained them to the places they had accustomed to."

The old English plainness and sincerity, the generous integrity of nature and honesty of disposition, which always argues true greatness of mind, and is usually accompanied with a dauntless courage and resolution, is in a great measure lost among us. The dialect of conversation is now a-days so swelled with vanity and compliment, and so surfeited (as I may say) with expressions of kindness and respect, that of a man that lived an age or two ago and returned into the world again, he would not want a dictionary to help him to understand his own language, and to know the intrinsic value of the phrases in fashion; it would hardly at first believe at what a rate the highest strains and expressions of kindness imaginable do commonly pass in our credit payment; and when he should come to understand it, it would be a great while before he could bring himself, with a good conscience and a good conscience, to converse with them upon equal terms, and in their own way.—*Archbishop Tillotson.*

The ant-eating woodpecker (*Melanerpes formicivorus*), a common California species, has a curious and peculiar method of laying its provisions against the inclement season. The round holes are dug in the bark of the dead oak, into each one of which is inserted an acorn, and so tightly is it fitted or driven in that it is with difficulty extracted, and the bark of the pine trees, when thus filled,

presents at a short distance the appearance of being studded with brass-headed nails. Stowed away in large quantities in this manner, the acorns not only supply the wants of the woodpecker, but the squirrels, mice and jays avail themselves likewise of the fruits of provident labor.

THE FRIEND.

TWELFTH MONTH 16, 1851.

Perhaps no event which has taken place in the present century has more favorably distinguished it than the general overthrow of the system of slavery, tolerated or more or less encouraged by every nation professing Christianity, ever since the latter was first embraced as the national religion. There probably have never before been national acts that have arrested or materially alleviated so much and so great human suffering and degradation, or laid the foundation for a greater increase of domestic comfort and social enjoyment among a class to which they had been almost hopelessly shut off, as did the enactment of laws by which Great Britain liberated the slaves throughout her dominions, the decrees which put an end to slavery in the colonies of France, the ukase that emancipated the serfs in Russia, and the proclamation of Lincoln abolishing slavery in the United States. To these may now be added the recent action of the Government in Brazil, by which the children of all slaves born after the legislative bill became a law, are declared free.

Although several of the provisions in the Brazilian enactment are defective, allowing the continuance of the servitude of those now subjected to it, and they liable to all its abuses, yet, as an initiatory step, it gives the death blow to slavery in that vast empire, and must create a feeling in the breasts of those intended to be still held in bonds, that will render it very difficult if not impossible, in connection with the determined efforts of the advocates of immediate emancipation, to prevent them from gaining their freedom before many years have passed by.

It had long been known that the emperor was favorable to the abolition of slavery in his dominions, and had promoted the efforts of those members of the community, who were laboring to convince the planters and others opposed to it, that their interest as well as the rights of humanity demanded the removal of its enormous evils. In the fifth month last the cabinet introduced the bill which has now become a law into the House of Deputies, where it met decided opposition from both those who were desirous to continue the system of slavery, and those who favored immediate emancipation. There were repeated stormy and obstinate discussions on the subject, and on proposed modifications of the provisions of the bill, so that it was not until the Ninth Month that it passed the House, and was sent to the Senate. In the latter body it was finally adopted with only four or five dissenting votes. The Emperor being in Europe, the Princess Regent immediately sanctioned and signed the bill, and from that date no more slaves will be born in Brazil. Their importation had been made a penal offence some years before.

One of the objectionable provisions of the law obliges the master of the slave mother to maintain her free-born child until he or she is eight years old, when he may turn him over to the government and receive its bond for \$300, or keep him as he does his other slaves until he is twenty-one years of age, and he is under no obligation to give him instruction of any kind. As the master cannot legally retain these free-born blacks after the twenty-one years have expired from the passage of the law, he has little pecuniary interest in their lives, and they may be subjected to all the rigors of slavery, be badly fed and clothed, and should they survive the ordeal, be turned adrift when of age, abject and imbruted, and fitted for no employment but that which requires physical force only.

It was soon found in the British West Indies that the apprentice system was a failure, and the evils of this provision of the law in Brazil are so patent, and must prove so hazardous of the peace and well-being of the community, as well as destructive of an important part of the laboring population, that we may confidently anticipate its being changed so as to secure greater protection, and some education to the free-born blacks.

It is a pleasing circumstance that since the passage of the law, the Benedictine monks have given immediate freedom to all their slaves, about sixteen hundred in number, and propose, with the government's consent, to divide a large landed estate among them. It is thought this example will be followed by other orders, who notwithstanding the denunciation of slavery by the pope, have continued to hold slaves. All the slaves belonging to the government, many thousands in number, have been at once set free.

Notwithstanding the very objectionable features in this initiative movement towards the blessing of liberty to all, there are many redeeming and hopeful circumstances attendant upon it, which give the philanthropist reason to believe, that it is the beginning of the end of slavery in Brazil, which cannot be long deferred. Public opinion in favor of this consummation is becoming too strong, and too openly expressed to be disregarded; and the force of example in complying with it, and, as we may hope, the increased pecuniary benefits resulting from free-labor, compared with that extorted by the lash, will, we confidently expect, ere long, sweep away an evil, which many there have again and again, denounced as a curse upon the land.

It is interesting to observe, that the principles of the gospel of Christ, as they exert their influence, however gradually, on the hearts and minds of the people, produce similar results without respect to locality. It is they, and they only, under the guidance and government of the Holy Spirit, that truly reform and elevate, making man sensible of his relation to his Almighty Creator, to his fellow men, the responsibility thus devolved upon him, and the duties he owes to both. They are certainly slowly but surely spreading among the children of men, and must finally "take possession of the gates of their enemies." It is a solace amid the chafings of religious professors, and discouragement at the apparent decadence of vital religion in circles in which we are more immediately interested, when dark clouds obscure the vision, and the mental eye fails to discern where the

kindness of the Son of the Highest is gaining ground among those around us, to extend the view over the world at large, and mark events that have or are taking place—such as those to which we have been referring—which, though we may not be able to detect or trace out every link in the chain, are evidently connected with the spread of a more enlightened appreciation of the fundamental principles of christianity, and exhibit great and benign reformations accomplished, corresponding to the predictions and promises contained in the Holy Scriptures; thus confirming our faith in the fulfilment of the word of the Lord, that the earth shall be filled with righteousness as the waters cover the sea.

SUMMARY OF EVENTS.

FOREIGN.—The weather in France has been severely cold. On the 10th inst. the Seine was frozen over firmly, and railroad traffic was impeded by a heavy fall of snow. Temp. 5° below zero, Fahrenheit.

The Orleans press, after a long interview with President Thiers, have consented to defer for the present their claim to seats in the Assembly. There is a report current that Thiers will relinquish the presidency in favor of the Duke D'Anmale.

A bill has been presented in the Assembly annulling the decree confiscating the property of the Orleans Princess.

A vote of urgency upon the bill providing for the return of the Assembly to Paris, was passed by a small majority.

The appeals of the Communists convicted of the murder of Generals Leconte and Flandin, and sentenced to death, have been rejected by the Commission of Pardons.

President Thiers, in his message, recommends that the annual army contingent be fixed at 90,000; he deprecates the indebtedness of the country, but says it is due to the machinations of the Pope in England, France, and the United States, and to the neglect in the maintenance of his spiritual independence, and will, in case of need, give him vigorous support.

A Berlin dispatch of the 9th says: In the lower house of the Diet to-day, Delbrück presented a bill for reform in taxation the object of which is to lighten the burthen on the lower classes, to diminish the gift and slaughtering taxes, and makes important reductions in taxes which bear on articles used by the lower classes.

Count Andrassy has received the congratulations of the Russian government, on his elevation to the Premiership of the Austrian Empire, coupled with an expression of confidence in the wisdom and justice of the policy which will be pursued under his administration of the foreign relations of the Empire.

The recent municipal elections in Spain have shown an unexpected strength of the Radicals, who have been successful in most places. Of the members of the Madrid Council, all the Radicals have elected 75, the Republicans 10, and the Ministerialists only 5.

Political agitation is rife in England. At Birmingham an imposing demonstration has been made in favor of the radical reform of the House of Lords, and the limitation of its power to defeat or suspend the progressive legislation of the House of Commons. Resolutions were adopted protesting against the principle of hereditary legislation, and demanding the withdrawal of legislative functions from the Bench of Bishops.

At Reading the proceedings of a similar meeting were disorderly, and at last a rush was made into the hall, a large crowd from the outside, and the consequence was a riot, and the expulsion of the R-publicans. The speaker of the evening was obliged to flee to save himself from threatened violence.

President Grant's message to Congress made an excellent impression in England, and is favorably reviewed by the British press generally.

The antiques in the diamond fields to the British dominions in South Africa has been completed, in fulfillment of the recent contract sale. The fields, it is said, continue to be productive, but violent storms have visited the district, causing great damage to property, and serious loss of life.

The dispatches from England during the week ending on the 11th inst., have related principally to the illness of the Prince of Wales, heir apparent to the British throne. Early in the month his disease (typhoid fever) appeared to be abating, and his recovery was con-

sidered probable, but an unfavorable change afterwards took place, and on the evening of the 11th inst., his death was supposed to be near at hand.

The public and private telegraph service in England has been greatly embarrassed by a strike of many of the telegraphers. The wires are crowded with messages, and serious delays are expected.

London, 12th mo. 1. 11th.—Canals, 92. U. S. 5-20's of 1872, 102; of 1867, 95; ten-forties, 90.

Liverpool.—Uplands cotton, 96-1/2; Orleans, 104d. Sales of the day 20,000 bales, including 7,000 for speculation and export.

The Mexican insurrection seems to be growing more formidable. General Trevino, commanding the insurrection at Tlaxcala, Coahuila, has captured that place from the national troops, and was preparing to march against San Luis Potosi, two hundred miles south, and half the distance to the capital. North of San Luis Potosi there is virtually no government force or authority, while the country below is more or less convulsed. Elections in the Cortes took place on the 11th, throughout Spain, and it was known that evening that the Republicans had elected their candidates in twenty-three of forty-eight capital provinces, and in forty-three smaller towns.

The Swiss Federal Assembly has passed a bill relating to civil marriages.

A dispatch from Bombay states that the cholera is raging with great fatality among the natives of Lucknow and its vicinity.

An Alexandria dispatch of the 10th states that the cholera has appeared in that city.

THE HOUSE OF REPRESENTATIVES.—In Congress little has yet been done beyond the appointment of committees, the introduction of bills and resolutions, and other business of a preliminary kind. A bill has been introduced in the Senate to punish polygamy. Other bills have been prepared in each house providing enabling acts to show the position of Utah in respect to constitution and apply for admission into the Union. These bills will exact a condition precedent that polygamy shall be abolished after a certain date. The delegate from Utah and the Mormons generally are willing to accept this compromise, and it is believed that it will pass this morning at this session.

The House of Representatives has before it the apportionment bill reported at the last session. The bill provides that after the 3d of 3d mo. 1878, the House of Representatives shall consist of 281 members, to be apportioned as follows: Maine, 5; New Hampshire, 2; Vermont, 2; Massachusetts, 11; Rhode Island, 1; Connecticut, 5; New York, 32; New Jersey, 7; Pennsylvania, 20; Delaware, 1; Maryland, 6; Virginia, 9; North Carolina, 8; South Carolina, 5; Georgia, 9; Alabama, 7; Mississippi, 6; Louisiana, 5; Ohio, 19; Kentucky, 10; Tennessee, 9; Indiana, 12; Illinois, 19; Missouri, 12; Arkansas, 4; Michigan, 1; Florida, 3; Texas, 9; Iowa, 9; Wisconsin, 8; California, 4; Minnesota, 3; Oregon, 1; Kansas, 3; West Virginia, 3; Nevada, 1; Nebraska, 1.

According to the report of the Secretary of the Navy, it now consists of 179 ships of all classes. These, when in commission for service, carry 176 guns, exclusive of mortars and small caliber ones. Of 22 ironclads, only one is now in commission, the others being laid up at League Island and other stations. The survey of the Isthmus of Darien, under Commander Selridge, shows that the Attrato is navigable for ships of the largest size, having a width of 1500 feet, and a depth now of 30 feet, and 30 feet. A canal of the necessary canal is 31 2/10 miles, the distance from the Attrato river to Cupica Bay, of which 23 miles is a flat plain, with a rise of 90 feet, and no difficulties of construction. The remaining eight miles present the only engineering obstacles.

The Government bullion at the Mint and branches during the year were: gold, \$37,054,292.26; silver, \$3,975,982.54; total, \$41,030,184.80. Deducting from this the repositos, or bars made at one branch of the Mint and repositied in another for coinage, the amount will be \$39,157,404.13.

Governor Casswell of Wyoming, has vetoed the bill respecting the woman suffrage act.

The final report of the Superintendent of the census for 1870, makes the total population of the United States and territories 38,923,210, viz: 33,589,857 whites, 4,886,387 colored; 383,712 Indians, and 62,254 Chinese. The close of navigation on the Mississippi at St. Louis, occurred on the 21st of Eleventh month, after a boating season of 225 days. In 1870 there were 240 days.

During the late violent storms on the plains, while the railroad train was stopped near Kit Carson, a large number of buffaloes congregated around the train, and stood on the lee side of it for protection against the storm.

The interments in the city of Philadelphia, for 20th mo. the 9th inst., numbered 432, including 199 small burials.

It is stated that the Michigan silver mines have year yielded about \$1,000,000 worth of ore. The mate is that about \$100,000 a month can be taken at a cost of only \$8,000. The Wyandotte smelting works have sent \$400,000 to the mint from one alone.

The surplus of wheat in Oregon this season is mated at 75,000 tons, nearly all of which will find a way to Europe.

The report of the Acting Commissioner of the In Affairs, which has just been published, says that the result of the policy inaugurated by President Grant the prevalence of peace with those tribes who formerly most hostile to the government. He is the prospects of a permanent peace with the Apaches now better than they ever have been.

The Markets, &c.—The following were the quotations on the 11th inst. New York.—American gold, 1 U. S. 5 cents, 1881, 1177; ditto, 1868, 1155; ditto, 10 5 per cents, 1091. Superfine flour, \$5.80 a \$6.10; brands, 86.25 a \$10.10, the latter for St. Louis do extra. White Michigan wheat, \$1.68 a \$1.70; at \$1.50, \$1.62; red western, \$1.59 a \$1.67; No. 1 winter, \$1.57; No. 2, \$1.55; Old western, \$1.58 a \$1.60. State 95 cts. Southern white corn, 86 a 90 cts.; yellow 79 a 80 cts.; western mixed, 76 cts. Philadelphia Cotton, 20 a 21 cts. for uplands and New Orleans Superfine flour, \$5.25 a \$5.75; finer brands, 58 1/2 Michigan white wheat, \$1.72; Pennsylvania red, \$1.58. Rye, 95 cts. Oats, 34 cts. Corn, 30 cts. State 95 cts; new western mixed, 75 a 78 cts. old, 78 a 80 cts. Oats, 30 a 55 cts. Clover-seed, 10 1/2 a 11 1/2 cts. seed, \$1.85. Timothy, \$3.25. About 2700 bbl of wine sold at the Avenue Droye-vaer. Extra 4 7/8 cts; fair to good, 6 a 6 1/2 cts, and common 4 a 5 1/2 cts. do gross. Sheep sold at 5 1/2 a 5 7/8 cts. per lb. gross receipts 14,000 head. Hogs sold at 6 a 6 1/2 cts. per receipts at the Avenue Droye-vaer, 3600 head. 1 more.—Oats, 50 a 53 cts. Yellow corn, 70 a 71 1/2 cts. Barley, 6 7/2 cts. Chicago.—No. 1 spring wheat, \$3 a 3 1/2 do, \$1.20. No. 2 mixed corn, 42 1/2 cts. do, \$1.15. Rye, 60 cts. do, 57 cts. do, 64 1/2 cts. do, 64 1/2 cts. do, \$1.10. No. 2 red winter wheat, \$1.30 a 3 1/2 cts. Oats, 20 spring, \$1.32. Mixed 43 a 44 cts. Oats, 34 1/2 cts. Iowa spring barley, cts. Cleveland.—No. 1 winter red wheat, \$1.47; do, \$1.37. New corn, 55 cts. Oats, 41 a 42 cts. do, \$1.40. Amber Michigan wheat, \$1.11; No. 1 a \$1.46; extra, \$1.50.

RECEIPTS.

Received from Joseph Armfield, Agent, England William Knowles, James Kenway, Edward Best, Charles Elock, 10s. each, vol. 45, for Henry Horta 2s. 6d., to No. 52, vol. 45, and for Anna Nunn, 6s. to No. 52, vol. 45.

Received in Receipting for the remittance favors by Joseph Armfield and published in No. 10 a current volume, the following errors occurred: E. Hadden and John Horniman £1 each, to No. 45 a 46, should read for vols. 45 and 46.

FRIENDS' BOARDING SCHOOL FOR IND CHILDREN, TUCNESSA, NEW YORK.

A suitable Friend and his wife are wanted to charge of this Institution, and manage the Farm connected with it. Applications may be made to J. Ebenezer Wistar, Marshalton, Chester Co., Thomas Wistar, Fox Chase, P. O., Philadelphia Samuel Morley, Olney P. O., Joseph Stargatewood, 413 Spruce Street, do.

FRIENDS' ASYLUM FOR THE INSANE (Near Frankford, Twenty-third Ward,) Philadelphia

Physician and Superintendent—JOSHUA H. WILSON, M.D.
Applications for the Admission of Patients made to the Superintendent, or to any of its. Board Managers.

DIED, on the 28th of 11th mo. 1871, at the residence of her son-in-law, Edward W. Woolman, corner of 4th and Centre Sts., Philadelphia, CAROLINE, wife of Jotham Townsend, in the 86th year of her age, a sister of Railway and Plainfield Monthly Meeting Friends, New Jersey.

WILLIAM H. PILE, PRINTER,
No. 422 Walnut Street.

THE FRIEND.

A RELIGIOUS AND LITERARY JOURNAL.

OL. XLV.

SEVENTH-DAY, TWELFTH MONTH 23, 1871.

NO. 18.

PUBLISHED WEEKLY.

Two Dollars per annum, if paid in advance. Two Dollars and fifty cents, if not paid in advance.

Subscriptions and Payments received by

JOHN S. STOKES,

116 NORTH FOURTH STREET, UP STAIRS,

PHILADELPHIA.

When paid quarterly in advance, five cents.

The Oldest Bible in the World.

BY G. R. WYNNE.

It is to say, it is only within the last few years that Europe has known the most perfect written complete copy of the Bible of the Western Church now possesses. It is less than 1,500 years the book had carefully preserved indeed, but inadequately valued, amid the moldering manuscripts of an eastern society of monks. The discovery of the finding of this precious biblical treasure has only recently been given to the world and our readers doubtless will be interested in a brief sketch of what Dr. Tischendorf has done in connection with the now famous *Sinaitic* manuscript.

Dr. Tischendorf, when a very young man, gave his name for himself by theological essays, which were published in 1839, and the success of these induced him in that year to devote himself to the important but comparatively neglected task of correcting the Greek Testament, so as, if possible, to discover, by comparing together the most ancient manuscripts, the very words which the apostles wrote. He scarcely says that no Christian reader who is not satisfied with an imperfect text, and who does not desire to attain to a more perfect one can possibly be attained to a more perfect one. So, at least, it seemed to a German student, who immediately set himself to comparing together all the old copies of the New Testament which he could find in the libraries of Rome, Paris, Berlin, Oxford, Cambridge, and London.

It is like many another scholar, Dr. Tischendorf was a man of very moderate means, and the consequence of which he often found difficulty in carrying the long journeys required by his researches. For comparing distant documents. He, like many others, sometimes found liberal aid in the grants made him by the Saxon and other governments; but these grants he was obliged to keep by laboring as a writer or tutor in order to place. Some idea of the distance he had to travel by him in his journeys may be gained by the name some of the countries and cities visited by him in his search for ancient manuscripts. In 1843 he visited Holland, England, Switzerland. He then toured through France, Venice, Modena, Milan, Verona, and Turin. In 1844 he pushed to the East, visiting Egypt and the Coptic convents of the

Lybian Desert, Mount Sinai, Jerusalem, Beth-lehem, Nazareth, Smyrna, the Isle of Patmos, Beyrout, Constantinople, Athens. Then, calling at Vienna and Munich, he returned to Leipzig. This journey cost the student 5,000 thalers.

But it was well-spent money, hard come by as it was in various ways, for during the course of this journey, at the Convent of St. Catharine, on Mount Sinai, Dr. Tischendorf discovered what he terms "the pearl of all his researches." In visiting the library of this monastery, May, 1844, he perceived, in the middle of the great hall, a basket full of old parchments, among which a large part of a copy of the Old Testament in Greek was found, which seemed to Dr. Tischendorf the oldest he had ever seen. He was given a few sheets of the book freely enough by the liberal monks, but he displayed so much joy at his new possession that the jealous fraternity resolved to give him no more, perceiving that they possessed a value hitherto quite unknown to their owners.

Obliged to turn his back on the remainder of the treasure, the scholar did not forget, in a distant land, the basket of vellum over which his mouth had watered. With the pertinacity which marks a real student, he planned for no less than fourteen years how he could gain possession of the whole. In the meantime he made a second unsuccessful visit to the Sinai convent; unsuccessful, that is, in the attempt to re-discover the original documents, for his labors were partially rewarded by meeting with several important Arabic MSS. His intermediate years were not wasted, for he succeeded, from time to time, in adding materially to our stock of manuscripts of parts of the Bible.

In 1858, after much negotiation with various learned bodies and governments, the Czar of Russia equipped Dr. Tischendorf for a third journey to Mount Sinai, where he arrived in January, 1859. For some weeks he pored over one dusty folio after another, in a manner which made some of the simple friars marvel whether he had resolved to make his diet, like the moth, on the moldering tomes of antiquity. The very evening before the day he had determined to set off home, believing his search to be unavailing, he had a walk with the steward of the convent, who afterward, taking him to his own cell, said, "I, too, have read a copy of the Old Testament in Greek;" whereupon, taking down from a shelf a bundle covered with red cloth, he handed it to the stranger, who, opening it, at a glance saw that it contained, not only the Old Testament of which he was in search, but the whole of the New Testament also in the most ancient characters, together with two other treatises in Greek, which were never joined with the Bible since the time of the Emperor Constantine the Great, about 325 or 350 years after Christ.

The joy of the traveler cannot be told. He

knew that at that instant he held in his hands the most precious biblical treasure in existence, the oldest known copy of the Bible in the world. He hid his feelings better this time, and obtained leave to carry the Bible to his own room, where he gave way to such raptures as a lover may feel who has just returned to his affianced after an absence of years. The more he looked at the old pages, brown and crumpled, but bearing the square letters, traced by a hand which for more than fourteen centuries had lain in the tomb, the more did he covet and long for the book. Though the night was late and cold, he sat down to copy out one of the additional treatises, the Epistle of Barnabas, a complete Greek copy of which had not previously been known; and his thoughts went back to the time when this very copy had lain open on the desk of some primitive church about the year when the Nicene Creed was first drawn up by the Catholic bishops, under the presidency of Constantine.

But to find the MS. was one thing, to carry it away was another. No one knew this better than Dr. Tischendorf, who spent, in consequence, a considerable period in journeying between Sinai and Cairo, where the Prior happened to be, and in sending a messenger back on a camel to the convent bearing the Prior's order to return with the coveted parcel. At Cairo, beneath a sultry sky, and with aching temples, Dr. Tischendorf actually copied out no less than 110,000 lines of obscure and nearly faded Greek writing; a task which, if he had done nothing else, would sufficiently prove the enthusiasm with which he was animated.

But the great desire of his mind was to present the original itself to the Czar, which, after a repetition of delays and difficulties, the doctor was at length able to effect. Not until the 27th of September did he attain his purpose, and on the 19th of November, 1859, nearly a year after his departure for the East, Dr. Tischendorf presented to the Emperor, in the Winter Palace at Tsarkoe-Selo, his rich collection of old Greek, Syriac, Coptic, and Arabic MSS., among which the *Sinaitic Bible* shone like a crown. He then proposed to the Emperor that an edition of the book in facsimile should be published at the Imperial cost, which should be regarded as one of the noblest undertakings in critical and biblical study. This proposal was favorably received, and in October, 1862, the edition, in four folio volumes, was presented by its editor to his Imperial patron. The book was given to the world at the thousandth annual celebration of the foundation of the Russian monarchy.

We need scarcely say that to possess a copy of the Scriptures written 1,000 years before the Reformation—before the separation of the Eastern from the Latin Church—before Charlemagne and his German empire—before the growth of almost all the heresies which have disturbed the peace and unity of the

Church so long—perhaps before the first of the four great councils which finally settled the creed of Christendom—is a fact of which the importance cannot be overrated.

Previous to the finding of this copy there was but one MS. of the New Testament known dating so far back as the fourth century, and in it several of the Epistles are wanting. This copy, next in antiquity and value to the Sinaitic, is the Vatican MS., long preserved in Rome, and over whose pages hungry scholars have given many a hasty glance, since it was long the custom to forbid all visitors to take copies of more than a verse or two. The fourth century gives us no copies of the Scriptures but these two. The next in age is the London Manuscript, in the British Museum, written probably at Alexandria in the fifth century, and presented to Charles I. by the Patriarch of Constantinople, 1628. Besides these, the only remaining one worthy to be placed is the Paris MS., over which some atrocious mediæval scribe has written the treatises of one Ephrem Syrus.

For "The Friend."

From the Letters and Papers of John Barclay.

(Continued from page 134.)

"1816. June 12th.—I have often been struck with the close analogy, which many narratives in the Bible bear to the state of our own minds. The manner in which Thomas received the intelligence communicated by his fellow apostles, of the resurrection of our Lord from the dead, has more than once impressed my mind, whilst I looked at myself and my own state. I have been led to think, that any hesitation or delay on my part, to believe in and to receive the Lord of life and light, who is striving with me day by day, who is watching, waiting to be gracious, who is knocking at the door of my heart almost every hour, who is calling me, and running after me as a shepherd after his lamb that is gone astray,—is somewhat like the tardy yet deliberate conviction of Thomas, who, overpowered at length by the abundant evidence which the Lord was pleased to shower upon him, was unable in the fullness of his heart to say more than 'My Lord and my God.' O! I do indeed desire, not only to be firmly convinced of what is right, but to be willing to sacrifice everything to the performance of the same, with courage, resolution, and constancy.

"1816. June 13th.—O! Lord, make me still more and more entirely devoted and dedicated, given up and surrendered unto thee: teach me, I pray thee, still more perfectly, the way that I should walk in, each step that I should every moment take whilst here; that so through thy boundless mercy I may be safe on every hand from everything evil. O Lord! if it so please thee, I implore thee to take from me all vain confidence in myself or others,—all my own strength and wisdom; and impress upon my soul an earnest sense of my own nothingness and helplessness: that so through the low vestibule of true humility, I may be enabled to enter thy glorious temple, and therein to offer acceptable sacrifice and praise unto thee.

"1816. June 14th.—Upon very deep and solid consideration, I am induced to think that no outward change is yet required of me, as to dress and address: but this I am led to believe is called for at my hand immediately, and has been for some time, namely, a deport-

ment and conversation in all respects consistent with the following texts of Scripture, and proceeding from a deep sense of the importance of them, 'Watch and be sober;' 'Watch and pray, that ye enter not into temptation;'—'Be thou in the fear of the Lord all the day long.' If we do not in this manner take up our daily cross, and follow Him, the Lord of life and glory, how little are we taking heed to that direction given, 'Cleanse first the inside of the cup and platter, that the outside may be clean also.'

"1816. July 25th.—The customs, fashions, vanities, and ways of the world, have very often come under my serious consideration. I have been, I may indeed say, oppressed with a sense of the mass of folly (which is sin) prevalent among the children of men. I believe the evil effects of these things are but little calculated by many reflecting minds; and that few look upon them in *that serious light in which they deserve to be regarded*, or esteem them worthy of reformation. It is in consequence of this lamentable remissness and weakness on the part of those who should stand up in resolute opposition, that the torrent becomes stronger and stronger, and the resistance of the few less and less effectual. Under this impression, my soul has oftentimes mourned; and my distress has been much excited of late, whilst walking in the streets of this great city: many of whose inhabitants seem bound in fetters, and enslaved by the caprice of pride, luxury, and vanity. How frequent and fervent have been my desires, that the little band of those who professedly bear testimony against the fruits and effects of these evils, wherever and in whatever degree they appear, might be strengthened, by a diligent recurrence to that principle which teaches a denial of self and a renouncing of the world with the lusts and vanities thereof,—still to hold out against the enemy."

May the hidden, diffident, struggling little ones of their Heavenly Father's family, whose trials, while best known to themselves, are neither few nor light, be comforted and animated by the following lines of one who had himself partaken in no small degree of the salutary waters of affliction; and who from a deep, humbling, experimental acquaintance with his own shortcomings, could the better feel and sympathize with others in their varied trials and sorrows and conflicts. Precious, also, is his testimony to the riches of that grace which, as obedience is yielded to it, is sufficient for all our need; and is, through the tender mercy of Him "who ascended on high, and led captivity captive," extended to the rebellious also; being ever equal to the restoration and preservation and saving redemption of all, who strive to serve Him in humility and sincerity of heart. Let none then, especially of the younger class, grow weary or faint by the way; but be encouraged by such favorable reports of the good land, by one yet in his twentieth year, as not to turn from or rebel against the Lord, but let Him have the rule of your hearts; when he will not only delight in you, but will bring you, through and over all, into the "exceeding good land" which He hath promised to His faithful Israel, even to them that seek, and love, and serve Him.

"1816. September.—What inexhaustible goodness and loving-kindness has the Lord in store for those of every age, class, and description, who strive to serve him in sincerity.

O! He sheds at times his refreshing presence and protection in a remarkable manner upon his poor dependent little ones, showing down upon them the redundant dew of his grace. I have thought indeed, that inward consciousness of His approbation, tending us, is sometimes permitted to be strong and evident as we could desire. He has been graciously allotted me during a day or two, to experience such a degree of His favor attending me, and to feel such a measure of His divine blessing, shed upon me that I can scarcely forbear in this manner testifying to the continuance of His care. His creatures, even for those who have wandered from His flock, and have been wandering in the wilderness. Yes, O ye! His hand is stretched out still;—praise His name evermore!

"1816. September 19.—Though I wish to be the last to find fault with the innocent natural sprightliness and liveliness of joy yet I cannot but excuse myself from joy in with what is commonly so termed, has often felt thereby unsettled in mind, and disposed for reflection. I have found this occasionally relaxing in the discipline, watchfulness, the inclination to laughter; particularly, gained much ground upon and there has been no small difficulty in straining this habit, when much indulgence that it strikes me to be a snare. Though I do not make a man gloomy, I never allows him to be off his guard; I must watch and pray lest he enter temptation;—taking up his daily cross, frivolous and foolish talking and jesting, sides other more evident and open evils.

(To be continued.)

Zoology of the Napo.

In Orton's work on the Andes and Amazon, he remarks of the river Napo, "he and his party descended a long distance to its junction with the Amazon: "The is the largest river in Ecuador. From source in the defiles of Cotopaxi and Chigagua to its embouchure at the Marañon length is not far from eight hundred miles about twice that of the Susquehanna. Napo village to the mouth of the river barometer showed a fall of a thousand feet. At Napo the current is six miles an hour between Napo and Santa Rosa the rapids; and between Santa Rosa and Marañon the rate is not less than four an hour. At Napo the breadth is about 100 yards; at Coca the main channel is 1500 wide; and at Camindo it is a full 3000 mile." He observed after reaching a collection of a few palm booths, the collection of which do a little fishing and gold work. "Here, for the first time since leaving Quil, we were tormented by mosquitoes, were also quite numerous, but none of them were blood thirsty; and we may add that where in South America were to be seen by the leaf-nosed species. So far as experience goes, we can say, with Bates, the vampire, so common on the Amazon, the most harmless of all bats. It has, however, a most hideous physiognomy. A grown specimen will measure twenty inches in expanse of wing. Bates found a species on the Amazon—one black, that of a ruddy hue, and both fruit-eaters. The nocturnal music of these is made by crickets and tree toads. The

the latter sounds like the cracking of wood. Occasionally frogs, owls and goat-suckers oak, hoot and wail. Between midnight and three A. M., almost perfect silence reigns. Early dawn the animal creation awakes with a scream. Pre-eminent are the discordant cries of monkeys and macaws. As the sun rises higher, one musician after another seeks the forest shade, and the morning concert ends at noon. In the heat of the day there is an all-pervading rustling sound, caused by the fluttering of myriad insects, and the gliding of lizards and snakes. At sunset parrots and monkeys resume their chatter for a season, and then give way to the noiseless flight of innumerable bats chasing to hawkmoth and beetle. There is scarcely a sound in a tropical forest which is joyous and cheering. The birds are usually silent; those that have voices utter a plaintive song, or hoarse shrill cry. Our door yards are far more melodious on a May morning. The most common birds on the Napo are macaws, parrots, toucans, and ciganas. The parrots, like the majority in South America, are of the green type. The toucan, peculiar to the New World, and distinguished by its enormous bill, is quarrelsome, imperious bird. It is clumsy and flight, but nimble in leaping from limb to limb. It hops on the ground like a robin, and makes a shrill yelling—*pia-po-o-co*. Ecoudians call it the *predicator*, or preacher, because it wags its head like a priest. The feathers of the breast are of a most brilliant yellow, orange and rose color, and the robes of the royal dames in Europe, in the sixteenth century, were trimmed with them. The cigana resembles a pheasant. The flesh has a risky odor; and it is for this reason, perhaps, that they exist in such numbers throughout the country. The Indians never eat them. In no country as in the Amazonian valley is there such a variety of insects; no where do we find species of larger size or greater beauty. The richest locality for butterflies; Bates found twelve hundred species in Brazil alone, three times as many as in all Europe. The splendid metallic-blue, and the yellow and transparent-winged, are very abundant in the Napo; some rise high in the air; others, living in societies, look like fluttering clouds. Moths are comparatively rare. The most conspicuous beetle on the river is a magnificent green species (*Chrysochroa chrysochlorata*), always found arboreal, like the majority of tropical coleopteris, they look like emerald gems clinging to the branches. There are two kinds of flies, the black and yellow. It is singular these Indians have no term for bees, but call them honey, and distinguish them by their color. The black species is said to make the best honey, and the yellow the best. The *adrupeds* of this region are few and far between in the dry season. Not a sloth nor *madillo* did we see. But when the rains descend the wilderness is a menagerie of tigers and leopards, pumas and bears, while a host of apes, led by the gigantic boa, creep forth on their hiding places. The most ferocious *quivivora* are found in the mountains, and the most venomous serpents haunt the lowlands. Darwin says that we ought not to expect any closer similarity between the organic beings on the opposite sides of the Andes than on the opposite shores of the ocean. We will remark that we obtained a peccary, a number of birds not accustomed to high flights, and five reptilian species, on the

Pacific slope, identical with species found on the Napo.

Memoirs of Mildred Ratliff.

(Continued from page 122.)

"1820. 4th mo 6th. At Woodbury Monthly Meeting. Here I thought we found a number of precisely exercised Friends. May this class everywhere, multiply more and more. From this place we had for our pilot to Haddonfield a beloved father in Israel, Joseph Clement, who is in his 83d year, and yet has a lively use of his faculties. He is an encouraging instance of the power of Divine truth. O how pleasant to meet with those who are green and alive in old age, at a time like this, when pure vital religion is so low.

"7th. At Haddonfield: which was a good meeting. Truth reigned over all.

"8th. At Upper Evesham Monthly Meeting, which appeared as hopeful perhaps as any we have been at. Yet even here, as was to be felt, all was not Israel that was of Israel. O when will it be that Friends will more generally try to keep to the principles we profess! Remained here over the next day.

"10th. At Evesham, which were both large meetings, and I hope seasons of profit to many who attended. This afternoon travelled on, and spent the night with D. and R. H. R., a son-in-law and daughter of our worthy friend Esther Collins, one of the two drowned in the Delaware river last winter, and found about thirteen days after, and brought to this house, her former residence. From here she was taken to the grave followed by many Friends, and was decently interred, leaving a sweet savor. Though she has gone from human sight, the remembrance of her christian example seems to sound in our ears the impressive language, Follow me as I have followed Christ the Lord, through this checkered scene from earth to heaven, where the wicked cease from troubling, and the weary spirit is at rest. The other dear creature, Ann Edwards, who was lost at the same time under the ice, is not yet found. But what matter, so that the immortal soul, with kindred spirits, is singing praises to God.

"11th. At Chester: a pretty large meeting and an opportunity of relief to my poor exercised mind. May I not say here in accordance with my prospect before I left home, I have found so far in this State, New Jersey, the Lord my God had a service for me, even poor little me, for so I feel and so I seem bound to state it. There are many Friends here, and a precious number that are well exercised. I love them much; and hope for an increase of this description: for that there is room for it, is indeed to be felt: too many appearing to be content with only the form. To-day we went to dine with dear Ann Stokes, a widow, whose life was mercifully spared, after being precipitated into the river at the same time that Esther Collins and Ann Edwards, with the carriage and horses, were lost under the ice. We staid awhile with her and her children to satisfaction; when she being our pilot, we came on to Henry Warrington's, the Friend who drove the carriage when the mournful occurrence took place as above related. We accounted it a favor to spend the night with this dear brother whose life was also spared to his wife and children a little longer. These visits to the Friends particularly concerned in this trying circumstance,

we felt moved in love and sympathy to make. They were received in mutually kind feelings, so that with thankfulness I can say we were comforted together. May we all so wisely act the little time remaining, as to have, through the mercy of our God, a happy eternity to spend together.

"12th. At Westfield, and 13th at Newtown; both pretty comfortable meetings, notwithstanding the low situation of things. This evening crossed the Delaware, and came to the city of Philadelphia in order to attend the Yearly Meeting.

"14th. Rested; making our homes at a well beloved Friend and brother John Cook's. Next day attended the Select Meeting, which was large indeed. The day following were at Twelfth street meeting in the morning, and Green street in the afternoon.

"From the 17th to the 21st, the Yearly Meeting was held, which was large and favored. Here we met with many dear friends whom we had seen before in their own neighborhoods; who not only at meeting, but at our lodgings, manifested they were glad to see us again, giving proof of reciprocal friendship more easily felt than expressed. We have now parted; and no doubt with many of us it will be a final farewell: they going to their respective homes, and we on our journey. And whilst viewing it as I do, both sides perhaps in their proper places, I am comforted in the hope that as we keep the faith, and maintain the warfare to the end, we shall again meet where parting will be no more, but where we shall have a happy eternity to spend together. So be it, so have it, O Holy Father, if it seem good in thy sight. But what do I say? I am made to wonder at myself that I should thus write, when I feel as I do at this present moment, stripped and very poor indeed; deprived of everything except a little faith; and that too at so low a state that it is hardly comparable to a grain of mustard seed.

"23d. Left the city, our beloved friend and brother John Cook being our pilot to Germantown. Our meeting there I think may be numbered with those wherein the excellent name of Israel's God was magnified in the hearts of a living remnant. Praise the Lord, O my soul, for he is good, for his mercies endure forever.

"This afternoon we parted with dear J. C., who returned home; and we went on accompanied by John Wistar to the house of a kind friend for lodging, where the Master's peace was to be felt, and where I am again bound to acknowledge, it is enough."

She attended meetings at Plymouth, Providence, Gwynedd, and Upper Dublin, after which she writes: "The blessed Master was, I believe it is safe to say, with us at each of these; but at the last Truth reigned over all. When this is felt to be the case, what cause for thanksgiving and praise. Praise the Lord, O my soul; praise and adore his great name for ever.

"28th. At Horsham, 29th, at Plumstead, 30th at Buckingham. Truth, divine truth at a low ebb in most or all of the places where our lots have been last cast. And yet Divine mercy, marvellous condescension, pity, and forbearance, so manifestly felt to flow from the Fountain Head have been such, that in looking back this afternoon as I lay on the bed to rest my feeble frame, all within me has been humbled, and my poor mind carried as

on the wings of eagles, in songs of thanksgiving and praise. So that my soul has afresh been favored to renew covenant with God, that if in his mercy he will be pleased to remember me, and go before, I will surely bow in humble dedication to serve him in time, and throughout eternity. For renewedly have I felt that he is worthy of more adoration than men or angels can ascribe."

She was at Solsbury Meeting 5th mo. 1st, and successively at Wrightstown, Wakefield, and Newtown, where she writes, "I can again say the Lord has been with us, and owned his work." From these she went to Middletown and Bristol; and was at the Falls Meeting on the morning of the 7th, and in the afternoon at Pennsbury. "These last two," she says, "were furnished with many guests, and I think it may be said of all descriptions. Everlasting power was my strength, and Truth reigned over all.

"9th. We crossed the Delaware river, and went to Trenton, New Jersey. Attended an appointed meeting there which was a painful one: yet I believe there were a few precious souls that were hungering and thirsting after righteousness. These through Divine aid were refreshed, and many others of a different description were reached. May the Lord be pleased to bless to these the fervent labor of his handmaid.

"10th. Visited a school of colored children, taught by a colored man, much to our satisfaction. Though I was more poorly than common, we went eight or nine miles towards the next meeting called Stony Brook, which on the 11th we attended.

"14th. We attended a little meeting at Squankum; and the day following one at Squan. At both of these there was more cause for mourning than for rejoicing, because of the situation of things; yet hope they were profitable seasons to some present. In the evening we felt a liberty to go a mile or two to look at the ocean, which afforded an opportunity, whilst our eyes were struck with admiration in beholding the great deep, to feel our spirits bowed in humble adoration towards the Former thereof.

"16th. Went on with a pilot to Shrewsbury Quarterly Meeting. Next day attended the Select Meeting; and on the 18th the Quarterly Meeting at large; and on the day following a public meeting. These were good meetings. Dear William Rickman was here, and came to-day to our lodgings."

On the 20th they rode forty miles to Rahway, and on the 21st were at their fore and afternoon meetings. The next day they went to Plainfield, and were at their meeting on the 23d. "All these," she remarks, "I think may be said to be good meetings."

(To be continued.)

Influence of Climate on Character.

Of the minor points of character [of the natives of Mysore in Southern India] there are two in particular which naturally excite the surprise of Englishmen in general: I mean the strong powers of *vis inertiae* displayed by natives, and the difficulty of exciting in them any appearance of wonder or surprise. The first is, I admit, very catching, and I was surprised to find the principle appearing in myself before I had been more than two years alone with the farmers of Munzerabad. As an instance of the kind of thing I am alluding

to, I may mention the following incident. One day, as I was seated amongst the fellers of a forest I was at that time clearing, a tree, from being somewhat bent and rather hollow, unexpectedly crashed down, and fell on the man who was cutting the lower side of it. The two men who had been cutting the upper side of the tree thereupon rested their axes on the stump, and one said to the other, "You pick him up," upon which the other replied, "You pick him up," and I looking up from a paper of Addison's which I was perusing at the time, said, "Why don't both of you pick him up?" The end of this was, that before any of the speakers in this dialogue moved hand or foot, a friend of the fallen man came forward and dragged him out. By an extraordinary piece of luck, the tree happened to have a deep bend in it exactly where it fell on the man, who consequently was not injured, but only half stunned by the blow. I am afraid this was very much the way with the Orissa famine, which was a case of "you pick him up, and why don't you pick him up, and why don't both of you pick him up." And I may observe further, that, as regards the principle of *vis inertiae*, all sorts of things that ought to be put down to it alone are traced to all manner of causes. All that apathy to the difficulties and wants of others, for instance, which people commonly assign to caste, has nothing to do with caste whatever, and that institution is simply made the scapegoat, or at least the excuse, for saving oneself trouble. Why don't you do this, and why don't you do that? It's against my caste, is the common excuse. Why don't you help this man, and why don't you help that man? And caste again comes in as the invariable excuse. I once saw a friend of mine in India about to sit down on a bench from which projected a nail, and I was inclined to mention that this projection might interfere with his comfort; but he hesitated as to whether he should sit down or not, and being impelled by *vis inertiae* to abstain from making my statement unnecessarily, I hesitated. In the meantime he sat down, and soon rose up, with an expression which seemed to indicate that the nail had produced unpleasant consequences, upon which I observed, "I saw you would probably sit down on that nail." My friend then asked me, why did I not tell him? Well, the thing was simply climate, which produces *vis inertiae*, and that was the explanation. Not long ago, when I was riding along a road in Scotland, I saw a mackintosh coat which had evidently been dropped. Thinking that some horse might shy at it, I got off with the view of putting it on one side of the road. It next occurred to me that the coat might belong to some poor man, who would be glad to have it back again, and I accordingly carried it on to the blacksmith's shop, and told the blacksmith to fix a notice on the smithy doors as to the finding of the coat. As I went along with the coat, I could not help ruminating on the causes that induced me to trouble myself about the coat at all, and wondered not a little at my taking an amount of trouble that a year or two ago, when in India, never could, I should think, have been displayed by me, or indeed any Anglo-Indian. But the whole thing was the result of climate.

In the awful day of account, it will be of unspeakable importance, that the blood of others is not found upon our garments.

WATCH AND PRAY.

Select

The Watcher stood on Carmel's height,
With eager, longing eyes,
Gazing across the sobbing sea,
Scanning the burning sky;
While with bowed head between his knees,
Scorch'd by the sun's fierce glow,
The Prophet, pressed with anguish sore,
Prayed in the vale below;

Watched for the coming of the cloud,
Prayed for the blessed rain
To shade the burning of the sky,
To cheer the earth again—
The cloud with wind, like breath of God
Among the thick tree-tops,
The rain, like rush of angel's wings,
Murmurous with pattering drops!

"Nothing! nothing!" the watcher cried—
"No cloud, no sign of rain!
The same fierce sun that burns the earth
Burns o'er the watery main.
Again the Prophet bowed his head
Between his knees and prayed,
Again the watcher's eye looked for
The blessing still delayed.

"Nothing! nothing!" the watcher cried—
"No cloud, no sign of rain!"
The Prophet, laboring in prayer
Bowed 'twixt his knees again;
And thus twice, thrice, seven times they strove,
With faith that cannot fail—
One watching in the mount above,
One wrestling in the vale!

Oh can it be the God whose breath
Burns like the consuming fire,
Scorching the earth and sky and sea
With blast of judgment fire,
Oh can it be the God whose flame
Consumes the sacrifice—
The wood, stones, water, all ablaze
In incense to the skies.

"Oh can it be this God whose wrath
Our prostrate souls approve,
So hurning in his holiness,
Is a God of love?
Oh Heaven! for thy rare mercy's sake,
Accept our sacrifice!
Dissolve this spell of burning war!
Oh melt these brazen skies!"

Seven times the two souls watched and prayed,
Seven times with faith and hope,
When from the sea a little cloud
Pushes its finger up!
A hand! a hand! a cloud formed hand!
The hand and God's chosen find
Always revealed to point before
When God is close behind!

And swelling in proportions vast,
Reveals an awful form;
God coming in his majesty,
God in the blessed storm;
Blackening the heavens with clouds and wind,
Pouring the welcome rain;
Filling the thirsty earth with floods
Of life and joy again!

Oh watchers on the mountain height,
Stand with eye steadfast there!
Oh wrestlers in the vale beneath,
Cease not your sevenfold prayer!
God will not always from—he will
Accept your sacrifice!
Of loving hearts and praying hands—
God will in love arise!

A finger, hand, an arm, a form
Of power and grace divine!
The heavens shall swell with blessed showers,
The earth with rain drops shine!
Oh dare with loving hearts bring
The sacrifice of blood!
While Hope stands watching on the mount,
And Faith lays hold on God!

Who can count the dust of Jacob and the number of the fourth part of Israel?

For "The Friend."

Getting off the True Foundation.

These recent remarks upon the merits of the late termed "Sunday Schools," have invited the writer, and as the criticisms by another religious society may tend to confirm the views of some amongst us upon their openness to objection as an appendage to the Society of Friends, he has thought it right to submit them to "The Friend" for publication, hoping for a serious and candid consideration of the compatibility of such associations for Friends' children, with the maintenance of our high profession of religion upon the secret, inward, immediate workings and leadings of the Holy Spirit, which is able to guide us into all truth. The first objection urged is that it interferes with the family; secondly, it diminishes the power of the pulpit over the people, especially the juveniles, by substituting its influence for that of the pulpit; thirdly, it has much *sensationalism* in its public demonstrations; that it is conducted more with respect to the enjoyment of the pupils than to personal profit; fourthly, that there is much effort at instruction (or explanation) and finally, that there is too much mystery and too much attention to method (artificial processes and by ingenious devices, which can only be done well by the instincts of a loving heart, and a benevolent zeal. The touch of a gentle worth ten thousand times more than an elaborate exposition of Bible truths is afforded."

It is further stated, that "at present the majority of christian parents in our land neglect their duty as respects the education of their children in the Bible was fulfilled, if their regular attendance at the school. By this transfer of their own duties to the Sabbath-school teacher, they injure themselves as well as their children, if because there is no way of teaching one's child knowledge so *sure* as undertaking to do the same to others."

We compare these views with some of the developments in First-day school associations among Friends, commencing with the idea that they lessen the interest in the object of meetings for worship, and the object of attaining it, and go on to that of "rich sensationalism" in conducting public demonstrations more with reference to *ceremonial enjoyment* than the real benefit to the children. Does not it seem like a waste of time when the delegates and interested in a First-day school conference separate themselves, say fifty in number, on their return from such an occasion, to engage a railroad car for the purpose, that they might sing, without let or hindrance, in it. And is there not the same objection to much machinery," found in these proceedings by those under our name, who draw the mind outward from the school-teacher, and fix the dependence upon outward literal instruction, instead of upon the openings of the Holy Spirit to the receptive mind? Have we not seen money, yes, the result of this endeavor to organize a system of meetings for religious instruction outside the divinely appointed ministry, the immediate revelation by the Spirit, to be productive of self-confidence and seemingly forwardness in our religious

meetings, lessening the dignity and solemnity of those interesting occasions? We read of two hundred and fifty persons having spoken in the space of half an hour in one of the late convention meetings at Wilmington, Ohio, and that it was recommended by one of the delegates to have all the meetings "opened by prayer."

We are at a loss to understand how such things can be reconciled with the profession of Quakerism: how formal prayers at stated times can be made to accord with the doctrine of the necessity for the *fresh* anointing for every spiritual exercise and service. Let us be assured there is something radically wrong amongst us, when such suggestions as this, and that the Holy Scriptures are our *supreme* rule, can be openly made, with impunity, so far as correction by their many sympathizers in religious labor is concerned. This setting up the Scriptures above the inward Teacher and Guide, is a departure from the true source of saving knowledge, as described by the Holy Head of the church to his believing disciple, which is *not* any outward testimony, but the revelation of the Holy Spirit. "Flesh and blood hath not revealed this unto thee, but my Father who is in heaven. Upon this rock will I build my church, and the gates of hell shall not prevail against it."

Some of us much younger than now, can well remember the simplicity of Friends in the care of their children in a religious way. How that in the family and in the school for literary instruction, the Scriptures were read and passages recited without any searching for the critical knowledge which "puffeth up," but simply leaving them to the opening of the Holy Spirit on the mind; looking to this for a lasting impression, rather than to any learned disquisitions upon their passages or contents. How much sweeter the effect of simple waiting upon God for his counsel concerning them, for the sealing of their truths by his Spirit upon our minds of some appropriate, comforting, or instructive portion. How sweet to hear in the mental ear, when in the midst of tribulation, such words of comfort as are sometimes sealed upon the mind by the blessed Remembrancer himself; how all knowledge acquired by literal explanations of Scripture truths or history from biblical knowledge for the inward experience of the convicting, converting efficacy of the grace of God, is well calculated to entice and lead them into that of self-exaltation, above the Divine witness, in its lowly, gentle manifestation in the secret of the soul. As calls to seek and rest in that knowledge which is imparted by the letter, there will be less humble prostration of soul, for that knowledge which is declared to be life eternal; even to Jesus Christ who is "the only true God and Lord, and lead them into that of self-exaltation, above the Divine witness, in its lowly, gentle manifestation in the secret of the soul. As calls to seek and rest in that knowledge which is imparted by the letter, there will be less humble prostration of soul, for that knowledge which is declared to be life eternal; even to Jesus Christ who is "the only true God and Lord, and lead them into that of self-exaltation, above the Divine witness, in its lowly, gentle manifestation in the secret of the soul. It is a Scripture testimony that "all shall be taught of the Lord, from the least of them to the greatest of them," so that there is no lack for a teacher to those whose eye and expectation are to Him."

Let me die the death of the righteous, and let my last end be like his.

The following extract from the Minutes of Indiana Yearly Meeting is published by request of Y. Warner, for the information of those who have contributed funds for the work among the Freedmen in which he is engaged:

"Report of the Superintendent of Tennessee schools to the Missionary Board of Indiana Yearly Meeting:

The operations in christian labor in Tennessee, and Alabama which are now subject to your care were commenced a year ago, at Maryville. A large school with a Normal class is now flourishing there; and twenty-four other schools, partly or wholly under our supervision, which with seven temporarily suspended or under negotiations, make thirty-two in all requiring attention. They are mostly located on, or near the Virginia, Tennessee and Georgia Rail Road.

The general aims and workings are. To help them to right living, and self development; to educt the whole Christian man, and especially to bring out teachers from their own ranks; to this end we take hold of the gifted ones, and in some cases assist them in boarding where they may attend the Normal classes.

We visit much in their families, and encourage them to train their children, and rule their houses, and their business, as becomes the christian believer.

Their spiritual needs are sought out; our sympathies go with them therein; and, in many communities, great openness is manifested for the reception of Gospel Truth.

We labor to arouse them to exert themselves to live economically, to clothe themselves properly, and lay up means to support their schools, families and meeting houses. We use opportunities to teach them profitable farming, gardening, stock management, and choice of seeds and plants.

We seek to reach the people in lonely and neglected places, where it is difficult to get schools, or, where opposition to them still exists. In some such, our labors have been most interesting, and most signally blessed.

We supply all the schools which we have care of, with books, &c., of the most approved kinds.

This book business will be the most costly part of our work, as the schools become self-supporting. The principal part of our business in the free school counties consists in supplying books and stationery, training and recommending teachers, advising with, and working with the public school officers, and in organizing and conducting the First-day schools, those schools being enumerated, in order to exhibit the true wants of the concern, as well as to indicate what goes with the money. It will be seen that no small amount is needed for furnishing books alone, to 1,719 children whom we now supply. A prominent and laborious part of our care is to reconcile party feuds, and unite the people in neighborhoods, so that they may heartily combine and sustain one good school, instead of two or three crippled ones. These feuds are often denominational."

Acceptable Works.—It is not the doing of things which is of value; but it is the doing of things in the virtue, in the life, in the power which comes from Christ, which is of acceptance with God, and of advantage to the soul.—I. P.

For "The Friend."

Oyster and Fruit Packing in Baltimore.

A writer in the New York Journal of Commerce gives an interesting account of the oyster business of Chesapeake Bay, from which the following particulars are gleaned. The oyster beds of this neighborhood are estimated to cover 373 square miles, and about 750 large boats carrying schooner canvases called pungies, and over 3000 little boats like Indian canoes, or "dogboats," are engaged in "catching" the oysters. The pungies are supplied with large oval baskets made of wire, swung and lowered or hoisted from a windlass in the centre of the boat, which is lowered open, like a clam-shell, going down and pulled up shut after it has filled with oysters. The canoe oystermen dredge with a pair of tongs, which look a good deal like two iron rakes crossed and riveted together about a foot or more from the heads. If a pungy crew have a successful trip, they catch a load of 1,000 bushels in two or three days. A canoe oysterman can soon fill his boat, because he cannot carry more than from five to forty bushels.

Probably Baltimore packs more oysters for shipment than any other city in the United States or Europe. There are about a hundred establishments here engaged in the business of packing oysters, fruits and vegetables.

C. S. Maltby has probably the largest establishment for packing raw oysters, and a description of it will show the *modus operandi* in that branch. The oysters are brought to the wharf in pungies. A windlass is fixed to the mast, baskets are loaded in the hold, and then hoisted by horse power to the dock, where they are placed on wheelbarrows and wheeled into the building. Here they are dumped into a long line of boxes, where men stand and open them, who are called "shuckers." C. S. Maltby employs 600 hands, 400 of whom are shuckers. From the shucker the oysters are taken to another room and washed. Then they are put into cans of different sizes by dippers. The filling is done with great rapidity. C. S. Maltby's workmen packing about 50,000 cans of raw a day. They are put up in tins about four inches wide, two inches thick and six inches high for one size, and double that size for double the quantity, or two pounds. They are packed for shipment in wooden cases fitting the box as to height, and wide enough to allow the introduction of two rows of boxes edgewise, and a long lump of ice sawed to fit a vacant space about five inches wide. Sawdust is thrown around the ice and the goods are shipped to agents in western and southwestern cities.

About two thirds of all the oysters packed are cooked. This is done in one large establishment by a very summary process. The oysters as they are unloaded from the vessels are thrown into lattice work cars, holding each about 25 bushels of oysters in the shell. These cars are then run from the dock into furnaces, each holding two cars, the doors are closed, and the oysters are steamed about ten minutes till the shells begin to open. Then the doors are opened and the cars pulled out. Immediately as many shuckers as can get around a car commence to open the oysters. As they work they keep shoving the car forward slowly, and by the time the next two car loads are steamed, the car is at the end of its journey, empty. The oysterman unloading 2,000 bushels a day, the shuckers work-

ing incessantly, barrowmen wheeling shells away and the tally man examining and measuring the oysters, all combined furnish a picture that is strange and interesting. Each shucker deposits his gallon of oysters in the examining and measuring basin, receives his check, and at the end of the week presents his checks at the office for redemption. Steamed oysters are opened much more readily than the raw, and the allowance per gallon for work is much less. Cooked oysters are packed in round cans. They are poured into the cans, sealed, and the cans put into hot water, in large boilers which have water enough in them to come nearly to the top of the can. The process of sealing is then finished. In capping the can before it is put into the water, a small perforation is left in the centre of the top. From this little hole all the air is forced out by action of the hot water, and the tinker, with his soldering material, soon closes that, and puts an end to the process of hermetically sealing. In this condition the cans will keep a year or two. In order to get rid of the shells profitably, a large quantity of them are annually converted into lime, and the half burnt shells which remain are disposed of to farmers for putting on their land.

During the season in which oysters are not collected several of the establishments turn their attention to preserving and pickling fruits and vegetables. The business done in these articles is also very large. One firm alone, besides opening 200,000 baskets of oysters, is stated to have put up over three millions of pickles of different kinds, purchased 16,000 bushels of peaches, 30,000 bushels of tomatoes, 8,500 bushels of pears; spent \$14,000 for berries, and paid \$21,000 for jelly glasses and pickle jars. The business of manufacturing tin cans is also a very large one in Baltimore, twenty millions of these cans it is estimated being used annually.

Selected.

I earnestly desire that the friends of God would be diligent in stirring up their children and family frequently to read the Holy Scriptures and the writings of our ancient departed Friends, which are an eminent vindication of the Divine authority of that blessed book upon the experience of those faithful ministers and servants of Christ. And that all who make profession of the holy and blessed Truth in the inward parts, would make the lives and labors of those worthies of the Lord their lively and constant examples in their known seriousness, retirement, silence, self-denial, temperance, humility, meekness, tenderness, brotherly-kindness, and sincerity to God and his people; that so there may be a succession in sobriety, righteousness and godliness, which is the very sum and substance of religion; and that one generation may become heirs in holiness to another, till days be no more, and time be swallowed up in eternity.
—William Penn.

Singular Intelligence in a Dog.—The editor of the *British Workman* says, Mr. Adsheld, one of our Derbyshire correspondents writes: "I live in the country, and have often occasion to be from home for weeks together. During my absence my dog (a very valuable one of the bull and terrier breed) displays an amount of sagacity, which to me is quite as interesting as it is singular. During my stay at home he quietly sleeps in the back kitchen,

but on the night of the day that I leave he makes his way up stairs to the bedchamber where by wife sleeps, when he creeps on the bed, and from thence he will neither coax nor driven until the morning, as much as to say, 'I know your natural protection is gone, so here I will remain and do the best I can to guard you.' This the dog does every night until my return, when he goes back his old quarters in the kitchen, and there remains until I again take my departure.

"He has not been taught to act thus, and I can only refer his conduct to that sagacious apprehension of consequences which has many dogs aforesaid to place themselves in situations where they have become the means of saving life, and defending property."

A Shrewd Reply.—Walter Scott says the alleged origin of the invention of champagne produced one of the shrewdest replies he heard given in evidence. It was made Dr. Gregory, at Edinburg, to a countess great eminence at the Scottish bar. The doctor's testimony went to prove the insanity of the party whose mental capacity was in point at issue. On a cross-interrogation admitted that the person in question pit admirably at whist. "And you say, doctor," said the learned counsel, "a person having a superior capacity is game so difficult, and which requires pre-eminence degree, memory, judgment, combination, can be at the same time ranged in his understanding?" "I a card player," said the doctor, with great address, "but I have read in history that were invented for the amusement of an king." The consequences of this reply decisive.

As in the natural world the elements storm are gathering when we perceive not, so in the spiritual world, sins are separating between us and God, and we not our sad estate. Many think all is until to their surprise their day is turned night, and their mirth into heaviness. To their grief they find their enemies are them, and themselves shorn of the leaf of their strength.

Anecdote of Napoleon Bonaparte.—When a daring and ambitious soldier was about to invade Russia, a person who had endeavored to dissuade him from his purpose, finding he could not prevail, quoted to him the proverb, "Man proposes, but God disposes;" to be indignantly replied, "I dispose as I propose." A Christian woman on the impious boast, remarked, "I set the example as the turning-point of Bonaparte's fate. God will not suffer a creature with impunity to usurp his prerogative." It happened to Bonaparte just as was predicted. The invasion of Russia was the commencement of his downfall.

John Newton being asked what the best rule for female dress and behavior should be: "So dress and so conduct that persons who have been in your company shall not recollect what you had on." It will generally be the case where simplicity of dress is avoided, and where integrity of mind and gentleness of manners is neglected.

THE FRIEND.

TWELFTH MONTH 23, 1871.

School education is a subject which has steadily claimed and continues to claim a large share of attention and interest. This is a fact noted not only among those professionally engaged in shaping and conducting it, but the public mind, in this country, has long become aroused to the importance of bringing up the child in the Commonwealth more under its influence, and has stimulated the State Governments to enter resolutely on the plan of organizing and perfecting a system deemed adequate to perform the work sought to be accomplished.

In the attempts to grasp and work out a system so enormous in its magnitude and so involving in its ramifications, it was to be expected that defects and deficiencies would be developed, as experience tested the working of the system adopted; and that changes in theory and practice might be demanded for a more healthful and efficient production of the good effects aimed at.

We sympathize with the general sentiment in favor of the school education of all classes of our community, and highly estimate such active enactments, as appear likely to give the boon to the humblest and the poorest; but we strongly question the precariousness of benefits over the evils, connected with a system of school education applicable to the whole people, carried on under the authority and patronage, and at the public expense. Without attempting to interfere at the present time what will probably be effected upon parents and their children, we believe the former, who have the pecuniary responsibility and ought to feel the religious obligation, from the care and expense of the schooling of their offspring, and entrusting their children to others selected and paid by State officers, upon the latter from their being associated with the indiscriminate assemblages of the State's proteges, and trained in accordance with the method prescribed by men elected by popular vote, we wish to present some of the considerations connected with the subject, calling for serious thoughtfulness.

In a Republic like ours, where there is no coercion allowed between church and State, and no little jealousy exists in the different religious denominations, one of another, it is properly provided that every "public school" be altogether independent of any religious sect, and that no denominational views or feelings shall be taught therein. This has been done so far, that in many of the district schools, though the Scriptures are allowed to be read, yet so strongly is it impressed that secular instruction is all that is to be given, and that it is a matter of grave doubt, whether schoolmasters regard what they may hear read in the Bible and Testament, in a much different light than they do expositions of literature or science they are called on to listen to. Without taking into account the influence of free-thinking proclivities, said to be frequently found among many of the teachers, especially in the city schools—it may be very certainly assumed, that where all religious instruction is systematically and persistently excluded from a system of education, religion itself will soon become not only ignored for the present, but both in-

structors and learners will come to consider this exclusion of it as equivalent to a denial of its value or importance. There is reason to fear that this is the slow and silent effect, being produced by the working of the "public school" system, in some, if not many places; and it becomes a serious question how far these seminaries will contribute to implanting principles in the minds of the rising generation that will sustain the Christianity of the country.

We wish to call the attention of our readers, especially those of them who may be placing their children in the "District Schools," to the attitude of these schools towards those religious principles, the inculcation of which has heretofore been a strong motive force in the educational work of Friends, even in their system of elementary instruction. Let them reflect that education, if intelligent and effective, must always bring the mind of the teacher to bear on the mind of the scholar; so that while imparting knowledge, he may in measure mould the latter to the features and mode of reasoning of the former. If then the scholar observes that his teacher, or all his teachers studiously avoid all efforts to indoctrinate him with the truths of christianity, or to impress their practical effects on his conduct and habits of life, he will almost inevitably follow the same course, and learn to think they may be ignored or disregarded.

Those who partake in the educational enthusiasm, and rejoice in the public school system, but who cannot close their eyes to the dangers attending the exclusion of religious instruction and training, during that most important period of life, when the mind is most susceptible to impressions of good or evil, attempt to satisfy themselves by alleging that all religious teaching and influence ought properly to be relegated to the parents and guardians at home. It is true that these delegated shepherds ought in no case to be held excusable for neglecting this highly important duty, or for attempting to shift its performance on to others. But what parent conscientiously sensitive to his responsibility in this respect, can believe he is acting up to the measure of his religious guardianship, and discharging his duty to the children entrusted to him, if month after month and year after year, he is sending them to mingle, in the impressive intimacy of school day life, with an heterogeneous crowd, whose school education is conducted on a principle which is eminently fitted to develop or confirm the belief, that religious instruction is at least of so doubtful a character, as justifies the teachers and the public in not tolerating it. Where it is likely the deepest and most lasting impressions will be made on the mind of the child; at home, where, during the little time his studies allow him, he may come under whatever religious influence pervades the family circle, or in the school room, where all those he looks up to for instruction and guidance, banish religious teachings as a subject with which they have nothing to do, and the language and manners of his companions give evidence they have learned to think or to care little or nothing about it? How easily will the impatient and impulsive child learn to think that the religious tone and discipline of his father's house, if such are aimed at, are needlessly strict and disagreeably irksome, and in the notion of the kind of liberty virtually taught and practised where he is expected to

learn the most, embrace the opportunities for disregarding precepts which he imagines are designed to debar him of pleasures he may enjoy, and throw off the restraints intended to preserve him.

How widely different is this from the school education the Society of Friends has always been concerned to have established among its members. It has labored to have combined with literary and scientific instruction, what may be called the spiritual element, evoking religious training and influence, by which education may not only develop the mental faculties, and store the mind with literary or scientific knowledge, but impress on the pupil a proper sense of his relation to his Maker, and to his fellows, and the duties and restrictions incumbent on him as a member of a christian community. This does not consist in giving a certain amount of theological instruction, but while imbuing the mind with the principles and truths of the gospel, striving to lead their recipient, by precept and example, to a practical understanding of the characteristic provision in the present dispensation; the presence of a measure of Divine Grace in the heart, by attention and obedience to which communion is held with the Father of spirits, his will is made known, and strength obtained to do it, and thereby to become a partaker of that salvation of which Christ is the author and finisher.

No little zeal is professed for the discovery and diffusion of truth among the people, in order to impress the public mind with an intellectual sense of the need of religion, for the culture and preservation of national prosperity and individual happiness. It must not however be overlooked, that such has been the effect of the fall on all the descendants of Adam, that a cloud rests on our intellectual powers, which precludes our attaining saving, spiritual knowledge, unless the illumination and power of Divine Grace are allowed to operate on the soul for the removal of its sin-begotten diseases; and no system of education will develop and harmonize the elements of public prosperity and private good and happiness, unless it embraces the principles of sound religious belief, and training in the self-denying requirements of the gospel of Christ.

It is not true to say that man is the creature of circumstances, but it is true that secondary causes give a direction and tone to his thoughts and feelings, often lasting through life, and impressing the character almost indelibly for good or evil. The feelings and imagination of a child are prone to take deep impressions from outward objects and circumstances, and it is of the utmost consequence that while he is storing his mind with knowledge, he should be kept under the continued quiet ministry of consistent example, exemplifying and inculcating the super-excellence of that learning which is acquired only in the school of Christ.

SUMMARY OF EVENTS.

FOREIGN.—The latest London dispatches represent the condition of the Prince of Wales so much changed for the better that his recovery is now fully expected.

The strike of the telegraph operators failed, and nearly all have resumed work.

The London Times contradicts the report that the United States Government intends to recall R. C. Schenck, Minister to England.

Lord Chief Justice Cockburn has gone to Geneva to attend the preliminary meeting of the board of arbitration appointed under the Treaty of Washington.

A dispatch by the telegraph line of the Southern and Red Sea Cable, announces the successful observation of the total eclipse of the sun in the southern hemisphere. The photographs of corona obtained are reported as perfect; and the result conclusive respecting some points which astronomers thought needed a more thorough demonstration.

The British Foreign Office has sent instructions to all its agents abroad to investigate the organization of the various branches of the International Society in the countries to which they are accredited, and report thereon to the government.

A London dispatch of the 19th says: The progress of the Prince of Wales toward convalescence is pronounced to be satisfactory, and it is announced that he will probably be able to go out in three or four days.

The French bark Costa Rica, was run into on the night of the 15th, off the Isle of Night, by an unknown vessel. She was sunk, with her crew, carrying down with her seventeen of the crew. The unknown vessel hurried off and made no attempt to render assistance.

London, 12th mo. 18th.—Consols, 92½. U. S. 5-20's of 1862, 92½; of 1867, 93½; ten-forties, 91½.

Liverpool.—100 lbs. cotton, 104; Orleans, 10½.

A Paris dispatch of the 16th reports another interview between President Thiers and the Orleans princes, which lasted an hour and a half, and was of an unfriendly character. President Thiers complained especially that the Duc d'Anjou had not strictly observed the terms of the previous agreement, and had endeavored to interest the French general in his favor. This was denied by the Duc d'Anjou.

A majority of the Assembly is still adverse to a return to Paris. It is however reported that an arrangement is likely to be effected, under which the executive department will take up its quarters in Paris, while the Assembly remains at Versailles.

The committee on reorganization of the army, has agreed to exempt from compulsory military service all ecclesiastics and heads of commercial establishments.

The National Assembly has adopted, by a vote of 267 to 17, a resolution that the committee have charge of the subject, for alienation to the State of the crown jewels.

The Emperor and Empress of Brazil arrived in Paris on the 15th inst.

The federal assembly has passed a bill interdicting the removal of Jewish communities, or the employment of desmits as doctors of medicine.

The tribunal of arbitration of the Alamaia claims assembled in Geneva on the 15th inst. The British and American cases were presented, and without argument an adjournment took place.

The second Chamber of the Lower House of States General of the Netherlands has adopted the treaty recently negotiated with Great Britain for the transfer of the island of Sumatra to the latter power.

The Italian journal shows a large deficiency. A Berlin dispatch says, the message of President Thiers to the Assembly is regarded as a fresh pledge of the pacific intentions of the French government. Von Arnim has been appointed German Ambassador to France, and leaves in a few days for Versailles.

General De Rodas, late captain general of Cuba, has returned to Madrid. The ex-Express Engine has gone from Madrid to Gibraltar, where she will take a short tour for England.

Fifteen thousand Cuban insurgents have surrendered during the past year in the Central Department, and state individually and collectively, that they are ready to perform whatever duty may be required of them as loyal Spaniards. Small bands of the insurgents still prolong a kind of desultory warfare.

A German dispatch of the 18th says, the commissioners for the arbitration of the Alamaia claims held a formal meeting to-day. Count Selapis, the Italian member, was chosen president, and the Commission adjourned until the 15th of June.

There was a long and heated debate in the French Assembly on the 18th inst., upon the right of the Orleans Princes to seats in that body. President Thiers was absent, but Casimir Perrier, who represented him, said, "While Thiers does not insist that the Princes are under any binding engagement not to sit in the Assembly, he cannot prevent them from doing their private profit to do so." The members of the "Right" (the "Left," and of the "Union Republicans" oppose the admission of the Orleans Princes. After much debate, a motion which skillfully avoids all advice and responsibility upon the subject, was passed with but two dissenting votes.

In a recent report issued by the Gazette of India the startling statement is made that the aggregate number

of deaths by wild beasts throughout the provinces of Madras, Bombay, Bengal, the northwestern provinces, Punjab, Oude, and the present provinces of Hyderabad and British Burmah, for three years, amount to 12,574. The deaths from snake-bites over the same area number 25,664, making a total of 38,218.

UNITED STATES.—Attorney General Akerman has notified 104 citizens, the resignation to take effect on the 10th of first mo. 1872. The President has appointed George H. Williams, of Oregon, to succeed him, and the appointment was confirmed by the unanimous vote of the Senate.

The House of Representatives has adopted the appropriation bill, providing that the House shall consist of 283 members. The House has also adopted a bill authorizing the Secretary of the Treasury to purchase at private sale or by condemnation, the remainder of the square of ground on which the post-office building in Chicago recently stood, and if the same cannot be purchased at a reasonable price, then to purchase some other square, and to erect thereon a two-story fire-proof building for the accommodation of the custom-house, sub-treasury, government offices, United States courts, and pension and internal revenue office. The bill appropriates \$2,000,000, and provides that the total amount of such buildings shall not exceed \$4,000,000. Both Houses have agreed to adjourn from 12th mo. 21st to 1st mo. 8th, 1872.

Miscellaneous.—The entire expense of taking and compiling the census of 1870, was \$3,287,600.

It is estimated that at least 600,000 cattle have died in the West Texas this year into Kansas, Nebraska, and the western States. In an extensive country, between the Rocky Mountains and the Mississippi, the Indians receive beef on government account from Texas. For this purpose about 200,000 head are required annually.

The department of agriculture estimates the cotton crop of 1871 at 3,400,000 bales.

The corn crop on the whole is about an average in yield, and in view of the increased acreage planted, a large one. The total estimated product is 1,092,000,000 bushels.

The wool clip of the United States for the year ending 6th mo. 1st, 1870, as returned to the census office, sums up an aggregate of 101,284,678 pounds; New England States, 6,643,863 pounds; the Middle States, 17,991,085 pounds; North Western States, 47,429,047 pounds; Border States, 9,744,233 pounds; Cotton States, 4,094,269 pounds; Pacific States (California Oregon, &c.), 8,472,581 pounds; Western Territories, 1,204,590 pounds.

The interments in Philadelphia last week numbered 512. There were 211 deaths from small pox; 44 from consumption; 24 inflammation of the lungs; 17 convulsions; 10 apoplexy, and 14 old age.

The population of Pennsylvania was reduced \$2,131,590 during the year ending 11th mo. 30th last, leaving the amount \$28,980,072. The securities in the treasury as an offset to part of the debt, consist of six millions of dollars of Pennsylvania Railroad bonds, and three and a half millions of Snyburny and Erie Railroad bonds.

The Senate has appointed a Committee of Investigation and Retrenchment, to inquire into the expenditures in all branches of the office of the United States, and report whether any and what salaries or allowances ought to be reduced; whether any and what modes of procuring accountability in public officers or agents in the care and disbursement of public moneys; whether money has been paid out illegally; whether any officers or agents or other persons have been or are employed in the public service without authority of law or unnecessarily, and generally how and to what extent the expenses of the service of the country may and ought to be cut down.

The Markets, &c.—The following were the quotations on the 18th inst. New York.—American gold, 109½ 109½; U. S. sixes, 188½, 117½; ditto, 5-20's, 186½, 115½; ditto, 10-40, 5 per cents, 109½; Superfine flour, \$5.75 a \$6.10; finer brands, \$6.25 a \$10.80. White Michigan wheat, to what extent the western, \$1.61; No. 2 Milwaukee spring, \$1.52 a \$1.53. Western barley, 90 cts. Oats, 50 cts. New western mixed corn, 76 cts.; old, 79 cts. Philadelphia.—Middlings cotton, 20 a 20½ cents; New Orleans, 21 a 21½ cents. Superfine flour, \$5.25 a \$5.75; finer brands, \$5.75 a \$10.80. Western, 90 cts. Oats, 50 cts. \$1.57 a \$1.61. Pennsylvania red wheat, \$1.54 a 90 cts. Clover seed, 10 a 11½ cts. Timothy, \$8.25 per bushel. Beef cattle were in demand at an advance. About 2200 head arrived and were sold at \$1 a 91 cts. extra, 7 a 7½ cts. for fair to good, and 5 a 6½ cts. per lb. gross for common. About 12,000 sheep sold at \$4

cts. per lb. gross for extra, and fair to good, 5½ a 6½ cts. Hogs, 86 a \$6.75 per 100 lb. net. Chicago.—No. spring wheat, \$1.24½; No. 2 do., \$1.19; No. 3, \$1.10. No. 2 mixed corn, 41 cts. No. 2 oats, 31 cts. St. Louis.—Winter superfine flour, \$5.95; double extra, \$6.60. No. 2 red winter wheat, \$1.55; No. 2 spring, \$1.25. No. 2 mixed corn, 44 cts. Barley, 70 a 75 cts. Rye, 73 a 74 cts. Lard, 83 cts. Cincinnati.—No. winter red wheat, \$1.42 a \$1.43. Corn, 44 a 46 cts. Baltimore.—Southern flour, common fair, \$1.53. \$1.55. White corn, 64 a 65 cts.; yellow, 66 a 70 cts. Oats, 50 a 55 cts. Lard, 10 cts.

ERRATUM.

A typographical error occurs in the article on "The kinds of Ministry," page 126, in the 16th number, the 18th line from the beginning, Paul should be Paul. The passage immediately following, with quotation marks, is not however correctly taken from Scripture. Job says, "For I know that my Redeemer liveth," a our Saviour declared to his disciples, "Because I live, ye shall live also." From the two the passage is made up, and is often used as if it was a quotation from the Bible.

AN APPEAL.

By recent accounts from the South, we learn that Freedmen, both old and young, are in a very suffering condition. Many children are prevented from attending school by want of necessary clothing.

Many Friends would contribute new or part-worn clothing, including shoes, they would be thankful to receive. Any such donations will be made to the Office of the Friends' Freedmen's Association, 116 N. Fourth would be immediately forwarded to suffering people.

On behalf of the Women's Aid Association,
SARAH LEWIS, Secretary.

FRIENDS' BOARDING SCHOOL FOR INDIAN CHILDREN, TENNESSEE, NEW YORK.

A suitable Friend and his wife are wanted to charge this institution, and to manage the Farm on the premises. Application may be made to the Office of Ebenezer Wood, Marshallton, Chester Co., Pa. Thomas Wistar, Fox Chase P. O., Philadelphia Samuel Morris, Olney P. O., do. Joseph Scattergood, 418 Spruce Street, do.

FRIENDS' ASYLUM FOR THE INSANE.

Now in Frankford, (Twenty-third Ward,) Philadelphia Physician and Superintendent—JOSHUA H. WOODINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

MARRIED.

MARRIED, on the 28th ultimo, at Friends Meeting house Sixth and Noble Sts.—WESTLEY NEWCOMB, JOSEPHINE, daughter of the late James M. Cooper.

DIED, in this city, on the 13th of Third month last, SARAH J. widow of Ely Welding, aged 92 years two months, an esteemed member of the Monthly Meeting of Friends in the Western District. She left behind her a large family of children, and many dear friends the consoling assurance, that her husband was in the arms of God prepared, "a house not made with hands eternal in the heavens."

On the 1st of Eleventh mo., at the residence of a relative in Germantown, Pa., while on a visit to his friends, SAMUEL FERRIS, the 50th year of his age, a member of Salem Monthly and Particular Meeting, Ohio. This dear Friend was enabled to bear his illness with christian patience and resignation. Thankful and love seemed to be the clothing of his spirit. He suddenly seized with great oppression, he remarked that he was thinking, and desired all to be quiet. When asked if he felt peace, he answered, Yes. His mind was preserved calm and to the last. His removal is deeply felt by his family and friends; yet they reverently believe, that thro' the redeeming love and mercy he is safely gathered to the conflicts of time to rest and peace.

On the 8th mo. 31st, 1871, at his residence in Medford, N. J., ELIZABETH E., wife of Elwood Haines, in the 65th year of her age, an esteemed member of Upper Evesham Monthly Meeting. The removal of dear Friend is keenly felt by her bereaved family and friends, but they have the consoling belief that she has been called, and that her loss is her eternal gain.

WILLIAM H. PILE, PRINTER,
No. 422 Walnut Street.

THE FRIEND.

A RELIGIOUS AND LITERARY JOURNAL.

OL. XLV.

SEVENTH-DAY, TWELFTH MONTH 30, 1871.

NO. 19.

PUBLISHED WEEKLY.

Two Dollars per annum, if paid in advance. Two dollars and fifty cents, if not paid in advance.

Subscriptions and Payments received by

JOHN S. STOKES,

NO. 116 NORTH FOURTH STREET, UP STAIRS,
PHILADELPHIA.

Single Copies, when paid quarterly in advance, five cents.

Inwardness.

For "The Friend."

A day when the thirst for new things, the desire for change is leading to a dis-
ance of ancient landmarks, as well as at-
tempted emancipation from tried ways and
-honored principles, whereby also the tes-
nities and wisdom of our worthy predeces-
sors are not only called in question, but seem-
ly by some to be trodden under foot, it is
to turn from such soaring imitation-work
to the good old way of inwardness and hum-
-obedience at the feet of Jesus, with our
-s in the dust before Him, if so be there
-to be hope. It is in this way we are as-
-ured that all His must be taught, because,
-s the Apostle, "That which may be
-own of God, is manifest in him (in man);
-od hath shown it unto him." And again,
-at which was from the beginning, which
-ave heard, which we have seen with our
-ys, which we have looked upon, and our
-ads have handled of the word of life; that
-eure we unto you," &c.

As an antidote, is not the call of this
-nto more inwardness; and to patient
-ving on and for Christ for the renewal of
-spiritual strength. "Oh this inwardness,
- inwardness," says an ancient worthy, "is
-ut writing amongst the Lord's people!"
-ut writer perhaps is not far out of the way
-n supposing, there never was a time when
-we were more called to inward fasting, and
-rayer, and wrestling before our secret-seeing
-ther, for the leaving power of His Spirit;
-ther, when, with spiritual application, we
-ould more heed the message of the angel:
-se, and measure the temple of God, and
-at altar, and them that worship therein."
-ut never likewise, it may be, was the tempta-
-ion more strong to rest in "the court which
-s without;" concerning which, the command
-s, "leave out, and measure it not; for it
-s into the Gentiles."—the outward, un-
-mified Jew or heathen.

George Fox, from obedience to the living
-Teacher in his heart, and in realization of the
-promise, "They shall not teach every man his
-neighbour, and every man his brother saying,
-know the Lord, for all shall know me from
-the least unto the greatest," thus writes:—
-and when all my hopes in them (the priests)

and in all men were gone, so that I had *nothing outwardly* to help me, nor could tell me what to do, then, oh, then, I heard a voice which said, 'There is one, even Christ Jesus, that can speak to thy condition;' and when I heard it my heart did leap for joy."

He then opens to the reader, why the Lord did not allow him to obtain the desired help or sympathy from others in his lonely and tried condition; even that Jesus Christ alone "in whom are hid all the treasures of wisdom and knowledge," and who enlightens, and gives grace, faith and power, might have the pre-eminence, instruct, and become all in all to him. Thus was he experimentally taught; whereby his desires after the Lord grew stronger, and also his zeal in the pure knowledge of God, and of Christ alone, without the help of any man, book, or writing.

"For though I read the Scriptures," he says, "that speak of Christ and of God, yet I know him not but by revelation, as he who hath the key did open, and as the *Father of life drew me to the Son by his Spirit*. Thus the Lord gently led me along, and let me see his love, which is endless and eternal, surpassing all the knowledge that men have in their natural state, or can get by history or books." * * * "I saw, he continues, that professors, priests, and people, were whole and at ease in that condition which was *my misery*, and they loved that which I would have been rid of. But the Lord did say my desires upon himself, *from whom my help came*, and my care was cast upon him alone." Therefore, in humble trust and confidence he thus encourages the reader: "All wait patiently upon the Lord, *whatsoever condition you be in*; wait in the *grace and truth that come by Jesus*; for if ye do so, there is a promise to you, and the Lord God will fulfil it in you."

Never did words of truth and soberness seem more fitting and applicable to any age and generation than are these to the members of our Society in this! Would that we might all heed the hortatory precept of this well instructed father in Israel, unto the consideration of our ways and works, whether they are wrought in God, and whether we are with due discrimination, wisdom, and prudence, building the spiritual house upon that rock and foundation which the winds and waves cannot overturn. Is there not obvious need of having our attention turned more within; where He who stands at the door of the heart and knocks, will, if permitted to enter, set up His kingdom, consisting in righteousness, and peace, and joy in the Holy Ghost, and omnipotently reign? God the Father manifests the Son in our hearts, as the Light, and Life, and Way; and there gives us strength to believe in Him as the propitiatory sacrifice for our sins, whereby we are put into a capacity for salvation through repentance, faith, and obedience after the power of an endless life.

"Men can readily take up a profession of

faith in a suffering Saviour, says one, nay, bring themselves to trust in an outward covering of His merits and righteousness for salvation, because this costs them nothing; but to be clothed with His Spirit of humility, poverty, and self-denial; to renounce their own wills in His lowliness, meekness, and total resignation to the will of God; to mortify the fleshly appetites; to be crucified to the world; to strip ourselves of all complacency and satisfaction in these endowments, whether natural or acquired, which appear great and glorious in the eyes both of ourselves and others; and, in a word, to take up their cross, and follow Christ in the regeneration—these are hard sayings, they cannot bear them; but Wisdom is justified of her children. Unacceptable are these doctrines are to others, yet to them (Wisdom's children) and in them too, they are the power of God and the wisdom of God."

A living and saving faith in Christ the Lord, that will uphold and preserve when the storms of trial and conflict come, is no mere outward stay or hope in the form of a literal knowledge or an intellectual belief, which can be gotten up almost at will; neither is it any superficial, half and half work, as a "garment mingled of linen and woolen;" nor anything short of entire submission and obedience to the grace of God which cometh by, and is given unto us by Jesus Christ, and which bringeth salvation. No; but it is the inward, experimental and saving knowledge communicated by the Saviour's life-giving Spirit in the heart. "No man can come unto me," saith He, "except the Father which hath sent me draw him," &c. It is this inward drawing, this in-speaking, still small voice of "the Amen, the faithful and true Witness," that can alone open the heart, convict for sin, and give life and light to our poor benighted souls. It is to be found in no "outward observation" whatsoever; but in the teachableness and obedience of a little child, to which the Father, through the quickening spirit of His beloved Son, will reveal that distinct knowledge of the *object of faith*, by which alone we can have any faith at all. For, is not the "one faith," with the all things else dispensed to us the gift of God too? And must not our dark hearts be illumined by the Day Spring from on high, before we can see aught pertaining to salvation, or know or do anything for God? For what can manifest or detect evil within us, but that saving light and grace which showeth what is evil? Which agrees well with an exhortation of the worthy and pious William Law: "God is no otherwise your God but as he is the God of your life, manifested in it; and he can no otherwise be the God of your life but as His Spirit is living within you." * * * Seek therefore, *for no other road, nor call anything the way to God, but solely that which his eternal, all-creating Word and Spirit work within you.*

One of the Christian reformers thus writes:

"God, intending to reform the church, begins with the heart; and, intending to reform the heart, puts his Word there; and that living Word put into the heart reforms it indeed. The word whereby Christ reforms, is *not* the word without us, as the word of the law is; but the word within us, as it is written, 'The Word is nigh thee, even in thy mouth and in thy heart,' and this is the 'word of faith.' If thou live under the word many years, and it come not into thy heart, it will never change thee, nor reform thee. And, therefore, the reforming Word is the Word within us, and the word within us is 'the word of faith.'"

This Word is represented by the apostle as "Quick and powerful and sharper than any two-edged sword," to the dividing in us between that which serveth God and that which serveth him not. This living Word that was, and is, and without end shall be—the Alpha and Omega of all—is declared to be "The true Light, which lighteneth every man that cometh into the world." Again, "In him (the Word) was life, and the life was the light of men." It is this light of the Word, or of the Lord Jesus which shineth in darkness or in our dark hearts, that maketh manifest all that is reprobable, showing us what is His will concerning us. If we believe in, receive, and obey it in its smaller or larger manifestations, it becomes as a shining light in us, which shineth more and more unto the perfect day. O! the danger there is of allowing human reason, with any substitution, or expedient motive whatever to take the place of this manifestation of the Saviour within us to guide our feet in the way of true peace. It is this light of Christ, or His inward illumination in the heart, that sets our sins in order before us, and casts up the narrow way of obedience to the cross of the Lord Jesus, as the only one of safety for us to walk in. It was this light which shined round about the Apostle Paul in the way to Damascus, and which he was sent to turn people to, even from darkness (our natural state) to light; and from the power of Satan (who ruleth in the children of disobedience) unto God.

Seeing then that in inward stillness, in quietness, and in confidence, our faith and strength are renewed, how should inwardness with our Emmanuel be the motto and watchword, "Till we all come in the unity of the faith, and the knowledge of the Son of God unto a perfect man, unto our measure of the stature of the fullness of Christ."

Industry of Luther.—From 1517 to 1526, the first ten years of the reformation, the number of Luther's publications was three hundred; from 1527 to 1536, the second decade, the number was two hundred and thirty-two; and 1537 to 1546, the year of his death, the number was one hundred and eighty-three. In twenty-nine years and four months he published seven hundred and fifteen books, an average of more than twenty-five a year. He did not go through the manual labor of all this writing, it is true, for many of his published works were taken down from his lips by his friends; and it is also true, that several of the volumes were small enough in size to be denominated pamphlets, but many of them are also large and elaborate treatises. In the circumstances in which he wrote, his translation of the Bible alone, would have been a gigantic task, even if he had his lifetime to devote to it.

For "The Friend."

A Sure Foundation.

On the carriage road between Philadelphia and West Chester, some thirteen miles from the city, stood, in years gone by, some acres of woodland known as Preston's woods. The forest has long since disappeared, leaving the soil covered with verdure, and showing numerous rocks—some of large dimensions—scattered over it. The road passed through the midst of these, and the opening of it revealed the fact that the rocks were not *in situ* as the geologist would term it, not in their primitive places, but had been moved by extraneous causes from their original beds, in other words, were boulders.

Some of these huge masses of rock lay at the road-side, and the necessary excavation in grading the highway left a few on the bank, so large and so firmly imbedded as to defy the usual efforts of man to displace them. One in particular, we remember, year by year, as we passed it, we used to gaze upon its ponderous bulk, looking on it as one of nature's fixtures—firm as a rock. But, gradually, the silent assaults of time—the winter's frost, the summer's heat—the rains of spring and the fiercer showers of autumn told on its foundation, and disintegration of its support began to be visible. The solid earth melted away, and as it disappeared, the rock protruded more and more, overhanging the bank, and slowly revealing to the traveller the fact that it rested, not on a rock, but on a perishable foundation of earth.

The process was a slow one. Year after year we passed it, and while unable to mark the gradual change—so slowly does nature work by her wondrous laws—still by unheeded removals the supporting subsoil could be seen to be slowly leaving the incumbent rock less and less firmly seated. At last its horizontal position was observed to be changing, and the huge boulder evidently was assuming an inclination toward the receding bank. Its downward tendency was too obvious to leave any doubt as to its final overthrow. Some years after, we again passed the spot. The rock that had so often interested us was gone, and its fragments lay at the road-side, encumbering the highway. So slowly yet surely does nature work her works, that we had watched this gradual overthrow from youth to mid-age, ere the process was completed; but solid, immovable as the rock seemed, its ponderosity availed little against the silent workings of the elements—and it fell at last!

On the same highway, near by, a ledge of granite crossed our road, and the efforts of the neighbors, in their yearly repairs, but indifferently succeeded in keeping its rough surface smooth enough for the easy transit of the traveller. One portion of this rock projected itself sideways into the road, the extremity jagged and showing where the action of powder had rent a convenient passage for the road beside it. From year to year we marked its form. The elements did their work on it, as on the other, but it remained unmoved. We could notice a change here also. The summer's heat and the winter's frost, the gentle shower and the driving storm fell on it, and by unheeded degrees wrought their work. The denuded rock more and more visibly came to the surface, as this war of elements carried away the earthy material that covered its surface, showing clearly its

true nature. They cleansed it, but they did not undermine it—it retained its original position, for it was founded on the rock.

Cannot we draw a moral from these workings of nature? We see around us men, a parently upright in their daily walks, correct in their dealings with their fellow men, firm in their principles, beloved by their associates; it may be, looked up to in their religious connections as well settled in the christian faith, and proof against the evil that abounds in the world. Yet as years have rolled over them, the watchful eye of religious associates have feared that it was not wisdom as in days that were past. Hardly at to say why, but a fear for them resting their minds that all is not as it should be, fear, strengthened as time rolls by and a leaning to the world develops itself, and it comes evident that their early love has waxed cold. The love of other things fills their hearts, and they draw towards earthly things for comfort or enjoyment. Slowly this character comes over them; so slowly that it is only looking back over their past lives that their departures can be noted. Have we not seen this? and have we not also seen, in some, sad falling away from a religious life which betokens a return to the world and the love of the world, leaving the poor man a wreath for this world, and for the next also. I may not doubt the early sincerity of such one, but we can see that trusting to his own strength, he failed to know his house build on the only Rock on which there is safety.

There is a stability to be attained uninteresting in Christ—where the world and things of the world cannot move us from our allegiance. Here the cares and tumults of life—the trials and afflictions of time, instead of overwhelming us, only the more fully develop our adherence to the truth, show to the world that such faithful ones, do follow cunningly devised fables, but live and enduring substance. Their foundation standeth sure. Trials but bind them more closely to the Rock, Christ Jesus: trusting the strength derived from Him—not leaning to their own understanding—the storms time may mean them from the world, if they cannot unsettle that firm hope and faith which rests on His promises, which are yea and amen forever. Reader, may thou and dig deep enough to reach this sure foundation—none other will avail us!

Confession of Error.—It is related of Lord Mansfield, that this eminent judge was ashamed of publicly retracting any opinion he had entertained, whenever convinced of his mistake. He used frequently to say, probably after Swift, who has a similar passage in his writings, "that to acknowledge you were wrong yesterday, was but to let the world know that you were wiser to day than you were then."

The celebrated Dr. Johnson, one of the most learned men that England ever produced, might have a dispute in conversation. Johnson, on the wrong side, but did not give in short both disputants kept the field. Next morning, when they met in the breakfast room, Dr. Johnson, with great candor said, "I have been thinking on our dispute last night, you were in the right." Ignorant people are generally positive and assuming; and even when they find themselves in an error, are proud to acknowledge it; but those who

wise, have learned that they are also able; they rejoice in any opportunity of having an error corrected, and they can afford to acknowledge it, without risking their reputation with persons of real judgment.

For "The Friend."

Memoirs of Mildred Rateliff.

(Continued from page 146.)

1820. 5th mo. 25th and 26th. Though very stormy, we went with a number of other Friends, to New York. Two dear Friends went with us from Great Britain, viz: William Rickman, who is now nearly ready to take his leave of us in this land; and William Foster, a well-beloved brother who has lately called on a visit in the love of the gospel to the flock and the family on this side of the great water. Thus the tender mercies of a gracious God are continued, in order to awaken diligence the human family. Lord, if it seemeth good in thy sight, preserve us in the hollow of thy Holy hand, him who apprehends himself clear of the work assigned him, and is at liberty to return to his family and friends at home. Oh! be pleased to comfort him safely over the briny deep, and to his desired port. And mayest thou also safely keep thy very precious substitute, that has as yet to ere to take the place of our ancient Friend. Thy dedicated servant, who is nearly ready to leave us. Thus, righteous Father, glorify thy most excellent name now and forever, saith my soul.

When we got to the river it appeared dangerous for a sail-boat; and the steambot being out of order, we were detained for some time, but at length, in company with others, we went several miles to another ferry; and after a trying, fatiguing day, we all reached the city in the evening in safety.

27th. Attended the Select Yearly Meeting, which was favored with the openings of Divine love. Many valuable servants and handmaids attended. As for my part, poverty and strippedness seemed my situation. Poor I alas, what am I but dust and ashes! Preserve, O Lord, I pray thee, from a murmuring thought, or flinching from the turnings of thy hand.

28th. Public meetings were held in all the different houses in the city, I hope to the honor of the great Name. The next day the Yearly Meeting for business began, which so I am favored with the encouraging evidence of the Divine presence. Thanks be unto God for all his benefits.

6th mo. 2d concluded the Yearly Meeting; and as it was favored in the beginning, so it was in the close with the evidence of Divine favor.

After the Y. M., Mildred Rateliff was at several meetings in the city of New York and of Long Island, of which her memoranda convey but little beyond the mere fact of attending them. After one of these she says, "My wish was strong that the gracious Master would be pleased to give us a silent meeting; centered in, Thy will, O Father! and not mine be done. Adding, may I live and die to this ground, saith my soul." Upon another occasion, she writes: "Thus far I have much cause to thank God and take courage, notwithstanding we continue to find much occasion for mourning, because of the desolations of Zion, in that so few within our borders come up to her solemn feasts."

"7th mo. 2d. At Oblong. Here my mouth was opened to sound an alarm, to arouse if possible to greater action and zeal. For in this meeting, alas! my life seemed oppressed with the burden of iniquity, yea, darkness that could be felt was here found. Yet through adorable mercy I was enabled I trust to clear myself of their blood; whether they regard or disregard the solemn testimony given me to bear amongst them. But even here I found a precious few, to whom the word of encouragement sweetly flowed.

"5th. At ———. [name not intelligible.] Alas, true religion is in a low state, some weakly, some sickly, and many sleepy. While through adorable mercy there remains a precious few in good health, able to prove the efficacy of the preserving principle of sanctifying grace.

"8th. At Oswego; 9th, at Nine Partners. These were good meetings. Truth reigned over all; the blessed Master's name was glorified; and I think it safe to say the people were satisfied. At Nine Partners there was a multitude indeed. My mouth was opened like a trumpet; and though I was so weak inwardly as well as outwardly, that as I walked into meeting my very joints seemed loosened, and much fear and trembling covered me all over, yet to my humbling admiration I was made strong, so as to stand as an advocate for the great and good cause. I trust the Lord had the praise of his own works; and his disciples, in the conclusion of this heavenly opportunity, were willing to gather up the fragments that nothing should be lost.

"10th. Being truly in need, we rested; and thus got a little refitted to pursue our journey.

"11th. Went on again, and attended West Branch Meeting. But alas! this was a painful, hard meeting. Yet through adorable mercy, it ended better than it began. How cheered the scene! How various the dispensations through which we have to pass! Lord, be pleased still to go before, and to be with me! Be my all in all: thus preserving thy dignified cause not only to the end of this very responsible journey, but to the end of my days."

Thence she had meetings at Pleasant Valley; at Poughkeepsie; at Crum Elbow; "at a meeting called the Creek;" and at Stanford. "This," she says, "was a blessed good meeting. May the gracious Helper of the helpless have all the praise forever.

"17th. At North East. But here was a painful time indeed, as was also a religious opportunity I felt bound to have in a Friend's family where we lodged. Oh, the sad situation of things in many places!

"18th. At Little Nine Partners: some better than what we had to pass through yesterday; but alas, true religion—that which is only worth living for—is at a very low ebb in most places. May the Lord of the whole earth, who has the power at command, cause a revival to take place, and that speedily, in the hearts of the children of men.

"20th. Attended their meeting at Hudson, a painful one it was. Next day at Ghent, where was some more comfort; but alas, low times indeed at most places. At Chatham on the 23d, which was large, and I hope profitable to many.

"25th. At Troy. This was truly a painful time, with little hope of much amendment. Lord, pity the people in many places, whose situation is deplorable! Mingle thy judgments

with thy mercies in such a manner, as to bring into an acquaintance with thy holiness, if consistent with thy righteous will.

"26th. At Pittstown; and the day following at Easton. Low times, and not much to rejoice in, only in being accounted worthy to suffer with the suffering seed.

"8th mo. 6th. At Ferrisburg in the forenoon; where, as at many other places, I had to bear a sharp testimony against sleeping in meetings. This is a lethargy doubtless that has spread more or less over our Society, and is mournfully to be felt in many places, and increasingly so I fear. I must bear my testimony against it. Lord, be thou my strength, in this and all other cases, and then I will stand for thy cause. In the afternoon we attended a meeting called Monkton; which I hope was a season of profit to some of us. Here I found it my place to be still. A privilege I highly prize when my blessed Master sees meet to have it so. For this I cannot doubt there was a cause; believing as I do, it is a terrible thing to be preached to death. Oh forbidding, gracious Father! that my mouth in and for thy cause, should ever be opened when *Thou would have it shut.*

"8th. Crossed at a ferry on the Great Lake several miles wide. Here I had the opportunity of seeing the works of the Almighty on the great deep.

"9th. Attended the Select Quarterly Meeting at [name not given], which was painful, because of the desolations of our Zion in this part of the family. Next day the Quarterly Meeting at large, which was also a suffering time for the same reason.

"11th. Was held a large public meeting more to satisfaction. The blessed Truth seemed to reign over all, and the name of the Lord was glorified.

"12th. Went on to a village, left word for a meeting to-morrow at six o'clock; then crossed the wide and great water of the same lake, in a little, leaky, tottering boat; leaving our horses and carriage on the other side till we returned, if so the blessed Master please. Next day were at a meeting on the Grand Isle (so called) in the forenoon, after which time of Divine favor with the inhabitants on the Island, we crossed again in the same boat; and attended at six o'clock the meeting in the village above spoken of to satisfaction."

After this she attended a number of meetings thereabout, till 9th mo. 6th, when she had a meeting in a school house where no meeting of Friends is regularly held. "It was attended," she states, "by a number not much acquainted with us as a Society, yet hungry, thirsting souls. Here the glad tidings of the gospel of peace did sweetly flow through the lips of a very poor and feeble instrument. This was a good meeting, many parting with us with tears of gratitude to the Father of mercies for this day's favor. Praise the Lord, O my soul! Praise and adore His great Name forever. For what greater cause can there be for thanksgiving, than a well grounded hope that through the power of Truth, many sons shall come from far, and daughters from the ends of the earth. After this meeting we went on with a number of our Friends, and on the 10th were at a little indulged meeting at Shamo. Here were a number not professing with us. Some of these were reached; and together with the rest of us, urged to remember that we are born to die; and after death the judgment. May the

impression made on many minds, be fastened as a nail in a sure place."

Notwithstanding M. R. in the prosecution of her religious duty in this journey, attended a number of meetings after this, she has left but little account of them, except at one she speaks of "the spring of the ministry seeming to be shut up, and sealed as with seven seals." At another that, "Those who undertake to visit the churches now-a-days, need not expect much pleasant bread;" adding, "Lord, in thy mercy, please to strengthen my faith." At another, she notes, "Poor, hard times! O that I may ever be willing to suffer my portion for the blessed Master's sake, and His cause sake." Again, "The sweet peace of mind more than compensates for all through which I have passed. Lord be pleased in thy mercy to keep me safe the little time which is yet remaining in this probationary state. O make me more and more entirely thine." And again, after attending Dunning's Creek Meeting, she writes; "This is the last meeting pertaining to this very serious undertaking. Thanksgiving and praise forever be ascribed to a gracious God who helped me through all, to the relief of my poor exercised mind, and has now set me at liberty to return home." She reached her habitation the 27th of Eleventh month, 1820, "I trust," she writes, "with a thankful heart, returning thanksgiving and praise unto Him that was, and is, and is to come. God over all blessed forever."

She was absent on this journey, fourteen months and six days; and travelled by computation 4460 miles.

(To be continued.)

THE LOST STAR,

Selected

God set a star within our sky,
And o'er our home its light was thrown,
And as we looked with loving eye
It seemed peculiarly our own.
And evermore its growing ray
Drove out what'er was dark and cold,
Till His seemed luminous as day,
And all its glooms were tinged with gold.
Resolves and hopes which long had lain
Falsified by custom and distrust,
Touched by its warmth, revived again,
And brightly blossomed from the dust.
Thenceforth, with clearer eyes we saw
What seemed before but blurred and dim;
And read anew God's perfect law
Which binds the universe to Him.
With wider scope His works we viewed,
The slow unfolding of His plan,
And, taught by loving hearts, renewed
Our faith in God, our faith in man.
And earth and sky, and day and night,
No longer dark, and drear, and dull,
Basked in that permeating light,
And glowed divinely beautiful.
But suddenly, while yet our lips
Trembled with songs of grateful praise,
Our star, involved in drear eclipse,
No longer cheered us with its rays.
Then darkness deep and full of dread
Threw o'er our sky its veil of gloom
We seemed to walk amid the dead,
And earth itself was but a tomb.
Perchance some questioning or doubt
Of God Himself came o'er our mind,
When that sweet star was blotted out,
And hope expired, and faith was blind.

Perchance our wayward wills rebelled
Against the loving Father's will,
Till sorrow's first willow was quelled
By His all tender "Peace! be still!"

For weak, at best, is human faith,
And love is passionate and strong,
And wildly demands the loss or death
Of what we love, a cruel wrong.

But God is good, and folds in calms
Of His own rest our restless souls,
Till with hushed hearts and clasped palms
We bless the Wisdom that controls.

And when for us the heavy hour
Of doubt went by, and holy trust
Resumed its tranquillizing power,
And hope looked upward from the dust,—

Our hearts interpreted the law
Of earth's loss and heavenly gain;
And through the lens of faith we saw
The covering darkness rent in twain;

And lo! the star we called our own,
Whose loss we mourned with bitter tears,
Full orb'd and clear serenely shone,
A light to gladden all our years.

For "The Friend."

Manufacture of Paper in Japan.

Littell's Living Age has an article taken from the Athenaeum, by which it appears that the British Foreign Office has published a report on the manufacture of paper in Japan. We find in the report some items of interest.

The purposes for which the Japanese employ paper are very numerous indeed, including, beside all the uses to which Europeans apply it, the manufacture of umbrellas, rain coats, water proof pouches, hats, lanterns, wicks of candles, handkerchiefs, window lights, &c., &c.

The materials which the beautiful Flora of Japan yields for this wonderful variety of paper are of two descriptions, namely: the trees or shrubs of which the bark furnishes the fibre that gives strength of texture, and the plants of which the roots, seeds or sap yield a natural sizing that gives enamel to the surface of the sheet. The best fibre is that of the Ma Kodzu, a species of paper Mulberry (*Broussonetia papyrifera*), which is grown chiefly in the Island of Kiusiu. The Kaji, or Kajiso, a plant of which the botanical acquirements of the Japanese consuls do not appear to be such as to afford the means of scientific identification, grows more or less all over Japan, and is cultivated much in the same manner as the tea plant, and mulberry tree. It is described as closely resembling a willow. It does not thrive in the north of the island. The Kajiso does not yield so well as the Makoso or Ma Kodzu. A third plant is called Takaso, which yields a larger quantity of paper than either of those previously named. It does not require the manure, or the great care as to soil, demanded by the previously named vegetables, but the quality of the paper which it produces is inferior. A fourth species or variety is found chiefly in Kiusiu, the native name for which is Metsumata, from the bark of which alone the paper currency of the country is manufactured. It is little used for any other purpose.

The plants of the paper mulberry are annually cut down to the roots in the winter, and the cuttings of the fifth year, by which time the shrub has become dense and strong, are used for the manufacture. The branches are cut into lengths of from thirty to thirty-six inches, and steamed in a straw vessel or

a boiler. When the skin begins to separate from the stalk, it is stripped off by hand, the wood being useless except to burn. After peeling, the skins are dried by exposure to the wind on poles; and when dry they are weighed and made up into bundles of about thirty-two pounds each. They are then washed in running water for twelve hours, and the outer or dark colored portions of the bark are next scraped off with a knife; the scraping themselves being used to make an inferior kind of paper. After a fresh washing in running water, and a pressure under heavy stones to expel the fluid, the fibre is boiled. It is again washed after boiling to remove the residue of the ashes thrown in to aid that process, and it is then "pounded" about as long a time as it takes to boil rice for breakfast," with a wooden pound three feet long and three and one-half inch square. The pounded fibre, now called Sori, is made into balls and is mixed in a trough called the boat, which is six feet long at three feet broad, with the paste made from the rest of the Tororo. This shrub is described as being not unlike the cotton plant and the size of the root is "about the same as that of the common dock." We believe to be the plant which supplies the vegetable wax of Japan. The sprouts and skin of the root are scraped off, and the root is then beaten; the time for taking it from the ground being that of the rainy season of the spring, after the flower has died. When required for use, these roots are boiled into this paste, which is strained into a through a fine hair sieve. Lumps are broken off from the "Sosori" balls and mixed up with the strained "Tororo" paste; the mixture being thoroughly strained, and proper consistency being indicated by the peculiar noise which the stirring stick makes when passed through the pulp. A frame, consisting of inner and an outer portion, with a false bottom made of plaited branches is filled with this pulp; "a peculiar and dexterous jerk given to the whole, which sets the pulp, and the frame is then leaned against the upright rest to allow the water to drain off. This manipulation is performed very quick by experts in the manufacture.

The sheet of paper is removed from the frame with a piece of bamboo, and laid the aid of a brush, on a drying board, the side which adheres to the board forming the face of the paper. In wet weather artificial heat is required for drying. Two or three straws are inserted between every two sheets of the paper, which is made up packets of 100 sheets, and cut by means of sharp knife and heavy rule.

For making paper warranted to was which is called "Shifu" a different kind paste is prepared. Boxes, trays, and even saucers are made of this paper cloth, and saucers thus manufactured sustain no injury over a strong charcoal heat. For the manufacture of oil paper for rain-coats, sheets of paper called "Senka" are joined with glue made from young fern shoots, stained the juice expressed from unripe persimmon. Color when required, is applied as a powder mixed with bean paste; and a vegetable oil expressed from seeds, and known by the name of "Ye-no abura," is used; the preparation chiefly consisting of softening the paper by rubbing it with the hands.

The manufacture from the paper mulberry

introduced into Japan about A. D. 610, by the year 280, A. D., silk, with a facing of gold, was used for writing upon, and thin shavings were also employed. In that paper was imported from the Corea; and was the only paper used by the Japanese down to 610, when two priests were sent to Japan by the king of the Corea, who introduced a local manufacture. The paper produced did not take ink well; it tore easily, and was liable to become worm-eaten. Taishi, a son of the reigning Mikado, first made use of the bark of the *Broussonetia*, which he caused to be extensively used all over the country, and promulgated the mode of manufacturing among the people.

The enclosed article appeared in "The Friend" twenty years ago, would there be any objection to its re-appearance at this time?

For "The Friend"

Summer in the Heart.

The poet Cowper in writing to one of his friends upon a mid winter's day, bearing date, December 31st, says, "I have frequently thought with pleasure of the summer you have in your heart, whilst you have been engaged in softening the severity of winter in the hearts of the many who must otherwise have been exposed to it. * * You never said a better thing in your life, than when you assured me of the expediency of a gift of bedding to those poor people. There is no one article in this world's comforts with which they are so provided. When a poor woman, and an infant one, whom we know well, carried home a pair of blankets, a pair for herself and child, and a pair for her six children; as she was the children saw them, they jumped up to their straw, caught them in their arms, and then, blessed them, and danced for joy. An old woman, a very old one, the first night she found herself so comfortably covered, would not sleep a wink, being kept awake by contrary emotions of transport on the one hand, and the fear of not being thankful enough on the other."

Now, if any of our young friends, (or older ones either,) feel dull, heavy, unhappy, in the midst of plenty,—yawning and stretching over their noses, or "fancy work," and made quite stupid, perhaps a little pettish under the pressure of the abundance of "heated air" with which the rooms are filled,—and because their warm beds, with their abundant warm covers, have induced them to lie at least one hour longer than they ought to have done; if these are not to feel particularly happy and peaceful, they want to feel as if they too could "dance for joy," let them exert themselves as much as they possibly can, now that "Jack Frost" is striking his icy hand upon the threshold of the door, and blowing his chilling breath through the half-glassed windows, and making more of their stoves which have long felt but little of his heat them;—I say let these exert themselves in looking after the poor; especially the aged, the infirm, and the little children. Then, methinks, many who now feel neglected and hard to be pleased; and who have a little trouble or privation that they are so prompt in making "mountains out of molehills," would be brought, in contrasting their condition with the destitute and afflicted, to a sense of their great obligation to their Benefactor,—and the language of

their humbled and tender hearts would be, "Not more than others I deserve, yet God has given me more," and I shall have to render an account to Him of how I have used it; and under this feeling everything like superiority and self-consequence would retire crest-fallen, and these in their turn would become beggars, pleading earnestly of Him who knows all things, not to suffer them to become guilty of the sin of forgetting, or neglecting those who are needy and have none to help them. And a blessed consideration would make its way into such minds. "Blessed is he that considereth the poor, the Lord will deliver him in time of trouble." The rays of the sun of righteousness would produce a feeling like balmy summer in such hearts, where, hitherto, the coldness produced by indifference, or penuriousness, or indolence, had too much prevailed; and the effusion from this summer in the heart be, "What shall I render unto the Lord for all His benefits."

Alpine Climbing.

The scenery of portions of the Alps, and the dangers sometimes encountered by those who undertake to scale their summits, are well described by Professor Tyndall, in his account of the ascent of the Old Weissthor in 1861. He says:

I had only seen one-half of Monte Rosa; and from the Italian side the aspect of the mountain was unknown to me. I had been upon the Monte Moro three years ago, but looked from it merely into an infinite sea of haze. To complete my knowledge of the mountain it was necessary to go to Macugnaga, and over the Moro I accordingly resolved to go. But resolution had as yet taken no deep root, and on reaching Saas I was beset by the desire to cross the Alpehale. Benen called me at three, but over the pass grey clouds were hanging, and determined not to mar this fine excursion by choosing an imperfect day, I then gave it up. At seven o'clock, however, all trace of clouds had disappeared; it had been merely a local gathering of no importance, which the first sunbeams resolved into transparency. It was now, however, too late to think of the Alpehale, so I resorted to my original design, and at 9 A. M. started up the valley towards Mattnark. A party of friends in advance contributed strongly to draw me on in this direction.

Onward then we went through the soft green meadows, with the river sounding to our right. The sun showered gold upon the pines, and brought richly out the coloring of the rocks. The blue wood smoke ascended from the hamlets, and the companionable grasshopper sang and chirruped right and left. High up the sides of the mountain, the rocks were planed down to tablets by the ancient glaciers. The valley narrowed, and we skirted a pile of moraine-like matter, which was roped compactly together by the roots of the pines. Huge blocks here choke the channel of the river, and raise its murmurs to a roar. We emerge from shade into sunshine and observe the smoke of a distant cataract jetting from the side of the mountain. Crags and boulders are here heaped in confusion upon the hillside, and among them the hardy trees find a lodgment, asking no nutriment from the stones,—asking only a pedestal on which they may plant their trunks and lift their branches into the nour-

ishing air. Then comes the cataract itself plunging in rhythmic gushes down the shining rocks.

The valley again opens, and finds room for a little hamlet—dingy hovels with a little white church in the midst of them; patches of green meadow and yellow rye, with the gleam of the river here and there. The moon hangs over the Mischabelhorn, turning a face which ever waxes paler towards the sun. The valley in the distance seems shut in by the Allalein glacier, which is approached amid the water-worn boulders strewn by the river in its hours of turbulence. The rounded rocks are now beautified with lichens, and scattered trees glimmer among the heaps. Nature heals herself. She feeds the glacier and planes the mountains down. She fuses the glacier and exposes the dead rocks. But instantly her energies are directed to neutralize the desolation, clothing the crags with beauty, and sending the wandering wind in melody through the branches of the pines.

At the Mattnark hotel, which stands at the foot of the Monte Moro, I was joined by a gentleman who had just liberated himself from an unpleasant guide. Benen halted on the way to adjust his knapsack, while my companion and myself went on. We lost sight of my guide, lost the trail also, and clambered over crag and snow to the summit, where we waited till Benen arrived. The mass of Monte Rosa here grandly revealed itself from top to bottom. Dark cliffs and white snows were finely contrasted, and the longer I looked at it the more noble and impressive did the mountain appear. We were very soon clear of the snow, and went straight down the declivity towards Macugnaga.

We put up at the Monte Moro, where a party of friends greeted me with a vociferous welcome. This was my first visit to Macugnaga, and save as a caldron for the generation of fogs, I knew scarcely anything about it. But there were no fogs there at the time to which I refer, and the place wore quite a charmed aspect. I walked out alone in the evening, up through the meadows towards the base of Monte Rosa, and on no other occasion have I seen peace, beauty and grandeur so harmoniously blended. Earth and air were exquisite, and I returned to the hotel brimful of content.

Monte Rosa with her peaks and spires builds here a noble amphitheatre. From the heart of the mountain creeps the Macugnaga glacier. To the right a precipitous barrier extends to the Cima di Jazzi, and between the latter and Monte Rosa this barrier is scarred by two couloirs, one of which, or the cliff beside it, has the reputation of forming the old pass of the Weissthor. It had long been uncertain whether this so-called "Aitor Pass" had ever been used as such, and many superior mountaineers deemed it from inspection to be impracticable. All doubt on this point was removed this year; for Mr. T. Tuckett, led by Benen, had crossed the barrier by the coldest most distant from Monte Rosa, and consequently nearest to the Cima de Jazzi. As I stood in front of the hotel in the afternoon, I said to Benen that I should like to try the pass on the following day; in ten minutes afterwards the plan of our expedition was arranged. We were to start before the dawn, and to leave Benen's hands free, a muscular young fellow named Andermaten, was engaged to carry our provisions. It was

also proposed to vary the proceedings by ascending the ridge by the couloir nearest to Monte Rosa.

I was called by my host at a quarter before three. The firmament of Monte Rosa was almost as black as the rocks beneath it, while above in the darkness trembled the stars. At 4 A. M. we quitted the hotel. We wound along the meadows by the slumbering houses, and the unslumbering river. The eastern heaven soon brightened, and we could look direct through the gloom of the valley at the opening of the dawn. We treaded our way amid the boulders which the torrents had scattered over the plain, and among which groups of stately pines now find anchorage. Some of the trees had exerted all their force in a vertical direction, and rose straight, tall and mast like, without lateral branches. We reached a great moraine, grey with years, and clothed with magnificent pines; our way lay up it, and from the top we dropped into a little dell of magical beauty. Deep hidden by the glacier-built ridges, guarded by noble trees, soft and green at the bottom, and tufted round with bilberry bushes, through which peeped here and there the lichen-covered crags. I have rarely seen a spot in which I should so like to dream away a day. Before I entered it, Monte Rosa was still in shadow, but on my emerging I noticed that her precipices were all aglow. The purple coloring of the mountains observed in looking down the valley was indescribable. Out of Italy I have never seen anything like it. Oxygen and nitrogen could not produce the effect; some effluence from the earth, some foreign constituent of the atmosphere, developed in these deep valleys by the southern sun, must sift the solar beams, weaken the rays of medium refrangibility, and blend the red and violet of the spectrum to that incomparable hue. The air indeed is filled with floating matters which vary from day to day, and it is mainly to such extraneous substances that the chromatic splendors of our atmosphere are to be ascribed.

The ancient moraines of the Macugnaga glacier rank among the finest that I have seen; long, high ridges tapering from base to edge, hoary with age, but beautified by the shrubs and blossoms of to-day. We crossed the ice and them. At the foot of the old Weissler lay crouched a small glacier, which had landed a multitude of boulders on the slope below it; and amid these we were soon threading our way. We crossed the little glacier, which at one place proved disagreeable, and here I learned from the department of his axe, the kind of work to which our porter had been previously accustomed. Half a dozen strokes shook the head of the implement from its handle. We reached the rocks to the right of the couloir and climbed them for some distance. At the base the ice was cut by profound fissures, which extended quite across, and rendered a direct advance up the gully impossible; but higher up we dropped down upon the snow.

Close to the rocks it was scarred by a furrow six or eight feet deep, and about twelve in width, evidently the track of avalanches, or of rocks let loose from the heights. Into this we descended. The bottom was firm, and roughened by stones which found a lodgment there. It seemed that we had here a very suitable roadway to the top. But a sudden crash was heard aloft. I looked up-

ward, and right over the snow brow which closed the view, perceived a large brown boulder in the air, while a roar of unseasoned stones showed that the visible projectile was merely the first shot of a general cannonade. They appeared—pouring straight down upon us—the sides of the furrow preventing them from squandering their force in any other direction. "Schnell," shouted the man behind me, and there is a ring in the word, when sharply uttered in the Alps, that almost lifts a man off his feet. I sprang forward, but urged by a sterner impulse, the man behind sprang right on to me. We cleared the furrow exactly as the first stone flew by, and once in safety we could admire the energy with which the rattling boulders sped along.

(To be continued.)

For "The Friend."

From the Letters and Papers of John Barclay.

(Continued from page 138.)

To W. F.

London, October 10th, 1816.

"Dear Friend,—Whilst taking up my pen to address you, I feel very desirous not to incur the sentence denounced in Scripture against him 'that trusted in man, and made flesh his arm, and whose heart departed from the Lord;' for there is a disposition to regard the creature more than the Creator, in whom alone is everlasting strength. And yet a saying of the apostles Peter and John, when brought before the Jewish council, has often been comfortably remembered by me, after much unreserved communication with some of my dear friends; and I trust I may safely adopt it as my own on this occasion: 'for we cannot but speak the things which we have both seen and heard.' How shall I then be silent concerning the dealings of Infinite Goodness, or how shall I forbear to testify of Him who 'delighteth in mercy,' of whom it is said, and has been experienced by thousands, as well as by myself.—He will subdue our iniquities, and will cast all our sins into the depths of the sea.' Indeed I have reason to say thus, and much more; for few suspect the depth of perdition from which I have been rescued. Awfully appropriate was that language twice repeated in the little company I sat with, at our friend's house at S. 'Thou wert as a brand plucked out of the burning;' I earnestly desire that what follows may not equally apply.—yet hast thou not returned unto me, saith the Lord? How strongly have I been encouraged, my dear friend, to believe that even in these latter times the same arm of everlasting mercy is still underneath, the same crook of loving kindness is yet conspicuously stretched out to reclaim and to restore. Though I have but little time or space to spare, yet one circumstance attending my former course of life, I may not omit to mention—I remember, my dear friend, (bear with me if you can,) a season when my wickedness had arrived at such a complicated and aggravated height, as to threaten (to all appearances and all probability) inevitably impending consequences; and these so encompassed me round on every side, that, though a thorough adept, I totally despaired of escaping that which was likely to follow. At this eventual crisis, when my wretchedness was more than I can describe, and almost more than I could bear, there was a secret but fervent desire raised in my very inmost soul, that if it were possible, I might be delivered from

this anguish of mind and dilemma of situation which were then owned by me to have been brought on by my own sinfulness, and no less than was deserved. There was also something like a covenant on my part, that it might be thus renewed, no bounds should be placed to the dedication of my future life. The sequel was as striking as the fact itself; each black cloud of this storm, from that day forward, rolled gradually away, and I surprising manner withdrew and dissipated. So that in truth I have had, and still have most feelingly to adopt a language, as usually and remarkably applicable to myself it could perhaps have been to him that wrote it, 'He brought me up also out of the horrible pit, out of the miry clay;' and I think I add, it is equally my desire and belief, that the remainder of this passage may and be as nearly my experience; 'This is the Lord's doing, and it is marvellous in our eyes. Yes, my dear friend, 'I am as a wonder to many,' amongst those who knew me little more than three years ago, then living in forgetfulness, or rather abandonment of self, who notwithstanding did not utterly abandon me; but, as Fenelon says, 'who followed in my ways, which were those of sin;' has run after me, as a shepherd in search his strayed sheep. So that I cannot be silent on this subject; but am constrained to knowledge, that in all my various difficulties, and dangers, the power and presence of One, 'who is able to save to the utmost, has been with me, and around me, bringing about seeming impossibilities, and in a way where no way was, and effecting deliverance 'with a mighty hand, and an outstretched arm.'

"With respect to that share of affliction which has been handed to me of late, I truly say, it is my desire, that others in various trials, may be equally enabled to myself to discover and acknowledge in the hand of Him, who 'is righteous in all ways, and Holy in all His works.' We privations are permitted to attend, with consolation, my dear friend, to find a Father of the fatherless; when about to separate those who have from childhood shared some mixed cup of joy and grief, what a relief to feel, that wherever scattered, still each is near that Fountain, to which we may have access; when a total revolution in outward condition takes place, when luxury, delicacy, splendor and vanity, together with all those objects endeared by fond recollection, are to be relinquished, how sweet to know 'it is the Lord—let him do what seem him good;' and in taking up the cross, the rest, denying ourselves, and following the Lord through sufferings, conflicts, and probation, what a blessing it will be if we 'are kept the power of God through faith unto salvation.' Your sincere friend,

J. F. L.
"1816. October 22d.—The farther I advance in my course along this valley of life and obscurity, the more evidently am I permitted to discover—the more frequently I am constrained to admit, the infinite beneficence of the Lord.—Oh how sincerely I exclaim with the Psalmist, 'What is so great that thou art mindful of Him, or the secret that thou visitest Him.' Fervent in my have been my desires, and still more and more so, as the visitations of condescending grace

been renewedly extended—that my whole
may be prepared for the reception and
manifestations of this great and gra-
Guest. O! may there be in my inmost
thoughts and imaginations, as well as over-
words and outward demeanor, such a con-
watchfulness, as may evidence a holy
and fear of giving Him offense, or occasion-
ing a separation between Him and my

O! thou who seest in secret, and to whom
most secret petitions are thoroughly
known, and known to ascend even daily and
secretly, be pleased in thy exceeding great
compassion and wondrous mercy, to have me a
help. Grant that I may be made will-
ing to follow thee whithersoever thou leadest,
to become whatsoever thou wouldst
make me to be."

1616. November.—Do not look at others,
for their example seems to recommend
a certain line of conduct or another, no, not even
such as are very industrious in business,
but account strictly religious characters;
there are no guide for you: stand on your own
feet; nothing will justify what you are
about to do, or to forbear to do, but a full con-
science of duty. If you have that true peace
which no man can give or take away, it mat-
ters little what others may say or think. Re-
member that the honest fishermen quitted
their lawful concerns, nay all, to follow Him
whom they recalled them, but it was not till He called: it
was a hundred fold reward, and the everlasting
inheritance were promised, not to those who
only forsok all that they had, but to those
who did so for his name's sake. I think it was
John Penn who said, "It is not the sacrifice
(however great) that recommends the heart,
but the heart that gives the sacrifice (how-
ever mean) acceptance."

1816. November 12th.—O Lord God Al-
mighty! it is of thy exceeding mercy that I
was raised up, and enabled thus fervently, thus
boldly to address thee, as the God which
has led me unto this day. O! how clearly
and comfortably hast thou, during this time
of my life, revived the remembrance of what
thou hast done for them that have sought or
desired to seek thee. Where is not thy 'mighty
arm,' and thy 'outstretched arm,' to be dis-
covered? When I 'look at the generations of
old and see,' through thy grace I am enabled
to dispense every doubt, every discouraging
thought, by that feeling and forcible interroga-
tion, '*Did ever any trust in the Lord, and was
wounded; did any abide in his fear, and was
despised; or whom did he ever despise, that
will upon him? Well might thy servant
say, 'The earth, O! Lord, is full of thy mercy';
thy prophet exclaim—'The whole earth
is full of his glory.' 'And now Lord! what
all I for my hope is in thee: 'in thee, in thee
is my joy, my crown, my confidence. I
cannot ask of thee deliverance out of trouble,
except in thy time; but O! my very soul doth
rejoice of thee, that I may be kept from every-
thing like evil; that I may be supported and
sustained by that 'hidden manna,' which is
promised 'to him that overcometh.' Oh!
Lord, unto him, who feels himself at
times awfully humbled under thy mighty
arm, that he may be made still more deeply
dependent, that 'thou art God alone;' and as
thou art as thou art pleased, in thy very abundant
compassion, to renew within him that which
constrains him to cry out, 'My soul thirsteth
for thee, O Lord, for the living God,' at such precious*

seasons, may he be satisfied with nothing
short of thee; and strengthen thou him to
endure patiently through all, waiting upon
thee in hope, and watching for thee!"

The Pacific Mills, at Lawrence, Mass., are
rated as the largest establishment of the kind
in the world, employing 4200 operatives, and
making all kinds of delaines, worsted goods,
calicoes, &c. They have been established since
1853. The works are now operated by water-
power, and there are twenty acres of flooring
all covered with the necessary machinery for
executing the business. There are twenty-four
large boarding houses owned and run by
this corporation, each capable of accommodat-
ing forty persons. The buildings and machi-
nery have been increased, so that there are
now in operation about 130,000 spindles for
spinning cotton, with cleaning, picking and
carding machines to supply them, and about
16,000 spindles for worsted, with all the neces-
sary preparing machines to occupy 3500
looms for weaving the two classes of goods
above named, together with 22 printing ma-
chines, producing a weekly average of about
700,000 yards. The machinery is propelled by
eight turbine wheels, six of them being 72
inches in diameter, and two 84 inches in diame-
ter, with a fall of water equal to 26 feet, yield-
ing 1500 horse power. The average of the
manufactured goods of this company, for a few
years past has exceeded \$7,500,000 annually.

Both in her private deportment and in
meetings, she was concerned that no cause
of offence should be thrown in the way of
any, especially of the young, and those who
were under serious impressions. Those who
were entrusted with the care of young child-
ren were particular objects of her solicitude,
and she often found it her duty affectionately
to impress upon them the obligation to bring
up their tender charge, from early infancy,
consistently with our religious profession. As
she advanced in years this subject ap-
peared to rest with increasing weight upon
her mind. The last time she attended our
Monthly Meeting, when laboring under much
physical weakness, she was engaged in great
tenderness to impress upon mothers the ne-
cessity of faithfulness in the discharge of this
important duty.—*Memorial of Mary Wistar.*

John Clark of Frone (England), was a man
of peace. He was asked one day by a friend
how he kept himself from being involved in
quarrels. He answered, "by letting the an-
gry person always have the quarrel to him-
self." This saying seems to have had some
influence on some of the inhabitants of the
town; for, where a quarrel has been likely to
ensue, they have said, "Come, let us remem-
ber old Mr. Clark, and leave the angry man
to quarrel by himself." If this maxim were
followed, it would be a vast saving of expense,
of comfort and of honor to thousands of the
human race.

THE FRIEND.

TWELFTH MONTH 30, 1871.

The developments taking place at most of
the General Meetings, now so frequently held,
and in the First-day school conferences, while
they must call forth in the minds of sound
Friends saddening reflections on the evidence

they give of the astonishing changes that
have taken place, within a few years in our
religious Society, are productive of good, by
giving emphatic and conclusive testimony to
the correctness of the predictions long since
uttered by many of the most experienced and
clear-sighted servants of the Lord among
Friends, in the generation now nearly all re-
moved from the church militant. Those wor-
thies left their testimony on record, that the
departures from the doctrines originally pro-
mulgated by the founders of the Society,
adopted and adhered to by it for two centu-
ries, in relation to the place to be occupied by
the Scriptures; in relation to the doctrine of
justification; to the right of man to appropri-
ate the promises to himself, after deciding by
his reason that they belonged to him; in re-
lation to the origin and character of saving
faith, the qualification for prayer, public or
private; the personality of the three that bear
record in heaven, and the immediate partici-
pation in the salvation purchased by Christ,
by making confession of Him by word of
mouth, embodied seminal principles, if gen-
erally adopted by the members, would pro-
duce the precise effects which are now taking
place in so large a part of the Society.

"The accounts we have read of the proceed-
ings at the "General Meeting," recently held
at Brooklyn, N. Y., recite very much the same
scenes as those described in the extracts we
gave in a former number, from the account of
that held at Poughkeepsie, with the addition
of opening some of the meetings with reading
in the Scriptures, and perhaps a more free
interchange of "ministerial services," with
those occupying the position of ministers in
other religious societies.

We think that few, if any, can give the
various accounts of the several meetings and
conferences,—some of which, are given in
the public newspapers—serious consideration,
without admitting the conviction that the
religious principles held by one part of those
included among members of our religious So-
ciety, and those held by another part of them
are not only dissimilar but incompatible, and
that this difference is on points of such pri-
mary importance as to prevent their being
reconciled.

There are yet a goodly number—not a few
we trust in every Yearly Meeting, who highly
value and hold to the doctrines and testimo-
nies of the gospel, as set forth by Fox, Bar-
clay, Penn and other of the primitive believ-
ers and writers, but a far greater number
charge these with defects, and have adopted,
as better adapted to the times, the principles
introduced into the Society of recent time,
and, by their own showing, they are fast fall-
ing into practices which naturally grow out
of those principles, and which no true Friend
can approve, or seek to apologise for.

We need not be surprised that these inno-
vators continue to claim to be Friends, for
even the followers of Elias Hicks did so, when
they were denying some of the fundamental
doctrines of the New Testament; and we
believe there are those among them who do
not see that they are departing from the
original ground on which the Society has
stood for two centuries; and who express
the expectation, that when the whirlwind
that is now shaking the whole body shall
have passed by, they will be found side by
side with those who adhere to the primi-
tive faith; but some of their more zealous

and unguarded co-laborers do not hesitate to admit they expect that what have been termed the *distinguishing views*, and what are called the *minor testimonies* of Friends, will all be swept away.

This is a dispensation that will try the foundation of every member sufficiently interested in the Society, to be concerned whether it shall continue to maintain its primitive faith, or go back to that held by other denominations from which it was brought out. It calls for deep searching of heart, for the clothing of a meek and quiet spirit, and the exercise of that wisdom which cometh down from above. The final result may confidently be left in the hands of Him who watches over his own cause by day and by night, and who can save by many or by few. While the mighty wind, the earthquake and the fire are doing their work, happy is that servant who is found standing where his Lord has placed him, and, with his face wrapped in his mantle, listening to the still small voice, and ready to perform whatever command may be given him.

CORRECTION.

The writer of the article in our last number "Getting off the true Foundation," desires to correct the statement in it, that a car was chartered by some of the delegates returning from the late First-day School Convention, "for the purpose that they might sing" without hindrance. The car was secured and the singing took place, but it was not chartered for that purpose. He says, "My intelligence came second hand, from one of the passengers who was present, and as the facts were stated, I gathered that the object referred to, was a part of the design in thus separating into one car."

SUMMARY OF EVENTS.

FOREIGN.—Charles Francis Adams, member of the Board of Arbitration for the United States, and Lord Tenterden, counsel for Great Britain before the Board, have returned to London.

The Queen has received the congratulations of the President of the French Republic on the recovery of the Prince of Wales from his dangerous illness.

Earl Ellenborough, formerly Governor General of India, died on the 22d inst., at the age of 81 years.

Notice has been issued from the American Legation in London, that it is desirable that all citizens of the United States, intending to travel on the Continent, should procure passports.

The vessel which ran down the French bark Costa Rica was the British ship Windsor Castle, which has since arrived in port. Her officers deny that they heard any cries of distress from the Costa Rica.

The steamship Delaware, which sailed on the 15th inst. from Liverpool for Calcutta, was totally lost on the 21st inst., off the Scilly Islands, and all on board are supposed to have perished.

Parliament is prorogued until the 6th of Second month next.

Letters from South America state that the earthquake at the town of Oca last night nine hours, with forty different shocks. The streets were split open and every house tumbled into ruins. The inhabitants all fled to camps outside the town, only one death occurring.

The committee of the French Assembly to whom the subject was referred, have rejected the proposition to return to Paris.

The President Thiers has issued a decree dissolving the Council of Algiers.

The French government refuses to sell the Crown jewels to private parties.

Duc d'Annam and Prince de Joinville, took their seats in the National Assembly without opposition. Their appearance created no sensation in the body.

A denunciation of French Protestants has had an interview with President Thiers. He received them with affability, and promised that religious equality should be maintained.

The work of trying the Communists is progressing as fast as possible and additional courts are to be created the more rapidly to dispose of the remaining cases. Up to the present day 14,378 prisoners have been tried. Of these, 2022 have been convicted and sentenced, and 12,356 have been discharged.

The Emperor of Germany has accepted the arbitration between Great Britain and the United States, in the dispute respecting a part of the northwestern boundary of the United States, and Minister Bancroft has delivered to the Emperor a memorandum of the American government in regard to the question.

Bismarck has sent a dispatch to the German representative in Paris, setting forth the feeling of exasperation caused in Germany by the outrages perpetrated on her soldiers in France. He threatens to seize hostages in the occupied provinces, unless the assassins in the future, who escape to the neighboring provinces, are delivered to the German officers by the French authorities, and that, unless such a measure is taken, the army of occupation shall be increased, and the expense and burden of its support, which is paid by France, shall be doubled.

A Russian imperial ukase makes compulsory the use of the Russian language in the schools of Poland.

The official organ, in an article on the present aspect of Europe, says, that other Powers should see no danger to themselves in the friendship of Russia and Germany. Their common interests suffice to explain their mutual esteem.

The Roman Catholic Bishops of Holland have united in a memorial to the king, praying him not to discontinue the Dutch Legislation of the Vatican.

The forthcoming Austrian budget bill, it is said, show a considerable surplus in the receipts over the expenditures of the year, instead of a deficit as was anticipated.

Members of the Maleamp Ministry have tendered their resignations to the King of Spain, and another Ministry has been formed with Sagasta at its head.

A London dispatch of the 24th says, that the Prince of Wales is gradually regaining his strength. The progress of convalescence is slow.

The official organ, in an article on the present aspect of Europe, says, that other Powers should see no danger to themselves in the friendship of Russia and Germany. Their common interests suffice to explain their mutual esteem.

Liverpool.—Uplands cotton, 9 a 10d.; Orleans, 10 1/2.

The French Assembly has adjourned until the 5th of next month.

The bill to increase the circulation of the Bank of France for the relief of trade and commerce, was still pending in the Assembly when it adjourned.

UNITED STATES.—In the U. S. Senate, Morrill, of Vermont, reported the House bill appropriating \$4,000,000 for the construction of public buildings at Chicago and San Francisco, to be considered.

A short debate of the bill was passed.

The House of Representatives, by a vote of 134 to 36, has passed a bill to provide for the appointment of a Commission on the subject of wages and hours of labor, and the division of profits between labor and capital in the United States. The Commission is to consist of three persons with a salary of \$5,000 each, to be appointed by the President with the advice and consent of the Senate.

Late advices from the agents and army officers in charge of the Apache Indian reservations, established in New Mexico and Arizona, and a resident of Chicago, and others, in immediate consideration. After a short debate of the bill was passed.

The House of Representatives, by a vote of 134 to 36, has passed a bill to provide for the appointment of a Commission on the subject of wages and hours of labor, and the division of profits between labor and capital in the United States. The Commission is to consist of three persons with a salary of \$5,000 each, to be appointed by the President with the advice and consent of the Senate.

Late advices from the agents and army officers in charge of the Apache Indian reservations, established in New Mexico and Arizona, and a resident of Chicago, and others, in immediate consideration. After a short debate of the bill was passed.

There are now reported to be at Canada Alamosa, 1900; Camp Apache, A. T., 1200; Camp Grant, A. T., 700; Camp Verde, A. T., 500; Camp McDowell, A. T., 100.

No reports have been received at this office from the feeding stations temporarily established until reservations can be selected at Camp Hualapai and Camp Date Creek, where there are probably one thousand men. Without counting these there are more than one-half all the roving Apaches of these territories now at Pecos, within call, reaping the benefits of the peace policy.

Controller Green, of New York, in an official statement, publishes the debt of the city and county on the 16th inst. at \$96,493,186, with cash in hand amounting to \$6,954,949, and a balance in advance which have been expended amounting to about \$6,000,000, and many others are expected. Some of the parties who by fraud and speculation have increased the city debt so enormously, have been arrested in order for their trial.

The interments in Philadelphia last week numbered 554. There were 228 deaths from small pox; 51 of consumption; 29 inflammation of the lungs; 15 congest-

tion of the brain; 11 congestion of the lungs; 10 pleurisy; and 14 disease of the heart.

The winter has been terribly severe in the mid district of Utah, causing a cessation of the shipme ore. A few days since the snow in that region was feet deep on a level, and more snow was falling.

The *Markets*, &c. The following were the quotations on 24th inst. for American cash gold, 108 1/4 U. S. sixes, of 1851, 117; ditto of 1868, 110 1/2; ditto 1862, 100; ditto, 10-40, 5 per cents. 109 1/2. Super floor, \$5.50 a 60; finer brands, \$6.25 a \$10.85, the best for St. Louis "triple extra." Received for the Freedmen, from Friends of R. C. M. Prep. Meeting, through Samuel Williams, \$28.

AN APPEAL.

By recent accounts from the South, we learn the Freedmen, both old and young, are in a very sad condition. Many children are prevented from attending school by want of necessary clothing.

If any Friends would contribute new or partially clothing, bedding or shoes, they would be thank received. Any such donations sent to the Ohio Friends' Freedmen's Association, 116 N. Fourth would be immediately forwarded to suffering people.

On behalf of the Women's Aid Association,
SARAH LEWIS, Secretary.

FRIENDS' BOARDING SCHOOL FOR IND CHILDREN, TUNNESSA, NEW YORK

A suitable Friend and his wife are wanted to charge of this Institution, and manage the Farm connected with it. Application may be made to Ebenezer Wirt, Marshallton, Chester Co., Thomas Wistar, Fox Chase P. O., Philadelphia, Samuel Morris, Olney P. O., Joseph Scattergood, 413 Spruce Street, do.

FRIENDS' ASYLUM FOR THE INSANE

New Frankford, (Twenty-third Ward,) Philadelphia

Physician and Superintendent.—JOSHUA H. WOODWARD, M. D.

Applications for the Admission of Patients made to the Superintendent, or to any of the Bos Managers.

MARRIED, on the 14th inst., at the Friends' Meeting, cor. Ninth and Tenth streets, Wilmington, ISAAC H., son of David S. and Hepsa H. Shearns Philadelphia, (former deceased), to SUSAN W., daughter of William S. and Sarah L. Hilles, of Wilmington.

DIED, in this city, on the 30th of 11th mo. 1878 the residence of his son, ROBERT ALEXANDER, 1878 year of his age, a member of Falls Monthly Meeting of Friends, Bucks county.

—, at the residence of Robert Elliott, Midd Columbia county, Ohio, on the morning of the 12th mo. 1871. AMBROS BOONE, of Pickering, a beloved member of Scipio Monthly Meeting, 37 in 68th year of his age, a member of a firm belief in the doctrines of the Society as held by ancient Friends.

—, on the 14th of 12th mo. 1871, at the residence of her father, near Flushing, Ohio, CINDY E., daughter of Daniel and Martha S. Williams, aged 25 years.

Central Arabia.

In 1862-3 an exploration of the central parts of Arabia was undertaken by an Englishman named William G. Palgrave. The difficulties and dangers to be encountered were considerable, arising in part from the remoteness of the country, but much more from the bigoted and intolerant character of the people who inhabit it. The parts under the control of the Turkish authorities, adjacent to the Persian Gulf and the coasts of the Red Sea, and the whole of the region bordering on the Persian Gulf have often been visited, and are comparatively well known. In those parts commercial intercourse with other nations has gone on so far that exclusiveness and self-conceit have led isolated nations to look with contempt and enmity on foreign people. But to the inhabitants of the central plateaus of Arabia, who know but little of the outside world, all others are infidels or heretics; and they are perhaps the most fanatical people on the face of the earth, it may easily be seen to venture within their territory is a hazardous enterprise for an unprotected traveller.

Our author had resided long in the East, and being very familiar with the customs of the Arab nations and quite at home in the Arabic language, he decided to go in the guise of a physician from Damascus, seeking practice. He was attended by a native Syrian in whom he could entirely confide, and carried with him a quantity of coffee as an article of luxury, and a well-selected assortment of drugs to be used in curing the sick he might meet. Their general route was from north-west to south-east. He commences his narrative with their departure from Ma'an, a station on the east of the Dead Sea, and on the pilgrim route from Palestine to Mecca. From this point they struck off almost due east into the desert, having a distance of about 200 miles to traverse before they reached the first inhabited or indeed inhabitable spot. The route of their daily march is thus described: "Long before dawn we were on our way, and advanced till the sun, having attained about midway between the horizon and the zenith, we ceased the moment of alighting for our morning meal. This our Bedouins always

took good care should be in some hollow or low ground, for concealment's sake; in every other respect we had ample liberty of choice, for another patch of black pebbles with a little sand and withered grass between was just like another; shade or shelter, or anything like them, was wholly out of the question in such 'nakedness of the land.' We then alighted, and my companion and myself would pile up the baggage into a sort of wall, to afford a half-screen from the scorching sun-rays, and here recline awhile. Next came the culinary preparations, in perfect accordance with our provisions, which were simple enough; namely, a bag of coarse flour mixed with salt, and a few dried dates; there was no third item on the bill of fare. We now took a few handfuls of flour, and one of the Bedouins kneaded it with his unwashed hands or dirty bit of leather, pouring over it a little of the dingy water contained in the skins, and then patted out this exquisite paste into a large round cake, about an inch thick, and five or six inches across. Meanwhile another had lighted a fire of dry grass, colocynth roots, and dried camel's dung, till he had prepared a bed of glowing embers; among these the cake was now cast, and immediately covered up with hot ashes, and so left for a few minutes, then taken out, turned, and covered again, till at last half-kneaded, half-raw, half-roasted, and burnt all round, it was taken out to be broken up between the hungry band, and eaten scalding hot, before it should cool into an indescribable leathery substance, capable of defying the keenest appetite. A draught of dingy water was its sole but suitable accompaniment.

"The meal ended, we had again without loss of time to resume our way from mirage to mirage, till 'slowly flaming over all, from heat to heat, the day decreased,' and about an hour before sunset we would stagger off our camels as best we might, to prepare an evening feast of precisely the same description as that of the forenoon, or more often, for fear lest the smoke of our fire should give notice to some distant rover, to content ourselves with dry dates, and half an hour's rest on the sand."

As they approached the termination of this part of the journey, they encountered a sermoon: "Here, however, an incident occurred which had well nigh put a premature end to the travels and the travellers together. My readers, no less than myself, must have heard or read many a story of the sermoon, or deadly wind of the desert, but for me I had never yet met it in full force; and its modified form, or sheloek, to use the Arab phrase, that is, the sirocco of the Syrian waste, though disagreeable enough, can hardly ever be termed dangerous. Hence I had been almost inclined to set down the tales told of the strange phenomena and fatal effects of this 'poisoned gale' in the same category with the moving pillars of sand, recorded in many works of

higher historical pretensions than 'Thalaba. At those perambulatory columns and sand smothered caravans the Bedouins, whenever I interrogated them on the subject, laughed outright, and declared that beyond an occasional dust storm, similar to those which any one who has passed a summer in Seinde can hardly fail to have experienced, nothing of the romantic kind just alluded to occurred in Arabia. But when questioned about the sermoon, they always treated it as a much more serious matter, and such in real earnest we now found it.

"It was about noon, the noon of a summer solstice in the unclouded Arabian sky over a scorched desert, when abrupt and burning gusts of wind began to blow by fits from the south, while the oppressiveness of the air increased every moment, till my companion and myself mutually asked each other what this could mean, and what was to be its result. We turned to enquire of Salim, but he had already wrapped up his face in his mantle, and bowed down and crouching on the neck of his camel, replied not a word. His comrades, the two Sherarat Bedouins, had adopted a similar position, and were equally silent. At last, after repeated interrogations, Salim, instead of replying directly to our questioning, pointed to a small black tent, providentially at no great distance in front, and said, 'try to reach that, if we can get there we are saved.' He added, 'take care that your camels do not stop and lie down;' and then, giving his own several vigorous blows, relapsed into muffled silence.

"We looked anxiously towards the tent; it was yet a hundred yards off, or more. Meanwhile the gusts grew hotter and more violent, and it was only by repeated efforts that we could urge our beasts forward. The horizon rapidly darkened to a deep violet hue, and seemed to draw in like a curtain on every side; while at the same time a stifling blast, as though from some enormous oven opening right on our path, blew steadily under the gloom; our camels too began, in spite of all we could do, to turn round and round and bend their knees preparing to lie down. The sermoon was fairly upon us.

"Of course we had followed our Arab's example by muffling our faces, and now with blows and kicks we forced the staggering animals onwards to the only asylum within reach. So dark was the atmosphere, and so burning the heat, that it seemed that hell had risen from the earth, or descended from above. But we were yet in time, and at the moment when the worst of the concentrated poison-blast was coming around, we were already prostrated one and all within the tent, with our heads well wrapped-up, almost suffocated indeed, but safe; while our camels lay without like dead, their long necks stretched out on the sand awaiting the passing of the gale.

"On our first arrival the tent contained a solitary Bedouin woman, whose husband was

away with his camels in the Wadi Sirhan. When she saw five men, like us, rush thus suddenly into her dwelling without a word of leave or salutation, she very properly set up a scream. Salim hastened to reassure her by calling out 'friends,' and without more words threw himself flat on the ground. All followed his example in silence.

"We remained thus for about ten minutes, during which a still heat like that of red-hot iron slowly passing over us was alone to be felt. Then the tent walls began again to flap in the returning gusts, and announced that the worst of the smooom had gone by. We got up, half dead with exhaustion, and unmuffled our faces. My comrades appeared more like corpses than living men, and so, I suppose, did I. However, I could not forbear in spite of warnings, to step out and look at the camels; they were still lying flat as though they had been shot. The air was yet darkish, but before long it brightened up to its usual dazzling clearness. During the whole time that the smooom lasted, the atmosphere was entirely free from sand or dust; so that I hardly know how to account for its singular obscurity."

(To be continued.)

Memoirs of Mildred Ratcliff.

(Continued from page 148.)

The following letter to M. R., from Ezra Gillingham, of Baltimore—probably a young lawyer—was written near this time. It affords another testimony to the interesting fact, that the visitations and the stringings of the Lord's Holy Spirit are often at work within, when there may not be much evidence thereof. But like locked rooms, how easily the wards of the heart open when the right key is presented. There can be no doubt that full many, when the light of Christ Jesus shines upon them, see the right and approve it too; yet, in whose cases too often Satan catcheth away that which is sown, from the unquiet listless heart.

"Baltimore, 12th mo. 3d. —

"Dear Friend.—Thy letter was very welcome to me, especially as it was received at one of those moments when the soul seems about equally to love earth and heaven. The honors of the world are the medium by which a man in my profession must obtain subsistence; but I dare not neither seek them, nor hold them. Thy letter tended to add a wing to the pursuit after Divine enjoyment, and to weaken the desire after worldly dignity.

"It is astonishing that the world of time should ever claim as much of our affection, as the world of eternity. Yet men can calmly relinquish the latter, even when every enjoyment of temporal blessings is cut off. It must be a more difficult thing to turn back from the search for eternal rewards, after one has tasted of the 'good world of life.' There are moments, however, in which even those who have bound themselves to the service of their Sovereign, feel a veil as it were hung between Him and them, and the world around seems to possess peculiar attractions. This is a moment of severest trial. If the heart can be preserved pure and faithful in its allegiance, through this condition, how sweet is the reward!

"My mind has often accompanied thee in thy journey since thou left us. The duty which thou art engaged in, is arduous, but

there must be, I have often thought, a satisfaction in being called to fulfil our Lord's command literally—to leave all and follow Him. The heart then rests upon its Saviour, as its comforter. It is taking no thought, what shall we eat, or what shall we drink, or whether will shall we be clothed! It feels no temptation for these things after which the Gentiles seek; but its meat and drink are to do the will of our Father which is in heaven. True, at all times, this should be our meat and our drink; but the dutiful child feels the greatest delight when its father finds employment for it.

"Our Heavenly Father has given us a wise and a merciful dispensation. It is not the number, nor the importance of the works which we perform, that gives acceptance in His sight. 'Though I bestow all my goods to feed the poor, and though I give my body to be burned, and have not charity, it profiteth me nothing.' Every work which is acceptable must be performed in the heart, whether it be accompanied by external acts or not. The first scene of the operation must be in the heart. 'Lord,' said Isaiah, 'thou wilt ordain peace for us; for thou hast wrought all our works in us.' Oh that we could love Him more.

"The period when we are forever to be fixed often looks awful to me. How shall one appear before the Judge, without his sins have been washed away in the blood of the Lamb, and he clothed with the white garment of salvation.

"If thou should at any time find sufficient leisure, and the will to occupy it in writing to me, a few lines from thee will be acceptable.

Thine sincerely,

EZRA GILLINGHAM."

From Elizabeth Gillingham to Mildred Ratcliff.

"Baltimore, 12th mo. 8th, —

"My Dear Friend.—Thou hast very frequently been the subject of my thoughts since thou left us. I feel thee to be a sympathizing friend, and when we meet with such, how edifying, how strengthening, how encouraging! But I am so unworthy of the least favor that it seems as though I needed continual chastisement. When I look around and see the progress some, under very unpropitious circumstances have made, and consider the advantages which I have had, without greater improvement, I feel discouraged, and sometimes am ready to conclude I never shall attain any good. My feeble efforts seem unavailing, and I fear I shall be of the number of those who shall strive to enter in, but shall not be able.

"I feel my want of faith. Oh! that I could ask it of God without wavering; then it would be given; but not until it is thus asked for. I see no other way but to endeavor to keep striving with all my might, trusting the event to the Allwise Giver, who still bestows His grace upon the truly humble. O this humility, how have I coveted it! There have been seasons when I thought I could say with truth, 'I am the clay, thou art the Potter.' O that I could always realize this feeling! I know it will not do to be feeding on the manna of yesterday, but that we must every day gather a fresh supply.

"Our ancient friend R. T., since thou left us, has had something like a paralytic stroke, which deprived her of recollection nearly all one day. I called to see her soon after, and

found her quite as well as usual, possessing the love and innocence of a true Christ. How encouraging, how animating it is, to hold religions beams grow brighter in evening of life, and that they have so lived! 'yesterday look backward with a smile,' ask myself what comparison will a life devoted to this world bear with the above. Will not cry out, O that I may live the life of righteous, that my latter end may be like theirs.

"I wish to be affectionately remembered dear Mary [Mildred's companion.] I desire she will not suffer discouragements to do. She will find her reward to increase according to her labor.

"Thy affectionate though unworthy friend,
ELIZABETH GILLINGHAM.

B. W. Ladd to Mildred Ratcliff.

"Prospect Hill, near Smithfield, Ohio, 1829

"Beloved Friend.—To the living member of the church, beautiful indeed must be thy feet upon the mountains who go forth with gospel tidings—those who are ready to sue with the seed when and where it is under-fering, that they may reign with it when it where it reigns. The labor of these dear servants, of whom I esteem thee, dear Mildred, one, cannot fail of being a blessing visited. Although under a sense of th own insufficiency, as men or women for arduous work, they may go out weeping, as their sole dependence is upon the pot from on high, from whence all true missions flows, they will be favored to return again with sheaves of sweet peace.

"I sometimes think there is nothing ab which our time and substance can be employed so usefully, as in bringing the minds of people to an acquaintance with that inw principle [a manifestation of the Spirit of God] a measure of which, in mercy, has been communicated for our safe guidance through probationary state. Were it not for the instructions of those teachers who are seeing their gain from their quarter, I have thought this blessed principle would ere this have gained a more universal acknowledgment amongst the children of men.

"Notwithstanding thou, my dear friend the progress of thy present journey, may sometimes have to exclaim with one former, 'Who hath believed our report; and to what hath the arm of the Lord been revealed,' as thou art diligently engaged in the discharge of duty to Him who hath called thee to work of the ministry, thou wilt, beside seeing the penny of peace in thy own experience be instrumental in hastening the blessed when the knowledge of the Lord shall cover the earth as the waters do the sea.

"You will doubtless have heard before thy gets to hand, of the death of James Steer, a father in Israel we may regret the loss him, but believing he was gathered like a stalk, we have reason to hope our loss is eternal gain. I would have Mary [his daughter] to remember one of the highest anthems sung in the heavenly mind is, 'Thy will done.'

"I may say in conclusion, dear friend, near unity and love is with thee and thy companions in your present embassy, and as I feel much interested in your safe and satisfactory getting along, shall be pleased to hear from you.

"In breathing desires that He that sa

out, may condescend to be present and go
ere you, I conclude in much love, in which
joined by my dear Elizabeth, thy friend

B. W. LADD.

(To be continued.)

Alpine Climbing.

(Continued from page 150.)

ur way now lay up the couloir; the snow
steep, but knobby, and hence but few
steps were required to give the boots a hold.
I crossed and recrossed obliquely, like a
drawing a laden cart up hill. At times
I paused and examined the heights. The
ended in the snow fields above, but near
summit suddenly rose a high ice-wall. If
permitted in the couloir, this barrier would
be to surmount, and the possibility of
ing it was very questionable. Our atten-
therefore was turned to the rocks at our
t, and the thought of assailing them was
several times mooted and discussed. They
length seduced us, and we resolved to
ndon the snow. To reach the rocks, how-
ever, we had to recross the avalanche chan-
nel which was here very deep. Benen hewed
up at the top of its flanking wall, and
scraping over, scooped steps out of its vertical
ice. He then made a deep hole, in which he
crossed his left arm, let himself thus partly
up, and with his right pushed the steps to
bottom. While this was going on, small
stones were continually flying down the gully.
When I reached the floor, and I followed. Our
panion was still clinging to the snow
when a horrible clatter was heard over-
head. It was another stone avalanche, which
was hardly a hope of escaping. Happily
the rock was here firmly stuck in the bed
of the gully, and I chanced to be beside it
when the first huge missile appeared. This
was the delinquent which had set the others
in motion. I was directly in the line of fire, but
stepping behind the boulder, I let the projec-
tile shoot over my head. Behind it came a
rain of smaller fry, each of them, however,
not competent to crack a human life.
"Snell!" with its metallic clang, rung from
the throat of Benen; and never before had I
seen his axe so promptly and vigorously ap-
plied.

While this terrible cannonade was directed
at us, we hung upon a slope of snow which
had been pressed and polished to ice by the
falling stones; and so steep that a single
step would have converted us into an avalanche
also. Without steps of some kind we
could not set foot on the slope, and these had
I cut while the stone shower was falling
down.

Here scratches in the ice, were all that
could accomplish, and on these we steadied
ourselves with the energy of desperate men.
Benen was first, and I followed him, while
the snow flew thick beside and between us.
My excellent guide thought of me more than
of himself and once caught upon the handle
of his axe, as a cricketer catches a ball upon
his bat, a lump which might have finished my
life. The labor of his axe was here for the
times divided between the projectiles and the
ice, while at every pause in the volley, he cut
a step and sprang forward. Had the peril
ceased, it would have been amusing to see
his buckings and contortions as we fenced
against our swarming foes. A final jump landed
us on an embankment out of the direct line
of the avalanche, and we thus escaped a danger,
extremely exciting to us all.

We had next to descend an ice-slope to a
place at which the rocks could be invaded.
Here Andermatten slipped, shot down the
slope, knocked Benen off his legs, but before
the rope had jerked me off mine the guide
had stopped his flight. The porter's hat, how-
ever, followed the rushing stones. It was
shaken off his head and lost. If discipline for
eye, limb, head and heart, be of any value,
we had it, and were still likely to have it
here. Our first experience of the rocks was
by no means comforting; they were uniformly
steep, and as far as we could judge from a
long look upwards, they were likely to con-
tinue so. A stiffer bit than ordinary inter-
vened now and then, making us feel how pos-
sible it was to be entirely out off.

We at length reached real difficulty num-
ber one. All three of us were huddled to-
gether on a narrow ledge, with a smooth and
vertical cliff above us. Benen tried it in var-
ious ways, but he was several times forced
back to the ledge. At length he managed to
hook the fingers of one hand over the top of
the cliff, while to aid his grip he tried to fas-
ten his shoes against its face. But the nails
scraped freely over the granular surface, and
he had for a time to lift himself almost by
a single arm. As he did so he had as ugly a
place beneath him as a human body could
well be suspended over. We were tied to him,
of course; but the jerk, had his grip failed,
would have been terrible. He raised at length
his breast to a level with the top, and leaning
over it he relieved the strain. Seizing upon
something further on, he lifted himself quite
to the top; then tightened the rope while I
slowly worked myself over the face of the cliff
after him. We were soon side by side, and
immediately afterwards Andermatten, with
his long unkempt hair, and face white with
excitement, hung midway between heaven
and earth, supported by the rope alone. We
hailed him up bodily, and as he stood upon
the ledge his limbs quivered beneath him.

We now strained slowly upwards amid the
maze of crags, and scaled a second cliff, re-
sembling, though in a modified form, that just
described. There was no peace, no rest, no
delivery from the anxiety which weighed
upon the heart. Benen looked extremely
blank, and often cast an eye downward to the
couloir we had quitted, muttering aloud, "Had
we only held on to the snow." He had soon
reason to emphasize his ejaculation.

After climbing for some time, we reached a
smooth vertical face of rock from which, right
or left, there was no escape, and over which
we must go. Benen first tried it unaided, but
was obliged to recoil. Without a lift of five
or six feet the thing was impossible. When
a boy I have often climbed a wall by placing
a comrade in a stooping position, with his
hands and head against the wall, getting on
his back, and permitting him gradually to
straighten himself till he became erect. This
plan I now proposed to Benen, offering to
take him on my back. He however preferred
mounting on Andermatten, so the porter got
upon the ledge, and fixed his knee for Benen
to stand on. In this position my guide ob-
tained a precarious grip, just sufficient to en-
able him to pass with safety from the knee to
the shoulder. He paused here, and pulled
away such splinters as might prove treacher-
ous if he laid hold of them. He at length
found a firm one, and had next to urge him-
self, not fairly upward, for right above us the

top was entirely out of reach, but obliquely
along the face of the cliff. He succeeded,
anchored himself, and called upon me to ad-
vance.

The rope was tight, it is true, but it was
not vertical, so that a slip would cause me to
swing like a pendulum over the cliff's face.
With considerable effort I managed to hand
Benen his axe, and, while doing so my own
staff escaped me and was irrecoverably lost.
I ascended Andermatten's shoulders as Benen
did, but my body was not long enough to reach
the guide's arm, so I had to risk the possi-
bility of becoming a pendulum. A little pro-
trusion gave my left foot some support. I
suddenly raised myself a yard, and here was
met by the iron grip of my guide. In a second
I was safely stowed away in a neighboring
fissure. Andermatten now remained. He
first detached himself from the rope, tied it
round his coat and knapsack, which were
drawn up. The rope was again let down, and
the porter tied it firmly round his waist. It
was not made in England, and was perhaps
lighter than it ought to be; so to help it hands
and feet were scraped with spasmodic energy
over the rock. He struggled too much, and
Benen cried sharply to him. The poor fellow
looked very pale and bewildered as his bare
head emerged above the ledge. His body
soon followed.

The young man seemed to regard Benen
with a kind of awe. "Sir," he exclaimed, "you
would not find another guide in Switzerland
to lead you up here." Nor, indeed, in Benen's
behalf be it spoken, would he have done so if
he could have avoided it; but we had fairly
got into a net, the meshes of which must be
resolutely cut. I had previously entertained
the undoubting belief that where a chamois
could climb a man could follow; but when I
saw the marks of the animal on these all but
inaccessible ledges, my belief, though not
eradicated, became weaker than it had previ-
ously been.

Onward again, slowly winding through the
agony mazes, and closely scanning the cliffs
as we ascended. Our easiest work was stiff,
but the "stiff" was an agreeable relaxation
from the perilous. By a lateral deviation we
reached a point whence we could look into
the couloir by which Mr. Tucket had ascend-
ed: here Benen relieved himself by a sigh and
ejaculation: "Would that we had chosen it!
we might pass up yonder rocks blindfold!"
But repining was useless; our work was
marked out for us and had to be accomplished.
After another difficult tug Benen reached a
point whence he could see a large extent of
the rocks above us. There was no serious
difficulty within view, and the announcement
of this cheered us mightily. Every vertical
yard, however, was to be won only by stren-
uous effort. For a long time the snow crev-
ices hung high above us; we now approached its
level; the last cliff formed a sloping stair with
geologic strata for steps. We sprang up it,
and the magnificent snow-field of the Gorner
glacier immediately opened to our view. The
anxiety of the last four hours disappeared like
an unpleasant dream, and with that keen en-
joyment which perfect health can alone im-
part, we consumed our cold mutton and cham-
pagne on the summit of the old Weissthor.

Knowledge is proud that he has learned so
much; Wisdom is humble that he knows no
more.

For "The Friend"

A Short Biography of Mary Griffin.

The name of Mary Griffin has long been familiar to many of the present generation; and the few gleanings or traditional accounts left us, have led some of her descendants to desire some written information respecting her; in order that her piety and devotion to the cause of the Truth might be more known and appreciated.

It is much to be regretted that most of the manuscripts in her own hand writing have been lost; yet from materials gleaned from various sources, the following narrative has been compiled, in the hope that it may encourage others to accept the offers of a Saviour's love.

Mary Palmer was born in Stonington, Connecticut, in the Fifth month, 1710. Her parents were members of the Presbyterian Society; and being zealous in their profession, endeavored to educate their daughter agreeably thereto.

In early childhood her mind was tenderly visited with the influences of Divine love. In allusion to which seasons of favour she writes: "I do certainly know from a degree of experience, that the Holy Spirit is moving on the minds of children in early life, reproving for evil, and justifying for well doing. I often, in such youthful seasons, retired alone, and secretly desired that if I was spared to arrive at womanhood, the Lord would enable me to become a good woman. But from not yielding to the manifestations of Truth, my mind was led into many vanities incident to youth, for which I was often reproved. On one occasion I was met with in a very unexpected manner, as follows:—Being engaged on the floor in a dance, I was solemnly impressed with the sad effects of misspent time; and immediately retired and took my seat. The company appeared surprised and inquired the cause! I honestly told them I could not take another step in that way, and accordingly did not."

A remarkable instance is related of her knowledge and quickness of apprehension. When about six years of age, hearing her parents conversing about their minister's salary, or his perquisites, her mother advised to liberality, saying we must not starve the gospel! Starve the gospel, mother, said the child! that we cannot do, for "it is the power of God unto salvation to every one that believeth."

When quite young she was united in marriage with William Moore; who with herself became the subject of conversion, and remained a faithful advocate for the Redeemer's cause until the close of his useful life.

In reference to her conviction she says: "I was unacquainted with the Society of Friends until led to attend one of their meetings appointed for a minister who was travelling through the country in Truth's service. When informed of this meeting I felt a desire to attend it. But my husband being from home, and not having any attendant to whom I could commit the care of my children during my absence, I did not know at first how to accomplish it; but finally concluded to get them to sleep, and then leave them to the care of a kind Providence, saying secretly, I have faith to believe they will be protected until my return. This meeting was held some four miles distant; and on my way I was obliged to cross a stream which had risen so

high that it covered a small bridge over which I was expecting to pass. Being on foot, this seemed an obstacle not easily surmounted; nevertheless, fully believing that it was my duty to go, I did not give up my intention, but waded through the strong current of the stream without receiving any material injury.

"During this meeting my Heavenly Father was pleased to visit me in a wonderful manner! May I never forget His gracious dealings. The following passage of Scripture presenting, I believed it right to express it: 'Though thou exalt thyself as the eagle, and though thou set thy nest among the stars, thence will I bring thee down, saith the Lord.' After the meeting was over, I returned home, rejoicing that I had gone."

For some time she did not see the impropriety of adorning her person with the gay attire to which she had been accustomed in the Society to which she belonged. Meanwhile a Friend addressed a meeting which she attended in these words: "Laces proceed from pride; pride is sin; and sin will lead down lower than the grave." I was then made sensible of the inconsistency of my dress, and immediately laid aside those parts which I saw were superfluous.

Her mind being confirmed in the truths of the gospel as professed by Friends, she soon applied for membership, and was received. After which she writes: "My husband having also become convinced of the Truth, we entered into a solemn covenant with Almighty God to dedicate ourselves, body, soul, and spirit, unto Him; promising, through His grace, to serve Him in newness of life; and, depending always on a measure of His Spirit to abilitate us to do His will; fully believing His mercy and love will be extended. This covenant appears to have been solemnly entered into the 15th day of the Third month, 1740, and signed by Mary and her husband. Upon which, in M. M.'s hand writing, dated Nine Partners, 3d mo. 1st, 1732, is the following endorsement: "This was written almost in the first of our conviction; and, as it was signed I believe in the simplicity of our hearts, I thought best to leave it behind me; hoping that where we failed in performing it, mercy will be extended to us.—MARY MOORE."

In the year 1750, she removed with her husband to Dutchess Co., N. York, where she continued to reside until the death of the latter. The truly christian resignation with which this event was met, is evinced by the following remarks: Although the Lord has seen meet to try me in the very sudden death of my dear husband, he has not left me comfortless, but has been near to sustain; and has given me the assurance that the change is a happy one; so that I can truly say, my soul has been brought into subjection to the great Disposer of events, believing he wounds to heal, and kills to make alive. May I ever trust in him; for he remains to be a Father to the fatherless, and the widow's Judge.

(To be continued.)

Euclid, a disciple of Socrates, having offended his brother, he cried out in a rage, "Let me die, if am not revenged on you one time or other;" to whom Euclid replied, "And let me die, if I do not soften you by my kindness, and make you love me as well as ever." What a reproof to unforgiving professors of Christianity.

A WINTER LILLY.

The bitter days are here,
And all the snow world stretches wide and drear—
No bird songs thrill the air,
For Winter reigns relentless everywhere.

Without are storm and woe,
Within are summer's warmth, and joy, and glow,
Without are want and dearths
Snow-drifts, and leafless stems, and frozen earth.

Within all creamy white,
A royal lily opens to the light—
Lovely beyond compare,
And sending up a perfume like a prayer.

White robed evange! lo,
Thy shining raiment shames the pallid snow,
But thou art meek and fair,
Thou hast not murmured at the bitter air—

Nor lost the time of snows,
In weak regrets or indolent repose—
Nor grieved because thy bloom
Has come to thee in Winter's chilliest gloom—

Nor pined unthankfully
Because thy life has known a tenderer sky—
Nor yearned unsatisfied
That no sweet kindred blossomed at thy side.

More wise alas than I,
Who have not smiled into the wintry sky—
But wept that frowning fate
Made my soul's flowering time so cold and late.

No loving faith like thine
Makes my life blossom and my garments shine,
No fragrant flower of praise
Blooms up to Heaven, out of my barren days.

But thy unflinching trust—
It bids me lay my forehead in the dust,
And learn, thy white life through,
To be more brave, more patient, and more true.

Florence Per

SHORT WORDS.

BY J. ADDISON ALEXANDER.

[This poem is remarkable as a specimen of what he done in vigorous, forcible writing, using only *v* of one syllable.]

Think not that strength lies in the big round work
Or that the brief and pithy must needs be weak.
To whom can this be true who once has heard
The cry for help, the tongue that all men speak.
When want, or woe, or fear is in the throat,
So that each word gasped out is like a shriek
Pressed from the sore heart, or a strange wild note
Sung by some lay or fiend! There is a strength
Which dies if stretched too far or spun too fine;
Which has more height than breadth, more c
than length.

Let but this force of thought and speech be mine,
And he that will may take the sleek, fat phrase
Which glows and burns not, though it gleam
shine.

Light but not heat,—a flash but not a blaze!
Nor is it mere strength that the short word boasts,
It serves of more than light or storm to tell,—
The roar of waves that clash on rock-bound coasts.
The crash of tall trees when the wild winds sweep
The roar of guns, the groans of men that die
On blood-stained fields. It has a voice as well
For them that far off on their sick-beds lie,
For them that weep, for them that mourn the old
For them that laugh, and dance, and clap the hand
To Joy's quick step, as well as Grief's low tread.
The sweet plain words we learned at first keep them
And, though the theme be sad, or gay, or grand,
With each, with all, these may be made to chime,
In thought, or speech, or song, or prose, or rhyme.

THE MONT CENIS tunnel is not the one through the Alps. More than two hundred years ago a tunnel was built by the Marquis of Saluces, through the Mt. Viso, at whose foot the Po rises. It is about one-sixth as long as the Mont Cenis tunnel, and, considering the difference in methods and implements in use, it was q

old an undertaking. It opens on the one side, at the very source of the Po, at 2600 yards above the level of the sea, more than 2150 yards of its length is in a straight line through the solid rock the very heart of the Alpine chain. It intended to be used as a turnpike road, is to this day the only direct route to Embrun to Saluces. Partly destroyed by the King of Sardinia, so as to impede the invasion of the French Republican army, it was afterward repaired and improved by Napoleon I. Strange that such a world had have been almost forgotten, and had now be of no practical use.—*North American*.

Blessed Toil.

For "The Friend."

Steadfast, immovable, always abounding in the aid of the Lord, inasmuch as ye know your labor is in vain in the Lord."

A Monthly Meeting, held the eighth of the month last, with a voice clearer than has been his for some time past, our aged friend S. Cope, spoke for our hearing the charge of the Apostle, commenting a word thereon. Vividly his countenance beamed the conflicting emotions and feelings in his mind. The present retrospect of the past, how solemn it is, when sensible the future of time is bounded by but one more.

"Steadfast, immovable" in that he believed to be right; the fruit of these labors are not before him, but the cup of discouragement is presented and tasted of a little. Yet it was his closing testimony amongst us, "Do not know that that which was done in the Spirit of God, will not be in vain; for the Lord is sufficient for His own work."

Our ministering Friend, who sat by him, related (in the course of Gospel labor) another anecdote, "Strip Aaron of his garments," which he thought of our aged brother, and it proved so; ere the week had closed he was warned of that which must be laid down; smiling no more for his backsliding people; overlooking them where his desires and his labors had tended to bring them. Yet no one he has entered that rest where works in the Lord do follow, and is forever safe from conflicts that we must still have to conquer with, till safely entered into the Promised land.

Much as we prize the active worth

Of those who, day by day,

Tread with us on this toilsome earth

Its devious, thorny way;

A charm more beloved and profound,

By purer feelings led,

Imagination casts around

The memory of the dead!

Western county, 11th mo. 1871.

For "The Friend."

The editorial in the last number of "The Friend" gave no account of the "General Meeting" held last month at Brooklyn, perceiving it would interest the readers of that journal to peruse the following extracts from an article copied into "The Providence Daily Journal" of the 23d ult. It is well for Friends to know the proceedings at any of these meetings strike those who are not in our membership. It is observable that the accounts prepared for circulation among the members of the Society omit very many of the circumstances attendant on these meet-

ings, which are so glaringly inconsistent with the religious profession of Friends, as to excite alarm among those not yet prepared to approve them. This misleads, by not telling the whole truth, though it may be accompanied with an observation that some things occurred not altogether satisfactory.

A NEW DEPARTURE OF THE FRIENDS.

The New York correspondent of the "Boston Journal," under the date of Dec. 8th, writes as follows:

One of the most remarkable religious movements of the age is now going on in Brooklyn. It is a protracted meeting held by the Friends. It has been in session over a week and continues with unabated interest. Three services are held a day, and the plain brick meeting house is crowded. No revival meetings and no camp meeting—not even Round Lake—exceed in interest, in fervor, and in enthusiasm this staid sect.

The most eminent ministers, both men and women, have had charge of these meetings. Mr. Douglas leads. He has been invited to half the pulpits of Brooklyn. He could preach to crowds for a month, if he would stay. The most eloquent preachers from the south, the west, from the north and from Europe are in attendance. The elders' seats—not unlike the bench of a judge—will hold about thirty, and is crowded. A few brethren are dressed in Quaker costume. The most of them are in the garb of the world. The lady preachers wear the Quaker cap, and, with few exceptions, wear no ornaments. Some of the lady preachers are eloquent and dramatic beyond description. They work the audience to such a pitch of excitement, that some cannot contain themselves, but screech and scream, cry amen, and groan. It would take but a slight stretch of imagination to suppose oneself in a red-hot glowing camp meeting. The foremost preacher is Miss Smiley. She is chaste, learned, fluent and impressive. Anna Dickinson never controlled an audience as Miss Smiley does. She wore the Quaker cap, but had on black gloves and allowed a golden ornament to dangle from her neck. The dramatic speaker is Esther Frame. She is the Gough of the assembly. She stirs up her hearers like a trumpet. She is about forty years old—tall and commanding—with a sonorous voice. She was a Methodist, became a convert to the Friends, and brings the fervor and intensity of her old faith to her new field. Mrs. Lucas is a sister of John Bright, and is a visitor from England. Caroline Talboth, Esther Tuttle and others make up the force.

On Thursday night I looked in on this remarkable movement. The house was crowded, aisles and all. Men and ministers of all denominations were present. The service began at half after seven, and continued till ten. There was no singing, no change of posture, yet the interest never flagged one moment. A brief Scripture was read, and Mrs. Smiley occupied nearly an hour in a sermon, and was very eloquent. She was followed, one after another, till five or six spoke. Esther Frame—on the Two Roads, the Broad and the Narrow, with their terminations—with her impassioned gestures and fervid descriptions of Heaven and Hell, actually thrilled the audience. The meeting was then thrown open to all Christians present. At least a dozen persons participated. Persons desirous of salvation were called on to rise,

Several arose. A morning inquiry meeting was appointed for all who wanted to be saved or wanted holiness. The meeting was closed by the rising of the whole congregation and repeating in concert a verse of Scripture, and repeating also in the same manner the Long Meter Doxology. During the services several oral prayers were offered.

"I wanted to sing," said an enthusiastic Presbyterian elder at its close. "If thee had sung," said a Friend, "thee would have found quite a number feeling the same way." Looked at from any standpoint this movement is a very remarkable one.

For "The Friend."

Mary Pryor.

The publication in a late number of "The Friend" of the account of the shipwreck of Mary Pryor, taken from the "British Friend," has revived some other particulars chiefly connected with her sojourn in this country, which may be worthy of personal notice, some of which have not hitherto been published.

Upon the arrival of the schooner Archibald, Capt. Macy with the passengers saved from the wrecked ship Fame, in the Delaware opposite Philadelphia, J. Willis, a Friend of this city, learning that a woman Friend was on board, proceeded to the vessel and invited her to his house. On being landed at Chestnut street wharf, although rain was falling at the time, Mary Pryor immediately knelt, surrounded by the sailors and others, and returned thanksgiving and praise for their great deliverance.

A copy of an old manuscript account of this circumstance states: "The following though penned from memory, is believed to be nearly verbatim what was delivered by her:

"It is under a reverent sense of thy gracious dealings, O Lord! and of thy infinite mercy in casting up a way on the troubled sea for our deliverance, and of thy condescension in supporting me by thy Divine power, when to appearance we were likely to be closed by the deep, for which my soul bows in thankfulness to thee. And be pleased, O Lord! to be with me and direct my steps, that what little good in the promotion of righteousness in this part of the world, thou seest meet to pass through me, may proceed from thee, thou matchless, merciful God. Be with my affectionate husband, and support him through all trials thou mayst see fit to inflict. Be with my dear children, who affectionately care for me. O Lord, be pleased to be with the instrument thou wast pleased to use for our deliverance; vouchsafe to him of thy spiritual favor of blessings; give him an increase of light and knowledge, as also of the things of this world. Be with his wife; afford of thy gracious favor unto her; support her mind in the absence of her husband, and let them again be favored to meet together. And O, Lord! keep me humble and attentive to thy will, an unworthy worm, whom thou hast graciously cared for, and vouchsafed to assist with thy Divine aid in the needful time; who art God over all and worthy of all praises, amen!"

On the same day that she arrived she thus communicated the information of her remarkable deliverance to her family.

Philadelphia 15th of 3d mo. 1797.

MY DEAR HUSBAND AND CHILDREN.—I

that love which alters not do I affectionately salute you, and inform you of my safe arrival in this city, being favored with a remarkable preservation by leaving our ship Fame and shipping on board the schooner Archibald, Edmund Macy, master, a valuable young man, who took us all on board, and more like an affectionate son than a stranger. We got a few put on board a New York vessel. Many Friends have already called at a Friend's house near the wharf where I now write, thinking a vessel might sail, and no time to lose, lest you should bear a worse account. (Signed,) MARY PRYOR.

The manuscript account above referred to states that when the instrument of her deliverance, Capt. Macy, was about returning to Halifax, he was presented with two hundred dollars by Friends of this city as a recognition of his humane exertions. He died about five years after, leaving a good report.

The next day Mary Pryor again wrote to her family. "I am now at James Pemberton's, brother to my late beloved friend John; my landlord and his beloved Phebe appear as a prince and princess, both outwardly and inwardly; already more than twenty visitors have called. * * I do not know if I told you I got a good place for our steward, and that he saved my little trunk and my dollars."

This little trunk or box a few inches square has been preserved by her descendants, and at that time probably contained a few letters which Mary Pryor brought with her, and which, with the credentials of the unity of her friends, appear to have been the only articles, excepting the clothing upon her, she saved. There is a tradition that shortly before she embarked, Thomas Scattergood, who was then in England, entrusted to her care a small package directed to his wife, with the remark "This will go safe." Three letters written by Thos. Scattergood, were however brought safely by Mary Pryor, two of which, one addressed to his wife, the other to his son, are still in the possession of his family; the other letter was written to his friend Elizabeth Foulke.

An extract from the former of these taken from the original, dated Hartford, 12th mo. 11, 1797, is as follows:

"I did not hear until a day or two past that the bearer hereof, Mary Pryor, was likely to go till spring, and I believe she thought so herself. I am now at her comfortable habitation, kindly entertained by her two children," and after referring to the accounts which had reached him of the prevalence of the yellow fever shortly previous in Philadelphia, and the deep exercise which he had felt for his native city, he adds, "I have said in my heart, oh, that dear Mary Pryor may find the ground in Philadelphia prepared by a pinching winter season of affliction, * * and be favored to dig about some of the tender plants, and that my dear children may be amongst the number."

Thomas Scattergood again alludes to her under date of 2d mo. 16, 1798. "My last was by Mary Pryor, who if she is favored, dear woman, to reach your shore in safety, can and I hope will call and see you, &c."

It is stated that after Mary Pryor had taken her passage at London, it was discovered that the Fame had a low standing at Lloyds', and an effort was consequently made

to discourage her from going in that ship. She, however, expressed her belief that she "must go in this vessel," and took leave of her family on the 15th of 12th mo. 1797, on board the ship.

The ministerial services of Mary Pryor began soon after her arrival in this country, and an interesting incident is recorded, * connected with probably the first meeting she attended. One of her fellow passengers, a young nobleman, who had been an irreligious and dissipated man previous to this voyage, but who during the course of it became attached to Mary Pryor with the tenderness of a son, followed her to a meeting at the Market Street House on the Fifth-day after their arrival. This was his first attendance of a religious meeting. She was led to elucidate impressively the parable of the prodigal son, and her testimony being sealed on his mind, he supposed it to be designed by her, especially for himself. Visiting her in the afternoon, he wept much, and said, "Oh! why did you expose me so before many persons. Why could you not have told me all this in private?"

The following allusion to Mary Pryor's religious labors while in this country, from the pen of Elizabeth Foulke, a valued minister residing in Philadelphia, will be read with interest. It is contained in a letter addressed to Thomas Scattergood, in reply to the one received from him by Mary Pryor, and is dated 18th of 1st mo. 1799.

"It is likely thou may have heard of my having partaken of a similar cup of affliction, near a year since, when I was deprived of my greatest earthly treasure, and bereft of the fostering wing of a tender mother, in whom was blended everything a child could desire in a parent; and though in that trying season I was favored to see the necessity there is for such as we to evince by example that resignation which we are at times called upon by precept to invite others to labor after; yet such a veil was cast over all created beauty, and everything without so lost its animating influence, that for two months I went no where but to meeting, except to my sisters'. In this time of depression, dear Mary Pryor arrived, whose peculiar circumstances so engaged my sympathy, that I made her an early visit, when my spirit was so united to her as roused me from the retirement in which I had settled; and have since been six months and one week travelling with her, and may acknowledge I esteem it a favor my lot has been cast with her; for truly she is a mother in Israel, who has passed along among us in meekness and humility; whose sweet and pertinent labors I trust will be as bread cast on the waters, found after many days."

Mary Pryor returned to her own home early in the year 1799, after having labored principally in the neighborhoods of New York and Philadelphia.

The following extract from a letter of Thos. Scattergood to Rebecca Jones, dated 3d mo. 17, 1800, may appropriately conclude these brief notices. "I am now sitting along side of dear Mary Pryor, in whose company, and under whose comfortable, peaceful roof, I have felt refreshment to my wearied mind. She appears now to be enjoying the sheaves of sweet enriching peace. How tendering, it was yesterday, amongst a considerable com-

pany of Friends, both young and old at a house, to hear her with deep humility recite the Lord's mercies!"

The Potter and Henry III.—Bernard Palissy, a native of Agen, in France, was maker of earthenware at Saintes, and distinguished himself by his knowledge and tale. He was a protestant, and the French king Henry III. said to him one day, that he should be compelled to give him up to his enemies unless he changed his religion. "You have often said to me, sire," was the undaunted reply of Palissy, "that you pities me; but for me, I pity you, who have given utterance to such words as 'I shall be compelled.' They are unkingly words; and I say to you in my phrase, that neither the Guises, nor all your people, nor yourself, are able to compel humble manufacturer of earthenware to be his knee before statues." Bernard was a man of humor, as well as of courage; and he sometimes say, alluding to his trade and trust in Providence, "My only property, heaven and earth."

THE FRIEND.

FIRST MONTH 6, 1872.

Our present number bears the date of a new year. Young tells us, "We take no of time, but from its loss," and there seem few who manifest much thought about latter. It shows the blindness and insensibility of the general mind, that nearly all appear to hail the end of one year and the beginning of another, as a season to be speedily devoted to mirth and folly; forgetting that in the dread account of the time allotted the soul's probation, the one adds another year—improved or unimproved—which are gone forever, and the other may be last purchased, the period within which here will terminate. This may be truly every opening and departing day, but close of the year is a marked epoch in the ration of time, and it ought not to pass without inviting to serious reflection.

We live in a world so busy, so full of changes, and of plans to advance intellect or material improvement, that we are likely to be too much occupied with the present and time for retrospect of the past, or to cast the future. But if "memory is a store-room," it is well once in a while to over it, ventilate and rearrange its several contents, so as to know what we have on hand and how to apply each parcel to the use. It may be well to check the natural disposition, to turn away from the examination of the conduct of the past, and to rove in the light of increased experience more mature thought, the transactions of the past are gone; for though they cannot be called, we may nevertheless profit by the lessons they teach, if our self-examination is directed to discover how constantly we have striven to perform our duty, and how nearly we have lived in accordance with religion we profess. We may gain wisdom and prudence, if the conviction that our past has not shone more and more towards perfect day, incites to increased watchfulness upon prayer, that we may avoid or correct such errors as loom up and mar the re-

* Memorials of Rebecca Jones.

It can hardly be that any one who thus to acquire true self knowledge will see the value of the grace of modesty. speak of the rapid flight of time and the certainty of life, may seem trite, if not dull; but the juncture of the old and the new forces both on a reflecting mind, in association with the incidents of life, as we re-verse those that have most impressed us during the fleeting hours of the year just closed, dismiss the painful remembrance of frustrated plans or disappointed hopes in our private affairs, our feelings may perhaps be calmed, as we recall the memory of our relatives, dear friends, or acquaintances—who during the year, have left us dead. We may be led to reflect that we are indulging similar fond anticipations of the future, as those with which these relatives, friends or acquaintances, and thousands of frail mortals, hailed with delight the closing of the year now ended, and who, as days passed away, were borne, one by one, to fill the silent grave. The thought comes to bring home impressively the consciousness, that vigorous as we may be, and full of life and spirit to encounter whatever may await us, before the year just closed shall have been added to time past, we may have been summoned to give an account of our stewardship, and our places be filled by others, who will step into them as we stepped into the places of our predecessors. Can we entertain this train of thought without feeling, that to search for happiness in the mean and perishing pursuits and pleasures of the men of this world, is to insure disappointment and remorse will attend us within the narrow verge of this life, the priceless hours of our probation be wasted, without laying up a good foundation for time to come.

However care and anxious thoughts, the realities of life, may press upon us, or the prospect of good animate with glowing hope of a better future, there is an irrepresible truth, that the things of time cannot satisfy the longings of the soul; thus witnessing to its immortality, and that its task here is but a hasty though checkered journey towards a world of higher, nobler, and of changeless duration. If we have made the trial we have found that the objects of a living faith are not to be derived from the investigations of science, nor from a knowledge of our duties to our Creator and to our fellow creatures, but that the only satisfaction is to be derived from the theories of worldly philosophy; and the still small voice within us, for a new creation, shows that unless the heart is regenerated, though we may revel in heaps of gold, and range at will through the enticing paths of pleasure, we will find no repose and consolation in vain.

Reflections such as these ought to incite us to remember our days as to apply the heart to wisdom: those who have entered the narrow way, to double their diligence, to follow their calling and election sure; those who have not entered the strait gate, to begin to strive to go in thereat. There is a turning point in the life of any one so early of note, as that at which he yields himself unreservedly to the convicting, controlling power of Divine Grace. Where this due he may be sure that he will not be deceived, that come what may come, as he follows to his guide he cannot be led astray. A man trained amid religious influences may

never be tempted to doubt the truths of christianity as recorded in the Holy Scriptures. Literally and intellectually he may believe that Jesus Christ made atonement for his sins and for the sins of the whole world, and that He is the Author of eternal salvation to as many as obey him. He may store his memory with the contents of the New Testament, be assiduous in teaching them to others, repeat prayers often for himself and others, and his external conduct be impeccable. Yet all this may be more acquirements in the opinions or teachings of others, and his faith stand in the wisdom of men and not in the power of God. If while doing all this he is slighting the secret manifestations of the Light of Christ, he may be so ignorant of his own heart as to be deceived into believing that his hopes of salvation are safely centred in the righteousness of Christ and the cleansing virtue of his blood, while yet he is nothing better than a self-righteous Pharisee, priding himself upon not being as other men are. It is not until he allows the Light of Christ, shining in his dark heart, to discover to him the deep though secret sinfulness lurking there, and he yields obedience to what it makes known, that the work of religion is begun. Watching for and obeying these divine manifestations is like putting our puny and feeble hand into that of the Omnipotent Saviour, who, as we are humble and self-denying in our walk, will hold us up firmly amid temptation and trouble, lead us safely in the path of holiness, adding one cubit after another to our stature, until we become full-grown and strong men in his church militant, and valiants in the cause of truth and righteousness. Would that all our readers would come to know this in their own experience.

As the great world outside of us rolls on in its mighty cycles, each added year brings it nearer to the consummation of all things. Vast changes are going on in the whole human family. The secrets of nature are being more fully unveiled, giving deeper and clearer insight of the laws by which that Being of infinite resources, and of goodness equal to his means, upholds and governs the creation of his word. As knowledge has thus increased, the mind of man has rendered it tributary to his wants. Science and art have availed themselves of it to relieve him of toil, by mechanical inventions; to transform material things heretofore deemed useless, into instruments to promote his profit or his pleasure, and to oblige the elements to serve the great interests of mankind. A year in the present era comprehends more of life, measured by means of knowledge and action, than ten or twenty a century ago, and it may be a question in the profitable meditation of the hour, whether our individual accountability does not keep pace with the enlarged means for doing good of which we may avail ourselves.

We have received a pamphlet of twelve pages, entitled "Extracts from the Writings of Early Friends, showing their Doctrines and Principles," printed at Brooklyn, 1871. In a few remarks explanatory of the reasons for publishing at the present time, it is said, "It is feared, however, that there may be some in the Society at present, whose religious views do not correspond with those 'great evangelical truths' declared by our worthy predecessors. Yet seeing there is such a

lively desire," for "a revival amongst us of the zeal and earnestness which characterized the labors of early Friends," it is hoped that these extracts may prove instrumental in pointing the way to that *Life and Power* in which they dwelt. And when we realize a similar depth of experience we may again expect "these precious truths" to find extensive acceptance." The extracts are taken from Fox, Barclay, Burroughs, S. Fisher, Penn, Pennington, Wm. Dewsbury, S. Crisp, W. Edmondson, and J. Parnell. They are upon Justification, Immediate Revelation, Light of Christ, Freedom from Sin, Worship, Confession of Christ, Scriptures, Sabbath, Communion, Baptism, and Tribulation. Coming from the authors named, though brief, they express nothing but the religious belief of Friends on the points touched on.

At the close of one of the sittings of the "General Meeting" in Brooklyn, we are told, this pamphlet was distributed among the audience by some of those who had had it printed, and upon its contents being known, the committee having these meetings under their charge and ordering, openly disavowed and repudiated it. It may seem strange, that in a meeting professedly held to produce "a return to the zeal and earnestness of Friends in the early period of their history," a committee acting under the authority of a Yearly and a Quarterly Meeting, should feel itself justified thus openly to disavow any sanction of a publication containing nothing, except the few introductory lines, but extracts from the writings of those early Friends, expressive of their faith. But when we reflect that this same committee had not openly disavowed any of the extraordinary scenes and occurrences, altogether incompatible with Friends' views on the subject of divine worship, which took place in the meetings held professedly as those of Friends, we may understand why, and cease to wonder at their rejection of all responsibility for the pamphlet.

We desire the attention of our readers to the notice of works to be had at Friends' Book Store.

For several years past, we have been receiving copies of "Vick's Illustrated Catalogue and Floral Guide." By James Vick, Rochester, N. York. Though we do not publish business notices of any kind, this Floral Guide has increased so much in size, it seems entitled to the name of "Book," and we think it merits a "Book Notice." Not because it is a work of 120 pages, nor that it is got up in very tasteful style, with fine type and numerous engravings on almost every page, but that it contains much useful information and instruction, both in the cultivation of flowers and vegetables; with explicit directions to the inexperienced about the sowing of seeds, and the transplanting of seedlings; also hints as to the probable causes of failure, the varieties of flowers most likely to prove successful, &c., &c. It is illustrated by well-executed wood cuts, of over a hundred of different kinds of vegetables, of nearly two hundred different varieties of flowers, very true to nature, with descriptions of them, their habits and required treatment, and many other engravings, including plans for grounds—with ample instructions for these, the arranging of flower beds, &c. It can be readily

attained by mail, and we think is well worth possessing, especially by the lovers of Floriculture.

SUMMARY OF EVENTS.

FOREIGN.—The London papers of the 29th ult. publish a letter from Queen Victoria, in which she expresses her warm sense of the touching sympathy exhibited for the family by the whole nation at the illness of her son, the Prince of Wales.

The Prince of Wales is considered convalescent, but he regains his strength very slowly. A London dispatch of the 29th says, that being alarmed at Gladstone's republican tendencies, the conservative section of the liberals, led by the duke of Somerset and Viscount Halifax, are seeking to form a coalition with the Tories for the purpose of electing a conservative speaker of the House of Commons, and to compel the retirement of Gladstone.

The mail steamer from the Cape of Good Hope has arrived, and brings accounts of the manner in which the announcement of the annexation of African territory to the British dominions was received by the inhabitants. The intelligence that the treaty had been concluded produced much excitement. Brand, president of the free state, had issued a formal protest against the transfer of the diamond fields to Great Britain. Discoveries of gold in considerable quantities had been made in the Transvaal republic. The reports attracted many adventurers to that quarter. The most-mund-seekers were flocking to the diamond district for the newly-discovered gold country.

In the French Assembly a proposition to impose a general tax on incomes was earnestly opposed by Thiers and Poncey Quartier, Minister of Finance, the latter denounced it as arbitrary and inequitable. The proposal was rejected by a majority. The Prince de Joinville is about to resign his seat in the Assembly to strengthen the position of the Duke of Anjoule. The committee of the Assembly on the reorganization of the army, proposes to make the terms of military service five years in active duty, four years in first reserve, and six years in second reserve. The Paris papers assert that Bismark seeks a pretext for the reconquest by the German troops of the evacuated French provinces.

The session of the Austrian Reichsrath was opened on the 27th ult. The estimates of the budget of finance for the coming fiscal year were submitted, and give the probable expenditures at 359,000,000 florins, against a revenue of 398,000,000 florins.

On the 28th, the emperor delivered a speech from the throne, in which he says that his readiness to grant extensive concessions has not brought intended harmony to the empire, and that great stress is laid on the enforcement of and obedience to the laws. The government will accede to the wishes of Galicia, in so far as they are compatible with the interests of the empire. Measures are promised which will render the reichsrath a completely representative body. Bills for reforming the judicial system, to develop the land-charge system, and to improve the pecuniary condition of government officials and the proper clergy will be submitted. The prompt settlement of educational questions is recommended. Regret is expressed at the fact that a portion of the empire remains unrepresented in the reichsrath, and that it remains to be ascertained, with what understanding is possible, the emperor closes by declaring that Austria, weary of internal conflicts, desires peace and order.

An imperial decree has been published in St. Petersburg, fixing the conscription for the Russian army, for the year 1874, at six men in every thousand. The meeting of the Reichsrath at Vienna has been postponed until the 29th inst. The appointment of Marshal Concha to be captain general of Cuba, it is reported, has been determined on by the Spanish government. Reinforcements continue to go forward to Cuba to aid in the suppression of the insurrection on that island.

Dispatches from Shanghai announce that the Chinese government has determined to follow the example of the Japanese, and send young men to England and the United States to be educated in the schools of those countries.

The speedy establishment of peace between Spain and the South American republics is expected. The Russian steamship Kama, plying on the Caspian Sea, recently foundered in a violent gale, and all on board, officers, crew and passengers, were drowned. The steamer had a million of roubles (\$750,000) in treasure on board, which is lost.

The St. Petersburg Journal, official organ, says the cordial reception of the Grand Duke Alexis in the

United States, creates a profound sense of satisfaction throughout Russia.

Supplementary elections are to be held in Paris to fill the vacant seats in the Assembly.

On the 29th ult. the French Assembly debated the question of augmenting the circulation of the Bank of France. The discussion took a wide range. President Thiers spoke several times, and on one occasion, alluding to the violent language used by deputies, provoked by the threats of the Germans, said, "Silence was the best reply to the harsh words of M. Bismarck." This was received with prolonged applause. Throughout the debate Thiers expressed determined opposition to burdening the present fiscal year with fresh loans. The Assembly finally voted to increase the note circulation of the bank 400,000,000 francs.

The sale of photographs of executed Communists was prohibited.

The London Times, in its review of 1871, devotes considerable space to commenting on President Grant's late message to Congress. The Times makes a forecast of the political prospects in the United States, and comes to the conclusion that Grant will be re-elected. The opinion is also expressed that Cuba should be secured to the main.

The ship *Yeo*, from Wilmington, N. C., with a cargo of 2200 barrels of turpentine, was burned while lying at South End on the Thames.

A ship named the *Edward* foundered off Falmouth on the 29th ult., and all on board were lost. The vessel, which was a schooner, was propelled by steam, and carrying heavy boilers, was passing through Glasgow on the 30th, surrounded by a throng of children, one of the boilers exploded, killing five of the children, and injuring seven others so much that their recovery is doubtful.

London, 12th mo, 30th.—Consols, 92½. U. S. sixes, 1862, 92½; ditto, 1867, 94½; ten-forties, 91½.

Liverpool.—Uplands cotton, 9½ a 10c.; Orleans, 10½ d. Red winter wheat, 11s. 7d. per 100 lbs.

UNITED STATES.—The Board of Indian Commissioners have presented their report to President Grant. It gives the results of their proceedings during the past year; states the condition of the various Indian tribes from personal observation of the members; makes various suggestions, and gives a cheerful view of the peace policy. In the purchase of Indian supplies and other measures, they have saved about \$1,000,000. General Sherman, in his report on the condition of military and Indian affairs in Arizona, says that a state of war with the Apaches has existed for many years. During the years 1869 and 1870 a large proportion of the Apaches were gathered on temporary reservations near certain designated military posts, but some bands still remained in the mountains and committed depredations where opportunity offered. The belief that these depredations were committed by Indians from these reservations was given as an excuse for acts on the part of some of the people of Arizona no less barbarous than those which characterize the Apaches. The efforts of the Indian peace commission, since the close of the war, to bring the Indians of the good faith and humane purpose of the government appear to have been successful, and hopes are entertained of a lasting peace.

The southern railroad companies which bought the railroad, material and rolling stock that the government found in its possession at the close of the war, are paying their debts and, on the whole, doing very well. The value of the property sold was \$8,500,000. On the first of Sixth mo, last, beside paying their interest, the companies had reduced the principal of the debt to \$4,724,350.

In accordance with the suggestion of the civil service commission, the president will appoint as a regular examining board three persons from each of the different departments of the government, who will personally conduct all examinations of applicants, being governed in their actions by such regulations as may from time to time be established by the advisory board.

The annual report of the Erie railway company gives the earnings of the road for the past year at \$17,168,005, and the expenses at \$17,049,740, leaving a surplus of \$118,264. There has been an increase of \$3,000,000 in the funded debt.

The interments in Philadelphia during the week ending on the 30th ult. numbered 540. The deaths from small pox were 223; consumption, 57; inflammation of the lungs, 24; inflammation of the brain, 15; old age, 17. The number of deaths in this city during the year 1871 was 16,993, including 1,879 from small pox.

During the year just closed there were 3279 in Philadelphia, with an estimated loss thereby of \$1,359,000.

The Northern Pacific Railroad has been finished Moorhead at the crossing of the Red River, Minnesota two hundred and sixty miles west of Duluth, at western end of Lake Superior.

The Union Pacific Railroad was still snow-blocked on the 31st ult. Persons went on horseback west of Cheyenne, report the snow eight feet deep in places that have been already shovelled out twice.

The Markets, &c.—The following were the quotations on the 30th ult. *New York*.—American gold, 16 U. S. sixes, 1861, 118½; ditto, 1868, 116; ditto, 1870, 95 cents, 11½. Superfine flour, \$5.75 a \$6.25; 5 brands, \$6.50 a \$10.85. White Genesee wheat, \$1, red Pennsylvania, \$1.54 a \$1.56; No. 2 Milwaukee, \$1.51. Oats, 54 a 57½ cts. Western mixed corn, a 73½ cts.; yellow, 77 cts. *Philadelphia*.—Cotton, 20 21½ cts. for uplands and New Orleans. *Baltimore*.—No. 1 spring wheat, \$1.22; No. 2, do., \$1.20; 3 do., \$1.09. No. 2 corn, 40 a 41 cts. No. 2 oats, 31 1/2 d. Red, 81 cts. *St. Louis*.—Extra winter flour, \$3.7 5/10. No. 3 white winter wheat, \$1.45. Mixed 4½ cts. *Cincinnati*.—Family flour, 75 a 80.75. *Wheat*.—No. 1 white, 85 a 88 cts. *Chicago*.—No. 1 winter red wheat, \$1.40; No. 2, \$1.38. *Waukegan*.—No. 1 spring wheat, \$1.22; No. 2, \$1.20. No. 2 oats, 32 cts. No. 2 corn, 40 cts. *Detroit*.—Extra wheat, \$1.50; No. 1 white, \$1.45 a \$1.46; an \$1.40. Mixed corn, 54 cts. Oats, 41 a 42 cts. The Philadelphia market for beef cattle on the 1st inst., was rather better. Extra sold at 77 cts.; to good, 61 a 63 cts. and common 4 a 5 cts. per gross. Receipts 1550 head. About 12,000 sheep at 6 a 7½ cts. per lb. gross, and 2472 hogs at 6¼ a 6½ for corn fed.

FRIENDS' BOOK STORE.

There have been recently reprinted editions of the following works, which are now for sale at No. 407 Arch Street.

Examples of Youthful Piety.
Barely of a Church Government.
The Christian's Self-uttered Prayer.
Memoirs of Edwin Price.
True Christian Baptism and Communion.
Account of Friends, by T. Evans.
Conscience of William Evans, 2d edition.
There are also on hand a supply of other appraisings of Friends.

FRIENDS' BOARDING SCHOOL FOR INDIVIDUAL CHILDREN, TUNNESSA, NEW YORK.

A suitable Friend and his wife are wanted to charge of this Institution, and manage the Farm needed with it. Application may be made to Ebenezer Worr, Marshallton, Chester Co., Thomas Wistar, Fox Chase P. O., Philadelphia Samuel Morley, Olney P. O., do. Joseph Scattergood, 413 Spruce Street, do.

FRIENDS' ASYLUM FOR THE INSANE, New Franklin, (Twenty-third Ward), Philadelphia.

Physician and Superintendent.—JOSUAH W. INGTON, M. D.

Applications for the Admission of Patients made to the Superintendent, or to any of th. Board Managers.

MARRIED, at Hickory Grove, Iowa, on the 8th Second month, 1871, THOMAS FAWCETT, of the place, to MARGARET ANN, daughter of Alexander and Margaret McGrew, of Muscatine, Iowa.

At Friends' Meeting-house, Hickory G Cedar county, Iowa, on Fourth-day, 6th of 2d month, 1871, LINDLEY, son of Israel and Rebecca Heald, and NANCY L., daughter of Adam and Maria Ann Frickman.

DIED, at his residence in Germantown, Philadelphia, on the 27th month, 1871, CASTLEKINE, wife of Thomas Evans, in the 70th year of her age. —, at the residence of her husband, near Darlington, Hartford Co., Md., on the 14th of 6th mo. 1871. ELIZABETH C. wife of Gideon G. Smith, in the 7th year of her age.

For "The Friend"

A Short Biography of Mary Griffin.

(Concluded from page 156.)

Many of her letters show that her faith was not a closely tried; yet her trust in the only source of true consolation remained unshaken. Some of these letters are extracted from as follows. The name of the individual addressed in the first two is not given.

My heart is bowed and humbled within under a sense of the many favorable opportunities we have had together; may it not be forgotten by thee and me. Although the Lord has been pleased to try me in the removal of so near and dear a friend as my husband, he hath not left me comfortless; but has been near to support. Oh, the remembrance of the love that was felt amongst us when his voice lay in the house! A friend remarked, "I know feel a measure of the same love we often enjoyed when he was personally with us. I can truly say, that at that time my soul was in subjection to the great Director of all things."

Dear friend, my heart's desire is, that we may keep near the pure Counsellor, and True Guide to all the faithful followers of the Lamb. If it be at any time, through unwatchfulness, we should step aside, we may, by the insinuation of the pure light, come to see it; that, through the purging power of the Truth, we may be preserved pure, and clean. So desireth thy sincere friend,

MARY MOORE.

1744.

Dear Friend,—I thought I should not be able in the discharge of my duty unless in any way heartily desiring thy preservation and further growth in the Truth. It was on my mind when with thee to have spoken a few words by way of advice to thee, to keep thee in the direction and guidance of the Holy Spirit. And may that be preserved from running into words hastily; but rather wait long to hear the voice of the true Shepherd of Israel. His sheep know his voice, and they follow him; but a stranger they will not follow. As the Lord has been pleased in a good measure to make known his will to thee, be diligent to do it in all things. Mayest thou minister from that ability which *God only gives*. Hast thou rise in the spring of life, and

when it withdraws, sit down. And mayest thou, with my soul, be preserved in an humble, bowed frame of mind, clear from a lofty and haughty spirit, is the fervent desire of thy friend,
MARY MOORE.

"Providence, 13th of 1st mo. 1761.

"Dear Children,—We are now confined at Governor Hopkins by reason of the severity of the weather, and the danger of crossing the ferries. The governor is exceedingly kind. We are in health. And now, dear children, I may say from my own experience, 'It is the willing and obedient that shall eat the good of the land.' Therefore is my heart bowed on your account that ye may yield obedience to the inward appearance of Light and Truth manifested in your own hearts. And while I consider your circumstances, I yet crave it of you not to neglect the one thing needful, even inward peace attained by obedience. Oh, dear children! let not the world nor the cares thereof, choke the seed that is sown in your hearts. If I should never see you more, may the God of peace preserve you in peace with Him and one with another. So desireth your loving mother,
MARY MOORE."

"Dear Brother and Sister,—These lines come to inform you we are all in a measure of health at present, through Infinite Goodness, and hoping this will find you enjoying the same blessing. I have often had it in my mind to write to you, and more especially since I have been exercised with the loss of my dear son Allen; who was taken from us in an awfully sudden and surprising manner. It was thus:—In the second month we had exceeding hard frost for some weeks, followed by rain and a sudden thaw. This caused such a freshet as never had been before in these parts; in which time my poor child, in striving to save his mill, was carried off by the force of the water and cakes of ice, to the great surprise of his wife and child. His body was found next day, and was no way disfigured, nor were any bones broken. His countenance looked like one in a sleep. Dear brother and sister, may the uncertainty of time and thoughts of eternity be as motives to engage our minds to suitable thoughtfulness to prepare for our great and last change; seeing there is no durable city here, let us seek one to come, eternal in the heavens. Thus desireth and prayeth your affectionate sister,
MARY GRIFFIN."

As will be observed by the signature of the last letter, Mary Palmer had again changed her name. In advanced life, as appears from her memoranda, she was united in marriage with a Friend of the name of Bartholomew Griffin; whom also she survived.

The following is from a memorandum dated 9th mo. 6, 1782, when afflicted with a cancer on her tongue. "O Lord, have mercy upon me! Forgive my iniquities, and blot out my transgressions! Support me through this fur-

nace of affliction, and grant relief in thy own time! May thy everlasting arm be underneath! Thou hast been my helper hitherto; leave me not in old age! Wilt thou remember also my offspring! Wean them from vanity and folly, that they may learn to trust in thee!"

Having long been exercised in the Lord's work, she seemed absorbed in his love; and her conversation was much upon subjects which pertained to an everlasting inheritance. On one occasion she was heard to say, "My heart is filled with praises to the Lord. He that not only called me in my youth, but enabled me to follow Him, is yet with me in old age. Again, after a season of retirement before the Lord, she says, "My heart overflows with love to the whole human family; and I believe this [the Savior's] love will increase yet more and more; and that [His] truth will prosper and spread through distant lands, even where the people now sit in darkness: for the earth shall be full of the knowledge of the Lord as the waters cover the sea." At another time she says, "I hope ere long to rest in the arms of Thy love. Oh! it is well when we can say with the Apostle, 'I have fought a good fight, I have finished my course, I have kept the faith; henceforth there is laid up for me a crown of righteousness, which the Lord, the righteous judge, shall give me at that day: and not to me only but unto all them also that love his appearing.'" As her physical strength gave way, she gradually declined. A few hours before her death she desired to see her children and grandchildren; and addressed them in these her last words: "Fear the Lord above all things, and keep up your religious meetings."

A Testimony issued by Nine Partners Monthly Meeting concerning Mary Griffin:—

As the subject of this memoir attended to the teachings of Divine grace, her understanding became enlarged in knowledge and experience in spiritual things; and through obedience to the manifestations of Truth, she came forth in public testimony for the cause of righteousness, in the 20th year of her age. Her ministry was sound and edifying. She was frequently led in the fresh flowings of gospel love to invite the youth to forsake the vanities of this life; clearly holding up to their view the great advantage of early dedication in choosing the Lord for their portion.

She was eminently qualified for service in the management of the affairs of the church. As she dwelt near to the spring of eternal life in her own heart, she was prepared to feel for others; and was remarkably distinguished by the character of a true disciple, being kind, affectionate, and courteous to all.

She was frequently engaged in the service of the gospel in different parts of New York and New England Yearly Meetings, much to the satisfaction of Friends: faithfully occupying her gift to the honor of Him who had be-

stowed it. She visited the meetings of Friends in Vermont, when in the 82d year of her age; performing the journey on horseback. When in her hundredth year, she felt drawn to visit the families constituting the meeting to which she belonged; and was admirably led to speak with clearness to different states; communicating suitable counsel in a lively and pertinent manner. In this her last visit especially, the declaration of the Psalmist seemed verified: "That these that be planted in the house of the Lord, shall flourish in the courts of our God. They shall still bring forth fruit in old age."

She died on the 2d of 12th month, 1810; aged 100 years and 7 months. A minister about fourscore years.

The following extract from the report of the Executive Committee of the Chicago and North Western Relief Funds will be of interest to many of our readers. The report is long, entering into many particulars, and shows much care and labor on the part of the committee.

Report of the "Executive Relief Committee," of Philadelphia, to the Contributors to the relief of the sufferers by the great conflagrations in Chicago, and the States of Michigan, Wisconsin and Minnesota, in October, 1871.

Amount of Contributions.

From that time until the date of this report the contributions, all of which have heretofore been publicly acknowledged in detail, sent through this committee have amounted to \$260,734 49

Facts Concerning the Great Calamity.

When the first intelligence of the Chicago conflagration reached Philadelphia, the statements received fell far short of the appalling magnitude of the disaster, as was subsequently ascertained. The fire swept over an area of 2124 acres, or about three and one-third square miles of the city, and this by far the most valuable portion. It destroyed 17,450 buildings and left 98,500 people without homes, and the greater part of them in the extremest condition of distress and destitution. During the fire, it is now known that more than two hundred and fifty lives were lost. The committee recite these figures as matter of record, and add to them some of the details, showing the tremendous destruction of property. The latest inventory of the money losses by the conflagration present them as follows:

Losses on buildings destroyed,	\$53,000,000
Losses on produce destroyed,	5,262,500
Losses on manufactures destroyed,	13,255,000
Losses on other business property destroyed,	65,455,000
Losses on personal and household effects destroyed,	58,710,000
Losses on miscellaneous property destroyed,	373,000
Total,	\$196,055,500
Net salvage,	4,000,000
Reported money loss in property destroyed,	\$192,055,500

Operations of the Chicago Society.

The contributions entrusted to this committee for the Chicago sufferers have been forwarded to, or placed at the disposal of the Chicago Relief and Aid Society, said

Society having been appointed by the authorities of that city as the authorized custodians and distributors of all contributions. The judicious, impartial, humane and effective methods of relief employed by this Society, have already been publicly reported by the committee after careful personal inspection by a sub-committee who visited Chicago for the purpose, October the 26th and 27th. The contributions of the people of Philadelphia, your committee believe, are eminently well placed in the hands of that Society. The committee deem it well to add some further particulars concerning the Society's operations.

The number of families (averaging five persons each) receiving aid from the Society was as follows at each of the dates mentioned: November 11th, 12,765 families; November 18th, 14,137 families; November 25th, 15,122 families; December 23d, 9375 families. Each of these families receives at every distribution of provisions one week's supply (or rations.) Total cost one week for one family, \$1.98.

Coal (bituminous) is supplied at \$1.50 per ton, delivered at the door, at the rate of a ton every three weeks for a family of five. This makes the cost of food and fuel \$3.10 per week per family.

These particulars afford some idea of the care and economy of the Society in the expenditure of the moneys and supplies entrusted to it. In the matter of providing houses and shelter for the greater portion of the 98,500 homeless people whose necessities compelled them to appeal for aid, the Society exhibited similar business forethought and true economy. It had to look forward to the erection of eight thousand separate temporary houses, and while the price of lumber was rapidly rising and had in a few days after the fire run up to \$20 a thousand feet, the active agent of the Society, himself an experienced lumber merchant, made contracts for the whole amount required for the 8000 houses at an average of \$16.50 per thousand. The Society thus economized in this one business matter about \$140,000. Such traits of care, prudence and conscientious discharge of duty are visible in nearly all its transactions. Of the separate shelter houses for families of five persons, costing \$110 each (including mattress, bed, dining, cook stove and half ton of coal), the Society had erected 5941 to December 23d. With respect to other articles of supplies than provisions and shelter as already mentioned, the Society had distributed to November 25th the following, viz: 10,737 mattresses, 25,339 blankets, 4653 tons of coal, 9956 stoves, 22,581 pairs of shoes, 54,729 articles of men's clothing, 65,986 articles of women's clothing, and 44,937 articles of children's clothing. This was before the active demand for winter wear set in.

The relief furnished by the Society extends to nearly every want in life among their destitute poor. One thousand sewing machines have been furnished to the helpful women who were willing to work to support themselves—tools to meritorious workmen who had lost their own by the fire—employment for every one able to work—free transportation to those who had friends in other places—medicines, medical attendance and hospitals for the sick—and finally burial for the dead. It has furnished aid also to the charitable institutions—Orphans' Asylums, "Homes," &c.

—whose buildings and means were swept away.

Such a vast work, it is easy to understand requires vast means. The estimate of the Society for the six months from Oct. 9, 1871, to April 9, 1872, is as follows:

Food and fuel rations for 15,112 families, at \$3.10 per week,	\$1,220,700
8000 houses and furniture, at \$125,	1,000,000
Barracks and furniture for 2000 families, at \$80,	160,000
Hospital and storehouses,	83,000
Stoves (additional),	75,000
Aid of Bureau of special relief,	250,000
Aid to charitable institutions,	25,000
Clothing, shoes, &c., for 15,122 families,	866,900
Expenses of all other kinds,	295,700
Making a total of	\$3,976,400
Total contributions reported to Nov. 25th,	3,418,100

Yet to be provided for, \$558,300. This deficit has been reduced \$156,214 by the deposit of the Philadelphia Committee.

Other Philadelphia Contributions.

The cash contributions of \$260,734 49 which have been collected through the agency of this committee, do not by any means represent the sum of the contributions by the people of Philadelphia to the people by Chicago. The committee have made industrious efforts to get the particulars of other contributions sent direct or through other channels. I have only been partially successful. The Commercial Exchange collected \$40,000 for Chicago sufferers. Contributions from benevolent organizations, theatres, opera companies, musical associations, merchants, individual fire companies, &c., which were sent direct to Chicago, have come to the knowledge of your committee to the amount of \$14,642 89. Methodist churches, besides their contributions to the relief fund, sent over \$43,000 towards rebuilding churches.

The contributions of food, clothing, bedding, &c., sent from this city were also very liberal. The money value of them cannot now be ascertained, but they made one hundred and forty-four tons of freight as well over the Pennsylvania railroad.

The ascertained contributions from Philadelphia to Chicago, in money, as already mentioned amount to \$362,877 38. The supplies forwarded in kind in the quantity reported and the unreported cash contributions are sufficient to swell the total to half a million of dollars at least.

This is a result which our benevolent people may contemplate with profound satisfaction—never was destitution greater than that our people were called upon to alleviate and never has benevolence been more gratefully received or more carefully distributed. The words which most fittingly conclude the report concerning the Chicago Fund are found in the concluding paragraphs of a pamphlet recently published by the Chicago Relief and Aid Society.

"The time has not come, to a people worn and disordered as our own, for appropriate acknowledgment of the wonderful work that have reached our city from all parts of the world. They were made to the people of Chicago, and the people, in their own joy and time, will prefer to perform this a

attitude. But we may be permitted, as more immediate observers, to say that it is hardly probable that the immense necessity and usefulness of this aid will be ever thoroughly known. With it the terrors of a long winter to hungry, unsheltered thousands have been given way to a reasonable degree of confidence and hope.

"The spectacle of all nations rushing to lift up their voices in prayer, and the deep desolation has made an impression upon our hearts which will long survive the rebuilding of our city. Our people are commanded by the confidence and the sympathy of all mankind to prove themselves equal to this emergency, and in a most temperate manner are instructed anew that He who, for a purpose wiser than we can know, permitted this affliction, hath made of one God all nations of men."

The "Northwest" Fund.

After the organization of the Executive Relief Committee, the benevolent people of our city, feeling that the distress caused by the fires which devastated large but thinly peopled areas in the States of Michigan, Wisconsin and Minnesota, called for relief as well as that in Chicago, began to send in contributions for the relief of the suffering people of those States. The Committee were obliged to take charge of these also. The gross amount of the contributions for this fund has been \$32,698.28. The details have been already published in the newspapers.

No instructions were received from the contributors as to the division of these donations among the three States which suffered the greatest fires. But the committee having been informed on good authority that the distressed families in the three States were distributed in about the following proportions, viz: One thousand families in Wisconsin, eight hundred families in Michigan and a hundred families in Minnesota—decided to send one-tenth of the "Northwest Fund" to Minnesota and divide the remainder into two equal portions, one-half to Michigan and one-half to Wisconsin. At the time this decision it was supposed by the Committee that this fund would reach but not exceed \$30,000. Accordingly, \$27,000 were appropriated to Michigan and Wisconsin, and \$300 were appropriated to Minnesota.

For "The Friend."

Memoirs of Mildred Ratcliff.

(Continued from page 155.)

The annexed letter of E. Gillingham to M. I. will not fail to commend itself to all those who, amid the trials and vicissitudes of life, to above all things else desire to have their souls made single by the eye-salve of the kingdom, and their hearts directed into the love of God, and into the patient waiting for Christ.

"Baltimore, 1820.

"My Dear Friend,—I think I may say in truth that I hold thee in affectionate remembrance, and it has been a source of comfort to me to find I have a share in thy sympathetic regard, and that thou hast not forgotten me, though among the least and most unworthy. Thy letter was truly acceptable and humbled my mind. I wish to appreciate all favours coming from the Fountain of good, and I desire to be able to return thanks for his many unspeakable and unnumbered mercies. Thou art one to whom I feel that I could un-

burthen my mind, but what would it avail? Perhaps a desire may arise in thy mind, perhaps a petition may be offered up by thee to the throne of Grace, that I may be strengthened to endure that fire which burns as an oven, whilst the chaff in me is being consumed, and the dross completely removed, leaving alone the refined gold. But the inward conflict is so hard to endure, nature in me is so strong, and the wiles of the enemy are so cunningly devised, that I fear I shall not be able to escape from them, and am tempted to distrust the merciful extendings of Divine Providence for my help. Why cannot I throw myself into His widely extended arms? Arms which are ever open to receive poor repentant sinners. Why do I not continually feel compunction for my sins? Why do my eyes cease weeping? I mourn because I cannot mourn! I weep because I cannot weep! The query often arises in me, Did ever mortal pass through this dark labyrinth? this land of drought? this wilderness of woe? Support me, Lord, by thy unerring hand, and guide me safely through all my difficulties. Thou canst make the desert bloom, and the wilderness to smile.

"I feel thankful that your steps were directed to our habitation. When thinking of it, I always remember some expressions of my dear mother. She used to tell us, her children, 'If you are faithful, the feet of those who trod your parents' threshold, will tread yours.' O that we may be counted worthy to administer a cup of cold water to the Master's little ones.

"With desires that thou mayest, wherever thou art, be preserved in the Master's safe-keeping, that thy lot in thy travels may ever be cast among the kind and affectionate, and that thou mayest in the end richly reap the reward of the righteous, I bid thee affectionately farewell,

ELIZABETH GILLINGHAM."

Stephen Grellet to Mildred Ratcliff.

"New York, 2d mo. 16th, 1821.

"My Beloved Friend,—I have thy letter of the 30th of last month to my Rebecca and myself jointly. We had been wishing to know where thou wast, or if thou hadst returned to thy home. Thy letter written to me about three months ago from the northern part of this State, I should have answered, if I had known where a letter would have met thee. I had anticipated seeing thee in this city on thy way homewards, but since thy dear Master made way for thy escape from this field of labor, I could but feel thankful for thy sake. Yet my selfishness and brotherly affection, could they have had a say in it, would so far have increased thy bonds.

"It is a great favor indeed that thou hast been enabled to perform the great work laid upon thee. The daily strength with which thy slender tabernacle has been clothed, in the performance of daily duty, has displayed the sufficiency of that Power in whom thou hast trusted. I do not marvel that now, on thy return from thy Lord's embassy, thou shouldst be let down to feel thy great weakness, both of body and mind. There is great wisdom in such dispensations. They are in mercy vouchsafed. I think I may say, as far as my knowledge extends, unto all the Lord's faithful servants, 'that upon every glory there may be a defence.' For they feel their poverty, emptiness, and inability,—whatever may

have been their past experience when clothed with the spirit of wisdom and power—of themselves even to think a good thought or to do a good thing. Then it is, with spirits prostrated at the sacred footstool, and every crown laid there also, every glory and every praise is ascribed to Him to whom alone they belong; and nothing remains for the poor instrument but blushing and confusion of face. When the full sense of this is upon him, the greatness of the power, and the efficacy of that grace which has upheld in the great work required of him, is the more magnified. Then out of weakness, he is afresh strengthened to trust implicitly in the Rock of his salvation. Nothing new has occurred to thee, my dear sister! Only keep still under the dispensation. I could say much of the baptisms that have attended me since my return home, but I see that He whose ways and dispensations are all perfect and in mercy, has laid nothing too much on me, that I might rightly bear my portion of suffering for the church's sake.

"Many spirits have gone forth, many new doctrines are proclaimed! Some are willing to bring in a new way or gospel which is not by Jesus Christ. It behooves his servants, laborers in his vineyard, to descend even to Him, their Foundation, and to have all their stones of memorial brought up from thence, and all their excellency and their glory from the depths, where His wonders are seen. Many, we know, would gladly rejoice with the dear Saviour, but how few are willing to suffer with Him. Those only who die with him, can give an experimental testimony to his resurrection, and that He is the Way, the Truth, and the Life, without whom none cometh to the Father. Our hope in life and in death, in joy and affliction, centres in Him. This is my belief respecting thee, my dear Mildred, under which I can salute thee in the way as a fellow-pilgrim.

Thy sincere friend,

STEPHEN GRELLET."

Additional by Rebecca Grellet: "Thy letter, my dear friend, I can assure thee, awakened tender feelings in my heart, but as my S. G. has so fully replied to it, it seems unnecessary to add, except the saying of the experienced Apostle, which now comes freshly to remembrance: 'After ye have done the will of God, ye have need of patience.' He endured to the end, and thus obtained the crown.

"When we parted, I expected divers opportunities might occur of conversing again with thee before thy return homeward, but in this have been disappointed. We are taught not to desire any indulgence but what is best for us; having proved that of ourselves we know nothing, we can do nothing that will promote our happiness.

"Our late letters from England mention that Nathan Hunt was pursuing his way very industriously. Huldah Sears was about going into Ireland. We have late information that dear Mary Naftel is removed from the militant church; and no doubt is entertained by her friends that to her it is a happy change. Her bodily sufferings were great, and were borne with much patience."

E. Gillingham to Mildred Ratcliff.

"Baltimore, 8th mo. 13th, 1821.

"My Dear Friend,—Thou hast often been the companion of my mind on thy late arduous journey, and I rejoice to hear of thy safe

arrival at thy own habitation. I doubt not but thou hast the rich reward of peace, which is an ample recompense for all the toil and suffering we may have to endure, whilst passing through this vale of tears.

"How blessed is the soul entirely devoted to the Master's cause, when it partakes of the foretaste of the recompense of reward sometimes granted it. Its felicity is the earnest of eternal rest, the feasting of the just! It is the being anointed with the oil of joy, the being clad with the garment of praise! I have no doubt but thou canst say with the Psalmist, 'Return unto thy rest, O my soul, for the Lord hath dealt bountifully with thee.' Nothing can hurt or destroy in all the Lord's holy mountain. O, that I could at present realize this experience. But I must bear the turning and overturning of the Lord's hand upon me, until all be consumed that his controversy is against. If I can but possess my soul in patience, and be preserved from that state that would conclude with the unfaithful servant described by our dear Lord, 'The master delayeth his coming,' and in his absence followed his own evil ways, I shall be thankful.

"I feel the necessity of a double watch over my poor mind, which is often reduced to a doubting state. I know the Lord's power is sufficient; but it is hard work to keep up a continual warfare, when He sees meet to withdraw his presence. Then our efforts seem weak; our desires after good seem to proceed from no deeper source than the lips. I believe we are permitted to pass through these dispensations in order to prove our steadfastness, and for the trial of our faith. If I had greater evidence of this respecting myself, I should be willing I think to endure the famine and the fire.

"With the sincere desires of a weak child for thy prosperity, &c.

E. GILLINGHAM."

(To be continued.)

Selected.

THE BEST IN STORE.

My God, I thank Thee who hast made
The earth so bright—
So full of splendor and of joy,
Beauty and light:
So many glorious things are here
Noble and right!

I thank Thee, too, that thou hast made
Joy to abound;
So many gentle thoughts and deeds
Circling us round,
That in the darkest spot of earth
Some love is found.

I thank Thee more that all our joy
Is touched with pain;
That shadows fall in brightest homes;
That thorns remain;
So that earth's bliss may be our guide
And not our chain.

For thou who knowest, Lord, how soon
Our weak hearts cling,
Hast given us joys tender and true
Yet all with wings;
So that we see gleaming on' high,
Divine things!

I thank thee, Lord, that thou hast kept
The best in store.
We have enough, yet not too much
To long for more,
A yearning for a deeper peace
Not known before.

I thank thee, Lord, that here our souls
Though amply blest,
Can never find, although they seek,
A perfect rest;
Nor ever shall, until they lean
On Jesus' breast.

How Salt is Manufactured at Turk's Island.

The island bearing this familiar name has been conspicuous for its production of salt, of which millions of bushels find their way into the markets of the world, our own country receiving about half a million bushels annually. Salt is obtained from sea water, by either extreme cold or heat; here it is made by solar evaporation. Lying under the intense rays of a tropical sun, the sea soon gives up its water and leaves its salt behind; and were it not for the influx of the mighty rivers of the tropics, and the general system of currents and tides, the ocean lying near the equator would soon become one vast sea of salt. For centuries, advantage has been taken of this natural process, and in the dry seasons, over a thousand natives are at work, in the different stages of the preparation of salt for the market. The sea water is let into the basins, or "pans," by a canal, cut through the beach, which separates the sea from the interior lagoons and affords a good foundation for the town proper.

This beach is a few rods—perhaps ten or fifteen—in width and back of this, extending toward the bluffs about a quarter of a mile, was originally a marsh, which has been converted into salt tanks. These tanks are shallow, with a varying depth of from eight to eighteen inches, the bottom made of stiff marl or clay, and they cover several hundred acres of this evaporating ground, divided into a great many compartments, varying from a quarter of an acre to two or three acres in size. These are separated from each other by low stone walls, which serve also as walks. In the middle of these is an impervious clay, which prevents the passage of water from one tank to another, unless by the little gateways or sluices, through which the supply is regulated. The water in these is found in all stages of evaporation. In some, you see the clear limpid water of the ocean; in others it has a soiled appearance, and when far advanced in the process, it assumes a beautiful pink color. The first pond allows the subsidence of mud and other physical impurities, and is, consequently, the deepest. As the fluid runs from tank to tank, it gradually becomes thicker, giving up its water and becoming more and more concentrated, until it reaches the last and shallowest part, where crystals begin to appear on its surface. These first crystals are purest, and are raked off with an iron hoe. Exposed for a still longer time, more crystals form, but these mostly collect on the bottom and sides, and are scraped off when the "mother liquor" is drawn away. They are then hauled in carts to the beach, where piles, like great, white snow banks, may be seen from the ship's deck.

This salt is more or less impure—the chief impurity being chloride of magnesium—and, to get rid of this, the heaps are covered with straw and hay; the chloride of magnesium, being deliquescent, absorbs moisture from the atmosphere and drains off, leaving the pure chloride of sodium—common salt—behind. To produce the same result, sometimes slaked lime is placed in the last tanks. The making of salt by solar evaporation depends greatly upon the absence of rain; and Turk's Island has this advantage, as well as extreme heat in summer. In addition, the trade winds constantly agitate the surface of the ponds, and thus facilitate vaporization.

—Overland Monthly.

In view of circumstances now transpiring in some portions of our Society, the following testimony to the efficacy of the Holy Spirit and also to the value of Barclay's Apology, is offered to the readers of "The Friend." The extract is from a letter dated 12th mo. 24th 1834, from Deborah Cope, then travelling with Dugan and Asenath Clark, in N. York and New England Meetings, and addressed to Sarah Emlen.

"We paid Moses Brown a visit, who enquired affectionately for thee, and desired his love; says thou mayest come back to N. E. and he, for one, will be glad to see thee. I was really a feast to be in his company; he still seems green in his ninety-seventh year. He had just received a letter from a young man, with whom we afterward were in company, one in and for whom we feel a deep and sincere interest. He belonged to the baptist and had spent three years at college preparing to be a missionary; got through his studies with good reputation, and was considered a much more than ordinary capacity by the professors in the institution: is said to be master of eleven languages. He returned home to his father; but no call offering which they considered equal to his talents, his father prevailed on him to return to the college for six months more, which he did; and whilst ransacking the library one day, in quest of something to amuse, he lighted on Barclay's Apology, an old, dusty volume, in French. He bore it off to his study and read it attentively, and was met in a narrow place. He became very thoughtful, and asked one of the professors one day if there were any people now living, holding the faith of Robert Barclay? and was answer, 'No; that was not an old controversial book, which they kept to show the reasoning and arguments which could be advanced by those who once professed such principles.' 'Well,' said G., 'is such reasoning and arguments as I never met with before; I must set out and see if I can find any such people; and if not I must set down alone.' Accordingly he went to S—, and made inquiry, and was directed to H. C. a very suitable Friend. He knocked at his door, and H. opened it; whereupon G. inquired if there were any now living, professing the faith of R. Barclay. H. smiled and said he hoped so, and invited him in. He had much conversation, and G. repeated his visits. His father was now displeased, and his friends disappointed, and they reported that he was deranged; but G. persevered until he became a member; attended last Year Meeting, and promised to be a consistent one. The following is an extract from his letter to M. Brown, and will speak his own language: 'At last my mind became so exercised that I was constrained to leave the institution in quest of a people who believed in Barclay's Apology, and if I could not find such a people I determined to worship the Lord alone; blessed be God, the Lord has still a remnant who are not conformed to the vain and wide fashions of this world. To this people I desire to join myself, though I feel most unworthy to come among them. Yes, I can see with the pious Barclay, that having for a long time been seeking after human learning, I have found that Heavenly learning gives content to the soul; after this learning may I seek forever: I now believe that though a person may read the Bible ever

fully and critically in the original languages, yet, the most unlettered person under the teachings of the Spirit of God, is more likely to have a true understanding of it, than the learned man with all his critical care and anxiety; and though I myself have read the Bible in Hebrew (except the book of Daniel); although I have read the New Testament critically in Greek and Syriac, and studied the Bible in several other languages; yet the most ignorant man, who is truly taught of the Spirit, can understand the Bible better than I can, unless taught of the same Spirit. And oh! that all who may read this letter might feel the necessity of being truly taught of God, of sitting as little children at the Saviour's feet, and learning of him as meek and low of heart. Farewell, G. W. R."

For "The Friend."

The Coral Growths.

Dr. Hartwig in his interesting work on the life and its Living Wonders," speaks thus of the corals: In our seas the corallines Zoophytrians, distinguished by their calcareous skeletons they deposit within their tissues, are but feebly represented by a few ragged Caryophyllites, but in the tropic ocean they branch out into numerous species, genera, and species, and play a highly important part in the economy of the marine domain. Originally proceeding from a single oval, which at first freely move by means of vibratile ciliae, and become fixed after a short period of erratic existence, they multiply by gemmation, and grow into an immense variety of forms, of which the following description by one who has long and minutely studied them in their native haunts may serve to give an idea. "Trees of coral," says Professor Dana, "are well known; and though not emulating in size the oaks of our woods—for they do not exceed six or eight feet in height—they are gracefully branched, and the whole surface blooms with coral flowers in place of leaves and flowers. Shrubs, tufts of rushes, beds of pinks, and feathered mosses, are most exactly imitated. Many are spread out in broad leaves or folia, and resemble some large-leaved plant just unfolded; when alive, the surface of each leaf is covered with polyp-flowers. The cactus, the ivy clinging to the rock, and the fungus in its varieties have their numerous representatives. Besides these forms imitating vegetation there are gracefully modelled vase-shapes, which are three or four feet in diameter, made up of a network of branches and pinnets, and sprigs of flowers. There are also coral hemispheres like domes among mosses and shrubbery, occasionally ten or twenty feet in diameter, whose symmetrical surface is gorgeously decked with polyp-flowers of purple and emerald green."

For such aspects appear the living organisms whose combined efforts have mainly constructed those reefs and islands of coral which now lie scattered far and wide over the surface of the equatorial ocean. They are inadequate to express the splendour of the submarine gardens with which the corals clothe the rocky shores of the tropical seas. There are few things more beautiful to the eye," says Captain Basil Hall, "than these corals when viewed through two or three fathoms of clear and still water. It is hardly

an exaggeration to assert that the colors of the rainbow are put to shame on a bright sunny day by what meets the view on looking into the sea in those fairy regions." And Ehrenberg was so struck by the magnificent spectacle presented by the living polyparia in the Red Sea that he exclaimed with enthusiasm, "Where is the paradise of flowers that can rival in variety and beauty, these living wonders of the ocean!"

Besides the charms of their own growth, the tropical coral gardens afford a refuge or a dwelling place to numberless animals clothed in gorgeous apparel. Fishes attired in azure, scarlet and gold, crustaceans, sea-urchins, sea-stars, sea-anemones, anelides, of a brilliancy of color unknown in the northern seas, glide or swim along through their tangled shrubberies; and frequently the gigantic tridacnae, embedded in their calcareous parterres, disclose, on opening her ponderous valves, her violet mantle, tinted with emerald green. The enchanted naturalist lingers for hours over the magnificent spectacle, and forgets the lapse of time, as wonders upon wonders crowd on his enraptured gaze.

But the tropical coral-gardens serve not only as a harbor of refuge to the numberless creatures that frequent their labyrinthine recesses, for many anelides, crustaceans, asters and even fishes, feed upon their animal flowers. Among these, the Scari are provided with a very remarkable dental apparatus to protect their mandibles from injury while biting the calcareous corals. These fishes have their jaws, which resemble the beak of a parrot (whence they receive their usual appellation "parrot fishes") covered externally with a kind of pavement of teeth, answering the same purpose as the horny investment of the mandibles of the bird. The teeth that form this pavement are perpetually in progress of development towards the base of the jaw, whence they advance forward, when completed, to replace those which become worn away in front by the constant attrition to which they are subjected. Thus armed, the Scari browse without difficulty on the newest layers of the stony corals, digesting the animal matter therein contained, and setting free the carbonate of lime in a chalky state. Many of the Diodons, Chetodons, and Baliste or file fishes, of which Kittlitz saw some new species, one still more splendid than the other, in every lagoon-island he visited in the long range of the Carolines, likewise feed upon corals, and possess a dental apparatus fit for masticating their refractory aliment. The Diodons have grooved teeth, excellently adapted to crush and bruise, and the Balistee have eight strong conical teeth in each jaw, with which they easily nip off the shoots of the coral bushes.

Of the reef-building corals it may well be said that they build for eternity. The bones of the higher animals vanish after a few years, but the stony skeleton of the polyp remains attached to the spot of its formation, and serves as a basement or stage for new generations to build upon. Life and death are here in concurrent or parallel progress; generally the whole interior of a corallum is dead. The large domes of the astraeas are in most species covered with a hemispherical living shell, about half an inch thick; and in some porites of the same size the whole mass is lifeless, except the exterior five-sixths of an inch in depth.

We are astonished when travellers tell us of the vast extent of certain ancient ruins; but how utterly insignificant are the greatest of these when compared with the piles of stone accumulated in the course of ages by these minute, and individually so puny architects! The history of the formation of coral-reefs is no less wonderful than their extent. They have been divided according to their geological character, into three classes. The first fringes the shores of continents or islands (shore-reefs) the second, rising from a deep ocean, at a greater distance from the land, encircles an island, or stretches like a barrier along the coast, (barrier-reefs) the third, enclosing a lagoon, forms a ring or annular break-water round an interior lake (atolls, or lagoon-islands.)

Many of the high rocky islands of the Pacific lie, like a picture in its frame, in the middle of a lagoon encircled by a reef. A fringe of low alluvial land in these cases, generally surrounds the base of the mountains; a girdle of palm-trees, backed by abrupt heights, and fronted by a lake of smooth water, only separated from the deep blue ocean by the breakers roaring against the encircling reef; such, for instance, is the scenery of Tahiti, so justly named "the queen of islands." But the encircling reefs are often at a much greater distance from the shore. Thus in New Caledonia, they extend no less than 140 miles beyond the island.

As an example of barrier-reefs, I shall cite that which fronts the north-east coast of Australia; it is described by Flinders as having a length of nearly a thousand miles, and as running parallel to the shore at a distance of between twenty and thirty miles from it, and in some parts even of fifty and seventy. The great arm of the sea thus inclosed, has a usual depth of between ten and twenty fathoms. This probably is both the grandest and most extraordinary reef now existing in any part of the world.

(To be continued.)

Selected.

It does not appear that Robert Barclay was convinced of the truth of Friends' principles, merely by the means of preaching. In his Apology, Prop. 12th, speaking of himself he says: "Not by strength of argument, or by a particular disquisition of each doctrine, and conviction of my understanding thereby, I came to receive and bear witness of the Truth, but by being secretly reached by this Life. For when I came into the silent assemblies of God's people I felt a secret Power amongst them which touched my heart; and as I gave way unto it, I found the evil weakening in me, and the good raised up; and so I became thus knit and united unto them, hungering more and more after the increase of this Power and Life, whereby I might find myself perfectly redeemed."

Dr. Rush was a great enemy to theatrical amusements. He was once in conversation with a professor of religion, who was speaking of the pleasure she anticipated at the theatre, in the evening. "What, madam," said he, "do you go to the theatre?" "Yes," was the reply; "and don't you go, doctor?" "No madam," said he, "I never go to such places." "Why, sir, do you not go?" "Do you think it sinful?" said she. He replied, "I never will publish to the world that I think

Jesus Christ a hard master, and religion an unsatisfying portion, which I should do if I went on to the devil's ground in quest of happiness."

Central Arabia.

(Continued from page 156.)

The day after the sermoom had overtake them, our travellers entered the Wadi Sirhan, or "Valley of the Wolf," a long depression in the desert, running in a south-easterly direction, containing wells of water, and a certain amount of vegetation, which attracts thither numerous bands of Bedouins, who are under the control of the ruler of Djebel Shomer, the more northerly of the civilized states which occupy Central Arabia.

"We had not long wound among the little sandy hills which stud this low ground, when we saw far and near planted amid the bushes numerous black tents, the dwellings of Kedar, likened once of a time by Solomon to his dusky Egyptian bride.

"Passing tent after tent, and leaving behind us many a tattered Bedouin and grazing camel, Salim [his guide] at last indicated to us a group of habitations, two or three of which seemed of somewhat more ample dimensions than the rest, and informed us that our supper that night (for the afternoon was already on the decline) would be at the cost of these dwellings. "Ajaweed, i. e., 'generous fellows,' he subjoined, to encourage us by the prospect of a handsome reception. Of course we could only defer to his better judgment; and in a few minutes were alongside of the black goat's-hair coverings where lodged our intended hosts.

"For some time we remained undisturbed, though not unnoticed; a group of Arabs had collected round our companions at the tent door, and were engaged in getting from them all possible information, especially about us and our baggage, which last was an object of much curiosity, not to say eupidity. Next came our turn. The chief, his family (women excepted), his intimate followers, and some twenty others, young and old, boys and men, came up, and after a brief salutation, Bedouin-wise, seated themselves in a semicircle before us. Every man held a short crooked stick for camel-driving in his hand, to gesticulate with when speaking, or to play with in the intervals of conversation, while the younger members of society, less prompt in discourse, politely employed their leisure in staring at us, or in picking up dried pellets of dirt from the sand and tossing them about.

"But how am I to describe their conversation, their questions and answers, their manners and gestures? "A sensible person in this city is like a man tied up among a drove of mules in a stable; I once heard from a respectable stranger in the Syrian town of Homs, a locality proverbial for the sullen stupidity of its denizens. But among Bedouins in the desert, where the advantages of the stable are wanting, the guest rather resembles a man in the middle of a field among untied mules frisking and kicking their heels in all directions around him. Here you may see human nature at its lowest stage, or very nearly; one sprawls stretched out on the sand, another draws unmeaning lines with the end of his stick, a third grins, a fourth asks purportless or impertinent questions, or cuts jokes meant for witty, but in fact only coarse in the extreme.

Meanwhile the boys thrust themselves forward without restraint, and interrupt their elders, their betters I can hardly say, without the smallest respect or deference.

"And yet in all this there is no real intention of rudeness, no desire to annoy; quite the reverse. They sincerely wish to make themselves agreeable to the new comers, to put them at their ease, nay, to do them what good service they can, only that they do not exactly know how to set about it; if they violate all laws of decorum or courtesy, it is out of sheer ignorance, not malice prepense; and amid the aimlessness of an utterly uncultivated mind they occasionally show indications of considerable innate tact and shrewdness; while through all the fickleness proper to men accustomed to no moral or physical restraint, there appears the groundwork of a manly and generous character, such as a Persian, for instance, seldom offers. Their defects are inherent to their condition, their redeeming qualities are their own; they have them by inheritance from one of the noblest races of earth: from the Arabs of inhabited lands and organized governments. Indeed, after having travelled much and made pretty intimate acquaintance with many races, African, Asiatic, and European, I should hardly be inclined to give the preference to any over the genuine unmixed clans of Central and Eastern Arabia.

"What are you? what is your business? so runs the ordinary and unpremeditated opening of the discourse. To which we answer, "Physicians from Damascus, and our business is whatsoever God may put in our way." The next question will be about the baggage; some one pokes it with a stick, to draw attention to it, and says, "What is this? have you any little object to sell us?"

"Ya woleydy," or 'young fellow' (for so they style every human male from eight to eighty without distinction), 'will you not fill my pipe?' says one, who has observed that nine was not idle, and who, though well provided with a good stock of dry tobacco tied up in a rag at his greasy waist-belt, thinks the moment a fair opportunity for a little begging.

"But Salim, seated amid the circle, makes me a sign not to comply. Accordingly I evade the demand. However, my petitioner goes on begging, and is imitated by two or three others, each of whom thrusts forward, (a true Irish hint,) a bit of marrow-bone with a hole drilled in one side to act for a pipe, or a porous stone, not uncommon throughout the desert, clumsily fashioned into a smoking apparatus, a sort of primitive meerschaum.

"As they grow rude, I pretend to become angry, thus to cut the matter short. "We are your guests, O you Bedouins; are you not ashamed to beg of us? "Never mind, excuse us; those are ignorant fellows, ill-bred clowns, &c.,' interposes one close by the chief's side; and whose dress is in somewhat better condition than that of the other half and three-quarter naked individuals who complete the assembly."

The boiled meat of which the feast consisted was placed in a large wooden bowl, around which all the company gathered and waited in silence for the signal to commence eating, which was a formula of welcome given by the chief, when each reached forth his hand and took what suited him, pulling it in pieces with his fingers—encouraged by the host,

who reiterates at short intervals "Why you not eat? eat; go to work at it; O, a lorded welcomes to you our worthy guests."

"At noon, "a new dish is brought in, looks much like a bowl full of coarse red pea or bran mixed with ochre. This is Sam man article of subsistence to the Bedouin Northern Arabia. Throughout this part the desert grows a small herbaceous and ed plant, with juicy stalks and a little yellow-tinted leaf; the flowers are of a blue or yellow, with many stamens and pappus. When the blossoms fall off, there remain place of each a four-leaved capsule about size of an ordinary pea, and this, when opened to show a mass of minute reddish resembling grit in feel and appearance, farinaeous in substance. The ripening season is in July, when old and young, men and women, all are out to collect the mown untended for harvest. The capsules are gnawed, the seed separated from them, and like a stock of flour for the ensuing year. These seeds, when wanted for use, are coarsely ground in a hand mill, then mixed with water and boiled into the substance which we had before us. Its taste and quality are pretty well hit off by Salim, who describes it not so good as wheat, and rather better than barley-meal."

"Another gift of nature is the Mesa'a, a well known to Bedouins, though neglected by all else. Its shrub attains two or three in height, woody and tangled, with small pointed leaves of a lively green, and a red star-like flower. This in June gives to a berry much resembling in size, color, and taste our own red currant, though inferior in flavor, while its sweetness predominates too much over its acidity. The Bedouins collect and greedily devour it, or, boiling it with a little water, procure a sort of molasses esteemed by them, but by them: This, with the Samh just mentioned, cream, and an occasional repast of butter and meat, though that is a rare luxury, form their list of eatables."

(To be continued.)

In the Spirit there is but one voice.—It is the seed, and of the seed, is the pure language; but out from the seed are the many voices in languages (even the confusion of Babel) speaking as he apprehends, thus; and as speaking as he conceives, thus; so plain manifesting that they are out from the presence and demonstration of the Spirit, the voice is one, and language one, in all, in the of the gospel.—I. P.

The Mussel.—It is a curious fact that the rearing of mussels should have been introduced into France as far back as the year 1710 by an Irishman of the name of Walton. This man who had been shipwrecked in the Bay of L'Aiguillon, and gained a precarious living by catching sea-birds, observed that the mussels, which had attached themselves to the poles on which he spread his nets over the shallow waters, were far superior to those that naturally grew in the mud, and immediately made use of his discovery by forming the first "bouchot," or mussel park, consisting of stakes and rudely interwoven brushwood. His example soon found imitators, and the method of construction adopted by Walton six centuries ago, has been maintained unaltered to the present day. It may give you

of the resources that might be obtained so many utterly neglected lagoons when hear that the fishermen of L'Aiguillon, though they sell three hundred weight of seals for the small sum of five francs, or shillings, annually export or send them to the interior to the amount of a million or two hundred thousand francs.—*Hartwig.*

some of the unconverted Greenlanders had said that the world would be destroyed, as in that case they would have no more to go, they expressed a desire to be converted, that they might go with the Christian believers. "But," added they, with that hesitancy and procrastination so natural to them, in the things that belong to eternity, the destruction will not happen this year, it will come in next season."

Intoxicating Drink.—Lord Chief Justice once remarked, "The places of judicature which I have held in this kingdom have given me an opportunity to observe the original cause of most of the enormities that have been committed for the space of nearly fifty years; and by a due observation, I found that, if the murders and maulings, the burglaries and robberies, the riots and tumults, and other great enormities which have happened in that time were divided into five parts, four of them have been the effects and product of excessive drinking, or of tavern and ale-house meetings."

Relic of Antiquity.—It is stated on the authority of the *Levant Herald* that a valuable relic of antiquity has lately been discovered in the grounds of the Russian Pilgrim's Asylum outside the walls of Jerusalem. It shaft cut out of a single block and only one inch square. From a description in the story of Flavius Josephus it is believed to be a column intended for the decoration of the ancient Temple of Solomon; but that, as the column split while it was being worked, the left unfinished, the lower part of it remaining in a rough unheaven state. The monolith is about thirty-nine feet in length by six inches in diameter.—*Living Age.*

charity, though not apt to look abroad for us, is neither blind nor unfeeling.

THE FRIEND.

FIRST MONTH 13, 1872.

Friends have always believed the gospel dispensation to be one of Spirit and of power. Those who are brought practically into this dispensation, are baptised into the spirit that brings to it, and are made partakers, more or less, of the gifts which the glorified Head bestows among the members of his body.

The ministry of the gospel is emphatically the ministrations of the Spirit, either immediately by the great High Priest himself, or through instruments prepared by his transforming or for the reception of the divine gift, and exercising it under the renewed unction of the Holy One; so as to reach the witness for the Spirit in the hearts of the hearers, quickening and edifying the living members, or exposing and wounding the man of sin in the rebellions. The attendant power of the Holy Spirit being the sole authority and substance of gospel

ministry, it consequently requires neither art, learning nor eloquence to prepare for its exercise, or to make it recognizable or effective. "My speech and my preaching," saith the Apostle, "were not with enticing words of man's wisdom, but in demonstration of the Spirit and of power; that your faith should not stand in the wisdom of men, but in the power of God."

As the true gospel ministry stands not in word only but in power, so the qualification rightly to judge of and estimate it, requires a measure of the same divine unction which alone qualifies to preach. In neither case is this spiritual qualification, nor the exercise of it, at the command of the individuals on whom the gifts have been conferred. So that both ministers and the rightly authorized judges of ministry, require the renewed quickening clothing of a measure of that Spirit which searcheth all things, even the deep things of God, rightly to perform the several functions assigned them, to the preservation and edification of the body in love.

But outside this sympathetic relation existing between minister, elders and other living members of the body of Christ, the general condition of the visible, professing church, exercises a powerful influence on the kind of ministry prevailing in it, and a reciprocal influence of the ministry is manifested among the members. Where the members generally have been brought in good measure under the regenerating power of Divine Grace, many being created anew in Christ Jesus, they are spiritual worshippers in the inner temple, with the faculties of their renewed minds quickened and strengthened by reason of use, and they will have and require a baptizing, gospel ministry. When assembled for the purpose of divine worship, each gathered to the divine gift in him or herself, the weight and solemnity of their spirits will be felt over the whole assembly, and their religious discernment quickly detecting the authority and tendency of whatever offerings may be made, they will be enabled to silence that which lacks the seal of a divine commission, and thus guard the flock from being hurt and led astray.

But in a lapsed condition of the church, where there is a large proportion of nominal members, whose religion is superficial, though making much profession, there will be a disposition not only to tolerate, but to encourage preachers and preaching, which are also superficial and tend to keep the hearers on the surface, not disturbing their false rest, but lulling them into a belief that the christian religion does not call for so self-crucifying and humiliating work as others may have taught. This ministry may appear correct or even beautiful outwardly, or it may be sensational and calculated to stir the emotional feelings, but it is mainly adapted to itching ears rather than sin-laden souls, and while it may amuse or delight the greater part of an audience, it must grieve and burden those whose spiritual faculties are alive, and who cannot esteem a discourse, however nicely constructed or appropriately delivered, as any thing more than sounding brass, or a tinkling cymbal, if it is devoid of the demonstration of the spirit and power of Christ. Thus the condition of a church and the character of the ministry it cherishes, generally operate reciprocally on each other. Not but that among a backslidden people a spring of true gospel ministry

may be kept open, and it is a great blessing where, under such circumstances, the compassionate Shepherd of the sheep condescends to clothe his delegates with power to preach the preaching that He bids them. As they are made willing to visit the suffering seed, and to be baptized for the dead, their labor is not in vain in the Lord, and however little they may be regarded by formal professors, He richly compensates them for every act of dedication. But in such a church silent waiting for ability to worship is irksome, and there is hankering for something to be said or done.

Reading or studying the scriptures, and making verbal profession of belief in Christ and the efficacy of his atonement, are much easier than taking up the daily cross and following him in the regeneration; and they may be much dwelt on, and the notion generally prevail that as these take hold on the attention of the people, and many are said to be converted, because they openly declare they have found Jesus, and many prayers are repeated, therefore religion is prospering, and the Redeemer's kingdom spreading; though the peculiar characteristic of christianity, the baptism of the Holy Ghost and fire, may be little witnessed.

The converts to this kind of religion are easily led into what they consider religious activity; something that may let others know they are justified believers, and must set to work to save others. Preaching becomes an easy thing, requiring no special preparation therefore, nor special divine anointing for such service. The babe state of the true born child, is so small, weak and requiring nourishment and instruction, as to be overlooked or disregarded. Thus some who have been sensible of a visitation of the Day Spring from on high, and awakened to a sense of their need of the washing of regeneration, deceived by the example of others, and through the transformations of Satan, may mistake the nature of the work they are called to engage in, and imagine they are to minister to others, what was intended solely for themselves; thereby bringing darkness on themselves and death over a meeting, to the grief of the spiritually minded.

Oh! the lamentable condition of a people where this state of things prevails among them. A ministry of the letter, and a love for words, instead of visiting the Seed in the hearts of the people, or waiting in reverent prostration at the feet of the Minister of the Sanctuary, to hear and obey his voice. One of the deeply experienced ministers in our Society remarks:

"That excellent gospel liberty of all who feel themselves inspired thereunto, whether male or female, speaking or prophesying one on one, hath been, and still is, abused by false pretenders to divine inspiration; yet the liberty ought to be preserved inviolable, and other means found out to remedy this great inconvenience; which would not be difficult, were the members in a general way spiritually minded, rightly savouring the things that be of God. Forward and unsanctified appearances, by way of ministry, would then be easily awed and suppressed, so as not to disturb the peace of the church. The case has been otherwise, as I have observed in some places; but little minded, if the words and doctrine were sound, and nothing to blame in the conversation. Here the main thing, which is the powerful demonstration of the

Holy Spirit, is little regarded; and if a few are deeply pained at heart with such lifeless ministry, they find it exceedingly difficult to lay hands thereon, for want of more strength; especially when they perceive what strength there is against them: for formal professors love to have it so, rather than to sit in silence. And I have observed such pretenders all month or tongue, and no ears to receive instructions; fond of teaching others, but very unteachable themselves. I pray God to quicken his people, and raise his society into a more lively sense of that blessed arm of power which gathered us to be a people; or, I fear, the great evil above hinted at will prove a very growing one: profession without possession being the proper element for such a ministry to grow and flourish in. I am not quite free to omit a remark on this head, as I am fully persuaded the living members of the church of Christ groan under a painful sense of this sorrowful token of a declined Society."

SUMMARY OF EVENTS.

FOREIGN.—The London Times, referring to the rumor that the United States makes exorbitant demands before the Geneva Board for indemnity for losses by the Alabama and other rebel vessels, professes to believe that the American government has no such intention; that its main desire is to obtain public acknowledgment that the position it took and remonstrances it made during the war were founded on reason. The Treaty, and the American claims under it, are the leading topics of the public journals at the present time. The Advertiser alone opposes the Treaty. It declares that the English commissioners have been outwitted; that England is bound hand and foot, and if the Geneva board should award to the United States all that they offensively claim, a war would be less injurious to England than a settlement.

The chief secretary for Ireland, in an address to his constituents at Drogheda, treats of Irish affairs at considerable length. He declared that the government must be firm in repressing the rebellion in Ireland, and should set its face against leaving education in the hands of the priesthood.

British sovereignty has been proclaimed over that portion of African territory which has recently annexed to the colonial possessions of Great Britain. Brand, president of the Free States, has issued a formal protest against this act of annexation.

Portions of England have been visited by violent thunder storms. At Manchester a large building was struck by lightning, and the fire which thereby was kindled in its vicinity the lightning and thunder were accompanied by hail, and the glass in nearly all the windows exposed to the storm was broken.

The floor of the court-room at Killybegher, Ireland, gave way while a trial was in progress. The room was crowded at the time, and three hundred persons were accompanied by hail, and the glass in nearly all the windows exposed to the storm was broken.

The Prince of Wales has so greatly improved that his physicians do not think it necessary to issue any more bulletins in regard to it.

The American chamber of commerce at Liverpool has adopted a resolution declaring the opinion that the mail service between Great Britain and the U. States, would be improved if the carrying of the American mails was restored to the Commercial line of steamers, and requesting the consul of the United States at Liverpool to communicate the resolution to the postmaster general at Washington.

The committee of the French Assembly, to whom the subject was referred, has made a report approving the project of a steam ferry across the Straits of Dover, between the towns of Dover and Calais.

The orders recently issued from Berlin for the arrest and detention of French citizens as hostages, in places where outrages are perpetrated on German soldiers, have been rigorously executed. About one hundred prisoners, taken in accordance with these orders, are now in the hands of the Prussians. Warning is given of summary proceedings in all cases of murder or assassination.

A dispatch from Marseilles reports that the presence of Gambetta in that city was the cause of much agitation and some disorder. His hotel was surrounded by throngs of friends, who endeavored to call him out. At one time the assemblage became so numerous and turbulent that troops were ordered to the scene, and chasers charged upon and dispersed the mob. Gambetta was not allowed by the police to leave the hotel, for fear that his appearance would lead to further disturbances. Dispatches from Algeria report a defeat of the French troops by the French troops. Two of the rebel chiefs and 150 horsemen were killed.

At the meeting of the French Assembly on the 6th inst., a large number of petitions were presented praying for the restoration of the monarchy. Some asked that the Count de Chambord should be declared king, and the Count de Paris, the Count de Paris, the Count de Paris, and radicals made a noisy opposition throughout the reading, which was frequently interrupted.

A select committee of the Assembly, appointed to consider the method of forming a new constitution, has made a report, in which it rejects a popular vote on the question, and declares it the duty of the National Assembly to make the constitution.

The Spanish Cortes are to meet on the 22d inst. Jose de la Concha has been appointed captain general of Cuba, and Admiral Polo minister to the United States.

The King of Italy sent a special ambassador to the Vatican on New Year's Day to tender his congratulations to the Pope. The ambassador was met by Cardinal Antonelli and informed that the Pope was unable to receive visitors.

Official advices from Ispahan show that the famine in Persia continues, and suffering and desolation are undiminished. Entire districts of that country are depopulated, and the distress in the cities is terrible. The efforts of the government to afford relief are unavailing.

Serious difficulties continue in Belgium in consequence of the strikes of workmen who demand a reduction in the reduced hours of labor. In some places there have been much turbulence and disorder.

A Paris dispatch of the 8th says, that the American Minister Washburne, is indisposed, and has gone to Nice for the restoration of his health.

Victor Hugo was a candidate for the Assembly in the recent supplementary election in Paris, but was unsuccessful.

The Prussian admiralty have cancelled the order recently issued for the equipment of iron clads and other naval vessels for service on the Atlantic Ocean. An order has now been issued granting furloughs to the entire reserve.

London, 1st mo. 8th.—Consols, 92½. U. S. 5-20s of 1862, 92; of 1867, 93½; ten-forties, 95 cents, 92½.

Liverpool.—Uplands cotton, 10d.; Orleans, 10½d. Sales of the day 30,000 bales. California wheat, 13s. per 100 lbs. and winter wheat, 12s., 12½d.; spring, 11s., 11½d.

UNITED STATES.—The Public Debt on the first inst., less balance in the treasury, was \$2,243,836,411. The decrease during the Twelfth month was \$4,112,956. The balance in the treasury in coin was \$111,432,226; and in certificates, \$18,581,456.

In an interment in Philadelphia during the week ending at noon on the 6th inst., numbered 559. There were 230 deaths of small pox, 59 of consumption, 25 of inflammation of the lungs, 19 of convulsions, and 12 of old age; 261 were adults and 298 under twenty years of age. The mean temperature of the Twelfth month, in the Pennsylvania Hospital, was 30.85 deg., the highest during the month 45 deg., and the lowest 2.50 deg. The average of the mean temperature of the Twelfth month for the past 82 years is stated to have been 32.60 deg., the highest mean during that entire period, 1848, was 45 deg., the lowest, in 1832, 25 deg.

The amount of rain in the month of 1858 was 47.27 inches, in 1870 it was 44.06 inches. The total number of commitments to the County Prison during the year 1871 was 13,171, of whom 9,974 were men, and 3,197 women.

The annual report of the superintendent of common schools in Pennsylvania, shows an increase of 1,183 schools during the past year. The number of pupils attending the schools is 834,614. The total cost of maintaining them was \$8,580,918, not including \$820,000 appropiated to the support of orphan schools.

Congress reassembled on the 8th inst. In the House of Representatives a resolution was offered directing the Committee of Ways and Means to report a bill promptly repealing the income tax, so that it would not be collected for the year 1871. The resolution was defeated by a vote of 81 to 71. The House also voted

down a resolution to instruct the Ways and Means Committee to report a bill repealing all taxes except those upon liquors and stamps. A joint resolution amend the constitution so as to make naturalized citizens eligible to the presidency and vice-presidency, the United States was offered and failed, yeas 81, nays 65, less than the necessary two-thirds being in affirmative.

The Markets, &c.—The following were the quotations on the 8th inst. New York.—Sales of cotton were 21½ cts. for this month, 21½ cts. for the next month and 22½ cts. for the Third month. American, 100½. U. S. prices, 1881, 115½; ditto, 1868, 112½; 10-40, 5 per cent, 100½. Philadelphia.—Pensylvania red, \$1.61 a \$1.62. Mixed corn, 73 cts.; corn, 65 a 69 cts. Oats, 54 a 56 cts. Sales of 2100 cattle at 7 a 8½ cts. for prime, 6 a 7 cts. for medium and 4 a 5½ cts. per lb. gross for common. Sheep at 6 a 7½ cts. per lb. gross. Hogs, 7 a 7½ cts. Cattle.—No. 1 spring wheat, \$1.27 a \$1.28; No. 2, do., \$1.20. No. 3 do., \$1.13. No. 2 corn, 41½ cts. Oats, 34½. St. Louis.—No. 2, spring wheat, \$1.30; No. 3, red, \$1.20; \$1.51; No. 2, do., \$1.55 a \$1.57. Mixed corn, 40½ a 41 cts. No. 2 mixed oats, 35½ cts. Spring barley, 65 a 70 cts. Rye, 76 a 78 Lard, 8½ cts.

ERRATUM.—On page 158, middle column, 171 for 170. The sentence should read. This was first attempted at a Friends' meeting.

FRIENDS' BOOK STORE.

There have been recently reprinted editions of following works, which are now for sale at No. 40, Arch Street.

Examples of Youthful Piety.
Barclay on Church Government.
Usher's Letters.
Memoirs of Edwin Price.
True Christian Baptism and Communion.
Circles' account of Friends, by T. Evans.
Journal of William Allen, 2d. edition.
There are also on hand a supply of other approved writings of Friends.

FRIENDS' BOARDING SCHOOL FOR INDIVIDUAL CHILDREN, TUNESSA, NEW YORK.

A suitable Friend and his wife are wanted to charge of this institution, and manage the Farm connected with it. Application may be made to Ebenezer Wurt, Marshallton, Chester Co., Thomas Wistar, Fox Chase P. O., Philadelsa, Samuel Morris, Olney P. O., do. Joseph Scatteredgo, 413 Spruce Street, do.

FRIENDS' ASYLUM FOR THE INSAANE.

At Philadelphia, (Twenty-third Ward,) Philadelphia Street, and Superintendent.—JOSUAH H. WILKINSON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

DEED.—On the 30th of the late month last, 20th mo. 1871, at the residence of her parents, Elina Sarah Roberts, in Moorestown, on the 12th of 7 mo. 1871, SALLIE W. ROBERTS, in the 21st year of age, a member of Chester Monthly Meeting, N. J.

do., on the 20th of Twelfth month, 1871, at the residence of his father, Samuel W. Maris, near Darlington, Harford county, Maryland, JESSE L. MARIS, in the 22d year of his age. From early life he had been remarkably circumspect and watchful. One of the marks of his character was freedom from dissipation, being unwilling to engage in conversation that would be to another's disadvantage. His sickness was without a murmur. The day before he died he uttered many comfortable expressions, such as "I am ready to go." "I feel so happy," and on bidding his family farewell, and asking his friends to bless him, he quietly passed away. "Blessed are the pure in heart, for they shall see God."

—, at his residence in Solebury Township, 130 County, Pa., on the 14th of Twelfth month, 1871, J. D. BALDWIN, in the 71st year of his age, an esteemed member of Buckingham Monthly Meeting of Friends.

For "The Friend."

Central Arabia.

(Continued from page 156.)

On the 27th of the month we passed with no difficulty a series of abrupt sand-hills, close in the direct course of Wadi Sirhan, for the first time, we saw the Ghada, a type almost characteristic, from its very frequency, of the Arabian Peninsula, and often noted to by its poets. It is of the genus scorpionia, with a woody stem, often five or six feet in height, and innumerable round or oval twigs, very slender and flexible, forming a large feathery tuft, not ungraceful to the eye, while it affords some kind of shelter to the traveller and food to his camels. These are passionately fond of Ghada, and will usually turn right out of their way, in a fit of blows and kicks, to crop a mouthful of them, and then swing back their long necks in the former direction, ready to repeat the same manoeuvre at the next bush as though they had never received a beating for their voracity.

After passing the sand hills, the party entered upon an open, desert country. Here we sighted a large troop of ostriches, a bird which is very timid and difficult to approach. We saw them far in the distance running in a zig-zag line, one after the other. The Arabs call them, as their plumage is eagerly bought at the frontiers to be resold in Egypt and Syria, whence it often passes on to Europe. Water is found on this steppe. They journeyed on all the long summer day, and only stopped an hour at sunset to prepare a considerable meal; then remounted, and did not stop till after midnight for rest and sleep. "Fine," says our author, "was, however, what disturbed by a scorpion bite; not a serious accident, indeed, as it sounds, considering the genus of the aggressor, but painful enough, though soon passing off. These little scorpions are curious little creatures, about a fourth of an inch in length, and, apparently, all claws and tail, of a deep reddish color, and very active. They abound throughout the sandy soil. In the daytime they wisely keep out of the way, but at night come out to take the cooler air. Their sting is exactly like the smart of a white-hot iron, and firmly pressed on the skin, and when I

felt my forehead thus assailed, I jumped up exceeding quick, anticipating twenty-four hours of suffering, the usual period allotted, at least in popular credence, to the duration of scorpion torture; but I was agreeably disappointed, for the pain did not last above an hour, was accompanied by little swelling, and then went entirely off, hardly leaving any perceptible mark.

"We remounted by the light of the morning star, anxious to enter the Djowf before the intense heat of noon should come on; but we had yet a long way to go, and our track followed endless windings among low hills and stony ledges, without any symptom of approach to cultivated regions. At last the slopes grew greener, and a small knot of houses with traces of tillage close by appeared. It was the little village of Djoon, the most westerly appendage of Djowf itself. I counted between twenty and thirty houses. We next entered a long and narrow pass, whose precipitous banks shut in the view on either side.

"At last we cleared the pass, but found the onward prospect still shut out by an intervening mass of rocks. The water in our skins was spent, and we had eaten nothing that morning. When shall we get in sight of the Djowf? or has it flown away from before us. While thus wearily laboring on our way, we turned a huge pile of crags, and a new and beautiful scene burst upon our view. A broad deep valley, descending ledge after ledge till its innermost depths are hidden from sight amid far-reaching shelves of reddish rock, below everywhere studded with tufts of palm-groves and clustering fruit-trees in dark green patches down to the furthest end of its windings; a large brown mass of irregular masonry crowning a central hill; beyond a tall and solitary tower overlooking the opposite bank of the hollow, and further down small round turrets and flat house-tops half buried amid the garden foliage, the whole plunged in a perpendicular flood of light and heat; such was the first aspect of the Djowf as we now approached it from the west. It was a lovely scene, and seemed yet more so to our eyes weary of the long desolation through which we had with hardly an exception journeyed day after day since our last farewell glimpse of Gaza and Palestine up to the first entrance on inhabited Arabia.

"Reinamated by the view, we pushed on our jaded beasts, and were already descending the first craggy slope of the valley, when two horsemen, well dressed and fully armed after the fashion of these parts, came up toward us from the town, and at once saluted us with a loud and hearty 'Marhaba,' or 'welcome,' and without further preface they added, 'alight and eat,' giving themselves the example of the former by descending briskly from their light-limbed horses, and untying a large leather bag full of excellent dates, and a water-skin, filled from the running spring;

then spreading out these most opportune refreshments on the rock, and adding, 'we were sure that you must be hungry and thirsty; so we have come ready provided,' they invited us once more to sit down and begin.

"Hungry and thirsty we indeed were; the dates were those of Djowf, the choicest in their kind to be met with in northern Arabia, the water was freshly drawn, cool and clear, no slight recommendations after the ammoniaical wells of Magooa and Oweysit, so that altogether we thought it unnecessary to make our new friends repeat their invitation, and without delay set ourselves to enjoy the present good, leaving the future with all its cares to Providence and the course of events."

The Djowf is a sort of oasis, a large oval depression of sixty or seventy miles long, by ten or twelve broad, lying between the northern desert that separates it from Syria and Euphrates, and the southern sandy waste which must be crossed before we can reach the nearest mountains of the Central Arabian plateau. It is as if it were a porch or vestibule to Central Arabia.

The Djowf supports a population of about 40,000 people. Its principal town, bearing the same name as the valley itself, is loosely built, interspersed with large gardens, and extends about four miles in length by one half a mile in breadth. Its gardens are justly celebrated in the East for productiveness and variety, supplying the universal date palm, and also the apricot, peach, fig-tree and vine. In the intervals between the trees and in the fields beyond, corn, leguminous plants, gourds, melons, &c., are widely cultivated. Here, too, for the last time, the traveller bound for the interior sees the irrigation indispensable to all growth and tillage in this droughty climate, kept up by running streams of clear water, whereas in more central Arabia this has to be procured from wells and cisterns.

"The gardens just described are everywhere enclosed by high walls of unbaked brick, and are intersected by a labyrinth of little watercourses passing from tree to tree and from furrow to furrow. Among all their different kinds of produce one only is considered as a regular article of sale and export—the date; and from this the inhabitants derive a tolerable revenue, not, indeed, by traffic within the limits of the Djowf itself, where every one is supplied from his own trees, but from the price received in exchange at Tabook or Hä'yei, Damascus and Bagdad, for even so far is this fruit carried. It is almost incredible how large a part the date plays in Arab sustenance; it is the bread of the land, the staff of life, and the staple of commerce. Mahomet, who owed his wonderful success at least as much to his intense nationality as to any other cause, whether natural or supernatural, is said to have addressed his followers on the subject in these words: 'Honor the date-tree, for she is your mother.'"

They remained several weeks in this valley,

bartering their goods with the inhabitants, becoming acquainted with their customs, and making arrangements for their southern journey into Central Arabia.

The two horsemen, who so hospitably received our travellers on their arrival, contended for the honor of entertaining them as guests. The elder carried his point. He was a man apparently of about forty years of age, tall, well-made, dark-complexioned, and with a look that inspired some mistrust, while it denoted some intelligence and more habitual haughtiness. He was handsomely dressed for an Arab, wearing a red cloth vest with large hanging sleeves over his long white shirt, with a silk handkerchief, striped red and yellow, on his head, and a silver-hilted sword at his side. In short, all about him denoted a person of a certain wealth and importance. This was Ghaff-el-Habooob, the chief of the most important and the most turbulent family of the Djowf, Beyt-Habooob, who were not long since the rulers of the town, but are now, like all the rest of their countrymen, humble subjects to Hamood, vicegerent of Telal, the prince of Djebel Shomer."

On arriving at his house they were introduced into the K'hāwah or reception room, a large hall about 50 feet by 16, and 20 feet high, with small triangular recesses in the walls, designed for the reception of books, lamps, &c. The floor was strewn with fine clean sand, and garnished all round alongside of the walls with strips of carpet, upon which cushions, covered with silk, were placed at suitable intervals. In one corner was placed a small charcoal furnace, hollowed out of a block of stone, designed for preparing coffee, with a range of copper coffee-pots on its edge. The number of these indicate the riches and munificence of their owner, by implying the frequency of his guests and the large amount of coffee that he is in consequence obliged to have made for them.

(To be continued.)

For "The Friend."

Memories of Mildred Ratcliff.

(Continued from page 164.)

Elizabeth Gillingham to Mildred Ratcliff.

"Baltimore, 1st mo. 5th, 1823.

"My Dear Friend,—I received thy truly welcome letter, and my spirits revived in the evidence thereby afforded, of my being remembered by thee. When the poor mind is under some discouragement, it is refreshing to receive a token of love from a dearly beloved friend in the Truth, and to feel that we still live in the hearts of the faithful. In the present instance thy kind remembrance has been like opening the prison doors to that which was bound, and proclaiming liberty to that which was held in captivity.

"The account thou hast given of thy travels and exercises was truly interesting. In this is your heavenly Father glorified, that ye bring forth much fruit. When we are so favored as to be enabled to rejoice in suffering, and to count all things but loss for the excellency of Christ Jesus, then and then only are we prepared to meet our allotted portion of trial with true resignation; nay, even with thankfulness. Then we can desire with truth and in sincerity, that we may partake of the Lord's purifying baptisms, and that His hand may not spare, nor his eye pity, until all his designs towards us are accomplished.

"Dear father enjoys good health. We are

going on pretty much as when thou wast here, except that brother William has removed to Alexandria. This seems to make a break in our little band. But it is not a matter of the greatest importance to be separated in this life, if we are so living as to have an assurance of meeting at last in the alone permanent abode. May desires after this condition overbalance in our view all other pursuits! May our hearts continually crave the Bread of Life, that they may be sustained in holiness until the day comes when the silver cord is loosened. Then fully prepared to join those who have washed their robes and made them white in the blood of the Lamb, we shall be ever employed in ascribing glory and honor, thanksgiving and praise, unto Him who hath loved us, and redeemed our souls. Notwithstanding these thoughts, my faith is so weak at times, that I can hardly say with the poor publican, 'Lord have mercy upon me.' I do desire above all things, that the small portion of faith I have may not fail: for what else can comfort the soul under tribulation, when everything seems clothed with blackness. Oh! when death hovers on the eyelids; when the curtain which will shut us from life seems ready to drop; when we are forced to cry out, 'A Saviour or I die'; then to feel faith revive, to hear her voice command our fears to be still, and to see her light upon our path, this is the one desirable thing for the soul. Young says,

'What's night eternal, but a frown from Thee?
'What's Heaven's meridian glory, but Thy smile.'

"Friends here are generally well in health, and although we have been assailed by a dividing spirit, yet we trust the destroyer may stay his hand, and that filthy lucre may no more blind the eyes of those who ought to lead the flock as delegated shepherds, and to be waymarks to those who inquire the way to Zion."

Sarah Morris to Mildred Ratcliff.

"Philadelphia, 2d mo. 12th, 1823.

"Thy acceptable epistle was cordial to my feelings. The tender appellation of sister I can reciprocate. My mind when I first became acquainted, sweetly saluted thee, and I thought I felt that unity which remains to be the bond of peace.

"I fully unite with thee, my beloved friend, that the end crowns all. Many begin well, but alas! fall short of the glory which awaits the faithful. The terms are too hard, and they turn away sorrowful. Happy is it for those who hold fast their confidence without wavering, knowing that the foundation of God standeth sure, having this seal, 'The Lord knoweth them that are his.' To these is his promise, 'When thou passest through the waters, I will be with thee; and through the rivers, they shall not overflow thee; when thou walkest through the fire thou shalt not be burned, neither shall the flame kindle upon thee.'

"I find, my dear friend, the tribulated path has been thy portion, and though thy trials are great, thy consolations are many. There is no way to the kingdom but through suffering. Yet, though many are the afflictions of the righteous, the Lord delivers them out of them all. Though at times the heavens may seem as brass, and the earth as iron bars, yet at other seasons, the mind is refreshed with the hidden manna, which, if faithfulness is

abode in, nourishes up the soul unto eternal life."

Though the name of the individual addressed is not given in this letter, from the following it, there is no doubt it was the writer of the above, Sarah Morris, of Philadelphia;

"Short Creek, 10th mo. 3d, 1823.

"My very dear sister,—For so I can thee in the fellowship of the everlasting pel of Jesus Christ. Very sweetly my r was drawn this morning towards thee, thine, saluting you in the language, May Lord Almighty bless you now and forever."

"The above lines were written this morning before meeting. Now (the afternoon) some precious love sweetly flowing seems to dictate. May the Lord Almighty bless now and forever, and give you not only bread, but daily strength to walk in His and maintain even to the end, your christian care and comely order in reading the Scriptures. This I was permitted not to observe, but also to become a sharer in blessing. Ah, my dear S., what blessing like that of an evidence that the Divine Father owns us in the practical part of our religious duties. Therefore, let others do as I will, may you be enabled through all and all, to thank God and take courage. I you run through the troop, and leap over wall, gaining the prize; and wearing the crown that is in store, on the terms of holding to the end. Many a time the comfort I enjoyed in your circle has been brought view, and desires have been raised, that members of our Society every where, more in the practice of reading the various Scriptures of Truth, and more careful to maintain christian discipline in their families. Then should we more frequently present in the line of our experience, the gracious promise fulfilled, 'Where two or three gathered together in my name, there am I in the midst of them.' Oh, how would the blessed Lord and Master delight to bless his people in basket and in store, here and hereafter forever! But alas! instead of this, how the mighty fallen in high places, and the gold become dim. Yet this moment the guile occurs, 'Fear not little flock: it is your Father's good pleasure to give you the kingdom.' What cause of thanksgiving and praise. May we always and on all occasions, be found in this glorified, sanctified, and purified saith my soul. In it there is nothing to fear: Neither death, nor life, nor angels, nor principalities, nor powers, nor things present, things to come, nor height, nor depth, nor any other creature, shall be able to separate from the love of God which is in Christ Jesus our Lord. What a comfort to feel we trust that the same Divine Power which authorized this language in humble confidence is the same, the very same, yesterday, to-day and forever. Ten thousand hallelujahs offered unto the Lord God and the Lamb, whom there is neither variableness nor shadow of turning. May we, my dear sister, be deep in the power of His might to the moment of our stay here. Then shall we indeed have an eternity to spend together where the wicked cease from troubling, and the weary spirit is at rest. A few more baptisms, a few more purifying dispensations will bring about the glorious, the very sole

od, if we hold fast the profession of our
without wavering to the end.

Alas, for what do I say? how comes it that I
write? surely I see, as in a moment,
looking back, my many misses and frequent
errings. I trust it is safe to say not as re-
spects faith and doctrine, but rather from the
of rectitude. Not that the way is not a
and comprehensive, and clearly seen
ough the adorable mercy of a gracious
it is so plain that a wayfaring man,
igh a fool, need not err therein. It seems
e all my misses are for want of a deeper
ling in the power of an endless life; even
telling in Him who declared himself to be
vine from whence the branches must de-
all their nourishment. It is a mercy to
the cause why we so often totter, or miss
topping-stones. May the Lord Almighty
only remember me in his mercy, but all
little depending children everywhere.
the meat and drink it is to know and do
ill, and keep them as in the hollow of his
hand now and forever.

thy letters, and kindness every way, with
of our beloved friends of that city, are
only acceptable, but refreshing and hut-
ing to my feelings. The Lord will re-
ward you all—praised be his name forever!
I had a good Yearly Meeting. My health,
though poor, was so much increased, as to
enable me to attend all the sittings. O how
many mercies! What shall we render to the
Lord for all his benefits? What but the tribute
of thanksgiving and praise! In a fresh feel-
ing of which, I again salute thee and thine,
and bid you an affectionate farewell.

MILDRED RATCLIFF.

Please give my dear love to those who think
worthy of enquiring after."

S. Morris to M. Ratcliff.

Philadelphia, 10th mo. 24th, 1824.

"The receipt of my dear Mildred's communi-
cation of the 3d instant, was salutary to me.
I remembered in so affectionate a man-
ner to receive the language of encourag-
ement, was like a brook by the way. It is
truly said, 'They that feared the Lord spake often
one to another, and the Lord hearkened and
answered them: and a book of remembrance was
written for them, &c. Now may we not evince our
affection, by conferring together in an epistolary
intercourse, endeavoring thereby to
strengthen each other in every good word and
deed.'

"Thy letter was sweetly brought to me
this evening whilst my companion was
reading the best of books. The reading there-
of continues to be our daily practice. I greatly
trust we may not faint or grow weary in the
performance of any duty! All we can do is
to seek a small return for the mercies received.
The aspirations of the mind often be-
come, 'What shall I render unto the Lord for all his
benefits.' These are indeed new morning and
evening prayers. A pious author observes,

"In the dark watches of the night,

I'll count thy mercies o'er,

I'll praise thee for ten thousand past,

And humbly hope for more."

"Thou speaks of the present state of things
in the world. How indeed are the mighty
lions, and the fine gold sadly become dim
and dark! We have been for some time standing as on a
board of glass mingled with fire. Were it not
for the degree of faith, graciously dispensed, we
should fear being overwhelmed in the torrent

The language thou hast transcribed, 'Fear
not little flock,' &c., is truly consoling. If
He, the Lord Jesus, is for us, no matter who is
against us. I rejoice in the belief that He is;
and that the foundation of Truth standeth
sure, having this seal, the Lord knoweth them
that are His. His precious promises are yea
and amen forever; and I have not a doubt
but that in His own time, He will arise, and
his enemies be scattered. I greatly desire we
may abide in the everlasting patience; not
saying by my own might, or own power, I
have done this, but give the glory, honor, and
dominion to Him unto whom they belong.

"I do not want to introduce thee too much
into our troubles, believing thou art not ex-
empt from many others. Though outward
comforts may have been in measure denied
thee, I trust thy bread will be given thee, and
thy water will be sure. If the dew of Heaven
rests on thee, which I trust will be the case,
it will be a greater blessing than the fullness
of the earth.

Sincerely thy friend,

SARAH MORRIS.

"P. S. My husband sends his dear love to
thee, and hopes thou wilt write again, and
keep the chain bright."

(To be continued.)

For "The Friend."

The Coral Growth.

(Concluded from page 165.)

The atolls, or lagoon-islands, are numerously
scattered over the face of the tropical
ocean. The Marshall and Caroline islands,
the Paumotu group, the Maldin, Laedins,
and many other groups or solitary islets of
the Pacific or Indian ocean, are entirely built
up of coral; every single atom, from the small-
est particle to large fragments of rock, bearing
the stamp of having been subjected to the
power of organic arrangement. A narrow
rim of coral-reef, generally but a few hundred
yards wide, stretches around the enclosed
waters. When a lagoon-island is first seen
from the deck of a vessel, only a series of dark
points is descried just above the horizon.
Shortly after, the points enlarge into the
plumed tops of cocoa-nut trees, and a line of
green, interrupted at intervals, is traced along
the water's surface.

The long swell produced by the gentle but
steady action of the trade wind, always blowing
in one direction over a wide area, causes
breakers which even exceed in violence those
of our temperate regions, and which never
cease to rage. It is impossible to behold these
waves without feeling a conviction that a low
island though built of the hardest rock, would
ultimately yield, and be demolished by such
irresistible forces. Yet the insignificant coral-
islets stand and are victorious; for here an-
other power, antagonistic to the former, takes
part in the contest. The organic forces separate
the atoms of carbonate of lime one by
one from the foaming breakers, and unite
them in a symmetrical structure. Let the hur-
ricane tear up its thousand huge fragments, yet
what will this tell against the accumulated
labors of myriads of architects at work night
and day, month after month. Thus do we
see the soft and gelatinous body of a polyp,
through the agency of vital laws, conquering
the great mechanical power of the waves of
an ocean, which neither the art of man nor
the inanimate works of nature could success-
fully resist.

The reef-building corals, so hardy in their
respect, are extremely sensitive and delicate
in others. They absolutely require warmth
for their existence, and only inhabit seas the
temperature of which never sinks below 60°
Fahr. They also require clear and trans-
parent waters. Wherever streams or currents
are moving or transporting sediment, there
no corals grow, and for the same reason we
find no living zoophytes upon sandy or muddy
shores.

As within one east of the lead coral-reefs
rise suddenly like walls from the depths of
the ocean, it was formerly supposed that the
polyps raised their structures out of the pro-
found abysses of the sea; but this opinion
could no longer be maintained after Darwin
and other naturalists had proved that the
lithophytes cannot live at greater depths than
twenty or at most thirty fathoms.

Hereupon Quoy and Gaimard broached the
theory that corals construct their colonies on
the summits of mountain ridges, or the circular
crests of submarine craters, and thus ac-
counted both for the great depths from which
the coral-walls suddenly rise, and the annular
form of lagoon-islands. Yet this theory, in-
genious as it was, could not stand the test of
a closer examination: for no crater ever had
such dimensions as, for instance, one of the
Radak islands, which is fifty-two miles long
by twenty broad; and no chain of mountains
has its summits so equally high, as must have
been the case with the numerous reefs bearing
submarine rocks, considering the small
depth from which the lithophytes build.
Another seemingly inexplicable fact was, that,
although corals hardly exist above low-water
mark, reefs are found at Tongatabre or Eua,
for instance, at elevations of forty and even
three hundred feet above the level of the
ocean.

Charles Darwin was the first to give a satis-
factory explanation of all the phenomena of
coral formations, by ascribing them to the
oscillations of the sea bottom, to its partial
upheaving or subsidence.

It is now perfectly well known, that large
portions of the continent of South America,
Scandinavia, North Greenland, and many
other coasts are slowly rising, and that other
terrestrial or maritime areas are gradually
subsiding. Thus on every side of the lagoon
of the Keeling islands, in which the water is
as tranquil as in the most sheltered lake, Dar-
win saw old cocoa-nut trees undermined and
falling. The foundation-posts of a store-house
on the beach, which, the inhabitants said,
had stood seven years before just above high
water, were now daily washed by the tide.

Supposing on one of the subsiding areas an
island mountain fringed with corals, the lith-
ophytes, keeping pace with the gradual sink-
ing of their basis, soon raise again their solid
masses to the level of the water; but not so
with the land, each inch of which is irremedi-
ably gone. Thus the fringing reef will gradu-
ally become an encircling one; and if we sup-
pose the sinking to continue, it must by the
submergence of the central land, but upward
growth of the ring of coral, be ultimately con-
verted into a lagoon island.

The numerous atolls of the Pacific and In-
dian ocean give us a far insight into the past,
and exhibit these seas overspread with lofty
lands where there are now only humble mon-
umental reefs dotted with verdant islets. Had
there been no growing coral, the whole world

have passed away without a record; while from the actual extent of the coral-reefs and islands, we know that the entire amount of high land lost to the Pacific was at least 50,000 square miles. But as other lands may have subsided too rapidly for the corals to maintain themselves at the surface, it is obvious that the estimate is far below the truth.

As living coral-reefs do not grow above low-water mark, it may well be asked how habitable islands can form upon their crests. The breakers are here the agents of construction. They send fragments and blocks from the outer border of the reef, and throw them upon the surface. Corals and shells are pulverised by their crushing, grinding power, and gradually fill up the interstices. In this manner the pile rises higher and higher, till at last even the spring tides can no longer wash over it into the lagoon, on the border of which the fine coral sand accumulates undisturbed. The seeds which the ocean-currents often carry with them from distant continents, find here a congenial soil, and begin to deck the white chalk with an emerald carpet. Trees, drifting from the primeval forest, where they have been uprooted by the swelling of the river on whose banks they grew, are also conveyed by the same agency to the new formed shore, and bring along with them small animals, insects or lizards, as its first inhabitants. Before the stately palm extends its feathery fronds, sea-birds assemble on this new resting-place, and land birds, driven by storms from their usual haunts, enjoy the shade of the rising shrubbery. At last, after vegetation has completed its work, man appears on the scene, builds his hut on the fruitful soil which falling leaves and decaying herbs have gradually enriched, and calls himself the master of this little world. In this manner doubtless all the coral reefs and islands of the tropical seas have gradually become verdant and habitable.

For "The Friend."

A Word of Encouragement.

The following extract from a letter recently received from a Friend, of another Yearly Meeting, it is hoped may convey to some of its readers a little comfort, and encourage them still to persevere in pursuing that humble, self-defending path, into which they were led by the Spirit of Truth in the day when their feet were turned from the broad way that leads to destruction.

"The query often arises, what will become of our poor Society, once highly favored, and still wretched over for good, in many places almost shattered to pieces, and a large proportion in many places seem to be running into creaturely activity, it is to be feared, without the leadings of the Spirit of Truth. Where will it land us? Off the true foundation it will undoubtedly land those who are carried by the whirlwind of excitement that seems now sweeping over the Society; and although we may be ready to say 'what wilt thou do for thy great name sake,' yet He, who knows the end from the beginning, who rules over sea and land, is also able to turn the hearts of the children of men, as a man turns the water-course in his field; and though thousands fall at our side, and ten thousand at our right hand, yet I believe if His humble, dependent children dwell in humility and watchfulness before Him, they will be preserved as in the hollow of His Almighty hand, until the storm is overpast; and for our place of

defence shall be the munition of rocks, our breast shall be given us, our water shall be sure. 'I am the Lord, I change not; therefore ye sons of Jacob are not consumed.' The foundation of God standeth sure, having this seal, the Lord knoweth them that are His; so that there seems to be encouragement for his humble, dedicated servants, to hold on their way, however discouraging and isolated our situation may appear to be. One thing I have remembered, dear friend, that it was said, 'They that feared the Lord spake often one to another, and the Lord hearkened and heard it, and a book of remembrance was written before Him, for them that feared the Lord and thought upon his name. In that day when I make up my jewels, I will spare them as a man spareth his son that serveth him.

"Now as we walk by the way and are sad, pondering the things that are coming to pass in these days, it seems like cordial to the spirit to be greeted, from time to time, by our fellow pilgrims, journeying the same way, endeavoring to make strait steps to our feet, through all discouragements that may surround and beset us, keeping our eye to the Captain of Salvation, whilst endeavoring to steer our course toward the land of rest and peace, where the wicked cease from troubling, and the weary soul may rest in the enjoyment of the recompense of reward, prepared for those who, having fought the good fight, have kept the faith and finished their course; their robes being washed in the blood of the Lamb. These shall be clothed with white robes, and with palms in their hands, shall celebrate the praises of the Lord God and the Lamb, who are worthy forever and forever more."

To feel things spiritually, is to be a doer-keeper in the house of God; to know them only outwardly, or to talk of them, are but the tabernacles of Mesekh and the tents of Kedar.—*I. Everard.*

Selected.

LINES ADDRESSED TO A FRIEND ON HIS SIXTY-SECOND BIRTH DAY.

Just sixty-two—then turn thy light,
And get thy jewels all re-set.
'Tis past meridian, but still bright
And lacks some hours to sunset yet.
At sixty-two
Be strong and true
Scour off thy rust and stain anew.
'Tis yet high day, thy staff renew
And fight fresh battles for the truth,
For what is age but youth's full bloom,
A ripper, more transcendent youth.
A wedge of gold
Is never old.
Streams broader grow as downward rolled.
At sixty-two life is begun;
At seventy-three, begin once more,
Fly swifter as thou nearest the sun,
And brighter shine at eighty-four.
At ninety-five
Shouldst thou arrive,
Still wait on God, and work and thrive.
Keep thy locks wet with morning dew,
And freely let thy graces flow,
For life well spent is ever new,
And years anointed, younger grow.
So work away,
Be young for aye
From sunset breaking into day.

Selected.

Oh make our house thy sanctuary,
Come in to us, a friendly guest;
And in one circle ever tarry;
Then shall we be forever blest.
And Thou a housemate, shall these walls
Transfigure into royal halls.

Joy dwells, oh Lord, where'er thou stayest,
There blooms a heavenly blessedness;
In silk thy poorest thou arrayest,
Thou' men see but a ragged dress.
The purest, high delight is there,
And even in want, is wealth to spare.

Thou every morning us awakest
And graciously to prayer dost call—
The household cares thou undertakest
Thou knowest what is best in all.
And care, though 'twere a leaden load
Is but a feather's weight with God.

One tender bond all hearts embraces
A heavenly bond thy hand hath woven;
The rooms are turned to temple spaces
Illumed with God's peace and love,
Grace is the sunshine of our home
And there God's angels go and come.
—From the German

For "The Friend."

Controversy.

The following remarks on controversy extracted from a work on Ritualism published a few years since—and contain much of truth expressed in a clear and forcible manner. While we admit the necessity of controversy it must not be forgotten, that those who engage in it in defence of religious truth, on to know the right qualification and preparation for it, as for all other religious service.

"Sometimes one has heard the observation that truth is never promoted by controversy. This statement narrowly escapes being exact reverse of the fact. For it surely requires but a very superficial knowledge of history to produce the conviction that controversy has been the most conspicuous method through which truth has succeeded at length in fighting its way to victory. And so invariable has been this process, that fail to recognize any truth which can be regarded of high importance that does not bear the marks of this fiery ordeal. Men of natural timidity, approaching to a moroseness—or men who are not quite so that they are in possession of the truth, are apprehensive lest controversy should throw their insecure faith—or men who prefer peace to principle, and would suffer the gospel to incur discredit, rather than peril worldly friendships, discontinue the presentation of truth, or the presentation any truth which may require defence. Such men Mount Carmel must be a dark in the history of Judaism, for there a controversy was waged between the living Christ and Baal, which resulted in the discomfiture of the false prophet, and false priests, and the triumphant demonstration that "the Lord is the God, the Lord he is the God"; how shall the Saviour escape their census when with divine wisdom and power He dealt with the Pharisees and the Sadducees and silenced, if He did not convert, the And what must they think of Paul, who the ancient Agora at Athens encountered Stoics and Epicureans, and (withersoever went) entered into the synagogues and disputed with the Jews, and for the space of years conducted a daily controversy in a school of one Tyrannus? And what will he say of his Epistles to the Romans, and Galatians which are controversial treatises the most subtle, elaborate, vigorous, unflinching, and triumphant character? Or will he be said of the controversial works of Irenæus, or Origen, or of Augustine? Was the Reformation under Luther a huge blunder, because, strong in the truth of God, he de-

Pope, and all the papal powers in Europe, scattered his polemical tracts and treatises, "thick as leaves in Vallambrosa?" Must drop tears of sorrow over the immortal works of Baxter, and Barrow, and Taylor, and Chillingworth, and Jewel, and Calvin, use they tore the citadel of Romanism to its stone by stone? The noblest works of learning and genius, works which will survive as monuments of the greatness of men, those which have been written in defence of truth; and the sublimest epochs in the history of our world have been those in which champions of truth and of error have met in bold and resolute encounter, long continued may be, but invariably resulting in the triumph of the right over the wrong. Not step in advancement has truth or liberty made and secured without struggle, and which has been from the beginning will continue unto the end. Now, as in apostolic times, the injunction has force, "Contend earnestly for the faith once delivered to the saints," and the word he uses expresses a struggle of the most determined and unflinching character. It denotes the struggle of man against man, as for very life, every muscle and nerve yielding its fullest power to vanquish the enemy."

The Great Salt Mine of Cracow.

The most celebrated and productive salt mines in the whole world are those of Wieliczka, in Galicia or Austrian Poland, ten miles from Cracow. The greatest depth of the mines is about eight hundred feet. They consist of seven different levels or stories, one above the other, connected by countless passages, flights of steps and bridges.

A recent traveller describes a visit to this city which is condensed as follows:

The apparatus for letting us down into the mine was a species of iron basket, in which I sat, holding to ropes fastened above to a circular iron shaft. This ring slipped gradually down the shaft, carrying us, clinging to ropes, down with it. The entrance to the mines was something like a well, though not square than round; and, as we sped downward, the feeble light of the torches increased than lessened the darkness; and, flashing fitfully and throwing shadows around me, made it seem as if the ropes stretched us had snapped asunder. I had no idea of the depth, which appeared much greater than it was, from the silence and darkness that surrounded me. I did not know where I might be going to the lowest depths of the mines, and when we stopped in our downward course, I was surprised to learn we were little more than two hundred feet below the surface of the earth. Then our journey began. One of the torches went before, and the other behind us, we walked over a wooden bridge, and down a flight of stairs, and through several passages, all cut out of what appeared to be black, veined with quartz. I asked the men to stop, and, lifting up a torch, saw that what I had taken for quartz was rock salt, and most of the rock was green salt, as called, being largely mixed with clay.

After walking up and down, right and left, up and right, we entered a considerable chamber in the Mammoth Cave. This chamber was hewn out by the workmen. I was amazed, and after they had gotten all the

salt contained in the stratum, they had abandoned it for another field of operations. I noticed in the chamber several crosses, an altar, and a number of images which were made of rock salt, and which looked beautiful while the light of the torches fell upon them.

We went on again, over more bridges, down more flights of steps, through more passages, until we reached what the guides styled the "river." It was just such a river as the Lethe or the Styx in the great Kentucky cave, and we crossed it in just such a boat. The guides, in a few seconds, pushed the boat over with poles, and we got out on another bridge, and began descending one of the longest and worst series of steps I had encountered. At the bottom, we branched off into a crooked passage, at the end of which was still another tiresome and rickety flight of stairs.

One thing which had astonished me was, that we had met so few workmen. We had passed them here and there, using pickaxes and crowbars, but nothing like the number I had expected to find. The reason, as I learned by inquiry, was, that the parts through which we had gone had been mostly worked out, and the laborers had been removed to lower and richer strata. About twenty minutes later, we observed several men making a new passage. They had just begun it, and were lying down on their backs, and striking their picks into the salt overhead. One might believe that the falling particles would have destroyed their sight; and so they would, no doubt, had not the men drawn a kind of coarse hat over their faces, and shut their eyes, while they actively employed their implements. This was the first instance I had observed of men doing work effectively with their eyes shut.

After crossing several more pools or rivers—there are at least twenty of these, formed by the percolations of water through the strata—we entered a very large open space, some four hundred feet broad, and at least a hundred feet high, known as the Chamber of Letow; and, fifteen minutes later, another of still greater dimensions, the Chamber of Michalica. These were fitted up like chapels, having altars, candlesticks, statues, chairs, thrones, and various kinds of ornaments, all cut out of rock salt.

The lamps had a remarkable effect, and the burning of the red and blue lights transformed the chamber into a grotto of diamonds. The spectacle was really splendid. From every part of the walls, with their uneven surfaces, were reflected, again and again, the rays of light, until the place was a blaze of radiance and glory. It was more like a fairy scene than any thing else, and the thought that it was six hundred feet or more underground, amid natural darkness and silence and desolation, added to the wonder of the vision.

The Infernal Lake—a large pool of water some seven hundred feet long, three hundred feet wide, and forty deep—particularly impressed me. I went out upon it in a boat, and burned some of the fireworks, while a number of the workmen arose, the echoes of the dreary place by evoking the echoes of "Gluck Auf," (Welcome, Welcome).

During the remainder of the journey, I saw a great many of the workmen, who were getting out the salt very much as coal is gotten out, with bars and picks. In the lowest regions, where we then were, the salt was much

purger, being sometimes in solid blocks as clear and white as crystal. The laborers were muscular and stalwart fellows, with very little intelligence in their faces generally, and their features, for the most part, were coarse and harsh. They were usually stripped to the waist. Nearly all the workmen, I believe, are Poles, poor and ignorant, of course, who pass their lives in these mines, toiling night and day for barely enough to keep body and soul together. Their pay varies from thirty kreutzers to a florin a day, very few earning the latter amount.

Some five hundred horses are employed in the mines to draw boxes or cars of salt to the entrance shafts, where it is sent to the surface of the earth. When these horses are once brought into the mines, they seldom go out until crippled, or too old for further use.

The salt varies a great deal in quality. The so-called green salt contains six or seven per cent of clay, which destroys the transparency. Another sort, *spisa*, is crystalline, but mixed with sand, while the perfectly pure, *szymbik*, is found in large crystallized masses. The general yield of the mines, I think, about 500,000 tons annually, valued at twenty florins, or ten dollars, per ton, making the revenue \$5,000,000. When the mines were discovered is not known, though it is certain that they have been worked nearly nine centuries. From the twelfth to the latter part of the seventeenth century they belonged to Poland. In 1756 they were ceded to Austria; but, twenty-seven years afterwards, they were recovered by John Sobieski. When the first dismemberment of Poland took place, in 1772, Austria again obtained them, and, an interval of six years excepted, has held them ever since.

I might have passed two or three weeks underground, if I had travelled all the passages and excavations, whose combined length is over three hundred miles. The extent of the mines, from east to west, is about thirty-two hundred yards, and from north to south, fourteen hundred yards.—*Late Paper.*

For "The Friend."

From the Letters and Papers of John Bareilly.

(Continued from page 131.)

"1816.—I see evidently, that 'Jesus Christ came into the world to save sinners,' and that 'unto them that look for him, shall he appear the second time, without sin unto salvation,' 'the wages of sin is death,' and consequently, 'that without repentance there is no remission of sin; that we must be in the way of being redeemed from the power of evil, or the punishment will not be remitted; that we must be delivered from sin itself, before we can be delivered from the wages of it, which is condemnation; for it is aptly expressed, 'There is now no condemnation to them that are in Christ Jesus, who walk not after the flesh, but after the Spirit.' O! then my soul, surely there is required of thee a clean heart, and a right spirit to be renewed within. O! how shall I bestow pains and anxiety about filth in the exterior, whilst there lurks any evil in the interior. How shall I garnish the outside with an appearance of the beauty of holiness, and polish it after the similitude of a temple dedicated to the Lord, when it stinketh within by reason of the defilement there concealed. Surely it was well said by the Lord to those hypocrites the Pharisees, and it equally applies to many in these days as to them:—'Cleanse first that which is within the cup

and platter, that the outside of them may be clean also: and the latter part of this exhortation remains strikingly true,—for I am fully persuaded that all cleansing of the exterior, to be sincere and not hypocritical, must be the effect of a change of heart.

"1816, December 4th.—Is it not beyond a doubt, that the Lord will make known his will to his poor, dependent creatures, who by sighs and tears both day and night seek to serve him aright in all things? Surely He is no hard master, who does not evidently let his servants see what is required of them; nor, I am persuaded, does he at any time call for more arduous service, than he gives strength to accomplish. But then He must and will be sought unto, both in order that his will may be clearly known; and when known, that sufficient strength may be handed to enable to perform the same. All my desire is before the Lord; and he knows, and I believe hears my prayers,—he sees my watchings, and my weepings, and is witness to all my woes. I do indubitably believe, that the present time is very precious to me,—that the hand, the mighty hand of the Lord is upon me for good,—that he is extending his gracious visitation to me his poor sinful creature, who has been bound by the bond of darkness, by the power of the destroyer. O! he is and has been arising for my help, for my deliverance; he has assuredly in some measure, brought me as it were out of the land of Egyptian and cruel bondage; and it appears to me impossible, unless by my own default, that his promises should fail in the midst of the fulfilment of them, and that he should leave me in the wilderness to die in my sins, to be destroyed by famine and want; no, he has a fountain of living waters in store for me; and though I know not whether I may partake of that delicious and reviving consolation, out of the bare and barren rock, or on the fruitful and flowery banks; yet I will rejoice in the Lord, I will joy in the God of my salvation."

"1817, January 27th.—Having food and raiment, let us be therewith content," &c. I have admired the honest simplicity and plain speech which the first Christians, and especially their great Pattern, made use of to instruct their hearers: the reasoning of the apostle in this place is unanswerable, and the process of his thoughts appears to me so natural, as to be not easily misunderstood. The substance of that which he sets forth, is, without any strained exposition, nearly as follows: the gain of riches is by no means godliness, nor can it be a substitute for godliness in the end; on the contrary, godliness is profitable both here and hereafter, and therefore is alone true gain. Wealth and possessions last us only whilst we live: we had them not when we came into the world, and it is certain we can retain them no longer than whilst we are here. Seeing then, that soon, very soon, we must part with these things, let us provide "bags which wax not old," and as to every thing else, the riches, the enjoyments of this vain and passing scene, let us use these things as not abusing them; let us not be slaves to them, but rather render them of service to us. If we are rich, let us not hide our talent in the earth, but be rich in good works; and if we are in a middling condition as to outward circumstances, let us endeavor so to act, as to be able strictly to adopt the apostle's language, "these hands have ministered unto

my necessities, and to them that were with me." Thus we shall be enabled more fully to understand, and more freely to accede to the text, "having food and raiment, let us be therewith content."

(To be continued.)

The Fair at Novgorod.—Far and wide over the plain below extended long lines of booths glittering in the morning sun, horses and wagons rattling ceaselessly to and fro, vast piles of merchandise lying heaped on every side, and a multitude whom no man can number, picturesque in every variety of dress and feature, eddying unrestingly through the countless channels of the timber Archipelago. From the first glimpse of this great gathering one gets little except an overwhelming idea of its size and numbers; for, in truth, it is not so much the influx of a large body of strangers, as the springing up of a new city by sudden enchantment, in the very centre of the old one. In and around this third-rate provincial town, of perhaps 20,000 inhabitants, there are gathered during the six weeks of the great commercial Parliament, nearly half a million of men, or a larger population than that of Moscow; and a mighty aggregate of human faces, from whatever cause assembled, has always a kind of grandeur collectively, no matter how insignificant may be the individual items. But, as you pursue your survey, the great assemblage develops another striking feature, viz: the extraordinary diversity of the elements which compose it. In Moscow, in Kazan, in Nijui itself, you may any day see three or four, or a half a dozen different types; but here all the principal races of Europe and Asia are represented again and again. There are the portly German, the hard-faced Dutchman, the dapper Frenchman, the fresh-colored Swede, the lumpish Czech, with his cracked, toneless voice; the handsome, knavish, dark-eyed Greek, ever on the lookout for a bargain, with all the un-studied grace and intense vitality of his indomitable race betraying itself in every line of his lithe, sinewy frame, the hook-nose Jew, with his sharp suspicious look (taught him by centuries of oppression) in his keen black eyes; the bluff Anglo-Saxon from the banks of the Thames, and the beetle-browed Muscovite from the steppes of the Volga. There, too, appear the spare, high-checked Armenian; and the brown, bullet-headed Tartar; and the squat, shaggy Kirghiz; and the squat, yellow-haired Finn. There side by side, tower the stately Bokharist and the tall, wiry Cossack; and tireless as the wolves of their native deserts. The gipsy visage of the Sarth faces, the sleek, tiger-like beauty of the Circassian; and the sturdy Esthonian from the factories of Narva, jostles the yellow, narrow-eyed Chinese from the slopes of the Altai Mountains. And it is not only the vast variety of races which strikes one, but also the distant out-of-the-way regions from which they have come. One's right hand touches the dress of a man from the extreme east of Asia, one's left shoulder jostles a man from the extreme west of Europe. The whole fair is one vast geographical abridgment, in which the four points of the compass join hands with bewildering suddenness. One feels as if he had traversed the whole globe in a few seconds, and this feeling is enhanced by the aspect which lies strewn on every side; costly furs from the depths of Siberian forests,

chests of tea from swarming Chinese cities, hardware from Birmingham and Sheffield, from the Gironde, and fruit from Danube, soft carpets from Samarcand, and stuffs and silks from Rhodien, around which swarm grimy Tartars and greasy Cossack staring, fingering, criticizing, admiring tableaus such as one might have seen, many a time, in the stormy days when Alaric's Goths and Genseric's Vandals, in the rude trappings of their native barbarism, rife with unspicing hands the bazaars of Imperial Rome. *Shilling Magazine.*

Too much Liberty.—A great concern is often upon the mind of Margaret Ellis, *too much liberty* should creep into the church and thereby mar the beauty of Zion, I cause her excellent name to be a scorn to heathen. O! that her ministers may faithful, lest they give occasion to open eye in many that watch for more liberty, that they may be careful in all things, both word and deed.—*Piety Promoted.*

For "The Friend"

Friends' Select Schools.

The charges for tuition at these Schools the term commencing 1st mo. 29th, 1872, will be as follows:

In the Northern Primary School, (held at the Meeting House on Sixth St.,) twelve dollars per term.

In the Primary School in the Cherry building, twelve dollars per term.

In the Introductory Departments of Boys' and Girls' Schools, eighteen dollars term. In the higher classes of the Boys' Girls' Schools, twenty-four dollars per term. Latin, Greek or French, five dollars extra.

A charge of one dollar per term is made towards defraying the expenses of fuel, &c.

For an additional charge of one dollar the Introductory, and one dollar and fifty cents for the higher classes, the use of all necessary books will be furnished.

Under the authority recently given by the Monthly Meetings to the committee, a deduction will be made of a part, or the whole of the above charges, in the case of any child member of Philadelphia Yearly Meeting, the parents or guardians of whom these charges may be burdensome. These deductions will be charged to the Fund arising from the bequest of William Forrest, deceased.

The attention of Friends residing beyond the limits of the Monthly Meetings is hereby invited to the fact, that the school from sending their children to be educated at the above provisions, by which facilities are now afforded for the education of their children at a low cost.

The Spring Term begins on the Second day following the fourth Fifth day in the 1st month, and closes on the Sixth day following the third First-day in the Sixth month. The Fall Term begins on the first Second-day in the Ninth month.

It is desirable that children should be entered, if possible, at the beginning of the term, and after a child is entered no deduction will be made for absence except with the sanction of the committee.

Further information may be obtained on application to the Treasurer of the committee, James Smedley, No. 415 Market St.

Philadelphia, 1st mo. 9th, 1872.

any of my dear young country women wandering in self-chosen ways, and doing their own wills with a sincerity of purpose which belongs to the *natural heart*, which they will not lose.—*A. Skipton.*

THE FRIEND.

FIRST MONTH 20, 1872.

The Church of Christ is composed of many members, each having a gift or gifts conferred on him or her, to be used for the edification of the body. These, therefore, are not wholly independent one of another, but while each has His proper place and service, laboring according to the measure of Grace received, there is an intimate union subsisting between them, so "that if one member suffer, the members suffer with it, or if one member be honored all the members rejoice with it."

Where a visible church is mainly composed of these living, upright members, it is a compact body, laboring harmoniously for the glory of Truth, and for the spiritual growth and preservation of each other.

Each member of the religious Society of Friends acquainted with the history of its rise, and the manner in which those who first bore its members were called out of the world, and professions of religion, were taught gradually in the school of Christ, and thus enabled to understand the doctrines of his life and the testimonies conforming thereto, were enabled to maintain them before the world, professing, but persecuting generally, we think, fail to see that it was the work, and that He designed to constitute the Society so that it should pre-eminently be to the spirituality, the purity, the activity, and the simplicity of the gospel mission. After having gathered them into a church He showed them the necessity and guided them into the institution of a discipline intended and adapted, in its proper administration, to encourage faithfulness in compliance with religious obligations, to prevent from hurtful things prevailing in the community at large, and to check every thing which was laxity of religious principle in the members, or indulgences incompatible with the requirements of the gospel as Friends had understood them.

This discipline originated in the wisdom of the Head of the church, so it derived its authority from Him, and required that those who were engaged in its support, and in executing the duties connected with its administration, should be clothed with his spirit of unity and love. The outward bond of the Society's union was the unquestioning belief in the doctrines and testimonies which it had received and promulgated to the world, as they were sealed on the understandings of the founders and members by the grace of the Holy Spirit, and which they were convinced were in accordance with the teachings of the Scriptures. The law of their self-presence as a united body of witnesses for Christ in the truth, rendered it necessary there should be a system of church government, clearly expressed rules, not only as "an hedge of preservation against the temptations and dangers to which our members in the world exposes us," but in order

that where members depart from "unity of faith and practice," and cannot be reclaimed, the church should clear its skirts of them, and strive in accordance with established order, to prevent the defection from spreading.

The members of the true church cannot "live unto themselves;" they feel that one being their Master, and they baptised by the same Spirit into the one body, they have a common interest, and are bound to watch over each other for good; to bear each other's burdens, and build one another up in our most holy faith. Hence in the administration of a discipline such as was adopted by the primitive Friends, designed to keep the camp clean and the members stirred up to lead lives consistent with the high profession they made, there was ample room for the exercise of spiritual gifts conferred on the individual members; and in discharging their respective duties, under the government of the Holy Spirit, they "grew up together into Him, in all things, who is the Head even Christ; from whom the whole body fitly joined together and compacted by that which every joint supplieth, according to the effectual working in the measure of every part, maketh increase of the body unto the edifying of itself in love." How beautiful was the structure! how symmetrical in all its parts! and how simple and harmonious in its working as the headship of Christ was duly regarded, and the affairs of the church transacted under the qualification which He alone can impart. Truth was defended and exalted, error was testified against, and the banner which the Lord had given to them that feared him, was kept displayed as over a city set on a hill, that could not be hid.

Speaking of the institution of the discipline by the early Friends, London Yearly Meeting on one occasion says: "The history of these proceedings affords no small evidence that the spirit of a sound mind influenced the body in its earliest periods. Contending as they did for so large a measure of individual spiritual liberty, and placing the authority of men, in religious matters, in a position so subordinate to that of the one Great Head of the church, they nevertheless recognized the importance and necessity of arrangements and of human instrumentality, under the direction of the Spirit of Christ, and they were led to establish a system of order at once so simple and efficient, that notwithstanding the varying circumstances of the Society, and the power of every annual meeting to alter it, it has been found in its main particulars adapted to those changes, and it remains to this day essentially the same as it was within forty years of the rise of the Society."

Alas! how have things changed since that was first written, both as to the mutilation of the discipline, the authority with which it is clothed, and the manner in which its requirements are carried out. But our object is to remind our readers—of what probably they know as well as ourselves—that the discipline had its origin in Divine Wisdom; that alterations or additions to it can be properly made, only under the same divine sanction; that upon its faithful administration, in the Spirit of Him who came to seek and to save that which was lost, depends, in great measure the life and healthfulness of the Society, and that weakness or defection in one part of the Society cannot liberate the members in other parts from the duty of maintaining it and supporting the testimonies of Truth in all

their original integrity. This is the Lord's work and should be done as in his sight, and while engaging in it, each one will do well to lay to heart the following advice contained in the Discipline of Philadelphia Yearly Meeting.

"Dear friends, be patient in the exercise of your gifts and services, and take no offence at any time, because what seems to be clear to you is not presently received by others; let all things in the church be propounded with an awful reverence of Him that is the head and life of it; who said, 'Where two or three are gathered together in my name, there am I in the midst of them.' Therefore, let all bear of their own spirits and keep in a gracious temper, that so they may be fitted for the service of the house of God, whose house we are, if we keep upon the foundation that God hath laid; and such He will build up, and teach how to build up one another in Him. And as every member must feel life in himself, and all from one Head, this life will not hurt itself in any, but be tender of itself in all; for by this one life of the Word, ye were begotten, and by it ye are nourished and made to grow into your several services in the church of God. It is no man's riches, nor greatness in this world; it is no man's eloquence or natural wisdom, that makes him fit for government in the church of Christ: all his endowments must be seasoned with the heavenly salt, his spirit be subjected, and his gifts pass through the fire of God's altar, a sacrifice to his praise and honor, that so self being baptised into death, the gifts may be used in the power of the resurrection of the life of Jesus in him."

SUMMARY OF EVENTS.

FOREIGN.—The British press generally approves the project for laying a new cable from the English coast to that of the United States, and agree that cheaper rates than those of the present lines will be an incentive to the business community and the press of both countries.

An arrangement has been made for the introduction of American cars on English railways.

The captain of the ship *Windsor Castle*, which ran down a vessel in the channel, and was reported to have passed on without heeding the cries of the drowning mariners, has been examined and acquitted of all blame.

The Irish agitation in favor of "home rule" appears to be on the increase. A procession numbering thirty thousand persons, recently marched through the principal streets of Limerick, and finally halted at Daniel O'Connell's monument where a number of speeches were made.

Lord Stanley has addressed a large meeting of workmen at Liverpool. In the course of his remarks he said the old Liberal programme has exhausted its vitality, and he expected that in future the Conservatives would predominate in all new questions.

The small pox continues to spread in all parts of the British Isles. Cardinal Cullen, in a pastoral letter, permits Catholics to use meat on all days of the week. For sanitary reasons, on account of the prevalence of the disease.

An explosion of fire damp in the Oakland colliery, Wales, caused the death of twelve miners.

A special dispatch from Berlin to a London paper, states that the representative of Great Britain has delivered to the Emperor of Germany the arbitration agreement by England and the United States, under the Treaty of Washington, and of the British government relative to the San Juan boundary line.

London, 1st meeting, 22nd U. S. sizes, 1862, 9½; do. of 1867, 9½; ten-forty, 92.

Liverpool.—Uplands cotton, 10½; Orleans, 10½.

A remonstrance signed by eight hundred manufacturers of Paris, has been sent to the Assembly against the passage of any bill increasing the duties on raw cotton and silk. Strong remonstrances are also made from other parts of France.

The journals of Paris reviewing the contributions of

food, clothing and money, received from foreign lands for the suffering inhabitants of Paris since the war, commend the people of the United States for their great liberality, and for the judicious manner in which the aid has been distributed.

It is stated that the Minister of Finance will, in two weeks, pay a fourth half milliard of the German war indemnity.

A committee of the Assembly has reported unanimously in favor of repealing the law sequestrating the property of the Orleans princess. Another committee has reported to the Assembly a bill providing for the release of all Communists now confined in the hulks, who are not known to be guilty of criminal acts. A bill has been introduced providing for the temporary taxation of houses, in order to more speedily pay the war indemnity, and liberate the French territory from occupation by the mantreroes.

The French bishops oppose the compulsory education bill. The committee to which was referred the proposal that the Assembly should return to Paris, reported adversely.

Kindness prevails in several of the French departments. The Assembly committee on army re-organization has agreed to recommend the adoption of a rule that soldiers unable to read and write at the expiration of their term of service, shall remain in the army until they are able to do so.

On the 14th, the President addressed the Assembly on the question of taxes, and alluding to the treaties of 1850 characterised them as fatal to the interests of France, detestable and intolerable.

The Red Republicans are becoming active in Lyons, and the authorities are exercising more than usual vigilance to prevent an outbreak.

Difficulties have arisen in the Spanish Cabinet with regard to the policy to be pursued in Cuba, and the appointment of Marshal Concha as Captain General of that island. The departure of the latter from Cadiz has consequently been deferred.

The note of the Russian Chancellor, Prince Gortschakoff, to the State Minister at St. Peterburg, in relation to the recall of Catacazy, Russian Minister at Washington, in accordance with the request of the American government, has been published in the official newspaper. The Chancellor complains that in some of the correspondence on the part of Secretary Fish, there was neither sufficient respect nor proper recognition to a Russian ambassador performing duties; that he had a right to expect from the government at which he was accredited. He says:

"The letter of Secretary Fish presents serious though vague complaints against M. Catacazy, and thus invites the Imperial Cabinet to judge the conduct of its representative."

"In the opinion of the government of His Majesty the Emperor, M. Catacazy has satisfactorily refuted many of the complaints; on the others, the Imperial Cabinet will deliver its judgment when M. Catacazy has had full liberty to present his case.

The Imperial Chancellor hopes that justice is sufficiently understood in the United States not to expect it before."

Both Houses of the Austrian Reichsrath have adopted, without amendment, the address to the Crown calling for the Imperial Cabinet to judge the conduct of its representative, and the subjects of various portions of the empire, arising from recent infogovernment, and particularly opposing an increase of taxation for military purposes.

A Madrid dispatch of the 17th says: The Ministry have unanimously resolved not to remove Don Valmaseda from his post as Captain General of Cuba. The session of the Cortes will open on the 22d inst.

The Mikado of Japan in a late edict says: "My country is now undergoing a complete change from old to new ideas, which I sincerely desire. Therefore I call upon all the wise and strong minded to appear, and become good guides to the government." The Mikado is sending a commission of some of the nobles of the United States, to be instructed in some seminary of learning at the expense of the government.

UNITED STATES.—Miscellaneous.—The proceedings of Congress have had no special interest during the past week. The Senate has discussed a joint resolution, introduced by Charles Sumner, proposing an amendment which shall limit service as President of the United States to a single term. The House of Representatives, by a vote of 170 to 51, has passed a general amnesty bill, removing all legal and political disabilities from persons engaged in the rebellion—a few individuals excepted.

It has been decided that the next convention of the Republican party for the purpose of nominating candidates for the Presidency and Vice-Presidency, shall be

held in Philadelphia on the first Fourth-day in the Sixth mo. next.

The United States Indian Commission met at Washington on the 11th inst. There were also in attendance, by invitation of the Commission, representatives from the various tribes to whom the restrictions of the war had committed the moral and educational training of the western tribes. The statement presented of the progress made by these societies during the past two or three years, in turning the Indians from their wild and nomadic life, was satisfactory. All the delegates reported the success of the restrictions as doing well, and the Indians as generally satisfied with the results of the change in the policy of the government. The only anxiety expressed by any members present was in regard to the efforts being made in certain quarters to remove some of the tribes from their reservations. The success of the restrictions of the government could only be assured by steadfastly resisting these efforts. Upon this, and the duty of securing lands in severity to the Indians, who were desirous to cultivate the soil, all the delegates present seemed to be agreed.

The interments in Philadelphia last week numbered 518, including 216 deaths from small pox.

Two destructive fires occurred in New York on the 14th, by which large quantities of lumber and merchandise were consumed. Estimated loss \$350,000.

Several difficulties have arisen in New Orleans by contentions between two rival companies for the right. It is divided into two bodies of nearly equal strength; each appeals to the United States government for assistance; but so far it has not been judged expedient to interfere in the quarrel.

It has passed both Houses of the Legislature of Illinois making a radical change in the sale of liquors in this State. It enacts that no intoxicating liquors shall hereafter be sold in Illinois without a license, and that no license shall be issued without the party applying therefor shall give bond in the sum of \$3,000, with two freehold securities, conditioned that he shall pay all taxes; and shall not be injured in person or property by the selling of liquor without a license—the penalty to be recovered in the name of the State for the use of any person injured by the liquor sold by such licensed person.

According to the census report, New Hampshire, with a population of 318,300, had 15,885 persons over the age of seventy—67.52 per cent. of the whole number. Of this aggregate more than seven thousand were between the ages of seventy and seventy-five; nearly five thousand were over seventy-five and under eighty; seven hundred octogenarians, and three hundred ninety-nine ninety and ninety-five. Ten were ninety-eight years old; four were ninety-nine, and six had passed the age of a century.

A majority of the judges of the United States Supreme Court have announced their decision affirming the constitutionality of the Legal Tender Act, and reversing the former judgment of the same tribunal. The Chief Justice, one third of the Associate Justices dissent from the opinion of the majority, and adhere to the views expressed in the first decision.

The Markets, &c.—The following were the quotations on the 15th inst. New York.—American gold, 108 1/2 U. S. stakes, 1881, 115 1/4; ditto, 1858, 112; ditto, 10, 40—U. S. bonds, 100s, 80; Superior flour, \$3.80; flour brands, \$5.25 to \$10.85. White Genesee wheat, \$1.70; amber, \$1.60 to \$1.66; No. 2 Milwaukee spring, \$1.57; Oats, 54 1/2 a 57 1/2 cts. Western mixed corn, 74 a 75 cts; yellow, 75 cts. Philadelphia.—Middlings cotton, 22 1/2 a 23 cts. for uplands and New Orleans. Superfine flour, \$3.25 a \$3.75; extra, 80 a 85 cts. Flour brands, \$6.50 a \$9.50. Red wheat, \$1.62 a \$1.64; amber, \$1.67; Illinois spring, \$1.55. Rye, 88 a 90 cts. Yellow corn, 66 a 67 cts; western mixed, 69 a 70 cts. Oats, 52 a 55 cts. Clover-seed, 10 a 10 1/2 cts. Timothy, \$3.25 a \$3.50 per bushel. Beef cattle sold at the Avenue Drove-yard, on the 13th inst., per lb. gross for extra; 67 a 7 cts. for fair and 4 a 6 cts. per lb. gross for common. Sales of about 1500 head. Sheep sold at 57 1/4 cts. per net. Pigs, and hogs at \$7 a \$7.12 per 100 lb. net. Baltimore.—Pennsylvania red wheat, \$1.56 a \$1.62. White corn, 62 a 67 cts; yellow, 64 a 68 cts. Oats, 52 a 56 cts. Clover-seed, No. 2 spring wheat, \$1.24. No. 2 barley corn, 41 cts. No. 2 oats, 32 1/2 cts. No. 2 mixed, 61 1/2 cts. St. Louis.—No. 2 spring wheat, \$1.31; No. 2 winter wheat, \$1.55. Corn, 41 cts. Oats, 41 cts. Lard, 81 cts. Cincinnati.—Family and extra flour, 76.65 a 78.80. Wheat, \$1.50 a \$1.53. Corn, 48 a 49 cts. Oats, 42 cts. Cleveland.—No. 1 winter red wheat, \$1.48. Corn, 54 cts. Oats, 45 cts.

WANTED

A Friend to take charge of the Primary Department of the Adelphi School for Colored Children, on W. St. below 13th St. Apply to

Caleb Wood, 524 South Second St.
Joseph W. Lippincott, 413 Walnut
Jonathan Evans, 143 West Seventh

SITUATION WANTED.

A young Friend from Massachusetts, desires a situation in a Friends' School or private family, as Tutor. For further information apply to E. M. Huntin, 245 North Third street.

FRIENDS' BOOK STORE.

There have been recently reprinted editions of a following works, which are now for sale at No. Arch Street.

Examples of Church Piety.

Barley on Church Government.

Usner's Letters.

Memors of Edwin Price.

True Christian Baptism and Communion.

Concise Account of Friends, by T. Evans.

Journal of William Evans, 2d edition.

These works also on hand a supply of other approved writings of Friends.

FRIENDS' BOARDING SCHOOL FOR INFANTS, TUNESSA, NEW YORK.

A suitable Friend and his wife are wanted to charge of this Institution, and manage the Farm attached with it. Application may be made to

Ebenezer Worth, Marshallton, Chester Co.
Thomas Wistar, Fox Chase, P. O., Philad.
Samuel Myers, Olney P. O., do.
Joseph Scattergood, 418 Spruce Street, do.

FRIENDS' ASYLUM FOR THE INSANE, Near Frankford, (Twenty-third Ward,) Philadelphia. Physician and Superintendent—JOSHUA H. WINGTON, M. D.

Applications for the Admission of Patients are made to the Superintendent, or to any of the Board Managers.

MARRIED, Twelfth month 21st, 1871, at Fr Meeting-house, Easton, N. J., WILLIAM HENRY of Joshua Wilkins, to ESTHER A., daughter of Engle, all of the above place.

DIED, on the first day of the Ninth mo. 1871, M. daughter of Micojah and Delitha Emmons, at the residence in Tama county, Iowa, in the 17th year of age, a member of Springville Monthly Meeting, Co. Iowa. She bore a protracted illness with painful resignation, frequently saying that if she could be prepared for the solemn change, it was all aspired. As the disease progressed, her hopes and aspects of acceptance and of eternal happiness seemed brighter, and her love to increase and abound to all. On the day before her departure, she to an affectionate leave of the family and all present, and declared to her friends that she was ready to bid adieu to this world, and to enter her heavenly abode, and it mattered not how soon, if they only prepared, earnestly desiring them to endeavor to be prepared to meet her in Heaven. A short time before the close she raised her hands saying, "Thou place prepared for me amongst the holy angels, I feel secure of this, and I feel for me." Soon afterwards she expired, and her body was peacefully placed in her home to rest." Then quietly, and peacefully, away.

On the second of Eleventh mo 1871, at the residence, near Pennsville, Morgan Co., Ohio, SARAH, in the 65th year of her age, a member of Pennsville Monthly and Particular Meeting, was enabled to bear a protracted illness, accompanied by bodily suffering, with patience and a good degree of resignation, and increasingly so for some weeks previous to his dissolution; several times expressing herself to that effect, "I feel calm and peaceful man, which he passed away in a comfortable hope, reposed upon the minds of his beloved relatives and friends that his end was peace.

On the 31st of Twelfth month, 1871, at the residence of her son-in-law, N. D.ripp, near Scrips Cayuga Co., N. Y., SARAH TRIPP, widow of Charles Gilford, in the 87th year of her age, long deceased minister and a firm supporter of the doctrines, principles and testimonies of Friends.

WILLIAM H. PILE, PRINTER,
No. 422 Arch Street.

THE FRIEND.

A RELIGIOUS AND LITERARY JOURNAL.

OL. XLV.

SEVENTH-DAY, FIRST MONTH 27, 1872.

NO. 23.

PUBLISHED WEEKLY.

Two Dollars per annum, if paid in advance. Two Dollars and fifty cents, if not paid in advance.

Subscriptions and Payments received by

JOHN S. STOKES,

NO. 116 NORTH FOURTH STREET, UP STAIRS,
PHILADELPHIA.

When paid quarterly in advance, five cents.

To take from the last number of the "Friend," the following communication which is quite as applicable to the course pursued by a large portion of the members of the Society in this country as it is to the members in Great Britain. For members among Friends, especially those occupying positions which, at one time, would have implied their well-grounded settlement in the doctrines and testimonies of the gospel as held by the Society, to decide to keep them out of the way as being sectarian, and not needful to be promulgated or publicly upheld, shows a lack of religious understanding and sincerity; and wherever it may please shallow professors, existing in the minds of the truly religious of the societies doubts of thorough integrity, and often feelings of contempt. We have not often among us whose "charity" towards other professors is so great, that they can overlook the distinctive doctrines and testimonies of Friends, and yet claim all the privileges of membership in the Society, and a right to their course in laying it waste, and at the same time make no little profession of regard for religious services.

OUR TITLE TO CHURCH EXISTENCE.

The critique upon the Society of Friends, by George Dawson, given at page 290 of the number of *The Friend*, is too pointed and able to receive a mere passing glance. In some degree a caricature, it has nevertheless a solid basis of truth; and this truth ought to aim the serious thought of our members. W. D. remarks: "Quakerism, it has been said, has made its fortune and retired. It has long since say touching its own peculiar doctrines." For met with but one Quaker who tried to convert me. It busies itself in little outside anthropologies; it will do anything to set a man free. But the Quakers have forgotten the faith of their fathers; they run other creeds,—there is nothing attractive in them,—they cannot keep their own,—their day is done; they had better say, and say, "Lord, now lettest thou thy servant depart in peace; our sect has done its little work it could."

There is not too much ground for all this; not a fact that multitudes within our ranks conscientiously suppress or keep out of these points of Quakerism which they

call 'our peculiar doctrines'? Is it not true that many say, 'Let these things in which we differ from other Christians be kept as much in the background as possible? Let us uphold those great fundamental truths, upon which all real Christianity must stand, and put the peculiar doctrines of our sect—the "secondary points"—aside, or only bring them prominently forward when fellow-Christians make inquiry respecting them.' Do not some even think that it is a matter of regret that all Christian sects do not cast aside their 'peculiar doctrines,' as so many hindrances to the spread of plain practical Christianity? Do they not urge that each Christian community should surrender its peculiar views to the supposed common weal?

"There is something very fascinating and very specious in such a thought; but it is not solid—it will not bear close scrutiny? Do the diversities, which such persons so deprecate, arise from the mere love of diversity? Do the Episcopalians, or the Independents, or the Methodists, or the Baptists, originate their 'peculiar doctrines' because they desire to be different from other churches? Undoubtedly not! Each differs because it believes that it is the expositor of a truer and more scriptural Christianity than other sects. It believes that its views are nearer the views of the Apostolic Church, and more in accordance with the teaching of the New Testament, than those of other sects; and, as such, that its doctrines and practices are the most worthy of acceptance, and the most likely to help the immortal interests of mankind. Admitting that no Christian Church can either thrive or stand that is not based upon those great fundamental doctrines which alone give vitality to the name of 'Christian'—admitting that the holding of those fundamental doctrines must ever constitute the foundation platform upon which all Christian Churches must build—and admitting, also, that any 'peculiar doctrines,' or 'distinguishing views,' without that underlying foundation, would be as worthless chaff—it remains, nevertheless, a fact that our title to self-existence as a separate religious community depends upon these 'peculiar doctrines,'—these 'secondary things,'—these 'non-essentials,'—and upon these alone!—I can well believe that many will be startled at these words; but such will do well to deeply ponder them. What do the terms 'non-essential' and 'secondary' mean? They surely mean non-essential to salvation! They mean that a man may be a Christian without holding our views on War, on the Sacraments, on Oaths, on the Spirituality of the Gospel Dispensation, and on the immediate teaching of the Holy Spirit! But do they not also imply that we can do justice to the Society to which we belong, and to ourselves as members of that Society, without bringing these peculiar doctrines prominently forward; that it is a matter of discretion and choice as to whether, in these things, we do, or do not, show our special colors?

"But we have no right either to separate ourselves from other religious communities, or to remain separate from them, as a distinct body, if we only consider it our great duty to press forward those essential and primary doctrines which other Christian communities hold like ourselves. If what we call 'essential' be identical with what they call 'essential'—i. e. if fitness for membership with us be only what they also regard as 'fitness'—we have no right either to set up, or remain a separate community for an hour!

"We should be schismatics of the worst class! We should be separating ourselves when we know that we agree! If we have nothing stronger to separate ourselves from others upon, than those cardinal points of Christian faith which they hold as truly as ourselves, and which we know that they hold, what authority have we for our existence as a separate body? None whatever! We must either stand, as a Church, upon our 'peculiar doctrines,' or fall!—fall under the just sentence of sowing discord among brethren!

"The fact is that we do stand as a separate Church upon our peculiar and non-essential doctrines. It is precisely these doctrines which give us our title to self-existence as a separate Church. For although these 'secondary' matters are not essential to salvation, they are essential to our right to separate Church existence! And the moment that we conceal or ignore these secondary things, that moment we reject our title, and ignore our authority and right to be what we are! Once let a Society lose sight of its responsibility in regard to the points of truth which it was specially raised up to proclaim and uphold, and exactly what George Dawson so dexterously and satirically throws at us must follow. If the Society of Friends fails to uphold its doctrine of the Spirituality of the Gospel Dispensation (and that doctrine includes its testimony against what are called 'the Sacraments,'—nothing but weakness and confusion will follow. We cannot escape by saying, 'We will tell people if they ask us.' No Society will thrive which thus 'puts its light under a bushel'! We are pre-eminently responsible for the clear upholding of those special points of doctrine which have been given to us, as a people, to display to the world.

"To put these aside, and to act as though it were of little matter whether our views on these points were known or not, is merely to say in effect that we are not convinced of our 'own principles.' And it is true, and ever will be, that they who are not convinced of what they profess, and who act as though they doubted their own creed, will fail to attract; will cease to make head-way; and will, sooner or later, exist in little but name.

"On the other hand, whatever society really believes in its 'peculiar doctrines'; and, in the earnestness of its deep conviction, presses those doctrines forward 'in season and out of season'—be they true, or be they

false—will gain converts; not mere adherents from selfish or secondary motives, but thoroughgoing disciples, who acts testify to the solidity of their faith. Mohammedanism and even Mormonism prove the same. Let us look, therefore, to ourselves, and beware how we hide our special light for fear it may not be exactly like the light of others! They will respect us more and not less for faithfully upholding it. And as surely as our light is a ray from heaven, so surely will its fearless manifestation before others be instrumental in helping them onward, and in advancing the great cause of Truth and Righteousness in the earth. How solemn is our responsibility, at the present time, with regard to ceremonialism, even in its simplest forms. If we see that multitudes are running into an opposite error, and, in their contempt for religious ordinances and priestcraft, are lurching into materialism, and denying the Lord that bought them, how can we stand acquitted, if, by smothering our protest against external rites, we give them a handle against us, and any ground to say, 'You who are drifting back towards the beggarly elements, or falling to speak out boldly against them, are alike unfit and unable to give advice to us. Tolerate these things amongst you, as "secondary matters in which liberty may be used," if you like; but if so, do not come to teach us!'

"Let us not shrink from these considerations, but seek for wisdom and strength from above; not only that our foundation may stand immutable upon the Rock of Ages, but that we may escape from error in superstructure both on the right hand and on the left, and be enabled faithfully to exalt that Christian Standard which has been committed to us as a people.

JAMES BACKHOUSE.

York, Twelfth month, 1871."

Central Arabia.

(Continued from page 176.)

On passing the threshold it is proper to say, "Bismillah," *i. e.*, "in the name of God;" not to do so would be looked on as a bad angry alike for him who enters and for those within. The visitor next advances in silence, till on coming about half-way across the room, he gives to all present, the customary "Peace be on you." All this while every one else in the room has kept his place, motionless and without saying a word. But on receiving the salaam of etiquette, the master of the house rises, and replies, "And on you be peace, and the mercy of God, and his blessings." All present follow the example thus given, by rising and saluting. "The guest then goes up to the master of the house, who has also made a step or two forwards, and places his open hand in the palm of his host's, but without grasping or shaking, which would hardly pass for decorous, and at the same time each repeats once more his greeting, followed by the set phrases of polite enquiry, "How are you?" "How goes the world with you?" and so forth, all in a tone of great interest, and to be gone over three or four times, till one or other has the discretion to say 'Praise be to God,' or, in equivalent value, 'all right,' and this is a signal for a seasonable diversion to the ceremonious interrogatory.

"The guest then, after a little contest of courtesy, takes his seat in the honored post

by the fireplace, after an apologetical salutation to the black slave on the one side, and to his nearest neighbor on the other. The best cushions and newest-looking carpets have been of course prepared for his honored weight. Shoes or sandals, for in truth the latter alone are used in Arabia, are slipped off on the sand just before reaching the carpet, and there they remain on the floor close by. But the riding stick or wand, the inseparable companion of every true Arab, whether Bedouin or townsman, rich or poor, gentle or simple, is to be retained in the hand, and will serve for playing with during the pauses of conversation, like the fan of our great-grandmothers in their days of conquest.

"Without delay Soweylim begins his preparations for coffee. These open by about five minutes of blowing with the bellows and arranging the charcoal till a sufficient heat has been produced. Next he places the largest of the coffee-pots, a huge machine, and about two-thirds full of clear water, close by the edge of the glowing coal-pit, that its contents may become gradually warm while other operations are in progress. He then takes a dirty knotted rag out of a niche in the wall close by, and having untied it, empties out of it three or four handfuls of unroasted coffee, which he places on a little trencher of platted grass, and picks carefully out any blackened grains, or other non-homologous substances, commonly to be found intermixed with the berries when purchased in gross; then, after much cleansing and shaking, he pours the grain so cleansed into a large open iron kalle, and places it over the mouth of the funnel, at the same time blowing the bellows and stirring the grains gently round and round till they crackle, rattle, and smoke a little, but carefully withdrawing them from the heat long before they turn black or charred, after the erroneous fashion of Turkey and Europe; after which he puts them to cool a moment on the grass platter. He then sets the warm water in the large coffee-pot over the fire aperture, that it may be ready boiling at the right moment, and draws in close beside his legs a large stone mortar, with a narrow pit in the middle, just enough to admit the black stone pestle of a foot long and an inch and a half thick, which he now takes in hand. Next, pouring the half-roasted berries into the mortar, he proceeds to pound them, striking right into the narrow hollow with wonderful dexterity, nor ever missing his blow till the beans are smashed, but not reduced into powder. He then scoops them out, now reduced to a sort of coarse reddish grit, very unlike the fine charcoal dust which passes in some countries for coffee, and out of which every particle of real aroma has long since been burnt or ground. After all these operations, each performed with as intense a seriousness and deliberate nicety as if the welfare of the entire Djowf depended on it, he takes a smaller coffee-pot in hand, fills it more than half with hot water from the larger vessel, and then shaking the pounded coffee into it, sets it on the fire to boil, occasionally stirring it with a small stick as the water rises to check the ebullition and prevent overflowing. Nor is the boiling stage to be long or vehement; on the contrary, it is and should be as light as possible. In the interim he takes out of another rag-knot a few aromatic seeds called hey, an Indian product, but of whose scientific name I regret to be wholly ignorant,

or a little saffron, and after slightly pounding these ingredients, throws them into the simmering coffee to improve its flavor, for an additional spicing is held indispensable in Arabia, though often omitted elsewhere in the East. Sugar would be a totally unbecoming profanation. Last of all, he strains off the liquor through some fibres of the inner park bled placed for that purpose in the jug-spout and gets ready the tray of "delicate par colored grass, and the small coffee cups ready for pouring out. All these preliminaries he takes up a good half-hour.

"But before a quarter of an hour has passed and while blacky is still roasting or pouncing his coffee, a tall thin lad, G'hâli's eldest son appears, charged with a large circular disc of grass-platted like the rest, and throws it with a graceful jerk on the sandy floor close before us. He then produces a large wooden bowl full of dates, bearing in the midst of the bowl a cup full of melted butter; all this he places on the circular mat, and says, 'Semmo, literally, 'pronounce the Name,' of God, and stand; this means, 'set to work at it.' Here the master of the house quits his place by the fireside and seats himself on the sand opposite to us; we draw nearer to the dish, and for five or six others, after some respectful obeisance into the circle. Every one then picks out a date or two from the juicy half-amalgamated mass, dips them into the butter, and thus goes on eating till he has had enough, when rises and washes his hands.

"By this time the coffee is ready, a Soweylim begins his round, the coffee-pot one hand, the tray and cups on the other. The first pouring out he must in etiquette drink himself, by way of a practical assurance that there is no 'death in the pot,' the guests are next served, beginning with those nearest the honorable fire side; the master of the house receives his cup last of all. To refuse would be a positive and unpardonable insult but one has not much to swallow at a tir for the coffee-cups, or finjans, are about the size of a large egg-shell at most, and are never more than half-filled. This is considered essential to good breeding, and a brim would here imply exactly the reverse of what it does in Europe. The beverage itself is a singularly aromatic and refreshing, a real treat and very different from the black mud sold by the Levantine, or the watery roast-bee preparations of France. When the slave-treeman, according to circumstances, presses you with a cup, he never fails to accompany it with a 'Semm,' 'say the name of God,' 'must you take it without answering?' 'milla.'

"When all have been thus served, a second round is poured out, but in inverse order, the host this time drinks first, and the guests last. On special occasions, a first receipt, for instance, the ruddy liquor is a third time handed round; nay, a fourth cup is sometimes added. But all these put together do not come up to one-fourth of what a European imbibes in a single draught at breakfast."

(To be continued.)

A person who retires from the semblance of truth in search of the substance, will not only appear singular and contracted to others who are not in the same way, but be really circumscribed in his own apprehension of things.

Memoirs of Mildred Ratcliff.

For "The Friend."

(Continued from page 171.)

M. R. to Sarah Morris, of Philadelphia.

"Short Creek, 1st mo. 28th, 1825.

My very dear friend,—I am thankful once to feel so much strength as to conclude I'll do at least to try to return an answer by my last very precious letter of the Tenth (th).

Truly I may say your kindness, long condescended, has many a time tended to humble spirit in the dust, from whence did arise thanksgivings unto God, even the one who put it into your hearts thus to remember a little sister in the flowings of sympathy, notwithstanding the many miles which separate us. Ah! doubtless He will be your reward. Sometimes in the strength of love, I am ready to say, Yes, so will it be to the fourth generation. May I not say I know I'll be so, if these generations—the dear children coming after we are gone—are found to be of those who love the Lord and obey his commandments. With thee, my beloved Sarah, I have often had to remember my declaration, "They that feared the Lord shall often one to another." Yea, the same description of people through different ages, shall often one to another; and may we not conclude, that if this act of duty was in the charge of the world not only right but beneficial, it is, it must be so to us in these days of resolution. We seem to hear on the right and on the left, many voices crying, Lo, is the way! and again, Lo, it is that! But I knowest, my dear, these things need to move us off that foundation which God hath laid for our dear Son Jesus Christ, has laid us to build upon. Ah with gratitude, freshening to the Father of all our sure mercies break it, there are a few, a very precious number that have known, that do know, 'This is eternal to know thee, the only true God, in Jesus Christ whom thou hast sent.' To me everywhere this language will apply. Sing unto the Lord, O ye saints of his, and ye thank at the remembrance of his holiness. For his anger endureth but for a moment. In his favor is life. Weeping may endure for a night, but joy cometh in the morning. Ah! were it not so, who would be able to stand in these days? Who would at times be refreshed, and realize the promise, 'All things work together for good to those who love and fear God.' May we love Him more, and serve Him better to the last moment of time, saith my soul. It did my heart to find you continue daily that truly Christian practice of reading the precious scriptures. May the arms of your hands grow larger and stronger, and your branches run forth the wall forever.

Some time ago, feeling at least for the present released from a concern I have long had to go to the South, my mind was so drawn towards you at your Yearly Meeting; and so far as Rhode Island, that I began to think it possible for me once more to be with you under your roof. I thought so much of my dear Friends that way, that I did not know how to get better to do with it, than to give it to the hands of our Monthly Meeting. They did appear to slight it, and so far united with me to appoint a committee to bring forward the matter to be discussed. Yet a full willingness among us to support it, I thought, yes, I felt was

wanting. I sank under it, and desired the committee to withhold it: so no certificate was handed in. I thought it might not be amiss to let thee know a little how it had fared with me; not that I wish to burden thee with my complaints; nor would I have thee apprehend I view myself as dealt with in an unfriendly manner. No! It appears my dear friends here were in some degree frightened at the idea of my going out into the field, and especially into that part of the vineyard where wars and rumors of wars seem to abound. Indeed I think nothing but the desire to be found faithful in the sight of my beloved, Christ Jesus the Lord, in whom my humble confidence stands, would have made me willing at such a time as this, ever to lay before the meeting any religious concern. However in this my poor mind is staid in a good degree of quiet. I know the blessed Master is good, and yet knows whether it be all our living, or only a part we cast into his treasury. I think I can appeal to Him, at least sometimes, even as Peter did, for the attachment and integrity of my soul. Yet oh, my dear sister, how often, very often, I seem to be sinking fast. Pray for me, I entreat thee! Pray that my faith fail not. My health of body and mind are often such that I seem to myself just gone; can neither write nor do anything else that is good. My paper is full. My heart is also full, even full of precious love, I was going to say, to the blessed Master, and his people everywhere; in which I conclude to thee and all thine, with enquiring friends; and sweetly bid farewell,

MILDRED RATCLIFF."

Mildred Ratcliff, in the Fourth month of 1826, having obtained the requisite credentials, left her home for a religious visit to the West and South. There being in her account of this journey but little more than a relation of the meetings she attended, and the friendly greetings received among those with whom her lot was cast, it is thought best to omit it in these memoirs. She thus concludes her journal thereof: "12th mo. 1st, 1826. Got home, and found things as well as I could expect. For all these mercies, O righteous Father, I do desire to return the tribute of thanksgiving and praise."

Jane Bettle to Mildred Ratcliff.

"Philadelphia, 4th mo. 3d, 1827.

"My dearly beloved friend,—Think not that my long delay in answering thy affectionate letters, has been occasioned by any diminution of interest in thee or love for thee. No! it has not in the least degree. A continuation of circumstances at the time of receiving them, rendered a reply then difficult; and since that period I have found a procrastinating spirit stealing upon time. Perhaps, my dear, thou may sometimes feel a little of that in which I most abound—a want of qualification to offer anything in this way to my friends.

"I rejoice to hear of thy liberation to perform a religious visit to Friends of Indiana. May the Lord bless his own work in the hands of His faithful servants, in whatever part of his vineyard they may be employed. Surely, my dear friend, the harvest is great, and the faithful laborers few, in the present day as

* She no doubt alludes to the difficulties then existing hereaway, that culminated in the separation of 1827.

well as in that spoken of in the Holy Scriptures. I think it sometimes needful for the Christian traveller, who may feel as though he had been toiling; and in moments of deep discouragement may be ready to say, 'I have caught nothing.' 'I see nothing I have ever done for the good cause.' 'Nothing that will afford me sustenance in this season of extreme poverty, and suspension of all good.' Ah, my dear friend, who among us does not know what it is, at seasons, to dwell in a barren state in which we are ready to say, Here is neither dew nor rain, nor fields of offering! I do not know, my beloved friend, why I should thus write to thee; but so it has arisen in my heart to address thee. Whether our poverty and suffering be on our own account, or on account of others, may we diligently and perseveringly labor after faith, patience, and hope, that blessed anchor to the soul, which ever will prove a sure and safe stay to all those who keep their hold thereon.

"4th mo. 23d. Thou wilt perceive by the dates that I commenced this before our Yearly Meeting. I take my pen now to add a little, that I may forward it by our friend J. C. and wife, from Miami Quarterly Meeting; who, after visiting our friends in New York State, have attended our late Yearly Meeting. I expect thou wilt see them on their return homeward.

"Our Yearly Meeting was large, and throughout the different sittings thereof, has been through mercy and condescending goodness, owned by the Great Head of the church. He still continues near his own precious seed through all their varied conflicts and sufferings, persecutions and trials. The greatest of all trials are those we experience among false brethren. We have had the company of our beloved friends Elizabeth Robson, and George and Ann Jones, from England, our worthy Henry Hull, from New York Yearly Meeting, with others from different quarters. I have no doubt but that we had the sympathy of the spirits of some of you, our dear Ohio Friends, during the past week, who feel as one of our bone. Yea, ye are nearer to us than outward kindred, who do not unite with us in reverent acknowledgment of that grace which comes by Jesus Christ our Lord and Saviour. Great remains to be the mystery of godliness to all who are willing to bow to his power. There has been great boldness in some among us of late, in declaring publicly anti-Christian doctrines. Yet, I believe we may thankfully acknowledge their power in our religious Society is evidently lessening.

"E. Robson, thou mayst have heard, is visiting the families in our district. In about ten days she hopes to conclude. George and Ann Jones have paid a visit to the Friends of the Western district, accompanied by Mary Wistar and Ellis Yarnall. Elizabeth is accompanied by Ruth Ely, with Caleb [probably Pierce] and Thomas Stewardson in turn. They expect to attend New York Yearly Meeting; after which G. and A. Jones are going eastward; Catharine W. Morris and William F. Miller, of Salem, New Jersey, expecting to accompany them. Elizabeth Robson has not yet found her bonds broken. She must remain yet longer in America. * * *

Thy friend, JANE BETTLE."

(To be continued.)

Opinions connected with our hopes of happiness cannot be too closely examined.

The Albatross is the monarch of the high seas; the picture of a hero, who, under every storm of adverse fortune, preserves the immovable constancy of an undaunted hero. Proud and majestic he swims along in his own native element, and without ever touching the water with his pinions, rises with the rising billow, and falls with the falling wave. It is truly wonderful how he bids defiance to the fury of the unshackled elements, and how quietly he faces the gale. "He seems quite at home," say the sailors; and indeed this expression is perfectly characteristic of his oceanic ease as he hovers over the agitated ocean.

The albatross exceeds the swan in size, attains a weight of from 12 lbs. to 28 lbs., and extends his wings from ten to thirteen feet. His plumage is white and black, harmonizing with the wave crest and the storm cloud. For weeks and months together he is seen to follow the course of a ship; but, according to Mr. Harvey, "the time he can remain on the wing seems to have been much exaggerated, for although, like the gull and the petrel, he is no diving-bird, he swims with the greatest ease; and notwithstanding the enormous length of his pinions, knows well how to rise again into the air. He is indeed unable to take wing from a narrow deck, but when he wishes to rise from the sea, he runs along flapping the waters until he has acquired the necessary impetus, or meets with a wave of sufficient height, from whose lofty crest he starts as from a rocky pinnacle, and resumes his extensive flight over an immense expanse of ocean." A short winged species frequents the waters of Kamshatka and Japan; but the wandering albatross (*D. exulans*) belongs more particularly to the southern hemisphere, being rarely seen to the north of 30° S. lat. and appearing more frequently as the higher latitudes are approached. The region of storms—the Cape of Good Hope and Cape Horn—are his favorite resorts, and all travellers know that the southern point of Africa is not far distant as soon as the albatrosses show themselves in larger numbers. These birds are the vultures of the ocean; their crooked sharp-edged beak is better adapted to lacerate a lifeless prey, than to seize upon the rapid fish as it darts swiftly along below the surface of the waters. From a vast distance they discover the floating carcass of a whale, and soon alight in considerable numbers upon it. They also feed upon the large cephalopods that inhabit mid-ocean, and remains of those molluscs are generally found in their stomach. The Auckland and Campbell islands seem to be two of their favorite breeding-stations. When Sir James Ross visited these secluded groups, the birds were so assiduously breeding as to allow themselves to be taken with the hand. The nest is built of sand mixed with dried leaves and grasses, generally eighteen inches high, with a diameter of twenty-seven inches at the surface, and of six feet at the base.—*Harbidge*.

The Excellence of the Bible.—Sir William Jones, whose writings on oriental subjects elucidated many obscure points in Scripture history, was a general scholar, and embellished and adorned every subject that passed under his pen. On the blank leaf of his Bible the following remarks were found written: "I have regularly and attentively perused these Holy Scriptures, and am of opinion that

this volume, independently of its Divine origin, contains more true sublimity, more exquisite beauty, more pure morality, more important history, and finer strains of poetry and eloquence, than can be collected from all other books, in whatever age or language they may have been written."

THE HUMBLE HEART.

Selected.

Thy home is with the humble, Lord!
The simplest are the best;
Thy lodging is in child-like hearts;
Thou makest there thy rest.

Dear Comforter! Eternal Love!
If thou wilt stay with me,
Of lowly thoughts and simple ways
I'll build a house for thee.

Who made this beating heart of mine
But thou, my heavenly Guest?
Let no one have it, then, but thee,
And let it be thy rest.

BE PATIENT.

Selected.

Be patient! oh be patient! Put your ear against the earth;
Listen there how noiselessly the germ of the seed has birth—
How noiselessly and gently it upheaves its little way,
Till its parts the scarcely broken ground and the blade stands up in the day.

Be patient! oh, be patient! go and watch the wheat ears grow
So imperceptibly that ye can mark nor change nor thro—
Day after day, day after day, till the ear is fully grown,
And then again, day after day, till the ripened field is brown.

—Trench.

For "The Friend." From the Letters and Papers of John Barclay.

(Continued from page 174.)

To L. A. B.

"Clapham, January 29th, 1817.

"Dear Sister,—I am inclined to believe that we are somewhat similarly situated in a spiritual point of view, and therefore that a few lines from one who desires to accompany you [thee] hand in hand through this painful pilgrimage, may not be unacceptable. On reading to you the very reviving and refreshing Psalm which occurred to me yesterday, I was ready to think that we could hardly take with us too much courage on our perilous journey through life. Some may look forward at the commencement of their course, with no other feelings than those of cool complacency and comfort, as if our life whilst here was somewhat like a summer's day; others may view this state of being as a vivid and glittering scene of continued enjoyment, and like the gay and giddy butterfly, no sooner are they in existence than their sport begins. But O! the longer I am permitted to remain here, the truth of that view of life which the Scriptures present, appears more and more evident. Is it not there said to be a state of trial and of trouble? 'Man is born unto trouble as the sparks fly upward.' When I look as far before me, as my imperfect and short-sighted senses will enable me, I see mountains of opposition and difficulty, wastes of desolation and desertion, floods of affliction, and rivers of bitterness to wade through and to pass over,—the heavens above appearing black, and the horizon beyond veiled in obscurity. Whatever you, or I, or any, may think or say, be assured, that the Christian's path through this state of being to a better,

is no other than that which it has always been, and will ever be; as it is said, 'We must through much tribulation enter into the kingdom.' Oh! the path for you and me, as we are for all, is not such as the flesh could wish it is indeed a narrow path, too narrow for us to sense a walk in; there is in it but joy and that is all; it is not wide enough for us to pass pleasantly along with singing and with mirth; but may rather be compared to those narrow defiles between the snow-topped Alps, through which the traveller directed to pass quickly, without trudging, without delay, and in silence, lest the huge mass above him, or the parts on which he stands should in a moment consign him to destruction. If this be true, then, how very much occasion is there for us both to lay aside every weight, everything that is likely to entangle or ensnare, or to impede, in the race that set before us. Is it not the case that we are less disposed to remember our provident escapes, and the many mercies that have been granted, than to murmur at the scantiness of our fare, or the bareness of our shelter. Does then appear to me especially necessary, that we should take with us all the strength and encouragement afforded. And where this to be found, but as it were in the bosom of perfection, in Him who alone is the true source of every good, and the resource in every evil. Let us consider what is said of Him in Scripture, that not one sparrow is his vast creation escapes the protecting hand and the observing eye of its Maker. We have indeed a Parent, who is nothing but love, who created us out of the purest love, who preserves our natural lives every moment, who love alone gave us immortal souls fitted for immortal joys, and through his Son opens a way, by which all might enter into the possession of eternal life and glory; and it is expressly said, 'no good thing will God withhold from them that walk uprightly.' So that there is help, and hope, and happiness for a whatever may be their condition or situation excepting only such as willfully persist in refusing or abusing extended and continued mercy. J. B."

The above allusion by John Barclay to the circumscribed path, in which all, as strange and pilgrims in an uncongenial clime, are called to walk, is very accordant with the aphorism of our blessed Lord and Lawgiver "Straight is the gate and narrow is the way which leadeth unto life, and few there be that find it."

Can there be a doubt that it is the call for submission and obedience of the heart; the transforming power of the grace and cross of Christ Jesus, that makes to flesh and blood by which it is ever resisted, this only way of life hard, and to be indeed a narrow and straight path? The fleshly mind loves ease and would fain seek for itself a smooth and easy way to peace, as well as a pleasant beaten highway to the celestial country, that should command the suffrage and approbation of the multitude, which, now as of old time, hates the self-denying religion of Christ its divine Original. By this too general complacency with the spirit, manners, and maxims of this world, what room has been given for any who may have been looking towards that Society as an asylum, to be turned back, as for enemies to the cross of Jesus to indulge in sarcastic strictures, and with too good reason against professors of the religion of Christ

we they can see but little difference, in the expressive language of life and conduct, between the one and the other—such and themselves.

is through being washed in the laver of regeneration, and through the obedience which is of faith in the Lord Jesus Christ, must ever constitute the way of life and salvation. He is himself *the way*, through by whom all may enter if they will, and the life of the water of life freely; whereupon ancient promises will be made good: "The obedient shall eat of the good of the land." "The mountains shall depart, and hills be removed; but my kindness shall depart from thee, neither shall the covenant of my peace be removed, saith the Lord, who hath mercy on thee." "My grace is sufficient for thee." "My yoke is easy, and my burden light." These rich and precious promises will abundantly make up for all the trials and conflicts to be met with in the narrow and hard way; and as the husband here, are also the gracious earnest of eternal fullness and blessing reserved in heaven for all those who, coming out of tribulation, shall have washed their hearts and made them white in the blood of the Lamb.

17. February 8th.—The very important one, as to the line of life which I am to live, has often for this year past, given me much anxiety and inward exercise—it has been the cause of restless nights and anxious days, and even (I have reason to believe) to the injury of my health of body, alas! of mind. The anxiety which it excites in me, seems, however, to have been mistaken; because I ought to have been desirous how what was right to be done in the present, and when, rather than to find out what could be contrived or thought of, by my own skill and management. There ought to have been more of that simple reliance and dependence, that trust and confidence, which is the behaviour and feeling of a child towards its mother; how quiet, how it slumbers in her arms, how safe and how it is whilst there. O! my soul, take thou rest after having experienced marvellous mercies,—after having been, like the babes of old, led in the day time, "with a light," and all the night with a light of fire," nor having been fed as with manna in the wilderness, and thy thirst quenched with water as from the rock,—take heed lest after that has been done for thee, thou shouldst, through unwatchfulness or unbelief, in the least degree doubt the strength of that hand which upholds thee, the depth of that wisdom which is directing thee, the providence of that Father which slumbers not, the extent of that love from which nothing can disengage thee.

Whatever is to be thy lot, whatever task is assigned thee in the vineyard, wherever thou art the scene of thy earthly tarrying, let thy afflictions surprise thee as a flood, or thy mercies be as a full flowing fountain, "hope only in God," for "from him cometh thy salvation." Neither give place to doubt or grief, nor to very much anxiety or disturbance of mind, respecting what may befall thee never fear,—there is one that provideth for thee. If thou art a sparrow, there is one to whom every feather is in subjection.—He is good; for his will "proceedeth not evil;" and he hath said, "I will not do thee evil." "I will not do thee any evil, shall no evil happen to the just." In

the meantime, in all thy watchings and waitings, in all thy wants and weariness, cease not to think of his mercies, his goodness, his tender dealings with thee; be mindful of these things; hide them not, be not ashamed of them; but to show "to the generation to come, the praises of the Lord, and his strength, and his wonderful works that he hath done." Surely, O! my soul, if thou dost thus, if thou rememberest that God has been and will be thy rock, and thy redeemer,—if thou trustest in the Lord, and makest him thy hope,—thou shalt "be as a tree planted by the waters, and that shall spreadeth out her roots by the rivers; thou shalt prosper in thy day, and be established."

(To be continued.)

The Pearl Oyster.

A shell nearly equal to the oyster, produces the costly pearls of the East, that have ever been as highly esteemed as the diamond itself. The most renowned pearl-fisheries are carried on at Bahrein, in the Persian Gulf, and in the Bay of Condatchy in the island of Ceylon, on banks situated a few miles from the coast.

Before the beginning of the fishery, the government causes the banks to be explored, and then lets them to the highest bidder, very wisely allowing only a part of them to be fished every year. The fishing begins in February, and ceases by the beginning of April. The boats employed for this purpose assemble in the bay, set off at night at the firing of a signal-gun, and reach the banks after sunrise, where fishing goes on till noon, when the sea-breeze which arises about that time warns them to return to the bay. As soon as they appear within sight, another gun is fired, to inform the anxious owners of their return. Each boat carries twenty men and a chief; ten of them row and hoist up the divers, who are let down by fives, and thus alternating, diving and resting, keep their strength to the end of their day's work. The diver, when he is about to plunge, seizes with the toes of his right foot a rope to which a stone is attached, to accelerate the descent, while the other foot grasps a bag of net work. With his right hand he seizes another rope, closes his nostrils with the left, and in this manner rapidly reaches the bottom. He then hangs the net round his neck, and with much dexterity and all possible despatch collects as many oysters as he can while he is able to remain under water, which is usually about two minutes. He then resumes his former position, makes a signal to those above by pulling the rope in his right hand, and is immediately by this means hauled up into the boat, leaving the stone to be pulled up afterwards by the rope attached to it. Accustomed from infancy to their work, these divers do not fear descending repeatedly to depths of fifty or sixty feet. They plunge more than fifty times in a morning, and collect each time about a hundred shells. Sometimes, however, the exertion is so great that, upon being brought into the boat, they discharge blood from their mouth, ears, and nostrils.

While the fishing goes on, a number of conjurers and priests are assembled on the coast, busily employed, as the divers suppose, in protecting them by their incantations against the voracity of the sharks. These are the great terror of the divers, but they have such confidence in the skill or power of

their conjurers that they neglect every other means of defence. The divers are paid in money, or receive a part of the oyster-shells in payment. Often, indeed, they try to add to their gains by secreting occasionally a pearl, but the sly merchant knows how to find the stolen property. The oysters, when safely landed, are piled up on mats, in places fenced round for the purpose. As soon as the animals are dead, the pearls can easily be sought for and extracted from the gaping shells. After the harvest has been gathered, the largest, thickest, and finest shells, which furnish mother-of-pearl, are sorted, and the remaining heap is left to pollute the air; The pearls are drilled and strung in Ceylon, a work which is performed with admirable quickness and dexterity. For cleaning, rounding and polishing them, a powder of ground pearls is made use of.

The Pacific also furnishes those costly ornaments to wealth and beauty, but the pearls of California and Tahiti are less prized than those of the Indian Ocean.

Pearl-like excrescences likewise form on the inner surface of our oysters and mussels, and probably originate in the same manner as the true pearls, but the formation of these has not yet been quite satisfactorily accounted for.

Brilliance, size, and perfect regularity of form, are the essential qualities of a beautiful pearl.—*Hartwig.*

For "The Friend."

"Gather up the Fragments that Remain, that nothing be lost."

It is under a little of this feeling we hope, and with a view of adding "another to the great cloud of witnesses that have gone before," that the following brief account of a deceased minister of the Society of Friends, is forwarded for insertion in "The Friend."

ELIZABETH KIRK, was the daughter of Samuel and Hannah Richards, and was born in Philadelphia in 1765. She married in 1787, Isaiah Kirk, of East Nantmeal, Chester Co., Pa., and removed with her husband some years later to reside at the latter place, and continued to be an esteemed member of that meeting until her death, which took place 2nd mo. 28th, 1831. She came forth in the ministry soon after her marriage, to the satisfaction of her friends. The following expressions were taken down by different persons during a very severe illness which she had about nine months before her decease. She labored under a very afflictive dropsy several years, and at times suffered much. It was in one of the worst relapses of her disorder, when she and all around her believed her close very near, and when her sufferings were very severe, that the following expressions were called forth. In addition to what may be gathered from the expressions themselves, it may be added, she was a woman of lively, cheerful and benevolent disposition, felt a strong interest in the cause of Truth, and though deeply impressed with the correctness and importance of the doctrines and testimonies held and maintained by our own religious Society, yet her mind was imbued with a charity which embraced the truly pious of every sect and name. She believed herself called to the work of the ministry when very young, and in the exercise of her gift, it is believed, gave general satisfaction to her friends. Her communications were often im-

pressive, and generally more directed, earnestly to recommend the great practical duties of a religious life than a discussion of doctrinal questions. She was a constant attendant of religious meetings, and seldom allowed any considerations to interfere with her attention to this important duty. Her travels in the ministry were mostly within the compass of her own Yearly Meeting, and had in their prospect and performance, the unity of her friends. In her last illness, which, as above intimated, was protracted, and often painful and distressing, she manifested great resignation and patience, and appeared more concerned that she might be prepared for her change (which she constantly believed, approaching) than to recover her health, or even to be relieved from her suffering. She appeared to have some presentiment of her close, and about two weeks before it took place, said to a son, who then lived at a considerable distance from home, on taking leave after a visit, "that she felt as though it were the last time they should see each other in this world." This was the case, and though her change was rather sudden and unexpected, there is no reason to doubt, but that her work was finished. It is thought it may, without hesitation be affirmed, that her whole conduct through life, manifested a singleness and sincerity of spirit; a lively interest for both the spiritual and temporal welfare of others, and that her memory is cherished with affectionate respect by all who intimately knew her.

On the evening of 3rd mo. 29th, 1830, a number of her neighbors and her children being present, though under great bodily weakness and suffering, she broke forth in earnest exhortation, saying her feelings had often been engaged in deep solicitude on behalf of her truly kind neighbors, and that they were renewedly called forth on the present occasion; that she seriously recommended them to choose the Lord for their portion, and rely on Him who was able to save the poor soul to the uttermost. That she could testify from a degree of living experience, and on the present occasion she thought she felt a renewal of it; that it was no cunningly devised fable she had followed, but the Truth as it is in Jesus; that it issued as it were from under the threshold of the door, a small fountain, and became a great river of living waters. She then addressed her husband in a very affectionate manner, said her earnest desire for him was that his eyes might be opened to know clearly on whose side he was standing; and that he might be enabled to choose the right way. She then addressed her children collectively, exhorting them to keep their firm trust in the Lord, assuring them from her own experience, if they did so, He would be near to preserve them, to succor them, and to be their joy and consolation in every needful time.

Asking for a colored girl living in the family, when she came she said: she wished her to understand that He who had made of one blood all the nations of the earth was no respecter of persons, and equally desired the preservation and salvation of all.

At another time, a neighbor being present, some allusion was made to the late separation in the Society, she referred to those who had gone off, and said: "Dear people, how my heart has often ached for them." Being asked if she felt the same unshaken confidence in

the correctness of her principles as formerly, she said: "No doubt of it! No doubt of it!" A reference having also been made to her former ministry, she replied, she had nothing to boast of but the mere mercies of her Saviour.

A neighbor coming in she observed, "Oh I am glad thou thinks me worth coming to see, though of myself I am nothing, but I do know the house of mourning is better than the house of mirth."

At another time having suffered extremely most of the day, towards evening being told she appeared some better, she said she did not know but she did feel somewhat better, but if she could have had her wish, or if she dared to wish, it would be that she might be taken, and that before the light of another day. She said some of her wishes had been gratified; "they have been that I might live to see you, my children," most of whom were present, "grown up and choose good companions, which you have done, and now could I have a full assurance you would choose the Lord for your portion I could cheerfully leave you." Again feeling much relieved from the extreme suffering she had endured for several days, she said: "What a favor; I hope I shall feel grateful for this relief, and ascribe it to Him who is able to give relief." The next morning she said to a relative who was with her, "I feel calm and quiet, and it is not of myself but of the Lord. I have an assurance I have not been following cunningly devised fables," then after a pause; "this is a feeling the unregenerate mind has no conception of." In the afternoon being much worse, and the family having collected around her, believing her close very near, she said in a very earnest manner, "Pray for me! Pray for me! Oh Lord have mercy upon me, and let me breathe my last. Thou knowest I have always loved thee, and now take me to thyself; let me go the way of the righteous and be at rest! Give me up, my dear husband, don't detain me; and you, dear children, oh ye tender ones, give me up; don't hold me; have pity on me; follow the Lord and He will preserve and guide you." Sometime after, finding herself recovering, she said, "How I am disappointed; often when I think my sufferings nearly at an end, I find I have them all to go over again." At another time feeling uneasy and restless, she said, "Oh! that my transgressions may all be forgiven, and that I may have patience to hold out to the end; I fear my patience will not hold out." Being asked to take some food, she said, "I do not know; I do not wish to strengthen this body of flesh and thereby prolong my sufferings, though I am aware it would not be right to hasten the end, but I desire to be released; and oh, if I could only get free from this flesh, what a relief it would be. I once thought it would be hard to part with you," addressing some near connexions present, "but I do not think so now; although I love you as much, nay more, than ever I did, but it is a signal favor to lose Jesus more than all; to know Him to be our only Redeemer, is an especial favor." On one occasion she said to a neighbor who was attending upon her, "What a favor it would be if I should be taken this night, and what a favor it is to be ready and willing to go; I find nothing in my way, I am willing to await the appointed time, I have confidence in a Saviour. My Redeemer liveth, and because he lives, I live. Oh! how my heart is rent for those who

have gone off; if the righteous scarcely cry saved, where will the unbelievers appear. The person replied, thy confidence (mean in her religious principles) is not then shaken. She answered, "Oh no! there is no other way. Fear not for I am with thee, be not dismayed for I am thy God."

(To be continued.)

Umbrellas.—A picture preserved in the British Museum, represents an Anglo-Saxon gentleman with an umbrella held over his head by a servant. But though there is this denotation of the use of the weather-screen in England, in pre-Norman times, umbrellas were carried by our ancestors of the feudal period and were so unfamiliar to our forefathers the earlier part of the seventeenth century that Thomas Coryat occasioned infinite division to Londoners by telling them in "Cradities," how the Italians used little leather canopies, "called in the Italian tongue umbrellas, that is, things that ministers shad unto them for shelter against the scorching heat of the sunne." Introduced into London from Italy in Coryat's time, the umbrella gradually won the favor of our womankind in spite of the derision poured on the fantastic novelty by satirists of both sexes.

Ben Johnson, Drayton, Beaumont and Fletcher, and Collop, author of the "Poc-is-Riva," mention umbrellas, one of which was exhibited as a curiosity in John Tradescant's museum, at South Lambeth, in 1856. Charles the Second's London umbrellas were often carried by modish gentlemen; the fashion descending, persons of the lowest social grades, the sempstresses of Queen Anne's town used the oily shield as a defence against the rain.

Britain ere long used it for the protection her sons as well as her daughters. While John Hanway, the founder of the Magdalen Hospital, endured the jeers of hackney coachmen for daily carrying a contrivance that threatened to lessen the public need of cross carriage; John Macdonald, the footman, who wrote our biography, was accustomed to run about the streets of London with his "fine new umbrella, newly brought from Spain," to derive amusement from the shouts that drew from passers-by of "Frenchman, Frenchman, why don't you call a coach?"

In 1755, Under-sheriff Beardman allowed footman to hold an umbrella over Dr. St. Beare, to keep off the rain and rotten cinders from the man of letters while he stood in pillory. Such a canopy as was used for protection of this author in trouble would create a sensation in the London of to-day if it were borne by an otherwise well appointed gentleman down Regent Street during afternoon of the full season. Made with claret cane ribs, hung on an iron ring, drapery of cotton cloth, and a stick bigger than a staff of a modern carriage umbrella, it weighed several pounds, and, though useful in pelting shower unattended with gusty wind was precisely the shed to be turned inside by a violent breeze.

The fashionable French umbrellas of the seventeenth century weighed three pounds eight and a half ounces. At the present day a vendor of parapluies on the boulevard would blush unless he could provide a customer with an umbrella weighing no more than half a pound of four avoirdupois weight. That France still enjoys the reputation of being

st producer of the most elegant and cost-
 leather screens, England surpasses her in
 manufacture of the stouter and cheaper
 rellas. Of late years great improvements
 been made in the English umbrellas of
 use in respect of simplicity of design,
 ness of fabric, and exactness of mechanism.
 The French treaty has caused silk to be
 more generally used for umbrella cano-
 and recent years have produced some
 composite fabrics that are said to equal
 in glossiness and surpass it in durability.
 The meantime our trade in umbrellas of the
 per and less modish sorts has not langu-
 ed, and the firm which, in 1851, introduc-
 ed—*the fabric made of the wool of Peru-
 and Chilean sheep, which has almost
 superseded the old gingham*—have
 nearly four millions of umbrellas covered
 that material.—*London Graphic.*

The Influence of a Christian Spirit.

Tom —, a shoe black of the New Cut,
 (London,) was one of the most desperate of
 young lads who infest the neighborhood.
 In his earliest years he seemed to delight
 in mischief. He was well known to the police
 district as an expert young gambler,
 and as a consequence he received no favour
 from them. His habit of profane swearing
 was so strong that he could not utter a
 word without either an oath or some filthy
 expression. His mother was determined to
 send him from the streets, and to put him
 in some trade. This was the first step towards
 reformation. He found honorable employment
 and got off many a temptation, and to him it
 was a new experience to have his mind set
 to labouring by hard work. Working at the bench
 beside was a young lad of quite a different
 character—quiet, shy, unassuming, and medi-
 tative. He was never known to join in the
 frolics of the other lads; he always refused
 to drink with the workmen, and was noted
 for his love of industry. He was a Christian!
 He was enough of itself to secure the dislike
 of the ungodly workmen in the shop; but their
 regard of him was increased the more, when
 they found the foreman honorably approve of
 his conduct and attention to work. It was
 evident that nothing would annoy the con-
 siderable lad more than impure language, and
 he was urged to vex his righteous soul as
 far as possible in this way. Proud that to
 be off his diabolic skill, he sought inces-
 santly to arouse the temper of the young man;
 but greatly to his surprise and disappoint-
 ment in every art and provoking allusion failed,
 and he was compelled eventually to give up
 harassing him. One day it happened that Tom
 had some difficulty about his work, and although
 the workmen knew well enough how to help
 him out of it, they declined to render him any
 assistance or offer him any suggestion. Now
 Tom persecuted lad, who volunteered his
 aid, and when Tom had conquered the diffi-
 culty he was quietly invited to come at any
 hour "for a lift." He was staggered, and be-
 came speechless, and so unable to thank, as
 he could have done, his unexpected friend,
 he was looking at his friend with a wondering
 air, and a hand was laid on his shoulder, and
 the young man said, "I have hopes in you yet;
 I have prayed very much for you."

"I prayed for me? I prayed very much for me!"
 said the astonished Tom, "why, what has
 been made of me?" Though he went about his
 work heartily, and set about his amusements

in the evening, yet the words would ring in
 his ears, "I prayed very much for me." The
 plane in his hand seemed burdened with
 the same words, as he used it, and the saw seemed
 to echo the same mysterious language. When-
 ever he attempted to swear or to use foul
 speech, he was gagged as he thought of the
 words, "I have hope in you yet, for I have
 prayed very much for you."

The young Christian observed with joy that
 his shopmate did not swear at or otherwise
 annoy him, and he hoped that the words he
 had said to him had touched a secret chord in
 his heart. In vain did his cowardly com-
 panions now urge him to assault his new
 friend.

"Give him a peal, Tom," said an old man,
 as he passed Tom's bench.

"What for," asked Tom; "he never annoys
 me." "Oh," said the other, "he's a religious
 bloke, he is. Why, he ought to be burnt. I'd
 burn them all, if I only had my way with the
 crawlers." "I'll tell you what," was the reply,
 "he's the quietest young chap that we've got,
 and the civillest too; so you may say what
 you like; but I won't abuse him any more,
 and I think you had better let the man alone."

"Bravo! Tom," exclaimed a voice by his
 side. Turning round he encountered the fore-
 man, with an approving smile on his counte-
 nance. "Bravo! Tom, I am right down glad
 to hear you say so. I wish you were all like
 him. Why, I should'n't have half the trouble
 I have, if you all were; well, well, I've hope
 of you yet, Tom. To tell you the truth, I had
 thought of a day or two ago of getting rid of
 you, as an incorrigible fellow, but now I have
 some hopes of you." And with this the fore-
 man moved on.

"Thanks," said Tom; "but you've not done
 for me what he has done,—I prayed very much
 for me." The foreman had passed out of
 hearing; but the object of his remarks ob-
 served in a quiet tone, "Praise the Lord. I
 do, Tom."

"Well," said he, "I don't know why you
 should; for I've been a regular torment to
 you ever since I came here; but I'm very
 sorry for it, and promise that I'll never do it
 again, and so I hope you'll forgive me, though
 I have been so bad to you."

"I forgive you," was the quick response,
 "though you must ask God's forgiveness, and
 you cannot do that unless you know Him;
 but if you come to Jesus, God will forgive you
 for His sake."

Tom's enmity was aroused. He reflected
 soberly on what had passed, became interested
 in religious truth, and sincerely attached to
 his Christian friend.—*E. Wright.*

For "The Pri-nd"

In reflecting upon the prevalence of the
 small pox in Philadelphia at the present time,
 we have thought the following, from the pen
 of Rebecca Jones, might be suggestive of
 good:—

"9th mo, 24, 1807. We have had a general
 visit of what is called *influenza*, so that very
 few in the city and country have escaped,
 though few cases have proved mortal. Some
 aged persons have died with it. It has been
 a serious matter, and I esteem it *no less than*
a gentle shaking of the rod, from the same
 fatherly Hand who has often visited our poor
 city, both in mercy and in judgment. Oh
 that the inhabitants may now learn right-
 eousness."

Misdirected Wealth.

The following remarks, published some
 months ago in the New York "Independent,"
 touch upon a subject which must often have
 been a source of anxiety to thoughtful minds.
 The display and expense connected with fash-
 ionable places of worship, have a tendency
 to drive away the poor, and practically to make
 a distinction even in religious concerns be-
 tween them and the rich—inconsistent with
 the language of Scripture. "The rich and the
 poor meet together. The Lord is the maker
 of them all."

"Go into our large cities, and look at many
 of our church structures, some of them cost-
 ing three or four times as much as is needful
 for permanence, utility, or reasonable taste.
 What does this mean? Does it not mean an
 extravagant display under the forms of reli-
 gion? Why these vast sums expended in
 rearing splendid and costly edifices, when
 cheaper ones would equally and in some re-
 spects much better answer all the normal
 purposes of church worship? Why these
 elaborate decorations, which, though very
 fine as exhibitions of art, have nothing to do
 with the worship of God, and, indeed, are
 more likely to defeat it than promote it?
 Why this rivalry among city congregations
 to see which can build the most gorgeous
 churches? Why this expenditure of five or
 six thousand dollars per annum, and in some
 cases seven thousand, to procure the most
 attractive singers, charged with the task of
 singing for the entertainment of the people?
 We are asking these questions in no cynical
 spirit; we are more than willing to concede
 to good taste its full demands; but it does
 seem to us that the machinery of church-life
 in our large cities, especially within the last
 thirty years, has been rapidly tending toward
 a most wasteful if not corrupting extrava-
 gance. This system is bearing its fruits in
 aristocratic churches, sometimes called "first-
 class churches," built for the rich and exclud-
 ing the poor. It is bearing its fruits in the
 temptations which it supplies to the pulpit to
 minister a fashionable religion and in a fashion-
 able way. It is bearing its fruits in the
 unnecessary absorption of funds that are
 urgently needed to propagate the Gospel in
 the destitute portions of our country and
 throughout the world. We doubt its wisdom
 and its Christian propriety. We believe that
 the church can do better with its wealth than
 uselessly sink millions of dollars in the at-
 tempt to ape the cathedral and monumental
 system of the Papacy.

Christ tells the church, as well as indi-
 viduals, to gather up the fragments, that
 nothing be lost. The law of economy in
 the just use of property is as proper for the
 church as for the private individual. The one
 has no more right to be a spendthrift than
 the other. We would not have the church
 hoard its wealth; but, if it were to spend less
 in some directions and more in others (less
 for display and mere art, and more for the
 solid utilities of Christian evangelization,) it
 would come much nearer the idea of the
 Great Teacher, as given in the direction that
 "nothing be lost." The church cannot afford
 to fool away its money in empty show, that
 really has no useful relation whatever to its
 vital interests. The people have justly com-
 mended our excellent President for his wise
 economy in cutting down the expenditures
 of the Government, and thereby saving mil-

lions of dollars, which have been appropriated to the payment of the public debt. Would it not be wise for the church to practice a like economy, and thereby enable itself to pay the debt which it owes to Christ in labors and larger expenditures for the conversion of the world."—*Independent*.

Beet Root Sugar.—The cultivation of beet root sugar in France, has now risen to an industry of the first importance. It employs more than four hundred manufactories, and the process of manufacture is each year brought to a higher state of perfection. There are in France three or four journals specially devoted to subjects connected with the manufacture, the machinery required, the chemistry of the process, the cultivation of the beet, the sale of the products, &c. In portions of Germany, also, beet root sugar is produced in large quantities, and the business appears to be established as one of the great industries of the country.

THE FRIEND.

FIRST MONTH 27, 1872.

SUMMARY OF EVENTS.

FOREIGN.—In the French National Assembly on the 19th inst., the discussion was resumed upon the proposition to impose a tax on raw materials. It soon became apparent that the opposition were in the majority; and the Assembly, by a vote of 376 against 307, adopted a resolution providing that the government shall only resort to taxation on raw materials when the other taxes fail to produce sufficient revenue to meet the expenses of the nation. A committee of fifteen was appointed, who are in the meantime to make a thorough examination of these communications. This action of the Assembly gave offence to President Thiers, and on the 20th he tried to that body his formal resignation as President of the Republic. It was accompanied with the announcement that all the Ministers had also tendered their resignations. Great excitement prevailed in the Chamber, and the reading of these communications. A vote was adopted almost unanimously, only six members dissenting, appealing to the patriotism of the President, and requesting to accept his resignation, and passing to the consideration of the order of the day. When informed by a deputation that the Assembly refused to accept his resignation, he consented to withdraw it for the present, but told them also he was worn out and discouraged, and sooner or later he would be compelled to retire from the Presidency.

Notwithstanding the efforts of the French authorities to prevent the assassination of German soldiers, in the departments occupied by them, these outrages still continue.

The principal of the college at Vitry le Francois, who was arrested by the Germans on account of a hostile demonstration made by the students of the institution, has been condemned by the German court-martial to three months imprisonment.

The long promised additional cable between England and the United States, seems to be assured, the British Telegraph Construction Company having actually signed a contract for a cable direct to New York.

The treaty for the cession to Great Britain of the Dutch possessions in the Guianas coast meets with violent opposition in Holland, where it is generally stigmatized as dishonorable. The matter will soon come before the States General. A telegram from the Hague announces that the treaty has been adopted by the upper House but its rejection in the Chamber is probable.

It is reported that the Guianas coast treaty refuses to give in the movement for the suppression of the International Society.

London, 1st mo. 22d.—Consols, 92½. U. S. sixes, 1862, 93½; do, 1867, 93½; do, ten-forties, 92½.

Liverpool.—Uplands cotton, 10½; Orleans, 10½. Cotton wheat, 12s. 5d. per 100 lbs. Red winter, 11s. 9d. Is. 11d. Red spring, 11s. 11s. 6d.

Published statistics show that 90,000 emigrants left Germany last year, nearly all going to the U. States.

The Diet of Croatia having ignored the compromise proposed by the joint governments of Austria and Hungary, has been dissolved by an imperial decree.

A Constantinople dispatch of the 17th says: The first Turco-European train over the railroad skirting the Bosphorus, entered Stamboul yesterday, crossing the old Seraglio grounds.

Dispatches from Batavia report heavy floods in Java, which have done considerable damage to the crops.

A telegram from Bombay reports the loss of a vessel off St. Paul with thirty-five natives on board, all of whom were drowned.

A dangerous revolt among the Looshias of India has been suppressed. At the first signs of trouble troops were dispatched for Delhi, and marched direct to the headquarters of the rebels whom they met in large force, but completely defeated, killing one hundred and taking several hundred prisoners. The rebels have dispersed, and the country is now tranquil.

The Spanish Ministry have sent a circular to the governors of the provinces, instructing them to suppress all organizations belonging to or in any way connected with the former and society, without their respective jurisdictions. While thus breaking up a system dangerous to the civil peace, they are directed not to interfere with the liberty of speech.

The late intelligence from Mexico has been favorable for the Juarez government. The Diaz party have suffered a severe defeat, killing one hundred and taking several hundred prisoners. The revolutionists are, it is stated, operating without concert, and its chiefs are quarreling among themselves.

Honolulu dates of the 27th ult., report serious damage upon some of the Sandwich Islands by a violent gale. The islands of Maui and Kamai were the chief sufferers. On Kamai the wind raged with great force in squalls, tearing up trees and overthrowing houses. In many instances the houses which were not destroyed by wind were swept down by rain. The whole island suffered from freshets.

A Paris dispatch of the 22d says: It is understood that President Thiers has decided to abstain hereafter from participation in the debates of the Assembly, except on important occasions.

The trial of prisoners for the murder of hostages in Paris, during the reign of the Commune, has terminated, and their sentences have been promulgated. The sentences are as follows: Three of the prisoners are sentenced to banishment to the penal colony of Guyenne for terms as follows: Francois for life, Latour Fortin for twenty years, and Remora for ten years. Eight others are sentenced to transportation from the country. The remainder of the male prisoners who were on trial, together with all the women, were acquitted.

UNITED STATES.—The New York Chamber of Commerce has sent a memorial to Congress, representing that the higher cost of American labor and material used prevents American shipbuilders from competing with foreigners, and is the principal cause of the depression of our marine. Congress is urged to give relief, and more liberal compensation to American ocean steamers carrying the mails is suggested as a measure for the restoration of our commerce.

The whaling business of the United States continues to be in a declining state. The New Bedford Standard, in its annual review of the business of 1871, says the history of the business of the past year is like that of its predecessors for the past few years, one of disaster and discouragement. The number of vessels engaged in the business has constantly decreased by loss, condemnation and sale, and few new ones are added. During the past year only one vessel has been added to the whaling fleet of the country, and 72 have been lost to the business. Of these last six were wrecked, 26 others were abandoned in the ice, thirty are employed in other business, and several old ships have been broken up. In 1871 there were 135 vessels and 22,218 tons of whale, with an aggregate of 23,218 tons were employed, in 1871 the fleet had dwindled down to 24 ships, 143 barks, 13 brigs and 38 schooners, with an aggregate of 32,725 tons.

The Amnesty bill, and a supplementary Civil Rights bill, which Senator Sumner has proposed as a standard, have been discussed in the S. state. In his speech Sumner read a great mass of testimony, consisting of addresses, of meetings, resolutions of colored conventions, and letters from colored persons, setting forth their grievances, and expressing an earnest desire for the immediate and complete suppression of slavery. He closed with an appeal to pass the bill as an amendment to the amnesty bill, so that the rebels might always remember that amnesty came to them coupled with justice to the colored race.

The reforms which President Grant desires to introduce into the civil service of the country meet strong opposition from some of the leading members of Congress in both Houses.

Statistics of the statements in Philadelphia week numbered 508, including 209 of small pox. In the year 1871, 157,453 tons of coal were used in Philadelphia gas works; the number of gas meter use is 69,793, of street lamps 8,656. The street mail during the year amounted to 38,295 feet, making an increase of 8 per cent. over the year 1871. The production of gas last year was 1,335,972,000 a feet.

The difficulties in New Orleans continue. President Grant ignores both parties, insisting only that it should obey the laws. The House of Representatives in Congress, has appointed a committee to visit St. Orleans, and if possible effect a reconciliation between the two factions.

The Markets, &c.—The following were the quotations on the 22d inst. New York.—American gold, U. S. sixes, 121½, 115½; ditto, 1867, 112½; ditto, 10 5 per cents, 110½. Superior fine, \$3.70 a \$6.20; brands, \$8.30 a \$10. No. 1 spring wheat, \$1.57; an \$1.63. Barley, 95 cts. a \$1.02. Oats, 54 a 56. Western mixed corn, 63 a 70 cts.; yellow, 70 a 72, southern white, 77 cts. Philadelphia.—Cotton, 22 23 cts. for uplands and New Orleans, Superior B \$8.25 a \$8.75; finer brands, 86 a \$10. Pennsylvania red wheat, \$1.55 a \$1.60; amber, \$1.60 a \$1.63; white, \$1.70 a \$1.75. Rye, 90 cts. Old yellow corn, 75 a new, 60 a 67 cts. Oats, 52 a 55 cts. Clover-seed, 10½ cts. Timothy, \$3.25 a \$3.50 per bushel. Arrivals of beef cattle at the Avenue Drovers averaged about 2,800 head. The market was dull prices lower, extra sold at 73 a 74 cts; fair to good, 74 cts, and common 4 a 53 per lb. gross. Ofst about 15,000 sold at 73 a 8 cts. for choice, prime 74 cts, and common 54 a 61 cts. per lb. gross. H \$2.25 a \$2.97 per 100 lbs. Receipts, 4,628. Baltimore.—Southern mixed corn, 63 a 66 cts.; yellow, 66 a 67 cts.; western mixed 67 a 68 cts. Oats, 54 a 55 cts. Chicago.—No. 1 spring wheat, \$1.27; No. 2, \$1.24; No. 3 do, \$1.12. 2 mixed corn, 39½ cts. No. 2 oats, 32½ cts.

WANTED

A Friend to take charge of the Primary Department of the Adelphi School for Colored Children, on Win St. below 13th St. Apply to

Caleb Wood, 524 South Second St.
Joseph W. Lippincott, 413 Seventh St.
Jonathan Evans, 15 North Valent St.

SITUATION WANTED.

A young Friend from Massachusetts, desires a situation in a Friends' School or private family, as Tutor. For further information apply to E. M. Harding, 245 North Third street.

FRIENDS' BOOK STORE.

There have been recently reprinted editions of following works, which are now for sale at No. Arch Street.

Examples of Youthful Piety.
Bardley on Church Government.
Usher's Letters.
Memoirs of Edwin Price.
True Christian Baptism and Communion.
Concise Account of Friends, by T. Evans.
Journal of William Evans, 2d edition.
There are also on hand a supply of other approved writings of Friends.

FRIENDS' BOARDING SCHOOL FOR INDIVIDUAL CHILDREN, TUNNESSA, NEW YORK.

A suitable Friend and his wife are wanted to share the charge of this institution at Tunnessa, N. Y. Application may be made to Ebenezer Worth, Marshallton, Chester Co., Thomas Wistar, Fox Chase, P. O., Philadelphia, Samuel Morley, Olney P. O., do. Joseph Scattergood, 413 Spruce Street, do.

FRIENDS' ASYLUM FOR THE INSANE (Near Frankford, Twenty-third Ward.) Philadelphia.

Physician and Superintendent.—JOSUAH H. WORTHINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board of Managers.

WILLIAM H. HILE, PRINTER,
No. 422 Walnut Street.

JOHN S. STOKES,

NO. 115 NORTH FOURTH STREET, UP STAIRS,

PHILADELPHIA.

Age, when paid quarterly in advance, five cents.

Central Arabia.

For "The Friend."

(Continued from page 178.)

On the morning after our arrival [in Djowf]—it was now the 1st of July—Ghāfil and a small house in the neighborhood, being to one of his dependants, to be put at our entire disposal, according to our previous request. This our new abode consisted of a parlor and court, with two rooms, one on each side, a kitchen and habitation, the whole being enclosed with an outer wall, whose door opened by lock and bolt. Of a kitchen, there was small need, so constant and available are the invitations of the good folks to strangers; and if our house was not so spacious, it afforded at least what we desired, namely, seclusion and privacy. All; it was, moreover, at our host's cost, made preparations.

Either accordingly we transferred baggage and chattels, and arranged everything comfortably as we best could. And as we had already concluded from the style and construction of those around us, that their state of society was hardly far enough advanced to have a sufficiently good prospect for medical science, whose exercise to be generally advantageous requires a certain amount of culture and aptitude in the patient, no less than of skill in the physician, we resolved to make our own main affair here, trusting that by doing we should gain a second advantage, that of lightening our more bulky goods, as coffee and cloth, whose transport had nearly annoyed us not a little.

But in fact we were not more desirous to please the men, women, and children of the place, than to buy. From the very outset the little courtyard was crowded with customers, and the most amusing scenes of Arab bargaining, in all its mixed shrewdness and simplicity, diverted us through the week. Handkerchiefs, after handkerchiefs, yard after yard of cloth, beads for the women, knives, combs, gong glasses, and what not? (for our stocks were through miscellany.) were soon sold off, and ready money, others on credit; and it is but justice to say that all debts so contracted were soon paid in very honesty; and High Street tradesmen, at least in

former times, were not always equally fortunate.

"Meanwhile we had the very best opportunity of becoming acquainted with and appreciating all classes, nay, almost all individuals of the place. Peasants too from various hamlets arrived, led by rumor, whose trumpet, prone to exaggerate under every sky, had proclaimed us throughout the valley of Djowf for much more important characters and possessed of a much larger stock in hand than was really the case. All crowded in, and before long there were more customers than wares assembled in the store-room.

"Ghāfil, for his part, employed a hundred petty artifices to prevent our selling the coffee, which he vehemently desired to reserve for his own bargain. No sooner had we an offer for it, than he sent some of his relations or friends to dissuade us from coming to terms; and though we had early perceived his aim, we thought it best to wink at it, willing to gratify our first and principal host, even at the cost of some slight loss to ourselves.

"I say, our principal host, for everybody who had a dinner or a supper to offer was also our host at the Djowf; invitations rained in on all sides, and it would have been considered a shame on the hospitality of the people in general, and a blot on their fair name, had we ever been left to dine twice under the same roof. Our manner of passing the time was as follows. We used to rise at early dawn, lock up the house, and go out in the pure cool air of the morning to some quiet spot among the neighboring palm-groves, or scale the wall of some garden, or pass right on through the bye-lanes to where cultivation merges in the adjoining sands of the valley; in short, to any convenient place where we might hope to pass an hour of quiet undisturbed by Arab sociability, and have leisure to plan our work for the day. We would then return home about sunrise, and find outside the door some tall lad sent by his father, generally one of the wealthier and more influential inhabitants of the quarter, yet unvisited by us, waiting our return, to invite us to an early breakfast. We would now accompany our Mercury to his domicile, where a hearty reception, and some neighbors collected for the occasion, or attracted by a cup of good coffee, were sure to be in attendance. Here an hour or so would wear away, and some medical or mercantile transaction be sketched out. We of course would bring the conversation, whenever it was possible, on local topics, according as those present seemed likely to afford us exacter knowledge and insight into the real state and circumstances of the land. We would then return to our own quarters, where a crowd of customers awaiting us, would allow us neither rest nor pause till noon. Then a short interval for date or pumpkin eating in some neighbor's house would occur, and after that business be again resumed for three or four hours. A walk among the gardens, rarely

alone, more often in company with friends and acquaintances, would follow; and meanwhile an invitation to supper somewhere had unfailingly been given and accepted.

"This important meal is here, as almost everywhere else in Arab towns, a little before sunset. The staple article of Djowf fare, and in Djebel Shomer also, is Djereeshah, that is, wheat coarsely ground, and then boiled; butter and meat are added, sometimes vegetables, gourds, cucumbers, and the like; eggs, hard-boiled by the way, occasionally come in; but however various the items, the whole is piled up heapwise on one large copper dish, of circular form, and often a foot and a half or even two feet in diameter. The food itself is served scalding hot, but is to be eaten with the hand alone; not that any philosophical or moral objection exists to forks and spoons, as I have seen ingeniously stated by an author—French, I believe—but simply that those articles are not to be had here, nor are they indeed any way requisite where soup and joints of roast meat are alike out of the question. Bread never figures at a Djowf supper, though it is common enough at breakfast. This article assumes in Arabia infinite varieties of form and quality; here it consists of large unleavened cakes of moderate thickness. Dates are often added to represent garnish at supper; from what meal indeed are they absent? No drink but water is known hereabouts, though date-tree wine might easily be manufactured, and the old poets and writers of Northern Arabia often mention it; but it has now gone out of fashion, and even remembered.

"After supper all rise, wash their hands, and then go out into the open air to sit and smoke a quiet pipe under the still transparent sky of the summer evening. Neither mist nor vapor, much less a cloud, appears; the moon dips down in silvery whiteness to the very verge of the palm-tree tops, and the last rays of daylight are almost as sharp and clear as the dawn itself. Chat and society continue for an hour or two, and then every one goes home, most to sleep, I fancy, for few Pen-seroso lamps are here to be seen at midnight hour, nor does the spirit of Plato stand much risk of snuffing from the nocturnal studies of the Djowf; we, to write our journal, or to compare observations and estimate characters.

"Sometimes a comfortable landed proprietor would invite us to pass an extemporary holiday morning in his garden, or rather orchard, there to eat grapes and enjoy ourselves at will, seated under clustering vine-trellises, with palm-trees above and running streams around. How pleasant it was after the desert! At other times visits of patients, prescriptions, and similar duties would take up a part of the day; or some young fellow, particularly desirous of information about Syria or Egypt, or perhaps curious after history and moral science, would hold us for a couple of hours

in serious and sensible talk, at any rate to our advantage."

Our author paid frequent visits to the castle of the governor, Hamood, and passed a spare hour in studying the interesting scenes it presented. "For Hamood, in virtue of his judicial and executive powers, held every morning, and some afternoons also, long audiences in behalf of whoever had grievances to redress or claims to advance; the contending parties would on such occasions come to plead their cause in person before him in the K hāwah; and the governor himself, after a patient hearing, would pronounce sentence. I ought to say that cases of life and death, along with all permanent legislative acts, are reserved for the head jurisdiction of Hā'yē; whatever falls short of these is left to the vicegerent, who has accordingly plenty of work to go through, the more so that it has almost all to be done personally. A lawyer would have but an indifferent chance of livelihood in Arabia, where every one, the very Bedouins included, has eloquence and presence of mind enough to defend his own cause; and the chicane of courts would be of little purpose in such an assembly, though bribery is not always absent nor unsuccessful. I was much amused by the simplicity and straightforwardness of all parties in these tribunals; a court-martial is complicated in comparison. But when the plaintiff or defendant chances to be a Bedouin, we have a thorough comedy; the following, for instance.

"One day my comrade and myself were on a visit of mere politeness at the castle, the customary ceremonies had been gone through, and business, at first interrupted by our entrance, had resumed its course. A Bedouin of the Ma'āz tribe was pleading his cause before Hamood, and accusing some one of having forcibly taken away his camel. The governor was seated with an air of intense gravity in his corner, half leaning on a cushion, while the Bedouin, cross-legged on the ground before him, and within six feet of his person, flourished in his hand a large reaping-hook, identically that which is here used for cutting grass. Energetically gesticulating with this graceful implement, he thus challenged his judge's attention. 'You, Hamood, do you hear?' (stretching out at the same time the hook towards the governor, so as almost to reach his body, as though he meant to rip him open); 'he has taken from me my camel; have you called God to mind?' (again putting his weapon close to the unflinching magistrate); 'the camel is my camel; do you hear?' (with another reminder from the reaping-hook); 'he is mine, by God's award and yours too; do you hear, child?' and so on, while Hamood sat without moving a muscle of face or limb, imperturbable and impassible, till some one of the counsellors quieted the plaintiff, with 'Remember God, child; it is of no consequence, you shall not be wronged.' Then the judge called on the witnesses, men of the Djowf, to say their say, and on their confirmation of the Bedouin's statement, gave orders to two of his satellites to search for and bring before him the accused party; while he added to the Ma'āze, 'All right, daddy, you shall have your own; put your confidence in God,' and composedly motioned him back to his place."

If Heaven is lost, all is lost.

Memoirs of Mildred Ratliff.

(Continued from page 179.)

Hannah Shinn to Mildred Ratliff.

"Philadelphia, 6th mo. 4th, 1827.

"My Dear Mildred,—Thou hast often been the companion of my mind since I have been confined in my chamber; and more especially since I heard of thy being out from home in Truth's service. My sympathetic feelings have been awakened for thee, reflecting on the awful state of things in our Society. Great trials must await those who are travelling in the cause of the blessed Jesus, through whom the revealed will of the Father is manifested, and by whom we are redeemed! Oh, let us cleave unto Him! not casting away our confidence, but holding fast the profession of our faith without wavering; and having done all to stand. Let us stand in our allotment, whether it be through evil report, or good report; being willing to suffer with the Seed, it haply we may reign with it. Truly this is a day of suffering with the spiritually minded! A day wherein the secret cry of lamentation, and mourning, and woe, is the prevailing language of the soul. What can we do better than to bow low before the throne of grace, with weeping and supplication, as between the porch and the altar, saying, Spare thy people, O Lord! Give not thy heritage to reproach! There is doubtless a remnant, who have kept firm their standing upon that Rock which is sure and steadfast. These having kept the word of His patience, are preserved in the hour of temptation and trial. Oh! for an increase of that patience, yea, invincible patience! For want of having this, many have suffered loss.

"Much more I would like to say, if my strength of body would permit me; but it is with difficulty I write this much.

"With much affection, I am thy friend,
HANNAH SHINN."

Jacob Hampton to Mildred Ratliff.

"Wayne county, Indiana, 5th mo. 22d, 1828.

"Dear Mildred Ratliff,—Having an opportunity of sending thee a few lines, I gladly embrace it. We are willing to let thee know we have not forgotten thee, nor the satisfaction we enjoyed in thy company and conversation when at our house. It was a time of great favor to my poor soul. I had been reading Elias Hick's sermons, and was almost captivated by his eloquence, and the apparent reasonableness of much that he said. A few days before thou wast at our house, I discovered in his plausible discourses that he did not believe in Jesus of Nazareth as the Saviour of mankind, and denied the doctrine of the atonement. I was not willing by any means to lose my faith and belief in our dear Lord and Saviour, and when thou came to our house I was under much concern and trouble of mind, fearing I might be shaken off of the right foundation. The enemy was tempting me very sorely, through reasoning and glossing lies, to allegorize away the plain meaning of Scripture, and to reconcile them to the views of Elias Hicks. But, blessed be the Lord who knew that I loved him, and desired to serve Him with a perfect heart and a willing mind, He in his providence sent thee to my house in the needful time to cause the scales to fall from my eyes, and, as it were, fully to re-establish my faith and belief in the

For "The Friend."

dear Redeemer, and in the doctrines of the Gospel. Praised be his holy name! Since that time I have found it my duty when abill has been given, to contend for the faith or delivered to the saints, and endeavor to convince my poor mistaken friends who were embraced the views of Elias Hicks, of the awful mistake they have committed.

"It appears to me to be a time in which all true believers in Christ ought to unite the support of our holy religion, and endeavors to maintain the truth as it is in Jesus being willing to contend as occasion require, for that holy faith which was once delivered to the saints. I greatly desire that we all be careful to adorn the gospel of Christ a consistent conduct, regulated by that grace and truth which came by Him. Without it we shall bear an imperfect testimony to the excellency of the Gospel dispensation, and give the enemies of Truth an opportunity speaking evil of it. Thus we shall show ourselves to be like the foolish builders, who erected their houses upon a sandy foundation for such our blessed Redeemer compare those who heard his sayings and did not. I have been grieved for some who profess to contend for our faith against E. H. and yet are not altogether sound in Christian doctrine, having gone to an opposite extreme. This has been injurious to our testimony. Some I believe contend for our faith, who not live in obedience to the faith they pretend to contend for.

"Thou knowest it is a time of deep suffering, and that we mourn for the candlesticks that have been removed out of their places. Notwithstanding this, it is a time of favor to the true followers of the crucified Saviour who know the truth which is worth suffering for. It has been a time of shaking our foundations, that that which cannot be shaken may remain; a time that true believers more nearly united in love towards one another than has been common. Of such may be said, as was said formerly, 'See these Quakers love each other!' Let us to God and take courage! Watch over one another for good! Pray one for another, endeavor to build up each other in our holy faith. Thy affectionate and true friend,
JACOB HAMPTON.

H. Regina Shober to Mildred Ratliff.

"Philadelphia, 8th mo. 21st, 1828.

"My Beloved Friend,—I remember the precious feelings that accompanied the perusal of thy very acceptable letter, received a time when my poor tried mind felt as if really needed every little word of encouragement which my kind and gracious Mother was pleased to favor me with. These feelings have been renewed whenever I have read it.

"I could not feel at all satisfied to let an opportunity pass without attempting to thee how much I regretted not having been of thy return to our city, and thy prospective leaving it for home, until it was too late to thee. I do not feel as if I could say that now, yet that dear friend, I may venture to thee, that according to my little ability, sympathy and fellow-feeling, I travelled with thee from place to place on thy return to thy earthly dwelling. I believe that as thou hadst been enabled to go, faith had been abode in, and therefore, that which an humble hope of this can also

and which the dear Master promised to his dedicated children, would be the result, sweet reward of thy labor of love amongst

In looking towards your approaching Year-Meeting, my spirit is sometimes clothed with fervent prayer, that if consistent with will who hath all power in heaven and in earth, that both thy body and mind may be strengthened for whatever may be the result of trial, dividing, separating spirit amongst us; that thy head may be covered in the day of battle; and the hands of all the faithful in Christ Jesus may be made strong in Him. Who ever has and ever will be, the refuge of the poor and afflicted people from the storms, and a shadow from the heat.

It is really a comfort to me that you will probably have the company of some of the faithful from other Yearly Meetings. Some of those from our's have had a very large share of the burden to bear amongst us in a day of perplexity and treading down. We have been enabled to stand faithful in our allegiance to the king immortal, and are pleased to enter deeply into sympathy and sympathy with you.

My dear and beloved friend Jonathan, I expect will hand thee this. I trust it will be a comfort to some of you, and be a way to return in safety, strengthened in body and spirit. He is to me a kind sympathizing father and friend. Now I believe it is not best for me to add much, although I could fill my paper with complaints about myself; and tell thee how for several months I have been wading in darkness, through deeps; almost ready to conclude with Jonah that I was down at the very bottom of the mountain, and earth with her bars did ere long close about me for ever. Yet I am in hope, and something like a little glimmering of light on the path, although very faint. I cannot but hope thou wilt feel willing and able to drop me a few lines by the pen of our friend. Thou knowest not what it be handed thee to give a poor, feeble, and far very unfaithful little sister.

From thy affectionate R. SHOBER."

Jane Bettle to Mildred Ratcliff.

"Philadelphia, 1829.

My ever beloved friend M. R.—I thought though my time was limited, I must send my paper the expression of my past and present desire that thou shouldst keep me in thy remembrance when it is well with thee. If I think, the request of one formerly, brethren, pray for us."

Our friends from your parts, as well as thine, have been acceptably with us. May the Lord bless the work assigned them! Next thou, dear Mildred, through heights and depths, continue faithful in the occupancy of the gift. Though I say this, it is not that I felt jealous of thy having given back. This is all I have time to say at present.

Thy affectionate friend,

JANE BETTLE."

(To be continued.)

The Temperature of the Sea.

Water is a bad conductor of caloric, the temperature of the sea is in general more constant than that of the air.

The equinoctial ocean seldom attains the minimum warmth of 83°, and has never been

known to rise above 87°, while the surface of the land between the tropics is frequently heated to 129°. In the neighborhood of the line, the temperature of the surface water oscillates all the year round only between 82° and 85°, and scarce any difference is perceptible at different times of the day.

The warmest part of the ocean does not coincide with the Equator, but seems to form two not quite parallel bands to the north and south.

In the northern Atlantic, the line of greatest temperature (87° F.) which on the African coast is found but a little to the north of the Equator, rises on the north coast of South America as high as 12° north lat., and in the Gulf of Mexico ranges even beyond the tropic. The influence of the warmth-radiating land on inclosed waters is still more remarkable in the Mediterranean (between 30° and 44° north lat.) where during the summer months a temperature of 84° and 85° is found—three degrees higher than the medium warmth of the open tropical seas.

While in the torrid zone the temperature of the ocean is generally inferior to that of the atmosphere, the contrary takes place in the Polar seas. Near Spitzbergen, even under 80° north lat., Gaimard never found the temperature of the water below 33°. Between Norway and Spitzbergen, the mean warmth of the water in summer was 39°, while that of the air only attained 37°. In the enclosed gulfs and seas of the Arctic Ocean, the enormous accumulation of blocks of ice, which the warmth of a short summer is unable totally to dissolve, naturally produces a very low temperature of the waters. Thus in Baffin's Bay, Sir John Ross found during the summer months, only thirty-one days in which the temperature of the water rose above freezing point. The maximum warmth was 34°, the minimum 30°.

In the depths of the sea, even in the tropical zone, the water is found of a frigid temperature, and this circumstance first led to the knowledge of the submarine polar ocean currents; for without these, the deep sea temperature in the tropics could never have been lower than the maximum of cold, which the heat radiating particles attain at the surface.

Sir James Ross found that throughout the whole of the deep ocean there is a certain level, at and beneath which the water has an invariable cold temperature of 39° 5' Fahr. At the Equator this level descends to 7,200 feet; in lat. 56° S., it has risen to the surface. The ascending line becomes a descending one as we proceed northwards or southwards to the pole; the stratum of invariable temperature subsiding below the colder water, and in lat. 70° S., occurring at a depth of 4,500 feet. Thus, in the southern hemisphere, and no doubt in the northern also, there is a belt or circle round the earth, where the mean temperature of the sea (39° 5') obtains throughout its entire depth, forming a boundary or kind of neutral ground between the warmer and colder basins of the ocean.

To the north of 56° South lat., the sea becomes warmer than its mean temperature, by reason of the sun's heat, which it has absorbed, elevating its temperature at various depths in different latitudes; while to the south, in the absence of an equal solar supply, the radiation of the heat of the ocean into space occasions the sea to be of a colder temperature as we advance to the pole.

Sir James Ross is of opinion that this circle of mean temperature of the Southern Ocean is a standard point in nature, which, if determined with sufficient accuracy, would afford to philosophers of future ages another means of ascertaining whether or not the globe we inhabit shall have undergone any change of temperature, and to what amount, during the interval. The experiments which his limited time and means admitted of his making, served to show that the mean temperature of the ocean at present is about 39° 5', or seven and a half degrees above the freezing point of pure water, and as nearly as possible the point of its greatest density. But it would be indispensable that this temperature should be ascertained to the tenth part of a degree; and as science and mechanical art are at present so far advanced, that thermometers may be sent down to the greatest fathomable depths without an alteration of temperature even to that small amount, this desideratum might be very easily obtained.

Thus the sun writes his history in the ocean, and future generations will be able to read his annals in that lucid mirror.

If we add to the tropical seas all that part of the ocean where the temperature of the surface waters never falls below 68° F., and where consequently living coral reefs may occur, we find that it nearly equals in size the temperate and cold ocean regions added together. This distribution of the waters over the surface of the globe is of the highest importance to mankind; for the immense extent of the tropical ocean, where, of course, the strongest evaporation takes place, furnishes our temperate zone with the necessary quantity of rain, and tends by its cooling influence to diminish the otherwise unbearable heat of the equatorial lands. Can chance have provided over this salutary distribution? and is it not far more philosophical to attribute it to the forethought of an all-wise Providence?

The circumstance of ice being lighter than water also contributes to the habitableness of our earth. Ice is a bad conductor of heat; consequently it shields the subjacent waters from the influence of the strong winter cold, and prevents its penetrating to considerable depths. If ice had been heavier than water, the sea-bottom, in higher latitudes, would have been covered with solid crystal at the very beginning of the cold season; and during the whole length of the polar winter, the perpetually consolidating surface-waters would have been constantly precipitated, till finally the whole sea, far within the present temperate zone, would have formed one solid mass of ice. The sun would have been as powerless to melt this prodigious body, as it is to dissolve the glaciers of the Alps. The cold radiating from its surface would alone have rendered the neighboring lands uninhabitable; even if the disturbance of that beneficial system of ocean currents, which conveys part of the heat engendered within the tropics to the polar regions, and imparts refreshing coolness to the equatorial zone, had not alone sufficed to change many northern countries into a dreary waste. The more we are impressed with our dependence upon the physical laws which rule the universe, the deeper ought to be our gratitude to that Power which has so bountifully ordained them for the happiness of man.—*Hartwig.*

Labor and God's mercy bring riches.

Selected for "The Friend."

The Axe laid to the Root of the Old Corrupt Tree.

A DISTINCTION between the FAITH which is of MAN, and the FAITH which is of GOD: One whereof is the Faith of Zion, the other the Faith of Babylon: The one laying hold on Christ, as he is revealed the King of Life in Zion; the other lays hold on a Historical Relation of Christ, the Fame whereof hath sounded in Babylon.

There is a faith which is of man's self; and a faith which is the gift of God; or a power of believing, which is found in the nature of fallen man; and a power of believing, which is given from above. As there are two births, the first and the second, so they have each their faith; and each believes with his faith, and seems to lay hold on the same thing for life; and the contention about the inheritance will not be ended, till God determine it. Cain will sacrifice with his faith, and he believes he shall be accepted: if he had not believed so, he would not have been so angry when he found it otherwise; and the Cainish spirit in man, the vagabond from the life of God, which hath not a habitation in God, nor the eternal life of God abiding in him, is busy with the same faith at this day, and hath the same expectation from it as Cain had.

This is the root of the false religion; of the false hope; of the false peace; of the false joy; of the false rest; of the false comfort; of the false assurance; as the other is of the true. In this faith, which is of man, and in the improvement of it, stands all the knowledge, zeal, devotion, and worship of the world in general, and of the worldly part in every man in particular: but the true knowledge, the true zeal, the true devotion, the true worship, stand in the faith which is given of God, to them that are born of the immortal seed; which lives in God, and in which God liveth for ever.

Now it deeply concerns every man, to consider from which of these his knowledge, religion, and worship proceed, and in which of them they stand. For if they proceed from, and stand in, the faith which is of man, they cannot please God, nor conduce to the salvation of the soul. But though they may taste very pleasantly to man's palate now, and administer much hope and satisfaction to him at present, yet they will fail at the time of need; for, as Christ said concerning the righteousness of the Scribes and Pharisees, so may I concerning this faith; *Except your faith, with the works of it, exceeds that faith, and all the works of it (even to the uttermost improvement thereof) which is to be found in man's nature, it will never lead you to the kingdom of God, nor be able to give you any right to the inheritance of life.* For he that will inherit, must be the right heir, must have the faith of Abraham, the faith of Isaac; which springs up from the root of life in the seed; and this leads the seed into that spring of life (out of which it shot forth as a branch) which is the inheritance promised to the seed. And here is Christ, Alpha and Omega, in every particular soul where life is begun and perfected, running its course through time, back to that which was before the beginning.

Therefore observe, and consider well, what this faith which is of man's self can do; and how far it may go in the changing of man, and in producing a conformity of him to the letter of the Scriptures. And then consider where it is shut out, what it cannot do, what

change it cannot make, what it cannot conform to: that so the true distinction may be let into the mind, and not a foundation laid of so great a mistake in a matter of so great concernment.

1. A man may believe the history of the Scriptures; yea, and all the doctrines of them, so far as he can reach them with his understanding, with this faith which is of man. As by this faith a man can believe a history probably related to him; so by this faith he believes the histories of the Scriptures, which are more than probably related. As by this faith a man can receive doctrines of instruction out of philosophers' books; so by the same faith he may receive doctrines of instruction out of the Scriptures. Reading a relation of the fall of man, of the recovery by Christ, that there is no other way to life, &c., this faith can believe the relation of these things, as well as it can believe the relation of other things.

2. This being believed from the relation of the history of these things, it naturally sets all the powers of man at work (kindling the understanding, will, and affections), towards the avoiding of misery, and the attaining of happiness. What would not a man do to avoid perpetual extremity of misery on soul and body for ever, and to obtain a crown of everlasting blessedness? This boils the affections to an height, and sets the understanding on work to the utmost, to gather all the rules of scripture, and to practise all the duties and ordinances therein mentioned. What can the Scriptures propose to be believed, that he will not believe? What can it propose to be done, that he will not do? Must he pray? He will pray. Must he hear? He will hear. Must he read? He will read. Must he meditate? He will meditate. Must he deny himself, and all his own righteousness and duties, and hope only for salvation in the merits of Christ? He will seem to do that; and say, when he has done all he can, he is but an unprofitable servant. Does the scripture say he can do nothing without the Spirit? He will acknowledge that too, and hope he has the Spirit. God hath promised the Spirit to them that ask it; and he has asked long, and asks still, and therefore hopes he has it. Thus man, by a natural faith, grows up and spreads into a great tree, and is very confident and much pleased; not perceiving the defect in his root, and what all his growth here will come to.

3. This being done with much seriousness and industry, there must needs follow a great change in man: his understanding will be more and more enlightened; his will more and more conformed to that to which he thus gives himself up, and to which he thus bends himself with all his strength; his affections more and more weaned; he will find a kind of life and growth in this, according to his kind. Let a man's heart be in any kind of study or knowledge, applying himself strictly to it, he gathers understanding in his mind, and warmth in his affection: so it is also here. Yea, this being more excellent in itself, must needs produce a more excellent understanding, and a more excellent warmth, and have a greater power and influence upon the will.

4. Now, how easy is it for a man to mistake here, and call this the truth! First, he mistakes this for the true faith; and then he mistakes in applying to this all that which belongs to the true faith: and thus entering into

the spirit of error at first, he errs in the whole course of his religion, from the beginning to the end. He sees a change made by this; and this he accounts the true conversion and regeneration. This leads him to ask, seek, and pray; and this he accounts that praying, the true seeking, the true asking. This cleanness (after its kind) his understanding, will, and affections; and this he takes to be the true sanctification. The justification which is to the true believer, he also applies to his faith; and so he has a peace, a satisfaction, rest here, and a hope of happiness hereafter. Thus he receives what is already revealed, and he waits for what may be further revealed, which he can embrace and confide in, turning still upon this centre, and growing up from this root. And he that does not content himself in religion, falls short of the improvement of man's nature, and of the faith that grows there (which naturally leads all the powers of nature hither, and fixes them as he wishes it but dead). And now this man is, he is a believer; he is a worshipper of God; he is a Christian; he is an observer of the commands of Christ; when the overworld scourge comes, it shall not touch him; the judgments, plagues, threatenings, in Scriptures, belong not to him, but to the believers; to them that know not God, them that worship not God; to them that observe not the commands of Christ. Thus by his untempered mortar from his false faith, he has built up a wall against the rage of wrath; which wall will tumble down upon him when the wrath comes. The growth of this faith, and great spreading of it into this knowledge, zeal, and devotion, hath changed the nature of it all this while; but it is the same that it was at the beginning, as a power of nature in the first birth; and these fruits are but the fruits of the first tree, which is still alive under all this. This can never kill the principle out of which it grows; but feeds it more, and fattens it to the slaughter.

Thus far this faith can go: but then there is somewhat that is shut out of at the very first; there is somewhat this faith cannot receive, believe, or enter into. What is that? It is the life, the power, the inward part of the Spirit. Though it may seem to have unity with the scriptures in the letter; yet it can have unity with one scripture in the life; its nature is shut out of the nature of things there witnessed. As for instance, may have a literal knowledge of Christ, according as the scripture relates; of his birth, preaching, miracles, death, resurrection, ascension, intercession, &c. Yea, but the things spoken of it knoweth not. The nature of Christ (which is the Christ) is hidden from that eye. So it may have a literal knowledge of the blood of Christ, and of justification; but the life of the blood which livingly justifies that birth cannot feel; but can only talk of according to the relation it reads in the scripture. So it may have a literal knowledge of sanctification; but the thing that sanctifies it cannot receive into itself. So for redemption, peace, joy, hope, love, &c., it may enter into the outward part of all these; but the inward part, the life, the spirit of them, is shut out of, and cannot touch or come near; but out can it witness that change which is made and known here. And here is the great contention in the world between these two births: the one contending for its knowledge in a

er, and the other contending for its know-
in the life; the one setting up its faith
the natural part, calling it spiritual; and
another, which has felt the stroke of God
in this (and thereby come to know the
renewal), setting up the faith of the true
; which faith hath a different beginning,
a different growth from the other, and
be welcomed into the land and kingdom
; when the other will be manifested to
at the birth of the bond woman, and be
st forth with its mother to seek their
d abroad; for the seed of the bond woman
to inherit with Isaac, the seed of pro-

test. *What then is that faith which is the
of God? And which is distinct from this?*
is. It is that power of believing which
ngs out of the seed of eternal life; and
ens the heart, not with notions of know-
s, but with the powers of life. The other
is drawn out of man's nature, by con-
ations which affect the natural part, and
pt alive by natural exercises of reading,
ing, praying, studying, meditating in life;
ut this springs out of a seed of life
n, and grows up in the life of that seed,
eds on nothing but the flesh and blood
rist; in which is the living virtue, and
ort nourishment of that which is imal.
This faith, at its first entrance, strikes
part dead in which the other faith id
; and by its growth perfects that death,
raish up a life which is of another na-
ture ever entered into the heart of man
nceive. And by the death of this part
e, we come to know and enjoy life; and
o life we have received, know, and enjoy
me to see that which other men call life
hich we ourselves were apt to call life
rly) to be but death. And from this
nowledge, we give a true testimony to
orld of what we have seen and felt; but
an receiver our testimony. It grieves
the heart; to see men set up a perishing
as the way to life; and our bowels are
ndly kindled, when we behold an hon-
al and simplicity betrayed; and in tender
do we warn men of the pit, into which
are generally running so fast; though
reward us with hatred for our good will,
become our bitter enemies because we tell
the truth, and the most necessary truth
them to know; which they can bear
er in plain words, nor yet in parables.
be not rough and angry; but meekly wait
and this following parable aright, and it
pen into life. The parable is briefly this:
at which sold the birth-right, seeks the
right with tears and great pains; but
never recover it. But there is one which
ead, which hath the promise, which stirs
which seeks not till he is raised by the
of the Father's life, and then he wrestles
the Father, prevails, and gets the bless-
om him. Therefore know that part
is up first, and is so busy in the willing
the running, and makes such a noise
duties, and ordinances, and graces, to
down the life which it hath slain: and
that seed of life which is the heir, which
nderneath all this, and must remain slain
his lives: but if ever ye hear the voice
Son of God, this will live, and the other
And happy for ever will he be who
s this! But misery will be his portion,
cannot witness a thorough change by
mighty power of the living God, but

hath only painted the old nature and sepul-
chre, but never knew the old bottle broken,
and a new one formed, which alone is able to
receive and retain the new wine of the king-
dom; whereas the other, Pharisee-like, can
only receive a relation of the letter concern-
ing the kingdom.

The Burned Money of Chicago.

In consequence of the destruction of a large
number of the so-called fire proof safes at
Chicago, during the great conflagration there
on the 10th month last, a large amount of
paper money and other valuables were reduced
to ashes. The ashes, however, of the United
States currency if undisturbed, retain distinct
evidences of the handwriting of the signers,
the dates, and the engraving by which its
value can be determined, and even the note
identified.

The charred remains contained in the safes
or boxes containing the money when forward-
ed to Washington are placed in the hands of
employees of the Treasury Department of
the Government, who are each provided with
a magnifying glass, and several small, thin,
sharp steel instruments with flat blades for
separating the notes. Those notes which are
so far consumed as to crumble at the slightest
touch, are when possible pasted on sheets of
tissue paper. A recent visitor remarks: "The
contents of a safe which was in Adams Ex-
press Company's building, in Chicago, were
being counted when I went in. There were
national bank notes, United States Treasury
bonds, nickels, railroad bonds, and postage-
stamps upon the tables. All these must be
sorted and arranged, counted, and the value
estimated. Such work as this, as may easily
be believed, is no light task. The notes are
baked to a crisp, and are perfectly black, and
the idea of separating them and deciphering
the engraving on their faces seems at first
utterly absurd. Some of the packages are in
tolerable order; in other cases, three or four
hundred notes, which have been carelessly
thrown into a box, are so melted together
that it seems impossible to separate them; in
others, bonds have been tied up in a roll for
convenience sake, and are in the worst
condition possible to be separated.

With national bank notes, the name of the
State, the bank, and the denomination of the
note must be deciphered, that the money may
be returned to the banks which issued it for
redemption. The counter certifies to the
number of packages, of pieces, denomination,
and the total amount. In the case of the
Treasury notes, the counter furnishes a sched-
ule for the office of the Secretary of the Treas-
ury, another for the Treasurer, and a third
for the Register. These schedules are care-
fully looked over in these bureaus, signed, and
afterward the notes are burned in the pres-
ence of representatives of the three officers
above named. This work is only complicated,
but imposes great responsibility upon those
having it to do.

There is a considerable degree of ceremony
attending upon the burning of the notes, al-
though they have already been canceled and
reduced to the value of waste-paper. The
representatives of the officers named and the
agent of the bank whose notes are to be
burned go down into the cellar of the Treas-
ury building, into a small room resembling a
prison-cell more than any thing else. The

furnace resembles an oven, and is set in the
wall. It has an iron door, which is fastened
with three padlocks. Each lock will open
only to its own key. The gentlemen acting
as representatives of the three officers before-
mentioned have each a key, and each in turn
unlocks the padlock which his key fits. The
boxes containing the money are opened by
the Secretary's representative; the messenger
in attendance sweeps back the ashes of yester-
day's burning, piles shavings in the furnaces,
throws in a package of notes as a first offer-
ing, closes the furnace door, and the fire be-
gins to roar. The door is opened again, and
package after package of notes is thrown in;
mutilated notes, defaced and time-worn notes,
and the charred relics of the Chicago disaster
are tossed in.

After all the money is thrown in, the door
of the furnace is locked with the same cere-
mony with which it was unlocked, and the
money is left to burn alone."

For "The Friend."

A Call to Faithfulness.

It is doubtless occasion of *deep* exercise, of
unfeigned lamentation, with many up and
down in our Society, to witness the numerous
departures from primitive simplicity and plain-
ness amongst us, not only in dress and lan-
guage, and the extent and furniture of our
dwellings, but also in many cases in our public
religious exercises, entered upon and per-
formed, it is believed, in the will and wisdom
of man, whereby they are deprived of the
heavenly savor and influence; the holy uncon-
tention which has ever characterized and sweet-
ened the genuine ministry and teachings of
Truth.

We seem by many of the unfavorable tokens
amongst us, in great danger of going back to
"the weak and beggarly elements;" against
which we profess to be bearing testimony,
even while many are giving countenance to a
reliance upon them, and practically deny-
ing the faith of the gospel; leaning to our own
understandings in religious labors, both in
ministry and teaching, and mingling with
those whose profession and practice are dif-
ferent from ours. Thus a creaturely boldness
and forwardness are begotten and fostered,
often bringing forth extended declamation in
our meetings for worship and discipline, in-
stead of humble ministry and teachings from
the great Head of the Church, through his
prepared and qualified instruments, whose
care is, not to move *before* the appointed time,
nor to extend their ministry or teaching *beyond*
the evident source of divine life and au-
thority.

When we lose our faith in the duty of silent
waiting and worship, and in the gift of the
Holy Spirit in the work of the ministry as an
indispensable qualification, not only to be ex-
perienced in the beginnings, but renewed upon
every succeeding religious exercise, we may
well disclaim any title to the name we bear;
yea, and we should do so in justice to our-
selves, and the truth professed by Friends,
lest we incur the displeasure pronounced
upon hypocrisy, and be the means of trouble
and concern to the faithful, as well as of stum-
bling to honest inquirers after truth.

Let such as give evidence of departure
from our faith, and yet are permitted to hold
high positions in the church, be tenderly and
faithfully admonished. As there is a general
manifestation of uneasiness and concern on

this account, we can hardly doubt that we should soon behold a *marked* difference in the character of our meetings, ministry and teachings, now so often burdensome to a goodly number amongst us; leading as they do away from a humble dependence upon the call, teachings and renewings of the Holy Ghost, into creaturely confidence, exaltation and activity.

O, for more of the faith and faithfulness which would unite us again in the one bond of Christian fellowship and labor, the world over; and without which there will ever be discord and disunity! O, for more of that honesty, one with another, (where admonition is more needed than adulation) which fidelity to the truth *does require* of us, in order to be helpful one unto another, and thus to the body of which we are members; enabling us to move on, in the service and fellowship of Truth, to its honor and our own unspeakeable enjoyment and peace, as *one united household* of living, saving faith, having but *one end* in view, even the glory and honor of God, rather than the exaltation and glory of self!

Sixth mo. 29th, 1871.

The Fer-de-lance of the West Indies.

We were, of course, anxious to obtain at St. Lucia, specimens of * * the Fer-de-lance, or rat-tailed snake, which is the pest of this island, as well as of the neighboring island of Martinique. It occurs also in Guadalupe. In Great Martinique—so the French say—it is dangerous to travel through certain woodlands, on account of the Fer-de-lance, who lies along a bough, and strikes, without provocation, at horse or man. I suspect this statement, however to be an exaggeration. These Fer-de-lances are a great pest in St. Lucia. Dr. Davy says that he was told by the lieutenant governor that as many as thirty rattailed snakes were killed in clearing a piece of land, of no great extent, near Government House. I can well believe this, for about the same number were killed only two years ago in clearing, probably the same piece of ground, which is infested with that creeping pest of the West Indies, the wild guava bush, from which guava jelly is made. The present lieutenant governor has offered a small reward for the head of every Fer-de-lance killed; and the number brought in, in the first month, was so large that I do not like to quote it merely from memory. Certainly it was high time to make a crusade against these unwelcome denizens. Dr. Davy, judging from a government report, says that nineteen persons were killed by them in one small parish in the year 1849; and the death, though by no means certain, is, when it befalls, a hideous death enough.

Strangely enough, this snake, so fatal to man, has no power against another West Indian snake, almost equally common,—namely, the Cribo. This brave animal, closely connected with our common water-snake, is perfectly harmless, and a welcome guest in West Indian houses, because he clears them of rats. He is some six or eight feet long, black, with more or less bright yellow about the tail and under the stomach. He not only faces the Fer-de-lance, which is often as big as he, but kills and eats him. It was but last year, I think, that the population of Carénage turned out to see a fight in a tree between a Cribo and a Fer-de-lance of about equal size,

which after a struggle, ended in the Cribo swallowing the Fer-de-lance, head foremost.—*Kingsley's West Indies.*

From The "British Friend."

Why Reject Robert? Barclay's Apology?

When Barclay's *Apology* was first put into my hand, I was a member of the Congregational body, preparing myself, aided by a "theological teacher," to be a missionary to the islanders of the South Seas. I was zealous with a longing desire for usefulness in my day, and was willing to sacrifice anything in my possession to carry out the wish of my life. At that time, though favored with a truth-loving and consistent mother, a member of the Society of Friends, I regarded the Friends as a people waning and passing away. Their tenets I considered as manifestly unscriptural, and lamented that one so near and dear to me as my loved parent should be so far separated, as I believed she was, from "orthodox Christianity."

One evening, when about to go to my study, she handed me an old dark-covered book, and expressed her desire that I should read it, particularly Barclay's proposition concerning the ministry. On reaching my teacher's house, I asked him if he had ever seen the book. He replied he had, and that it had been refuted years ago. "This at the time I took for granted; but the more I read the more my mind became opened, and soon I felt my position was unsound,—my faith in the system with which I was identified became shaken. I resolved to read the "refutation;" but I have been unable to find it, or any record of it. The more I read of the *Apology*, the more I hungered for a better comprehension of the truth so explicitly put forth by Barclay. I longed for a full realization of a true spiritual life apart from mere types and shadows.

Convinced that Barclay was right, though not yet enjoying the spiritual state of which he had written, I withdrew from the Congregationalists, and sought the fellowship of Friends, amongst whom now are my dearest ties, amongst whom I have formed the sweetest fellowship, and for whom are the most precious offerings of my love, with them I desire ever to share the joys and sorrows peculiar to those only who have committed unto them the treasures of the kingdom.

Though I had accepted in my understanding the testimony of Barclay, believing it in my heart to be the truth; yet I felt a want of clearness in my efforts to lay it before my old associates. This was often a cause of grief to me, until I had learned the extent to which man can teach, and that the Spirit of Truth alone can beget in the truth. To me Barclay had been as the law to Paul, "just—and good," the "schoolmaster" to lead me to a higher, and more efficient Teacher. To me it has been a matter of surprise to find so many professing the principles of Friends, who know so little about this unanswerable exposition of the doctrines they are supposed to hold. Many in Sydney and Brisbane, who have been strangers to the belief of Friends, have lately admitted its inestimable worth. So much so, that every copy to be had from booksellers has been purchased; and had it not been for the late edition printed by W. Irwin, of which one hundred copies were obtained, many an opportunity would have been lost to

give to sincere inquirers the privilege of reading for themselves. Dr. Charles Meyn, whose memory is dear to many in Sydney, is in my hearing, shortly before his death, "I have been favored to read that book when young, my labor would have been in a different sphere." Reject Barclay!—no, dear Friend, you cannot do this and be friends of the True; Reject his *Apology* if you will; but the mind of generations to come will wail at your want of discernment, and this powerful and unchanging declaration of your faith, which is one of the noblest of the treasures you possess, will last when the present theological system of what are called churches will have passed as the morning mist.

My love is to all who suffer for and for Christ, who is essentially the Truth.

ALFRED ALLEN
Friends' Farm, Mooloolah River, Queensland.

Selected for "The Friend"

A Plain Dress and the Plain Language.

There are many who have experienced that a plain dress and the plain language proved as a hedge about them, contribut in no small degree to their preservation from evil. Irksome as the parental restraint these particulars has been at the time to unmortified will, years of experience in the teachings of Divine Grace, have changed the whole course of feeling in the matter, raised a tribute of gratitude to those who would not yield to the craving of the natural mind, but steadfastly stood their ground against indulgence in gay and fashionable attire and address. Many have had occasion to rise up and call those blessed, who curbed their wayward inclinations.

It is not unusual to find these testimonies designated as small matters; and we have disposition to magnify them beyond their proper importance. But the Bible assures in several places, that they are not too slight to claim the notice, and to call forth the commands of the Most High, through his servants; and we have signal proofs of his displeasure against those who decked themselves in ornamental apparel. Nothing *small* which the Almighty ordains; as we disregard the expression of his will, compliance in greater things will not be likely to meet with acceptance. The simple seemingly unimportant injunction to "Put off thy shoes from off thy feet," from the same source as the command to deliver the Lord's chosen people out of Egypt, bondage, and equally obligatory; and, as Moses presumed to disregard it, there is probability he would ever have been honored as the servant of the Most High, to stand awed before the proud despots of the earth; and to become the mighty deliverer of Israel. It is not for finite reason to presume to be against those things, and because it has pleased our Heavenly Father to reveal the truths of christian redemption, to diminish contrast with these, and affect to despise, ridicule his commands in minor affairs. To cast opprobrium on the Holy Scriptures, their inspired writers, and are in danger of being found "fighters against God."

Those members of our religious Society who have been most devoted to do the Lord's will, have found the cross in dress and language, *one that must be borne*, if they had the hope of wearing the crown; and *being fa*

his, has not only yielded them enduring peace, but opened the way for further disclosures of their Lord's will, and He has clothed us with strength, as a fruit of their obedience, by which they have been enabled to run the holy stability and joy the further ways of requiring.—Thomas Evans.

THE FRIEND.

SECOND MONTH 3, 1872.

In a recent number of the current volume of "The Friend," there is an account of the revision to Friends' principles of a young man at a college in this country by the author of Barclay's Apology, and in this number will be found, taken from the "British Friend," a narrative of a similar conviction by the same means, given by one residing on the opposite side of the globe. We believe that, excepting the holy Scriptures themselves, no other printed work has so many means of convincing so many of the mass of the gospel, as held by Friends, as Barclay's Apology. It has stood as the clearest exposition and the unrefuted demonstration of the true christian divinity, beloved in by the Society, for more than two hundred years; and by no one act has London Yearly Meeting more conclusively shown its regard for the primitive faith of Friends, than after having again and again sanctioned its work, printed it in various languages, and widely circulated it in Europe and America—refusing, at its last session, again to authorize its publication as a declaration of its religious principles.

It attacks upon the perspicuous statements, logical reasoning of the work itself have been futile, as is conspicuous in the modern attempts of Dr. Ash and R. Charlton; but its authority may be undermined among the members of a Yearly Meeting by its giving sanction to vague and unfounded doubts, insinuations of the work not being reli-

able to have had it recently given forth, as though it was something new, that the Scriptures are the only outward standard of doctrine recognized by the Society. This has always been declared by Friends, who from days of Fox, Penn and Barclay, have steadily maintained "That whatever any do according to the Spirit, which is contrary to the Scriptures, be accounted and reckoned the confusion of the devil." And so say all other christian professors. It is therefore necessary to know, how did those Friends, who were instruments in the Divine Hand to gather and establish the Society, understand the matters? That is, what doctrines did they live, preach and uniformly promulgate as being in accordance with the recorded truths of the gospel? Whatever they were, if they were received, professed and officially sanctioned by the Society, they were its formal creed, or, as it may be called, the creed of the Society; and no member, nor number of members a right, while voluntarily retaining membership in it, to alter, subvert or modify the creed or system of belief. Among all the writings setting forth or propagating that before us has been more esteemed than, or the precedence of Barclay's Apology, shows that it has heretofore been declared to do,

how completely Friends' principles are in harmony with the Scriptures.

The editor of the "British Friend," commenting on the marked dishonesty of the separatists of Manchester, England, in assuming the name of "Friend," for a periodical they have commenced there, says, "These seceders complain of Friends attempting to impose a creed upon their members. We maintain there is no constraint in the case; membership being purely voluntary, no one being compelled to continue in the communion any longer than is agreeable to himself. When an individual finds that the basis of the Society's bond of union is too narrow for him, he is at liberty to withdraw; he has broken the connection. But it ill becomes those to complain of being imposed on, who have perpetrated so gross an imposition, as palming off themselves and their organ as identified with the Society of Friends."

With these remarks we fully agree, but does it not apply with equal force to the party in the Society, which claims to be more evangelical than Friends? Not that the departures of the latter from the original and true faith of Friends are as gross and dangerous as the unitarian sentiments adopted by the separatists at Manchester, but are they not nevertheless departures which make those adopting them equally forfeit an honest title to the name of Friends? Other professors see this, notwithstanding the efforts made to gloss the defection over, and very many beside G. Dawson, mentioned in the article by J. Backhouse in our last number, have adopted the opinion that "The Quakers have forgotten the faith of their fathers; they run after other creeds." Even the very seceders at Manchester, instance this palpable dereliction of correct principle on the part of those who claim to be more evangelical than Friends have heretofore been, as validating their claim to the name of Friends, notwithstanding their deistical free-thinking. After frankly stating they "do not pretend to agree with them [Quakers] in every opinion," but that "they adopt that principle of theirs which recognizes man's ability to learn from, and accountability to God above," they say, "On this account we think ourselves fully entitled to the name of Friends as the Evangelical party, who consider the most characteristic ideas of the early Quakers to be dangerous exaggerations of truths, which they, in their desire to modify, practically destroy."

We would rejoice to see our respected contemporary expose in as clear and forcible language as that used relative to the Manchester seceders, the far more extensive departures, as respects the numbers embracing them, of the so-called, evangelical Friends. We think time was when the "British Friend" openly took the ground, "No Barclay no Friend," and we know of nothing said in its editorial columns that indicates change of opinion. Never did the cause of genuine Quakerism stand more in need of fearless, plain spoken advocates, who in the meekness of wisdom, will instruct and encourage all those who "ask for the old paths, where is the good way, and walk therein."

We have given considerable space to one article in this number, in order to present to our readers, unabridged, the clear and weighty description of the all-important distinction between "The faith which is of man and the

faith which is of God," drawn by that deeply experienced and devoted servant of Christ, Isaac Pennington. He speaks as a father in the church, who had obtained his knowledge of divine things from long continued teaching in the school of Christ, and dear-bought experience as a faithful witness for the truths of the gospel and the testimony of Jesus.

The early Friends found the professing christian church resting very generally in "The faith which is of man," and claiming to regard the Scriptures as the primary, all-sufficient rule of faith and practice; the possessors of that faith satisfied themselves with a knowledge of the work of salvation by Christ, obtained through their study, or the teaching of those who undertook to explain them. Hence those faithful ministers of the gospel, while fully believing in and inculcating the sacred truths recorded in the holy Scriptures, respecting the divinity, atonement and mediation of Christ Jesus, the Redeemer and Saviour of man, found themselves called in an especial manner to preach Christ within, an universal, saving Light, or measure of the Holy Spirit, given to all men to effect their salvation; and the indispensable necessity of experiencing it to bring forth that living, operative faith, which alone can enable the soul to rely savingly on Christ. It is against resting satisfied with "the faith which is of man," that Friends who adhere to the doctrines and testimonies of the gospel, as held by the Society from the beginning, are concerned to guard the members. It is the tendency to produce and build up the spurious, counterfeit faith, and thereby to obstruct the experience of that faith which is "of the operation of God," that constitutes one insuperable objection in their minds, to the "Bible classes," the "First day school teachings," the formal "Prayer Meetings," and the sensational "Revival Meetings," which are now engaging the attention of so many within the pale of the Society.

The doctrine of faith, and the distinction between the faith originating from, and perfected by man, through the working of his intellectual powers, and that which springs from and increases through the operation of the Holy Spirit on the soul, causing it to realize, in measure, "the substance of things hoped for," and "the evidence of things not seen" are of vital importance. May all be preserved from the fatal mistake of substituting the image for the reality!

SUMMARY OF EVENTS.

FOREIGN.—The Duke of Newcastle declares that the Congress of England distrust Gladstone because he is believed to favor the abolition of the House of Lords, and dandles with the dangerous principle of Sir Charles Dilke and other disturbers of the constitutional order of things.

A messenger left the Foreign Office on the 26th ult., with important dispatches for the British ambassador to France. These dispatches state definitely the attitude of the English government with regard to the commercial treaty between the two nations, and are intended to rectify misapprehensions which have prevailed in France.

The trustees of the Peabody fund have let five hundred houses, with planted grounds attached, at Brixton, to small families, in accordance with the directions of the founder of the fund.

A deputation from the Anti-Slavery Society waited on Lord Granville and made representations in regard to Spain's non-observance of the treaty for the suppression of the slave traffic. Granville, in reply, said it was undeniable that Spain had infringed the treaty, but the matter was too delicate for the interference of Eng-

land at the present time, Spain having an insurrection on her hands.

The Lord Mayor of London has called a public meeting in aid of an expedition for the relief of Dr. Livingston's African explorer.

On the 23d and 24th ult., a storm of violent wind and heavy rain prevailed over the British islands. The streams in the south of England overflowed their banks, and whole villages are deluged. The sea has been driven to its highest ebb in the Valley of the Severn, where the flood was wide-spread and devastation extensive. The Thames also rose above its banks, and the town of Windsor has suffered severely. The effects of the freshet were felt even in London. The upper portion of the city on the river was flooded, and the loss of property and interruption to business are enormous.

By the recent census, New Zealand is found to have a population of 256,338, exclusive of Aborigines. The males numbered 150,396, and the females 106,047.

The Alabama claims, and their consideration before the Geneva Board of Arbitration, are themes uppermost in the English journals.

London, 1st mo. 29th.—Consols, 92½. U. S. 5-20's of 1862, 92; of 1867, 93; ten-forties, five cents, 91½.

Liverpool.—Uplands cotton, 10½d; Orleans, 11d. Sales 20,000 bales.

A St. Petersburg dispatch of the 29th says: Intelligence has received here to-day of the total destruction yesterday, by an earthquake, of Schamachi, a town of Asiatic Russia, trans-Caucasia. From the few details received of this terrible disaster, it is learned that the shocks were protracted and that many lives were lost. A manifesto has been issued by the Count de Chambord to the French people. The Count claims the right divine, and says, "I shall never abdicate my claim to the throne of France; I shall never forsake the monarchical principles which I have preserved intact for forty years, and which are my last hope for France's greatness and liberty."

The Emperor of Germany has ordered the withdrawal of the German troops on condition that three millions of money are paid to the French into the Berlin treasury earlier than was previously stipulated.

The Bonapartists are very active in the army. They are distributing pamphlets urging the restoration of the Empire as the ending of all the woes of France. Copies have been found in the barracks and seized by the police.

Paris dispatch states that the Rothschilds and other eminent bankers, have proposed to the French government to advance the entire three thousand five hundred millions of francs, still required to make up the tobacco monopoly of the government, which now yields a revenue of 204 millions of francs yearly, shall be transferred to the parties making the advance for a period of thirty years.

On the assembling of the Spanish Cortes, it soon became manifest that the Ministry did not possess the confidence of a majority, they therefore relied upon the king and tendered their resignations. On considering the matter, the king refused to accept the resignations, and decided to dissolve the Cortes. When the decree for that purpose was read on the 26th ult., the House seemed to be taken by surprise, and the members were unable to conceal their indignation. Elections are ordered for 4th mo. 2d, and the new Cortes is convoked for the 24th of Fourth month.

In a session of the Cortes on the 25th, a member in the course of his speech on Cuban affairs, asserted that "It is quite time for Spain to cede Cuba to the United States." The sentiment called forth universal condemnation.

A census of Rome has just been taken, showing a total population of 244,000. Notwithstanding the disinclination of the Pope to leave Rome, his advisers are urging him to quit the city and establish the Holy See in some other locality. The new religion was named by the papal establishment, a name, which will oppose the dogma of papal infallibility.

The steamer America, plying between Rio and Montevideo, while on a trip from the latter place, on the night of 12th mo. 22d, took fire. The flames spread with great rapidity, and the vessel was soon burned to the water's edge. A large number of passengers were on board, of whom eighteen-seven lost their lives, being either burned to death or drowned.

The Empress Dowager of Brazil has freed all her personal slaves.

A St. Petersburg dispatch says: By direction of the Czar a decree has been issued, that by compulsory the use of the Russian language in the primary schools of Poland.

UNITED STATES.—The Senate Judiciary Committee has reported a new appointment bill reducing the number of Representatives in Congress from 283, as proposed in the House bill, to 250. The same voting majority has been attached on the memorials claiming the right of women to vote under the Fourteenth and Fifteenth amendments to the Constitution, and say the committee are unanimously of the opinion that said amendments do not confer the right of female suffrage, the power of the States to exclude women from voting being untouched by these amendments. The Senate, by a vote of 36 to 12, has adopted a joint resolution to adjourn on the 29th of Fifth mo. next.

Many speeches were made and various subjects discussed in both Houses of Congress, last week, but no important measure was finally resolved upon. Returns show that during the last quarter of 1871, 50,948 immigrants landed at New York, viz: 25,588 males and 25,360 females. A large portion of the immigrants were Germans.

The annual mortality report for the city of New York, shows the number of deaths in the year 1871 to be 26,399, or a decrease of 255 from the number in 1870. There were 61 homicides and 105 suicides.

The interments in Philadelphia, from the 20th to the 27th ult., numbered 500, including 177 deaths from small pox.

The Legislative Assembly of Utah having passed an act providing a Constitutional Convention, Governor Woods vetoed it on the grounds that the Territory had not sufficient population to constitute a State; that it was without Congressional warrant for this action, and that, before seeking admission to the Union, polygamy and other acts conflicting with the government and laws of the country should be abolished.

On the 29th ult., the U. S. Senate passed the appropriation bill as reported by the committee. The House of Representatives referred a bill granting belligerent rights to Cuba, to the Committee on Foreign Affairs. The proposition to adjourn on the 29th of Fifth month was carried by a majority of Ways and Means.

The Markets, &c.—The following were the quotations on the 29th ult. New York.—American gold, 109½ U. S. sixes, 118½; ditto, 1868, 112½; ditto, 10-40 5 per cents, 110½. Superfine flour, \$5.70 a \$6.20; finest brands, \$6.30 a \$10.75. No. 2 Milwaukee spring wheat, \$1.25 a \$1.37; amber, \$1.60 a 1.62; white, \$1.70 a 1.81; red wheat, \$1.65 a \$1.67; New yellow corn, 66 a 67½ cts.; western mixed, 68 a 70 cts. Oats, 52 a 56 cts. Lard, 94 a 95 cts. About 2,000 beef cattle were sold at the Avenue Drove-yard. Extra at 74 a 75 cts., a few choice 85 cts.; fair to good, 6 a 7 cts., and common 4 a 5½ cts. per lb. gross. Prime and extra sheep sold at 74 a 83 cts.; medium, 6 a 7 cts., and common 5 a 6 cts. per lb. gross.—siles 15,000 head. Corn fed hogs sold at \$2.25 a \$2.40 per 100 lbs. net. Chicago.—No. 2 spring wheat, 118. No. 2 corn, 41½ cts. Oats, 32 cts. No. 2 rye, 68 cts. No. 2 barley, 59 a 60 cts. Cincinnati.—Family flour, \$6.85 a 57. Red wheat, \$1.92 a 1.95. Corn, ear, 46 a 47 cts. 28 a 35 cts. per bushel. Edin'. Yellow corn, Pennsylvania red wheat, \$1.59 a \$1.61. Southern yellow corn, 67 cts.; white, 65 a 70 cts. Oats, 53 a 55 cts.

WESTTOWN BOARDING SCHOOL.

Wanted, a Teacher for the Boys' 2d Mathematical School. Application may be made to

J. Joseph Walton, 38 Walnut St.,
Chas. J. Allen, 304 Arch St.,
Geo. J. Stattergood, 413 Spruce St.

FRIENDS' BOOK STORE.

There have been recently reprinted editions of the following works, which are now for sale at No. 304 Arch Street.

Examples of Youthful Piety.
Barefoot on Church Government.

Usner's Letters.

Chas. J. Allen, 304 Arch St.

True Christian Baptism and Communion.

Concord Account of Friends, by T. Evans.

Journal of William Evans, 2d edition.

There are also on hand a supply of other approved writings of Friends.

FRIENDS' BOARDING SCHOOL FOR INDIVIDUAL CHILDREN, TENNESSEE, NEW YORK.

A suitable Friend and his wife are wanted to charge of this Institution, and manage the Farm attached to it. Application may be made to

Ebenezer Worth, Marshallton, Chester Co.,
Thomas Wistar, Fox Chase, P. O., Phillips
Mary, do, do, do, do, do, do, do, do, do,
Joseph Scattergood, 413 Spruce Street, do.

FRIENDS' ASYLUM FOR THE INSANE
Near Frankford, (Twenty-third Ward,) Philadelphia.

Physician and Superintendent.—JOSHUA H. WOOD.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

DIED, at the residence of Walter Newbold, Burton Co., N. J., on the 10th of Eleventh month, 1871, LETITIA WRIGHT, in the 71st year of her age, a teemed member of Mansfield Particular and U. S. Springfield Monthly Meeting of Friends.

—, on the morning of the 10th of Twelfth month, 1871, at her residence in Cedar Co., Iowa, ELLIEN wife of Samuel Armstrong, in the 20th year of her age, a teemed member of Mansfield Particular and U. S. Springfield Monthly Meeting of Friends. This young Friend was appear in the bloom of life and health, ten days before her decease; and although her sufferings were severe, she enabled to bear them with becoming patience and resignation, evincing to those about her, that her courage and support were in the wise Disposer of our lives. On the evening before her death she remarked to her dear companion, "Our prospects are very different what they were two or three weeks ago, and if I should be taken away at this time, I want the dear little friend brought up as they should be. If it was not for living with thee, and to help raise those dear babes, I would as soon be in another world, for I should be there. As one to look to for support in such a case as this." Her end drew near it was difficult for her to talk, and early in the morning she quietly passed away, without a struggle. So that her relatives and friends have a comforting hope, that her dear companion, MILDRED, will be with her on the 29th of Twelfth month, 1871, MARY ANNA, wife of John E. Carter, and daughter of Alfred Cole, in the 29th year of her age.

Unexpected removal of this dear young friend in the span of a year after her marriage, which she entered with as fair a prospect of happiness, her dear companion, MILDRED, has been, and ever will be, a constant witness of the uncertainty of all earthly things, and deeply impressed upon many minds the force of the injunction: "Be ye therefore ready also, for the Son of man cometh at an hour when ye think not." Naufrigid and unassuming, she seldom spoke of her various feelings, but ever faithful in the performance of her various duties; and her friends have the consolation believing that the great work of regeneration was fully carried forward, by attention to the impulse of the Divine Grace, and that, through the mercy and mercy of our Heavenly Father, she had been one of those whom our Saviour went before to prepare for the Kingdom of Heaven. She was a member of Mansfield, at Middleton, Columbiana Co., Ohio, of 20th of Tenth mo. 1871, ABIGAIL ALLMAN, aged years and 7 months, a member of Middleton Mo. and Particular Meeting.

—, on the 9th of First month, 1872, at Middleton, Columbiana Co., Ohio, ONYAH, wife of Levi Bonney, aged 80 years 6 months and 15 days, a member of Middleton Monthly and Particular Meeting.

—, on the 9th of First month, 1872, at the residence of her husband, near Haddonfield, N. J., RACHAEL wife of John H. Haddonfield Monthly and Particular Meeting. Her close was calm and peaceful, and she humbly trust her spirit has been gathered into everlasting rest and peace.

—, on the 10th of First month, 1872, at Haddonfield, near Haddonfield, N. J., ANN EVANS, a teemed member of Mansfield Particular and U. S. Springfield Monthly and Particular Meeting, in the 75th year of her age. He was of a meek and humble disposition, not devoid of great things; he was frequently heard supplicating our heavenly Father for mercy, which we doubtless was granted him. He was a devoted member of the Meeting, and gave the consoling belief he has permitted, through mercy, to enter into that happy rest prepared for the righteous.

WILLIAM H. PILE, PRINTER,

ages, when paid quarterly in advance, five cents.

For "The Friend"

The Lofoden Islands.

These islands have been made the subject of an interesting article by one of the correspondents of *Frazer's Magazine*, who visited them in last summer. They are thus noticed in *Pinnett's Gazetteer*. "Lofoden, a group of lands off the N. W. coast of Norway; between lat. 67° 3' and 69° 30' N., and lon. 12° E. 16' E., and stretching from S. W. to N. E. but 175 miles. The largest are Andøen, Vaagøen, Hindøen, E. and W. Vaagøe, and Flakstøe. They have almost all bold, precipitous, rugged and deeply indented coasts, and an elevated and very sterile interior, several of them containing mountains, which, though not very lofty are covered with perpetual snow. The coasts only of the islands are inhabited, and contain some tracts under cultivation as the rigor and uncertainty of the climate will admit; but the chief value of the whole group is derived from the immense shoals of cod and herring which frequent them, and the extensive and valuable fisheries which are consequently carried on during the proper seasons. In ordinary years, but 3,000 boats, each manned by five hands, and 3,000 in all, are employed; and the produce in cod is about 9,000 tons dried fish, 200 barrels of oil, and 6,000 barrels cod roe. The principal cod-fishery ends in April; but the herring fishery continues, and furnishes an important branch of national revenue. The permanent population about 4,000. The islands are exposed to severe storms from the north, and violent currents set in between them."

The writer in *Frazer* says: "Only within the last few years has the patient survey of the Norwegian Admiralty presented us with a minute and exact chart of the coast, and the outline may now be considered as accurately ascertained. But with the interior of the islands it is not so; they consist of inaccessible mountains, dreary morasses, and impenetrable bogs. The Lofoden islander prizes the interior, for it feeds and enriches him; the coast is of rich pasture which smiles along it, and he pastures his cattle; but the land which lies behind these is an unknown wilderness to him; if he penetrates it, it is to destroy the plants and the eagles that snap up stray lambs, or

to seek some idle kid that has strayed beyond the flock. Hence it is very difficult to find names for the peaks that bristle on the horizon, or tower above the valleys; in many cases they have no names, in many more these names have found their way into no printed maps."

The islands, however, are not without a certain picturesqueness and beauty, as will be shown in the following extracts:

"If the traveller visits the islands in summer, and makes the passage across the Vest Fjord at midnight, as he is almost sure to do, the scene, provided the air be clear and dry, will be gorgeous. In the weird Arctic midland, with a calm sea shimmering before the bows, and all things clothed in that cold yellow lustre, deepening to amber and gold behind the great blue mountains, which is so strange a characteristic of the sun at midnight, the scene is wonderfully impressive. As the steamer glides on, making for Balstad on the south-west corner of Vest Vaagøe, Flakstøe and Moskenesøe lie somewhat to our left; and perchance if the eye is very keen, far away in the same direction it may detect the little solitary rock of Vaero, and still farther Rost itself, our *ultima Thule*. The southern range of the Lofodens has been compared to a vertebrated skeleton, and the simile is well chosen; for the isles taper off to a minute tail, and the channels that run between them are so narrow and fit the outline so exactly that they appear like joints. Seen from the Vest Fjord the whole looks like one vast land undivided. Higher and higher on the primrose-colored sky, the dark peaks rise as we approach our haven. And now the hills of Moskenesøe assume definite shape; the two central points rising side by side, are Gultind and Reinolind, the former being the southern one. The mountains of Moskenesøe are not very lofty, but the island is very inaccessible, the shores being so steep and the outline so indented by the sea, that it is necessary to take a boat from haven to haven; one cannot go by land. The highest mountain of Flakstøe, the precipitous Napstine, is on the northern extremity of that island, and hidden from us by the projecting promontories of Vaagøe; but the lofty hills very slightly to our left, belong to this island. Even here we speak, we glide between half-submerged rocks and rounded islets crowded with seaweeds, into the bay of Balstad, and the Lofodens are around us. The hour is that one of glamour in these arctic summers when the day is yet but a few hours old, and the golden sheen of midnight has given way to the brightness of sunrise. Above our heads rises the mountain Skotlind, and we perceive how strange is the land we have arrived in; no longer the rounded hills of the mainland, no more any conventional mountain forms or shapes in any wise familiar. Skotlind soars into the clouds one vast cliff of dark rock split across now and then with a sharp crevasse,

above which rises another wall of cliff, and so on to the summit, where thin spires and sharp pinnacles clean cut against the sky, complete the mighty peak. This is characteristic of all the mountains of this southern and grandest range; especially unique and perplexing is the thin look of the extreme summit; apparently the ridge is as sharp and narrow as a notched razor; one can see no marks of the receding of the edge. All these points are inaccessible on one side; from the interior it might be possible to reach the top of some of them, and sublime would be the view so gained. At present, this chilly July morning, Skotlind rises a wall of darkest indigo blue between the sun and our faces; about its horns the heavy tissue of clouds is smitten and shot through with the brilliant white light of sunrise, and the fainter wreaths of vapor, delicately tinged with rose-color and orange, pause before they rise and flee away over the awakened heavens. As for Balstad itself, it is a cluster of wooden houses painted grey and green, and some deeply stained with red ochre, scattered about on a frightfully rugged platform of rocks, so uneven that I cannot think a square yard of earth or tolerably flat rock could be found anywhere. Some of the houses are built on the outlying islets, treacherous low reefs, on which the gray sea creeps and shows his ominous white teeth. Such places seem to promise certain destruction in the first storm, but the cottages survive, and the bay certainly is very sheltered.

"Leaving Balstad we pursue our voyage through an infinite multitude of sterile rocks, and under fine stormy crags till we reach the mouth of the broad Gimsøestrom, the gulf that divides us from Ost Vaagøe. Here the colossal precipices of Vaagekallen come into sight, the sublimest though not the loftiest of all the Lofoden mountains. This stupendous mass occupies the south-west extremity of Ost Vaagøe, and is almost always shrouded in cloud; the snow lies in patches about its ravines, but most of its summit is too sheer for snow to rest on or any herb to grow. Vaagekallen is the beacon towards which the fisher, laden with finny spoils, wearily steers at full of day; for under its spurs, or a group of islets in the sound, is built the village of Hennigsvær, the most important of all the fishing stations, and a flourishing little place. It has a lighthouse also, the largest on this coast. A little further on we pass the quaint church of Vaagøe, Kirkevaag, as the inhabitants call it, built like all northern churches of wood, and painted dark brown. Here we find the only track of historic importance that Lofoden can boast, I believe, for it was from Kirkevaag that that enthusiast Hans Egede, led by christian love for the souls of men, went, in 1721, to preach the gospel to the desolate savages of Greenland. We pass on through crowds of eider-ducks and terns and cormorants to Srolvær, a prominent station on Ost Vaagøe. The entrance to this harbor

is through a maze of black, cruel rocks, round which the sea tumbles and glides ominously; at last, after an intricate half-hour of steering, through passages where no path seemed possible, a large village is reached, built like a lacustrine town, on piles above the water. Srolver is thrown about on a heap of islets around a promontory, here a house and there a house, on a site even wilder than that of Balstad. The mountain rising sheer behind it is the Srolver Fjeld. Leaving Srolver the Ostnas Fjord, gloomy, narrow and terrible, looms on our left; enormous mountains hem it in. On the west side, eminent above the rest, is a peak called, I believe, the Jomfrutind; it is a sombre and sinister water-glen on whose shores it would be a dismal thing to live.

But now, straight before us, we perceive three islands, not belonging to the general range, but standing at right angles to it, running far out into the Vest Fjord; and between them we see glimpses of the mainland, now not very distant. These islands are circular, and not indented by the sea; but a shelf of rock, covered with rough pasturage, runs round each of them, and then a mountain soars suddenly into the skies. Ster Molla, the one largest and nearest to Ost Vaagro, is a double peak of quite exceptional grandeur; and Little Molla and Skraavon, though less lofty, are scarcely tamer in their forms. It is difficult to form a due conception of this peculiarly masculine scenery; there is nothing pretty or charming about it, but it is extremely impressive. Compared with the rest of Norwegian sea-scenery, with that south of the Arctic Circle especially, it differs from it as an American backwoodsman differs from a London counter-jumper. I would here protest a little, in wonder, at the compliments paid to the coast scenery of South and Central Norway; saving that terrible sound which runs between Bremangerland and the main, under the awful cliffs of Hornelton, there is nothing from Torghatten to the Naze, to call forth the slightest enthusiasm. There is much finer country in the Hebrides. To return to Little Molla. This island and its congeners are all inhabited, and not two hours sail from Srolver. I think this little group would be well worth investigation. They have just that amount of geographical independence which often suffices to produce a difference in flora and fauna. Between the two Mollas we steam, noticing the rough setters on the shores, the rows of cod fish flapping in the wind, and the cauldrons of stewing livers, faintly odorous from the steamer's deck. The northern passage is too narrow to admit the steamer, but turning north as we leave the Moldrom, we enter the celebrated Raftsund.

(To be continued.)

Owing to an oversight, the following did not come in its proper place.

From the Letters and Papers of John Barclay.

(Continued from page 181.)

The mind of John Barclay seemed often, about this period, turned to the subject of his apparel and outward appearance; being the legitimate result of that inward cleansing of the cup and the platter that the *outside may become clean also*. It is no wonder that a mind constituted as his was, and, like that of Lydia of old, so susceptible to the gentle impressions and illuminations of the light of Christ Jesus, that makes manifest the things

that are reprobable, should feel itself straitened in respect to a subject that has grown to be one of the greatest idols of our day—dress.

It is useless to say that religion has nothing to do with, or does not, when submitted to, regulate our outward appearance and example before men, when it is so obviously a matter in which the devil, through the pride and vanity and the love of conformity and approbation of the fallen and unrenewed heart, can and does so covetly work to enslave to the fashions and idolatry of the world, and lead from the ornament of a meek and quiet spirit which in the sight of God is of great price. That which the holy Prophet and Apostles of our Lord bore an unequivocal testimony against; nay, which that all-wise Lawgiver himself has directly alluded to, to prove, must of necessity claim a place in that christianity which He came to introduce and to establish; and by which we are bound to regulate our practice and our lives. "Be not conformed to this world," (Rom. xii. 2) is a clear testimony. So are also those of Paul and Peter: (1 Tim. ii. 9, 10, and 1 Peter iii. 3, 4,) and no less definite is that of the former to Titus (ii. 11, 12) viz., "For the grace of God that bringeth salvation hath appeared to all men, teaching us that *denying ungodliness and worldly lusts*," &c. These worldly lusts—"the lust of the flesh, the lust of the eye, and the pride of life"—our Saviour reprehends as being *not* of the Father, but of the world which passeth away. Now is not dress, with "the outward adorning," a significant part of "the lust of the flesh," and of "the lust of the eye," and no less of "the pride of life," which the dear Redeemer notices to condemn? Let us beware of any sowing to the flesh, whose harvest is corruption; or any complicity with the excessive attachment and idolatry of the worldling in this respect; remembering that where the treasure is, there will the heart be also; and that "God is not mocked," and "whatsoever a man soweth that shall he also reap."

The constantly operating influence to vanity and pride, which those who indulge in this excess exert over others, not to speak of its weakening effect upon those who set the example, we believe is gravely calculated to, and often does intercept Truth's heavenly beam, which otherwise might, through the mercy of God in Christ Jesus, infuse light, and life, and vigor into the soul. That it has been fruitful for evil, and though reported a small thing in itself, has much retarded the growth and pace of not a few, who had they not quenched the Spirit in this respect, might have become the humble, self-denying, and dedicated servants and handmaidens of their Father in heaven, there is no doubt.

One instance just now occurs, which we remember lately to have somewhere seen recorded, viz: A young woman, not a member of this religious Society, whose affections had been strongly wedded to the world, was brought under such deep conviction that she could neither eat nor sleep, but day and night wept and prayed. In this state of brokenness and contrition, she made some sacrifices of things less dear to her than the one called for, vainly hoping thus to obtain peace of mind; like King Saul being willing to slay the *vile* and *refuse*, if but *the best of the sheep and the oxen* could be retained. But in her case as in his, "the bleating of the sheep and the lowing of the oxen"—the unyielded whole burnt-

offering and sacrifice of the will in that called for—witnessed against her; and found herself cramped and balked, like to compassing a mountain in the wilderness as to be unable to go forward. Upon rati-
oning this to a friend who was deeply interested in her welfare, the latter questioned whether the Holy Spirit did not show wherein her sacrifice was defective? She replied that she had been impressed with conviction that *she must dress much* *plainer than she did*; and that she could receive *no blessing* until she could feel willing to do it. After intense agony of soul in the struggle give the idol called for up, she exclaimed cannot do it; I cannot do it." She was minded that there was no room in the narrow way for indulgence in these forbidden things which lust against, being contrary to Spirit; and that as no one can serve two masters, there must of necessity be a thorough giving up, if we expect to obtain peace of Him, who for our sakes, endured the odious despising of the shame, &c., thus setting an example that we should follow His steps.

It cannot be too much impressed, that the *requirement of our Lord* that gives importance to things, whether they seem in our significant or insignificant. We cannot per-
form any thing small that has a bearing upon our life and character; since such seem so much trifling in themselves, are often introduction to those which we judge the most important. The great disciplinary purpose of our Father in heaven is to subject the child and for this, He who knows all things, gave His dear Son a propitiatory sacrifice, and has a right to do what He will. His own, sometimes calls for one thing, and sometimes for another. That which is demanded may be comparable to a right hand or a right eye, or it may be as small as an artful dress. In the case before us, dress was long cherished idol of the heart and affected and hence here the All-seeing Reprover Saviour laid His repressing, restraining hand. And where, it may be queried, seeing the credible amount of time, and mind, and life and expense appropriated to this, for Christian professors, weak and paltry indulgence which began with sewing gleeves together as a covering for sin—where could the knowledge more discriminatingly work mortify, and to humble, and to teach denial, and taking up the cross to the end of this vain and wicked world?

The young woman alluded to, gave way to reasoning, and greatly wishing to come to a decision between God and the world, halted between two opinions; but allowing the latter to preponderate, finally said, "I know I shall make this sacrifice of dress; but I cannot do this—dreadful choice—preferring the salvation of her fellow worms before peace with her Creator. Thus quenching the Spirit, the abusing warnings and mercies, and still conviction that had in her case been remarkably manifested, they were now extinguished and withdrawn; leaving her in great darkness and still more a votary of fashion, and of the world, because she would not be wrought upon in the day of precious visitation, to refuse unto the Lord that which seems great a cost—the decoration of the perishable body.

Say not then that dress is nothing in the eyes of Him with whom we have to do that it comes not under the restraining

to church; neither is within the solemn positions of the cross of Christ Jesus whose religion we profess: even that of which Apostle Paul has left this impressive testimony, "God forbid that I should glory, save in the cross of our Lord Jesus Christ; by whom the world is crucified unto me, and I to the world."

How infinitely more wise and emulative the course pursued by John Barclay! He it is true, his fears, and conflicts, and tribulations; but as William Penn in his recommendations, having mentally placed quantities of time in the scales of eternity, finding they had no weight there, delicately but resolutely chose the path of eternal and whole-hearted dedication to God who had bought him, having respect to recompense of the reward reserved for him in the heavens.

This journal is resumed with some extracts from it on the subject under consideration.

516. November 23d.—At the present period interval of retirement and leisure, I am concerned to repeat an inquiry more than instituted before this time, whether I am not now called upon to declare and profess before men, the religious persuasion and principles which I most surely hold; and to that course of daily practice in conduct and conversation, of the reasonableness and fitness of which I have not any doubt. It appears to my view highly and imperatively necessary, that an internal change should precede an external one. I believe conversion is *that of the heart*; that pronoun must follow, not go before possession; that an outward show and appearance of piety, seriousness is hypocrisy and increased damnation, if not accompanied by the inward work of sanctification in the soul. Therefore, it is certain to my mind that the *invariable evidence of true religion having been shed and taken up its abode in us, will always be that we shall no longer conform ourselves to the world in its vanity and folly; and that, in dress, address and general conduct in every particular, we shall not be governed by worldly aims or opinions, but by the law written in our hearts.* How far then is this the case with me? How far can I assuredly say, that this change of heart is my experience? O! I feel that that I come short of what ought to be my practice; that though I have given up myself to serve the living God, even Him who has led me unto this day,—though I have withheld not some things which were required of me to give up to and forsake,—yet has not my heart fully, entirely, and without reserve, yielded *myself* all. O! there have been those days and tamperings with sin, those secret tempers, those concivances with the enemy, which the Lord abhors. What a total surrender of self does our pure and righteous God call for; what an abandonment of every thing evil does He expect from his followers; that a daily and hourly watchfulness and self-inspection is required of those, who would be heirs of a glorious mansion, where nothing more can enter! How very appropriately is written, 'Be ye holy, for I the Lord your God am a holy.'

516. November 27th.—I have been long with such trouble and difficulty about changing my dress, as well as adopting those other distinctions and testimonies which Friends use in dress and practice; and my anxiety respecting those things has been, lest I should take them

up without good ground, and without being clearly and indubitably sensible that these sacrifices are called for. Indeed, I have gone mourning on my way, day after day, and night after night. Perplexity and discouragement, darkness and distress, have at seasons clouded the horizon of the morning of my days; and mainly, because I knew not certainly the Divine will, as to these external observances, and as to many other sacrifices. But I think that this subject has been cleared up very satisfactorily to me this day, in much mercy, both by what I felt, and by what was delivered through a servant of the Lord, at meeting.

"1817.—O Lord! thou who knowest all things, the hearts of all men are open and bare in thy sight; thou canst not be deceived; thou lookest upon the heart; thy regard is to the thought and intent of it, and thy controversy and thy judgment only with the evil thereof. O Lord! no one but thyself fully knows, how fervently and frequently my soul doth ache of thee, that thou wouldst enable thy poor longing creature to step forward with faith and firmness in the way of thy requirements. O! be present with me on this troubled ocean; O! take me, I beseech thee, by the hand, saying, 'fear not.' and if it be thy gracious will, be pleased to guard and govern me day by day, and hour by hour; that so through thy sufficient and availing help, I may be made willing and able to become thy true disciple and servant,—to follow a crucified Redeemer, through the tossings and tempests of this troubled scene, to a glorious and an immortal inheritance.

(To be continued.)

For "The Friend."

Central Arabia.

(Continued from page 195.)

The general type of Arabia is that of a central table-land, surrounded by a desert ring, sandy to the south, west, and east, and stony to the north. This outlying circle is in its turn girt by a line of mountains, low and sterile for the most, but attaining in Yemen and Oman considerable height, breadth, and fertility, while beyond these a narrow rim of coast is bordered by the sea. The surface of the midmost table-land equals somewhat less than one-half of the entire Peninsula. If to this be added whatever spots of fertility belong to the outer circles, we shall find that Arabia contains about two-thirds of cultivated or at least of cultivable land, with a remaining third of irrecusable desert, chiefly to the south. Our author thus describes a spur of this desert which he was compelled to cross in going from the Djowf, to the central plateau:

"We were now traversing an immense ocean of loose reddish sand, unlimited to the eye, and heaped up in enormous ridges running parallel to each other from north to south, undulation after undulation, each swell two or three hundred feet in average height, with slant sides and rounded crests furrowed in every direction by the capricious gales of the desert. In the depths between the traveller finds himself as if were imprisoned in a suffocating sand-pit, hemmed in by burning walls on every side; while at other times, while laboring up the slope, he overlooks what seems a vast sea of fire, swelling under a heavy monsoon wind, and ruffled by a cross-blast into little red-hot waves. Neither shelter nor rest

for eye or limb amid torrents of light and heat poured from above on an answering glare reflected below. Add to this the weariness of long summer days of toiling—I might better say wading—through the loose and scorching soil, on drooping half-stupefied beasts, with few and interrupted hours of sleep at night, and no rest by day because no shelter, little to eat and less to drink, while the tepid and discolored water in the skins rapidly diminishes even more by evaporation than by use, and a vertical sun, such a sun, strikes blazing down till clothes, baggage, and housings all take the smell of burning, and scarce permit the touch. The boisterous gaiety of the Bedouins was soon expended, and scattered, one to front, another behind, each pursued his way in a silence only broken by the angry snarl of the camels when struck, as they often were, to improve their pace.

"Near sunset of the second day we came in sight of two lonely pyramidal peaks of dark granite, rising amid the sand-waves full in our way. 'Alalám-es-Sa'ád,' the people call them, that is, 'the signs of good luck,' because they indicate that about one-third of the distance from Be'er-Shekeek to Djebel Shomer has been passed. They stand out like islands, or rather like the rocks that start from the sea near the mouth of the Tagus, or like the Maldivian group in the midst of the deep Indian Ocean. Their roots must be in the rocky base over which this upper layer of sand is strewn like the sea-water over its bed; we shall afterwards meet with similar phenomena in other desert spots. Here the under stratum is evidently of granite, sometimes it is calcareous. As to the average depth of the sand, I should estimate it at about four hundred feet, but it may not unfrequently be much more; at least I have met with hollows of full six hundred feet in perpendicular descent.

"The further we advance the worse did the desert grow, more desolate, more hopeless in its barren waves; and at noon our hand broke up into a thorough 'sauve qui peut,' some had already exhausted their provisions, solid or liquid, and others were scarcely better furnished; every one goaded on his beast to reach the land of rest and safety. On a sudden my attention was called to two or three sparrows, twittering under a shrub by the wayside. They were the first birds we had met with in this desert, and indicated our approach to cultivation and life. I bethought me of tales heard in childhood, at a comfortable fireside, how some far-wandering sailors, Columbus and his crew, if my memory serves me right, after days and months of dreary ocean, welcomed a bird that, borne from some yet undiscovered coast, first settled on their mast. My comrade fell a crying for very joy.

"However we had yet a long course before us, and we ploughed on all that evening with scarce an hour's halt for a most scanty supper, and then all night up and down the undulating labyrinth, like men in an enchanter's circle, fated always to journey and never to advance.

"The morning broke on us still toiling amid the sands. By daylight we saw our straggling companions like black specks here and there, one far ahead on a yet vigorous dromedary, another in the rear, dismounted, and urging his fallen beast to rise by plunging a knife a good inch deep into its haunches, a third lagging in the extreme distance. Every one for himself and God for us all—so we quick-

ened our pace, looking anxiously before us for the hills of Djobbah, which could not now be distant. At noon we came in sight of them all at once, close on our right, wild and fantastic cliffs, rising sheer on the margin of the sand sea. We coasted them awhile, till at a turn the whole plain of Djobbah and its landscape opened on our view."

Djebel Shomer, the most northerly of the Central Arabian States, was governed by a wise and energetic ruler named Telal, who promoted commerce and kept in order the Bedouin or wandering tribes in his vicinity. His residence was at Ha'yel, a town of more than 20,000 inhabitants. Here W. G. Palgrave remained about six weeks, practising medicine and studying the character and history of the people. When the time for his departure came, Telal furnished him with a passport, of which the translation follows:

"In the name of God the Merciful, we, Telal-ebn-Rashed, to all dependent on Shomer who may see this, peace be with you and the mercy of God. Next, we inform you that the bearers of this paper are Selem-el-'Eys-Abou-Mahmood and his associate Barakât, physicians, seeking their livelihood by doctoring, with the help of God, and journeying under our protection, so let no one interfere with or annoy them, and peace be with you." Here followed the date.

After some delays and difficulties he finally reached the Nejed or highest central plateau, the seat of the Wahhâbee government, which is the strongest of the Arabian powers. The approach to Riad, the capital is thus described: "Before us stretched a wild open valley, and in its foreground, immediately below the pebbly slope on whose summit we stood, lay the capital, large and square, crowned by high towers and strong walls of defence, a mass of roofs and terraces, where overtopping all frowned the huge but irregular pile of Feysul's royal castle, and hard by it rose the scarcely less conspicuous palace, built and inhabited by his eldest son, Abd-Allah. Other edifices too of remarkable appearance broke here and there through the maze of grey roof tops, but their object and indwellers were yet to learn. All around for full three miles over the surrounding plain, but more especially to the west and south, waved a sea of palm-trees above green fields and well-watered gardens; while the singing droning sound of the water-wheels reached us even where we had halted, at a quarter of a mile or more from the nearest town-walls.

"We followed a path ending at the north-eastern portal, a wide and high entrance, with thick square towers on either side; several guardsmen armed with swords were seated in the passage. Abou-'Eysa [his guide] answered their challenge, and led us within the town. Here we found ourselves at first in a broad street, going straight to the palace; on each side were large houses, generally two stories high, wells for ablation, mosques of various dimensions, and a few fruit-trees planted here and there in the courtyards. At last we reached a great open square: its right side, the northern, consists of shops and warehouses; while the left is entirely absorbed by the huge abode of Nejdean royalty; in front of us, and consequently to the west, a long covered passage, upborne high on a clumsy colonnade, crossed the breadth of the square, and reached from the palace to the great mosque, which it thus joins directly with the

interior of the castle, and affords Feysul a private and unseen passage at will from his own apartments to his official post at the Friday prayers, without exposing him on his way to vulgar curiosity, or perhaps to the dangers of treachery. For the fate of his father and of his great-uncle, his predecessors on the throne, and each of them pierced by the dagger of an assassin during public worship, has rendered Feysul very timid on this score, though not at prayer-time only. Behind this colonnade, other shops and warehouses make up the end of the square, or more properly parallelogram; its total length is about two hundred paces, by rather more than half the same width. In the midst of this space, and under the far-reaching shadow of the castle walls, are seated some fifty or sixty women, each with a stock of bread, dates, milk, vegetables, or firewood before her for sale; around are crowds of loiterers, camels, dromedaries, sacks piled up, and all the wonted accompaniments of an Arab market."

(To be continued.)

For "The Friend."

With the necessary allowance for different ways of looking at the mysterious union and inexpressible distinction of time and eternity, of body and spirit, I have thought the following observations might now be interesting and seasonable to many readers.

R.

"It now remains that what is yet behind of his sufferings and afflictions be filled up in us." (Col. i. 24.) His sufferings are not ended; "For as the sufferings of Christ abound in us, so our consolation also aboundeth by Christ," (2 Cor. i. 5.) Again, "As ye are partakers of the sufferings, so shall ye be also of the consolation." (5. 7.) "If so be that we suffer with Him, that we may be also glorified together." (Rom. viii. 17.) Here we suffer with Him expressly in order that we may be glorified together. "If we be dead with Him, we shall also live with Him; if we suffer we shall also reign with Him; if we deny Him, He will also deny us." (2 Tim. ii. 11, 12.) "Rejoice inasmuch as ye are partakers of Christ's sufferings." (1 Pet. iv. 3.) "That I may know him, and the power of his resurrection and the fellowship of his sufferings, being made conformable unto his death." (Phil. iii. 10.) This is the baptism that now saves us. It is not a figure. We never receive remission of sins, but in the fellowship of the sufferings of Christ, and conformity to his death. This was always the only way. So that of old, when blood was taken for atonement, and no remission was had without blood, the outward was but the shadow, and of itself procured no remission, no reconciliation. It is, through all time, only by the death and sufferings of Christ that we can be, or any could be, reconciled to God. And as none obtained these blessings by the offerings themselves, without knowing in themselves a death to sin, a fellowship in the sufferings of the Holy Seed, so none can now receive it otherwise.—*Job Scott.*

Fishing with Cormorants.—In spite of the voracity of the cormorant he always remains thin and meagre, the picture of a hungry parasite. But fishing he understands remarkably well, and formerly used to be trained for this purpose in England, in the same manner as a nearly related species is to the present day employed in China. An observer thus

describes this curious employment which witnessed on the Yellow River: "There were two boats, each containing one man, a boat ten or twelve birds. The latter sat perched on the sides of the boats, and seem to have just arrived upon the scene of action. Their masters now commanded them to lay the boats; and so excellent was their training that they instantly obeyed, scattered the selves over the canal, and began to look prey. They have a splendid sea-green and quick as lightning they see and dive up the finny tribe, which, once caught in sharp notched bill, finds escape impossible. As soon as a cormorant rises to the surf with his prey in his bill, his master calls when, docile as a dog, he swims to the boat and surrenders the fish, after which he resumes his labors. And what is more wonderful still, when one of them has got hold of a fish so large as to be with difficulty dragged to the boat, the others come to his assistance and by their united strength secure the prey. Sometimes when a cormorant is lazy or playful, and seems to forget his business, Chinaman strikes the water with a long bamboo near to the dreamer, and calls out to him in an angry tone. Immediately the bird, a school boy caught nodding over his lesson gives up his play, and returns to his duty. A small string is tied round the neck of the bird for fear they might be tempted to swallow the fish."

Selected for "The Friend."

A Testimony from England in 1845.

There is a spirit in this land that is trying to insinuate itself into the church, and we vainly persuade the Daughter of Zion to believe, that "more liberty is now granted her children than could have been in the *ginning*; that this is a different age of world, and a different state of the church of things altogether." And these things by the living members into great straits, cause them to go heavenly on their way, are not to remind the children of the dar of the love of dress, &c., "for their minds not in such trifles." We are not to tell them that "foxes have holes and the fowls of air have nests, but the Son of Man hath whereon to lay his head," "because they have a little fur about them." * * * I have ventured to tell some, that I hope we have not lost the *Quaker badge*. And yet among all this "light stuff" there is that which is excellent; things that are true and just, things that are lovely, and of good report so if there is any praise, or any virtue ought to think on these things. But that chaff will be sifted out, without a grain the weighty wheat falling to the ground have not a doubt; and the testimony of *T* given this people to uphold, in the face of world, will be supported by others, who come in by conviction. How many, many times, have I thought of late of centurion's conversion; and how our blessed Redeemer should have marvelled at his faith and said, "many shall come from the east, the west, and shall sit down with Abrahah Isaac, and Jacob in the kingdom of heaven. But the children of the kingdom shall be put into outer darkness." If this should open to us, as a people, through unfaithfulness what a mournful thing it will be.—*S. Emlen.*

For "The Friend."

Annual Report of the Women's Aid Association.

again coming before our friends we wish to express our gratitude to those whose generosity has enabled us to relieve much suffering among the Freedmen.

Our endeavor to render assistance mostly to the aged and infirm, and to destitute children attending the schools under the care of the Freedmen's Association.

In some instances the board and salary of officers have been defrayed by our Association after the term for which they had been engaged had expired, thus lengthening the term and enabling the poorer pupils to remain in the schools who, from inability to pay the stipulated fee required for the board of teachers, would otherwise have been expelled from attendance. In one case the amount was increased by 75 scholars by this arrangement.

Several hundred dollars were expended last year in opening and supporting soup houses at Hillsboro', Lincolnton, Charlotte, Hillsboro' and Salisbury, N. C., and at Danville, Va. was a new feature in those communities, was a great comfort to many suffering from want.

These soup houses have been reopened this winter. Care is taken to have the soup palatable and nutritious. On soup days the people flock to the houses with their tin kettles and cans to receive their portions of it and carefully carry it away to their cold and dry families. In this way, by a comparatively small outlay, many are relieved from the pressure of hunger.

Contributions of money have been made by Miss A. Clark, Helena, Arkansas, and by Mrs. C. Mather, Beaufort, S. C., to enable our friends to continue the good work of sheltering and training orphan children. Those from the latter establishment are generally provided with good homes in families residing in New England.

Supplies of material, made and unmade, or ready-made, in some cases both, have been sent to Hillsboro', Beaufort, S. C., to Hillsboro', Lincolnton, Salisbury, Charlotte and Salem, N. C., to Clover, Hanover Co., Alexandria and Danville, Va., and to Knoxville, Tenn. Last month an appeal was issued asking contributions of half-worn clothing, &c. It has been kindly responded to, and 453 articles received have been immediately forwarded to the South. Five dollars from an old friend, have been expended in shoes. The garments enumerated above several boxes of clothing have been shipped daily to A. H. Jones by the donors. These worn garments, many of them for men, boys, and of substantial make and material, have been specially acceptable for distribution among the Freedmen.

The field for work is an open one, we find the most immediate opportunity for the employment of all the funds we can collect, and have every reason to believe that they are well applied.

Our prompt and timely cooperation the national work of the Freedmen's Association is much facilitated. Children who could otherwise attend the schools, are enabled to do so comfortably clad in the warm flannel or heavy linsey we have sent. Sewing tools are maintained, the patient teachers instructing the women and girls not only in sewing up but in cutting and fitting gar-

ments—a work for which, in former times, they were entirely dependent upon their mistresses.

We have now in hand, the continued support of the soup houses (so long as the cold weather lasts these will be needed), the support of "exempt class" of destitute children at Hillsboro', *i. e.*, exempt from tuition fees, and a monthly allowance to a visitor among the poor at Charlotte, N. C.

We shall probably be called upon for further supplies of unmade material and shoes.

In addition to these things we have assumed the expense of transporting from North Carolina to the comfort of a home at the "Shelter for Colored Orphans," in West Philadelphia, twelve destitute orphan children. With them will come, if nothing should prevent, a poor crippled boy, Jerry Brown, for whom we have undertaken to pay board in some respectable colored family here in the city.

In meeting these various expenses our slender resources will be heavily taxed, and we invite those interested in this work to strengthen our hands in it by liberal contributions.

By direction of the Association,
SARAH LEWIS, *Secretary*.

SARAH W. COPE, *Treasurer*.
First mo. 6th, 1872.

In compliance with the request of our friend, I. Cox, we give space for the following report. It is a satisfaction when any of the now frequent "General Meetings" are held, without any of the testimonies of the Society being laid waste. But these assemblies are so numerous, and many of the proceedings therein often so contrary to what Friends here heretofore believed to be required of them, that we feel restrained from generally admitting accounts of them into our columns. We should have been glad had the committee discarded the novel, and, as we cannot but think, unwise imitation of other professors, in appointing a *chairman*. Time was when Friends generally, wanted none other to preside over them but the Head of the Church.—Eps.

For "The Friend."

After a favored Quarterly Meeting at Deep River, on the 20th inst., a number of the Yearly Meeting's Committees on General Meetings convened and reappointed Allen Jay, chairman, and Isham Cox, clerk, and then adjourned until 10 o'clock Second-day morning.

On First-day two meetings for worship were held, both in the fore and afternoon, acknowledged to be seasons of favor from the Master of assemblies. Faithful laborers from various parts of our own, and a few from other Yearly Meetings were acceptably with us,

and earnestly engaged in labor. On Second-day a crowded audience listened attentively to the Gospel as it was preached in demonstration of the Spirit and with power. The secret aspiration of many hearts doubtless was, "Bless the Lord, oh my soul, and forget not all his benefits." A concern was felt and united with, to devote the afternoon session more especially to the instruction of the children; the necessity of watchfulness and prayer was feelingly dwelt upon, and the tendering influence of the Spirit of God was felt to bind the assembly together in the love and fellowship of the Gospel.
